The terms of the proposed Final Judgment are phrased in the conventional language of such settlements and it is not necessary at this juncture to go into great detail describing the numerous protective provisions which **[*6]** *are customarily to be found. In summary, the DOJ agrees to consent to the acquisition by LTV of Republic on condition that two Republic plants, one at Gadsden, Alabama, and the other at Massillon, Ohio, be divested. "Prompt and certain divestiture is the essence of the agreement . . ." according to the preamble (p. 1). The purchasers are required to demonstrate to the DOJ or, if the DOJ objects, to the court, that (1) the purchase is for the purpose of competing effectively and (2) that the purchaser or purchasers have the managerial, operational and financial capability to compete effectively. The divestiture of each facility is required to take place within six months of the date of the judgment but no later than December 1, 1984. They are to be accomplished free and clear of all mortgages and encumbrances including pension and termination rights which shall continue to be the obligation of the defendants. In addition, the purchaser of Massillon is to receive from defendants a long-term contract to supply the purchaser with stainless steel hot bands on such terms as to enable the purchaser to compete effectively in the manufacture of cold rolled stainless steel and strip. In the* **[*7]** *case of Gadsden, the defendants, at purchasers' request, agree for 6 months to sell for use at Gadsden certain necessary raw materials. In each case, the purchaser agrees to operate the facility acquired as a viable and ongoing business. If the divestitures do not take place within the specified period, the court, on the application of the DOJ shall appoint a trustee to effect the divestitures.*

The adequacy of such divestitures in meeting DOJ's original February 15, 1984 objections to the merger, forms the basis of the participants' criticisms, and is central to our determination of whether the entry of this judgment is in the public interest.

4. The Competitive Impact Statement

On March 22, 1984, the DOJ submitted to the court a Competitive Impact Statement as required by § 2(b) of the APPA, 15 U.S.C. § 16(b). [4] After describing the history of the proceeding, the three product markets specified in the complaint, and the nature of ultimate use of each product, it sets forth the 1983 market shares of each defendant in each of the three product markets as follows:

(a) Cold and alloy hot rolled sheet and strip:

---

[3] *On May 8, 1984, counsel for Cyclops attempted to obtain from the Department of Commerce, under the Freedom of Information Act, all of its documents relating to the proposed merger. In its response, Commerce listed 18 documents concerning its activities on the merger which it declined to produce under the deliberative process exemption of FOIA. 5 U.S.C. § 552(b)(5). Comments by Cyclops Corporation, Ex. A. On May 1, 1984, this court, after hearing, denied the requests of Wheeling-Pittsburgh of April 6, 1984 and of Cyclops of April 23, 1984, for the production of documents concerning the proposed merger.*

[4] *As required by 15 U.S.C. § 16(b), the entire text of the proposed Final Judgment, the Competitive Impact Statement, the stipulation between the parties and an introductory explanation of the nature of the proceedings and the provisions for public comments were published in the Federal Register on April 5, 1984. 49 Fed. Reg. at 13603-09.*

J & L - 12.6% (2nd largest)

Republic - 8.2% (6th largest)

(b) **[*8]** *Cold and alloy cold rolled sheet and strip:*

J & L - 13.5% (2nd largest)

Republic - 8.4% (7th largest)

As the result of the merger, LTV would be the largest producer of carbon and alloy hot and cold rolled sheet and strip.

(c) Stainless cold rolled sheet and strip:

J & L - 37.5% (largest)

Republic - 9.9% (4th largest)

It would also be the largest producer of stainless cold rolled sheet and strip.

In calculating the effect of the merger on market concentrations, the Statement recognized that imports can have an important competitive effect on these markets, but pointed out certain trade restrictions applicable to imports from the EEC (percentage quota agreement on steel products) and from Japan (voluntary limitation on steel products). All domestic shipments and capacity and all imports of relevant products--except **[*9]** *those from EEC and Japan--were included in its measurements of the degree of concentration. Thus defined, the original merger would increase the Herfindahl-Hirschman Index (HHI)* [5] in hot rolled carbon and alloy strip from 871 to 1047; in cold rolled carbon and alloy strip from 953 to 1146; and in stainless cold rolled sheet and strip from 2190 to 2898.

The proposed Final Judgment, according to the Impact Statement, would scale down the original merger proposal by requiring the complete divestiture of Republic's Gadsden and Massillon steel mills within six months **[*10]** *of the date of the proposed Final Judgment. The purchaser is required to be one who can and will operate the same as a viable and ongoing business which can compete in its area of steel production. It is provided that a trustee will be appointed if the sale cannot be achieved within five months but no later than November 1, 1984. In its description of the divestitures, the Statement generally tracks the provisions of the proposed Final Judgment.*

In perhaps the most significant portion not covered by the proposed Final Judgment, the Statement discusses the alternatives that were considered and rejected. In the case of Gadsden, which is not one of the largest carbon and alloy sheet facilities operated by defendants, divestiture of this mill will reduce the increase in market concentration as measured by the HHI by almost one-third. That fact, combined with the financial condition of defendants and possible efficiencies resulting from the merger, led to the conclusion that the merger as restructured would not be anti-competitive. In the case of Massillon, it is claimed that the divestiture would entirely eliminate any increase in concentration in cold rolled stainless sheet and strip, **[*11]** *since all of Republic's production of such product is located in Massillon. To assure the economic viability of the divested plant, the Statement indicates that the proposed Final Judgment provides that defendants, under a long-term contract, will supply to the purchaser stainless hot rolled sheet and strip. Much of that supply will come from LTV's Midland, Pennsylvania plant, a high quality and low cost producer. After considering the divestiture of Midland, an integrated stainless steel mill, in lieu of Massillon, it was concluded that the divestiture of Massillon in combination with the long-term supply commitment from LTV would be sufficient to prevent undue concentration in the stainless cold rolled sheet and strip market.*

---

[5] *The Herfindahl-Hirschman Index, which was recently employed in developing the Department's revised merger guidelines, is a measure of seller concentration in a market. 1982 Merger Guidelines, 2Trade Reg. Rep. (CCH) para. 4,500 at 6,881-2. It is calculated by squaring the percentage market share of each firm in the market and then adding those squares. It is arguably a more accurate measure of market concentration than two-firm or four-firm concentration ratios, which merely are sums of the market shares of those firms, because it takes into account both the number and size distribution of all sellers in a market.*

Finally, in order to prevent the exchange of pricing and production information among competitors in the domestic steel industry, defendants are prohibited from participating in the exchange of such information through the American Iron and Steel Institute (AISI) for a period of ten years. According to the Statement, the Final Judgment would also not require the divestitures to take place prior to the consummation of the merger. This departure from the government's **[*12]** *previous policy of "fix it first" was based on the delays which had occurred after the original agreement to merge, the alleged deleterious effects of further delay, and the assurances of prompt divestiture made by defendants.*

B. PUBLIC COMMENTS OF THE LTV-REPUBLIC MERGER AND THE DEPARTMENT'S RESPONSES

Following the publication in the Federal Register on April 5, 1984 of the proposed Final Judgment and the Competitive Impact Statement, written comments were filed within the statutory 60-day period and also published in the Federal Register. [6] We have reviewed the four comments submitted, as well as the DOJ's and defendants' responses thereto. *15 U.S.C. § 16(f)(4). We turn now to these comments.*

1. Cyclops Corporation **[*13]** *(Cyclops)*

Cyclops opposes entry of the proposed Final Judgment only as it relates to stainless steel. It focuses its attention on the divestiture of Massillon, Republic's sole producer of stainless cold rolled sheet and strip.

Cyclops holds a 3% share of this market, one of the three product markets cited in the complaint. As shown previously, LTV (J & L Specialty Steels, Inc.) is the largest producer of stainless (37.5%) and Republic is fourth in size (9.9%). Cyclops presents two arguments why the proposed merger is contrary to the public interest. First, it contends that the proposal violations Section 7 of the Clayton Act by lessening competition, a condition which the Massillon divestiture would not remedy. Second, it maintains that the proposed merger is contrary to public policy limiting foreign imports. Thus, Cyclops, as a buyer of hot bands, asserts it is threatened by the lessening of competition among sellers of hot bands and that Massillon, for a variety of reasons, will not prove a viable competitor in stainless cold rolled sheet and strip.

The government, by way of response, asserts that Cyclops will not lack sources of supply for hot bands after the Massillon divestiture. **[*14]** It points out that Cyclops does not purchase hot bands from Republic--which sells virtually no hot bands to anyone--and that LTV's Midland plant, even after supplying Massillon, has excess capacity to meet Cyclops' needs. So too do Armco, Allegheny Ludlum, and Washington, have such excess capacity.

Despite the provision that LTV enter into a ten-year contract with the purchaser of Massillon to supply hot bands on favorable terms--a timeframe which Cyclops regards as inadequate--Cyclops raises multiple objections to that arrangement. First, Massillon's present productive capacity and market will be taken over by LTV, which has access to Massillon's customer lists. Second, Massillon will be subject to an LTV price freeze due to LTV's increasing the price of hot bands from Midland, the purchaser's disadvantage of having to pay LTV's 10% mark-up under the supply contract, and Massillon's general non-competitiveness (its plant is antiquated and requires expensive capital improvements). In sum, according to Cyclops, divestiture of Massillon's productive capacity will not result in a corresponding divestiture of Massillon's present market share. As a result, the anti-competitive effects **[*15]** of the original merger proposal will not be eliminated. As an alternative, Cyclops proposes that LTV's Midland plant be divested, and evinces an interest in acquiring that facility.

The government challenges all of these claims, stating its understanding that Massillon, despite its need for modernization, is profitable, whereas Republic is not. According to the government, Massillon can also be quickly sold and operate at a profit. As to LTV's taking over Massillon's customers with the help of its excess capacity, the government points out that LTV has not yet succeeded in doing so. It discounts Cyclops' criticism concerning the

---

[6] *As required by 15 U.S.C. § 16(b), all comments received and the DOJ's responses thereto were published in the Federal Register on July 19 and July 20. In compliance with 15 U.S.C. § 16(c), a summary of the proposed consent decree and the Competitive Impact Statement, and information concerning the filing of comments and the availability of documents for public inspection was published in The Washington Post on April 5 through April 11, 1984 inclusive.*

alleged inadequacies of the long-term supply contract. It emphasizes that Republic's entire interest in the relevant product market of cold rolled stainless sheet and strip will be divested, and that LTV's present level of concentration will consequently remain the same. The government also dismisses as unlikely a purchase by a foreign steel company having its own supply of hot bands, due to the number of interested inquiries from domestic companies concerning the purchase of Massillon. Admitting the applicability of anti-dumping laws, the DOJ denies that **[*16]** there is any public policy limiting either foreign imports or the ownership of United States manufacturing plants by foreign suppliers. The government considered the divestiture of Midland but rejected such an alternative as unnecessary in view of Massillon's divestiture and the injunctive provisions designed to ensure its competitive viability.

2. *Wheeling-Pittsburgh Steel Corporation (W-P)*

W-P's opposition is directed against the proposed Final Judgment as it relates to the other two product areas listed in the complaint: hot and cold rolled carbon and alloy sheet and strip. W-P is the eighth largest steel producer in the United States. It is one of the smallest integrated producers, with about 3% of domestic capacity. On the other hand, LTV and Republic, when merged, would occupy over 20% of both product markets. Objections to the proposed merger are straight-forward. First, as a horizontal merger of the 2nd and 6th largest steel producers in an industry which is already highly concentrated, the merger violates Section 7 of the Clayton Act and will lead to possible predatory pricing and restriction of credit. Second, the proposed divestiture of Gadsden does not remedy **[*17]** the violation.

With respect to the matter of market concentration, W-P points out that the original merger proposal, which is the subject of the complaint, would cause increases in the HHI as follows:

carbon and alloy *hot* rolled sheet and strip from 1013 to 1219

carbon and alloy *cold* rolled sheet and strip from 1104 to 1330.

The proposed Final Judgment with the divestiture of the Gadsden plant would, according to the DOJ estimates, reduce the increase in concentration by approximately one-third. In the case of hot and cold rolled carbon and alloy strip, the HHI would be approximately 1000 and 1100, respectively, with increases in each market of less than 150. [7] W-P correctly points out that both the original merger and the scaled-down proposal conflict with the DOJ's 1982 Merger Guidelines. The latter consider a transaction as presumptively illegal if the HHI is in the post-merger range of 1000-1800 and the merger will increase the HHI by over 100 points.

On another matter, W-P asserts **[*18]** that the divestiture of Gadsden will not mitigate the adverse effect of the merger on market competition for several reasons. First, assuming Gadsden can be successfully sold and operated at or near capacity, there is still, as pointed out above, an HHI level of concentration in excess of the guidelines. Second, there is substantial doubt that Gadsden can be sold and operated as an effective competitor in the market for hot and cold rolled carbon and alloy sheet and strip. W-P supports this assessment of Gadsden's future viability by reliance on quoted comments from a number of influential sources, including spokesmen for the merging parties, the trade and public press, and industry analysts. The shutting down in 1982 of certain portions of the Gadsden facility, current problems with air pollution, rejection of a proposal for investment in new equipment, and the geographic remoteness from customer located in the Great Lakes Region are cited as examples of the problems facing Gadsden.

If a buyer cannot be found within a year, the parties to the merger are not obligated to continue to operate the mill pending a sale. W-P argues that, in the case of Gadsden, divestiture prior to the **[*19]** merger should have been made a condition precedent, and that the DOJ's departure from its normal "fix it first" policy is not only not justified under the circumstances of this case but is inadequately explained. W-P suggests that the divestiture of some plant other than Gadsden is necessary, and that, at the very least, the DOJ should be ordered to comply with its "fix it

[7] The original merger HHI's calculated by the DOJ were increased by 176 to 1047 in hot rolled carbon and alloy steel and by 193 to 1146 in cold rolled carbon and alloy.

first" policy. The merger also cannot be justified in W-P's view, for reasons of cost efficiencies, which Mr. McGrath discounted in his February 15, 1984 statement rejecting the original proposal, or for reasons relating to the "failing firm" defense on which neither of the defendants relies. W-P finally asserts that there is a close political connection between the DOJ's shift in approving the merger and the United States Trade Policy opposing quotas on imports of foreign steel.

In responding to W-P's comments, the DOJ explains the context of the government's decision. As restructured, the merger HHI Indices would not be increased significantly above the minimum levels at which the DOJ would, under the 1982 guidelines, be "more likely than not" to challenge a merger. Conceding that imports could not be completely **[*20]** ignored, the DOJ does not include, in computing the size of the domestic market, imports from the EEC or Japan, the two largest sources of imports. Those imports were subject to voluntary quotas or other limitations. In the event of a trial, the DOJ anticipates that at that time, the defendants would seek to include in their calculations all imports at their present levels. That would have the effect of reducing the HHI Indices for hot and cold rolled sheet and strip below 1000. In addition, the DOJ would expect the defendants to assert as an affirmative defense the fact that both LTV and Republic had suffered substantial losses in 1982 and 1983--losses which are continuing up through the present quarter of 1984. The defendants would also point to significant savings and operating efficiencies resulting from the merger. The government can not predict the outcome of such a prosecution. The proposal is admittedly a compromise reflecting these uncertainties. It was asserted also that the recent abandonment of a pending merger between United States Steel and National Steel, which would have brought together two companies controlling 50% of the domestic sheet market, made it easier for **[*21]** the government to reach this compromise.

As for the divestiture of Gadsden, which currently produces 15% to 20% of Republic's total sheet production, the DOJ asserts that this action will reduce the HHI in hot and cold rolled sheet and strip to 1006 and 1091, respectively. The government further understands that considerable interest has been manifested on the part of potential buyers, particularly since the buyers would not have to assume the burden of an unfavorable iron ore contract. Among such potential buyers would likely be foreign producers threatened by substantial restrictions of imports. The government would not object to their entry.

In conclusion the government regards Gadsden as a saleable property, which can be sold to a qualified buyer and profitably operated as a viable competitor in the domestic market. It defends its failure to insist on the "fix it first" policy as justified by the deteriorating financial condition of the companies which would be aggravated by further delay. The maintenance of high levels of production with resulting lower prices during the deep depression of the past few years was not as W-P contends an example of predatory pricing on the part **[*22]** of the larger companies, but an effort to survive by attempting to cover fixed costs. Finally, while opposed to quotas on imports, the DOJ reached its decision on the merits of the proposed settlement without regard to the Administration's policy regarding imports.

3. *Bliss Laughlin Steel Co. (BLS)*

BLS objects to the proposed Final Judgment as drafted and asks that it be modified to require divestiture of Massillon's bar facilities as well as those producing stainless steel. BLS is a producer of cold finished bars and ranks third in bar market share behind LTV and Republic. It, unlike LTV and Republic, is a non-integrated producer, which must purchase hot rolled bars as its raw material. It claims the merger will have substantial anti-competitive effects in the cold finished and hot rolled bar markets due to the enhanced market position of LTV. Injury to BLS and other smaller competitors will result. Noting that the complaint has not challenged the effect of the merger on the bar market, BLS asserts that the increased concentration in the bar market is comparable to the increase in the HHI found unacceptable by the DOJ in the case of hot and cold rolled sheet and strip, and **[*23]** stainless. In the case of cold finished bars and hot rolled bars, the HHI shows an increase from 954 and 1232 to 1562 and 1832, respectively. BLS also urges that the entire Massillon facility be divested, including that portion devoted to the production of cold finished bars. That would eliminate in the bar market, as in stainless, any anti-competitive increase in concentration. According to BLS, there is a nationwide cold finished bar market in which there are 48 U.S. producers. BLS produces a type and quality of steel bar suitable for a variety of special uses. Excluding imports, BLS is estimated to have 7.85% of this cold finished market in 1984, as compared with 34.97% for LTV if the proposed Final Judgment is approved. This represents an HRS of 1562--an increase of 608. Aside from this increase in the HHI, which under the 1982 Guidelines would "more likely than not" cause the DOJ to challenge the merger, the so-called "other factors" to be considered all increase the likelihood of a challenge. These are (1) the close location of certain portions of the merging firms and the similarity of their products; (2) the fact that orders for the relevant product are frequent, regular and **[*24]** small relative to the total output of the typical firm (BLS being a typical producer of cold finished bars); and (3) the ready availability to competitors of detailed information about specific transactions, prices and output levels.

In addition, BLS objects to the proposed acquisition because of its effect on the hot rolled bar market, of which BLS is a customer. The merger would give LTV a total market share of 37.03% and would result in an HHI for hot rolled bars of 1832--an increase in concentration of over 600 points. This would produce the same anti-competitive consequences as in the cold finished bar market discussed above, since LTV, due to its dominance, would be able to set the price for hot bars while simultaneously competing in the cold bar market. This, in turn, will have an adverse effect on BLS which, as a non-integrated producer, is a customer in the hot bar market. The entry of a number of "mini-mills" in the hot bar market is not a satisfactory answer, because of differences in methods of production. Those differences cause the quality of steel to vary from that produced by larger hot bar mills. The cold finished bar industry is only about 1.7% of the entire United **[*25]** States steel market and it would not prove economical for a non-integrated producer to build a mini-mill to supply raw materials for cold bar production. In BLS's view, the only satisfactory solution to the increased concentration in the cold finished and hot bar markets is the complete divestiture of Massillon's bar facilities which produced 75-80% of the total Republic bar product.

The DOJ's response to BLS's comments is based on both procedural and substantive grounds. Procedurally, the DOJ asserts that the BLS objections are not relevant to this proceeding since no violation stated in the complaint relates to the bar market, nor is that subject touched on in the proposed settlement agreement. The Tunney Act states that in making its determination concerning whether the entry of the judgment is in the public interest the court must consider, among other things, (1) the competitive impact of the settlement, including termination of alleged *violations;* and (2) the impact on the public generally and an individuals alleging specific injury *from violations set forth in the complaint.* 15 U.S.C. § 16(e) (emphasis supplied). [8] The DOJ in its discretion did not address the issue **[*26]** of bar markets and, under such circumstances, the appropriate remedy is a private suit under Section 4.

On the substantive side, the DOJ disputes the BLS claim of undue concentration in the bar markets as measured by the HHI, asserting that its computation of market shares is substantially lower than that of BLS. It points out that the bar and sheet markets are considerably different, that there are many more bar producers than sheet producers, and that the nature of bar markets is changing under the growing influence of mini-mills (producing cold finished bars) which are pushing integrated competitors out of this business. A number of these mini-mills do not report shipments to the AISI, but, based on its calculations, the DOJ estimates that after the merger, the HHI in hot rolled and cold finished bar markets would be at or near 1000. The ability of large, integrated producers such as LTV and Republic **[*27]** to influence price competition in the market for cold finished bars and hot rolled bars after the merger is offset by diminished barriers of entry spearheaded by these new producers. There are now, according to BLS, 48 mini-mills in the cold bar market. As for the hot bar market, there were at least 31 producers of hot bars in 1982. If LTV decided to raise the price of hot bars, BLS could receive its supply of hot bars from one or more other hot bar producers. Accordingly, the DOJ concludes that the merger, as it affected the hot and cold bar markets, would not violate Section 7 of the Clayton Act.

4. *The United Steelworkers of America (USA)*

The USA states that it is not opposed to the merger but is concerned that the required divestitures of Massillon and Gadsden are "thinly veiled excuses for closing plants and laying off workers." It therefore opposes the divestitures,

---

[8] "APPA under the circumstances of this case [does not] permit or require the Attorney General to assert additional claims not alleged at the outset of the case." United States v. Mid-America Dairymen, Inc., 1977-1 Trade Cas. (CCH) para. 61,508 at 71,973, 71,979 (W.D.Mo. 1977).

because in its view, the plants will be ultimately closed and jobs lost. For a number of reasons, the USA does not believe that either plant can survive as a divested entity. In the case of Massillon, USA states that the former is an antiquated facility in need of extensive capital improvements, and dependent **[*28]** on LTV for its supply of hot bands under the long term supply agreements. It is likely that Republic's hot rolling plant at Canton, Ohio will be phased out due to LTV's provision of Massillon's hot band requirements out of the Midland facility. As for the carbon steel mill at Gadsden, the steelmaking segment requires substantial investments which would prevent it, if divested, from functioning as a viable competitor. If Gadsden is not sold, but closed, 2,200 jobs will be lost.

The DOJ responds that the merger could not be approved without the divestitures and that the purpose of the proposed Final Judgment is to preserve these two plants as viable competitors in their respective markets. It does not anticipate that either plant will be closed and it would not approve the sale to any purchaser likely to close the mill after reaping short term profits. It recognizes that no one can guarantee that any mill will remain in operation indefinitely and that recent closings of steel mills and loss of jobs has occurred through the action of the steel companies themselves and not as the result of divestitures. It regards the proposed settlement as consistent with the goals of USA to preserve **[*29]** jobs.

5. *Response of LTV and Republic to Comments on Proposed Final Judgment*

The goal of these respondents, parties to the proposed Final Judgment, is "to place the transaction in its proper perspective and demonstrate that it is pro-competitive, does not violate the antitrust laws and that the proposed judgment is in the public interest." Response of LTV and Republic to Comments on Proposed Judgment, at 1.

With respect to the carbon and alloy steel markets, defendants contend that the merger will produce operating efficiencies which will enable the surviving company to be a more effective competitor in the world steel market. They point to the declining state of the United States steel industry due to shrinking consumption and growing imports. That decline has caused huge recurring losses, lack of funds for capital improvements, inefficient facilities and unutilized capacity. Defendants asserts that LTV, during 1982 and 1983, lost approximately a half billion dollars before taxes in its carbon and alloy business. These were covered by cash advances which are expected to increase substantially in the next several years. Republic also finds itself in a similar weakened position, **[*30]** *with pre-tax losses of $ 474 million in 1982 and $ 394 million in 1983. Defendants describe numerous changes which will enable the merged company to operate as a "more efficient, lower cost, competitive entity, and which are estimated to produce cost savings of $ 343 million or $ 27 per ton of steel. While the precise amount of these efficiencies is subject to dispute, it is claimed that they will be substantial, thus providing the entire rationale for the merger. There is no dispute that the merging companies have sustained heavy losses and are in a weakened financial condition. While neither the DOJ nor the companies have asserted the "failing company" defense, the basic fact of their current financial predicament is relevant to their ability to survive alone.*

The present plight of the United States steel industry is attributed in no small part of the threat of foreign competition and to foreign imports which in 1982 accounted for 22% of the domestic market and now account for some 25% of that market. This has made the domestic industry less competitive at home and has produced plant closings with large losses of jobs. By failing to acknowledge that the relevant market is world-wide **[*31]** *and that actual imports from Japan and the EEC should be included in calculating the HHI under the Merger Guidelines, the DOJ made a mistake when it determined that the merger as originally proposed was anit-competitive and monopolistic and violated the anti-trust laws. According to defendants, the HHI for hot rolled sheet and strip was actually 833 while for cold rolled sheet and strip it was 939. This contrasts with the DOJ HHI of 1047 and 1146. With the divestiture of Gadsden, the degree of concentration as measured by the HHI should be even less.*

With respect to the stainless stell market, defendants argue that the requirement that Republic divest itself of Massillon leaves the market unchanged and will not result in increased concentration. Defendants also direct certain comments to the several objections of Cyclops concerning the viability of Massillon as a future competitor and Cyclops' ability to purchase hot bands for its cold rolled stainless product. These objections have been previously addressed in the DOJ's response to Cyclops' comments and will not be repeated.

To summarize the defendants' argument, the steel industry is in a state of severe depression. Separately, **[*32]** *the defendants cannot generate funds for capital improvements in plant and equipment without which they cannot meet foreign competition. The merger will produce savings in the cost of operation and in the amounts otherwise necessary for capital improvement. The consolidation combines two weakened companies and will permit the merged company to function as an effective competitor in the world market. Defendants urge that the proposed Final Judgment is in the public interest and should be approved.*

C. STANDARD OF REVIEW

HN1[] *The standard of review of anti-trust consent decrees is established by Section 2 of the Tunney Act, which provides:*

(e) Before entering any consent judgment proposed by the United States under this section, the court shall determine that the entry of such judgment is in the public interest. For the purpose of such determination, the court may consider--

(1) the competitive impact of such judgment, including termination of alleged violations, provisions for enforcement and modification, duration or relief sought, anticipated effects of alternative remedies actually considered, and any other considerations bearing upon the adequacy of such judgment;

(2) the **[*33]** *impact of entry of such judgment upon the public generally and individuals alleging specific injury from the violations set forth in the complaint including consideration of the public benefit, if any, to be derived from a determination of the issues at trial.*

15 U.S.C. § 16(e).

According to the legislative history of the Tunney Act, the avowed purpose of the public interest determination requirement was to remedy the "'judicial rubber stamping' by district courts of proposals submitted by the Justice Department." To achieve this purpose, it required public disclosure of the reasons for, and terms of, proposed settlements with an opportunity for public comment as well as an express judicial determination that the proposal is in the public interest. H. R. Rep. No. 1463, 93d Cong., 2d Sess. 4, reprinted in 1974 U. S. Code Cong. & Ad. News 6535, 6538. *See generally* Note, "The ITT Dividend: Reform of Department of Justice Consent Decree Procedures," 73 Col. L. Rev. 594 (1973)(discussing the public interest requirements of the Tunney Act and the impetus for changes in procedures for review of anti-trust consent decrees). [9]

[*34] ***HN2***[] The public interest is to be determined in the context of the anti-trust laws whose fundamental premise is the protection and safeguarding of free competition. The effect on competition of the proposed settlement is of paramount importance in the determination which we are required to make. Other factors, however, enter into the calculus. Any remedy should be framed with a view to causing the least possible injury to interests of the general public and relevant private interests. The court should consider the impact of the remedy in relation to other important public policies and avoid any unnecessary conflict or friction. It is not free, in making its public interest determination, to decide whether the settlement is the best that could have been reached or, if not, to substitute its own separate notions as to the proper remedy.

Finally, despite the fact that the 1974 Tunney Act appears to require a higher level of judicial scrutiny of consent decrees than was previously the case, it is clear that the Act was not intended to discourage settlement of government anti-trust suits. [10] H. R. Rep. No. 1463, 93d Cong., 2d Sess. 5, *reprinted in* 1974 U. S. Code Cong. &

[9] For a more complete history of the Tunney Act, attention is directed to the opinion of Judge Harold Greene of this court in the AT&T case. *United States v. American Tel & Tel Co., et al., 552 F. Supp. 131, 148-49 (1982)*.

[10] It has been estimated that almost 80 percent of the anti-trust suits filed by the DOJ terminate in consent decrees. "The ITT Dividend" at 595 (1973).

Ad. News at 6539 **[*35]** *(quoting* S. Rep. 298, 93d Cong., 1st Sess.). As with any form of settlement, the consent decree process saves the parties the considerable time and expense of litigation. In the particular context of anti-trust litigation, the consent decree mechanism permits the DOJ to spread its limited resources over more suits and, thus; achieve broader enforcement. In the current fiscal climate, the consent decree mechanism plays a significant role in the DOJ's enforcement scheme.

Therefore, ***HN3***[] our function in reviewing anti-trust consent decrees is, as Senior Circuit Judge Bailey Aldrich has stated in an oft-quoted opinion, not . . . *to determine whether this is the best possible settlement that could have been obtained,* if, say, the government had bargained a little harder. The Court is not settling the case. It is determining whether the settlement is within the reaches of the public interest. Basically . . . [we] must look at the overall picture not hypercritically, nor with a microscope, but with an artist's reducing glass. **[*36]** (emphasis supplied).

United States v. Gillette Co., 406 F. Supp.713, 716 (D. Mass. 1975). *Accord* *United States v. Agri-Mark, Inc., 512 F. Supp. 737, 739 (D. Vt. 1981)*; *United States v. National Broadcasting Co., Inc., 449 F. Supp. 1127, 1143 (C.D.Cal. 1978)*; 2 P. Areeda & D. Turner, ***Antitrust Law*** § 330g, at 147-48 (1978). Although under our statutory authority, we are required to scrutinize closely all consent decrees, we are not unmindful that the power to negotiate the terms of any particular consent decree is lodged in the Executive Branch. *United States v. Associated Milk Producers, Inc. 394 F. Supp. 29, 42 (W. D. Mo. 1975)*, *aff'd*, *534 F. 2d 113 (8th Cir.)* *cert. denied, 429 U.S. 940 (1976)*. It is in light of this background that this court has considered the foregoing submissions and makes the following determination as to whether the proposed settlement is "within the reaches of the public interest." *Gillette, at 716*.

D. *CONCLUSION*

On February 15, 1984, the DOJ rejected the original merger proposed by LTV and Republic as violative of Section 7 of the Clayton Act. This action provoked widespread criticism from other parts of the Executive **[*37]** *Branch, including the Secretary of Commerce and President Reagan. On March 21, 1984, the DOJ filed the present proposed Final Judgment which approved the merger on the condition that there be a divestiture of Republic's Gadsden, Alabama facility and that portion of the Massillon, Ohio plant which manufactures cold rolled stainless sheet and strip. According to the DOJ, the divestiture of Gadsden will reduce to acceptable levels the HHI market concentration in the two specified areas of carbon and alloy sheet. The DOJ asserts that the post-merger HHI in hot rolled carbon and alloy sheet will be reduced to approximately 1006 and in cold rolled sheet to 1091.* [11] These reductions do not deviate significantly from the 1982 Merger Guidelines. In the case of Massillon, there will be no increase in the level of market concentration. The two plants are to be promptly divested by selling them to purchasers who will continue to manage and operate them as competitive and ongoing businesses. Cyclops and Wheeling-Pittsburgh, aside from complaining about the DOJ's abrupt "change of position," vigorously challenge the effectiveness of the divestitures in effecting reductions in market concentration. **[*38]** *They claim that because of the age of the facilities involved and the need for extensive capital improvements, there will be an absence of interested buyers able to compete effectively. In the case of Bliss & Laughlin, the divestiture of Massillon is opposed, not for the reasons asserted by Cyclops, but because the divestiture should be broader and include Massillon's bar facility.*

The DOJ supports its position that the merger does not produce an undue concentration of power in the relevant markets by reliance on the HHI. While it is concerned about the weakened economic condition of the merging companies, it explicitly does not rely on the "failing firm" doctrine. It admits that the merger will yield operating efficiencies through lower costs and the utilization of unused capacity, but is unable to quantify the extent of such savings. It concedes the importance of foreign imports, but in determining the size of the domestic market, it has excluded both imports from Japan covered by a voluntary agreement, and imports within the EEC Arrangement stated to expire on December 31, 1985.

---

[11] *Both of these computations exclude imports from Japan and the EEC.*

In making our determination **[*39]** *as to the reach of the public interest, we are required to consider the positions of the interested parties as specifically expressed by them. We must however, also consider these positions in the broader factual context about which there is no substantial dispute.*

This context subsumes several vital issues. First, we live in a world of increasing international competition. In general terms, the high value of the American dollar and the lower costs of foreign manufacture have, sometime in combination with foreign subsidies, helped contribute to an unfavorable balance of trade.

Second, potential and actual foreign imports have a significant impact on domestic prices in determining the size of the relevant product market in steel. The extent of this impact is influenced by a number of factors which are beyond anyone's control, and which are difficult to measure and to predict. As previously noted, the present rates of exchange have affected entry of foreign imports into domestic markets, including steel. This trend can be somewhat counterbalanced by quotas, whether imposed by the United States or by the voluntary action of the importing country as in the case of Japan. At the same **[*40]** *time, we are aware of the Administration's opposition to quotas on steel (including domestic-content legislation). This policy appears to be consistent with our long tradition as a trading nation of relying on domestic exports to pay for foreign imports. We cannot predict whether this policy will continue to prevail.* [12] It should be sufficient to say that foreign imports of steel, both present and future, have had and will have some unquantifiable influence on domestic prices. Foreign competition therefore must be included in determining the size of market shares and the degree of market concentration. Thus, the rigid application of the HHI, in measuring concentration in the domestic market may very well have a tendency to exaggerate the extent of such concentration.

Third, a basic United States industry--steel--continues to find itself in a weakened and deteriorating condition. The present plight and future prospects of LTV and Republic are **[*41]** *no exception to this pattern. The purpose of the present merger is to achieve savings in cost through increased efficiences which will enable the surviving company to compete more effectively both here and in the export market. We cannot predict that these efforts will succeed, but we can say with some certainty, that without an opportunity to improve their acute financial predicament, their future will indeed be bleak.*

Finally, the proposed Final Judgment represents a compromise. The DOJ has no assurance that it will prevail at trial. Even if it were confident of prevailing, it could not predict whether the relief it would obtain would differ substantially from that encompassed by the present settlement. The savings to the parties in time as well as money would be substantial. We repeat that we are not at liberty to impose our notions about a proper remedy as would be true in the case of a trial with a finding of liability.

For all of the foregoing reasons, and after full consideration of the record, all the public comments received, the DOJ's and defendants' responses thereto, it is our determination that the proposed Final Judgment is in the public interest.

FINAL JUDGMENT **[*42]** **-** August 2, 1984, Filed

WHEREAS, plaintiff, United States of America, having filed its Complaint herein on March , 1984, and plaintiff and defendants, by their respective attorneys, having consented to the entry of this final Judgment without trial or adjudication of any issue of fact or law herein and without this Final Judgment constituting any evidence against or an admission by any party with respect to any such issue;

---

[12] *This policy, if course, is eclectic and subject to numerous exceptions. Only recently the International Trade Commission made a preliminary finding that would place important restrictions on imports of all hot and cold rolled sheet.*

AND WHEREAS, the defendants have agreed to be bound by the provisions of this Final Judgment pending its approval by the Court;

AND WHEREAS, prompt and certain divestiture is the essence of this agreement and the defendants have represented to the plaintiff that the divestiture required below can and will be made and that defendants will later raise no claims of hardship or difficulty as grounds for asking the Court to modify any of the divestiture provisions contained below;

NOW, THEREFORE, before the taking of any testimony and without trial or adjudication of any issue or fact or law herein, and upon consent of the parties hereto, it is hereby

ORDERED, ADJUDGED AND DECREED as follows:

I

This Court has jurisdiction of the subject matter of this action and **[*43]** of each of the parties hereto. The Complaint states a claim upon which relief may be granted against defendants under Section 7 of the Clayton Act, as amended (*15 U.S.C. § 18*).

II

As used in this Final judgment:

A. "LTV" means the defendant The LTV Corporation, including each division, subsidiary or affiliate thereof, and each officer, director, employee, attorney, agent or other person acting for or on behalf of any of them.

B. "J&L" means the defendant Jones & Laughlin Steel Incorporated, including each division, subsidiary or affiliate thereof, and each officer, director, employee, attorney, agent or other person acting for or on behalf of any of them.

C. "J&L Stainless" means the defendant J&L Specialty Steels, Inc., including each division, subsidiary or affiliate thereof, and each officer, director, employee, attorney, agents or other person acting for or on behalf of them.

D. "Republic" means the defendant Republic Steel Corporation, including each division, subsidiary or affiliate thereof, and each officer, director, employee, attorney, agent or other person acting for or on behalf of them.

E. "Defendants" means LTV, J&L, J&L Stainless and Republic.

F. "Person" means **[*44]** any natural person, corporation, association, firm, partnership or other business or legal entity.

G. "Steel mill" means the manufacturing plant, real property, capital equipment, and any other interest, tangible assets or improvements associated with a facility for making steel products, but shall not include cash, cash equivalents, pre-paid expenses or accounts receivable.

H. "Gadsden" means the steel mill and coke batteries owned by Republic (as of March 21, 1984) located in Gadsden, Alabama; provided, however, that any purchaser of Gadsden may elect not to purchase that portion of the mill related to coke and steel production.

I. "Massillon" means the stainless sheet cold rolling and finishing facilities owned by Republic (as of March 21, 1984) located in Massillon, Ohio.

III

A. The provisions of this Final Judgment shall apply to the defendants, their successors and assigns and to all other persons in active concert or participation with any of them who shall have received actual notice of this Final Judgment by personal service or otherwise.

B. Defendants shall require, as a condition of the sale or other disposition of all or substantially all of their assets involved **[*45]** in the production of carbon and alloy hot and cold rolled sheet steel and stainless hot and cold rolled sheet steel, that the acquiring party agrees to be bound by the provisions of this Final Judgment.

IV

A. Within six (6) months of the date of entry of this Final Judgment, but in no event later than December 1, 1984, defendants are hereby ordered and directed to divest to a purchaser or purchasers all of their direct and indirect ownership in and control over Gadsden and Massillon.

B. Divestiture of Gadsden shall be accomplished in such a way as to ensure that, as of the time of divestiture, it can reasonably be anticipated that Gadsden can and will be operated by the purchaser or purchasers as a viable, ongoing business engaged in the manufacture and sale of carbon and alloy hot and cold rolled sheet steel made from slabs produced at Gadsden or elsewhere. Divestiture shall be made to a purchaser or purchasers who shall demonstrate to the plaintiff or, if plaintiff objects, to the Court that (i) the purchase is for the purpose of competing effectively in the manufacture and sale of carbon and alloy hot and cold rolled sheet steel, and (ii) the purchaser or purchasers have the **[*46]** managerial, operational and financial capability to compete effectively in the manufacture and sale of carbon and alloy hot and cold rolled sheet steel.

C. Divestiture of Massillon shall be accomplished in such a way as to ensure that, as of the time of divestiture, it can reasonably be anticipated that Massillon can and will be operated by the purchaser or purchasers as a viable, ongoing business engaged in the manufacture and sale of stainless cold rolled sheet steel. Divestiture shall be made to a purchaser or purchasers who shall demonstrate to the plaintiff or, if plaintiff objects, to the Court that (i) the purchase is for the purpose of competing effectively in the manufacture and sale of stainless cold rolled sheet steel, and (ii) the purchaser or purchasers have the managerial, operational and financial capability to compete effectively in the manufacture and sale of stainless cold rolled sheet steel.

D. In connection with the divestiture of Massillon, defendants shall offer to the purchaser of Massillon (herein and in the Appendix annexed hereto referred to as "Buyer") a long-term contract to supply Buyer with stainless steel hot bands on such terms and conditions as are **[*47]** reasonably designed to enable Buyer effectively to compete with defendants in the manufacture and sale of cold rolled stainless steel sheet and strip. Unless plaintiff agrees otherwise, the contract to be offered to Buyer by defendants shall include in substance the terms set out in the Appendix annexed hereto. Unless the context otherwise requires, all references in this Final Judgment to the divestiture of Massillon shall mean and include the long-term contract referred to herein, and the procedures of Sections VI and VII of this Final Judgment, including but not limited to approval by the plaintiff, shall be equally applicable to the long-term contract.

E. In accomplishing the divestiture ordered by this Final Judgment, the defendants shall make known in the United States and in other major noncommunist steel producing countries, by usual and customary means, the availability of Gadsden and Massillon for sale as ongoing businesses. The defendants shall notify any person making an inquiry regarding the possible purchase of Gadsden or Massillon that the sale is being made pursuant to this Final Judgment and provide such person with a copy of this Final Judgment. The defendants shall **[*48]** also furnish to all bona fide prospective purchasers who so request all pertinent information regarding Gadsden and Massillon and shall permit them to make such inspection of physical facilities and any and all financial, operational, or other documents and information as may be relevant to the sale of either or both facilities.

F. Defendants agree to take all reasonable steps to accomplish said divestiture, including the sale of assets only. Except to the extent otherwise approved by the plaintiff, Gadsden and Massillon shall be divested free and clear of (i) all mortgages, encumbrances and liens, (ii) any contractual commitments or obligations (such as "take or pay" fuel and ore supply contracts) existing as of the date of divestiture, unless the purchaser or purchasers of the divested plant voluntarily assume the future performance of any such existing contracts, (iii) any pension rights of present or former employees accrued as of the date of divestiture, and (iv) any termination payment rights of former employees accrued as of the date of divestiture, all of which shall continue to be the obligation of defendants. In the event that as a matter of law the plants cannot be sold **[*49]** free and clear of any such mortgages, encumbrances, liens, commitments or obligations, defendants shall hold the purchaser or purchasers harmless with respect to the same. In order to enable the purchaser of Gadsden to continue to operate the steel mill without undue interruption following divestiture, defendants agree that, at the request of the purchaser, they will continue, for a period not exceeding six months (unless extended by the Court) from and after the date of divestiture, to sell for use at Gadsden necessary raw materials, including iron ore, coal, limestone and coke, to the extent that such items are currently being supplied by defendants to Gadsden, and on substantially the same financial and other terms and conditions.

V

A. If the defendants have not divested all of their ownership interest in Gadsden and Massillon within the time period specified in Section IV(A) of this Final Judgment, the Court shall, on application of the plaintiff, appoint a trustee to effect the divestiture. Such appointment shall become effective not more than 45 days following the filing of the petition. The trustee shall dispose of Gadsden and Massillon at such price and on such terms as are **[*50]** then obtainable upon a reasonable effort by the trustee, subject to the provisions of Section VI of this Final Judgment, and shall have such other powers as this Court shall deem appropriate. The trustee shall have the power to rehire the defendants to divest assets only, retaining and assuming all liabilities of Gadsden and Massillon upon their divestiture. Defendants shall not object to a sale by the trustee on any grounds other than malfeasance, provided, however, that if the buyer chooses to purchase any inventory of semi-finished or finished steel mill products, coke or raw materials, defendants shall have a right to object unless the aggregate sale price shall include a price (payable on reasonable terms), in the case of steel or coke inventory, at least equal to the current production cost of that inventory and, in the case of raw materials, at least equal to the cost thereof, as reflected in either case on the books and records of defendants.

B. As to Gadsden, the trustee shall have the power to require defendants to sell necessary raw materials for use at Gadsden in accordance with the provisions of Section IV(F). As to Massillon, the trustee shall have the power to cause **[*51]** defendants to execute a long-term supply contract in accordance with the provisions of Section IV(D) and the Appendix.

C. If defendants have not divested all of their ownership interest in both Gadsden and Massillon within five (5) months of the date of entry of this Final Judgment, but in no event later than November 1, 1984, the plaintiff and the defendants (acting jointly) shall immediately notify each other in writing of the names and qualifications of not more than two (2) nominees for the position of trustee for the required divestiture. The parties shall attempt to agree upon one of the nominees to serve as the trustee. If the parties are able to agree on a trustee within thirty (30) days of the exchange of names, plaintiff shall notify this Court of the person upon whom the parties agreed and this Court shall appoint such person as the trustee. If the parties are unable to agree within that time period, plaintiff shall furnish this Court the names of each party's nominees. This Court may hear the parties as to the qualifications of the nominees and shall appoint one of the nominees as the trustee.

D. The trustee shall serve at the cost and expense of the defendants, on such **[*52]** terms and conditions as the Court may prescribe, and shall account for all monies derived from a sale of Gadsden and Massillon and all costs and expenses so incurred. After approval by the Court of the trustee's accounting, including fees for its services, all remaining monies shall be paid to the defendants and the trust shall then be terminated. The compensation of such trustee shall be based on a fee arrangement providing the trustee with an incentive based on the price and terms of the divestiture and the speed with which it is accomplished.

E. Defendants shall use their best efforts to assist the trustee in accomplishing the required divestiture. The trustee shall have full and complete access to the personnel, books, records and facilities of the businesses to be divested, and defendants shall develop such financial or other information relevant to the assets to be divested as the trustee may request. Defendants shall take no action to interfere with or impede the trustee's accomplishment of the divestiture.

F. After its appointment, the trustee shall file monthly reports with the parties and the Court setting forth the trustee's efforts to accomplish divestiture as contemplated **[*53]** under this Final Judgment. If the trustee has not accomplished such divestiture within six (6) months after its appointment, the trustee shall thereupon promptly file with the Court a report setting forth (i) the trustee's efforts to accomplish the required divestiture, (ii) the reasons, in the trustee's judgment, why the required divestiture has not been accomplished, and (iii) the trustee's recommendations. The trustee shall at the same time furnish such report to the parties, who shall each have the right to be heard and to make additional recommendations consistent with the purpose of the trust. The Court shall thereafter enter such orders as it shall deem appropriate in order to carry out the purpose of the trust, which shall, if necessary, include extending the trust and the term of the trustee's appointment.

VI

At least thirty (30) days prior to the scheduled closing date of any proposed divestiture pursuant to Section IV or V of this Final Judgment, defendants or the trustee, whichever is then responsible for effecting the divestiture required herein, shall notify the plaintiff of the proposed divestiture. If a trustee is responsible, it shall similarly notify the defendants. **[*54]** The notice shall set forth the details of the proposed transaction and list the name, address and telephone number of each person not previously identified who offered or expressed an interest or desire to acquire any ownership interest in Gadsden or Massillon together with full details of same. Within fifteen (15) days of receipt by plaintiff of such notice, the plaintiff may request additional information concerning the proposed divestiture and the proposed purchaser. The defendants shall furnish the additional information within twenty (20) days of the receipt of the request, unless the parties shall otherwise agree. Within thirty (30) days after receipt of the notice or within fifteen (15) days after receipt of the additional information, whichever is later, the plaintiff shall notify in writing the defendants and the trustee, if there is one, if it objects to the proposed divestiture. If the plaintiff fails to object within the periods specified, or if the plaintiff notifies in writing the defendants and the trustee, if there is one, that it does not object, then the divestiture may be consummated, subject only to defendants' limited right to object to the sale under the proviso **[*55]** in Section V(A). Upon objection by the plaintiff or by the defendants under the proviso in Section V(A), the proposed divestiture shall not be accomplished unless approved by the Court. The defendants shall have no right to object to any divestiture of Gadsden or Massillon proposed by the trustee except under the proviso to Section V(A).

VII

Thirty (30) days from the date of entry of this Final Judgment and every thirty (30) days thereafter until the divestiture has been completed, the defendants shall deliver to plaintiff an affidavit as to the fact and manner of compliance with Section IV of this Final Judgment. Each such affidavit shall include the name, address and telephone number of each person who, during the preceding thirty (30) days, made an offer, expressed an interest or desire to acquire, or entered into negotiations to acquire, or made an inquiry about acquiring any ownership interest, in either Gadsden or Massillon, and shall describe in detail each contact with any such person during that period. The defendants shall maintain full records of all efforts made to divest Gadsden and Massillon.

VIII

Until the divestiture required by this Final Judgment has been accomplished, **[*56]** the defendants shall:

A. maintain normal repair and maintenance schedules at Gadsden and Massillon and preserve those facilities as they currently exist, except for the deterioration of the blast furnace and coke ovens normally associated with continuing usage;

B. refrain from altering or selling any assets of Gadsden or Massillon, other than in the ordinary course of business, or from taking any action that will have the effect of reducing the scope of Gadsden's or Massillon's manufacturing or sales operations or its product line from that existing at the time of the filing of the Complaint in this action, without the prior approval of the plaintiff;

C. refrain from taking any action that would jeopardize the sale of Gadsden as a viable competitor in the manufacture and sale of carbon and alloy hot and cold rolled sheet steel and of Massillon as a viable competitor in the manufacture and sale of stainless cold rolled sheet steel; and

D. until divestiture of Massillon is accomplished, establish a marketing organization for the sale of cold rolled stainless sheet steel from Massillon which shall be maintained separate and apart from J&L Stainless' marketing organization **[*57]** in the same manner and to the same extent as if J&L Stainless and Republic remained competitors, and there shall be no understanding, agreement, consultation or other communication between the two organizations or its members with regard to prices or terms of sale to customers of stainless sheet steel or as to the allocation or division of trade or customers. LTV and Republic shall forthwith advise in writing all managerial employees of J&L Stainless or Republic having any responsibilities with regard to the marketing of stainless sheet steel of the provisions of this paragraph.

IX

For the sole purpose of enforcing the limited right to Court review of contract disputes provided in paragraph 12 of the Appendix to this Final Judgment, the purchaser of Massillon, and its successors and assigns, may make application to the Court for such relief as may be appropriate to carry out the intent of Section IV(D) of this Final Judgment.

X

For the purposes of determining or securing compliance with the Final Judgment and subject to any legally recognized privilege, from time to time:

A. Duly authorized representatives of the Department of Justice shall, upon written request of the Attorney **[*58]** General or of the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to any defendant made to its principal office, be permitted:

1. access during office hours of such defendant to inspect and copy all books, ledgers, accounts, correspondence, memoranda and other records and documents in the possession or under the control of such defendant, who may have counsel present, relating to any matters contained in this Final Judgment; and

2. subject to the reasonable convenience of such defendant and without restraint or interference from it, to interview officers, employees and agents of such defendant, who may have counsel present, regarding any such matters.

B. Upon the written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division made to any defendant's principal office, such defendant shall submit such written reports, under oath if requested, with respect to any of the matters contained in this Final Judgment as may be requested.

No information or documents obtained by the means provided in this Section X shall be divulged by a representative of the Department of Justice to any person other **[*59]** than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United State is a party (including grand jury proceedings), or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

C. If at the time information or documents are furnished by any defendant to plaintiff, such defendant represents and identifies in writing the material in any such information or documents to which a claim of protection may be asserted under *Rule 26(c)(7) of the Federal Rules of Civil Procedure*, and such defendant marks each pertinent page of such material, "Subject to claim of protection under *Rule 26(c)(7) of the Federal Rules of Civil Procedure*", then ten days' notice shall be given by plaintiff to defendants prior to divulging such material in any legal proceeding (other than a grand jury proceeding).

XI

Defendants are hereby enjoined and restrained for a period of ten (10) years from providing to the American Iron and Steel Institute for transmittal to any other steel company, or recieving from the American Iron and Steel Institute, without the consent of plaintiff, operating, output **[*60]** and/or efficiency data for individual operating units including, but not limited to, coke ovens, sinter plants, blast furnaces, electric furnaces, basic oxygen furnaces, primary mills, continuous casters, bar mills, plate mills, structural mills, hot strip mills and sheet finishing mills.

XII

Defendants are hereby enjoined and restrained for a period of ten (10) years from acquiring one percent (1%) or more of the voting securities of any person engaged in the manufacture or sale of carbon and alloy hot and cold rolled sheet steel or stainless hot and cold rolled sheet steel, the assets of which are recorded on the books of such company (net of related valuation reserves recorded on such books) in an amount in excess of $ 15 million, or from acquiring from any such person, except pursuant to supply arrangements or otherwise in the ordinary course of business, assets relating to such products (except raw materials) in an amount in excess of $ 15 million without first obtaining the consent of plaintiff or, if plaintiff objects, the approval of this Court upon defendants' establishing, by a preponderance of the evidence, that the acquisition will not lessen competition or tend to create **[*61]** a monopoly in any line of commerce in any section of the country.

XIII

Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders and directions as may be necessary or appropriate for the construction or carrying out of this Final Judgment, for the modification of any of the provisions hereof, for the enforcement of compliance herewith, and for the punishment of any violations hereof.

XIV

This Final Judgment will expire on the tenth anniversary of the date of its entry, except that as to the supply contract referred to in Section IV(D), on the termination thereof.

XV

Entry of this Final Judgment is in the public interest.

Dated: August 2, 1984

Appendix

Terms of the Long-Term Supply Contract

(1) The term of the contract shall be not less than ten years, with a right of renewal in Buyer for not less than two additional years in the event Buyer cannot by a reasonable effort secure an adeguate alternative source of stainless steel hot bands upon expiration of the original term of the contract and that defendants then have substantially as much stainless steel hot **[*62]** *band capacity as they have today.*

(2) Stainless steel hot bands supplied to Buyer shall be as specified by the Buyer and at least equal in quality to hot bands used by defendants to manufacture cold rolled stainless steel sheet and strip for sale by defendants to their own customers.

(3) Defendants agree to supply up to 100 percent of the Massillon requirements of stainless steel hot bands for further finishing into cold rolled sheet and strip at Massillon and sale of such sheet and strip by Buyer, up to a maximum of 30,000 tons per quarter, and not to exceed 10,000 tons in any given month, with a right in Buyer to increase the maximum to 36,000 tons per quarter (and not to exceed 12,000 tons in any given month) in the event that the capacity of Massillon is increased to accommodate such larger supply.

(4) Lead times for Buyer's placing orders with defendants, submitting change orders, and cancelling orders shall be on terms and conditions not less favorable to Buyer on a proportionate basis than the practice normally followed by defendants in connection with orders submitted by defendants' own marketing organization. All orders placed by Buyer shall be filled in accordance **[*63]** *with its specifications, unless modified with Buyer's consent.*

(5) Stainless steel hot bands furnished to Buyer shall be melted at J&L's Midland plant and rolled at J&L's Cleveland plant, except that ingots for 60" wide hot bands and other specialty products for Massillon now produced at Republic's Canton plant and which Midland is not now capable of producing shall continue to be furnished from Canton. In the event that any of these plants should for any reason become inoperative or unavailable, defendants shall supply Buyer from such other plant or plants as it may then operate, on like terms as herein provided for with respect to the Canton, Midland and J&L Cleveland plants.

(6) In case of shortage, interruption of supply or other force majeure events, Buyer shall be accorded relatively equal status in all respects with defendants' own manufacturing and marketing organizations and customers, and defendants shall not give preferential treatment to their own organizations and customers.

(7) Buyer shall be permitted at its option to place orders for stainless steel hot bands with other suppliers either in addition to or in lieu of placing orders with defendants.

(8) **[*64]** *The purchase price for the stainless steel hot bands shall be based upon (i) defendants' actual average monthly manufacturing costs by grade, plus (ii) overhead expenses accumulated on a monthly basis and allocated based on the ratio of defendants' hot band shipments to Buyer to defendants' total hot band production, together with (iii) a markup equal to ten percent of manufacturing and overhead expenses.*

(9) Payment shall be made by Buyer for stainless steel hot bands purchased from defendants at the end of each month following the month of delivery.

(10) Defendants will submit to Buyer monthly proof of all cost data used to calculate price, subject to right of audit by Buyer. Defendant shall grant Buyer reasonable access for inspection to its manufacturing facilities used to supply product to Buyer, and to all financial and other records pertinent to the contract or the parties' obligations thereunder.

(11) Subject to plaintiff's prior approval, Buyer shall have the right to assign the contract to any successor of Buyer's interest in Massillon.

(12) An appropriate method shall be provided for the speedy resolution of disputes under the contract. In the event of **[*65]** *a dispute, and following reasonable efforts to resolve the dispute through the mechanism provided in the contract (unless the Court agrees to a waiver of this requirement by reason of emergency), Buyer shall have the right to petition this Court, in accordance with Section IX of this Final Judgment, for such relief under the contract as may be appropriate, based on a clear and convincing showing by Buyer that without such relief Buyer will be unable effectively to compete with defendants in the sale of cold rolled stainless steel sheet or strip in accordance with the intent of Section IV(D) of this Final Judgment.*

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

Civil Procedure > Appeals > Standards of Review

HN1[] **Trials, Judgment as Matter of Law**

On a motion for judgment notwithstanding the verdict the court must refrain from weighing the credibility of the witnesses, view all the evidence in the light most favorable to the non-moving party, and give that party the benefit of all reasonable inferences which may be drawn from the evidence. With these requirements firmly in mind, if the evidence is of such quality and weight that reasonable men might reach different conclusions in the exercise of impartial judgment, a motion for a directed verdict or judgment notwithstanding the verdict should be denied.

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > Licenses

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > General Overview

Patent Law > Ownership > Conveyances > General Overview

HN2[] **Ownership & Transfer of Rights, Licenses**

A patentee's termination of a licensee, in concert with competing licenses, is not entitled to an antitrust exemption. Where patent policy allegedly conflicts with the goals of the antitrust laws, the courts have not prescribed immutable rules. Rather, an interest analysis and balancing test are appropriate in resolving the tension.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN3[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Conspiracy need not be proved, and rarely is proved, by direct evidence of unlawful agreement. Conspiracy can be established, however, by circumstances and inferences, which at a minimum suggest a commitment to a common end.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN4[] **Monopolies & Monopolization, Conspiracy to Monopolize**

A member of a conspiracy, the conspirator need not declare his assent to the conspiracy or its purpose. It is enough that, with knowledge of the unlawful plan, the defendant encouraged, advised or assisted in furthering the plan. Furthermore, acts done to give effect to the conspiracy may be in themselves wholly innocent acts. Yet if they are part of the sum of acts which are relied upon to effectuate the conspiracy which the antitrust statute forbids, they come within its prohibition.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Evidence > Weight & Sufficiency

HN5[] **Jury Trials, Province of Court & Jury**

Where the evidence is merely conflicting and where issues of credibility and weight abound, the court cannot simply substitute its own determination for that of the jury's. It is the function of the jury as the traditional finder of facts, and not the court, to weigh conflicting evidence and inferences, and determine the credibility of witnesses.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN6[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

The courts have long applied a rule of reason to determine whether a particular restraint, which is not illegal per se, unreasonably restrains trade and thus violates the Sherman Act, *15 U.S.C.S. § 1*. This rule has recently been applied in cases, which are not easily classified because they involve aspects of both vertical and horizontal restraints. Under the rule of reason analysis, the anti-competitive and pro-competitive effects of the restraint must be considered.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Intrabrand competition is competition among those who sell the product of a particular manufacturer, while interbrand competition is competition among the manufacturers of the same generic product. The primary concern of ***antitrust law*** is interbrand competition, not intrabrand competition.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] **Regulated Practices, Market Definition**

An effective rule of reason analysis requires an examination of the relevant market. Concerning the determination of the relevant product market, no more definite rule can be declared than that commodities reasonably interchangeable by consumers for the same purpose make up a relevant product market.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN9[] **Private Actions, Remedies**

To sustain an antitrust verdict under the Sherman Act, *15 U.S.C.S. § 1*, the evidence must be sufficient to find both (1) the fact of injury to plaintiff's business or property and (2) the amount of damages sustained by plaintiff.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN10[] **Private Actions, Remedies**

There is a clear distinction between the measure of proof necessary to establish the fact that plaintiff had sustained some damage and the measure of proof necessary to enable the jury to fix the amount. There has been no tendency to lighten plaintiff's burden; the preponderance of evidence rule applies in unqualified form. Proof of an overcharge, an exclusion from a market, a termination or a loss of suppliers or customers are illustrative of the kinds of things that serve to meet the burden. Plaintiff's burden of proof as to the amount of damages has, however, been ameliorated considerably. The court or jury is entitled to make a just and reasonable estimate of the damages from relevant data, which may include the probable and inferential, as well as direct and positive proof.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN11[] **Private Actions, Remedies**

Once fact of injury is proven, the burden on the antitrust plaintiff to establish the precise amount of damages is not as great as in other kinds of lawsuits.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN12[] **Private Actions, Remedies**

It is enough that the illegality is shown to be a material cause of the injury; a plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury under *15 U.S.C.S. § 4*.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN13[] **Private Actions, Remedies**

In the absence of more precise proof, the factfinder may conclude as a matter of just and reasonable inference from the proof of defendants' wrongful acts and their tendency to injure plaintiffs' business, and from the evidence of the decline in prices, profits and values, not shown to be attributable to other causes, that defendants' wrongful acts have caused damage to the plaintiffs.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Torts > Business Torts > General Overview

HN14[] **Private Actions, Remedies**

It is as unlawful to prevent a person from engaging in business as it is to drive a person out of business. An antitrust plaintiff in a market exclusion case is not precluded from proving damages as lost profits simply because its nascent business has shown no past profits.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN15[] **Private Actions, Remedies**

It is well established that an antitrust plaintiff may recover lost future profits.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN16[] **Private Actions, Remedies**

The use of expert testimony, sales projections and financial forecasts are accepted methods of proving antitrust damages, particularly when defendant's wrongful conduct and its own dismal business performance make proof by other means virtually impossible.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Evidence > Admissibility > Expert Witnesses > Ultimate Issue

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN17[] **Private Actions, Remedies**

In assessing the expert's testimony, juries are allowed to act upon probable and inferential, as well as direct and positive proof. The expert on damages is allowed some economic imagination so long as it does not become fantasy. The essential requirement is that the expert's testimony be based on the available data, which provides a rational foundation for a qualified expert's logical assumptions and inferences. It is sufficient if the expert presents one set of logical relations rationally premised on evidence which the jury, as ultimate fact-finder, might credit even though disputed.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN18[] **Private Actions, Remedies**

Where the defendant adduces no evidence of alternative methodologies or statistics, but merely criticizes those employed by the plaintiff's expert, acceptance of the projections of plaintiff's expert is appropriate, since they do have a rational basis.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > General Overview

HN19[] **Defenses, Demurrers & Objections, Affirmative Defenses**

Defendants are estopped from denying the validity of a sublicense where plaintiff reasonably relied, to its detriments and with defendants' knowledge, on the promises made it the sublicense.

Business & Corporate Compliance > ... > Contracts Law > Breach > Nonperformance

Contracts Law > Contract Conditions & Provisions > Waivers > General Overview

HN20[] **Breach, Nonperformance**

Where a party's performance is prevented by the other party to the contract, the first party's nonperformance is excused and does not constitute a breach.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN21[] **Private Actions, Remedies**

California law permits both established and non-established businesses to recover where the damages can be calculated with a reasonable certainty.

Contracts Law > Breach > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

HN22[] **Contracts Law, Breach**

Under California law, inducing breach of contract is a tort with five basic elements: (1) that a valid contract existed between the plaintiff and another party; (2) that the defendant had knowledge of the contract and intended to induce a breach thereof; (3) that the contract was breached; (4) as a proximate result of the defendant's wrongful or unjustified [unprivileged] conduct; (5) resulting in damage to the plaintiff.

Business & Corporate Law > ... > Duties & Liabilities > Causes of Action & Remedies > Breach of Contract

Contracts Law > Breach > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

HN23[] **Causes of Action & Remedies, Breach of Contract**

The conduct by which a defendant induces the breach, or intentionally interferes with another's contract rights, may be either by unlawful means or by means otherwise lawful when there is a lack of sufficient justification for such interference. Moreover, when interference with performance is intended, the manner of interference is not of great importance. Furthermore, an agent of the promisor may be liable for inducing a breach of contract where he misdirects or omits performance.

Contracts Law > Breach > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

HN24[] **Contracts Law, Breach**

A defendant may be liable if he provides a party with an incentive to breach the contract. Furthermore, a defendant is not justified in inducing a breach of contract simply because he is in competition with one of the parties to the contract and seeks to further his own economic advantage at the expense of the other.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Criminal Law & Procedure > Criminal Offenses > Acts & Mental States > Actus Reus

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Knowledge

HN25[] **Jury Trials, Province of Court & Jury**

Intent, referencing a state of mind, is generally proved through circumstantial evidence, and the jury may draw the inference that a defendant intends the consequence of his knowing acts or conscious omissions.

Civil Procedure > Remedies > Damages > Punitive Damages

Contracts Law > ... > Damages > Types of Damages > Punitive Damages

Torts > ... > Types of Damages > Punitive Damages > Aggravating Circumstances

Torts > ... > Types of Damages > Punitive Damages > General Overview

HN26[] **Damages, Punitive Damages**

Torts > ... > Types of Damages > Punitive Damages > Aggravating Circumstances

Civil Procedure > Remedies > Damages > General Overview

Civil Procedure > Remedies > Damages > Punitive Damages

Torts > ... > Types of Damages > Punitive Damages > General Overview

HN27[] **Jury Trials, Province of Court & Jury**

An award of punitive damages requires an examination of motive and intent, and the requisite malice in fact may be inferred from a defendant's conscious disregard of the plaintiff's rights. Defendant's state of mind may be proved by direct or indirect evidence from which the jury may draw inferences.

Civil Procedure > Appeals > Standards of Review

HN28[] **Appeals, Standards of Review**

If there is a view of the case, which makes the jury's answers consistent, the court must adopt that view. It does not matter whether defendant can suggest equally plausible reasons for the verdict that would require reversal. The test to be applied in reconciling apparent conflicts between the jury's answers is whether the answers may fairly be said to represent a logical and probable decision on the relevant issues as submitted.

Civil Procedure > Appeals > Standards of Review

HN29[] Appeals, Standards of Review

Inconsistent jury verdicts upon different counts or claims are not an anomaly in the law which at times recognizes a jury's right to an idiosyncratic position provided the challenged verdict is based upon the evidence and the law.

Evidence > Relevance > Exclusion of Relevant Evidence > Confusion, Prejudice & Waste of Time

Evidence > Relevance > Preservation of Relevant Evidence > Exclusion & Preservation by Prosecutors

HN30[] Exclusion of Relevant Evidence, Confusion, Prejudice & Waste of Time

Under *Fed. R. Evid. 403*, the court may exclude certain evidence after finding the danger of unfair prejudice and waste of time on collateral issues substantially outweigh the attenuated probative value of the proffered evidence.

Evidence > ... > Exemptions > Statements by Coconspirators > General Overview

HN37[] **Consideration, Enforcement of Promises**

A bargained-for exchange is the essence of contract consideration.

Contracts Law > Contract Interpretation > General Overview

HN38[] **Contracts Law, Contract Interpretation**

Courts do not apply a rule of contract interpretation mechanically.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN39[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Affiliated corporations can be held liable for conspiring with unaffiliated companies or persons.

Civil Procedure > Trials > Judgment as Matter of Law > Alternative Motions for New Trials

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

Civil Procedure > Trials > Judgment as Matter of Law > Judgment Notwithstanding Verdict

Civil Procedure > Judgments > Relief From Judgments > Motions for New Trials

HN40[] Judgment as Matter of Law, Alternative Motions for New Trials

The grant of a new trial is addressed to the court's sound discretion and that the standard for granting a new trial is somewhat less stringent than that for granting a judgment notwithstanding the verdict. The verdict must be contrary to the great, and not merely the greater weight of the evidence.

Civil Procedure > ... > Jury Trials > Right to Jury Trial > Actions in Equity

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN41[] Right to Jury Trial, Actions in Equity

When ruling on equitable claims, the court is bound by the jury's relevant findings on the legal claims.

Civil Procedure > ... > Declaratory Judgments > State Declaratory Judgments > Discretionary Jurisdiction

Civil Procedure > Judgments > Declaratory Judgments > General Overview

HN42[] State Declaratory Judgments, Discretionary Jurisdiction

It is well established that the grant of declaratory relief rests within the discretion of the trial court.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Declaratory Judgments > General Overview

Civil Procedure > ... > Jury Trials > Right to Jury Trial > Actions in Equity

Civil Procedure > Trials > Jury Trials > Right to Jury Trial

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

Civil Procedure > Remedies > Damages > Monetary Damages

HN43[] Estoppel, Collateral Estoppel

When a plaintiff in an antitrust action seeks both monetary damages and injunctive relief, the plaintiff is first entitled to a jury trial on his legal claims. The court is then bound by the jury verdict on its subsequent ruling on the equitable claims under the doctrine of collateral estoppel. As a result, the court's treatment of the equitable claims must not be inconsistent with the jury's disposition of the issues presented to it.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Jury Trials > Right to Jury Trial > Actions in Equity

Civil Procedure > Judgments > Declaratory Judgments > General Overview

HN44[] **Private Actions, Remedies**

The court is not required to grant equitable relief simply because the jury awarded damages to plaintiff. Under *15 U.S.C.S. § 26*, the court may grant equitable relief to remedy violations of the ***antitrust law*** when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity. Accordingly, the court must apply basic principles of equity in determining whether to grant the injunctive relief sought by plaintiff.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > Judgments > Declaratory Judgments > General Overview

HN45[] **Private Actions, Remedies**

If plaintiff's remedy at law is adequate and injunctive relief would afford a double recovery because plaintiff would receive an opportunity to earn profits it has already been awarded by the jury, then injunctive relief is inappropriate.

Opinion

[*53] [*715]** MacMAHON, D.J.

All defendants in this action, excluding K. N. Hronopoulos ("Hronopoulos") and Drywood Corporation ("Drywood"), move for judgment n.o.v. or for a new trial, pursuant to *Fed.R.Civ.P. 50* and *59*, respectively. In addition, plaintiff requests **[**2]** declaratory and injunctive relief in accordance with the verdict.

* Of the United States District Court for the Southern District of New York, sitting by designation.

I. The Case

This case arose from the actions of the parties and other individuals in their attempts to develop and market a new technology for drying wood. A brief outline will provide a helpful context for our discussion of the issues raised by defendants. There was evidence from which the jury could find the following facts.

Before wood can be used in commercial products, such as furniture and flooring, its moisture content must be reduced. This is usually accomplished in conventional wood drying kilns. In conventional kiln drying, wood is stacked in a large, insulated chamber, **[*716]** the temperature and humidity within the chamber are controlled, and, by circulating dry, heated air over the wood, "the lumber gets to a certain point and its dry." XX at 6-8. [1]

In 1973, Edward Koppelman applied for a patent on a **[**3]** new method and machine for drying wood through the use of a vacuum chamber and radio frequency waves. A patent was granted in 1976. The patented method of drying wood in radio frequency vacuum kilns ("RFV kilns"), sometimes referred to as the "RFV process," differs from conventional kiln drying in several respects. An RFV kiln is a vacuum chamber in which wood is packed tightly together. Radio frequency waves heat the water in the wood, and, as the temperature rises, it evaporates into the chamber's atmosphere. The kiln's atmosphere, however, maintains a "zero relative humidity level" because of the vacuum. Consequently, the wood dries much faster than in conventional kilns, and this advantage also results in lower energy costs. PX 214; 200. There was evidence, however, that these advantages were offset to some extent by the fact that the RFV process was not successful with many types of wood and wood products.

In 1974, Koppelman issued an exclusive license to use and develop the RFV process to Drywood, a Delaware corporation. Defendant Hronopoulos was an officer, director and sole shareholder of Drywood at the time. Neither Hronopoulos nor Drywood appeared in this action.

In 1978, **[**4]** Koppelman assigned all of his interest in the patent to Hronopoulos. Hronopoulos then gave 50% of his interest in the patent and 10% of his Drywood shares to defendant Arthur J. Crowley ("Crowley"). PX 34; 36.

In February 1979, Hronopoulos also gave Crowley's law firm, Arthur J. Crowley Professional Corporation ("AJCPC"), a security interest in Hronopoulos' 50% patent interest as collateral for legal fees earned by AJCPC, and for future services, totalling $536,000. PX 36. **[***54]**

The Sublicense

In its efforts to raise capital, Drywood issued several non-exclusive sublicenses. *See* Exhibit C to PX 13; PX 12; PX 14. On February 4, 1979, Drywood issued the non-exclusive sublicense involved here to John C. Olsen, "or a company or corporation designated by him." PX 53.

On February 26, 1979, Olsen assigned the non-exclusive sublicense to plaintiff International Wood Processors ("IWP"), a California corporation of which he was president and majority shareholder. [2] PX 41; 42. Drywood was notified of the assignment. PX 43. At this time, Olsen was an officer and employee of Drywood.

[5]** Sometime in the spring of 1979, Olsen left Drywood's employ, and in August 1979 Drywood executed a "*First Amendment* to Non-Exclusive Sublicensing Agreement," which "ratified and confirmed in its entirety" the February 4 sublicense given to Olsen and subsequently assigned to IWP. PX 54 para. 8.

The parties do not dispute that the IWP sublicense was the most extensive sublicense issued. It permitted the manufacture, lease and sale of an unlimited number of RFV kilns without any territorial restrictions. It also provided

---

[1] This citation form refers to the volume (XX) and pages (6-8) of the trial transcript. "PX --" denotes plaintiff's exhibit.

[2] Throughout the relevant period, Olsen was president and majority shareholder of IWP. He was involved in the events as an agent for IWP. Accordingly, for the sake of convenience, we refer hereinafter to IWP with the understanding that it was Olsen who received communications and acted on IWP's behalf.

for an exchange of technical information and know-how concerning RFV kilns and the RFV process. PX 53 para. 7. [3] In addition to various undertakings, **[*717]** the sublicensee agreed to pay substantial royalties to Drywood.

[6]** *Corporate Restructuring*

By late 1979, Drywood and Hronopoulos were the subjects of federal and state investigations concerning illegal securities transactions. Apparently to continue to raise capital, Drywood turned to a joint venture with defendant Compton & Cloer Lumber Company ("C & C"). Defendant Delano Compton ("Compton") was the president, chief operating officer and major shareholder in C & C. Drywood transferred its exclusive license to the joint venture which was called General Wood Processors, Joint Venture ("GWP-J/V"). PX 13.

During this period, defendant European Banking Company, Ltd. ("EBC"), a British corporation, became interested in the commercial potential of the RFV process and began negotiations with Compton, Crowley, Howard Blumenthal (an employee of AJCPC), Drywood, Hronopoulos and others. PX 129. EBC proposed to finance a new corporate structure which would have exclusive rights to the RFV process. *See, e.g.*, PX 170.

The evidence shows that EBC was very concerned about the competitive threat posed by the existence of sublicenses previously issued by Drywood. IWP's sublicense was of particular concern because of its "world wide rights." *See, e.g* **[**7]** ., PX 65; 73. The evidence also shows that each of the defendants knew, through meetings, telexes and letters, that EBC would not finance the proposed restructuring unless the outstanding sublicenses were either reacquired or cancelled. *See, e.g*., PX 65; 73; 240 at No. 22; 31; 32; 243; 277; 278; XIX at 30.

The evidence also shows that each of the defendants, in varying degrees, knowingly participated in a common plan to effect EBC's scheme.

For example, in January 1981, a two-day meeting concerning the terms of EBC's proposed financing was held in New York City. Crowley, Blumenthal, Hronopoulos, Compton and Neil Balfour (EBC's representative) participated in meetings held on the first day. There was evidence that discussions at these meetings included the existence, scope, competitive threat and methods of cancelling the IWP license. *E.g.*, XIX at 30.

On March 12, 1981, AJCPC, on behalf of Drywood, notified IWP that Drywood, through GWP-J/V, "[stood] ready to deliver the chambers," a precondition to IWP's performance. AJCPC further notified IWP that it should contact Compton concerning the sublicense and that "all the time periods referred to in . . . the sublicense and **[**8]** its amendments are hereby activated. . . ." PX 88. Compton testified, however, that GWP-J/V was not ready at that time to deliver any chambers to IWP. XVI at 23. **[***55]**

On April 6, 1981, IWP notified Compton and Drywood that it had essentially secured financing and requested the technical information necessary to obtain financing and construct RFV kilns. PX 30; 93; 99; 102. Neither Drywood nor Compton replied. XVI at 23-24; XIX at 40. IWP also wrote to EBC expressing its willingness to discuss selling its sublicense. PX 100.

In May 1981, EBC financed a new corporate structure which controlled both the patent and exclusive licensing rights to the RFV process. GWP-J/V transferred its exclusive license to defendant Power Dry, Inc. ("PDI"). PDI then granted a purported exclusive license, [4] limited to the United **[*718]** States, to defendant General Wood

---

[3] *See also* PX 170. This is an internal memorandum of defendant European Banking Company, Ltd. The memorandum was written by Neil Balfour, an executive director and member of the board of directors of the bank at the time. He notes in the memorandum that there are "only two [sublicenses] which have commercialization potential." One of these was controlled by defendants Drywood and Compton & Cloer Lumber Company. The other sublicense which was "of interest" to EBC was plaintiff's. The memorandum further notes: "It is possible that these two sublicenses could be brought within the control of a single, new corporate entity (to avoid competition between the two sublicenses)." *Id*. Pd.

Processors, Inc. ("GWP, Inc."). Hronopoulos transferred his remaining 50% interest in the patent, which was subject to AJCPC's security interest, to defendant Power Dry Patent, Inc. ("PDP") and was retained by PDI as a consultant. *See* PX 101; *see also* PX 158.

[9]** In return for $500,000 paid by EBC to his professional corporation, Crowley released the pledge -- AJCPC's security interest in Hronopoulos' 50% patent interest. In addition, Crowley transferred 1% of his personal 50% interest in the patent to PDP. He retained his remaining personal 49% interest and the royalty rights pertaining to that interest. PX 34; 35; 91; 97. Compton received considerable stock in PDI and was made chairman of the board. *See* XVI at 24.

In November 1981, after learning that Drywood's rights and obligations under the exclusive license had been assigned to PDI, IWP notified PDI that it had financing available, requested technical information and stated that it was negotiating with contractors to build RFV kilns. *See* PX 104; 105.

Finally, on January 23, 1982, PDI, PDP and GWP, Inc., responding for the first time to IWP's request for technical information etc., informed IWP that its sublicense was terminated. PX 5. IWP then began this litigation in the Central District of California, but the case was transferred to this district.

II. The Claims

The jury was charged on the following claims: (1) that defendants conspired to restrain trade in **[**10]** the United States market for the RFV process and kilns by excluding plaintiff as a competitor, in violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*; (2) that Drywood and PDI breached the sublicense by failing to provide technical information and know-how, in violation of California contract law; and (3) that each of the other defendants intentionally induced the breach, also in violation of California law.

In its fourth claim, plaintiff seeks a declaratory judgment that the sublicense is a valid contract and that plaintiff is entitled to current and future technical information and know-how received by Drywood or PDI. *28 U.S.C. § 2201*.

In its fifth claim, plaintiff seeks an order directing Drywood and PDI to provide such information and know-how. *15 U.S.C. § 26*.

Defendants counterclaim for a declaratory judgment that plaintiff has no right under its sublicense. [5]

[11]** After hearing live or deposition testimony from over 20 witnesses and considering over 240 exhibits during a three and one-half week trial, the jury returned a general verdict, accompanied by answers to special interrogatories, for plaintiff and against all defendants on all three claims submitted to it. The jury awarded plaintiff $900,000 on the antitrust claim; $200,000 on the breach of contract claim; $200,000 on the inducement of breach claim; and assessed $70,000 in punitive damages against EBC, Compton and Crowley. The Clerk entered judgment for $2,700,000 against all defendants, and judgment for $70,000 was entered against the three defendants found liable for punitive damages.

Defendants base their motions on a host of contentions. We address those arguably meritorious.

III. The Antitrust Verdict

---

[4] Strictly speaking, this license could have been "exclusive" only if plaintiff IWP's sublicense did not exist, because IWP's sublicense was not subject to any territorial restrictions and, therefore, could compete directly with GWP, Inc. in the United States.

[5] PDI also counterclaimed that plaintiff had tortiously interfered with its business relationship and violated the Lanham Act, *15 U.S.C. § 1125*. Plaintiff moved to dismiss these claims and defendants did not object. *See* Power Dry, Inc. et al. Brief in Response to Plaintiff's Motion to Dismiss Counterclaims at 2-3. Accordingly, PDI et al.'s first and second counterclaims are dismissed. We discuss PDI et al.'s remaining counterclaim for declaratory relief, essentially the reverse of plaintiff's claim for such relief, in Part X, *infra*.

HN1[] On a motion for judgment n.o.v., we must refrain from weighing the credibility of the witnesses, view all the evidence in the light most favorable to the non-moving **[*719]** party, and **[***56]** give that party the benefit of all reasonable inferences which may be drawn from the evidence. *Continental Ore Co. v. Union Carbon & Carbide Corp., 370 U.S. 690, 696 n.6, 8 L. Ed. 2d 777, **[**12]** 82 S. Ct. 1404 (1962)* (same standard in antitrust treble damage suits); *Simblest v. Maynard, 427 F.2d 1, 4 (2d Cir. 1970)*. With these requirements firmly in mind, "if the evidence is of such quality and weight that reasonable men might reach different conclusions in the exercise of impartial judgment, a motion for a directed verdict [or judgment n.o.v.] should be denied." *Harrington v. United States, 504 F.2d 1306, 1312 (1st Cir. 1974)*; *Simblest v. Maynard, supra, id*. (evidence must be such that there could be only one conclusion).

In their motions for judgment n.o.v., defendants principally contend that (1) their activities are exempt from the antitrust laws because of their patent rights; (2) there is insufficient evidence of conspiracy or membership in the conspiracy; (3) there is insufficient evidence of an unreasonable restraint of trade; and (4) there is insufficient evidence of the fact of injury or the amount of damages.

A. Patent Rights

Defendants argue that the termination of plaintiff's sublicense is exempt from antitrust scrutiny under the patent laws. Defendants cite several cases for the proposition that a patentee's *refusal to license* is exempt, **[**13]** under some circumstances, from the antitrust laws, *e.g., United States v. Westinghouse Electric Corp., 648 F.2d 642, 647 (9th Cir. 1981)*. However, this argument, and their cases, are inapposite because the issue here is not the failure to license; rather, it is the breach and termination of a license, already issued by the patentee, in the context of a larger conspiracy to exclude a competitor in restraint of trade.

Defendants have cited no cases which support the proposition that a patentee's breach or termination of a license in such a context is not subject to the strictures of the antitrust laws. Indeed, the cases are to the contrary. For example, in *Mannington Mills, Inc. v. Congoleum Industries, Inc., 610 F.2d 1059 (3d Cir. 1979)*, the court squarely held "that HN2[] a patentee's termination of a licensee, in concert with competing licenses, is not entitled to an antitrust exemption." *Id. at 1073*. Where patent policy allegedly conflicts with the goals of the antitrust laws, the courts have not prescribed immutable rules. Rather, an interest analysis and balancing test are appropriate in resolving the tension. L. Sullivan, Antitrust §§ 177 at 505-06; 184 at **[**14]** 532-34 (1977) (patent and antitrust interests must be balanced based on specific facts of each case).

In light of the evidence in this case, we find that the clear detriment to competition outweighs the attenuated patent arguments asserted by defendants, some of whom had no patent rights at any time.

B. Evidence of Conspiracy

Defendants contend that there was insufficient evidence from which a jury could conclude that defendants conspired to exclude plaintiff as a competitor. We note again that on this motion plaintiff is entitled to "the benefit of all inferences which the evidence fairly supports even though contrary inferences might reasonably be drawn." *Michelman v. Clark-Schwebel Fiber Glass Corp., 534 F.2d 1036, 1042 (2d Cir. 1976)*.

It is axiomatic that HN3[] conspiracy need not be proved, and rarely is proved, by direct evidence of unlawful agreement. Conspiracy can be established, however, by circumstances and inferences which "at a minimum . . . suggest a commitment to a common end." *Michelman v. Clark-Schwebel Fiber Glass Corp., supra, 534 F.2d at 1043*; *American Tobacco Co. v. United States, 328 U.S. 781, 809-10, 90 L. Ed. 1575, 66 S. Ct. 1125 (1946)* ("unity of **[**15]** purpose or a common design or understanding").

Moreover, it is hornbook law that to be HN4[] a member of a conspiracy, the conspirator **[*720]** need not declare his assent to the conspiracy or its purpose. It is enough that, with knowledge of the unlawful plan, the defendant encouraged, advised or assisted in furthering the plan. Furthermore, "acts done to give effect to the conspiracy may be in themselves wholly innocent acts. Yet if they are part of the sum of acts which are relied upon to effectuate the conspiracy which the [antitrust] statute forbids, they come within its prohibition." *American Tobacco Co. v. United States, supra, 328 U.S. at 809*.

In their joint brief in support of their motions, PDI, PDP, GWP, Inc., EBC and Compton, despite over three weeks of trial and the admission of over 240 documents, offer one sentence supporting their statement that the evidence is insufficient to establish conspiracy. They state: "As discussed above, the evidence establishes that no party other than Power Dry acted to give Olsen [IWP] notice of the invalidity of his license." Defendants' reference to the discussion "above" is quite unilluminating, and they do not elaborate in their **[**16]** reply brief.

Nevertheless, interpolating defendants' laconic arguments, we understand their contention to be that PDI acted unilaterally in **[***57]** terminating plaintiff's license and, therefore, there can be no illegal conspiracy. This argument misses the mark. Plaintiff alleged, and presented evidence from which a jury could reasonably conclude, that defendants were involved in an ongoing conspiracy to restrain trade unreasonably by excluding plaintiff from the market. The termination letter was simply the culmination of the conspiracy which was also effectuated by (1) withholding technical information and know-how, and (2) facilitating and financing a corporate restructuring with knowledge that its essential purpose was to secure a monopoly, by excluding plaintiff in the market for the RFV process.

There was more than sufficient evidence from which a jury could conclude that defendants had a "unity of purpose" or "common understanding" that plaintiff be excluded as a competitor. Plaintiff had the only outstanding sublicense which was essentially unlimited in scope and not subject to any territorial restrictions. Other potentially competing sublicenses, of more limited scope, had either **[**17]** been acquired, terminated or lapsed. There was also substantial evidence that EBC had made it clear to defendants that it would not finance RFV development and marketing unless the restructured corporation held a majority of the patent rights and all license rights. *E.g.*, VII at 43-44; PX 65. Evidence also showed that defendants knew of EBC's conditions and assisted in furthering a common plan to remove outstanding sublicenses as a competitive threat. Moreover, the evidence showed that all defendants sought, and benefited or stood to benefit from, an EBC financing and from a monopoly position in the RFV process. *See* PX 158; 240.

As a result of the financing, for example, Crowley's professional corporation, AJCPC, received $500,000. Compton became chairman of the board of PDI, as well as an officer. He also received stock in the new corporation. The reorganization financed by EBC significantly improved the likelihood that Crowley's royalties would increase and that Compton's substantial investment of time and money in the RFV process would finally become profitable.

Letters, telexes and memoranda, generally cross-copied, which referred directly or obliquely to the existence, **[**18]** necessity and methods of terminating plaintiff's sublicense were exchanged among defendants and their agents. Meetings were held in October 1980 and January 1981. The evidence supported a conclusion that the sublicenses were discussed and that methods of terminating plaintiff's sublicenses were discussed in order to assure PDI, PDP and GWP, Inc. a monopoly position in the RFV process.

Following the January meeting, Drywood, through AJCPC, notified plaintiff that all time periods in its sublicense were "activated," and plaintiff was further informed that no exceptions would be made. **[*721]** Based on a provision in its sublicense, PX 53 para. 7, plaintiff requested essential technical information concerning RFV kilns. It also informed defendants that, upon receipt of the information, it could assure financing and perform under the contract. *E.g.*, PX 93. Defendants ignored plaintiff's requests. After learning that plaintiff was actively marketing RFV kilns, PDI, PDP and GWP, Inc. terminated plaintiff's sublicense. PX 5.

A jury could reasonably conclude from the evidence that each of the defendants had not only a motive but also a "unity of purpose" to exclude plaintiff **[**19]** as a competitor of PDI, PDP and GWP, Inc. Moreover, the jury was entitled to find that defendants knowingly assented and acted to further the conspiracy.

Defendants' arguments to the contrary simply point to conflicting evidence and inferences. However, ***HN5***[] where the evidence is merely conflicting and where, as here, issues of credibility and weight abound, the court cannot simply substitute its own determination for that of the jury's. "It is the function of the jury as the traditional finder of facts, and not the court, to weigh conflicting evidence and inferences, and determine the credibility of witnesses." *Boeing Co. v. Shipman, 411 F.2d 365, 375 (5th Cir. 1969)* (*en banc*).

Thus, having carefully reviewed all the evidence, including but not limited to that which is outlined above and in Part I, *supra*, we cannot say that

> (1) there is such a complete absence of evidence supporting the verdict that the jury's finding could only have been the result of sheer surmise and conjecture, or (2) there is such an overwhelming amount of evidence in favor of the movant[s] that reasonable and fair minded men could not arrive at a verdict against [them].

*Mallis **[**20]** v. Bankers Trust Co., 717 F.2d 683, 688 (2d Cir. 1983)*.

C. Unreasonable Restraint of Trade

Defendants contend that their conduct did not unreasonably restrain trade because "there was clear evidence of pro-competitive effects in eliminating Olsen [IWP]. . . ." Power Dry, Inc. et al. Supplemental Brief in Support of Post-Trial Motions at 18. As examples of the "pro-competitive" effects of "eliminating" IWP, defendants reason that (1) successful marketing of the RFV process required "one substantial and credible voice" **[***58]** and "unity of effort;" (2) "Olsen's [IWP's] presence in the market . . . [exacerbated] the unsavory reputation for the process which Power Dry was seeking to overcome;" and (3) "IWP's allegedly inept technical and marketing skills would damage the image of the RFV drying process." Power Dry, Inc. et al. Supplemental Brief, *supra*, at 17-18.

HN6[] The courts have long applied a "rule of reason" to determine whether a particular restraint, which is not illegal *per se*, unreasonably restrains trade and thus violates the Sherman Act. *Standard Oil Co. v. United States, 221 U.S. 1, 55 L. Ed. 619, 31 S. Ct. 502 (1911)*; *see also* *Continental T.V., Inc. v. GTE **[**21]** Sylvania Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)* (hereinafter "*Sylvania*"). This rule has recently been applied in cases, such as this one, which are not easily classified because they involve aspects of both vertical and horizontal restraints. *E.g., Copy-Data Systems, Inc. v. Toshiba America, Inc., 663 F.2d 405 (2d Cir. 1981)*; *Abadir & Co. v. First Mississippi Corp., 651 F.2d 422 (5th Cir. 1981)*; *Donald B. Rice Tire Co. v. Michelin Tire Corp., 638 F.2d 15* (4th Cir.), *cert. denied*, *454 U.S. 864, 70 L. Ed. 2d 164, 102 S. Ct. 324 (1981)*. Under the "rule of reason" analysis, the anti-competitive and pro-competitive effects of the restraint must be considered. *Sylvania, supra.*

A further distinction has been drawn between the effects of restrictive conduct on intrabrand competition and interbrand competition. ***HN7***[] Intrabrand competition is competition among those who sell the product of a particular manufacturer, *Sylvania, supra, 433 U.S. at 52 n.19*, while interbrand competition is "competition among the manufacturers **[*722]** of the same generic product." *Id*. The primary concern of ***antitrust law*** is "interbrand competition, not intrabrand **[**22]** competition." *Copy-Data Systems, Inc. v. Toshiba America, Inc., supra, 663 F.2d at 411*.

We now turn to defendants' asserted pro-competitive effects. The thrust of their argument is that the elimination of plaintiff as a seller of RFV kilns better enables defendants to compete head-on with sellers of conventional kilns, thereby enhancing interbrand competition in the market for all wood drying kilns. Defendants are fighting the wrong battle, however, because the jury reasonably found that the relevant product market is the market for RFV kilns and not all wood drying kilns. [6] In this market, RFV kilns are the "generic product," and there were only two "brands" or

---

[6] ***HN8***[] An effective rule of reason analysis requires an examination of the relevant market. *E.g., Donald B. Rice Tire Co. v. Michelin Tire Corp., 483 F. Supp. 750, 755* (D. Md.), *aff'd*, *638 F.2d 15* (4th Cir.), *cert. denied*, ***454 U.S. 864, 70 L. Ed. 2d 164, 102 S. Ct. 324 (1981)***. The relevant geographic market -- the United States -- is not disputed. Concerning the determination of the relevant product market, "no more definite rule can be declared than that commodities reasonably interchangeable by consumers for the same purpose make up" a relevant product market. *United States v. E.I. duPont de Nemours, 351 U.S. 377, 394-95, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*; *see also* R. A. Posner, Antitrust § 437 (1974) (regarding "cross-elasticity of demand" as parallel concept in economics).

There was ample evidence to support the jury's conclusion, *see* Verdict Form, Interrogatory No. 10, that wood drying through the RFV process constituted a relevant market. The jury heard expert testimony concerning the relevant product market from those knowledgeable in the business, as well as from an expert in economics, Ronald Wilder. *See* XIV at 17-21. The evidence showed that RFV kiln drying differed from conventional kiln drying in several significant respects affecting interchangeability: speed, cost, the types of wood susceptible to RFV drying, and the types of wood products amenable to the process. Moreover, defendants' manufacturers of RFV kilns -- defendants and plaintiff. By eliminating plaintiff, therefore, defendants eliminated all interbrand competition in the market for RFV kilns.

[23]** In this context, the jury was entitled to find, indeed, it could hardly find otherwise, that defendants' elimination of their only competitor in the relevant market was an unreasonable restraint of trade. *See* *Sylvania, supra, 433 U.S. at 52 n.19* ("extreme example of deficiency in interbrand competition is . . . where there is only one manufacturer").

D. Fact of Injury and Amount of Damages

HN9[] To sustain an antitrust verdict under *§ 1* of the Sherman Act, the evidence must be sufficient to find both (1) the fact of injury to plaintiff's business or property and (2) the amount of damages sustained by plaintiff. *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 562, 75 L. Ed. 544, 51 S. Ct. 248 (1931)*; *Wilder Enterprises, Inc. v. Allied Artists Pictures Corp., 632 F.2d 1135, 1139 n.1 (4th Cir. 1980)*; *Paschall v. Kansas City Star Co., 605 F.2d 403, 407-08 (8th Cir. 1979)*; *see also* L. Sullivan, Antitrust, *supra*, § 251 at 785; Note, Private Treble Damage Antitrust Suits: **[***59]** Measure of Damages for Destruction of All or a Part of a Business, 80 Harv. L. Rev. 1566, 1572-1574 (1967).

However, "there ***HN10***[] is a clear distinction between the measure of proof necessary **[**24]** to establish the fact that [plaintiff] had sustained some damage and the measure of proof necessary to enable the jury to fix the amount." *Story Parchment Co. v. Paterson Parchment Paper Co., supra, id*. One authoritative commentator has summarized this distinction as follows:

> **[*723]** Proof that injury occurred -- proof of the fact of damage, as the process is sometimes called -- is usually straightforward. There has been no tendency to lighten plaintiff's burden; the preponderance of evidence rule applies in unqualified form. Proof of an overcharge, *an exclusion from a market, a termination* or a loss of suppliers or customers are illustrative of the kinds of things that serve to meet the burden. Plaintiff's burden of proof as to the amount of damages has, however, been ameliorated considerably. The court or jury is entitled to make a "just and reasonable estimate" of the damages from "relevant data" which may include the "probable and inferential, as well as direct and positive proof."

L. Sullivan, Antitrust, *supra, id*. (emphasis added, footnotes omitted). *See also,* *Bonjorno v. Kaiser Aluminum & Chemical Corp., 518 F. Supp. 102, 114 (E.D. Pa. **[**25]** 1981)* (once ***HN11***[] fact of injury has been proven, the burden on the antitrust plaintiff to establish the precise amount of damages is not as great as in other kinds of lawsuits).

Thus, where, as here, the evidence is sufficient to find that the aim and effect of the conspiracy were to exclude plaintiff as a competitor in the market, the jury was entitled to find that plaintiff was injured in fact. *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)* (even partial exclusion sufficient to find injury in fact). Moreover, there was ample evidence of injury in fact. For example, plaintiff's economics expert testified:

> Once [plaintiff] received the letter [PX 5] and once customers and potential financiers knew that the sublicense was in doubt or terminated or whatever, [plaintiff's] ability to compete in the market was effectively ended.

XIV at 41-42.

Defendants' argument is premised on the assertion that even if plaintiff's sublicense had not been terminated or technical information withheld, plaintiff would not have marketed RFV kilns because of its alleged lack of financing, technical and managerial experience. **[**26]** This argument is unpersuasive.

---

own evidence showed that they did not consider the price charged for conventional kilns when setting their price for RFV kilns. IX at 99-102. This evidence corroborates Wilder's opinion that the cross-elasticity of demand between RFV kilns and conventional kilns was "very low." XIV at 20. Thus, we find the evidence of an absence of reasonable interchangeability between RFV and conventional kilns sufficient to support the jury's finding that the RFV process constituted a relevant product market.

Plaintiff presented evidence that it had financing, and that it had launched a serious marketing campaign with some success. Furthermore, in addition to plaintiff's president's (Olsen's) own experience in the RFV process while employed by Drywood, plaintiff had engaged an experienced businessman and manager, familiar with the RFV process, as an advisor and sales representative.

Thus, at most, the record presents conflicting evidence which it was the jury's province as fact-finder to weigh and accept or reject. We certainly cannot say that the *only* reasonable conclusion to be drawn from the evidence is that plaintiff could not have competed even if there had been no conspiracy. "It ***HN12***[] is enough that the illegality is shown to be a material cause of the injury; a plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury under *§ 4*." *Zenith Radio Corp. v. Hazeltine Research, Inc., supra, 395 U.S. at 114 n.9*; *Bonjorno v. Kaiser Aluminum & Chemical Corp., supra, 518 F. Supp. at 110*.

Turning to the question of the amount of damages, we find the Supreme Court's instructions **[**27]** in *Zenith Radio Corp*., also a market exclusion case, to be particularly apt:

> Trial and appellate courts alike must also observe the practical limits of the burden of proof which may be demanded of a treble-damage plaintiff who seeks recovery for injuries from a partial or total exclusion from a market; damage issues in these cases are rarely susceptible of the kind of concrete, detailed proof of injury which is available in other contexts. The Court has repeatedly held that ***HN13***[] in the absence of more precise proof, the factfinder may "conclude as a matter of just and reasonable inference from the proof of defendants' wrongful acts and their tendency to injure plaintiffs' business, and from the evidence of the decline **[*724]** in prices, profits and values, not shown to be attributable to other causes, that defendants' wrongful acts had caused damage to the plaintiffs." *Bigelow v. RKO Pictures, Inc., supra*, at 264. See also *Eastman Kodak Co. v. Southern Photo Materials Co., 273 U.S. 359, 377-79, [71 L. Ed. 684, 47 S. Ct. 400]* (1927); *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 561-566, [75 L. Ed. 544, 51 S. Ct. 248]* (1931).

[28]** *Zenith Radio Corp., supra, 395 U.S. at 123-24*.

Defendants contend that plaintiff's proof of the amount of damages is speculative. They do not argue that the damages are excessive; rather, their position is that there was simply no basis for awarding any damages. The gist of their argument is that awarding lost future profits to a business with no actual sales **[***60]** record necessarily requires a leap into the speculative. In support of their argument, defendants attack the assumptions and conclusions of plaintiff's expert on damages.

We start with the premise that "it ***HN14***[] is as unlawful to prevent a person from engaging in business as it is to drive a person out of business." *Thomsen v. Union Castle Mail S.S. Co., 166 F. 251, 253 (2d Cir. 1908)*. An antitrust plaintiff in a market exclusion case is not precluded from proving damages as lost profits simply because its nascent business has shown no past profits. *See H & B Equipment Co. v. International Harvester Co., 577 F.2d 239 (5th Cir. 1978)*; see also, *Hayes v. Solomon, 597 F.2d 958 (5th 1979)* (plaintiff can sue for harm to unestablished business if he intended to start business and was prepared to do so), *cert. denied* **[**29]** , *444 U.S. 1078, 62 L. Ed. 2d 761, 100 S. Ct. 1028 (1980)*; *Martin v. Phillips Petroleum Co., 365 F.2d 629, 633* (5th Cir.), *cert. denied*, *385 U.S. 991, 17 L. Ed. 2d 451, 87 S. Ct. 600 (1966)*; *Triangle Conduit & Cable Co. v. National Elec. Prods. Corp., 152 F.2d 398, 399 (3d Cir. 1945)*; *Fleer Corp. v. Topps Chewing Gum, Inc., 415 F. Supp. 176, 181 (E.D. Pa. 1976)* (allegation of intent and preparedness to engage in business is sufficient to give plaintiff standing under *§ 4* to sue for harm to the nascent venture); *see generally*, 2 P. Areeda & D. Turner, ***Antitrust Law*** para. 335 at 174-75 (1978); Proof of Damages for Terminated or Precluded Plaintiffs, 49 Antitrust L.J. 153 (1980).

There was more than sufficient evidence that plaintiff intended, was prepared to, and, in fact, attempted to compete. For example, there was evidence that plaintiff had financing arrangements, had negotiated for the construction of RFV kilns, had a knowledgeable manager and businessman as an advisor and sales representative, had printed advertising brochures, had attempted to put together sales seminars, and had contacted potential customers with some success. In addition, of course, the **[**30]** jury was entitled to consider the evidence that defendants themselves perceived plaintiff to be a competitor. Thus, the fact that plaintiff could not point to past profits does not render speculative the damages award based on a projection of future lost profits.

Evidence of Damages

HN15[] It is well established that an antitrust plaintiff may recover lost future profits. *E.g., Terrell v. Household Goods Carriers' Bureau, 494 F.2d 16, 22-25 (5th Cir. 1974)*; *see also*, Annot., Measure and Elements of Damages under 15 U.S.C. § 15, 16 A.L.R. Fed. 14, § 17 (1973).

Plaintiff sought to prove lost future profits through the testimony of an expert in accounting and financial forecasting. **HN16**[] The use of expert testimony, sales projections and financial forecasts are accepted methods of proving antitrust damages, particularly when defendant's wrongful conduct and its own dismal business performance make proof by other means virtually impossible. *See Delaware Valley Marine Supply Co. v. American Tobacco Co., 184 F. Supp. 440, 443 (E.D. Pa. 1960)*; *Wm. Goldman Theatres, Inc. v. Loew's, Inc., 69 F. Supp. 103* (E.D. Pa.), *aff'd*, *164 [*725] F.2d 1021* (3d Cir.), **[**31]** *cert. denied*, *334 U.S. 811, 68 S. Ct. 1016, 92 L. Ed 1742 (1948)*; *see also* Annot., *supra*, 16 A.L.R. Fed. at 51-55; 16N von Kalinowski, Antitrust Laws and Trade Regulation § 115-03[3] at 115-79 (1974); Models for Assessing Lost Profits to Antitrust Plaintiffs, 60 Minn. L. Rev. 1233 (1975).

HN17[] In assessing the expert's testimony, "'juries are allowed to act upon probable and inferential, as well as direct and positive proof.'" *Story Parchment Co. v. Paterson Parchment Paper Co., supra, 282 U.S. at 564*; *Zenith Radio Corp. v. Hazeltine Research, Inc., supra, 395 U.S. at 124*. Moreover, as the Fifth Circuit has noted, "the expert on damages need not be armed on the right hand with a slide rule, on the left hand with a computer. He is allowed some economic imagination so long as it does not become fantasy." *Terrell v. Household Goods Carriers' Bureau, supra, 494 F.2d at 25*. The essential requirement is that the expert's testimony be based on the available data which provides a rational foundation for a qualified expert's logical assumptions and inferences. *See id. at 24*; L. Sullivan, Antitrust, *supra*, at 787.

Obviously, an expert's assumptions, if within **[**32]** the realm of reason, need not be the only possible set of assumptions based on the data. It is sufficient if the expert presents one set of logical relations rationally premised on evidence which the jury, as ultimate fact-finder, might credit even though disputed. *See, e.g., Hobart Bros. Co. v. Malcolm T. Gilliland, Inc., 471 F.2d 894, 903* (5th Cir.), *cert. denied*, *412 U.S. 923, 37 L. Ed. 2d 150, 93 S. Ct. 2736 (1973)*; *see also, Eastman Kodak Co. v. Southern Photo Materials Co., 273 U.S. 359, 71 L. Ed. 684, 47 S. Ct. 400 (1927)* (defendant cannot complain that antitrust damages "cannot be measured with the same exactness and precision" as in absence of violation).

Plaintiff's proof of the amount of damages largely consists of the testimony and financial projections of John Markel, a certified public accountant trained in marketing and financial forecasting. Markel developed two comprehensive financial forecasts which are summarized in PX 296 and 297. These forecasts, or **[***61]** projections, clearly show his assumptions and method of computing lost future profits. Markel testified that he had consulted individuals experienced in the field of RFV wood drying and had examined the **[**33]** relevant literature.

The crucial assumptions in his projections were the price of each RFV kiln and the average number of machines sold each year. In the course of painstaking direct examination and thorough cross-examination, Markel testified to the facts and sources underlying his assumptions. He explained clearly the logic employed in arriving at his estimate of the present value of lost profits.

In establishing a sales price, Markel considered prices charged by defendants, costs, and estimates of other knowledgeable persons, as well as plaintiff's proposed price. VI at 14. Markel then applied a payback and capital budgeting analysis, which he explained to the jury, and determined that from both the buyer's and seller's standpoint the price per unit was reasonable. VI at 13.

The reasonableness of Markel's projection of the average number of sales per year presents a closer question. But we cannot say that a reasonable jury could not accept plaintiff's expert's projection of the average number of annual sales, giving plaintiff's evidence "the advantage of every fair and reasonable intendment that the evidence can justify." *Continental Ore Co. v. Union Carbon & Carbide Corp.,* **[**34]** *supra, 370 U.S. at 696 n.6*.

Markel testified that he based this projection on a review of the sublicense and conversations with at least five different, knowledgeable sources. VI at 19-20. Markel himself was trained in marketing and calculating financial forecasts for businesses. While Markel's sales projections **[*726]** may appear somewhat optimistic, we cannot say as a matter of law that their foundation is inadequate or that they fall beyond the pale of reason. Moreover, it is obvious that the jury was not unduly mesmerized by Markel's testimony. The jury returned verdicts for substantially less than Markel's projections, thus indicating that it fully performed its role as independent fact-finder. [7]

[35]** The evidence shows that defendants sold at least ten machines in approximately two or three years, despite their own admission that their companies were poorly managed. XVI at 25. There was also evidence that a former sublicensee had thirty RFV kilns. XVI at 27. Defendants contend that they did not profit from these sales. This contention was never documented as to individual sales, and, in any event, is not dispositive. The jury might well have concluded, based on the evidence, that defendants' net losses were due to their admittedly poor management.

It would also be contrary to logic and justice if a defendant found liable for exclusionary conduct could point to its own lackluster market performance to bar plaintiff's recovery as a matter of law. At most, defendants' inconclusive evidence of net loss was simply one factor among many for the jury to consider.

It should also be noted that the thrust of defendants' damages defense at trial was that there was simply no injury in fact. *E.g*., VI at 21. They offered no alternative methodology or calculations. Rather, they were content to rely on discrediting plaintiff's expert through cross-examination. As one court **[**36]** noted, however

> ***HN18***[] Where the defendant adduces no evidence of alternative methodologies or statistics, but merely criticizes those employed by the plaintiff's expert, acceptance of the projections of plaintiff's expert is appropriate, since they do have a rational basis. *See* *Taxi Weekly, Inc. v. Metropolitan Taxicab Board of Trade, Inc., 539 F.2d 907, 914-15 (2d Cir. 1976)*.

Eiberger v. Sony Corp. of America, 459 F. Supp. 1276, 1286 (S.D.N.Y. 1978).

In sum, recalling that antitrust damages "are rarely susceptible of the kind of concrete, detailed proof of injury which is available in other contexts," *Zenith Radio Corp., supra, 395 U.S. at 123*, we find that damages awarded were supported by the evidence and within the bounds of **[***62]** reason. *See* *Litton Systems Inc. v. American Telephone & Telegraph Co., 700 F.2d 785* (2d Cir.), *cert. denied*, *464 U.S. 1073, 104 S. Ct. 984, 79 L. Ed. 2d 220 (1983)*.

IV. Breach of Contract

---

[7] We note here that the jury was specifically instructed to give careful scrutiny to expert testimony:

> Now, the Rules of Evidence ordinarily do not permit witnesses to testify as to opinions or conclusions. An exception to this rule exists as to those whom we call expert witnesses. Witnesses who by education and experience have become expert in some art, science, profession or calling, may state an opinion as to the relevant and material matter in which they profess to be an expert. And they may also state their reasons for the opinion.
>
> You should consider each expert opinion received in evidence in this case, and give it such weight as you may think it deserves. If you should decide that the opinion of an expert witness is not based upon sufficient education and experience, or if you should conclude that the reasons given in support of the opinion are not sound, or that the opinion is not supported by the evidence in the case, or is outweighed by other evidence, you may disregard the opinion entirely.
>
> In short, as I told you as the experts were testifying, you're not bound by their opinions.

XIII at 9.

The jury found Drywood and PDI (as assignee) liable for breach of contract by failing to give plaintiff updated technical information and know-how concerning RFV kiln drying, as required by para. 7A of the sublicense. [8] Defendants contend, **[**37]** however, **[*727]** that their performance was excused because plaintiff failed to comply with an alleged condition precedent, i.e., that it provide defendants with "suitable documentation to Drywood's satisfaction irrevocably guaranteeing financing for the construction of one unit" (hereinafter "financial documents"). PX 53 para. 5A. [9]

[38]** The contract provides that plaintiff is to present financial documents "within sixty (60) days from the date of the issuance of this sublicense. * * *" PX 53 para. 5A. The sublicense was issued on February 4, 1979. It is undisputed that plaintiff did not furnish financial documents within sixty days. Nevertheless, defendants gave plaintiff no notice to cure, as required by the contract. See PX 53 para. 12A. [10] **[**39]** Nor did defendants notify plaintiff that the contract was terminated. In fact, over six months later, in August 1979, Drywood executed an amendment to the sublicense. PX 54. The amendment acknowledged "substantially changed circumstances," "ratified and confirmed [the sublicense] in its entirety," made no reference to the sixty-day period, and specifically made plaintiff's performance contingent on defendants' performance. [11] See PX 54 para. 1.

---

[8] Paragraph 7, in its entirety, provides:

7. *Trade Secrets & Know-How*

A. Drywood shall make available, for the use of Sublicensee, all trade secrets and know-how that Drywood has relating to the construction and operation of the Facility and the apparatus and process encompassed within said patent insofar as they relate solely to the drying, seasoning and treating of lumber.

B. Sublicensee shall forthwith give full information of, and convey to Drywood, any and all trade secrets and know-how acquired by Sublicensee relating to the construction and operation of the Facility and the apparatus and process encompassed within said patent.

PX 53

[9] Paragraph 5A provides:

A. Sublicensee shall, within sixty (60) days from the date of the issuance of this Sublicense, submit to Drywood suitable documentation to Drywood's satisfaction irrevocably guaranteeing financing for the construction of one unit (as defined hereinabove) and shall cause commencement and completion of construction of the unit within twelve (12) months from the date hereof. Sublicensee shall diligently pursue the expeditious completion of the unit and the installation and operation of the Chamber. Within twenty-four (24) months from date hereof, Sublicensee shall have completed the ten (10) unit Facility referred to in paragraph 1 above.

[10] Paragraph 12A of the sublicense provides:

A. In the event of default by Sublicensee (or its assignee) in any of the terms or conditions of this Sublicense, and the failure to cure same on thirty (30) days written notice and demand by Drywood then, in addition to all other rights and remedies it may have under law and equity, Drywood may terminate its Sublicense; provided that if more than thirty (30) days is required to cure a default (other than payment of monies), then the default shall be deemed cured if Sublicensee commences to cure same within thirty (30) days and diligently pursues same to completion. An election by Drywood of one remedy shall not constitute a waiver of any other remedies which it may thereafter exercise.

[11] Paragraph 1 of the amendment to the sublicense makes IWP's obligation to perform contingent upon Drywood/PDI's prior performance of one of three conditions. Paragraph 1 provides:

1. The 12-month period referred to in paragraph 1(A) and 5(A) of the Sublicense shall commence the date that Drywood either (a) informs Sublicensee that it, Drywood, stands ready (which must be verifiable) to construct, or contract for the construction of said Chambers, (b) inform Sublicensee that it, Drywood, is unable for any reason to construct or to contract for construction of said Chambers, or (c) from the date that Drywood delivers, or notifies Sublicensee that it stands ready to deliver, all necessary documentation and know-how to Sublicensee so as to allow Sublicensee to construct or contract for the construction of said Chambers, whichever date first occurs. * * *"

PX 54

Defendants' execution of the sublicense was a knowing waiver of plaintiff's failure to provide financial documentation, originally required under the sublicense, within sixty days of February 4, 1979. See E.A. Farnsworth, Contracts **[**40]** § 8.5 (1982). Furthermore, for nearly three years, plaintiff reasonably relied, to its detriment and with defendants' knowledge, on the promises made by Drywood in the sublicense and its amendment. ***HN19***[] Defendants are therefore estopped from denying the validity of the sublicense at this late stage. See *Longshore v. County of Ventura*, 25, Cal. 3d 14, *157 Cal. Rptr. 706, 598 P.2d 866, 874 (Cal. 1979)*; *Restatement (Second) of Contracts § 90 comment a* (1979). **[***63]**

Moreover, even assuming plaintiff was required to present financial documents within a reasonable time after defendants complied with one of the conditions **[*728]** in the amended sublicense, [12] there was sufficient evidence for the jury to conclude that defendants' undisputed refusal to provide technical information prevented plaintiff from obtaining appropriate financial documents. ***HN20***[] Where a party's performance is prevented by the other party to the contract, the first party's nonperformance is excused and does not constitute a breach. *See People of Porto Rico v. Title Guarantee & Surety Co., 227 U.S. 382, 33 S. Ct. 362, 57 L. Ed. 561 (1913)*; 6 Corbin Contracts § 1264 (1962). The factual issue of defendant's frustration **[**41]** of plaintiff's performance was squarely put to the jury. The jury was entitled to conclude that irrevocable guarantees of financing for the new technology could not be obtained by plaintiff without adequate assurance of access to defendants' technical information and know-how. Thus, plaintiff's nonperformance was justifiably excused.

The jury might also have found that Drywood's notice to IWP (PX 88), which purported to activate the period for plaintiff's performance, was ineffective. The amendment to the sublicense made plaintiff's performance contingent on Drywood's performance of one of three conditions. *See* fn. 11, *supra*. Drywood apparently chose the first option, *see* PX 54 *§ 1(a)*, and informed plaintiff it stood ready to deliver RFV kilns. PX 88. In light of the uncontradicted evidence, neither Drywood nor any defendant was ready at that time to supply RFV kilns, e.g., XVI at 23. The jury could conclude that Drywood's notice was not "verifiable," as required **[**42]** by the amended sublicense. PX 54 para. 1(a). Thus, the notice was ineffective and did not activate plaintiff's performance period.

Finally, the jury may have found that plaintiff secured adequate finance guarantees. There was evidence that John Dutton, who owned a business financing or "venture capital" company (XV at 6-7), had agreed to finance plaintiff's initial operation (XV at 13-18; PX 283). The evidence further showed that plaintiff informed defendants that it had secured financing (PX 93; 99; 100; 102; 104; 105). Viewing all the evidence, in addition to defendants' failure to provide any notice of default, the evidence supports the jury's finding that plaintiff provided adequate guarantees of financing.

There is no dispute that defendants did not provide plaintiff with updated technical information and know-how. Their second contention, however, is that the sublicense did not require them to furnish such information. We determined, after viewing the contract as a whole, that the contract was ambiguous on the issue of whether Drywood (and its assignee PDI) was obligated to furnish updated technical information on a continuing basis. Accordingly, the issue was presented to **[**43]** the jury which reasonably found that defendants were obligated under the sublicense to provide such information and had breached the contract by failing to do so. Resolving ambiguities in contracts is particularly within the jury's province as fact-finder, and defendants have presented no argument which persuades us that the jury's conclusion is at all unreasonable in light of the contract itself and the circumstances in which it was made.

We note that defendants also claim that there is insufficient evidence of damages on the claim for breach of contract. Defendants' argument on this point, however, does not differ from their attack on the award of antitrust damages, which was substantially larger. ***HN21***[] California law, which the parties do not dispute as controlling this issue, permits both established and unestablished businesses to recover where "the damages can be calculated with a reasonable certainty." *S. Jon Kreedman & Co. v. Meyer Bros. Parking-Western Corp., 130 Cal. Rptr. 41, 49, 58 Cal. App. 3d 173 (1976)*. As we concluded in Part III-D, *supra*, the evidence of damages was not

[12] *See* footnote 11. supra.

speculative and was sufficient for a jury to determine damages, whether for a breach **[*729]** **[**44]** of contract or market exclusion, with reasonable certainty.

In sum, there was sufficient evidence for the jury to conclude that defendants Drywood and PDI breached the sublicense, as amended, and caused ascertainable damages to plaintiff.

V. Inducing Breach of Contract

In its third cause of action, plaintiff claimed that all defendants, excluding Drywood and PDI, induced the latter two defendants to breach plaintiff's sublicense. There is no dispute among the parties that California law applies to this claim.

HN22[] Under California law, inducing breach of contract is a tort with five basic elements:

> '(1) that a valid contract existed between the plaintiff and another party; (2) that the defendant had knowledge of the contract and intended to induce a breach thereof; (3) that the contract was breached; (4) as a proximate result of the defendant's wrongful or unjustified [unprivileged] conduct; (5) resulting in damage to the plaintiff. **[***64]** [Citations]' *Abrams & Fox, Inc. v. Briney (1974), 39 Cal. App. 3d 604, 608, 114 Cal. Rptr. 328, 331* * * *

Mayes v. Sturdy Northern Sales, Inc., 154 Cal. Rptr. 43, 91 Cal. App. 3d 69 (1979). *See also* *Restatement (Second) of Torts, **[**45]** § 766* (1977).

HN23[] The conduct by which a defendant induces the breach, or intentionally interferes with another's contract rights, may be "either by unlawful means or by means otherwise lawful when there is a lack of sufficient justification for such interference." *Abrams & Fox, Inc. v. Briney, supra,* 114 Cal. Rptr. at 606; *Imperial Ice Co. v. Rossier, 18 Cal. 2d 33, 112 P.2d 631, 632, 634 (Cal. 1941)*. Moreover, when interference with performance is intended, the manner of interference is "not of great importance." W. Prosser, Handbook on the Law of Torts, § 129 at 936 (1971); *Restatement (Second) of Torts, supra, § 766 comments c*, k. Furthermore, an agent of the promissor may be liable for inducing a breach of contract where he misdirects or omits performance. W. Prosser, *supra*, at 935-36 n.19.

HN24[] A defendant may also be liable if he provides a party with an incentive to breach the contract. *Id. at 934*; *see also* Annot., Procuring Breach of Contract, 26 A.L.R. 2d 1227, § 813 at 1251 (1952); Note, Inducing Breach of Contract, 36 Harv. L. Rev. 663 (1923). Furthermore, a defendant is not justified in inducing a breach of contract simply because he is in competition **[**46]** with one of the parties to the contract and seeks to further his own economic advantage at the expense of the other. *Imperial Ice Co. v. Rossier, supra, 112 P.2d at 633*.

We now turn to the facts of this case. We have previously held that the evidence was sufficient to find that the contract was breached and plaintiff was damaged. *See* Part IV, *supra*. Furthermore, there is no dispute that defendants knew of plaintiff's sublicense. In fact, the only element peculiar to the inducement to breach claim challenged by defendants is the requirement that defendants intended to induce the breach. [13]

[47]** Intent, referencing a state of mind, is generally proved through circumstantial evidence, and the jury may draw the inference **[*730]** that a defendant intends the consequence of his knowing acts or conscious omissions.

---

[13] We note that defendants assert that "no party other than Power Dry (with its wholly-owned subsidiaries, Power Dry Patent and GWP, which were legally incapable of inducing any breach by Power Dry) participated in the decision in January 1982 to notify plaintiff of the invalidity of its purported contract." PDI et al. Brief in Support of Post Trial Motions; *see also* Compton Post-Trial Brief at 3, para 4; Crowley Post-Trial Brief at 20-21, para 3. These arguments, even assuming they were true, are irrelevant to the contract issues because the gist of the contract claim is Drywood's and PDI's failure to provide technical information prior to plaintiff's termination. Thus, it is defendants' conduct in providing encouragement, assistance and incentive to withhold technical information, not the termination letter, that provides the source of their liability on the contract and tort claims.

HN25[] -

See, e.g., United States v. Martinez, 694 F.2d 71, 73-74 (5th Cir. 1982); *United States v. Tidwell, 559 F.2d 262, 264* (5th Cir.), *rehearing denied*, *564 F.2d 98 (5th Cir. 1977)*, *cert. denied, 435 U.S. 942, 98 S. Ct. 1520, 55 L. Ed. 2d 538 (1978)*.

There was more here, however, than mere permissible inference. There was direct evidence that defendants knew plaintiff was entitled to technical information and that plaintiff had requested that information from Drywood and PDI. There was also evidence that EBC and Compton directed PDI to ignore plaintiff's request. Furthermore, the evidence showed that defendants actively facilitated the financing and transfer of the sublicense to PDI knowing that PDI would breach the sublicense. Each of the defendants derived substantial economic advantage from the financing in which the breach and termination of plaintiff's sublicense played a central role.

The assertion that defendants considered the sublicense invalid, **[**48]** *see, e.g.*, Compton's Post Trial Brief at 3, para. 5, is not a defense where defendants knew the terms of an express contract. *Restatement (Second) of Torts, supra, § 766 comment i*.

Nor can Crowley shield himself from liability simply by asserting that he gave no legal opinion on the validity of the sublicense. Throughout the relevant period, Crowley was actively pursuing his financial interest on several fronts: (1) as a party who held essential patent interests and royalty rights; (2) as a shareholder in Drywood; (3) as general counsel, through AJCPC, to Drywood; and (4) as a major shareholder in AJCPC, with a security interest in Hronopoulos' patent interest. In his capacity as counsel to Drywood, Crowley directed Howard Blumenthal, an AJCPC employee, to notify various sublicensees that their licenses were terminated or "activated." PX 19; 41. Nonetheless, Crowely never advised Drywood, nor did he direct Bluementhal, to respond to plaintiff's numerous requests for technical information pursuant to the sublicense.

From the evidence, of which the forgoing is but a small portion, the jury could reasonably infer that defendants intended to induce Drywood's and PDI's breach. **[***65]**

[49]** *Punitive Damages*

The jury awarded plaintiff punitive damages against EBC, Compton and Crowley for maliciously inducing a breach of contract. Intentionally inducing a breach of contract is an actionable tort. W. Prosser, *supra*, § 129 at 929. ***HN26***[] *California Civil Code § 3294* (West 1970 & Supp. 1984) provides for punitive damages in tort claims. The statute provides, in relevant part:

> (a) In an action for the breach of an obligation not arising from contract, where the defendant has been guilty of oppression, fraud, or malice, the plaintiff, in addition to the actual damages, may recover damages for the sake of example and by way of punishing the defendant.

* * *

> (c) As used in this section, the following definitions shall apply:
> (1) "Malice" means conduct which is intended by the defendant to cause injury to the plaintiff or conduct which is carried on by the defendant with a conscious disregard of the rights or safety of others.
> (2) "Oppression" means subjecting a person to cruel and unjust hardship in conscious disregard of that person's rights.
>
> (3) "Fraud" means an intentional misrepresentation, deceit, or concealment of a material fact known to the defendant **[**50]** with the intention on the part of the defendant of thereby depriving a person of property or legal rights or otherwise causing injury.

See also Duff v. Engelberg, 47 Cal. Rptr. 114, 116, 237 Cal. App. 2d 505 (1965) (punitive damages may be awarded on claim for inducing breach of contract); Annot., *supra*, 26 A.L.R. 2d at 1274-75.

[*731] Defendants contend that there was insufficient evidence of malice to award punitive damages. However, ***HN27***[] an award of punitive damages requires an examination of motive and intent, and the requisite "malice in fact" may be inferred from a defendant's conscious disregard of the plaintiff's rights. Neal v. Farmers Insurance Exchange, 582 P.2d 980, 986, 21 Cal. 3d 910, 148 Cal. Rptr. 389 (Cal. 1978); *see also* Colonial Life & Acc. Ins. Co. v. Superior Court, 647 P.2d 86, 90, 31 Cal. 3d 785, 183 Cal. Rptr. 810 (Cal. 1982); Taylor v. Superior Court, 598 P.2d 854, 855-56, 24 Cal. 3d 890, 157 Cal. Rptr. 693 (1979). Defendant's state of mind may be proved by direct or indirect evidence from which the jury may draw inferences. Neal v. Farmers Insurance Exchange, supra, 582 P.2d at 987 n.6; Bertero v. National General Corp., **[**51]** 529 P.2d 608, 625, 13 Cal. 3d 43, 118 Cal. Rptr. 184 (1974).

In brief, viewing the evidence in the light most favorable to plaintiff, the evidence showed that all three defendants discussed the terms of plaintiff's sublicense; all knew that plaintiff needed the technical information, and the license, to compete; all realized that plaintiff's license was a significant obstacle to their personal and corporate gain; all helped Drywood and PDI withhold information; and all facilitated the EBC financing knowing full well that, after the assignment from Drywood, PDI would breach plaintiff's license to their benefit.

The evidence is clearly sufficient for a jury reasonably to conclude that EBC, Compton and Crowley induced the breach in conscious disregard of plaintiff's rights.

Accordingly, we find no grounds to disturb the jury's award of punitive damages.

VI. The Verdict

Defendants contend that a new trial is required because the jury awarded $900,000 in lost profits on the antitrust claim and only $200,000 in damages on the breach of contract claim. Defendants argue that "the jury apparently considered only to [sic] [the] number of defendants being punished under each count **[**52]** -- $200,000 to be paid by two defendants, and $900,000 to be paid by nine defendants." PDI et al. Brief in Support of Post-Trial Motions at 22. The argument is frivolous speculation. Moreover, applying defendants' fanciful theory, the jury should also have returned a verdict for $700,000, instead of $200,000, on the claim for inducing breach of contract because seven defendants were found liable on that claim.

The only case cited for the proposition that different damage awards on different claims merits a new trial is Weingart v. Allen & O'Hara, Inc., 654 F.2d 1096 (5th Cir. 1981). In that case, the district court granted defendant's motion for judgment n.o.v., or, in the alternative, for a new trial on several independent grounds. Only one of the grounds "was that the jury's answers to the special interrogatories on damages were hopelessly inconsistent with the evidence and demonstrated that the answers were the result of confusion, sympathy and prejudice." Id. at 1105-06. After affirming on several grounds, the Fifth Circuit turned to the inconsistent verdict issue. In affirming, of course, the court applied an abuse of discretion standard. Without reference to the specific **[**53]** interrogatories, the court stated

> that a new trial is required. The plaintiffs claimed the same damages on the same facts under their fraud theory as under their breach of contract theory, and the jury charges and the interrogatories on **[***66]** compensatory damages on each of those theories were identical and yet the jury awarded compensatory damages of only $28,000 for breach of contract and over $200,000 for fraud.

Id. at 1106. We find *Weingart* inapposite because, in that case, plaintiff apparently claimed identical harm under both claims.

In the instant case, however, plaintiff alleged, and the jury was charged, that the contract claim was based on defendants' failure to provide technical information. The antitrust claim, on the other hand, was **[*732]** based on plaintiff's total exclusion from competition. The jury was entitled to conclude that the extent of the damages stemming from market exclusion was greater than that caused by the failure to provide updated technical information.

In Aquachem Co. v. Olin Corp., 699 F.2d 516, 521 (11th Cir. 1983), the court stated:

> The Seventh Amendment demands that, **HN28**[] if there is a view of the **[**54]** case which makes the jury's answers consistent, this Court must adopt that view. Griffin v. Matherne, 471 F.2d 911, 915 (5th Cir. 1973). It

> does not matter whether Aquachem can suggest equally plausible reasons for the verdict that would require reversal. *Miller v. Royal Netherlands, supra*, 508 F.2d at 1108. The test to be applied in reconciling apparent conflicts between the jury's answers is "whether the answers may fairly be said to represent a logical and probable decision on the relevant issues as submitted. . . ."

And in *Malm v. United States Lines Co., 269 F. Supp. 731* (S.D.N.Y.) (emphasis added), *aff'd*, *378 F.2d 941 (2d Cir. 1967)*, the court stated that "inconsistent ***HN29***[] jury verdicts upon *different counts or claims* are not an anomaly in the law which at times recognizes a jury's right to an idiosyncratic position provided the challenged verdict is based upon the evidence and the law."

Applying this standard, we cannot say that the jury's different damages award on different claims, with correspondingly different injuries, is irreconcilable.

VII. Evidentiary Rulings

A. Olsen's Immunity

Defendants contend that the court erred in granting plaintiff's motion **[**55]** *in limine* to exclude evidence that Olsen was given immunity to testify before a grand jury investigating allegedly illegal activities of Drywood and Hronopoulos. We excluded evidence of Olsen's immunity on the basis of ***HN30***[] *Fed. R.Evd. 403* after finding the attenuated probative value of the proffered evidence was substantially outweighed by the danger of unfair prejudice and waste of time on collateral issues.

Defendants argue that "the grant of immunity to Olsen was . . . a critically important probative link" in their defense that the sublicense was void as against public policy because it was given in return for favorable testimony before the grand jury.

The probative value of the evidence is, at best, slight. Moreover, the grant of immunity runs counter to defendants' claim that Olsen traded his testimony for the sublicense. Immunity was pointless if he had agreed not to testify, and immunity would not have been given, in all likelihood, if Olsen were not going to testify favorably.

In any event, defendants had ample opportunity to support their theory by showing the difference in Olsen's testimony before and after he received the sublicense and amendment. Thus, defendants were **[**56]** not materially prejudiced by the exclusion.

We note that letters from the office of the United States Attorney, stating that the government considered Olsen free of criminal liability, were also excluded. This entire area raised collateral issues of dubious relevance and presented a serious danger of confusing the issues and causing inordinate delay. Moreover, the clear danger of unfair prejudice to plaintiff, by implicating Olsen in criminal activity, substantially outweighed its probative value, if any. Accordingly, the evidence was excluded. *Fed.R.Evd. 403*.

B. Miscellaneous Documents

Defendants also object to the admission of the following plaintiff's exhibits: 73, 127, 232, 233, 277 and 288. We have once again reviewed the contents of these documents and their foundation. We conclude now, as we concluded previously after extensive argument, that these ***HN31***[] documents are admissible as business records, *Fed.R.Evd. 803(6)*, and as statements by a co-conspirator or his agent, *Fed.R.Evd. 801(d)(2)(E)*.

We also find PX 232 and 233 -- the Sapounakis memoranda -- admissible for the **[*733]** additional reason that they are statements of the declarant's state of mind. *Fed.R.Evd. 803(3)*; **[**57]** *Mutual Life Ins. Co. v. Hillmon, 145 U.S. 285, 295-96, 36 L. Ed. 706, 12 S. Ct. 909 (1892)* (letter ***HN32***[] expressing state of mind reasonable to show conforming action of second party); *United States v. Moore, 571 F.2d 76, 82 n.3 (2nd Cir. 1978)*; *United States v. Pheaster, 544 F.2d 353 (9th Cir. 1976)*, *cert. denied sub nom. Inciso v. United States, 429 U.S. 1099, 51 L. Ed. 2d 546, 97 S. Ct. 1118 (1977)*. **[***67]**

We do not find that these documents lack trustworthiness, *see* Fed.R.Evd. 803(6); beyond this, their weight and credibility were matters for the jury. In this context, we note that the jury was specifically instructed to give particularly careful scrutiny to the documents:

> Now, much of the evidence here consisted of business records and other writings. Most of these came in under what we call an exception to the hearsay rule. You heard the lawyers object many, many times in this case on the ground of hearsay. Hearsay is an out of court statement by a witness which is not subjected to cross examination. And in these business records that were admitted into evidence, there are many such out of court statements.
>
> Now, you may consider those statements, but you should **[**58]** use some caution and scrutinize them carefully before you rely on them, simply because they were not subjected to the lie detecting process of cross examination. (XIII at 13-14.)

HN33[] The general policy of the Federal Rules of Evidence, and Rule 803(6) in particular, "favors the admission of evidence rather than its exclusion if it has any probative value at all," *In re Ollag Construction Equipment Corp., 665 F.2d 43, 46 (2d Cir. 1981)* (citation omitted), and the court has broad discretion in determining issues of admissibility, *e.g., United States v. Fendley, 522 F.2d 181, 184 (5th Cir. 1975)*. ***HN34***[] In an antitrust conspiracy suit, where there is rarely direct evidence of agreement and plaintiff must rely on reasonable inferences from indirect proof, the rules of evidence should be liberally construed "to the end that the truth may be ascertained and proceedings justly determined." *Fed.R.Evd. 102*.

For the foregoing reasons, we find that the contested documents were properly admitted.

VIII. Jury Instructions

Defendants contend that various errors in the charge require the grant of a new trial. We have carefully reviewed the charge, in light of the evidence, claims **[**59]** and arguments of counsel. *National Distillers & Chemical Corp. v. Brad's Machine Products, Inc., 666 F.2d 492, 497 (11th Cir. 1982)*. We find that the charge, taken as a whole, "fairly and adequately state[s] the pertinent legal principles" raised by the evidence. *Hogg's Oyster Co. v. United States, 676 F.2d 1015, 1019 (4th Cir. 1982)*. *See also Johnson v. Bryant, 671 F.2d 1276, 1280 (11th Cir. 1982)*; *Glass Containers Corp. v. Miller Brewing Co., 643 F.2d 308, 312 (5th Cir. 1981)* (no ***HN35***[] duty to charge on issues "inferentially suggested by incidental evidence in the record").

Defendants contend that the court should have given PDI's request to charge No. 3 and Crowley's request Nos. 20 and 21 concerning the legality of patent monopolies. In the circumstances of this case, we ruled as a matter of law that the patent defense did not apply, *see* Part III-A, *supra*. Therefore, the requests were not pertinent to any factual issue before the jury, and, moreover, would have been confusing and misleading. *See Harrington v. United States, supra, 504 F.2d at 1317*.

We reach a similar conclusion with respect to PDI's request Nos. 7, 8, 9 and 10. These requests concerned **[**60]** defendants' argument that the sublicense was invalid as an "insider contract" and lacked consideration.

We held the insider contract defense insufficient as a matter of law. The sublicense was "ratified and confirmed" in an agreement which incorporated the sublicense in an amendment to the sublicense. **[*734]** The amended sublicense was executed by Olsen and Drywood (PX 54). It is undisputed that when Olsen executed the contract, he was no longer an officer or employee of Drywood. As a matter of law, therefore, the sublicense is not invalid as a contract between a corporation and an officer. *See* Del. Code Ann. tit. 8 § 144(a) (1983). [14]

---

[14] ***HN36***[] Del Code tit. 8 § 144(a) (1983) provides:

> (a) No contract or transaction between a corporation and 1 or more of its directors or officers, or between a corporation and any other corporation, partnership, association, or other organization in which 1 or more of its directors or officers are directors or officers, or have a financial interest, shall be void or voidable solely for this reason, or solely because the

[*68]** **[**61]** Moreover, the original sublicense was executed by Hronopoulos as president of Drywood. Hronopoulos was also a 90% shareholder at the time. Obviously, he knew the terms of the sublicense and that Olsen was an officer of Drywood. Therefore, even the original sublicense is valid under *Del. Code Ann. tit. 8 §§ 144(a)(1)* and *144(a)(2)*.

Defendants' contention that the sublicense lacked consideration was also insufficient as a matter of law. By its own terms, the contract gives Olsen substantial rights to market the RFV process. In exchange, Olsen undertakes to construct or buy kilns, market them, pay royalties, and exchange technical information concerning the RFV process (PX 53). These provisions constitute the ***HN37***[] bargained-for exchange which is the essence of consideration. *Cal. Civil Code § 1605* (West 1970 & Supp.); *In re Estate of Bray, 230 Cal. App. 2d 136, 40 Cal.Rptr. 750, 753 (1964)*. Therefore, defendants' requests to charge on the issue of consideration (PDI's Nos. 8, 9 and 10) were irrelevant to any issue before the jury.

Defendants also argue that the court erred by failing to give PDI's request Nos. 12A and 29 and Crowley's request No. 22. In essence, these instructions **[**62]** state that "an ambiguity in a contract must be construed most strongly against the party which wrote the contract." PDI request No. 12A.

To the extent that this statement constitutes ***HN38***[] a rule of interpretation, the courts do not apply it mechanically, especially where there is no evidence of adhesion or unequal bargaining advantage. In such circumstances, the rule is inapposite. *See, e.g., Schering Corp. v. Home Insurance Co., 712 F.2d 4, 10 (2d Cir. 1983)*; *Texaco, Inc. v. Rogow, 150 Conn. 401, 190 A.2d 48 (1963)* (lease dispute).

The case upon which defendants rely in their brief, *Distillers Distributing Corp. v. J.C. Millett Co., 310 F.2d 162, 164 (9th Cir. 1962)*, is not to the contrary. In that case, the Ninth Circuit did not hold that ambiguous contracts must invariably be construed against the drafter. Rather, the court simply noted that the rule was "applicable" in that case because the record "did not contain sufficient evidence to resolve the interpretation of the contract as contended for by [defendant]."

In this case, the evidence was sufficient to support both sides' interpretations, and the issue was properly submitted to the jury without resort **[**63]** to purported rules in aid of construction. Moreover, the evidence showed that Olsen "drafted" the sublicense by selecting portions from prior sublicenses drafted by Drywood. Thus, **[*735]** the contract was between an individual with no legal experience and a corporation fully familiar with highly similar, if not identical, contracts.

In these circumstances, PDI's request Nos. 12A and 29 and Crowley's No. 22, concerning the rule of construing contracts against the drafter, were inapplicable, confusing and misleading.

Defendants also argue that the jury should have been instructed that "affiliated companies which are not in competition with one another cannot conspire." PDI et al. Brief in Support of Post-Trial Motions at 30. Defendants cite *Call Carl, Inc. v. BP Oil Corp., 554 F.2d 623* (4th Cir.), *cert. denied*, *434 U.S. 923, 54 L. Ed. 2d 280, 98 S. Ct. 400 (1977)*, in support of their argument. In that case, however, involving a gasoline dealership termination, the

---

director or officer is present at or participates in the meeting of the board or committee which authorizes the contract or transaction, or solely because his or their votes are counted for such purpose, if:

(1) The material facts as to his relationship or interest and as to the contract or transaction are disclosed or are known to the board of directors or the committee, and the board or committee in good faith authorizes the contract or transaction by the affirmative votes of a majority of the disinterested directors, even though the disinterested directors be less than a quorum; or

(2) The material facts as to his relationship or interest and as to the contract or transaction are disclosed or are known to the shareholders entitled to vote thereon, and the contract or transaction is specifically approved in good faith by vote of the shareholders; or

(3) The contract or transaction is fair as to the corporation as of the time it is authorized, approved or ratified, by the board of directors, a committee or the shareholders.

court expressly stated that it did not consider the issue of whether affiliated companies can conspire because that aspect of the district court's ruling was not appealed. *Id. at 628 n.4*. Thus, *Call Carl* **[**64]** is wholly inapposite and does not support defendants' contention.

Moreover, unlike this case, the only alleged conspirators in *Call Carl* were a parent and its wholly-owned subsidiary. It should also be noted that in *Call Carl* the court found that, despite the termination, there was "horizontal competition in the market from other sources." *Id*. In this case, however, plaintiff's termination completely eliminated horizontal competition in the market for RFV kilns.

In *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 52 U.S.L.W. 4821, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*, the Supreme Court addressed the issue of "whether a parent and its wholly-owned subsidiary are capable of conspiring in violation of *§ 1* of the Sherman Act." *Id. at 4825*. The Court held that a conspiracy based solely on the conduct of a parent and its wholly-owned subsidiary is not prohibited by *§ 1* of the Sherman Act. *Id*. at 4828. However, the Court did "not consider under what circumstances, if any, a parent may be liable for conspiring with an affiliated corporation it does not completely own." *Id. at 4825*.

Of greater relevance in the context of this case, however, is **[**65]** the fact that *Copperweld* unequivocally reaffirms the rule that ***HN39***[] affiliated corporations can be held liable for conspiring with unaffiliated companies or persons. *Id. at 4824-25* & nn. 8 & 9. This rule is directly applicable to this case because plaintiff alleged, and the jury reasonably found, that the scope and membership in the conspiracy went beyond an agreement solely between the affiliated companies. There was evidence that the affiliates conspired with non-affiliates, such as EBC, Drywood, Hronopoulos, C & C, and Crowley. Thus, the issue was not whether the affiliates conspired with themselves, but whether they conspired with other defendants as well. This issue falls squarely within the rule reaffirmed **[***69]** in *Copperweld, supra, at 4824-25*. Therefore, defendants' proposed instruction concerning conspiracy solely among affiliates was inapposite. Moreover, even if defendants' proposed instruction were a correct statement of law and relevant, the jury's finding that the affiliates conspired with non-affiliates would render the omission harmless error. *Fed.R.Civ.P. 61*.

In conclusion, we find that the charge, taken as a whole and in light of the pleadings and evidence, fairly **[**66]** and adequately instructs on the law applicable to the factual issues submitted to the jury. *Hogg's Oyster Co. v. United States, supra, 676 F.2d at 1019*.

IX. Motion for New Trial

Defendants also move for a new trial, in the alternative to their motion for judgment n.o.v., on the grounds that the verdict is against the great weight of the evidence and represents a miscarriage of justice. *See* *Wyatt v. Interstate & Ocean Transport Co., 623 F.2d 888, 892 **[*736]** (4th Cir. 1980)*. On this motion, we bear in mind that ***HN40***[] the grant of a new trial is addressed to the court's sound discretion and that the standard for granting a new trial is somewhat less stringent than that for granting a judgment n.o.v. *See, e.g.,* *Bevevino v. Saydjari, 574 F.2d 676, 684 (2d Cir. 1978)*; *Aetna Cas. & Sur. Co. v. Yeatts, 122 F.2d 350 (4th Cir. 1941)*; 11 Wright & Miller, Federal Practice and Procedure § 2806 (1973 & Supp.). Nevertheless, we do not find that the verdicts are contrary to the clear weight of the evidence. *Cf.* *Williams v. City of Valdosta, 689 F.2d 964, 973 (11th Cir. 1982)* (verdict must be "contrary to the great, and not merely the greater weight of the evidence").

[67]** At the heart of this case were the inferences to be drawn from the direct and circumstantial evidence. We have found the jury's inferences reasonable, *supra*. The possibility that contrary inferences might have been drawn does not warrant the grant of a new trial.

Furthermore, we find no support for the argument that the verdict somehow represents a miscarriage of justice. Nor do we find any evidence in the record, in the conduct of the participants at trial, or in our observation of the jury throughout the trial that suggests to us that the verdict was to any extent the result of passion or prejudice. In fact, plaintiff's presentation was notable for its absence of hyperbole.

Accordingly, we deny defendants' motions for a new trial.

X. Declaratory and Injunctive Relief

Plaintiff's fourth and fifth claims seek declaratory relief, pursuant to *28 U.S.C. § 2201*, and injunctive relief, pursuant to *15 U.S.C. § 26*. The fourth claims seeks a declaration of the parties' rights and duties under plaintiff's sublicense. The fifth claims seeks permanent injunctive relief requiring Drywood and/or PDI, in essence, to provide plaintiff with all existing and future technology related to **[**68]** the RFV process. We decline to grant the relief sought on these claims for the following reasons. [15]

A. Declaratory Relief

HN42[] It is well established that the grant of declaratory relief rests within the discretion of the trial **[**69]** court. *Public Service Comm'n of Utah v. Wycoff Co., 344 U.S. 237, 241, 97 L. Ed. 291, 73 S. Ct. 236 (1952)*. In declining to grant declaratory relief in the case before us, we emphasize that a declaratory judgment would serve no useful purpose in clarifying or settling the legal relations of the parties. *Maryland Cas. Co. v. Rosen, 445 F.2d 1012, 1014 (2d Cir. 1971)*; *Maryland Cas. Co. v. Boyle Construction Co., 123 F.2d 558 (4th Cir. 1941)*. The jury award has compensated plaintiff fully for its losses, and, as a result, there is no need for declaratory relief. Furthermore, to the extent that a declaratory judgment would have the effect of requiring defendants to fulfill their obligations under the Nonexclusive Sublicensing Agreement, we note that our reasons for denying injunctive relief apply in this context as well. *See* Part X-B, *infra*.

B. Injunctive Relief

HN43[] When a plaintiff in an antitrust action seeks both monetary damages and injunctive relief, as here, the plaintiff is first entitled to a jury trial on his legal claims. *Ohio-Sealy Mattress Mfg. Co. v.* ***[*737]*** *Sealy, Inc., 585 F.2d 821, 824 (7th Cir. 1978)*; *Florists' Nationwide Telephone Delivery* **[**70]** *Network v. Florists' Telegraph Delivery* ***[***70]*** *Ass'n, 371 F.2d 263, 271 (7th Cir. 1967)*. The court is then bound by the jury verdict on its subsequent ruling on the equitable claims under the doctrine of collateral estoppel. *Florists' Nationwide Telephone Delivery Network, supra, 371 F.2d at 271*. As a result, our treatment of the equitable claims here must not be inconsistent with the jury's disposition of the issues presented to it. *Id*.

Nevertheless, ***HN44***[] we are not required to grant equitable relief simply because the jury awarded damages to plaintiff. Under *15 U.S.C. § 26*, the court may grant equitable relief to remedy violations of the ***antitrust law*** "when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity." Accordingly, we must apply basic principles of equity in determining whether to grant the injunctive relief sought by plaintiff here. In this context, plaintiff is not entitled to equitable relief because its remedy at law is adequate. *Weiss v. York, 548 F. Supp. 1048, 1057 (M.D. Pa. 1982)*. As part of its theory of damages at trial, plaintiff asserted that defendants' **[**71]** unlawful conduct deprived it of future profits on sales of RFV kilns. Plaintiff then presented evidence from which the jury could make a reasonable estimate of its future lost profits over approximately the next ten years. Having awarded plaintiff $900,000, the jury clearly based its verdict to a considerable extent on this evidence.

Thus, plaintiff requested and received prospective damages. Under plaintiff's own theory of damages, it can suffer no further future harm once it has been compensated for the profits from the sales it claims it would have made absent defendants' unlawful conduct. ***HN45***[] Its remedy at law is therefore adequate. Injunctive relief would afford a double recovery because plaintiff would receive an opportunity to earn the profits it has already been awarded by the jury. *Affiliated Capital Corp. v. City of Houston, 519 F. Supp. 991, 1011 (S.D. Tex. 1981)*, *rev'd on*

---

[15] Defendants' claim for declaratory relief, PDI et al. Answer at 17-18, must also be denied. ***HN41***[] When ruling on equitable claims, the court is bound by the jury's relevant findings on the legal claims. *Florists' Nationwide Telephone Delivery Network v. Florists Telegraph Delivery Ass'n, 371 F.2d 263, 271 (7th Cir. 1967)*. It would be wholly inconsistent with the jury's finding in this case to grant defendants PDI et al. the declaratory relief which they request. Moreover, granting declaratory relief would serve no useful purpose at this stage because the legal obligations of the parties have been clarified by the jury's resolution of the legal claims. *See* *Maryland Casualty Co. v. Rosen, 445 F.2d 1012, 1014 (2d Cir. 1971)*. Accordingly, we deny defendants' claim for declaratory relief.

other grounds, 700 F.2d 226 (5th Cir.), *rehearing granted*, 714 F.2d 25 (5th Cir. 1983). In essence, plaintiff has elected to pursue a full damage remedy, and injunctive relief would result in an unjust windfall. *Id*. Moreover, such injunctive relief, in the context of this case, **[**72]** would be analogous to an award of damages for breach of contract *and* specific performance as well. In order to avoid an inequitable result, we conclude that injunctive relief is inappropriate.

XI. Conclusion

Accordingly:

(1) defendants' motions for judgment n.o.v. or for a new trial are denied in all respects;

(2) defendant PDI et al.'s counterclaim for declaratory relief is denied in all respects; and

(3) plaintiff's claims for declaratory and injunctive relief are denied in all respects.

So ordered.

F. Buddie Contracting, Inc. v. Seawright

United States District Court for the Northern District of Ohio, Eastern Division

August 15, 1984

Case No. C80-2344

LexisNexis® Headnotes

Antitrust & Trade Law > Sherman Act > General Overview

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN1[] **Antitrust & Trade Law, Sherman Act**

A four year statute of limitations applies to federal antitrust claims.

Antitrust & Trade Law > Sherman Act > General Overview

Governments > Legislation > Statute of Limitations > Time Limitations

HN2[] **Antitrust & Trade Law, Sherman Act**

See 15 U.S.C.S. § 15b.

Antitrust & Trade Law > Sherman Act > General Overview

Governments > Legislation > Statute of Limitations > Tolling

HN3[] **Antitrust & Trade Law, Sherman Act**

Three elements must be pleaded in order to establish fraudulent concealment: (1) wrongful concealment of their actions by the defendant; (2) failure of the plaintiff to discover the operative facts or the basis of his cause of action within the limitations; and (3) plaintiff's due diligence until discovery of the facts.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

Governments > Legislation > Statute of Limitations > Tolling

HN4[] **Antitrust & Trade Law, Sherman Act**

A plaintiff must allege fraudulent concealment with specificity under *Fed. R. Civ. P. 9(b)* and the plaintiff bears the burden of proving fraudulent concealment.

Antitrust & Trade Law > Sherman Act > General Overview

Governments > Legislation > Statute of Limitations > Tolling

HN5[] **Antitrust & Trade Law, Sherman Act**

In the most common situation, the wrongful concealment requirement is met by evidence of affirmative conduct upon the part of the defendant which would lead a reasonable person to believe that he did not have a claim for relief.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Laches

Governments > Legislation > Statute of Limitations > Tolling

Governments > Legislation > Statute of Limitations > General Overview

HN6[] **Antitrust & Trade Law, Sherman Act**

When there has been no negligence or laches on the part of a plaintiff in coming to the knowledge of a fraud which is the foundation of the suit, and when the fraud has been concealed, or is of such character as to conceal itself, the statute of limitations does not begin to run until the fraud is discovered by, or becomes known to, the parties suing, or those in privity with him.

Antitrust & Trade Law > Sherman Act > General Overview

Governments > Legislation > Statute of Limitations > Tolling

HN7[] **Antitrust & Trade Law, Sherman Act**

At least in antitrust cases, where a plaintiff remains ignorant of at least some of the facts required to make out its claim, the plaintiff does not have knowledge of its claim.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN8[] **Private Actions, Standing**

See *15 U.S.C.S. § 15*.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN9[] **Private Actions, Standing**

Antitrust standing consists of two related inquiries. The court is required to determine whether the plaintiff has sustained injury-in-fact. If plaintiff satisfies this test, then the court must analyze whether plaintiff's injury is of the type the antitrust laws were intended to prevent.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN10[] **Private Actions, Standing**

There are five factors which guide the exercise of the court's judgment in deciding whether a plaintiff's claim is the type of matter for which the antitrust laws were intended. Specifically, the court must look to: (1) the causal connection between the antitrust violation and harm to the plaintiff and whether that harm was intended to be caused; (2) the nature of the plaintiff's alleged injury including the status of the plaintiff as consumer or competitor in the relevant market; (3) the directness or indirectness of the injury, and the related inquiry of whether the damages are speculative; (4) the potential for duplicative recovery or complex apportionment of damages; and (5) the existence of more direct victims of the alleged antitrust violation.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN11[] **Private Actions, Standing**

A proper antitrust plaintiff should be a consumer, customer, competitor or participant in the relevant market or otherwise inextricably intertwined with any such entity.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN12[] **Private Actions, Standing**

The existence of more direct victims of an antitrust violation may justify denial of the antitrust standing to a plaintiff because the existence of more direct victims is not likely to leave a significant antitrust violation undetected or unremedied.

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] Antitrust & Trade Law, Sherman Act

See *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > International Aspects > Commerce With Foreign Nations

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN14[] Sherman Act, Claims

A claim under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, is comprised of three elements: (1) a contract, combination or conspiracy among two or more separate entities (2) that unreasonably restrains trade in a relevant market (3) and is in or affects interstate or foreign commerce.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN15[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Where a firm succeeds in tampering with the competitive bidding process in such a manner that competitive bidding becomes a farce, an unreasonable restraint of trade has occurred.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN16[] Regulated Practices, Price Fixing & Restraints of Trade

Under the Noerr-Pennington exemption, concerted activities to influence the political processes are exempt from this coverage of the antitrust laws, even if they restrain competition.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN17[] **Regulated Practices, Price Fixing & Restraints of Trade**

The Sherman Act does not prohibit two or more persons from associating together in an attempt to persuade the legislature or the executive to take particular action with respect to a law that would produce a restraint or a monopoly.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN18[] **Regulated Practices, Price Fixing & Restraints of Trade**

Joint efforts to influence public officials do not violate the antitrust laws even though intended to eliminate competition. Such conduct is not illegal, either standing alone or as a part of a broader scheme itself violative of the Sherman Act.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN19[] **Estoppel, Collateral Estoppel**

When an issue of fact or law is actually litigated and determined by valid and final judgment, and the determination is essential to the judgment, the determination is conclusive in a subsequent action between the parties, whether on the same or a different claim.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN20[] **Estoppel, Collateral Estoppel**

Where parties have previously litigated an issue in a state court proceeding, collateral estoppel always precludes relitigation of the issue in a subsequent federal court proceeding.

Civil Procedure > ... > Preclusion of Judgments > Full Faith & Credit > Full Faith & Credit Statutes

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Full Faith & Credit > General Overview

HN21[] **Full Faith & Credit, Full Faith & Credit Statutes**

See *28 U.S.C.S. § 1738*.

Civil Procedure > ... > Preclusion of Judgments > Full Faith & Credit > General Overview

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

HN22[] **Preclusion of Judgments, Full Faith & Credit**

28 U.S.C.S. § 1738 requires a federal court to give a prior state court judgment the same preclusive effect that it would have had in that state.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN23[] **Estoppel, Collateral Estoppel**

With respect to the rule of collateral estoppel in Ohio, a point or a fact which is actually and directly in issue in a former action and was there passed upon and determined by a court of competent jurisdiction may not be drawn in question in any future action between the same parties or their privies, whether the cause of action in the two actions be identical or different.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN24[] **Estoppel, Collateral Estoppel**

An exception to collateral estoppel allows relitigation of an issue where there are procedural differences between the two courts. Relitigation is allowed where a new determination of the issue is warranted by differences in the quality or expensiveness of the procedures followed in the two courts.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN25[] **Estoppel, Collateral Estoppel**

An exception to collateral estoppel supports allowing a new determination where the party sought to be precluded did not have an adequate opportunity or incentive to obtain a full and fair adjudication in the initial action. That exception provides that there is a clear and convincing need for a new determination of the issue when the party sought to be precluded, as a result of the conduct of his adversary or other special circumstances, did not have an adequate opportunity or incentive to obtain a full and fair adjudication in the initial action.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN26[] **Estoppel, Collateral Estoppel**

An exception to the general rule of issue preclusion recognizes differences in the burden of persuasion with respect to an issue as a basis for allowing relitigation of that issue. The exception allows relitigation where a party against whom preclusion is sought had a significantly heavier burden of persuasion with respect to the issue in the subsequent action.

Opinion

[*425] MEMORANDUM OPINION

DOWD, District Judge

Before the Court is the motion for summary judgment of defendant, Peabody Galion, Inc., (Peabody). For the reasons stated below, the motion for summary judgment is denied.

I. FACTUAL BACKGROUND

This case arose out of the award of a contract to build a solid waste transfer station (transfer station) for the City of Cleveland (City) in May 1975. The City retained Seminole Management Consultants, Inc., (Seminole) to prepare the specifications for the transfer station and to assist the City in reviewing bids for the project. Seminole's president, Lawrence Plants (Plants), was principally responsible for this work. F. Buddie Contracting, Inc. (Buddie), the plaintiff in this action, was one of the bidders on the project. Peabody, through one of its local distributors, William Seawright (Seawright), also bid on the project.

A number of companies bid for the transfer station contract. In relevant part, those bids were

Buddie Contracting, Inc.	$1,247,700.00
Stephens Paint & Corp.	1,472,000.00
Peabody-Galion	1,578,766.00

[2]** A review of the bids, however, indicates that the bidders found the specifications ambiguous and bid on slightly different projects. The City then turned to its consultant, Seminole, to review the bids and to make a recommendation for the award of the contract. Seminole recommended that the City award the contract to Peabody as the lowest responsible bidder and that the City disqualify Buddie's bid as defective. Acting on Seminole's recommendation, the City then awarded the contract to Peabody on June 20, 1975.

On July 9, 1975, Buddie filed a taxpayer's action in Cuyahoga County Common Pleas Court (Buddie I) alleging a violation of the state laws regulating the award of public contracts. Buddie sought an injunction barring execution of the contract and readvertisement of the bids. Within two weeks, the trial judge heard the case on plaintiff's application for a preliminary injunction.

On August 6, 1975, the trial judge entered judgment in favor of the defendants in the Buddie I action. In his opinion, the trial judge indicated that he had, apparently on his own motion, consolidated the trial on the merits with the application for preliminary injunction pursuant to Ohio Civil **[**3]** Rule 65(B)(2). In relevant part, the trial judge's opinion stated that he found no evidence of improper conduct or collusion involving any public official or bidder. He further found that Seminole was justified in suggesting rejection of Buddie's bid because of defects in the bid. In conclusion, the trial judge, recognizing the limited role of courts in reviewing awards of public contracts, upheld the selection of Peabody as the successful bidder.

Buddie appealed the decision of the Buddie I court to the Eighth District Court of Appeals. That Court affirmed the trial judge's decision in an opinion filed on December 2, 1976. Construction of the transfer station proceeded throughout this period and the transfer station is now complete.

Subsequent to the close of the Buddie I action, press revelations and a subsequent prosecution disclosed an unlawful relationship between Seminole and Peabody. Seminole's president, Plants was discovered to be a close business associate of defendant, Seawright, the president of a Peabody distributor. On December 21, 1978, the Cuyahoga County Grand Jury indicted Seawright, Seminole, and Plants on criminal charges arising out of their involvement in the **[**4]** award of the contract for the transfer station. Ultimately, Seawright pled guilty **[*426]** to one count of attempt and complicity to have an unlawful interest in a public contract. Seminole pled guilty to one count of having an unlawful interest in a public contract and Plants pled guilty to attempt to have an unlawful interest in a public contract. The remaining counts of the indictment were dismissed as part of the plea bargain.

Frank John Gerdnic, vice president of marketing for Peabody's solid waste division, received a grant of immunity in exchange for his testimony in this case. His sworn statement, attached to the brief in opposition to the motion for summary judgment, indicates that Peabody had knowledge of Seawright's unlawful conduct and took no action to disassociate itself from Seawright.

II. PROCEDURAL HISTORY

After the entry of the guilty pleas, Buddie instituted this federal court action alleging violations of the antitrust laws. In brief, Buddie alleges that the defendants conspired to secure the award of the contract for Peabody, even though Peabody was not the lowest responsible bidder. It claims that this conspiracy violated both *§ 1* of the Sherman Act, *15 **[**5]** U.S.C. § 1*, and Ohio's Valentine Act, *Ohio Rev. Code § 1331.01 et seq*.

Peabody now moves for summary judgment arguing that (1) Buddie's cause of action is barred by the statute of limitations; (2) Buddie lacks standing to sue for damages under the antitrust laws; and (3) Buddie's allegations fail to state a violation of the antitrust laws. Even if Buddie's legal theories and factual submission survive these legal challenges, Peabody further contends that collateral estoppel prevents Buddie from establishing facts required to make out its cause of action.

Before turning to these specific challenges, the Court notes the unique standard which applies to the review of summary judgment motions in an antitrust case. Historically, the courts have been extremely reluctant to dispose of antitrust litigation on summary judgment motions. *See* *Poller v. Columbia Broadcasting System, Inc. 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962)*. While that standard has been somewhat relaxed, *see* *First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 284-90, 20 L. Ed. 2d 569, 88 S. Ct. 1575 (1968)*, summary judgment is still disfavored, particularly where factual issues **[**6]** remain subject to dispute. *See* *Smith v. Northern Michigan Hospitals, Inc., 703 F.2d 942 (6th Cir. 1983)*. While it is debatable whether this attitude toward summary judgment applies to motions presenting principally legal issues, the Court approaches the motion mindful of the particular hazards associated with granting summary judgment in antitrust litigation.

III. STATUTE OF LIMITATIONS.

HN1[] A four year statute of limitations applies to federal antitrust claims. [1] The contract award which gives rise to this lawsuit was made on June 20, 1975 - over five years followed until the filing of the complaint in this case on December 19, 1980. Absent some tolling provision, therefore, Buddie's claim will be barred by the statute of limitations.

Buddie's complaint **[**7]** contains an allegation of fraudulent concealment which Buddie claims will result in a tolling of the statute of limitations. [2] The Sixth Circuit set out **[*427]** the requirements for a party alleging fraudulent concealment in *Dayco Corp. v. Goodyear Tire & Rubber Co., 523 F.2d 389 (6th Cir. 1975)*. In that case, the Court stated:

> ***HN3***[] Three elements must be pleaded in order to establish fraudulent concealment: (1) wrongful concealment of their actions by the defendant; (2) failure of the plaintiff to discover the operative facts or the basis of his cause of action within the limitations; and (3) plaintiff's due diligence until discovery of the facts.

Id. at 394 (citation omitted). Further, ***HN4***[] plaintiff must allege fraudulent concealment with specificity under *Fed. R. Civ. P. 9(b)* and plaintiff bears the burden of proving fraudulent concealment. *523 F.2d at 394*.

[8]** Before analyzing Buddie's claim of fraudulent concealment, it is important to recognize the effect of the procedural posture of this case on the analysis. Although plaintiff bears the burden of proof on the issue of fraudulent concealment, on a motion for summary judgment, this Court must only determine whether a genuine issue of material fact exists which justifies a trial. This Court must evaluate, therefore, whether Peabody's motion establishes the absence of a genuine issue regarding any of these elements required for plaintiff's claim of fraudulent concealment.

Peabody has challenged Buddie's claim of fraudulent concealment on the ground that it fails to contain any of the three elements required by *Dayco*. Upon review, this Court concludes that Peabody's motion has not demonstrated the absence of any genuine issue as to any of the elements of fraudulent concealment. The motion to dismiss on this basis, therefore, is denied.

A. *Wrongful Concealment*.

---

[1] In relevant part, the statute of limitations provides that

> ***HN2***[] Any action to enforce any cause of action under . . . this title shall be forever barred unless commenced within four years after the cause of action accrued.

15 U.S.C. § 15b.

[2] In relevant part, the complaint alleges

> Plaintiff had no knowledge of said antitrust violations as they affected the bidding process and the award, or of any facts which might have led to discovery thereof at any time prior to disclosures contained in Cleveland Press articles in 1977, which disclosed the business and personal relationships between the defendants. Defendants deceptively secured the appointment of defendants, SEMINOLE and PLANTS as management consultants to the City of Cleveland through the influence of defendant SEAWRIGHT, a close friend and business associate of defendant, PLANTS. SEAWRIGHT was at the same time a distributor for defendant, PEABODY GALION. Defendants, SEMINOLE and PLANTS, thereafter tailored the specifications which they recommended to the City of Cleveland to fit defendant PEABODY GALION'S equipment and, indeed, defendant, PEABODY GALION did, in fact, draft the specifications. For their roles in the award of this contract, defendants, SEMINOLE, SEAWRIGHT and PLANTS, were indicted by a Cuyahoga County Common Pleas Grand Jury and entered pleas of guilty - SEMINOLE to having an unlawful interest in a public contract; PLANTS to attempt and having an unlawful interest in a public contract; and SEAWRIGHT to attempt and complicity. As a result, plaintiff, by the exercise of due diligence, did not discover, and could not have discovered, the violations alleged herein prior to 1977.

Complaint at para. 17.

Under the test set forth in *Dayco*, the first element of Buddie's claim of fraudulent concealment is "wrongful concealment of their actions by the defendants." **HN5**[] In the most common situation, this requirement is met by **[**9]** evidence of "affirmative conduct upon the part of the defendant which would . . . lead a reasonable person to believe that he did not have a claim for relief." *Rutledge v. Boston Woven Hose & Rubber Co., 576 F.2d 248, 250 (9th Cir. 1978)*. A defendant engaged in land fraud, for example, might satisfy this requirement by forwarding documentation relating to the purchased land to the victim.

In this case, Buddie does not contend that Peabody engaged in any "affirmative conduct" after the date of the contract award. Rather, Buddie has raised a genuine issue as to the existence of a conspiracy before the award of the contract and Peabody's participation in that conspiracy. From these facts, Buddie argues that it has satisfied the requirement of showing wrongful concealment.

This case, therefore, raises the issue of whether a conspiracy, which by its nature is self-concealing, will serve as a substitute for affirmative conduct by the defendants in satisfying the requirement of wrongful concealment. While this issue has been the subject of significant judicial comment, particularly in the context of antitrust claims, neither counsel nor the Court have located a case where a court has **[**10]** accepted a fraudulent concealment claim based upon the presence of a self-concealing conspiracy. **[*428]** Those courts which have considered the issue as a theoretical matter, however, have arrived at inconsistent results. Compare *Rutledge v. Boston Woven Hose & Rubber Co., 576 F.2d 248 (9th Cir. 1978)*; *In re Fertilizer Antitrust Litigation*, 1979-2 Trade Cases para. 62,894 (E.D. Wash. 1979); and *Hall v. E.I. DuPont DeNemours & Co., 312 F. Supp. 358 (E.D. N.Y. 1970)* (rejecting a self-concealing conspiracy theory) with *Ashland Oil Co. of California v. Union Oil Co. of California, 567 F.2d 984 (TECA 1977)* and *Chambers & Barber, Inc. v. General Adjustment Bureau, 60 F.R.D. 455 (S.D.N.Y. 1973)* (accepting a self-concealing conspiracy theory).

In the absence of controlling authority, resolution of this issue requires a consideration of the policies behind the statute of limitations and the fraudulent concealment exception. The Supreme Court's decision in *Bailey v. Glover, 88 U.S. (21 Wall.) 342, 22 L. Ed. 636 (1874)*, the principal early formulation of the doctrine of fraudulent concealment, provides the starting point for this review. In *Bailey*, the Court **[**11]** rejected a statute of limitations defense to a claim by a trustee-in-bankruptcy that the debtor had transferred his assets to his wife's name to avoid the claims of his creditors. Analyzing the concept of fraudulent concealment in the context of the statute of limitations, the Court stated that statutes of limitations:

> were enacted to prevent frauds; to prevent parties from asserting rights after the lapse of time had destroyed or impaired the evidence which should show that such rights never existed, or had been satisfied, transferred, or extinguished, if they ever did exist. To hold that by concealing a fraud, *or by committing a fraud in a manner that it concealed itself* until such time as the party committing the fraud could plead the statute of limitations to protect it, to make the law which was designed to prevent fraud the means by which it is made successful and secure.

Id. at 349 (emphasis added). Rejecting any distinction between the rule applicable in cases brought in law or in equity the Court went on to hold that

> **HN6**[] when there has been no negligence or laches on the part of a plaintiff in coming to the knowledge of a fraud which is the foundation **[**12]** of the suit, and when the fraud has been concealed, *or is of such character as to conceal itself*, the statute does not begin to run until the fraud is discovered by, or becomes known to, the parties suing, or those in privity with him.

Id. at 349-50 (emphasis added). The *Bailey* Court, therefore, clearly indicated that it would accept a claim of self-concealing conspiracy as meeting the requirement of wrongful concealment.

The *Bailey* decision serves as the basis for the modern doctrine of fraudulent concealment in ***antitrust law***. [3] More recently, in *Dayco*, the Sixth Circuit stated that the reason for tolling the statute of limitations was the plaintiff's ignorance of its claim because of the defendant's conduct. The statute of limitations exists for the purposes of barring stale conflicts. *523 F.2d at 394*. While the statute allows the defendant to repose after the passage of time, this policy is subsidiary to the policy that the plaintiff should have some opportunity to litigate his claim.

[13]** It is in this context that the Court must consider Buddie's claim that a self-concealing conspiracy will substitute for affirmative conduct. The preceding analysis indicates that the doctrine of fraudulent concealment should be construed to give plaintiffs at least some opportunity to litigate claims which are not discovered because of the conduct of the defendants before the statute of limitations runs. While a conspiracy is self-concealing, the **[*429]** plaintiff lacks the opportunity to bring the claim. A self-concealing conspiracy, therefore, is the logical equivalent of affirmative acts which conceal a potential plaintiff's claim. Upon this analysis, the Court concludes that a self-concealing conspiracy will suffice to meet the requirement of wrongful concealment.

The propriety of this is demonstrated by consideration of the anomalous results which would result from a contrary ruling. If a contrary result obtained, the law would reward people who entered into successful conspiracies. In an unsuccessfully concealed conspiracy, the participants must engage in continuing conduct to keep their conspiratorial acts secret. This continuing conduct would constitute the wrongful **[**14]** concealment required by *Dayco* under any analysis. In a successfully concealed conspiracy, however, the conduct which takes place prior to the implementation of the conspiratorial plan is sufficient to keep the entire scheme secret; continuing conduct is not required. This Court can see no reason to distinguish between these two situations and finds they are equally prejudicial to plaintiffs' ability to discover and litigate their claims, the principal reason for the existence of a fraudulent concealment exception to the statute of limitations. [4]

[15]** The Court also rejects Peabody's contention that the legislative history of the antitrust statute of limitations requires a different result. Specifically, Congress rejected a formulation of the statute which would have provided that the statute began to run when the "plaintiff discovered" the facts relied upon for proof of its claim. The floor debates, however, indicate that Congress believed that the statute of limitations, as enacted, incorporated the rule enunciated in *Bailey*. The legislative history evidence, therefore, supports a conclusion that a self-concealing conspiracy will serve as a substitute for wrongful concealment. *See generally*, Note, 14 *Conn. L. Rev*. 116, 119-20 nn. 28-32.

---

[3] For excellent discussions of the developing law of fraudulent concealment and the relationship of the *Bailey* decision to that development, *see* Note, "The Application of the Doctrine of Fraudulent Concealment to Modern Federal Trade Conspiracy Cases," 14 *Conn. L. Rev*. 115 (1981); Note, "Intent to Conceal: Tolling the Antitrust Statute of Limitations under the Fraudulent Concealment Doctrine," 64 *Geo. L.J*. 791 (1976).

[4] The best argument raised in opposition to acceptance of a self concealing conspiracy exception to the requirement of showing affirmative conduct appears in *Hall*. In that case, the court stated that

> It is in the nature of a conspiracy that there be secrecy; mere non-disclosure or denial of the existence of a conspiracy does not constitute fraud or deceit for tolling purposes. If it did, the tolling exception to the statute of limitation would eclipse the basic statute itself.

312 F. Supp. at 362. This Court does not agree with the *Hall* Court's analysis. A self-concealing conspiracy exception will not significantly affect the availability of a fraudulent concealment exception to the statute of limitations. Plaintiffs who claim fraudulent concealment must still demonstrate that they remained ignorant of the existence of the conspiracy and that they exercised due diligence in attempting to discover the conspiracy. These additional requirements will prevent the exception from overwhelming the rule as the *Hall* court feared.

Further, the federal antitrust statute of limitations relates to a range of potential antitrust claims beyond *§ 1* conspiracies. In those situations, where the existence of a conspiracy is not an issue with regards to merits of the claim, a self-concealing conspiracy theory might not apply. In the situation of a *§ 1* claim, however, a successful self-concealing conspiracy leaves plaintiff ignorant of one element of its cause of action. In contrast, in a monopolization claim, for example, the existence of a successful self-concealing conspiracy does not necessarily mean that plaintiff is ignorant of all the facts giving rise to its cause of action.

Having concluded that the presence of a self-concealing conspiracy will serve as a substitute for wrongful concealment by the defendants, the Court must now turn to a consideration of the factual matters in this case. Buddie has raised a genuine issue of fact regarding the existence of the conspiracy based upon the record of the criminal prosecution of Plants, Seawright and Seminole. Further, Buddie has shown that the conspiracy was of the type that would be expected to conceal **[**16]** itself. The conspiracy remained secret through a prior state court judicial proceeding and for over two years thereafter, only coming to light after a journalistic investigation. Under these circumstances, the Court concludes that there are genuine issues of material fact surrounding Buddie's claim of wrongful concealment.

B. *Buddie's lack of knowledge*.

The Court next turns to consideration of the second element of fraudulent concealment **[*430]** - failure of the plaintiff to discover the operative facts that are the basis of its cause of action. The parties in this case are in substantial agreement regarding the development of Buddie's knowledge of the facts underlying its claim. The issue for this Court to decide, therefore, is whether these facts fulfill the requirement that Buddie lacked knowledge of his claim.

Peabody asserts, and Buddie does not dispute, that at the time of the award of the contract in June, 1975, Buddie knew that (1) Peabody was awarded the contract without having the lowest monetary bid; (2) Seminole had used Peabody's specifications to draft the project specifications; (3) Peabody refused to quote equipment prices to any competitor; and (4) Seminole **[**17]** recommended Peabody over Buddie to the City.

Buddie also had "suspicions" as to the cause of these events. Regardless, Buddie has raised a genuine issue of fact regarding its awareness of the relationship between the defendants until the press revelations disclosed their relationship in 1977. Recognizing that "conspiracy" is an element of plaintiff's cause of action, and that a genuine issue of material fact exists as to Buddie's knowledge of the conspiracy, the issue remains whether Buddie may fulfill the lack of knowledge requirement where it had suspicions, but no proof, that a conspiracy existed in 1975.

The parties differ on the legal standard application of the resolution of this question. Peabody argues that "any fact that should excite his suspicion is the same as knowledge of his entire claim." *Wood v. Carpenter, 101 U.S. (11 Otto) 135, 143, 25 L. Ed. 807 (1879)*. That view has been somewhat eroded, however, particularly in the antitrust context and Buddie cites two relatively recent cases in which circuit courts have held that plaintiffs with suspicions, but no proof, of antitrust conspiracies were not barred from establishing their lack of knowledge.

In *In re Beef **[**18]** Antitrust Litigation, 600 F.2d 1148 (5th Cir. 1979)*, the Fifth Circuit confronted the lack of knowledge requirement in the context of an antitrust claim. In that case, plaintiffs filed their action in 1975, relying on an allegation of fraudulent concealment to allow recovery of damages for the period preceding 1971. Defendants moved for summary judgment on the fraudulent concealment allegation arguing that plaintiffs had knowledge of their claim because of the filing of a similar lawsuit in 1968 by another plaintiff. In 1975, the plaintiffs in the other suit were awarded judgment. Nonetheless, the Fifth Circuit reversed the district court's grant of summary judgment to defendants on the availability of plaintiffs' fraudulent concealment claim despite finding that "the plaintiffs knew or should have known in 1968 and 1969 the allegations" of this complaint. The Court stated:

> The plaintiffs' knowledge of the [other] complaint, however, is not *as a matter of law* tantamount to actual or constructive knowledge of their claim. . . . The mere filing of a similar lawsuit, without more, does not necessarily give "good ground" because this suit might well be frivolous or baseless.

[19]** *Id. at 1171*. Under these circumstances, the Court concluded that the lack of knowledge issue should have been left for trial.

The Ninth Circuit reached a similar result in *Mt. Hood Stages, Inc. v. Greyhound Corp., 555 F.2d 687 (9th Cir. 1977)*. In that case, a jury awarded the plaintiff damages for injuries covering the period from 1953 to 1973. As the suit was filed in 1968, plaintiff relied upon fraudulent concealment to toll the statute of limitations and allow recovery for a large portion of this period. Greyhound argued that Mt. Hood had knowledge of its claim because

> Mt. Hood's president expressed concern over Greyhound's expansion by acquiring other carriers, and that he also stated his belief that the consent decrees were being violated.

Id. at 698. Greyhound argued that these expressions indicated sufficient knowledge of Mt. Hood's claim to require Mt. Hood to initiate its own investigation. The Ninth Circuit rejected this view, stating that

> **[*431]** in the face of Greyhound's assurances and denials of responsibility, we cannot say as a matter of law that Mt. Hood's awareness . . . amounted to notice of potential antitrust claims **[**20]** against Greyhound.

Id. at 698-99. Knowledge of some of the facts giving rise to the claim, therefore, did not constitute knowledge of the claim under this analysis.

These authorities stand for the proposition that, ***HN7***[] at least in antitrust cases, where a plaintiff remains ignorant of at least some of the facts required to make out its claim, the plaintiff does not have knowledge of its claim. In this case, Buddie lacked knowledge of the relationship between the defendants. That relationship is necessary to prove "conspiracy," an element of Buddie's antitrust claim. Without that knowledge, Buddie lacked knowledge of the antitrust claim, and therefore is not barred from establishing lack of knowledge.

C. *Buddie's due diligence in investigating its claim*.

The third element of fraudulent concealment which Buddie must establish is its due diligence in investigating the facts giving rise to its claim. *Dayco Corp. v. Goodyear Tire & Rubber Co., 523 F.2d 389, 394 (6th Cir. 1975)*. In this case, Buddie filed the Buddie I action in state court challenging the contract award. That suit did not include an antitrust claim and the discovery and trial of that suit did not disclose **[**21]** the defendants' relationship, the basis for the conspiracy claim in this suit. The narrow issue for decision here, therefore, is whether Buddie may make out its allegation of due diligence despite its failure to uncover the conspiracy during Buddie I.

Upon review, this Court concludes that a genuine issue of material fact exists as to Buddie's due diligence in investigating its claims. The fact that Buddie failed to uncover the defendants' relationship does not, standing alone, demonstrate Buddie's failure to diligently pursue its claim. Buddie I was tried on an expedited basis; less than one month elapsed between the filing of the complaint and the Court's ruling on the merit. Further, it should be noted that the existence of such a relationship was not a major issue in Buddie I action. Under these circumstances, this Court finds that it would be improper to impose a requirement that Buddie uncover the conspiracy in that state court action. [5]

[22]** D. *Conclusion*

Pursuant to this analysis, the Court finds that there are genuine issues of material fact regarding each element of the allegation of fraudulent concealment. Accordingly, the motion for summary judgment on this basis is denied.

IV. ANTITRUST STANDING

---

[5] The cases cited by Peabody, *Benoit v. Burlington Industries, Inc*., 1975 Trade Cases para. 60,160 (S.D. N.Y. 1975); and *Rutledge v. Boston Woven Hose and Rubber Co., 576 F.2d 248 (9th Cir. 1978)*, do not require the opposite result. While both cases involve the filing of a second antitrust lawsuit by a plaintiff arising out of a single transaction, both of these cases are distinguishable.

In *Benoit*, the Court found that all of the facts giving rise to the second lawsuit should have been discovered by plaintiff within the original period of limitations. There was no credible evidence, unlike this case, that plaintiff could have remained ignorant of its rights while exercising due diligence in pursuing its claims in the first case.

Rutledge involved a second antitrust suit involving almost identical parties. In *Rutledge*, where a conspiracy was in issue in both antitrust claims, the Court rejected plaintiff's claims of due diligence when he failed to discover any conspiracy in the first action. In this case, however, conspiracy was not an element of the claims presented in the first lawsuit.

Peabody's next argument in support of its motion for summary judgment is that plaintiff's claim fails to allege "antitrust injury" or "antitrust standing" under the antitrust laws. [6] **[**23]** The core of Peabody's **[*432]** contention is that while Buddie may have been damaged as a result of the transaction giving rise to this lawsuit, those injuries are not compensable under the antitrust laws. Analysis of Peabody's contention, therefore, requires consideration of the developing case law discussing antitrust standing. [7]

Section 4 of the Clayton Act, the provision authorizing private causes of action for antitrust violations, is also the statutory source for the developing doctrine of antitrust standing. In relevant part, that statute provides:

> ***HN8***[] Any person who shall **[**24]** be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefore in any district court of the United States. . . .

15 U.S.C. § 15. A review of this statute does not suggest any intent to limit the scope of the antitrust laws. Regardless, the Courts have developed the doctrine of antitrust standing as a limitation on the availability of the § 4 remedy. The Court must now determine whether Buddie's claim falls within one of those limitations.

The concept of antitrust standing has undergone a significant evolution within the past decade. The Sixth Circuit and the Supreme Court have each issued three major rulings on the concept of antitrust standing during the past decade. The developing case law is summarized in *Southaven Land Co. v. Malone & Hyde, Inc., 715 F.2d 1079 (6th Cir. 1983)*, and need not be repeated in this opinion.

Analysis of a plaintiff's ***HN9***[] antitrust standing consists of two related inquiries. The Court is required to determine whether the plaintiff has sustained injury-in-fact. If plaintiff satisfies this test, then the Court must analyze whether plaintiff's injury is of the type the antitrust laws were intended **[**25]** to prevent. The Court will separately analyze these two components of antitrust standing.

A. *Injury-in-Fact*.

The early Sixth Circuit decisions on antitrust standing, *Malamud v. Sinclair Oil Corp., 521 F.2d 1142 (6th Cir. 1975)* and *Chrysler Corp. v. Fedders Corp., 643 F.2d 1229 (6th Cir. 1981)*, clearly indicated that injury-in-fact was part of the inquiry. The most recent Supreme Court and Sixth Circuit decisions have not contained any analysis of injury-in-fact. *See* *Associated General Contractors of California, Inc. (AGCC) v. California State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*, *Blue Shield of Virginia v. McCready, 457 U.S. 465, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*, *Southaven Land Company v. Malone & Hyde, Inc., 715 F.2d 1079 (6th Cir. 1983)*. [8] The indication from these decisions, however, is that the courts still consider injury-in-fact as part of the inquiry. The Supreme Court's distinction of antitrust standing from constitutional standing, *see* *AGCC, 103 S. Ct. at 907 n.31*, clearly indicates that injury-in-fact must be presented to meet the constitutional standing requirement. Further, as a

---

[6] The terms antitrust injury and antitrust standing are used almost interchangeably in this area of the law. In essence, antitrust injury is the element which is added to traditional notions of standing to produce antitrust standing. For ease of reference, the Court will phrase its discussion of these terms as "antitrust standing."

[7] The term "antitrust standing" is distinct from traditional concepts of "standing." Recently, the Supreme Court discussed this distinction, stating:

> the label "antitrust standing" has traditionally been applied to some of the elements of this inquiry. As commentators have observed, the focus of the doctrine of "antitrust standing" is somewhat different from that of standing as a constitutional doctrine. Harm to the antitrust plaintiff is sufficient to satisfy the constitutional standing requirement of injury in fact, but the Court must make a further determination of whether the plaintiff is a proper party to bring a private antitrust action.

Associated General Contractors of California, Inc. v. California State Counsel of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 907 n.31, 74 L. Ed. 2d 723 (1983) (citation omitted).

[8] The failure of the *McCready, AGCC*, and *Southaven* courts to discuss injury-in-fact does not remove this inquiry from the analysis. Those courts focused their attention upon the conceptually more difficult issues relating to the second part of the test. Under these circumstances, their failure to specifically address injury-in-fact is not significant.

logical matter, **[**26]** the determination of whether there is injury-in-fact must precede **[*433]** the analysis of whether this injury is of the type which the antitrust laws were intended to prevent. The Court, therefore, believes that the analysis of Buddie's antitrust standing begins with inquiry into injury-in-fact.

Buddie's claim to injury-in-fact requires a finding that "but for" the allegedly unlawful conduct of the defendants, Buddie would have received the award of the construction contract for the treatment station. [9] Two obstacles loom in Buddie's path which must be surmounted before a finding of injury-in-fact can be made. First, the City's award of the contract **[**27]** to Peabody must be set aside. The possibility of setting that award aside, and the collateral estoppel effect of the Buddie I judgment upholding the award, are discussed later in this opinion in the context of collateral estoppel.

Even assuming that the award of the contract to Peabody may be vacated, the Court must then consider whether Buddie can prove that the City would have made the award to Buddie. Initially, Peabody argues that the City's retention of the option to reject all of the bids precludes the required finding that Buddie would have received the award. The facts in this case **[**28]** indicate that Buddie's bid was significantly lower than Peabody's and that Buddie envisioned a fairly similar completion date for the transfer station. With respect to this contention, therefore, the Court finds that Buddie has raised a genuine issue of material fact regarding whether the City would have exercised its option to reject the other bids if it could not award the contract to Peabody.

Alternatively, Peabody contends that the collateral estoppel effect of the Buddie I court's finding that Buddie's bid was defective precludes a finding that Buddie would have received the contract award. The Court will analyze this contention in the context of its discussion of collateral estoppel.

Under this analysis, if collateral estoppel does not preclude the fact finder from conducting a *de novo* review of the contract award, [10] the Court believes that Buddie has raised a genuine issue of fact regarding whether it would have received the award over Peabody's bid, and thus, has sustained injury-in-fact.

[29]** B. *Proper Type of Injury*.

The recent decisions in *AGCC* and *Southaven* have begun to focus the inquiry for courts analyzing whether a potential antitrust plaintiff's injuries are of the type the antitrust laws were intended to prevent. Previously, the courts had considered this issue in the context of the directness of the injury or whether the interests the plaintiff was attempting to protect were within the target area of the antitrust laws. The parties in this case briefed the antitrust injury issue in view of those authorities. [11] With the decision in *AGCC*, however, that analysis is no longer relevant. *See* *Crimpers Promotions, Inc. v. Home Box Office, Inc., 724 F.2d 290, 293 (2d Cir. 1983)*.

In *AGCC*, the Supreme Court considered whether a carpenters' union had standing to raise an antitrust claim against a contractors' **[**30]** association which allegedly engaged in a conspiracy to direct construction **[*434]** contracts to nonunion firms. In that case, the Court reinstated the district court dismissal of the complaint as failing to state a claim under the antitrust laws because of a lack of antitrust standing. The Supreme Court relied upon common law concepts of "proximate cause" to define the appropriate types of injuries, *103 S. Ct. at 907-08*, and

---

[9] Buddie's claim of injury-in-fact also requires a finding that Buddie would have profited from receiving the contract award. As such, calculation of Buddie's damages will require at least some conjecture. The issue of whether this calculation is too speculative to support an award of damages, however, has not been raised in this context in the summary judgment motion. The Court, therefore, reserves decision on this issue.

[10] Public contracting law generally limits a court's review of a contracting authority's award to an abuse of discretion standard. Those cases, however, arise in a different factual context than this antitrust claim. Neither party has briefed the issue of the appropriate standard of review in the context of this summary judgment motion. The Court, therefore, reserves decision on this issue.

[11] In fairness to the parties, the Court acknowledges that the summary judgment motions were briefed prior to the decisions in the *AGCC* and *Southaven* cases.

proceeded to "identify factors that circumscribe and guide the exercise of judgment in deciding whether the law affords a remedy in specific circumstances." *Id. at 908*.

As noted by the *Southaven* court, the Supreme Court identified ***HN10***[] five factors in the *AGCC* decision which guide the exercise of the Court's judgment in deciding whether plaintiff's claim is the type of matter for which the antitrust laws were intended. Specifically, the Court ruled that it should look to:

> (1) the causal connection between the antitrust violation and harm to the plaintiff and whether that harm was intended to be caused; (2) the nature of the plaintiff's alleged injury including the status of the plaintiff as consumer or competitor in the relevant market; (3) **[**31]** the directness or indirectness of the injury, and the related inquiry of whether the damages are speculative; (4) the potential for duplicative recovery or complex apportionment of damages; and (5) the existence of more direct victims of the alleged antitrust violation.

715 F.2d at 1085 (citations omitted). As noted by the Sixth Circuit, however, it is unclear whether this list of factors is exhaustive or merely illustrative. *Id. at 1086, n.9*. In any case, this Court will proceed to analyze Buddie's claim under the five factors identified in the *AGCC* and *Southaven* decisions.

1. *Causal Connection*.

The first factor identified by the *Southaven* and *AGCC* courts is the "causal connection between the antitrust violation and harm to the plaintiff and whether that harm was intended to be caused." *Southaven, 715 F.2d at 1085*. Buddie has raised a genuine issue of fact regarding whether the alleged antitrust violation in this case resulted in the award of the contract to Peabody, not Buddie. As such, there is a close causal connection between the alleged violation and the injury claimed by Buddie. Moreover, if the defendants engaged in a conspiracy to divert **[**32]** the award from Buddie to Peabody, it can be inferred that they intended to cause the harm which Buddie sustained when it did not receive the contract award.

2. *Plaintiff's Status*.

The next inquiry focuses upon Buddie's status in the relevant market. As the Supreme Court stated in *AGCC*,

> As the legislative history shows, the Sherman Act was enacted to assure *customers* the benefits of price competition, and our prior cases have emphasized the central interest in protecting the economic freedom of *participants* in the *relevant market*.

103 S. Ct. at 908-09, (emphasis added). Under this authority, ***HN11***[] a proper antitrust plaintiff should be a "consumer, customer, competitor or participant in the relevant market or otherwise inextricably intertwined with any such entity." *Southaven, 715 F.2d at 1087*. In this case, Buddie satisfies this element of the test because of its status as a competitor of Peabody's. [12]

[33]** 3. *Directness of the Injury*.

Although concepts of directness are difficult to apply, the *Southaven* court indicated that the presence of "highly speculative" damages is an indicator of indirectness. *715 F.2d at 1087*. In this case, calculation of Buddie's damages from the loss of the contract award is necessarily speculative. In essence, this calculation requires the factfinder to determine how much profit Buddie would have made on the construction project if it had received the award. **[*435]** As Buddie did not construct the plant, this inquiry necessarily requires estimates of the costs Buddie would have incurred. Under this analysis, the Court believes that Buddie's damages are somewhat indirect and speculative, although the claim is not as speculative as the damage theory rejected by the *Southaven* court. *Id. at 1087-1088*. [13]

---

[12] The relevant geographic and product markets are discussed later in this opinion. *See infra* at slip op. pp. 35-36.

[13] For a related discussion, *see* note 9 *supra*.

4. *Potential For Duplicative Recovery*.

The concern with potential duplicative recovery derives from the **[**34]** Supreme Court's decision in *Blue Shield of Virginia v. McCready, 457 U.S. 465, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*. In that case, the Court expressed concern regarding the "risk of duplicative recovery engendered by allowing every person along a chain of distribution to claim damages arising from a single transaction that violated the antitrust laws." *Id. at 474-75*. In this case, there are only two realistic potential plaintiffs - Buddie and the City. As Plants and Seminole were acting as agents for the City when they engaged in the alleged antitrust violation, it seems unlikely that the City has a claim under the antitrust laws. Under these circumstances, the Court finds that there is very little risk of duplicative recovery arising from allowing Buddie to proceed on this claim.

5. *Existence of More Direct Victims*.

In *Southaven*, the Sixth Circuit indicated ***HN12***[] the existence of more direct victims of an antitrust violation may justify denial of the antitrust standing to a plaintiff because the existence of more direct victims "is not likely to leave a significant antitrust violation undetected or unremedied." *Southaven, 715 F.2d at 1087*, quoting *AGCC, 103 **[**35]** S. Ct. at 911*. As noted in the preceding section, the City is a more direct victim of the alleged violation. The City, however, is probably incapable of pursuing an antitrust claim, thereby leaving Buddie as the most direct victim capable of pursuing an antitrust claim.

6. *Summary of AGCC/Southaven Factors*.

In sum, analysis of the causal connection and Buddie's status in the relevant market support a conclusion that Buddie's injuries are within the coverage of the antitrust laws. Analysis of the directness of the injury supports a contrary decision while analysis of the potential for duplicative recovery and the existence of more direct victims do not significantly support either conclusion. The Court must now consider whether this balance amongst the factors supports a finding of antitrust standing.

Neither the *AGCC* or *Southaven* decisions provide guidance to the Court on how the ultimate issue of antitrust standing is to be decided when all the factors do not support the same conclusion. In the *Southaven* case, however, the Sixth Circuit ruled that the causal connection alone was not enough to satisfy the antitrust standing requirement. In this case, Buddie has demonstrated **[**36]** the causal connection as well as the proper status within the market. Under these circumstances, the Court concludes that Buddie has sustained the type of injury which the antitrust laws were intended to prevent. [14]

C. *Conclusion on Antitrust Standing*.

Pursuant to this analysis, the Court concludes that **[**37]** Buddie has raised a genuine issue of material fact regarding injury-in-fact and the appropriateness of its claim for relief under the antitrust laws. Accordingly, **[*436]** the Court concludes that summary judgment on this basis is inappropriate.

V. APPLICABILITY OF THE ANTITRUST LAWS TO BUDDIE'S CLAIM.

Peabody next argues that Buddie's claim is not actionable under the antitrust laws. Peabody argues that the allegations of Buddie's claim, even if proven, would not constitute a violation of *§ 1* of the Sherman Act. Alternatively, Peabody argues that the conduct complained of in the complaint falls within the *Noerr-Pennington*

---

[14] The *Southaven* and *AGCC* courts also supported their denials of antitrust standing to plaintiffs because the plaintiffs' claims were "remedial under other laws." *Southaven, 715 F.2d at 1088*, *AGCC, 103 S. Ct. at 911*. In this case, Buddie has an arguable tort claim for intentional interference with business relationships. While Buddie could pursue this action in state court, it is not as clearly preferable to a federal antitrust claim as the matters discussed in *Southaven* or *AGCC*. Under this analysis, and considering the limited role given this factor by the *Southaven* and *AGCC* courts, the Court finds the existence of other remedies is not a significant factor in the analysis.

exemption from the antitrust laws. Upon review, the Court finds neither of these arguments well taken and denies the motion for summary judgment on this basis.

A. *Applicability of § 1 of the Sherman Act*.

Peabody argues that Buddie's complaint does not, as a matter of law, allege a violation of *§ 1* of the Sherman Act. Peabody characterizes Buddie's complaint as a claim that "sham bidding" constitutes a refusal to deal in violation of *§ 1* of the Sherman Act. Peabody claims, however, that the antitrust laws do not recognize such a cause of action.

[38]** Analysis of this argument begins with a review of the relevant statutory language. *Section 1* of the Sherman Act states that

> ***HN13***[] Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal.

15 U.S.C. § 1. In view of this statutory language, ***HN14***[] a claim under *§ 1* of the Sherman Act is comprised of three elements - (1) a contract, combination or conspiracy among two or more separate entities (2) that unreasonably restrains trade in a relevant market (3) and is in or affects interstate or foreign commerce. *See Davis-Watkins Co. v. Service Merchandise, 686 F.2d 1190, 1195-96 (6th Cir. 1982)*.

For purposes of this summary judgment motion, Peabody does not dispute the presence of a nexus with interstate commerce. Further, Peabody's sole claim with regard to the conspiracy element is that the prior state court proceeding precludes Buddie from establishing this element. Buddie has otherwise raised a genuine issue of fact regarding the conspiracy issue through its introduction of the various documents from the state criminal proceedings. Unless collateral **[**39]** estoppel precludes relitigation of this issue, therefore, the summary judgment is inappropriate on the presence of a conspiracy.

The remaining hotly-contested issue on this portion of the summary judgment motion is whether Buddie has raised a genuine issue of fact regarding the presence of an unreasonable restraint of trade in a relevant market. Peabody argues that the type of machinations with competitive bidding alleged by Buddie in this case do not constitute an unreasonable restraint of trade. Alternatively, Peabody argues that the determination of reasonableness cannot be made in this case because of Buddie's failure to define a proper relevant market.

The court's analysis of any restraint of trade under the antitrust laws may lead to any of three conclusions - the restraint is illegal under the per se rule, the restraining is illegal under the rule of reason, or the restraint does not violate the antitrust laws. In this case, the parties have cited legal authority in support of each of these three conclusions.

The Court's inquiry begins with a consideration of whether Buddie's claim states a cause of action under the rule of reason analysis. [15] Peabody argues that the manipulation **[**40]** of competitive bidding does not **[*437]** state a claim under *§ 1*. Alternatively, Peabody argues that Buddie cannot show an anti-competitive effect upon a relevant market because the challenged conduct effected the award of only a single contract.

Peabody cites three principal decisions in support of its argument that manipulation of competitive bidding does not constitute an unreasonable restraint of trade under rule of reason analysis. *See* **[**41]** *Sitkin Smelting & Refining Co. v. FMC Corp., 575 F.2d 440 (3rd Cir. 1978)*, *Security Fire Door Co. v. County of Los Angeles, 484 F.2d 1028 (9th Cir. 1973)*, *Parmelee Transportation Co. v. Keeshin, 292 F.2d 794 (7th Cir. 1961)*. A review of these cases

---

[15] Ordinarily, analysis of a restraint begins with a consideration of whether the challenged restraint is subject to analysis under the per se rule, a position advanced by Buddie citing *City of Atlanta v. Ashland Warren, Inc*., 1982-1 Trade Cases P 64,527 (N.D.Ga. 1981). Based on the current state of the pleadings, however, the Court believes that it need not consider the applicability of per se analysis at this stage of the litigation. The Court expressly reserves decision on the issue of whether the challenged restraint should be analyzed under the per se rule.

indicates that the *Security Fire Door* and *Sitkin Smelting* cases are distinguishable, while the *Parmelee* decision is neither controlling or persuasive.

In *Sitkin Smelting*, the Third Circuit upheld the district court's entry of judgment n.o.v. in favor of defendants on an antitrust claim arising from an arrangement whereby a private company (FMC) agreed to give another defendant (Krentzman) the opportunity to match the highest bid made by its competitors in the bidding process and to award the contract to Krentzman. The Court found *§ 1* inapplicable because of the principle that a trader is free to choose its customers independently. *575 F.2d at 447*. That case, however, is distinguishable because there is no evidence in the record that Krentzman tampered with the bidding process and because Krentzman agreed to match the highest bid of any other competitor. *Id. at 447*.

Likewise, the *Security Door* case is **[**42]** also distinguishable. In this case, the Ninth Circuit rejected a claim challenging a city's specification of a product made by only one manufacturer during a competitive bidding process. In that case, the court found that the choice of the specified product was made by the purchaser and that there was free and open competition amongst the prospective bidders in attempting to "get specified" by the city - the critical focus of competition. The court found no difficulty with a bidding process made uncompetitive by the specification where there was open competition for "getting specified." *484 F.2d at 1030-31*. As such, the case is distinguishable because there was no free and open competition at the critical decision making phase of the award of the transfer station contract.

The *Parmelee* decision, however, is not distinguishable from the claim presented by Buddie. In that case, the Seventh Circuit analyzed an antitrust claim alleging that the successful bidder for a competitively bid contract received the award because of the wrongful conduct of a public official. The Court concluded that plaintiffs were improperly attempting to stretch the Sherman Act "to wrongs not germaine to **[**43]** that act, even though such wrongs be actionable under state law." *292 F.2d at 804*. The reasoning behind this conclusion, however, is unclear.

A contrary conclusion was reached in the recent decision of *Richard Hoffman Corp. v. Integrated Building Systems, 581 F. Supp. 367*, 1984-1 Trade Cases P 65,936 (N.D. Ill. 1984). In that case, the district court denied a motion to dismiss where the successful bidder succeeded in imposing its choice of product upon the customer. Making allusions to the capacity of other bidders to present their products in a free market, the Court ruled that it was "unprepared to hold" that there was no claim under the antitrust laws. *Id*. at p. 68,048-49.

Upon review of these competing precedents, the Court finds the *Hoffman* decision more persuasive. ***HN15***[] Where a firm succeeds in tampering with the competitive bidding process in such a manner that competitive bidding becomes a farce, the Court believes that an unreasonable restraint of trade has occurred. Absent some economic analysis supporting a contrary conclusion, the Court will not preclude Buddie from proceeding on this theory.

Peabody has also argued that Buddie will be unable to show an effect **[**44]** upon competition in a relevant market because a relevant market cannot consist of only a single contract award. The principal decision supporting this theory is the Seventh **[*438]** Circuit's recent decision in *Havoco of America, Ltd. v. Shell Oil Co., 626 F.2d 549 (7th Cir. 1980)*. In that case, the Court ruled that the "loss by the plaintiff of a single contract with a single purchaser is simply not equivalent to a deleterious effect on the market." *Id. at 558*. Under a contrary rule, "the mere fact that one party bid successfully against another party for a contract would be equivalent to an anticompetitive effect and would raise the specter of an antitrust action being used as a remedy for any tortious conduct during the course of the competition." *Id*. Under the Seventh Circuit's view, such a ruling would "have more of a tendency to discourage than to protect competition." *Id. at 559*. Accordingly, the Seventh Circuit ruled that the plaintiff's claim failed to state a claim for relief under *§ 1* of the Sherman Act.

Although the *Havoco* decision has not been adopted by any other circuit court, Peabody urges this Court to apply the "single contract" rule to this **[**45]** case. In considering this argument, the Court is mindful of Peabody's repeated challenges to Buddie's claim on the basis that Buddie has failed to produce economic analysis supporting the theory behind its claim. Yet, the economic analysis supporting the *Havoco* Court's decision is unclear. Absent such an analysis, the Court will not preclude Buddie from proceeding on its claim under the "single contract" rule.

Accordingly, the motion for summary judgment on this basis is denied.

B. *Applicability of the Noerr-Pennington exemption*.

Peabody next argues that its conduct falls within the *Noerr-Pennington* exemption from the antitrust laws. ***HN16***[] Under this doctrine, concerted activities to influence the political processes are exempt from this coverage of the antitrust laws, even if they restrain competition. Because this Court concludes that the activities involved in this case are not the type of concerted political actions covered by the *Noerr-Pennington* doctrine, the Court finds the *Noerr-Pennington* doctrine inapplicable to this case.

The *Noerr-Pennington* doctrine derives from the Supreme Court decisions in *Eastern Railroad Presidents' Conference v. Noerr Motor **[**46]** Freight, Inc., 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1960)* and *United Mine Workers v. Pennington, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)*. In *Noerr*, the Supreme Court held that a railroad association's collective efforts to secure state legislation harmful to truckers were exempt from the Sherman Act, even though those efforts were deceptive and intended to reduce competition. The Court stated that it was

> clear that ***HN17***[] the Sherman Act does not prohibit two or more persons from associating together in an attempt to persuade the legislature or the executive to take particular action with respect to a law that would produce a restraint or a monopoly.

365 U.S. at 136. The Court distinguished agreements to seek legislation from agreements traditionally covered by *§ 1* stating that the agreements to seek legislation "bear very little if any resemblance to the combinations normally held violative of the Sherman Act." *Id*. Relying on concepts of representative democracy to support its decision, the Court stated:

> The whole concept of representation depends upon the ability of the people to make their wishes known to their representatives. **[**47]** To hold that the government retains the power to act in this representative capacity and yet, at the same time, that the people cannot freely inform the government of their wishes would impute to the Sherman Act a purpose to regulate, not business activity, but political activity, a purpose which would have no basis whatever in the legislative history of that Act.

Id. at 137. *Noerr*, therefore, is based upon concepts of political representation.

Subsequently, the court has reaffirmed and extended the doctrine of *Noerr*. In *United Mine Workers v. Pennington, 381 U.S. 657, **[*439]** 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)* the defendant Union and large coal mine operators had approached the Secretary of Labor and officials of the Tennessee Valley Authority to obtain support for their agreements setting a minimum wage for coal miners. That agreement allegedly had the effect of forcing small coal mine operators out of business. The Supreme Court reversed a judgment in favor of the small mine operators because of a jury instruction which allowed the jury to consider the defendants' intent in approaching the various government officials. The Court stated that: **[**48]**

> ***HN18***[] Joint efforts to influence public officials do not violate the antitrust laws even though intended to eliminate competition. Such conduct is not illegal, either standing alone or as a part of a broader scheme itself violative of the Sherman Act.

Id. at 670. That rationale was extended even further in *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 30 L. Ed. 2d 642, 92 S. Ct. 609 (1972)*, where the Court extended *Noerr-Pennington* to appearances before courts and administrative agencies.

Buddie does not challenge this line of cases. Rather, Buddie argues that *Noerr-Pennington* is inapplicable because the government action involved in this case constitutes an administrative or ministerial award of a contract, not the policymaking matters which are the basis for the exemption in *Noerr* and *Pennington*. This Court, therefore, must consider the various approaches taken by other courts in defining the parameters of the *Noerr-Pennington* exemption.

The First, Fifth, and D.C. Circuits have adopted a commercial activities exemption to the *Noerr-Pennington* exemption. The First Circuit's decision in *George R. Whitten, Jr., Inc. **[**49]** v. Paddock Pool Builders, Inc., 424 F.2d 25 (1st Cir. 1970)*, is illustrative of these cases. The *Noerr-Pennington* issue arose in the context of the defendants' attempt to induce governmental bodies to specify the defendants' products for competitively bid contracts. The Supreme Court rejected the *Noerr-Pennington* defense to the claim stating that

> *Noerr* stressed the importance of free access to public officials vested with significant policy-making discretion. We doubt whether the court, without expressing additional rationale, would have extended the *Noerr* umbrella to public officials engaged in purely commercial dealings. . . .

Id. at 33. The Court went on to define the boundaries of the *Noerr-Pennington* exemption by stating that the defendant

> is free to seek legislative change in this basic policy, but until such change is secured, Paddock's dealings with officials who administer the bid statute should be subject to the same limitations as its dealings with private consumers. Indeed, to hold otherwise might impair the effectiveness of competitive bidding.

*Id. See also Israel v. Baxter Laboratories, 151 U.S. App. D.C. **[**50]** 101, 466 F.2d 272 (D.C. Cir. 1972)*; *Woods Exploration & Products Co. v. Aluminum Company of America, 438 F.2d 1286 (5th Cir. 1971) cert. denied*, *404 U.S. 1047, 30 L. Ed. 2d 736, 92 S. Ct. 701 (1972)*. *But see Metro Cable Co. v. CATV of Rockford, Inc., 516 F.2d 220 (7th Cir. 1975)*; *Sun Valley Disposal Co. v. Silver State Disposal Co., 420 F.2d 341 (9th Cir. 1969)*.

In the absence of Sixth Circuit authority on the validity of a commercial activities exception to the *Noerr-Pennington* doctrine, this Court concludes that it will follow the approach developed by the First, Fifth and D.C. Circuits and apply commercial activities exception. *Noerr-Pennington* is concerned with the needs of a representative democracy in the field of public policy making. These needs are not at issue in this case, where the parties are concerned with the award of a competitively bid contract which only incidentally involves a governmental body. The basis for the exemption, therefore, does not apply to this case.

Accordingly, the motion to dismiss on this basis is denied.

[*440] VI. COLLATERAL ESTOPPEL

In its motion for summary judgment, Peabody has argued that a large number of **[**51]** factual issues are established for purposes of this litigation as a result of the collateral estoppel effect of the prior litigation. Pursuant to this Court's analysis of the antitrust standing and applicability of *§ 1* arguments, three of those issues are of particular importance. Buddie must be able to prove that (1) its bid was not defective; and (2) Peabody was not the lowest responsible bidder for the contract, and (3) the defendants in this action engaged in an antitrust conspiracy with respect to the contract award. Peabody contends that these factual matters are established by the prior state court litigation, while Buddie argues that collateral estoppel does not foreclosure relitigation of these issues as part of its antitrust claim.

Consideration of Peabody's claim of collateral estoppel begins with a review of the procedural posture in which collateral estoppel is being asserted. Both Peabody and Buddie were parties to the Buddie I action. As such, this case presents an issue regarding the application of collateral estoppel where there is mutuality of parties. Further, Peabody, the successful party in Buddie I, is using collateral estoppel in a defensive, not an offensive, **[**52]** posture. *See generally, Parklane Hosiery Co. v. Shore, 439 U.S. 322, 329, 58 L. Ed. 2d 552, 99 S. Ct. 645 (1979)*. Under these circumstances, Peabody argues that collateral estoppel precludes relitigation of a number of issues decided in Buddie I, while Buddie argues that this Court has discretion to determine the collateral estoppel effect to be given to the Buddie I decision.

Peabody urges a rigid application of collateral estoppel to preclude relitigation of any issues considered in Buddie I. In support of this position, Peabody advances the traditional rule that

> ***HN19***[] when an issue of fact or law is actually litigated and determined by valid and final judgment, and the determination is essential to the judgment, the determination is conclusive in a subsequent action between the parties, whether on the same or a different claim.

Restatement (Second) of Judgments § 27 (1982). Under this rule, the Court has no discretion in determining whether to apply collateral estoppel to preclude relitigation of the issue. Peabody cites *James Talcott, Inc. v. Allahabab Bank, Ltd., 444 F.2d 451 (5th Cir. 1971)* as an example of the application of this rule. In that case, the **[**53]** Fifth Circuit applied collateral estoppel to preclude relitigation of issues decided in a prior state court proceeding. In defense of its position, the Fifth Circuit stated that

> whenever a court considers applying the doctrine of collateral estoppel, there is always a lingering question whether the party might have succeeded in proving his point if he had only been given a second chance at producing evidence. Without more, however, this question is not sufficient to outweigh the extremely important policy underlying the doctrine of collateral estoppel - that litigation of issues at some point must come to an end.

Id. at 463. Under this analysis, ***HN20***[] where parties such as Buddie have previously litigated an issue in a state court proceeding, collateral estoppel always precludes relitigation of the issue in a subsequent federal court proceeding.

In contrast, Buddie argues that the use of collateral estoppel is discretionary with the trial court. In support of this position, Buddie cites the Sixth Circuit's recent decision in *Cleveland v. Cleveland Electric Illuminating Co. (CEI), 734 F.2d 1157 (6th Cir. 1984)*. In that case, the Court upheld the trial judge's exercise **[**54]** of discretion in refusing to grant collateral estoppel effect to a prior administrative agency determination against the defendant in a proceeding to which the plaintiff was not a party. That case involved the offensive use of collateral estoppel absent mutuality. Relying upon the Supreme Court's decision in *Parklane Hosiery Co. v. Shore, 439 U.S. 322, 329-30, 58 L. Ed. 2d 552, 99 S. Ct. 645 (1979)*, the Court found that the peculiar circumstances of an individual **[*441]** case may justify a court's refusal to allow an offensive use of collateral estoppel absent mutuality. The *Cleveland v. CEI* and *Parklane Hosiery* decisions, however, do not suggest that this discretionary application of collateral estoppel would carry over to situations where mutuality is present.

While these decisions are instructive on the various considerations which the Court must weigh in determining the appropriate rule of collateral estoppel, neither decision is controlling authority on the issue raised in this case. Under the full faith and credit statute,

> ***HN21***[] Judicial proceedings . . . shall have the same full faith and credit in every court within the United States . . . as they have by **[**55]** law or usage in the courts of such state . . . from which they are taken.

28 U.S.C. § 1738. ***HN22***[] This authority requires a federal court to give a prior state court judgment the same preclusive effect that it would have had in that state. Determination of the preclusive effect of the Buddie I judgment, therefore, turns on issues of Ohio state law. *See* *Kremer v. Chemical Construction Corp., 456 U.S. 461, 466, 72 L. Ed. 2d 262, 102 S. Ct. 1883 (1982)*; *see generally* *Restatement (Second) of Judgments, § 86* (1982). The Court, therefore, must examine Ohio decisions to determine the appropriate rule of collateral estoppel in this case.

The seminal case on collateral estoppel in Ohio is *Norwood v. McDonald, 142 Ohio St. 299, 52 N.E.2d 67 (1943)*. In that case, the Ohio Supreme Court adopted Restatement (First) approach to issues of *res judicata*. ***HN23***[] With respect to the rule of collateral estoppel, the Court held

> a point or a fact which is actually and directly in issue in a former action and was there passed upon and determined by a court of competent jurisdiction may not be drawn in question in any future action between the same parties or their privies, whether **[**56]** the cause of action in the two actions be identical or different.

142 Ohio St. 299, 300 Syl. 3, 27 Ohio Op. 240, 52 N.E.2d 67 (1943). Under this ruling, the Court lacks discretion to determine whether to apply collateral estoppel in this case. The *Norwood* decision has never been overruled by the Ohio Supreme Court.

Some question remains, however, whether the Ohio Supreme Court would follow the *Norwood* decision today because of the recent development of the Restatement (Second) of Judgments. The Restatement (Second) begins by setting out the traditional rule of collateral estoppel embraced by the *Norwood* court. Restatement (Second) of Judgments § 27 (1982). The restatement then goes on to provide for "exceptions to the general rule of issue preclusion." *Id*. at § 28. [16] Under this **[*442]** rule, the Court retains discretion to determine whether or not to grant collateral estoppel effect to the prior judgment. *See also,* Montana v. United States, 440 U.S. 147, 155, 59 L. Ed. 2d 210, 99 S. Ct. 970 (1979).

[57]** The issue that emerges is whether the Ohio Supreme Court would follow the *Norwood* or the Restatement (Second) approach in determining if a trial court is granted discretion with respect to the application of preclusion. The Ohio Supreme Court's recent decision in Goodson v. McDonough Power Equipment, Inc., 2 Ohio St. 3d 193, 443 N.E.2d 978 (1983) merits consideration. In that case, the Ohio Supreme Court ruled that Ohio would not allow offensive use of collateral estoppel absent mutuality in products liability actions. Significantly, the Ohio Supreme Court relied heavily upon the Restatement (Second) in reaching its decision. Although the Court did not consider the exceptions to the general rule of issue preclusion found in § 28 of the Restatement (Second), the Court followed the remainder of the restatement's discussion of issue preclusion. Based upon this authority, this Court concludes that the Ohio Supreme Court would apply the exceptions to the general rule of issue preclusion found in the Restatement (Second).

Having concluded that the Court will exercise discretion in determining the collateral estoppel effect of facts decided in the prior state court litigation, **[**58]** the Court must now determine whether it will exercise that discretion to allow relitigation of the facts raised by Peabody. As noted before, the merit of Peabody's legal defenses depends upon resolution of three factual matters - (1) the existence of a conspiracy amongst the defendants; and (2) the adequacy of Buddie's bid; and (3) Peabody's status as the lowest responsible bidder. If Buddie cannot prevail on these matters, the legal analysis of Buddie's § 1 claim and antitrust standing require entry of judgment in favor of Peabody.

---

[16] In relevant part, the exceptions provide:

> Although an issue is actually litigated and determined by a valid and final judgment, and the determination is essential to the judgment, relitigation of the issue in a subsequent action between the parties is not precluded in the following circumstances:
>
> (1) The party against whom preclusion is sought could not, as a matter of law, have obtained review of the judgment in the initial action; or
>
> (2) The issue is one of law and (a) the two actions involve claims that are substantially unrelated, or (b) a new determination is warranted in order to take account of an intervening change in the applicable legal context or otherwise to avoid inequitable administration of the laws; or
>
> (3) A new determination of the issue is warranted by differences in the quality or extensiveness of the procedures followed in the two courts or by factors relating to the allocation of jurisdiction between them; or
>
> (4) The party against whom preclusion is sought had a significantly heavier burden of persuasion with respect to the issue in the initial action than in the subsequent action; the burden has shifted to his adversary; or the adversary has a significantly heavier burden than he had in the first action; or
>
> (5) There is a clear and convincing need for a new determination of the issue (a) because of the potential adverse impact of the determination on the public interest or the interests of persons not themselves parties in the initial action, (b) because it was not sufficiently foreseeable at the time of the initial action that the issue would arise in the context of a subsequent action, or (c) because the party sought to be precluded, as a result of the conduct of his adversary or other special circumstances, did not have an adequate opportunity or incentive to obtain a full and fair adjudication in the initial action.

Id.

A. *Conspiracy Amongst The Defendants*.

In order to make out a claim under *§ 1* of the Sherman Act, Buddie must prove that there was an agreement between the defendants to divert the contract award to Peabody. Peabody claims that the Buddie I decision resolved this issue against Buddie and that the decision collaterally estops Buddie from relitigating the issue in this Court. Although the judgment entry from the Common Pleas Court does not contain any reference to collusion, the opinion of the Court makes some relevant findings. [17] In relevant part, the opinion states:

> Nor has there been any evidence of impropriety or conduct on the part **[**59]** of any public official or any bidder in the conduct of these negotiations. Nor was there any collusion among bidders presented by the testimony of either the Plaintiffs or Defendants. If anything, there was a strong showing of independence on the part of bidders. . . .

Opinion of the Court at 5. These findings became part of the final judgment when the Court of Appeals affirmed the decision of the Buddie I court and the time for appeal to the Ohio Supreme Court passed.

Subsequently, the relationship between Peabody, Seawright, Plants and Seminole was discovered. On December 21, 1978, Seawright was indicted by the Cuyahoga County Grand Jury on one count of grand theft, one count of having an unlawful interest in a public contract and two counts of complicity. On that same date, Seminole and Plants were indicted **[**60]** for grand theft and having an unlawful interest in a public contract. [18] Three days prior to the return **[*443]** of the indictments, the Common Pleas Court granted immunity to Frank John Gerdnic, Peabody's vice president of marketing, in exchange for his testimony regarding these transactions.

Ultimately, Seawright pled guilty to one count of attempt and complicity under *Ohio Rev. Code 2923.02-03*. Seminole pled guilty to one count of having an unlawful interest in a public contract under *Ohio Rev. Code 2921.42* and Plants pled guilty to attempt to have an unlawful interest in a public contract under *Ohio Rev. Code 2921.42* and *2923.02*. The remaining counts of the indictments were dismissed as part of the plea bargain.

The issue confronting the Court is whether the Buddie I court's findings regarding collusion **[**61]** preclude Buddie from presenting evidence on the conspiracy issue to this Court. Two of the exceptions to the general rule of issue preclusion stated in § 28 of the Restatement (Second) apply to this case.

HN24[] Exception 3 allows relitigation of an issue where there are procedural differences between the two courts. In relevant part, that provision allows relitigation where:

> A new determination of the issue is warranted by differences in the quality or expensiveness of the procedures followed in the two courts. . . .

In Buddie I, the trial judge, apparently upon his own motion, ordered the trial on the merits to be consolidated with the hearing on preliminary injunction. Plaintiffs received only 17 days between the filing of their action and the original hearing in which to prepare their case. Discovery was truncated, unlike the procedure which would be followed in this federal court action. Under these circumstances, the differences in the extensiveness or quality of the procedures followed between this Court and the Common Pleas Courts warrants a new determination on this issue.

Alternatively, ***HN25***[] exception 5, supports allowing a new determination where the party sought **[**62]** to be precluded did not have an adequate opportunity or incentive to obtain a full and fair adjudication in the initial action. In relevant part, the exception provides

> There is a clear and convincing need for a new determination of the issue . . . (c) because the party sought to be precluded, as a result of the conduct of his adversary or other special circumstances, did not have an adequate opportunity or incentive to obtain a full and fair adjudication in the initial action.

[17] The trial judge incorporated the opinion of the Court into the judgment entry by stating that "the Court's further findings of fact are set forth in its written opinion filed in these proceedings."

[18] While the indictments do not specifically refer to the contract for the solid waste treatment plant, the documents attached to the file clearly indicate that the indictments arise out of this transaction.

In this case, the Court has already found defects in the fullness of the procedures available in the initial action. Further, the Court notes that the existence of collusion was but one of a number of issues raised in Buddie I. A review of the trial judge's opinion indicates that collusion was a matter of only tangential concern to the parties in the initial action. [19] **[**63]** In view of the limited time available for preparation of the initial action and the limited importance of the collusion issue in the Buddie I action, the Court finds that the requirements for exception 5 are also met. [20]

[*444] B. *Adequacy of Buddie's Bid and Propriety of Award to Peabody*.

Regardless of the Court's ruling on the collusion issue, Peabody argues that Buddie is precluded from relitigating the issue of the adequacy of its bid. In relevant part, the Buddie I court found that Buddie

> submitted a bid which was found defective in sixteen specific ways varying from highly critical **[**64]** items to relatively minor engineering issues. There were inconsistencies in the bid of Buddie which justifiably warranted the consultant company in suggesting rejection of Buddie, despite its submission of the lowest bid.

Opinion of the Court at 4. Notwithstanding the ambiguity of the Buddie I Court's findings, Peabody argues that this finding precludes Buddie from proving that it would have received the bid under any circumstances. In contrast, Buddie argues that this fact finding is tainted by the trial court's ignorance of Plants' dubious role in this action and, therefore, need not be followed. [21]

The trial judge **[**65]** also made findings on the propriety of the City's award of the contract to Peabody. In the judgment entry, the trial court found that there was

> No evidence of error, fraud or abuse of discretion was presented and that it would not be a proper exercise of the court's function to substitute its judgment for the carefully determined discretion of the Board of Control of the City of Cleveland on a matter of great public importance.

In the opinion of the Court, the trial judge went on to explain the limited role of a court in reviewing an award of a public contract and explaining his basis for accepting the propriety of that award. Opinion of the Court at 5-6. Based on these findings, Peabody argues that Buddie is foreclosed from proving that Peabody would not have received the contract award.

Both of these fact findings were made in the context of the limited role granted a court under Ohio law in reviewing the awarding of contracts by a municipality. Under Ohio law, contracting authorities are granted a great deal of discretion in their awards of public contracts. *See* *State ex rel Cleveland Trinidad Paving Co. v. Board of Public Service, 81 Ohio St. 218, 90 N.E.* ***[**66]*** *389 (1909)*; *State ex rel Walton v. Hermann, 63 Ohio St. 440, 59 N.E. 104 (1900)*. Judicial review is limited and the courts are not authorized to interfere with the exercise of the discretion of the public authorities in awarding public contracts except in cases of fraud or abuse of discretion. *Altschul v.*

---

[19] The Court notes that the presence of an antitrust conspiracy was not, and in fact could not have been, an issue in the state court action. Buddie is attempting to prove an antitrust conspiracy without demonstrating "collusion among bidders." Likewise, the conspiracy alleged in this case was not presented to the state court because Seawright, Plants, and Seminole were not parties to the state court litigation. Finally, the Court concludes that a finding of an absence of collusion among bidders under the public contract laws does not necessarily forecloses a finding of conspiracy under the antitrust laws.

[20] Another basis for denying collateral estoppel effect to the Buddie I court's determination on the collateral estoppel issue is its apparent conflict with the guilty pleas in the common pleas court action. Under the Restatement (Second),

> When in two actions inconsistent final judgments are rendered, it is the later, not the earlier, judgment that is accorded conclusive effect in the third action under the rules of *res judicata*.

Id. at *§ 15*. Assuming that the guilty pleas by Seawright and Plants conflict with the finding of no collusion made by the Buddie I court, this rule applies to preclude granting any collateral estoppel effect to the Buddie I court's findings on collusion.

[21] Under any concept of collateral estoppel, Buddie is not precluded from relitigating an issue unless the "determination was essential to the judgment." Ohio law limits judicial review of a contract award to an abuse of discretion standard. The finding that Buddie's bid was defective, therefore, was not an essential finding to support the Buddie I court's affirmance of the City's award.

Springfield, 48 Ohio App. 356, 193 N.E. 788 (1933). Under these authorities, the trial court imposed a heavy burden of persuasion upon Buddie in evaluating Buddie's challenge to the award.

HN26[] Exception 4 to the general rule of issue preclusion recognizes differences in the burden of persuasion with respect to an issue as a basis for allowing relitigation of that issue. In relevant part, the exception allows relitigation where a

> party against whom preclusion is sought had a significantly heavier burden of persuasion with respect to the issue in the subsequent action. . . .

Restatement (Second) at § 28(4). In this antitrust action, Buddie might not have to shoulder the heavy burden of persuasion usually applied to a challenge to a state law challenge of an award of a public contract. [22] Under this analysis, the Court concludes **[*445]** that the exception **[**67]** applies to this case, and Buddie will not be estopped from challenging either of these trial court findings.

C. *Conclusion*

Under this analysis, the Court concludes that collateral estoppel will not preclude Buddie from challenging whether Buddie should have received the contract award or whether there was a conspiracy in this case. Accordingly, the motion for summary judgment based on collateral estoppel is denied.

In reaching this conclusion, the Court is mindful that this decision represents a deviation from established concepts of collateral estoppel. This decision should not be interpreted as opening the floodgates to relitigation of the vast majority of factual issues. The peculiar facts presented by this case make **[**68]** this case an unusually good candidate for use of the exceptions to the general rule of issue preclusion. It is important to interpret the exceptions to the general rule of issue preclusion so as not to overwhelm the general rule. Thus, while concluding that the general rule does not apply to this case, the Court emphasizes the narrowness of this holding.

VII. CONCLUSION

Pursuant to the foregoing analysis, and subject to the limitations noted in the opinion, the motion for summary judgment is denied.

[22] As noted before, the Court has reserved decision on the standard it will use in reviewing the City's decision to award the contract to Peabody. *See* note 10, *supra*. Under these circumstances, the Court believes that summary judgment on this issue is inappropriate at this time.

Grado v. Gross

HN1[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

A plaintiff does not fail to state a cause of action under the Racketeer Influenced and Corrupt Organizations Act (RICO) because the defendants have not been convicted of predicate acts or RICO violations. A RICO plaintiff must of course meet the statute's technical pleading requirements. A RICO plaintiff must show, first, that the defendants have committed racketeering acts; and that those acts form a pattern within the meaning of the statute. The plaintiff is then required to show that he suffered injury because the defendant either (a) used income derived from that pattern of racketeering to acquire an interest in an enterprise engaged in interstate commerce; (b) acquired or maintained control of such an enterprise through a pattern of racketeering; or (c) that the defendant through a pattern of racketeering activity conducted or participated in the conduct of the affairs of an interstate enterprise with which he was associated or by whom he was employed. He need do no more.

MEMORANDUM AND ORDER

Mazzone, D.J.

This is a shareholder's derivative action. The plaintiff, John Grado, sues on behalf of himself and Technographics, Inc., seeking relief under *Rule 10b-5* of the Securities and Exchange Commission, *17 C.F.R. § 240.10b-5*, and under the treble damages provisions of the Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C. §§ 1961-1968* (RICO). The plaintiff also claims damages under a number of state law causes of action. The matter is before me on the defendants' motion to dismiss for failure to state a claim upon which relief can be granted.

The plaintiff's complaint is a lengthy, 43-page recitation of wide-ranging and complex allegations. Stripped to the essentials, the facts alleged -- which, for the purpose of this motion, I take as true -- are as follows. Before June 29, 1983, Grado was a vice president of Litton Industries, Inc., in charge of Litton's Specialty **[*2]** Paper, Printing and Forms Group (PP&F). In 1982, Grado proposed to Litton that Litton sell PP&F to a corporation he would establish, Technographics, Inc. Litton ultimately agreed to sell PP&F to Grado at its approximate book value. Grado was to continue equity financing of about $3,500,000 to $4,000,000; the balance of the acquisition price was to be financed by borrowing. Some of the debt financing was to come from Litton itself.

In the fall of 1983, the plaintiff sought assistance in locating several million dollars of equity funding to be used in the acquisition of PP&F. He turned to the defendant Realex Capital Corporation and its principals,, the individual defendants Henry Gross, Mahir Reiss, and David Gardner, to accomplish this purpose. In early November, 1982, Grado and Realex agreed to work together to buy PP&F. Specifically, the defendants agreed to find foreign equity funding for the acquisition; Grado agreed to work to secure debt financing. The plaintiff contends that, as a matter of law, a joint venture was thus created between Grado and Realex as promoters of Technographics.

At about the same time, Grado also discussed with the defendants the **[*3]** possibility of arranging a sale of one of PP&F's unprofitable operations, Papaterie de Versoix, located in Versoix, Switzerland (Versoix). It is the defendants' allegedly deceptive acts relating to Versoix that lie at the heart of this lawsuit. The plaintiff contends that he asked Realex to explore the possibilities of selling Versoix. The defendants Gross and Reiss went to Versoix, and they eventually learned that Versoix" assets had a market value far in excess of the book value that Litton had placed on them. Hence they became aware that the chance to purchase the Versoix operation at book value, when in fact it was worth more, was a valuable corporate opportunity for Technographics. But the defendnats did not tell Grado about Versoix" true value. Instead, according to the complaint, they engineered a scheme to deprive Technographics of this corporate opportunity and simultaneously acquire for themselves a controlling interest in Technographics. First, they told Grado that Realex had found foreign investors to put up equity financing for Technographics' acquisition of PP&F, in exchange for Technographics stock. They later told Grado that they had also located foreign **[*4]** investors interested in purchasing Versoix. When Grado expressed doubts about the wisdom of Technographics' selling Versoix, the defendants told Grado that the foreign investors who had agreed to purchase Versoix believed that Technographics was obligated to sell Versoix to them. Furthermore, the defendants told Grado that the investors who intended to acquire Versoix were the same investors who intended to invest in Technographics' acquisition of PP&F and that these investors would not provide equity funding for the acquisition of PP&F unless they could buy Versoix. Because Grado was under a deadline from Litton to complete the acquisition, and because he relied on the defendants as joint venturers, he agreed to sell Versoix to these foreign investors, essentially at book value.In fact, the complaint charges, no such foreign investors existed; the defendants intended to acquire both Versoix and a majority interest in Technographics for themselves.

By early 1983 the basic structure of the transactions was set: Realex and its principals told Grado that foreign investors whose identity could not be revealed had agreed to invest $3,500,000 in Technographics. These foreign investors **[*5]** would receive in exchange 57.3% of the stock of Technographics. Grado would become President and Chairman of the Board of Technographics, and would own or control most of the rest of the shares. Versoix" real estate assets were to be sold to an entity to be called P.V. Papeterie de Versoix (PV). Grado understood PV to be an entity controlled by the foreign investors. In fact, the defendants owned 80% of PV's stock.Versoix's non-real estate assets were to be sold to New Versoir, a Cayman islands corporation that Grado believed was controlled by the foreign investors. New Versoir was in fact controlled by the defendants.

A complicated set of agreements governed the transaction. On July 25, 1983, New Versoir and Technographics signed a Purchaser and Sale Agreement covering Versoix" non-real estate assets. This July 25 agreement called for New Versoir to pay $4,028.000 to Technographics for these assets. On the next day, July 26, 1983, New Versoir and PV -- the two corporations which Grado thought were controlled by the foreign investors but which were actually controlled by the defendants -- entered into a purchase and sale agreement, unbeknownst to the plaintiff. **[*6]** Under the July 26 PV/New Versoir agreement, PV agreed to purchase Versoix" non-real estate assets from New Versoir for $8,528,000.PV was to finance this payment by loans secured by Versoix" real estate, which it was to acquire directly from Litton.Under the July 26 PV/New Versoir agreement, New Versoir was to remit the $8,528,000 purchase price to Technographics. But, by the terms of the July 25 New Versoir/Technographics contract, New Versoir was obligated to pay only $4,028,000 to Technographics. On July 29, 1983, Technographics acquired PP&F. Technographics purchased all PP&F's assets except Versoix" real estate assets. These Litton sold at book value to PV, despite the fact that they were worth some $7,000,000 more than book value. Technographics transferred the non-real estate assets of Versoix to New Versoir for $4,028,000.New Versoir transferred these same assets to PV, receiving from PV a purchase price of $8,528,000. As a result of this series of sales, the plaintiff charges, New Versoir had diverted $4,500,000 from Technographics. That $4,500,000 represented part of the actual value of Versoixsoir, invested $3,593,000 of the diverted $4,500,000 in Technographics, **[*7]** purportedly on behalf of foreign investors but actually on their own account. They received 57.3% of Technographics' stock as a result. The plaintiff has alleged that the defendants engaged in other fraudulent conduct as well; however, the allegations set out above are the core of the plaintiff's case.

The defendants argue that the plaintiff's complaint should be dismissed for four reasons. First, they assert that the plaintiff's claim that the defendants violated the RICO statute fails because neither Grado nor Technographics has standing to bring it. Second, the defendants say that the plaintiff's securities fraud claims must be dismissed because the complaint reveals that the plaintiff's loss, if any, was not caused by the sale of Technographics' stock to the plaintiff and, in addition, shows no fraud "in connection with" the sale of securities. Third, the defendants argue that the plaintiff's claims are not specific enough to meet the special pleading requirements of *Fed.R.Civ.P. 9(b)*. Finally, the defendants assert that the plaintiff's M.G.L. c. 93A claim must be dismissed because the kind of conduct alleged here does not fall within the reach of that statute. I consider **[*8]** each of these arguments in turn.

1. RICO.

The plaintiff alleges in paragraphs 102-114 of the complaint that the defendants' conduct violated the RICO statute, *18 U.S.C. § 1962(a)-(d)*. In particular, the plaintiff alleges that the defendants received income derived from a pattern of racketeering activity and used it to acquire an interest in Technographics and in PV, in violation of *18 U.S.C. § 1962(a)*; that the defendants acquired and maintained control of the joint venture, of Technographics, of New Versoir, and of PV through a pattern of racketeering activity, in violation of *§ 1962(b)*; that the defendants are associated with a number of enterprises, including Realex, the joint venture, Technographics, New Versoir, and PV, and have conducted or participated in the conduct of these enterprises through a pattern of racketeering activity, in violation of *§ 1962(c)*; and that the defendants violated *§ 1962(d)* by conspiring to violate *§ 1962(a)-(c)*.

The defendants contend that the plaintiff's RICO claims must be dismissed because the plaintiff has not suffered injury of the kind required to state a claim under RICO's civil remedy provision, *18 U.S.C. § 1964(c)*. **[*9]** The defendants argue that the plaintiff lacks standing to bring a RICO action because the injuries suffered, if any, are not the result of a violation of *§ 1962*, but are rather the direct result of the defendants' predicate acts of mail fraud and securities fraud. In essence, the defendants urge the adoption of a special standing requirement, usually referred to as the "racketeering enterprise injury" requirement, that has been recognized in a number of cases. See, e.g., *Moss v. Morgan, Stanley, Inc., 553 F.Supp. 1347, 1359* (S.D.N.Y.), aff'd on other grounds, *719 F.2d 5 (2d Cir. 1983)*. In an opinion issued on June 14, 1984, I concluded that no such special standing requirement should be adopted. Econo-Car International, Inc. v. Agency Rent-A-Car, Inc., (C.A. 83-2597-MA). I need not repeat at length here the reasons for that decision. I note only that I thought then, and think now, that the question is a close one. It is true, of course, that the language of the statute itself does not suggest that a special racketeering enterprise injury requirement should be imposed.But the courts that have nonetheless adopted such a requirement have done so in response to an important **[*10]** group of policy concerns. Claims that are essentially fraud-based have traditionally been the province of state courts. In an era in which the Supreme Court has been particularly sensitive to the deference properly owed state tribunals, see, e.g., *Younger v. Harris, 401 U.S. 37 (1971)*, it is not surprising that courts have resisted lawyers' attempts to clothe what would have passed ten years ago as ordinary common-law fraud claims in the flashy (and, given the statute's treble-damage provision, expensive) fashion of RICO actions.

Then there is the matter of the legislative history.A fair reading of its suggests that few, if any, members of the Congress that adopted RICO had a clear intent to invite into federal court a wide range of civil matters that would have previously been handled by state court judges. The primary focus of the Congressional debate on RICO was on its criminal provisions. There was debate on the Act's creation of a private civil remedy, and the legislative history shows that some members of Congress sought to point out the dangers attendant upon the grant of a private civil action. See generally Blakey, The RICO Civil Fraud Action in Context: Reflections **[*11]** on Bennet v. Berg, 58 Notre Dame Law. 237 (1982).But I must agree with those courts that have concluded that the legislative history contains no clear signal that Congress wanted cases like this one in federal court.

Thus, a court considering whether a racketeering enterprise injury requirement should be adopted is faced with a classic problem of statutory interpretation: should it give full effect to the words of the RICO statute, or should it limit the statute's reach because the language Congress used sweeps broader than necessary to remedy the evils Congress intended to eradicate? I have decided to follow the approach that gives greater weight to the Act's language. Two sets of concerns prompt me to take this route. First, the Supreme Court -- despite its record of demonstrated sensitivity to the relationship between state and federal courts -- has ruled that RICO represents a significant federal instrusion into areas previously the sole domain of the states. *United States v. Turkette, 452 U.S. 576, 586-87 (1981)*. Moreover, the Supreme Court has done so by looking closely at the words of the statute, and treating as secondary arguments grounded in readings of the **[*12]** legislative history tht seeks to find expression of Congress' "true" intent. Id.; see also *Russello v. United States, U.S. , 104 S.Ct. 296, 299 (1983)*.

Second, the view that a statute's express words prevail unless the legislative history explicitly contradicts them is solidly rooted in our Constitutional structure. The structure calls for Congress to declare its intentions in statutes. That is how our law is made. And, just as there is danger in ascribing meaning to Congress' failure to take some action, see generally L.Tribe, Toward a Syntax of the Unsaid: Construing the Sounds of Congressional and Constitutional Silence, 57 Ind.L.Rev. 515 (1982), so too is there risk in treating legislative history as dispositive when the express language of a statute is capable of providing an answer to a legal question. Under our Constitution ". . . it seems axiomatic that the words of a statute -- and not the legislators' intent as such -- must be the crucial elements both in the statute's legal force and in its proper interpretation." Id. at 517. As Justice Jackson has written, courts should proceed "by analysis of the statute instead of by psychoanalysis of Congress." **[*13]** *United States v. Public Utilities Commission, 345 U.S. 295, 319 (1953)* (Jackson, J., concurring). Congress voted on, and the President signed, a particular set of words when it enacted RICO. Congress did not vote on the legislative history, and the President did not endorse all that is in the legislative history. Thus, it is the language of the statute, and not the legislative history, that sets out the legal commands that govern our conduct.This language must control: "a committee report or a statement on the floor cannot amend an enacted statute, implicitly or explicitly. . . ." Posner, "Statutory Interpretation -- In the Classroom and in the Courtroom," *50 U.Chi.L.Rev. 800, 810 (1983)*.

As applied to this case, the principles outlined above counsel against the adoption of a racketeering enterprise injury requirement. As Judge Posner noted in *Sutliff, Inc. v. Donovan Companies, Inc., 727 F.2d 648, 654 (7th Cir. 1984)*:

Congress deliberately cast the net of liability wide, being more concerned to avoid opening loopholes through which the minions of organized crime might crawl to freedom than to avoid making garden -- variety frauds actionable in federal treble damage proceedings **[*14]** -- the price of eliminating all possible loopholes. We must abide by Congress' decision, made at a time of less sensitivity than today to the workload pressures on the federal courts and to the desirability of maintaining a recognizable balance between state and federal courts, however much we may regret not only the burdens that the decision has cast on the federal courts but also the displacement of state tort law into the federal courts that it has brought about. (citations omitted).

In connection with the defendants' claim that the plaintiff states no RICO cause of action, one further issue requires comment.

On July 31, 1984, the defendants filed copies of three recent opinions from the Court of Appeals for the Second Circuit. In these cases, the Second Circuit adopted a racketeering enterprise injury requirement, and also held that a plaintiff cannot bring a civil RICO action unless the defendant has been convicted of the underlying predicate offenses, or been convicted of violating RICO itself. See, e.g., Sedima, S.P.R.L. v. Imerex Company, No. 83-7965, slip op. (2d Cir. July 25, 1984).

In their motion to dismiss, the defendants did not argue that the **[*15]** plaintiff's case failed because the defendants had not been convicted of any RICO predicate acts or of a violation of RICO itself. But they press this issue now. Although I do not wish to compete with the extensive analysis of the statute undertaken by the Second Circuit (the opinions in the Sedima case alone run some 86 pages), I do wish to explain briefly why I do not accept the view that criminal convitions of either predicate acts or of RICO itself are required before a plaintiff can bring a cause of action under RICO.

First, I believe the language of the statute does not support such a requirement. *18 U.S.C. § 1964(c)* provides civil actions to those persons injured by reason of a "violation" of *18 U.S.C. § 1962*. *18 U.S.C. § 1962* states that certain kinds of acts, when accomplished through a pattern of racketeering activity, are unlawful.As I read the statute, Congress' use of the word "violation" does not imply that only those parties who have been injured by persons convicted of RICO violations can bring actions. A person "violates" a law at the time he does what the law forbids, not when he is convicted of doing so. The violation occurs even if the violator is never **[*16]** caught. And, as anyone whose parked car has overstayed its welcome on metered city streets can testify, the word "violation" has meaning in the civil as well as the criminal context. See also *United States v. Ward, 448 U.S. 242, 251 (1980)* (a "violation" -- the term used by Congress -- of the Federal Water Pollution Control Act leads to civil, not criminal, liability). Furthermore, *18 U.S.C. § 1961(1)* defines predicate acts as acts which are "chargeable," "indictable," and "punishable," and the statute should be read so as to give some effect to Congress' choice of the subjunctive. In short, the language of the statute does not support the criminal conviction requirement; in fact, it supports the opposite view.

The legislative history of the statute reinforces the view that this reading of the statute is correct. Nowhere does the history of RICO indicate that a RICO victim's ability to assert rights created by the statute should rest at the mercy of the local prosecutor's office. A prosecutor may for good reason choose on occasion not to prosecute RICO violators, but the legislative history does not suggest that the private victims of the violator should forego **[*17]** remedy because a prosecutor has decided not to press charges. Neither does the legislative history show that the private victims of RICO violators should lose their RICO rights just because a prosecutor has lost his RICO case. As I see it, the legislative history shows just the opposite. As I see it, the legislative history shows just the opposite. The history shows that Congress modeled *18 U.S.C. § 1964(c)* on the private enforcement provision of the antitrust laws. While I have rejected the view that Congress intended to incorporate wholesale into RICO all of the doctrines that go along with the antitrust civil remedy, see Econo-Car, International, Inc. v. Agency Rent-A-Car, Inc., slip op. at 16, it seems unlikely that Congress did not intend to incorporate what is probably the most noteworthy feature of the ***antitrust law***'s system of private remedies: the fact that private parties are authorized to act as private attorney generals, and are not required to wait until the "public" attorney general has acted.

Finally, I add one point, apparently not touched upon in the Second Circuit. RICO has a broad forfeiture provision which provides that "[u]pon conviction [1] **[*18]** of a person under [*18 U.S.C. § 1963*] the court shall authorize the Attorney General to seize all property declared forfeited under [that section]. . . ." *18 U.S.C. § 1963(a)*. The property declared forfeited under *§ 1963* includes ". . . any interest [the violator] has acquired or maintained in violation of *section 1962*." *18 U.S.C. § 1963(a)(1)*. Thus, where a person has taken over an interstate enterprise through racketeering tactics, the government has a right to seize that enterprise's assets upon the violator's conviction. This forfeiture provision, if read together with the Second Circuit's criminal conviction requirement, would turn RICO's treble damage provision into little more than a mirage: private victims would have to wait for the United States to win convictions, but would be likely to find that those RICO violators that can be read as judgment-proof. I hesitate to ascribe such an intention to RICO's drafters.

The question of the burden of proof by which the plaintiff must prove the predicate acts I leave open for now. But I rule that for the reasons **[*19]** outlined above, as well as the other concerns expressed in Judge Cardomone's

[1] It is worth noting that Congress knew how to use this word, in this statute, when it wished to.

dissent in the Sedima case, see slip op. (Cardomone, J., dissenting), ***HN1***[] I reject the defendant's a rgument that plaintiff has failed to state a cause of action because the defendants have not been convicted of predicate acts or RICO violations.

A RICO plaintiff must of course meet the statute's technical pleading requirements.A RICO plaintiff must show, first, that the defendants have committed racketeering acts; and that those acts form a pattern within the meaning of the statute. The plaintiff is then required to show that he suffered injury because the defendant either (a) used income derived from that pattern of racketeering to acquire an interest in an enterprise engaged in interstate commerce; (b) acquired or maintained control of such an enterprise through a pattern of racketeering; or (c) that the defendant through a pattern of racketeering activity conducted or participated in the conduct of the affairs of an interstate enterprise with which he was associated or by whom he was employed. He need do no more.

In my judgment, the plaintiff's complaint satisfies this standard, and states **[*20]** a claim under RICO. The complaint alleges that the defendants committed a number of acts of mail fraud and securities fraud, and committed them within a time span much shorter than ten years. Thus, the plaintiff has alleged that the defendants engaged in a pattern of racketeering activity.In addition, the plaintiff claims, inter alia, that the defendants used income derived from that pattern to acquire stock in Technographics, gained and maintain control of Technographics through that pattern, and have also operated Technographics and other enterprises by means of racketeering tactics. Whether the plaintiff's allegations will survive an evidentiary scrutiny is a question to be resolved later. Therefore, the plaintiff's RICO claim cannot be dismissed.

2. Securities Fraud.

The plaintiff in paragraph 95-101 of the complaint claims that the defendants violated *Rule 10b-5* of the Securities and Exchange Commission, *17 C.F.R. § 240.10b-5*, and 15 U.S.C. § 78j(b) by using deceptive devices and contrivances in connection with their purchase of securities from Technographics.The defendants argue thta this claim must be dismissed (a) because the plaintiff's loss was not **[*21]** proximately caused by any misrepresentation or omission that the plaintiff relied on and (b) because the plaintiff has failed to show that the defendants' allegedly deceptive acts occurred "in connection with" the purchase or sale of a security.

A. Proximate Cause. The defendants are correct in arguing that ***HN2***[] there can be no recovery under *Rule 10b-5* unless the plaintiff can show that the defendants' fraudulent act or omission caused the loss about which the plaintiff complains. To borrow an example from the Court of Appeals for the Fifth Circuit:

. . . [A]n investor might purchase stock in a shipping venture involving a single vessel in reliance on a misrepresentation that the vessel had a certain capacity when in fact it had less capacity than was represented in the prospectus. However, the prospectus does disclose truthfully that the vessel will not be insured. One week after the investment the vessel sinks as a result of a casualty and the stock becomes worthless. In such circumstances, a fact-finder might conclude that the misrepresentation was material and relied upon by the investor but that it did not cause the loss.

Huddleston v. Herman & McClean, 640 F.2d 534, ***[*22]*** *549 n.25 (1981)*, aff'd in part, rev'd in part, *459 U.S. 375 (1983)*. The distinction is between "transaction causation" and "loss causation." As the Huddleston court noted: "If the investment decision is induced by misstatements or omissions that are material and that were relied on by the claimant, but are not the proximate cause for his pecuniary loss, recovery under the Rule is not permitted." *Id. at 549*. Here, the defendants contend that if the plaintiff suffered any loss at all, that loss was caused by the defendants' alleged theft of a corporate opportunity. The defendants argue that their purchase of Technographics' stock caused no injury, since the defendant Realex paid for the stock. I disagree. The complaint states facts which, if proved, are sufficient to support a finding that the defendants' misrepresentations and omissions caused loss to the plaintiff. On the facts alleged, it appears that the defendants' misrepresentations and omissions about the source of the money used to purchase the stock cost Technographics the opportunity to obtain new value for the stock it sold. Instead, Technographics received the proceeds of a diverted corporate opportunity in **[*23]** payment for the stock.

This conclusion finds support in *Cramer v. General Telephone & Electronics Corp., 582 F.2d 259 (3d Cir. 1978)*, cert. denied, *439 U.S. 1129 (1979)*. In Cramer, the plaintiff shareholder alleged that the defendant company, GTE, had at the urging of officials of a foreign government sold its substantial interest in a private foreign company, a customer of GTE's, to a group of foreign investors. Because this investors' group lacked the funds to purchase GTE's interest in the company, GTE agreed to pay the group commissions on future sales of its product to the foreign company. These omissions financed the purchase of GTE's stock. The court held that the complaint contained allegations sufficient to raise a claim that the corporation had been injured by reason of the sale of its stock in the foreign company to the foreign investor group:

In effect, GTE supplied some of the money which it received in exchange for its own stock. Surely, such a transaction, if proved, would establish a prima facie injury to the corporation.

Id. at 272. See also *Schlick v. Penn-Dixie Cement Corporation, 507 F.2d 374, 381 (2d Cir. 1974)*, cert. denied, *421 U.S. 976 (1975)*. **[*24]**

B. The "In Connection With" Requirement. The defendants also contend that the plaintiff has not met *Rule 10b-5*'s requirement that the misrepresentation or omission occur "in connection with" the sale of a security because the essence of the plaintiff's claim is that the defendants diverted a corporate opportunity or breached a fiduciary duty. Again, I disagree. Under *Superintendent of Insurance v. Bankers Life & Casualty Co., 404 U.S. 6, 12-13 (1971)*, the question is whether the fraud alleged was one "touching" the sale of securities. In my judgment, the plaintiff's complaint alleges fraud that is quite closely related to the sale of securities. Indeed, the facts alleged here form a kind of mirror image of the facts alleged in Bankers Life. In Bankers Life, the Manhattan Casualty Co. was allegedly defrauded when it sold bonds, having been "duped" into believing that it would receive the proceeds from the sale. *Id. at 9*. Full market price was paid for the bonds, but Manhattan received none of the proceeds. Here, Technographics sold stock and received value, but, the complaint charges, the value received was the profit on a sale of property that was really Technographics' property. **[*25]** See also *Cramer v. General Telephone & Electronics Corp., 582 F.2d at 271* (Where company sold stock, but paid the purchase price with its own funds, *Rule 10b-5*'s "in connection with" requirement satisfied). Consequently, I rule that the plaintiff's complaint states a claim under *Rule 10b-5*.

3. *Rule 9(b)*. ***HN3***[] *Fed.R.Civ.P. 9(b)* provides in part that "[I]n all averments of fraud or mistake, the circumstances constituting fraud or mistake shall be stated with particularity." In my judgment, the plaintiff's 43 page complaint does so. It sets out ". . . the time, place, and content of [the] alleged false representation[s]" -- it need not contain allegations concerning ". . . the circumstances or evidence from which fraudulent intent could be inferred." *McGinty v. Beranger Volkswagen, Inc., 633 F.2d 226, 228 (1st Cir. 1980)*. Compare Wayne Investment, Inc. v. Gulf Oil Corporation, No. 84-1099, slip op. (1st Cir. July 18, 1984).

4. M.G.L. c. 93A. The defendants, relying on *Newton v. Moffie, 13 Mass. App. 462, 434 N.E.2d 656 (1982)*, argue that the plaintiff's claim must be dismissed because that statute governs conduct of parties dealing at arm's length, not the conduct **[*26]** of alleged partners and joint venturers. As the plaintiff notes, however, ***HN4***[] *Fed.R.Civ.P. 8(e)* permits pleading claims "alternately" and "regardless of consistency." At least one view of the facts alleged in the complaint could, if proved, support a finding of liability under c. 93A. See *Nader v. Citron, 372 Mass. 96, 360 N.E.2d 870 (1977)*. Therefore, I rule that the plaintiff has stated a claim under c. 93A.

Accordingly, for the reasons outlined above, I conclude that the plaintiff's complaint states a claim upon which relief can be granted.The defendants' motion to dismiss is therefore denied. [2]

---

[2] While, as I have noted, the allegations presented in this case are wide-ranging and complex, and the pleadings to date indicate that the parties are prepared for a long siege, the issues of fact are relatively straightforward questions involving the credibility of a few major participants. Now the plaintiff has filed an amended complaint. It contains the original complaint's allegations, with a few minor changes, and some new allegations as well.These new allegations are based on the discovery and are included in the amended complaint under a separate heading entitled "Testimony To Date." Because the information revealed by that testimony is not integrated into the body of the original complaint, but is simply tacked on to the end of that complaint's factual

[*27] SO ORDERED.

---

allegations, the amended complaint does little to clarify the plaintiff's claims. Although the amended complaint features an expanded cast of character, and a few new mysterious subplot twists, its message is the same as that of the original complaint. Essentially, each contends that the defendants diverted a corporate opportunity and used the profits obtained thereby to buy 57.3% of Technographics. The defendants have filed a motion to dismiss, a lengthy memorandum in support thereof (which does little more than repeat the arguments the defendants made in their earlier memorandum), and appendix, the purpose of which is to point out that it perceives to be misstatements of fact and which, it turns out, is as long and about as helpful to the resolution of this case as the Boston telephone directory. I have reviewed this material and hopefully, this note will abort the plaintiff's anticipated lengthy response. Because the theme of the new complaint is substantially the same as that of the original complaint, I conclude, that it too states a cause of action under RICO and *Rule 10b-5*. But, as the defendants correctly point out, it is not verified, and is subject to dismisssal. I do not believe it would be fruitful to dismiss this new complaint at this time, however. The plaintiff apparently intends to amend his complaint from time to time as new evidence is discovered. Given the length of each complaint, and the weight of the defendants' responses to them, the road that looms ahead is forbidding, not only because of its threat to America's forests and to the structural soundness of the Courthouse, but also because of the effect it will have on the market price of Xerox stock. Consequently, I think it best to take the following course. Pursuant to *Fed.R.Civ.P. 16*, and in response to the motion for *Rule 16* conference, parties are to complete all discovery within six months of this order. Counsel are to confer and agree on a schedule for discovery. When discovery is completed, the plaintiff is directed to file a single amended complaint that sets his claim out plainly and concisely. The defendant may respond, if so inclined, in a single pleading. The case will be called for status conference in January, 1984, and scheduled for trial in the spring of 1985.

Counsel shoudl also consider whether the issues addressed in this opinion -- specifically, the RICO issues -- involve controlling questions of law as to which there is substantial ground for differences of opinion, so that an immediate appeal may materially advance the ultimate termination of the litigation.

Alexander Grant & Co. v. Tiffany Indus.

United States Court of Appeals for the Eighth Circuit

Opinion

[*409] JOHN R. GIBSON, Circuit Judge.

Alexander Grant and Company, a public accounting firm, appeals the dismissal of its complaint brought against its former client, Tiffany Industries, and certain Tiffany officials and employees under Title IX, the Racketeer Influenced and Corrupt Organizations (RICO) provision of the Organized Crime Control Act of 1970, Pub. L. 91-452, 84 Stat. 941, codified at *18 U.S.C. §§ 1961-1968 (1982)*. The district court, *563 F. Supp. 35 (E.D.Mo. 1982)*, relying **[**2]** on the Seventh Circuit's decision in *Cenco, Inc. v. Seidman & Seidman, 686 F.2d 449* (7th Cir.), *cert. denied*, *459 U.S. 880, 74 L. Ed. 2d 145, 103 S. Ct. 177 (1982)*, dismissed the complaint under *Fed. R. Civ. P. 12 (b) (6)* on the ground that Grant lacked standing to sue under RICO's civil remedy provision. It also denied Grant's motion to file an amended complaint. Grant argues on appeal that the district court erred in dismissing its RICO claim and that it abused its discretion in denying Grant's motion to file the amended complaint. We reverse and remand for further proceedings.

Grant was retained by Tiffany from 1970 through May, 1978. In 1979, Grant filed an action under RICO's civil remedy provision, *18 U.S.C. § 1964 (c)*, against Tiffany, its president Farrell Kahn, and Kahn's secretary Gail Martin. Grant claimed that it was the target of a pervasive scheme of mail and wire fraud designed by the defendants to obtain a favorable audit for the fiscal year 1977. Tiffany allegedly sought the favorable audit to obtain credit on better terms and to mislead its stockholders and the Securities & Exchange Commission **[**3]** into believing that the company was financially healthy.

HN1[] For purposes of reviewing the district court's dismissal of Grant's complaint under *Fed. R. Civ. P. 12 (b) (6)*, we must accept as true all of Grant's material allegations and liberally construe the complaint in its favor. *Loge v. United States, 662 F.2d 1268, 1270 (8th Cir. 1981)*, *cert. denied*, *456 U.S. 944, 72 L. Ed. 2d 466, 102 S. Ct. 2009 (1982)*. The first allegation is that Kahn, in an effort to inflate the value of Tiffany inventory, falsely represented to Grant that Steelabrade Corporation, a supplier of products to Tiffany, held $500,000 worth of Tiffany inventory as of March, 1978. Grant requested confirmation of this claim from Steelabrade president James Murphy. Kahn and Martin, knowing Murphy would not comply, instead requested that he compile a schedule of all purchases of Steelabrade products by Tiffany during 1977. The two then attached a copy of Grant's confirmation request to the schedule and fraudulently inserted language above Murphy's signature stating that "this inventory was at our premises at December 31, 1977, and March 1, 1978." These documents were then mailed **[**4]** to Grant.

Grant's second claim of fraud concerns an alleged sale of $3,500,000 worth of Tiffany products to the government of Nigeria. Grant learned through the course of its audit that a substantial portion of the products sold had not yet been purchased by Tiffany. Grant questioned whether Tiffany could, under these circumstances, record in its financial statements the substantial earnings resulting from this sale. In response, Tiffany personnel stated that the sale should be certified because they had issued purchase orders for the products as of June 30, 1977, and that the products were held by ten suppliers who were simply awaiting further shipping instructions. Grant requested confirmation of this claim from the ten suppliers. Kahn and Martin backdated purchase orders and mailed to Grant forged letters from the suppliers confirming the representations made by Tiffany personnel. Grant, still apprehensive, sought "reconfirmation" of **[*410]** the same information. Kahn and Martin then pressured six suppliers to sign and mail reconfirmation letters back to Grant.

Grant further asserts that Kahn and Martin typed two letters at Tiffany's St. Louis County offices allegedly **[**5]** from Nigerian bank officials. The two letters, one a forgery and the other "on information and belief" a forgery, represented that the two banks had extended $3,500,000 in loan commitments to the Nigerian government to enable it to purchase the Tiffany products. Grant also claims that Tiffany used false information to persuade four independent public accounting firms to certify the Nigerian sale, thereby pressuring Grant to do the same. These certifications were then mailed to Grant. By April 1978, Grant suspected that it was being defrauded and reported its concerns to the Securities & Exchange Commission as required by SEC regulations.

Grant concludes its complaint with the allegation that Tiffany's actions constitute a substantive RICO violation under *18 U.S.C. § 1962 (c)*. [1] It asserts that mail fraud, *18 U.S.C. § 1341*, and wire fraud, *id.* *§ 1343*, are two of the acts included in the definition of "racketeering activity," [2] that the defendants carried out two or more such acts within a ten-year period, thus establishing a "pattern of racketeering activity," [3] **[**7]** and that Tiffany is an interstate "enterprise" [4] conducted **[**6]** by defendants through a pattern of racketeering activity. Grant further asserts that it is entitled to civil damages for this violation under *18 U.S.C. § 1964 (c)*. [5]

The district court denied Grant's motion to file an amended complaint. The amended complaint names additional Tiffany officials as defendants and recites the foregoing with far greater specificity and clarity. It also incorporates additional claims of fraud; the original complaint includes 26 acts of mail fraud and 4 acts of wire fraud while the amended complaint reveals 48 and 10 instances, respectively. Included in the amended complaint are the following additional allegations: (1) Tiffany officials were negotiating with seven insurance companies for $9,000,000 in loans when it discovered in June, 1977 that, if generally accepted accounting principles were used, it was operating **[**8]** at a loss for the year; (2) Tiffany officials forged at least some of the "reconfirmation" letters from those suppliers who either refused or ignored Kahn's request that they assure Grant that they held Tiffany inventory bound for Nigeria; (3) Tiffany officials forged a third letter and a telex from officers of Nigerian banks that confirmed the $3,500,000 loan commitment to the Nigerian government; and (4) Tiffany officials further defrauded Grant by representing that Tiffany "farm stores" held inventory in excess of its actual value. The officials also pressured the managers of these stores to send false certifications to Grant and to make phony offers to purchase their inventories at inflated prices.

Grant asserts that it was damaged in three respects as a result of Tiffany's fraudulent representations. First, it claims **[*411]** that it suffered "theft of services," *i.e.*, the fraud required it to spend substantially more time on the Tiffany audit with a commensurate increase in fees, none of which have been paid. Second, it contends that the SEC investigation caused it to spend large amounts for attorneys' fees, document requests, and other expenses. Third, Grant argues **[**9]** that the fraud caused it to suffer damages to its business reputation.

I. Standing

---

[1] ***HN2***[] *Section 1962 (c)* provides that

> it shall be unlawful for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt.

[2] "***HN3***[] Racketeering activity" is defined as, *inter alia*, "any act which is indictable under any of the following provisions of title 18, United States Code: * * * *section 1341* (relating to mail fraud), *section 1343* (relating to wire fraud) * * *." *18 U.S.C. § 1961 (1)(B)*.

[3] A "pattern of racketeering activity" is defined as "at least two acts of racketeering activity * * the last of which occurred within ten years * * after the commission of a prior act of racketeering activity." *18 U.S.C. § 1961 (5)*.

[4] "Enterprise" includes "any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity." *18 U.S.C. § 1961 (4)*.

[5] ***HN4***[] *18 U.S.C. § 1964 (c)* provides a civil remedy to "any person injured in his business or property by reason of a violation of *section 1962* * *."

The district court did not hold, nor does Tiffany argue, that Grant has failed to plead facts sufficiently alleging that Tiffany committed a substantive violation of RICO under section 1962 (c). [6] **[**10]** Rather, the district court relied on *Cenco* and its holding that the accounting firm in that case suffered only "indirect" injury insufficient to grant it standing under section 1964 (c). [7] Grant asserts that *Cenco* should not be adopted as the law of this circuit because its restrictive interpretation has no basis in the language or legislative history of RICO. It further argues that, in any event, this case is distinguishable from *Cenco* because Grant has been "directly" injured by Tiffany's fraudulent practices. Tiffany argues that *Cenco* was properly decided and that Grant has suffered the same indirect injury alleged by the accounting firm in that case. [8]

[11]** We believe that *Cenco* is distinguishable from this case. In *Cenco*, the accounting firm of Seidman & Seidman was a co-defendant with Cenco, Inc., in a class action brought by persons who had purchased Cenco stock at allegedly inflated prices due to the company's fraudulent representations. The co-defendants cross-claimed against each other: Seidman argued that it too had been defrauded by Cenco and sought as damages under RICO indemnification for its liability to the shareholders. In this case, Grant seeks not indemnification but damages for the amount of its lost fees, the amount spent by reason of the SEC investigation, and the amount representing its loss of business reputation. We believe these are direct injuries, distinguishable from a claim for indemnification which, by its very nature, is secondary and indirect.

Second, and more compellingly, we are unpersuaded by the reasoning employed in **[*412]** *Cenco*. Judge Posner, writing for the panel, reasoned that the case was one of first impression and that the "language of section 1964 (c) provides no answer * * * and there is no useful legislative history relating to the provision." *Cenco*, 686 F.2d at 457. **[**12]** The opinion thus focused on whether recognizing a cause of action in favor of Seidman would be consistent with the "compensatory and deterrent objectives of RICO" and would comport with its primary purpose of " 'cop[ing] with the infiltration of legitimate businesses. '" *Id.* (quoting *United States v. Turkette, 452 U.S. 576, 591, 69 L. Ed. 2d 246, 101 S. Ct. 2524 (1981))*. The court concluded that the objectives and purpose of RICO would not be served by permitting such actions, and also expressed concern with the volume of treble damage lawsuits an opposite decision might spawn. [9]

---

[6] *See supra* note 1. We do observe that Grant's original complaint alleges that Tiffany is both a "person" and an "enterprise" within the meaning of section 1962 (c). It was precisely because of the possibility of such an identity that we held that count II of the complaint in *Bennett v. Berg, 685 F.2d 1053, 1061-62 (8th Cir. 1982)*, *aff'd in part and rev'd in part*, *710 F.2d 1361 (8th Cir. 1983)* (en banc), *cert. denied*, ***464 U.S. 1008, 104 S. Ct. 527, 78 L. Ed. 2d 710 (1983)***, failed to state a claim. Tiffany does not raise this point on appeal. We note, however, that Grant's amended complaint alleges that, in addition to Tiffany, two other distinct "enterprises" existed. The first consists of an association in fact of the six named individuals alleged in the amended complaint to have participated in the fraud. The second consists of all Tiffany employees.

[7] *See supra* note 5. The term "indirect injury" discussed in *Cenco* has also been used as a synonym for the "commercial" or "competitive" injury requirement. *See, e.g., Schacht v. Brown, 711 F.2d 1343, 1356-58* (7th Cir.), *cert. denied*, *464 U.S. 1002, 104 S. Ct. 509, 78 L. Ed. 2d 698 (1983)*. It has been suggested that this requirement, borrowed from ***antitrust law***, is applicable to RICO because the statute's legislative history reveals that it was "intended in part to combat the threat posed by racketeer influences in the free market system." *Bennett, 685 F.2d at 1059*. We explicitly rejected in *Bennett* any "commercial" or "competitive" injury restriction on standing under RICO. *Id. See also Blakey, The RICO Civil Fraud Action in Context: Reflections on Bennett v. Berg*, *58 Notre Dame L. Rev. 237, 255 n.52 (1982)*.

[8] Appellee Kahn argues separately that Grant's injury is insufficient because it was not a victim in the "target area" of the alleged RICO violation. He asserts that this concept, derived from standing tests developed under section 4 of the Clayton Act, *15 U.S.C. § 15 (1982)*, is applicable to RICO plaintiffs. Recognizing that we declined in *Bennett* an invitation to apply antitrust standing restrictions to RICO plaintiffs, *see supra* note 7, Kahn does not argue that Grant satisfies the target area test only if it suffers "commercial" or "competitive" injury. Rather, Kahn asserts that Grant must "loan Tiffany money, buy its stock or otherwise extend economic benefits to [it] * * *" to have standing. Appellee's Brief at 20. We believe that this reasoning is simply an alternative means of characterizing Grant's injury as "indirect," and therefore feel it merits no analysis independent of our discussion of *Cenco*.

[9] The particular language in *Cenco* is as follows:

[13]** We cannot agree that Grant's standing under *section 1964 (c)* is to be determined by means of an appeal to RICO's purpose and objectives. *Section 1964 (c)* provides a civil remedy for "any person injured in his business or property by reason of a violation of *section 1962* * * *." This language is unambiguous and, "***HN5***[] in the absence of a 'clearly expressed legislative intent to the contrary, that language must ordinarily be regarded as conclusive. '" *Russello v. United States, 464 U.S. 16, , 104 S. Ct. 296, 299, 78 L. Ed. 2d 17 (1983)* (quoting *Turkette, 452 U.S. at 580*). We find no legislative history supporting the direct-indirect dichotomy; indeed, to the extent that the concept of indirect injury is a surrogate for concerns of federal-state relations and crowded court dockets, the legislative history indicates that Congress recognized that these were necessary costs in the fight against organized crime. *See* Blakey, *supra* note 7, at 280. It is simply "beyond our authority to restrict the reach of the statute" in this manner. *Bennett v. Berg, 685 F.2d 1053, 1064 (8th Cir. 1982)*, *aff'd in part and rev'd in part* **[**14]** , *710 F.2d 1361 (8th Cir. 1983)* (en banc), *cert. denied*, *464 U.S. 1008, 104 S. Ct. 527, 78 L. Ed. 2d 710 (1983)*; *see generally* *Moss v. Morgan Stanley, Inc., 719 F.2d 5, 21 (2d Cir. 1983)*, *cert. denied*, *465 U.S. 1025, 104 S. Ct. 1280, 79 L. Ed. 2d 684 (1984)*; *Schacht v. Brown, 711 F.2d 1343, 1361* (7th Cir.), *cert. denied*, *464 U.S. 1002, 104 S. Ct. 509, 78 L. Ed. 2d 698 (1983)*.

We also observe that Judge Posner, in the post-Cenco decision of *Sutliff, Inc. v. Donovan Cos., 727 F.2d 648 (7th Cir. 1984)*, determined the scope of RICO with considerably greater deference to its plain language than he did in *Cenco*. [10] We believe that *Sutliff* robbed *Cenco* of much of the precedential value accorded it by the district court. Insofar as the approaches in the two cases differ, the task of reconciliation is left to the Seventh Circuit.

[15]** We conclude that Grant has suffered injury within the meaning of *section 1964 (c)*.

[*413] II. Racketeering Enterprise Injury

Section 1964 (c) provides that a civil remedy is available to persons suffering injury "by reason of a violation of *section 1962* * * *." Yet *section 1962 (c)* does not prohibit "racketeering activity;" rather, it makes it unlawful for a person to "conduct or participate * * * in the conduct of [an] enterprise's affairs through a pattern of racketeering activity * * *." Tiffany reasons that the language of these two sections combines to limit civil recovery to persons suffering a "racketeering enterprise injury" -- *the conduct of an enterprise through* a pattern of racketeering -- and does not create a cause of action for those suffering injury only from the underlying predicate acts. Tiffany asserts that Grant's injuries have resulted solely from the particular acts of mail and wire fraud outlined in the complaint.

We have characterized the attempt to limit the scope of RICO by seizing on the "by reason of" language contained in *section 1964 (c)* as a "reiterat[ion] in new guise [of] the argument that no [distinct] 'enterprise' is **[**16]** alleged * *

> It is presumably on behalf of the owners, perhaps also the customers and competitors, of such businesses that the civil damages remedy was created, and not on behalf of the people who supply office equipment or financial or legal services to criminal enterprises that may be violating RICO. It is unlikely that Congress if it had adverted to the issue would have chosen to create in the wake of every RICO violation waves of treble-damage suits by all who may have suffered indirectly from the violation, especially when many of these would inevitably be, as here, the witting or unwitting tools of the violator.

686 F.2d at 457.

[10] In *Sutliff*, Judge Posner made the following observation in the context of rejecting an organized crime connection for civil RICO recovery:

> Congress deliberately cast the net of liability wide, being more concerned to avoid opening loopholes through which the minions of organized crime might crawl to freedom than to avoid making garden-variety frauds actionable in federal treble-damage proceedings -- the price of eliminating all possible loopholes. We must abide by Congress's decision, made at a time of less sensitivity than today to the workload pressures on the federal courts and to the desirability of maintaining a reasonable balance between state and federal courts, however much we may regret not only the burdens that the decision has cast on the federal courts but also the displacement of state tort law into the federal courts that it has brought about.

727 F.2d at 654 (citations omitted). *Sutliff* does not refer to the *Cenco* decision.

*." *Bennett, 685 F.2d at 1059 n.5*. As advanced by Tiffany here, a racketeering enterprise injury also appears to bear some resemblance to the commercial or competitive injury concept and to the requirement that RICO is applicable to only those defendants associated with organized crime. We rejected both of these restrictions in *Bennett. 685 F.2d at 1058-59, 1063-64*. We recognize that a racketeering enterprise injury is a slippery concept whose definition has eluded even those courts professing to recognize it. *See In Re Catanella and E.F. Hutton and Co. Sec. Litigation, 583 F. Supp. 1388, 1434-37 (E.D. Pa. 1984)* (collecting cases). "Underlying this [racketeering enterprise injury] requirement is the familiar judicial discomfort with the potential breadth of RICO's civil component." *Id. at 1434*.

We need not further consider the nature of a racketeering enterprise injury, however, for it is clear that Grant's complaint does not simply allege injury from the underlying predicate acts. It contends that Tiffany was conducted through a pattern of mail and wire fraud that enabled it to remain in business. **[**17]** As a result of this extended life, Grant continued to provide its accounting services to Tiffany for a time greater than it would have had the fraud not occurred. This also increased the harm resulting to Grant's business reputation. We conclude that these allegations sufficiently plead an injury "by reason of" a RICO violation.

The Second Circuit recently held in *Sedima, S.P.R.L. v. Imrex Co., 741 F.2d 482 (2d Cir. 1984)*, that the "by reason of" language in *section 1964 (c)* requires that the injury result from mobster activity or the efforts of organized crime. As indicated previously, this requirement is contrary to our holding in *Bennett*. [11] We do view our decision today as consistent with the Second Circuit's decision in *Bankers Trust Co. v. Rhoades, 741 F.2d 511 (2d Cir. 1984)*. Both require that civil RICO plaintiffs allege something more than injury from the underlying predicate acts. We recognize, however, that the Second Circuit in *Bankers Trust* defines that "something more" in a far narrower fashion. *Id.* slip op. at 5621. *See also Furman v. Cirrito, 741 F.2d 524 (2d Cir. 1984)* (criticizing the requirement **[**18]** of a racketeering enterprise injury imposed by *Sedima* and *Bankers Trust*).

Appellee Kahn asserts in the alternative that no "racketeering enterprise injury" exists because Tiffany never secured the favorable audit from Grant, and therefore its business operations were never enhanced, nor did it receive any financial advantage, from its racketeering activity. We are not persuaded by this argument. As concluded above, Grant's complaint sufficiently alleges that its injury resulted from the operation of Tiffany through a pattern of racketeering activity. Moreover, Kahn's argument would lead to the anomalous result **[*414]** that the racketeering activity must be allowed to proceed to successful completion before civil recovery is permitted. No interpretation of the plain language of RICO's civil provisions supports the position that **[**19]** Grant must silently tolerate the significant costs and risks associated with ongoing fraud before it seeks redress.

III. Amended Complaint

The district court did not articulate its reasons for refusing to allow Grant to file the amended complaint. Two factors convince us that the district court should on remand give serious consideration to Grant's motion. First, any additional allegations contained in the amended complaint would in all likelihood be permitted in evidence under the original complaint. Second, the amended complaint relates Grant's claim in a far clearer and more specific manner.

In summary, we conclude that Grant has sufficiently pled that it was "injured" by Tiffany's fraudulent practices and that its injury occurred "by reason of" Tiffany's alleged violation of *section 1962 (c)*.

End of Document

---

[11] *Sedima* also holds that a prior criminal conviction is a prerequisite to civil RICO recovery. This issue has not been raised in the district court in this case.

Opinion by: GARWOOD

Opinion

[*1013] Garwood, Circuit Judge:

This is an appeal from a summary judgment in an antitrust suit. Plaintiff-appellant, Lonnie C. Hood, who had worked as a career agent for the Southwestern Life Insurance Company (Southwestern Life) for many years, was terminated by the company in September 1980. At about the same time, an affiliated company, Southwestern Management & Research Corporation (Southwestern Management), terminated Hood's employment as a registered representative selling mutual funds and other financial instruments.

Hood sued these companies and three others [1] in federal district court, alleging that his termination constituted a group boycott which substantially restrained competition in violation of *section 1* of the Sherman Act, **[**2]** *15 U.S.C. § 1*, and article 21.21, section 4(4) of the Texas Insurance Code. The district court, after reviewing the pleadings, depositions, and admissions on file, in addition to affidavits submitted by the parties, on March 1, 1983 granted defendants' motion for summary judgment on all of plaintiff's claims. We affirm.

I.

FACTS

Lonnie Hood became a career agent with Southwestern Life in its Beaumont branch office in 1953 and served in this capacity until his termination by the company in September 1980. In 1971 Hood also became a registered representative of Southwestern Management, an affiliated company of Southwestern Life which functions as a service company for Southwestern Life insurance agents who wish to sell mutual funds and annuities.

Although his contract **[**3]** with Southwestern Life provided that Hood would sell only its policies, in 1965 he began to sell policies for other companies. At the time of his termination, Hood had signed agreements with over twenty-five companies and did substantial business with these. He received formal permission from Southwestern Life to do so only on one occasion in 1971. The company, however, apparently did not strictly enforce its restrictions regarding brokering for other companies either as to Hood or as to its other agents.

By 1980 Southwestern Life's competitive position in the Beaumont area had deteriorated. Hood believed that the company **[*1014]** was not competitive in certain areas of the market. He expressed his concerns to officers of the company as well as to other Southwestern Life agents.

In September 1980 Southwestern Life appointed a new manager, Thomas Martin, for the Beaumont branch office. Martin was told by James Cobb, a vice president of Southwestern Life, that the agency needed rebuilding in the form of new agents and increased production. Cobb also told Martin that Lonnie Hood placed a great deal of business outside Southwestern Life and that Hood had a negative attitude toward **[**4]** the company and its products. Shortly after assuming his new duties, Martin recommended the termination of Hood's agency contract. The company accepted his recommendation and on September 25, 1980 sent Hood a letter informing him of its decision. This letter, which was the first notice that Hood received regarding his termination, gave no reasons for the company's action. [2]

On October 6, 1980 Southwestern Management also **[**5]** sent Hood a notification that he had been terminated as a registered representative for that company. It was the usual policy of Southwestern Management to terminate a representative when that individual had also been terminated by Southwestern Life, [3] although some individuals under these circumstances had requested and been allowed to remain representatives of Southwestern Management. There is no evidence that Hood made such a request.

Hood initiated this suit on May 6, 1981 alleging violations of *section 1* of the Sherman Act, *15 U.S.C. § 1*, and alternatively, an illegal tying agreement in violation of section 3 of the Clayton Act, **[**6]** *15 U.S.C. § 14*.

---

[1] The others are Southwestern Investors, Inc., Southwestern Investors Income Fund, Inc., and Fund of the Southwest, Inc. There is no claim, however, that these companies were involved in Hood's termination.

[2] Later, in response to a letter from Hood's attorney, Southwestern Life stated that Hood's termination was due to the "fact that he was placing the majority of his business with another life insurance company and had ceased to be a representative primarily for Southwestern Life Insurance Company. . . . Simply stated, Mr. Hood had, by his actions, ceased to be a career agent for Southwestern Life, and our notice of termination merely confirmed that point."

Hood's contract with Southwestern Life provided it could be terminated at any time by either party on written notice to the other.

[3] One reason offered for this policy is that, under the rules of the National Association of Securities Dealers, an individual may work as a registered representative for only one company. The premise is that individuals leaving Southwestern Life would wish to become a representative of a securities firm associated with another life insurance company.

Subsequently, he amended his complaint to add a claim under article 21.21, section 4(4) of the Texas Insurance Code. The district court granted summary judgment on all claims. Hood appeals only his claims under section 1 of the Sherman Act and article 21.21 of the Texas Insurance Code. He does not appeal the district court's judgment on his Clayton Act claim.

II.

SUMMARY JUDGMENT

We are mindful that we review this case under the summary judgment standard. ***HN1***[] This standard is a strict one, allowing the entry of summary judgment only "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." *Fed.R. Civ.P. 56(c)*, *see, e.g., Transource International v. Trinity Industries, Inc., 725 F.2d 274, 279 (5th Cir. 1984)*. Moreover, ***HN2***[] in considering a motion **[**7]** for summary judgment, a court must draw all reasonable inferences in favor of the nonmoving party. *In re Municipal Bond Reporting Antitrust Litigation, 672 F.2d 436, 440 (5th Cir.1982)*. However, once the moving party makes an initial showing that no genuine issue of material fact exists, the nonmoving party "must set forth specific facts showing that there is a genuine issue for trial." *Fed.R. Civ.P. 56(e)*. ***HN3***[] In reviewing a summary judgment on appeal, we apply the same standard as that used by the district court. *Transource, 725 F.2d at 279*.

[*1015] III.

FEDERAL ANTITRUST CLAIM

Hood's claim that Southwestern Life and Southwestern Management conspired to terminate him in violation of *section 1* of the Sherman Act has been foreclosed by a recent decision of the Supreme Court, *Copperweld Corporation v. Independence Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. In *Copperweld* the plaintiff, David Grohne, had formed a new corporation, Independence Tube Company, that would compete in the steel tubing **[**8]** market with Regal Tube Company, [4] a wholly owned subsidiary of Copperweld Corporation. Obviously concerned about this new competitor, Copperweld and Regal Tube took a number of steps to discourage those contemplating doing business with Independence Tube. [5]

A jury found that Copperweld and Regal Tube had violated *section 1* of the **[**9]** Sherman Act through these concerted activities and the Seventh Circuit affirmed. The Supreme Court reversed, however, holding that ***HN4***[] a parent corporation and its wholly owned subsidiaries are legally incapable of conspiring with each other in violation of *section 1* of the Sherman Act. In so holding, the Court rejected in large part [6] the "intra-enterprise conspiracy doctrine," a doctrine applied to allow recovery under the Sherman Act for the coordinated acts of a parent and its subsidiary. The Court expressed as the basis for its decision the unity of purpose shared by the parent and its subsidiary:

> "A ***HN5***[] parent and its wholly owned subsidiary have a complete unity of interest. . . . With or without a formal 'agreement,' the subsidiary acts for the benefit of its parent, its sole shareholder. If a parent and a wholly owned subsidiary do 'agree' to a course of action, there is no sudden joining of economic resources that had

---

[4] Before its acquisition by Copperweld, Regal Tube was an unincorporated division of Lear Siegler, Inc. Grohne served as president of this division.

[5] For example, they sent to parties with whom Grohne was attempting to deal a letter warning of their intent to protect their rights under the terms of their purchase agreement and to protect the trade secrets purchased from Lear Siegler. After receiving this letter, Yoder Company canceled a contract with Grohne under which the former was to supply a tubing mill. Copperweld and Regal Tube also contacted banks that were considering financing the new company as well as prospective suppliers and customers of Independence Tube.

[6] The Court reserved the question of whether a parent company may conspire with an affiliated company it does not wholly own.

> previously served different interests, and there is no justification for **[**10]** *§ 1* scrutiny." *Id.* at __, 104 S. Ct. at 2742.

Hood's claim of a *section 1* violation concerns the termination of his contract as an agent, a decision that he alleges was jointly made by Southwestern Life and Southwestern Management. Each of these companies, however, is a wholly owned subsidiary of a common parent corporation -- Tenneco. *Copperweld* teaches us that because they share a common purpose with Tenneco they cannot conspire with their parent in violation of the Sherman Act. ***HN6***[] By the same token, neither can they conspire with one another. In light of *Copperweld*, therefore, we must affirm the grant of summary judgment on Hood's federal antitrust claim. [7]

[11] IV.**

STATE ANTITRUST CLAIM

In addition to claiming a violation of federal ***antitrust law***, Hood alleges that the termination of his contract violated article 21.21, section 4(4) of the Texas Insurance Code. [8] *Tex.Ins.Code Ann. art. 21.21* § 4(4) (Vernon 1981). This section states:

> **[*1016]** ***HN7***[] "Sec. 4. The following are hereby defined as unfair methods of competition and unfair and deceptive acts or practices in the business of insurance:
> ". . . .
> "(4) Boycott, Coercion and Intimidation. Entering into any agreement to commit, or by any concerted action committing, any act of boycott, coercion or intimidation resulting in or tending to result in unreasonable restraint of, or monopoly in, the business of insurance; . . ."

We affirm the district court's grant of summary judgment on this state law claim asserted by Hood.

[12]** At the onset, we are uncertain that Texas law would even recognize the claim asserted by Hood and for much the same reason as expressed by the Supreme Court in *Copperweld*. Texas courts have held that ***HN8***[] a statutory combination or concerted action in violation of the state antitrust laws cannot occur unless those combining are independent and in competition with one another. *See State v. Fairbanks-Morse & Co., 246 S.W.2d 647, 658-59* (Tex. Civ.App. -- Dallas 1952, writ ref'd n.r.e.). "Our Supreme Court from early times has ruled that a statutory combination cannot exist unless the two or more persons are independent and capable of acting in competition with one another . . . ." *Padgitt v. Lone Star Gas Co., 213 S.W.2d 133, 136*, (Tex.Civ.App. -- Dallas 1948, no writ). While these courts were interpreting articles 7426-7428, the predecessor statutes of the general Texas antitrust laws, rather than the insurance code provision at issue in this case, it is probable that the Texas courts would apply the same reasoning to claims such as that made by Hood. Under **[**13]** this reading of Texas law, Southwestern Life and Southwestern Management, which are neither "competitors" nor independent, cannot combine or act in a concerted manner.

We decline, however, to rest our holding on this interpretation. While *Fairbanks-Morse* suggests broadly that those charged with combining in restraint of trade must be capable of acting in competition with one another, the decision in *Padgitt* indicates this requirement applies only to trusts, as the court in that case considered the merits of a claim of conspiracy between a gas company and a customer. Moreover, while we believe that these decisions do reflect a requirement that those conspiring be "independent," [9] we cannot be certain at this point that the Texas courts would apply the rule expressed by the Supreme Court in *Copperweld* regarding subsidiaries of a common parent. This is particularly true as that case at least arguably effected a change from the previous practice and as we have found

[7] Thus, we do not directly address the merits of Hood's federal claim, as such, apart from the *Copperweld* rule, although, as shown by the discussion of his state law claim, the result would be the same.

[8] The district court had jurisdiction over this pendent state claim. *See* *Transource International v. Trinity Industries, Inc., 725 F.2d 274, 285-86 (5th Cir.1984)*.

[9] *See also* *Albin v. Isotron Corporation, 421 S.W.2d 739* (Tex.Civ.App. -- Texarkana 1967, writ ref'd n.r.e.).

no Texas case that specifically addresses this issue. For these reasons, we address the merits of appellant's state claim apart from *Copperweld*.

[14]** Our task is hampered somewhat by the paucity of cases discussing section 4(4) of article 21.21; research has yielded only one -- *Russell v. Hartford Casualty Insurance Co., 548 S.W.2d 737* (Tex.Civ.App. -- Austin 1977, writ ref'd n.r.e.). In *Russell* the plaintiffs claimed that their insurer had violated this provision by attempting to "coerce and intimidate" them through the cancellation of a rental car agreement. The Texas Court of Civil Appeals rejected this claim and affirmed summary judgment for the defendant, stating that the purpose of section 4(4) is "to prevent monopoly or unreasonable restraint in the business of supplying insurance." *548 S.W.2d at 742*. While this decision shows that Texas would not apply this provision to every unfair or potentially intimidating act by an insurer, it does not express the standards to be used in assessing a violation of the section.

The parties both contend, however, that this Court should apply the test under *section 1* of the Sherman Act, *15 U.S.C. § 1*, in assessing Hood's claim. We agree, finding support for this approach in *Russell*, which **[*1017]** shows that the Insurance **[**15]** Code provision is aimed at antitrust violations, and in the common purpose reflected in the two statutes -- to prevent concerted anticompetitive conduct. [10]

[16]** SHERMAN ACT ANALYSIS

Per Se **Restraint Of Trade**. Hood first contends that his termination by Southwestern Management and Southwestern Life was a horizontal boycott and thus constituted a *per se* violation. [11] **[**17]** He argues that through their actions the Tenneco subsidiaries sought to send a message to remaining Southwestern Life agents to stop brokering the products of other insurance companies. For this reason, he argues, his termination was intended to harm other insurance companies which compete on the same level with Southwestern Life in the Beaumont area. While conceding that Hood's termination was due to his low production for Southwestern Life, [12] defendants contend that their action was justified and, in any event, did not violate the anti-trust laws. We find no *per se* restraint.

First, it is established that horizontal combinations in restraint of trade are "agreements among *actual competitors* which restrain competition at the same level of distribution." *Transource International v. Trinity Industries, Inc., 725 F.2d 274, 279 (5th Cir.1984)* (emphasis added). Southwestern Life and Southwestern Management, however, are not actual competitors. The former is an insurance company and sells only insurance products; the latter is a broker/dealer in securities and sells mutual funds and variable annuities. Moreover, the record reflects that

---

[10] Supporting this conclusion is the fact that the wording of article 21.21, section 4(4), while differing from that of *section 1* of the Sherman Act, is quite similar to the wording in the McCarran-Ferguson Act. ***HN9***[] This act generally exempts the insurance industry from regulation under the federal antitrust laws including the Sherman Act. *15 U.S.C. § 1012(b)*. There is an exception to this general exemption: the Sherman Act remains applicable "to any agreement to boycott, coerce, or intimidate, or act of boycott, coercion, or intimidation." *15 U.S.C. § 1013(b)*. This Court has analyzed claims of boycotts by insurance companies under the test applied for violations of *section 1* of the Sherman Act. *Blackburn v. Crum & Forster, 611 F.2d 102* (5th Cir.), *cert. denied*, ***447 U.S. 906, 100 S. Ct. 2989, 64 L. Ed. 2d 856 (1980)***. *See also* *St. Paul Fire and Marine Ins. Co. v. Barry, 438 U.S. 531, 541, 98 S. Ct. 2923, 2929, 57 L. Ed. 2d 932 (1978)*.

[11] ***HN10***[] Horizontal agreements are ordinarily considered illegal *per se* "' because of their pernicious effect on competition and lack of any redeeming virtue.'" *Transource, 725 F.2d at 279*, quoting *Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 518, 2 L. Ed. 2d 545 (1958)*. Where a *per se* violation has occurred, the plaintiff is not required to show any anticompetitive effects; these are presumed. *Id.*

[12] From January to September 1980 Hood earned $7,168 in commissions for new business from Southwestern Life; his first year's commissions with all other companies totaled $36,851 during this same time period. His earnings for renewals from January to September were $6,530 and $9,480 respectively. Hood had voluntarily moved from the Southwestern Life branch office in Beaumont in June 1980 because he was placing much of his business with other companies.

Southwestern Management functioned as a service company for **[**18]** Southwestern Life agents; its purpose was to enable them to sell products they could not otherwise offer. [13]

Second, in any event, we find no horizontal component in the termination of Hood by the two companies. Neither company competes with Hood. Hood has not alleged and shown to be a co-conspirator any individual, such as another agent, who is independently a competitor of Hood; nor has he alleged and shown that the asserted conspiracy had as a purpose or effect the restriction of competition among agents who were his competitors. In *Blackburn v. Crum & Forster, 611 F.2d 102, 104* (5th Cir.), *cert. denied*, *447 U.S. 906, 100 S. Ct. 2989, 64 L. Ed. 2d 856 (1980)*, this Court, in considering a similar contention by a terminated insurance broker, found that the case "contains no horizontal aspect, but involves **[**19]** only a vertical action undertaken by suppliers, **[*1018]** the insurance company defendants, against their agent . . . ." *Cf. Black v. Nationwide Mutual Insurance Co., 429 F. Supp. 458 (W.D.Pa. 1977)*, *aff'd*, *571 F.2d 571 (3d Cir.1978)* (no antitrust violation in termination of insurance agent by three related insurance companies). Hood's termination did not constitute a horizontal boycott. [14]

Rule of Reason. Because we have concluded that there was no horizontal restraint of trade, we must analyze Hood's claim under the rule of reason. *Transource at 280*; *Muenster Butane, Inc. v. Stewart Company, 651 F.2d 292, 295 (5th Cir. 1981)*. "The **[**20]** ***HN11***[] rule of reason inquiry focuses on the competitive significance of a particular restraint . . . ." *Hornsby Oil Company, Inc. v. Champion Spark Plug Company , 714 F.2d 1384, 1392 (5th Cir. 1983)*. To recover under this rule, the plaintiff must show that the defendant's actions adversely affected competition in the appropriate product and geographic markets. *Id.* Hood has failed to show sufficient anticompetitive effect to prevail on his claim.

It is undisputed that there was vigorous competition in Beaumont between the twenty to thirty companies selling life insurance there. [15] Further, Hood does not dispute that Southwestern Life's share of the overall ordinary life insurance business in that city was less than five percent [16] and that entry or expansion into the market was not difficult. This is significant as we have held that ***HN12***[] the termination of a dealer by a supplier lacking market power cannot have an adverse effect on competition. *See Carlson Machine Tools, Inc. v. American Tool, Inc., 678 F.2d 1253, 1259-60 (5th Cir. 1982)* **[**21]** (affirming summary judgment against terminated distributor where manufacturer's market share never exceeded ten percent); *Daniels v. All Steel Equipment, Inc., 590 F.2d 111 (5th Cir. 1979)* (summary judgment in case involving termination of a sales representative).

Hood argues, however, that the relevant market in his case was not the entire life insurance business in Beaumont, but rather a discrete market consisting of professional men over the age of forty. He contends that Southwestern Life had a market share of approximately twenty-five percent in this market. It is true, of course, that defining a market is an important consideration in an antitrust action. We have said **[**22]** that market considerations provide the "objective benchmarks" for determining a *section 1* violation. *Hornsby Oil, 714 F.2d at 1393*. And it is also true that "within a broad product market, economically significant submarkets may exist which in themselves constitute product markets." *Id. at 1393*. [17]

---

[13] Thus we reject Hood's contention, made during oral argument, that the two companies competed because each offered products relevant to financial planning and security.

[14] Nor is there any other basis for finding a *per se* violation. *See E.A. McQuade Tours, Inc. v. Consolidated Air Tour Manual Committee, 467 F.2d 178 (5th Cir. 1972)*, *cert. denied*, ***409 U.S. 1109, 93 S. Ct. 912, 34 L. Ed. 2d 690 (1973)***.

[15] Both Hood and his expert witness testified that the life insurance business in the Beaumont area was intensely competitive.

[16] The record reflects that Southwestern Life's overall share of ordinary life insurance in Texas at this time was 2.33 percent; its share of group insurance in that state was.67 percent.

[17] "The outer boundaries of the product market are drawn in terms of the presence of substitutes to which consumers will turn in response to price changes . . . and the ability of other existing producers or new entrants to expand output . . . ." *Hornsby Oil, 714 F.2d at 1393*.

Hood's showing on this theory, however, is wholly insufficient. His statement is that this twenty-five percent of the market share of executives and professionals over forty in the Greater Beaumont Area consists of those who "either were or had been policyholders of Southwestern Life." This figure, therefore, does not represent a market share at a particular point in time, but rather **[**23]** is a cumulative figure representing a total number of policyholders over some unknown period of time. We must infer that the twenty-five percent figure is overstated as to any particular relevant time. Moreover, Hood does not show how his termination impacted competition. He merely points to figures showing that brokering by Southwestern Life agents with **[*1019]** one company -- Philadelphia Life Insurance Company -- increased significantly in 1980 (to $128,518 from $8,812 in 1979) and decreased to $58,203 in 1981, the year following his termination. We have no information that shows a link between Hood's termination and the decline in brokering by Southwestern Life agents with this one particular company. Nor do we have any information regarding whether Philadelphia Life was unable to sell its products through other agents. In addition, Hood has failed entirely to show how this one-year decline in brokering by Southwestern Life agents with a single insurance company has impacted the product market he seeks to define. His argument seems to be that Philadelphia Life would no longer be privy to the customer lists of Southwestern Life and, thus, could not penetrate the over-forty executive-professional **[**24]** market. The latter conclusion, however, is entirely speculative. The antitrust laws, moreover, do not require companies to share this type of information. Finally, Hood has conceded that Southwestern Life could enforce the provision in its contracts with its agents requiring them to sell only its products. The anticompetitive effects of this action would be no different, however, than those claimed by Hood as a result of his termination. *Cf.* *Red Diamond Supply, Inc. v. Liquid Carbonic Corp., 637 F.2d 1001, 1007* (5th Cir.), *cert. denied*, *454 U.S. 827, 102 S. Ct. 119, 70 L. Ed. 2d 102 (1981)* (finding no antitrust violation where the defendant could have attained the same results through a lawful means as it accomplished by an allegedly illegal means).

Given the admittedly vigorous competition in Beaumont and the ease of entry into the market, there is simply no showing, beyond mere speculation, that Hood's termination, even if we infer some effect on brokering by other Southwestern Life agents, either had or was calculated to have any anticompetitive effect. Hood has thus failed to provide adequate evidence of anticompetitive effect to raise a **[**25]** material fact issue and to preclude summary judgment under the rule of reason.

V.

CONCLUSION

In sum, we find that Hood's federal antitrust claim has been foreclosed by the Supreme Court's decision in *Copperweld* because Southwestern Life and Southwestern Management are wholly owned subsidiaries of a common parent company. In addition, we find that he has failed to prevail on his state law claim. For these reasons, we affirm the decision of the district court.

AFFIRMED.

Opinion

[*950] This case, **[**2]** which now makes its third appearance before this court, is one of the increasingly frequent challenges under the federal antitrust laws to the actions of state and municipal bodies. These actions raise fundamental questions about the balance of federal and state power and pose the inherent conflict between the national policy of free competition and the anticompetitive consequences of state regulation. This rapidly evolving area of the law portends far-reaching changes in the role of the federal courts in reviewing the exercise of regulatory authority by the states and, ultimately, in the relationship between states and their political subdivisions. [1]

[3]** **[*951]** The plaintiffs in the instant case allege that the City of Akron, as part of a comprehensive program to dispose of solid waste and create steam energy, has monopolized the business of solid waste processing in violation of the Sherman Antitrust Act. *15 U.S.C. § 1 et seq.* The defendants, including the City and a state agency, contend that their actions are protected by the "state action exemption" to the ***antitrust law*** developed by *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)* and its progeny. The plaintiffs appeal from summary judgment holding that the defendants' actions were within the state action exemption and therefore immune to antitrust attack.

I.

A. History of the Recycle Energy System and the Ordinance Under Challenge.

The facts in this case are set forth in detail in the original district court opinion, *Glenwillow Landfill, Inc. v. City of Akron, 485 F. Supp. 671 (N.D. Ohio 1979)*. Those facts relevant to the issues before us are summarized below.

The plaintiffs in this case challenge an ordinance adopted as part of a plan to solve two pressing problems **[**4]** confronting the City of Akron. In the late 1960's, Akron had exhausted all but one sanitary landfill for solid waste disposal. A proposal to open a new site encountered immediate legal challenges. As the City struggled to find alternatives for waste disposal, Ohio Edison petitioned the Public Utilities Commission to permit the company to abandon its steam heating system and halt the supply of steam for Akron's downtown business district.

In an effort to find a single solution to its difficulties, the City began to consider constructing a "Recycle Energy System" ("RES") to convert solid waste into steam. After several studies and a public hearing, the City Council, in April 1973, authorized the City administration to retain a firm to design an RES project. By December 1974, final plans and specifications were completed and construction contracts were let out for bid. Financing, however, proved to be a substantial barrier. The City intended to issue revenue bonds to finance the project, but in mid-1975 the underwriters for the bond issue informed the City that the bonds would not be marketable.

---

[1] The implications of recent Supreme Court decisions in this area have provoked much scholarly discussion. *See e.g., Posner, The Proper Relationship between State Regulation and the Federal Antitrust Laws*, 49 N.Y.U. L. Rev. 693 (1974); Slater, *Antitrust and Government Action: A Formula for Narrowing Parker v. Brown*, 69 Nw. U.L. Rev. 71 (1974); Rogers, *Municipal Antitrust Liability in a Federalist System*, 1980 Ariz. St. L.J. 305; Areeda, *Antitrust Immunity for State Action After Lafayette*, 95 Harv. L. Rev. 435 (1981); Civiletti, *The Fallout from Communications Co. v. City of Boulder*, *32 Cath. U.L. Rev. 379 (1983)*. These decisions have also given rise to much litigation presenting serious and unsettled questions. *See e.g., Town of Hallie v. City of Eau Claire, 700 F.2d 376 (7th Cir. 1983)*, *cert. granted*, ***467 U.S. 1240, 104 S. Ct. 3508, 82 L. Ed. 2d 818, 52 U.S.L.W. 3891 (1984)***; *Central Iowa Refuse Systems v. Des Moines Metropolitan Solid Waste Agency, 715 F.2d 419 (8th Cir. 1983)*, *petition for cert. filed*, ***52 U.S.L.W. 3441*** (U.S. Nov. 18, 1983) (No. 83-825).

The City turned to the Ohio Water Development Agency ("OWDA") for assistance, and **[**5]** in September 1975, OWDA agreed to finance the project by issuing revenue bonds. When OWDA found that the bond issue could not be secured by the City's general fund, the proposed financing package was restructured with new underwriters. The new underwriters renegotiated steam supply contracts for the project and required the creation of a special contingency fund by the City and county governments to cover construction cost overruns. The underwriters also determined that the RES must be assured a steady supply of waste in order to market the bonds. Following this evaluation, the City and OWDA decided that it would be necessary to require, by ordinance, that all solid waste collected within the City limits be transported to the RES facility.

In 1976, the City and OWDA entered into a Cooperative Agreement to finance the RES project. Section 5.5 of the Agreement provides that the City ("LGA") covenants with the OWDA for the benefit of the bond holders that:

> I. For the term of this Agreement, the LGA shall require that all collectors and **[*952]** haulers of Solid Waste within the LGA be licensed by the LGA and all such licenses shall provide that all collectors or haulers **[**6]** of Solid Waste shall dispose of all Solid Waste generated within the corporate limits of the LGA which is acceptable for disposal by the Project to be delivered to the Project for disposal through the Project and require that such haulers and collectors and the LGA pay or cause to be paid the fees and charges imposed by the LGA for the disposal of Solid Wastes at the Project. The LGA will take all available action, administrative, judicial and legislative, to cause all Solid Waste generated within the corporate limits of the LGA and which is acceptable for disposal by the Project, to be delivered to the Project for disposal through the Project.

The Agreement further provides that the City would prohibit the establishment of alternative waste disposal sites. [2] In December 1976, the OWDA issued an Official Statement announcing the offering of $46,000,000 of special obligation bonds to finance the project. The Statement contained a copy of the Cooperative Agreement.

[7]** To carry out the terms of the Agreement, the Akron City Council adopted Ordinance No. 841-76 in October, 1976. The ordinance requires all rubbish collected within the corporate limits of the City to be deposited at the RES plant. The ordinance also authorizes the Director of Public Service to establish a service charge ("tipping fee") for disposal of solid waste at the RES facility. Persons who violate the ordinance may lose their licenses and face criminal prosecution. [3]

---

[2] Two other sections of the Agreement provide:

> H. The LGA will not establish, construct or operate nor consent to the establishment, construction or operation of any facility for the disposal or other treatment of Solid Waste which is acceptable for disposal by the Project, and further, to the extent legally permissible, it will oppose the establishment, construction or operation of such a facility. The LGA System shall not charge to or collect from the Project. . . .

> O. . . . The LGA shall use its best efforts to establish rates and charges for the disposal of Solid Waste through the Project at a level which assures an adequate supply of Solid Waste for the purpose of the Project and, subject to the foregoing, shall be comparable with competitive charges for such services. . . .

[3] *Section 1(a)* of the ordinance provides:

> Until such time as the City's recycle energy plant begins accepting rubbish for disposal, no rubbish shall be deposited by the Holder of a rubbish bailer's license within the corporate limits of the City except at a place designated in writing by the Mayor. From and after the date on which such plant begins accepting rubbish for disposal, all rubbish collected within the corporate limits of the City by a holder of a rubbish hauler's license shall be deposited at such plant; provided that rubbish which is not acceptable for disposal by such plant shall not be deposited within the City except at a place designated by the Mayor.

Section 2 provides:

> No person, except duly authorized collectors of the City or private haulers licensed pursuant to law, shall collect or remove any garbage or rubbish accumulating within the City or use the streets, avenues and alleys of the City for the purpose of collecting or transporting the same. All licenses granted to such private haulers and all contracts or other forms of authorization of duly authorized collectors shall require that all garbage or rubbish collected and transported under authority

[8]** Before the adoption of the ordinance, plaintiff Hybud Equipment Corp. was a licensed hauler of waste in the Akron area. Under agreements with various commercial and industrial firms, Hybud collected solid waste in return for a fee. An affiliated company, plaintiff Budoff Iron and Metal Corp., operated a transfer station that separated out recyclables -- primarily cardboard and metals -- to be sold. Nonrecyclable solid waste was transported to landfills where a tipping fee was charged to the haulers for each ton of waste disposed.

The ordinance affects the plaintiffs' business in several ways. All waste collected within the City limits must be transported to the RES plant and haulers must pay a uniform tipping fee to the RES plant. This exclusive right eliminates any possible competition among disposal sites within the **[*953]** City and prohibits haulers from seeking lower tipping fees at sites outside the City. Furthermore, the separation and sale of recyclable materials by collectors is curtailed by the ordinance. All solid waste -- including waste containing recyclables -- must be delivered to the RES facility. Recyclable materials may be burned as fuel or separated **[**9]** by the plant operator and sold to generate additional income. As part of an incentive agreement, the operator of the plant, Teledyne National, is permitted to retain one-half of all revenues recovered from the sale of recyclable materials. The remainder is to be used to offset operating expenses.

B. Prior Proceedings

The plaintiffs brought suit in federal court alleging that the ordinance and agreement deprived them of due process, constituted a restraint of commerce, and violated the Sherman Antitrust Act. In *Glenwillow Landfill, Inc. v. City of Akron, 485 F. Supp. 671 (N.D. Ohio 1979)*, the district court awarded summary judgment to the defendants on all issues.

The district court ruled that the defendants' activities were protected from antitrust liability under the state action exemption of *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*. The district court rested its decision on two alternative grounds. First, the court found that OWDA was acting for the state in advancing legitimate state interests. The restrictions in the Cooperative Agreement, the court found, were within OWDA's authority to finance **[**10]** solid waste facilities. This exercise of this state power, the court held, was beyond the reach of the antitrust laws. *485 F. Supp. at 676-77*. Second, the court found that the state of Ohio had authorized the City of Akron through its home-rule powers to regulate waste collection. "The Ohio Constitution declares that cities act as agents of the state when they exercise governmental powers within their city limits." *485 F. Supp. at 677*. The Ohio courts, moreover, had held that such power could lawfully be exerted through a monopoly. Therefore, the district court concluded, the state action exemption protected the City's exercise of state power.

The district court's decision was affirmed on appeal. *Hybud Equipment Corp. v. City of Akron, 654 F.2d 1187 (6th Cir. 1981)*. The collection of garbage and the operation of incineration plants, this court noted, were within the traditional activities of local governments. The home-rule provisions of the Ohio Constitution as interpreted by the State Supreme Court authorized municipal monopolies to carry out these functions. Moreover, an agency of the state, the OWDA, would oversee the exercise **[**11]** of this authority. Thus, this court held that the ordinance and agreement were immune from antitrust liability as actions of the state.

The Supreme Court granted the plaintiffs' petition for writ of certiorari and vacated this court's judgment. The case was remanded for consideration in light of the Court's decision in *Community Communications Co. v. City of Boulder, 455 U.S. 40, 70 L. Ed. 2d 810, 102 S. Ct. 835 (1982)*. *Hybud Equipment Corp. v. City of Akron, 455 U.S. 931, 71 L. Ed. 2d 640, 102 S. Ct. 1416 (1982)*. This court, in turn, remanded the case to the district court with instructions to reconsider only the plaintiffs' claims under the *Sherman Antitrust Act. 701 F.2d 178*.

On remand, the district court again held that the defendants' activities were protected by the state action exemption. Eschewing this court's reliance on Akron's home-rule powers, the district court found "sufficient grounds for antitrust exemption within the Ohio statutes governing the OWDA." The court found that these statutes demonstrated that the state legislature contemplated the anticompetitive consequences of OWDA's exercise of its bonding authority.

---

for disposal by the City's energy plant, be disposed of at such plant from and after the date on which such plant begins accepting garbage and rubbish for disposal.

[12]** This expression of state policy coupled with OWDA's supervision of the RES project, the district court held, shielded the City from liability under the federal antitrust laws and satisfied the requirements of *City of Boulder*. This determination is the sole issue now before us.

[*954] II.

A. The Development of the State Action Exemption.

The Supreme Court's decision in *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*, the original declaration of the state action exemption, continues to exert a strong influence on the recent development of that doctrine. [4] In *Parker*, the Court considered whether a state program restricting agricultural production could be attacked under the Sherman Act. Under California's Agricultural Prorate Act, the State Agricultural Prorate Advisory Commission authorized the creation of local cooperatives to establish marketing policies for raisin production. The Commission, appointed by the Governor pursuant to the statute, had to approve the cooperative's plans. To become effective, these plans then had to be ratified by a specified number of the producers in each area.

[13]** In *Parker*, the Court held that "nothing in the language of the Sherman Act or in its history . . . suggests that its purpose was to restrain a state or its officers or agents from activities directed by its legislature." *317 U.S. at 350-51*. Absent a clear indication from Congress, the States are entitled to immunity as an aspect of the federal system. "In a dual system of government in which, under the Constitution, the states are sovereign, save only as Congress may constitutionally subtract from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress." *Id. at 351*. The Court held that the prorate program was protected by this immunity. "It is the state which has created the machinery for establishing the prorate program." The participation of private producers and the referendum system did not detract from the character of the program. "The state itself exercises its legislative authority in making the regulation and in prescribing the conditions of its application. The required vote on the referendum is one of these conditions." *Id. at 352*. **[**14]**

The decisions following *Parker* have been primarily concerned with determining the nature and extent of state involvement necessary to establish the exemption. In *Goldfarb v. Virginia State Bar, 421 U.S. 773, 44 L. Ed. 2d 572, 95 S. Ct. 2004 (1975)*, the Court considered a challenge to minimum fee schedules established by a county bar association and enforced by the state bar. Although the state bar was a "state agency" for purposes of investigating and reporting violations of disciplinary rules, the final statutory authority for regulating the practice of law was vested in the state supreme court. The state supreme court, however, had not directed the establishment of such schedules. The Court rejected the argument that the schedules were protected because they "complemented the objectives of the ethical codes." To claim the protection of the exemption, "it is not enough that . . . anticompetitive conduct is 'prompted' by state action; rather the anticompetitive activities must be compelled by direction of the State acting as sovereign." *421 U.S. at 791*. Because the state, acting through the legislature or through the state supreme court, had **[**15]** not directed or authorized the anticompetitive action, the Court held that the schedules were not exempt from the Sherman Act as state action.

The implication of *Goldfarb* is that a rule adopted by a sovereign authority of the state would be entitled to antitrust immunity. The Court followed this reasoning in *Bates v. State Bar of Arizona, 433 U.S. 350, 53 L. Ed. 2d 810, 97 S. Ct. 2691, 45 U.S.L.W. 4895 (1977)*, and granted immunity to a rule adopted by the state supreme court banning the advertising of legal services. The measures, the Court held, "reflect a clear articulation of the State's policy with regard to professional **[*955]** behavior." The Court also found it significant that "the state policy is so clearly and affirmatively expressed and that the state's supervision is so active." *433 U.S. at 362*. The Court in *Bates* stressed the difference between the facts of that case and the situation presented in *Cantor v. Detroit Edison Co., 428 U.S. 579, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 (1976)*. In *Cantor* a state public utility commission approved a utility's practice of distributing light bulbs for no charge and passing **[**16]** the costs to consumers through their utility bills.

---

[4] "In the years since the decision in *Parker*, the Court has had occasion in several cases to determine the scope of the state action doctrine. It has never departed, however, from *Parker's* basic reasoning." *Hoover v. Ronwin, 466 U.S. 558, 104 S. Ct. 1989, 1995, 80 L. Ed. 2d 590 (1984)*.

The Court held that the commission's acquiescence in the program was insufficient to immunize the practice as state action. The Court found that the challenged program bore a remote relationship to the regulatory aims of the state, and, with respect to light bulb sales, there was no official state policy to displace competition.

In *Parker*, the anticompetitive conduct under attack was directed by the state legislature and supervised by state officers. In *Bates*, the rules in question were adopted by the state supreme court acting in its capacity as a legislative body with ultimate authority over the legal profession. In such cases, the challenged restraints are easily ascribed to the state as sovereign. Where the activity, however, "is not directly that of the legislature or supreme court, but is carried out by others pursuant to state authorization," the application of the exemption requires a more searching analysis. *Hoover v. Ronwin, 466 U.S. 558, 104 S. Ct. 1989, 1995, 80 L. Ed. 2d 590 (1984)*. In these cases, the Court has required a showing that the challenged restraint is "one clearly articulated **[**17]** and affirmatively expressed as state policy." *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*. *See also, City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 410, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978)*; *Community Communications Co., Inc. v. City of Boulder, 455 U.S. 40, 54, 70 L. Ed. 2d 810, 102 S. Ct. 835 (1982)*. The Court has also considered the degree to which the state "actively supervises" the policy. *Midcal Aluminum, 445 U.S. at 105*; *New Motor Vehicle Bd. v. Orrin W. Fox Co., 439 U.S. 96, 110, 58 L. Ed. 2d 361, 99 S. Ct. 403 (1978)*. Thus, a state law authorizing wine suppliers to establish and enforce resale prices is not exempt if the state fails to exercise active supervision over the arrangements. *Midcal Aluminum*.

B. Municipal Immunity.

In *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978)*, the Court held that Congress did not intend to exempt cities from the antitrust laws merely because of their status as political **[**18]** subdivisions of the states. At issue was a challenge to the practices of utilities owned and operated by two cities. Justice Brennan, writing for a plurality, held that only municipal actions "pursuant to state policy to displace competition with regulation or monopoly public service" would be entitled to the exemption. *435 U.S. at 413*. The Chief Justice, in a separate opinion, concurred with the plurality's holding that the activities under challenge were exempt only if they were the result of a state policy to displace competition. The Chief Justice reasoned, however, that such authorization was required because the cities were engaging in proprietary activities, implying that nonproprietary activities would be immune from antitrust attack without an inquiry into state policy. *435 U.S. at 423-26*.

The split decision in *Lafayette* produced no little confusion among lower courts. [5] **[*956]** Some of the questions raised in *Lafayette* were settled by the Court's decision in *Community Communications Co., Inc. v. City of Boulder, 455 U.S. 40, 70 L. Ed. 2d 810, 102 S. Ct. 835 (1982)*. In that case, the plaintiff challenged a three-month **[**19]** emergency ordinance imposing a moratorium on the extension of cable television services in Boulder. The City claimed that the moratorium was a proper exercise of its home-rule powers. Justice Brennan, writing for a majority, affirmed *Lafayette's* holding that cities are not automatically immune from antitrust liability. The Court, moreover, rejected the City's argument that its actions were protected as an exercise of state sovereign power delegated to the City. For purposes of the *Parker* exemption, sovereignty is exclusively reserved to the state and cannot be transferred to a political subdivision. Municipalities, the Court held, "could partake of the *Parker* exemption only to the extent that they acted pursuant to a clearly articulated and affirmatively expressed state policy." *Id. at 54*.

[20]** The City of Boulder maintained, in the alternative, that its actions were immune because the grant of home-rule powers by the state constitution met the requirement of "clear articulation and affirmative expression." This grant of authority, the City contended, demonstrated that the legislature "contemplated the kind of action" that was

---

[5] "Of late the state action doctrine has become a road well-traveled by the Court. Its signposts, however, remain less than clear." *First American Title Co. v. South Dakota Land Title Ass'n, 714 F.2d 1439 (8th Cir. 1983)*, *cert. denied*, ***464 U.S. 1042, 104 S. Ct. 709, 79 L. Ed. 2d 173 (1984)***. *See also Hybud Equipment Corp. v. City of Akron, 654 F.2d 1187, 1195 (6th Cir. 1981)* ("It is difficult for us to apply the *Lafayette* decision since the plurality and dissenting opinions are each supported by four justices, and no line of reasoning commands a majority of the Court.").

under attack. Again, the Court squarely rejected the City's position. The Court characterized the state's position as one of "mere neutrality." "A State that allows its municipalities to do as they please can hardly be said to have 'contemplated' the specific anticompetitive actions for which municipal liability is sought." *Id. at 55*. Accepting a general grant of legislative authority as a mandate for specific anticompetitive measures, the Court held, "would eviscerate the concepts of 'clear articulation and affirmative expression. '" *Id. at 56*.

The *Boulder* decision clarified the basis of municipal immunity. ***HN1***[] Whether a city is entitled to the *Parker* exemption depends not upon the proprietary character of the city's actions or whether the action is within the general powers delegated to the city by the state. Immunity would attach **[**21]** only if the measures were taken pursuant to a "clearly articulated and affirmatively expressed" state policy. Left unresolved, however, were related issues of critical importance. The Court reserved the question of whether a city's actions must also satisfy the test of "active state supervision." [6] Further, although it is clear that home-rule powers alone are insufficient, the Court did not describe what degree of specific statutory authorization is necessary to invoke the exemption. [7]

[22] C. Immunity for State Agencies.**

The plurality in *Lafayette* stressed that an exacting standard for municipalities was necessary to maintain economic order within a state and avoid a multitude of conflicts with national policy. "Serious economic dislocation" could result if each city were free to pursue its own parochial interests. *435 U.S. at 412-13*. This emphasis on economic atomization within a state suggests that a different standard might apply to agencies with state-wide jurisdiction. [8] Arguably, an agency with **[*957]** statewide powers, especially if it has authority to make policy, should not be required to show that its conduct was "pursuant to an affirmatively expressed and clearly articulated policy" to displace competition.

[23]** The Supreme Court discussed the standard applied to agencies in the recent case of *Hoover v. Ronwin, 466 U.S. 558, 104 S. Ct. 1989, 80 L. Ed. 2d 590 (1984)*. There, the Court considered an antitrust attack on the grading of bar examinations by the Arizona Supreme Court's Committee on Examinations and Admissions. In a four-to-three decision, the Court held that the actions of the Committee were, for purposes of the exemption, those of the "state acting as sovereign." The Court's decision turned on the special relationship between the committee and the state supreme court. The state supreme court "retained strict supervisory power over the committee and ultimate full authority over its actions." *Id. 104 S. Ct. at 1997*. Although the committee administered and graded the examinations, the "court itself approved the particular grading formula and retained the sole authority to determine who should be admitted to the practice of law in Arizona." *Id. at 1998*. Where such provisions are absent, the

---

[6] "Because we conclude in the present case that Boulder's moratorium ordinance does not satisfy the 'clear articulation and affirmative expression ' criterion, we do not reach the question whether that ordinance must or could satisfy the 'active state supervision ' test focused upon in *Midcal*." *City of Boulder, 455 U.S. at 51 n.14*.

[7] The Boulder decision could have a sweeping impact on the assertion of legislative authority by municipalities. Thirty-five states have made provisions for home-rule powers either through legislation or through their constitutions. Note, *Community Communications Co. v. City of Boulder*, 31 De Paul L. Rev. 819, 821 (1982).

[8]

> Although the *Lafayette* requirement of state authorization clearly applies to cities and other subordinate local units, its application to state agencies is uncertain. On the one hand, the majority's belief that "authorization" helps ensure that governmental activity is truly *state* action could logically be extended to state executive departments and administrative agencies. On the other hand, Justice Brennan's reasoning was predicated on the existence of a large number of municipalities and other subordinate governmental units, each pursuing parochial and perhaps conflicting policies. Their ordinances are locally formulated, with a possible anticompetitive impact beyond city or district limits . . . State agencies, by contract, formulate statewide rules and policies.

Areeda, *Antitrust Immunity for "State Action" After Lafayette*, 95 Harv. L. Rev. 435, 444 (1981).

challenged action cannot be attributed to the actions of the state as sovereign and the agency must satisfy the standard applied to municipalities. *HN2*[] "The **[**24]** anticompetitive conduct of a nonsovereign state representative . . . require[s] a showing that the conduct is pursuant to a 'clearly articulated and affirmatively expressed state policy ' to replace competition with regulation." *Id. at 1995*. The Court limited "sovereignty" to the state legislature and supreme court. The Court did not reach, however, the question of whether such sovereign authority may be attributed to the governor of a state. *Id. at 1995 n.17*.

In the case at bar, the parties do not contend that OWDA is so closely related to a sovereign body that the actions of the agency may be attributed directly to the state as sovereign. Thus, OWDA's actions are protected by the exemption only if taken pursuant to a "clearly articulated and affirmatively expressed state policy" to displace competition. With that standard in mind, we turn to consider the district court's precise holding in the instant case.

III.

A. The District Court's Decision.

On remand, the district court held that the statutes governing the OWDA demonstrated a "clearly articulated and affirmatively expressed state policy" to displace competition. The court found that "the cooperative **[**25]** agreement and ordinance in the present case were clearly 'comprehended within the powers granted ' by the state legislature" to OWDA. The state legislature's intent to displace competition was evinced by OWDA's authority "to finance waste disposal facilities and to enter into agreements to safeguard the financial interests of the respective governmental agencies." These provisions, the court held, provided a sufficient basis for the exemption; therefore, the court did not consider whether Akron's power under state law to regulate sanitation and waste disposal would satisfy the requirements for the exemption.

The OWDA was created to "provide for the comfort, health, safety, and general welfare of all employees and other inhabitants of the state . . . through efficient and proper methods" of solid waste disposal. *Ohio Rev. Code § 6123.03*. To this end, OWDA is authorized to finance solid waste facilities through revenue bonds to pay for the costs of such projects. The district **[*958]** court noted the following powers and duties of the OWDA:

> *HN3*[] For the purposes of Chapter 6123. of the Revised Code, the Ohio water development authority may:
> . . .
>
> (C) Make loans and grants **[**26]** to governmental agencies for the acquisition or construction of development projects by any such governmental agency and adopt rules and procedures for making such loans and grants;
> . . .
>
> (F) Issue development revenue bonds and notes and development revenue refunding bonds of the state, payable solely from revenues as provided in *section 6123.06* of the Revised Code, unless the bonds be refunded by refunding bonds, for the purpose of paying any part of the cost of one or more development projects or parts thereof;
> . . .
> (I) Make and enter into all contracts and agreements and execute all instruments necessary or incidental to the performance of its duties and the execution of its powers under Chapter 6123. . . .
> . . .
> (P) Do all acts necessary or proper to carry out the powers expressly granted in Chapter 6123. of the Revised Code.

Ohio Rev. Code § 6123.04. The OWDA may also contract with government agencies and private persons to fix the terms and conditions for the use or service of a facility financed by OWDA. *HN4*[] The statute provides:

> Any government agency or combination thereof may cooperate with the authority in the acquisition or construction of **[**27]** a development project and shall enter into such agreements with the authority as are necessary, with a view to effective cooperative action and safeguarding of the respective interests of the parties thereto, . . . including, without limitation, . . . contracting for the operation, leasing, or subleasing for

> such terms and with such person or governmental agency as maybe agreed upon . . . . The authority shall not enter into such a cooperative agreement with any governmental agency if the authority determines that the project to be acquired or constructed under the agreement would undermine the financial feasibility of an existing development project acquired or constructed under a cooperative agreement between the authority and another governmental agency because the proposed project would serve substantially the same geographic area as the existing project . . . .

Ohio Rev. Code § 6123.13.

The district court found it "unquestionable" that the legislature contemplated the "use of anti-competitive measures to ensure the financial viability of its waste disposal facilities." The court determined that OWDA's general authority to carry out powers expressly granted, that **[**28]** the agency's duty to protect its financial interests in development projects, and that the prohibition on the financing of facilities competing with existing projects demonstrated a clearly articulated and affirmatively expressed state policy to displace competition with regulation.

The district court relied on *Boulder* as authority for its holding that the ordinance and agreement under challenge were "clearly comprehended" within the powers granted OWDA. In *Boulder* the Court held that "the term 'granted' necessarily implies an affirmative addressing of the subject by the State." *455 U.S. at 55*. In *Boulder*, there was no specific grant of authority to regulate cable television from the state legislature; the city merely claimed the power under Colorado's Home Rule Amendment. By contrast, in the instant case there was a specific grant of power by the state to OWDA to operate in the area of waste disposal and recovery. This grant of authority, the district court ruled, satisfied the requirement that the challenged anticompetitive action result from a state policy.

[*959] B. Analysis.

The validity of the district court's finding that OWDA's **[**29]** statutory mandate met the standard of a clearly articulated and affirmatively expressed state policy turns on a crucial ambiguity in *Lafayette* and *Boulder*. In those decisions the Court left unclear the degree of specificity in state law necessary to satisfy the standard applied to a nonsovereign state representative. [9] A municipality, the plurality held in *Lafayette*, is not necessarily required "to point to a specific, detailed legislative authorization before it properly may assert a *Parker* defense." However, there must be evidence that the state "authorized or directed a given municipality to act as it did." *435 U.S. at 414*. It is clear, however, that merely having the legal authority to engage in the challenged activities is insufficient. The municipalities in *Lafayette* were authorized by state law to own and operate utilities, but this power standing alone did not protect the allegedly anticompetitive actions of those utilities. Likewise, the City of Boulder was empowered under state home-rule provisions to take the actions that were attacked under the antitrust laws. The city's power "to do as [it] please[s]," however, demonstrated only **[**30]** a "neutral" state policy regarding the ways and means that the city chose to exert its power. *455 U.S. at 55*.

---

[9] We noted this problem in *Gambrel v. Kentucky Bd. of Dentistry, 689 F.2d 612 (6th Cir. 1982)*, *cert. denied*, ***459 U.S. 1208, 103 S. Ct. 1198, 75 L. Ed. 2d 441 (1983)***.

> Because we believe the meaning of the statute in this case is clear and unambiguous, we need not decide a more subtle question, namely whether the interpretation of an ambiguous or open-ended regulatory statute by a state agency can ever constitute "state action" in and of itself under the *Parker v. Brown* doctrine. Certainly the first part of the *Midcal Aluminum* test, whether the challenged restraint is "clearly articulated and affirmatively expressed as state policy," at a minimum covers state policy explicitly declared in a statute. However, state regulatory statutes are often drafted in general terms and delegate broad policymaking discretion to a state regulatory agency. The result is administrative policymaking, either by authorized rulemaking or by enforcement practices.

689 F.2d at 619 n. 3.

[31]** OWDA's authority to engage in the actions under challenge is somewhere in between a specific state directive and a general, "neutral" grant of powers. Although OWDA may have the power to enter into the agreement now in issue, the statute clearly does not express a state preference for regulation -- or monopolistic control -- of waste disposal. OWDA's existence and function are perfectly consistent with a regime of open and free competition among private businesses that engage in waste disposal. Nothing in the statute declares a state policy regarding the organization of municipal waste disposal systems. As to the type of projects OWDA may finance -- whether the projects monopolize or merely compete with private industry -- the statute is silent. On the other hand, OWDA is authorized to promote the development of "safe and proper" waste disposal projects. To finance such developments, the agency is empowered to enter agreements "necessary or incidental" to the performance of its duties.

There is no question that a restraint which is expressly set forth in a legislative scheme for regulation is one that reflects a state policy to displace competition. *See, e.g., California* **[**32]** *Retail Liquor Dealers Ass'n v. Midcal Aluminum, 445 U.S. 97, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*. [10] **[**33]** ***HN5***[] Where the restraint is not so expressed but is imposed by a nonsovereign state representative as an exercise of delegated powers, **[*960]** the court must examine the relationship between the restraint and the regulatory aims of the state. If the challenged actions bear an attenuated relationship to the statutory aims and the express powers so delegated, the actions cannot be deemed to have resulted from a clearly articulated and affirmatively expressed state policy to displace competition. For example, public regulation of utilities is justified as necessary to protect consumers from exploitation by a natural monopoly. This justification, however, will not support regulation that reaches beyond the scope of a natural monopoly's powers into competitive markets. Absent express legislative direction for such a restraint, the regulation is not protected as state action under *Parker.* *Cantor v. Detroit Edison, 428 U.S. 579, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 (1976)*. [11]

HN6[]

If the challenged anticompetitive restraint of a nonsovereign state representative, for which there is no express statutory provision, is necessary to carry out the representative's mandate, then a legislative intent to displace competition may be inferred from the legislature's delegation of authority. In *Corey v. Look, 641 F.2d 32 (1st Cir. 1981)*, the plaintiff, a parking lot operator, brought an antitrust suit against a municipality and a public steamship authority. The plaintiff claimed that the town and authority had conspired to drive the plaintiff out of business in an effort to monopolize the market. The First Circuit held that the government bodies must demonstrate "by convincing reasoning that the challenged restraint is necessary to the successful operation of the legislative **[**34]** scheme that the state as sovereign had established." This test was not satisfied by a showing that the authority was permitted, under state law, to purchase and operate parking lots. The law "simply empowers the Authority to behave as an ordinary competitive economic agent; we see no necessary anti-competitive implication." *Id. at 37*.

Requiring a showing of a necessary relationship, as in *Corey v. Look*, may place, in some circumstances, an unduly heavy burden on the state agency. An agency vested with broad discretionary powers will rarely find that only one course of action is available to accomplish its mission. Courts, moreover, are ill-equipped to determine in many cases whether a restraint was necessary in the strict sense implied by the court in *Corey v. Look*. Indeed, that decision may be explained on the grounds that the challenged actions -- monopolization of parking lots -- bore a

[10] For example, in *Town of Hallie v. City of Eau Claire, 700 F.2d 376, 383 (7th Cir. 1983)*, *cert. granted*, ***467 U.S. 1240, 104 S. Ct. 3508, 82 L. Ed. 2d 818, 52 U.S.L.W. 3891***, (1984), the court upheld the exemption for a municipality that conditioned extension of sewer service on annexation. A state statute expressly provided that extension of sewer services could be refused if an adjoining area elected not be become annexed. In *Gambrel v. Kentucky Bd. of Dentistry, 689 F.2d 612, 619 (6th Cir. 1982)*, *cert. denied*, ***459 U.S. 1208, 103 S. Ct. 1198, 75 L. Ed. 2d 441 (1983)***, this court applied the exemption to protect a restraint on denture products where the challenged conduct was "compelled by the statute itself."

[11] Similarly, state law authorizing a medical society to investigate charges of willful overcharging by physicians will not extend to justify society's efforts to enforce price-fixing. *Ratino v. Medical Service of Dist. of Columbia, 718 F.2d 1260, 1268 (4th Cir. 1983)*.

tenuous relationship to the central mission of the steamship authority. The Supreme Court, moreover, has not required a showing of necessity, holding that ***HN7***[] an adequate expression of state policy may be found in "the authority given a governmental entity to operate **[**35]** in a particular area, that the legislature contemplated the kind of action complained of." *Lafayette, 435 U.S. at 415*. [12]

Our task, therefore, is to determine whether the restraints in question are a reasonable and foreseeable exercise of delegated powers within the scope of an agency's authority. [13] **[**36]** If the challenged restraints **[*961]** are reasonably related to an agency's express powers and reasonably designed to promote the state aims within a designated field of regulation, they can be found to result from a "clearly and affirmatively expressed state policy" to displace competition. [14]

[37]** Unlike the general guarantee of legislative autonomy in *Boulder*, OWDA's powers are expressly limited to the promotion of safe waste disposal systems. OWDA's exercise of this power, however, is restricted to the financing of waste treatment projects; it has no independent regulatory authority. The agency could not enforce the restrictive agreement now under challenge without the regulatory power of the City of Akron. Thus, OWDA's participation in a private scheme to monopolize a waste disposal market would not be entitled to the *Parker* exemption.

Although we cannot agree with the district court that the statutes governing OWDA meet the requirement of a clear and affirmative state policy, we find that the standard is satisfied by other considerations. OWDA's statutory mandate expressly provides that the agency may contract with other government agencies, including municipalities, to carry out state policy. [15] ***HN8***[] Under Ohio law, municipalities are expressly authorized to regulate the disposal

---

[12] "The state need not have contemplated the precise action complained of as long as it contemplated the kind of action to which objection was made." *Princeton Community Phone Book, Inc. v. Bate, 582 F.2d 706, 717* (3rd Cir.), *cert. denied*, ***439 U.S. 966, 58 L. Ed. 2d 424, 99 S. Ct. 454 (1978)***.

[13] Professor Areeda, in an article prior to *Boulder*, writes:

> *Lafayette* does not require that governmental acts be "compelled" or supervised by the state. Rather, it demands that the legislature have authorized the challenged activity with an intent to displace the antitrust laws. Unfortunately, state statutes seldom speak with clarity on either matter. In practice, therefore, express statements of authority or intent cannot be required. The Supreme Court has found it sufficient that "the legislature contemplated the kind of action complained of." A policy to displace the antitrust laws will then be inferred if the challenged restraint of competition is a necessary or reasonable consequence of engaging in the authorized activity.

Areeda, *Antitrust Immunity for "State Action" After Lafayette*, 95 Harv. L. Rev. 435, 445-46 (1981). *See also* P. Areeda, ***Antitrust Law***, para. 212.3 (Supp. 1981).

[14] Several courts have adopted this approach. In *Gold Cross Ambulance & Transfer v. City of Kansas City, 705 F.2d 1005 (8th Cir. 1983)*, *petition for cert. filed*, ***52 U.S.L.W. 3039*** (U.S. July 25, 1983) (No. 83-138), the court considered a challenge to a city's decision to grant a contract for exclusive ambulance services within the city to a single operator. The court held that a "sufficient state policy to displace competition exists if the challenged restraint is a necessary or reasonable consequence of engaging in the authorized activity." State law permitted the city to contract with "one or more" ambulance operators. The court held that the city's actions were protected by the exemption because monopoly service is "the necessary consequence of having only one municipal ambulance operator." *705 F.2d at 1013*. *Accord* *First American Title Co. v. South Dakota Land Title Ass'n, 714 F.2d 1439, 1454 (8th Cir. 1983)*, *cert. denied*, ***464 U.S. 1042, 104 S. Ct. 709, 79 L. Ed. 2d 173 (1984)***. *See also* *Benson v. Arizona State Bd. of Dental Examiners, 673 F.2d 272 (9th Cir. 1982)* (anticompetitive restraints contemplated by statutes creating a licensing board to regulate the practice of dentistry); *Euster v. Eagle Downs Racing Ass'n, 677 F.2d 992, 995* (3rd Cir.), *cert. denied*, ***450 U.S. 1022, 103 S. Ct. 388, 74 L. Ed. 2d 519 (1982)*** (imposition of a fee on jockeys by public agency is necessary to accomplish legislative goals of regulation of horse racing.).

of waste and construct facilities for the disposal of waste. [16] This authority is granted by statute and not merely claimed by virtue of constitutional home-rule powers as in *Boulder* **[**38]** . The Ohio courts, as the district court noted in its first decision in this suit, have held that a municipality may exercise this power through a monopoly. *See* *State ex rel. Moock v. Cincinnati, 120 Ohio St. 500, 166 N.E. 583 (1929)*; *City of Canton v. Van Voorhis, 61 Ohio App. 419, 22 N.E.2d 651, 14 Ohio Op. 413 (1939)*.

[39]** We find that the ordinance and agreement under challenge bear a reasonable relationship to the state policy promoted by OWDA and the express powers delegated to OWDA and Akron. The ordinance is limited in scope to the collection and disposal of solid waste, and its promulgation was an essential element of a plan to carry out OWDA's statutory mandate. **[*962]** OWDA's reliance on the statutory authority of a municipality to regulate -- even by monopoly -- the disposal of refuse was a foreseeable result of the legislative grant of power to contract with municipalities. We hold, therefore, that the statutory delegation of regulatory power to the City conjoined with the powers and aims of OWDA satisfy the requirement that the challenged actions result from a clearly articulated and affirmatively stated policy to displace competition.

Our holding is consistent with that of the Seventh Circuit in *Central Iowa Refuse Systems, Inc. v. Des Moines Metropolitan Solid Waste Agency, 715 F.2d 419 (8th Cir. 1983)*, *petition for cert. filed*, *52 U.S.L.W. 3441* (U.S. Nov. 18, 1983) (No. 83-825), a case strikingly similar to the one now before us. In that case, **[**40]** several municipalities joined together to establish an agency, "Metro," to issue revenue bonds for the construction of a modern waste disposal facility. On the recommendation of a bond consultant, the municipalities covenanted for the benefit of bond holders that all waste generated within their jurisdictions would be processed at the facility. An operator of a sanitary landfill outside the jurisdiction of the new plant brought suit, alleging that the cities had attempted to illegally monopolize the market for waste disposal. The court held that the restriction was protected by the state action exemption.

The court noted that, while statutes authorized the creation of agencies such as Metro, no statute indicated that the state legislature actually contemplated that a facility financed by such an agency would have an exclusive right to dispose of waste. *Id. at 426*. However, the court found authorization for the restriction in the broad authority granted such agencies by the state legislature.

> We believe that the Iowa legislature did indeed contemplate these restrictions on competition. [A statutory provision] expressly authorizes municipalities to finance **[**41]** collective projects by issuing revenue bonds. When ascertaining what was in the minds of the legislators, we cannot ignore the realities of the municipal bond market in the mid-1970s. . . . Common sense and experience suggest that the Iowa legislature must have intended Metro to have the latitude necessary to promote the sale of the bonds. . . . In short, even though the legislation does not speak to the precise question whether restraints of trade could be employed to guarantee the financial vitality of Metro, the comprehensive legislative scheme favoring the development of solid waste facilities demonstrates that the legislature intended the localities to have broad authority to act in

---

[15] ***HN9***[] OWDA is expressly authorized to enter into cooperative agreements with government agencies for the financing of development projects. The term 'government agency ' includes any county, town, or municipality of the state. *Ohio Rev. Code Ann. § 6123.01(A)*.

[16] ***HN10***[] *Ohio Rev. Code Ann. § 715.43* provides:

> Any municipal corporation may provide for the collection and disposition of sewage, garbage, ashes, animal and vegetable refuse, dead animals, and animal offal, and may establish, maintain, and regulate plants for the disposal thereof.

HN11[]

Ohio Rev. Code Ann. § 717.01 provides:

> Each municipal corporation may:
>
> (C) Erect a crematory or provide other means for disposing of garbage or refuse, and erect public comfort stations. . . .

> furtherance of the legislative mandate. Thus, we believe that the restraint on competition was a "necessary or reasonable consequence" of engaging in the authorized activity of constructing a waste disposal facility with funds raised by revenue bonds.

715 F.2d at 427. The court distinguished the case from *Boulder*. The Iowa legislature had provided that municipalities could join together to create agencies such as Metro. Such an agency could satisfy a municipality's **[**42]** duty to provide sanitary facilities for the disposal of solid waste. By contrast, in *Boulder* there was no reference in state law to the types of industry to be regulated under Colorado's home-rule provision.

We agree with the reasoning in *Central Iowa Refuse Systems, Inc.*, that a state's broad authorization for the financing of waste facilities is not a "neutral" grant of powers as in *Boulder*. ***HN12***[] Where, as in the instant case, there is a reasonable exercise of that authorization within a municipality's statutory power to regulate waste disposal, we are satisfied that the restraint is pursuant to the clear articulation and affirmative expression of state policy required by precedent.

C. Active State Supervision.

As noted earlier, the Supreme Court has not yet determined whether a municipal ordinance that satisfies the criterion of "clear articulation and affirmative expression" **[*963]** must also meet the requirement of active state supervision to be entitled to the state action exemption. *See* Boulder, 455 U.S. at 51 n.14. The several circuits that have considered this issue have held that active state supervision is not necessary where **[**43]** the challenged activity is within a traditional function of a municipality. *See* *Golden State Transit Corp. v. City of Los Angeles, 726 F.2d 1430 (9th Cir. 1984)*; *Gold Cross Ambulance & Transfer v. City of Kansas City, 705 F.2d 1005 (8th Cir. 1983)*, *petition for cert. filed*, *52 U.S.L.W. 3039* (U.S. July 25, 1983) (No. 83-138); *Town of Hallie v. City of Eau Claire, 700 F.2d 376 (7th Cir. 1983)*, *cert. granted*, *467 U.S. 1240, 104 S. Ct. 3508, 82 L. Ed. 2d 818, 52 U.S.L.W. 3891 (U.S. 1984)*.

The requirement of active state supervision had its greatest force in *California Retail Liquor Dealers Association v. Midcal Aluminum, Inc., 445 U.S. 97, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*. In that case, a state statute authorized wine wholesalers to file price schedules, and retailers were required to comply with those prices. These price controls were clearly imposed by state law, but the state exercised no control or supervision over the system. Although the restraints resulted from an undeniable state policy to displace competition, the Court held that the activities were not protected **[**44]** by the exemption because of the absence of active state supervision over the regulatory scheme.

The fact that the price restraints at issue in *Midcal* were established by private parties lead some courts and commentators to conclude that the requirement of active state supervision was limited to the activities of private parties. [17] **[**45]** In *Midcal* the Court seemed primarily concerned with the risks of private abuse of state-created regulatory schemes. [18] This danger is diminished where the challenged activities are undertaken by state agencies that are not tempted by private gain. Requiring active state supervision may also undermine the traditional functions of self-governing municipalities. Imposing such a requirement on municipalities, one court declared,

---

[17] *See* *Central Iowa Refuse Sys. v. Des Moines Metropolitan Solid Waste Agency, 715 F.2d 419, 428 (8th Cir. 1983)*, *petition for cert. filed*, ***52 U.S.L.W. 3441*** (U.S. Nov. 18, 1983) (No. 83-825); *Town of Hallie v. City of Eau Claire, 700 F.2d 376 (7th Cir. 1983)*, *cert. granted*, ***467 U.S. 1240, 104 S. Ct. 3508, 82 L. Ed. 2d 818, 52 U.S.L.W. 3891 (1984)***. *See also* Areeda, *Antitrust Immunity for "State Action" After Lafayette*, 95 Harv. L. Rev. 435, 445 (1981); Rogers, *Municipal Antitrust Liability in a Federalist System*, 1980 Ariz. St. L.J. 305, 340-42.

[18] In *Midcal* the Court concluded: "The national policy in favor of competition cannot be thwarted by casting such a gauzy cloak of state involvement over what it essentially a private price-fixing arrangement." 445 U.S. at 106.

"would erode the concept of local autonomy and home rule authority." Town of Hallie v. City of Eau Claire, 700 F.2d at 384.

While there are reasons in logic and in policy for the distinction between state and private actors, there is slight support for such a position in the opinions of the Supreme Court. In its most recent discussion of the requirement, *Hoover v. Ronwin*, the Court made no distinction between state and private actors, referring only to the activities of a "nonsovereign state representative." The Court stated that the "degree to which the state legislature or supreme court supervises its representative is relevant" to a determination of whether the conduct is protected by the *Parker* exemption. 104 S. Ct. at 1995. In *Bates v. State Bar of Arizona*, the Court noted that the restraint under attack was subject to pointed reexamination by the state supreme court, a fact that the Court characterized as active state supervision. 433 U.S. at 362. **[**46]**

The Court in *Hoover v. Ronwin* mentions supervision by the state legislature or supreme court. Yet, where the inquiry is relevant, it would be extremely impractical to limit "active state supervision" to the oversight by those bodies. By necessity, actual supervision must be delegated to subordinate officials. In *Parker*, the price support system was administered by the state's director of agriculture and a commission **[*964]** appointed by the governor. In New Motor Vehicle Bd. v. Orrin W. Fox Co., 439 U.S. 96, 58 L. Ed. 2d 361, 99 S. Ct. 403 (1978), the Court applied the exemption to protect a state's automobile franchise act from a challenge under the antitrust laws. The law permitted existing franchisees to block the establishment of new competitors merely by filing a complaint with a state board, which would permit entry thereafter upon a showing of good cause. The act itself was a system of regulation clearly designed to displace competition. The interim restraints imposed by the objections of existing franchisees, the Court noted, were subject to the board's "ongoing regulatory supervision." 439 U.S. at 110.

We believe that it **[**47]** is unnecessary and inappropriate in this case to establish strict rules setting forth the circumstances requiring rigorous application of the test of state supervision. ***HN13***[] Where a suit challenges the particular exercise of state power, the court should consider the nature and extent of supervision by the state as part of the general inquiry into whether the challenged actions are those of the state as sovereign. *See Hoover v. Ronwin*. The court should give close scrutiny to the existence of supervision where the circumstances indicate the possibility of an improper exercise of that power. *See New Motor Vehicle Bd.; Midcal Aluminum*.

We find that the participation of OWDA in the agreement and in the continued operation of the RES satisfies the concerns underlying the test of active state supervision. OWDA's participation in the agreement insures that the exclusive rights granted the facility were designed to meet the legislative goals set forth in OWDA's mandate. As the district court noted, the cooperative agreement requires periodic reporting to OWDA and authorizes the agency to assume operating responsibility for the RES should the City fail to meet its obligations under **[**48]** the agreement. OWDA's interest and duty to protect the bond owners is an important safeguard against the abuses that motivated the decision in *Midcal*.

For the foregoing reasons, the judgment of the district court is AFFIRMED.

Concur by: MERRITT

Concur

MERRITT, Circuit Judge, concurring.

I agree with the Court's holding and its reasoning in this case in full: the financing authority for solid waste projects expressly granted to the Ohio Water Development Agency, when joined with the city's expressly granted authority to regulate garbage disposal, establishes a clearly expressed state policy permitting a municipal monopoly over garbage disposal. I agree also that the state supervision requirement is met by the Water Development Agency's authority to enforce its contract with the city requiring the displacement of competition.

In addition, it seems to me that the city's powers, standing alone, are sufficient to satisfy the state action exemption. The State Legislature in Ohio has expressly granted to the city the authority to "regulate" garbage disposal, including the authority to "establish" and "maintain" garbage disposal plants. The Legislature has delegated to the chief legislative **[**49]** body of the city the power to set policy on waste disposal and to oversee the implementation of that policy. The Legislature gives the city both the power to go into the garbage disposal business itself and the power to control competitors by law -- hence the power to monopolize. This state delegation to the local legislative body of the power to monopolize and the power to implement and oversee the operation of the monopoly is sufficient to satisfy the "active state supervision" aspect of the state action test as well as the state delegation aspect.

Lemelson v. Bendix Corp.

United States District Court for the District of Delaware

August 24, 1984

Civil Action No. 82-308 CMW

Reporter

104 F.R.D. 13 *; 1984 U.S. Dist. LEXIS 24106 **; 39 Fed. R. Serv. 2d (Callaghan) 1312; 1984-2 Trade Cas. (CCH) P66,303

Jerome H. LEMELSON, Plaintiff, v. The BENDIX Corp. and Brown & Sharpe Manufacturing Co., Defendants

Core Terms

settlement, attorney-client, conspiracy, documents, license, patents, motion to compel, prima facie case, work product doctrine, negotiate, anti trust law, joint defense, infringed, machines, work product protection, burden of establishing

Civil Procedure > ... > Discovery > Privileged Communications > General Overview

Civil Procedure > ... > Privileged Communications > Work Product Doctrine > General Overview

Evidence > Privileges > Attorney-Client Privilege > General Overview

HN1[] **Discovery, Methods of Discovery**

In determining a plaintiff's motion to compel discovery, the first and most obvious point is that the parties who invoke the attorney-client privilege have the burden of establishing both the existence of the attorney-client relationship and the confidential nature of the communication. Similarly, the party claiming work product protection must show that the disputed documents were prepared in anticipation of litigation or for trial by or for that party or by or for that party's representative. Often, the determination of whether documents are protected by the work product doctrine and the attorney-client privilege is made by in camera inspection.

Civil Procedure > Attorneys > General Overview

Evidence > Privileges > Attorney-Client Privilege > Exceptions

Civil Procedure > ... > Discovery > Privileged Communications > General Overview

Civil Procedure > ... > Privileged Communications > Work Product Doctrine > General Overview

HN2[] **Civil Procedure, Attorneys**

Typically, work product protection can be overcome only by a showing that the party seeking discovery has substantial need of the materials in preparation of his case and that he is unable without undue hardship to obtain the substantial equivalent of the materials by other means. In addition, both the attorney-client privilege and work product protection can be overcome by a showing that the documents claimed to be protected were made in furtherance of a crime of fraud. In order to overcome work product and attorney-client protection through the crime/fraud exception, the moving party bears the burden of showing: (1) a prima facie case of crime or fraud (such as to subject the opposing party to the risk of non-persuasion if the evidence as to the disputed fact is left unrebutted), and (2) that the communications were made in furtherance of the fraud.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN3[] **Types of Contracts, Settlement Agreements**

A prima facie case of conspiracy can be established by either direct or circumstantial evidence showing an agreement among defendants refusing to take a license or to negotiate with a plaintiff. It could also be shown by evidence of an agreement not to take any action with respect to settlement or licensing without notifying and seeking the approval of the other members of the conspiracy.

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > Licenses

HN4[] **Conveyances, Licenses**

Unless a plaintiff can prove that each participating member of the group agreed, as alleged, not to recognize the validity of the patent and not to accept licensing except upon terms approved by the group, the plaintiff's antitrust claim must fail. The crucial inquiry is whether plaintiff has produced evidence of an agreement among defendants which had the effect of restraining individual freedom of action and preventing settlement negotiations or licensing except upon terms acceptable to the group.

Opinion by: WRIGHT

Opinion

[*14] Memorandum Opinion

WRIGHT, Sr. Judge.

This action was filed by plaintiff Jerome H. Lemelson (hereinafter "Lemelson") against defendants The Bendix Corporation (hereinafter "Bendix") and Brown & Sharpe Manufacturing Company (hereinafter "Brown & Sharpe") on June 1, 1982. The complaint essentially alleges that Bendix and Brown & Sharpe unlawfully "combined and conspired with one another to boycott Lemelson" and refused to negotiate independently with Lemelson **[**2]** to take a license under his patents in violation of the antitrust laws. (Complaint para. 17) (Dkt.No. 1). The answers of defendants deny the material allegations of the complaint.

Presently pending before the Court is plaintiff's motion to compel the production of certain documents which the defendants and the United States Government claim to be protected by the attorney-client privilege and work product doctrine. The documents at issue have been submitted to the Court for *in camera* inspection. After a careful review of those documents, the Court finds that defendants and the government have generally met their burden of establishing that the documents are protected by the attorney-client privilege and work product doctrine. The Court also finds that plaintiff has not met his burden of establishing a prima facie case of conspiracy to violate the antitrust laws sufficient to vitiate attorney-client or work product protection. Accordingly, an order will be entered denying plaintiff's motion to compel with respect to most of the documents in issue.

FACTS

This case has a long and complicated factual history. However, for purposes of this motion, the Court believes that **[**3]** a brief summary of the relevant events will be sufficient. Plaintiff, a holder of numerous patents, began in the late 1960s to contact various manufacturers of coordinate measuring machines, including defendants, in an attempt to induce these manufacturers to take a license under certain patents which plaintiff believed to be infringed by these machines. From 1969 to 1973, there were numerous contacts between plaintiff and defendants regarding whether defendants would take a license under plaintiff's **[*15]** patents. Both defendants persistently refused to take a license, believing that plaintiff's patents were invalid and that their machines were non-infringing. *See* Exhibit A to Plaintiff's Opening Brief in Support of His Motion to Compel (Dkt. No. 134). From 1973 to 1979, there was no apparent contact between plaintiff and defendants. During that period of time, defendants marketed computer-controlled coordinate measuring machines (hereinafter "CCMMs") and sold them, *inter alia,* to the United States Navy, Army, DOE and NASA. [1] Plaintiff, believing his patents to be infringed, filed an administrative claim with the Navy. In 1979, with his administrative claim still **[**4]** unresolved, he brought suit in the United States Claims Court. Both Bendix and Brown & Sharpe voluntarily entered that suit as third-party defendants.

After the Claims Court litigation was filed, plaintiff, in December, 1979, again wrote to both defendants, seeking a license and a settlement of his patent infringement claims. In January, 1980, Bendix responded, indicating again that, while the company was willing to discuss settlement, it did not believe that plaintiff's patents were valid or that its machines infringed plaintiff's patents. Subsequent discussions did not result in settlement. *See* Exhibit B-1 to Plaintiff's Opening Brief in Support of His Motion to Compel (Dkt. No. 134). In March, 1980, the law firm of Barlow & Barlow, outside **[**5]** counsel for Brown & Sharpe, responded to plaintiff, stating that, while there was no basis for plaintiff's claims, they were willing to discuss the matter. Settlement discussions with Brown & Sharpe also occurred; however, plaintiff's demands again were refused. *See* Appendix A to Brief of Brown & Sharpe in Opposition to Plaintiff's Motion to Compel (Dkt. No. 139) (Deposition of William Jackson).

In March, 1980, the law firm of Pennie & Edmonds filed an appearance on behalf of both defendants in the Claims Court litigation. On April 7, 1980, John Kidd, a partner at Pennie & Edmonds, and lead counsel in the Claims Court litigation, wrote to William Jackson, plaintiff's attorney in the Claims Court litigation, objecting to Jackson's direct contact with the parties. *See* Exhibit A-2 to Plaintiff's Opening Brief in Support of His Motion to Compel (Dkt. No. 134). Plaintiff alleges that the appearance of Pennie & Edmonds as joint counsel, and the letter of Kidd dated April 7, 1980, resulted in the frustration of promising settlement discussions and the prevention of direct discussions between plaintiff and each of the defendants. Defendants allege that direct discussions with **[**6]** each defendant continued to occur and that the joint counsel arrangement in the Claims Court litigation did not interfere with their individual freedom of action in pursuing settlement with plaintiff.

Subsequent to the appearance of Pennie & Edmonds as joint counsel in the Claims Court litigation, settlement discussions with each defendant did in fact occur. [2] **[**8]** **[*16]** However, plaintiff's subsequent offers were

---

[1] According to plaintiff, defendants are the leading United States manufacturers of CCMMs and account for substantially more than one-half of such sales in the United States. *See* Plaintiff's Opening Brief in Support of His Motion to Compel at 5 (Dkt. No. 37).

[2] Plaintiff's settlement discussions with Brown & Sharpe after the appearance of Pennie & Edmonds as joint counsel are set out in Brown & Sharpe's Brief in Opposition to Plaintiff's Motion to Compel at 6 (Dkt. No. 139). According to Jackson, individual settlement discussions with officers of Brown & Sharpe took place without the presence of joint counsel on several occasions. In the late spring or summer of 1980, Jackson met with Richard Duncan, Brown & Sharpe's Treasurer, at the offices of Brown & Sharpe in Rhode Island. At that meeting, Duncan refused plaintiff's demand of $350,000. In February of 1981, plaintiff made a demand of $500,000; this offer expired without acceptance. On June 25, 1981, plaintiff and Jackson met with James Hayes, in house counsel for Brown & Sharpe, in New York. At that meeting, Hayes offered $15,000 and plaintiff refused. Subsequent discussions did not produce a settlement; but even during the Claims Court trial, Jackson was told by Kidd to contact Hayes if he wanted to discuss settlement with Brown & Sharpe.

Plaintiff's settlement discussions with Bendix after the appearance of Pennie & Edmonds are set out in Exhibit A to Bendix's Answering Brief in Opposition to Plaintiff's Motion to Compel (Dkt. No. 140) (Jackson deposition). At Jackson's request, rejected and the Claims Court trial commenced. The Claims Court, in an Opinion dated June 26, 1983, rejected plaintiff's claims and held that the machines sold by defendants and used by the government did not infringe plaintiff's patents. [3] *See* Lemelson v. United States, 3 Cl.Ct. 161 (1983). Before the Claims Court rendered its decision, plaintiff sued defendants in this District, alleging a conspiracy in violation of Section One of the Sherman Act. [4] The present motion to compel was filed in an attempt to uncover evidence to support plaintiff's allegations. Plaintiff argues that he has established a prima facie case of conspiracy and that any protection afforded to the documents submitted to the Court for *in camera* inspection by the attorney-client privilege **[**7]** or work product doctrine has been vitiated. Defendants claim that no prima facie case of conspiracy has been established and that the protection afforded by the attorney-client privilege and work product doctrine remains intact. For the reasons discussed below, the Court agrees with defendants.

Discussion

HN1[] In determining plaintiff's motion to compel, the first and most obvious point **[**9]** is that the parties who invoke the attorney-client privilege have the burden of establishing both the existence of the attorney-client relationship and the confidential nature of the communication. *See, e.g.,* U.S. v. Flores, 628 F.2d 521, 526 (9th Cir. 1980); U.S. v. Kelly, 569 F.2d 928, 938 (5th Cir. 1978). Similarly, the party claiming work product protection must show that the disputed documents were prepared in anticipation of litigation or for trial by or for that party or by or for that party's representative. *Fed.R.Civ.P. 26(b)(3)*. Often, as in this case, the determination of whether documents are protected by the work product doctrine and the attorney-client privilege is made by *in camera* inspection.

HN2[] Typically, work product protection can be overcome only by a showing "that the party seeking discovery has substantial need of the materials in preparation of his case and that he is unable without undue hardship to obtain the substantial equivalent of the materials by other means." *Fed.R.Civ.P. 26(b)(3)*. In addition, both the attorney-client privilege and work product protection can be overcome by a showing that the documents claimed to be protected were made **[**10]** in furtherance of a crime of fraud. *See* In re Grand Jury Proceedings, 604 F.2d 798, 802-03 (3d Cir. 1979) (crime/fraud exception applies to both work product doctrine and attorney-client privilege); Hercules, Inc. v. Exxon Corp., 434 F. Supp. 136, 155 (D.Del. 1977) (same). In order to overcome work product and attorney-client protection through the crime/fraud exception, the moving party bears the burden of showing: (1) a prima facie case of crime or fraud ("such as to subject the opposing party to the risk of non-persuasion if the evidence as to the **[*17]** disputed fact is left unrebutted"), [5] and (2) that the communications were made in furtherance of the fraud. Id. at 155.

---

settlement discussions with Kenneth Seaman, in house counsel for Bendix, took place without the presence of joint counsel on numerous occasions. As a result of these discussions, a meeting between plaintiff and officers of Bendix was held in New York without counsel for either side in attendance. That meeting failed to produce a settlement; however, even during the Claims Court trial, Jackson was told by Kidd to contact H. G. Massung, in house counsel for Bendix, if he wanted to discuss settlement with Bendix.

[3] That decision is now on appeal before the Court of Appeals for the Federal Circuit. Oral argument before the Federal Circuit was held on March 6, 1984 and the parties now await a decision by that Court.

[4] At this point in the litigation, plaintiff primarily relies on the following facts to establish his claim of conspiracy: (1) the December 7, 1979 meeting of defendants in which they agreed that "a strong unified approach against Mr. Lemelson is mandatory"; (2) the government attorney's comments during a March 25, 1980 telephone conversation that plaintiff would face a "united front"; (3) the March, 1980, appearance of Pennie & Edmonds as joint counsel and Kidd's objection, by letter dated April 7, 1980, to direct discussions between Jackson and defendants; and (4) various occasions on which settlement information relating to one defendant was exchanged or made known to the other defendant. *See* Plaintiff's Supplemental Memorandum in Support of His Motion to Compel at 3-6 (Dkt. No. 164).

[5] Some courts have required that the prima facie showing be based on evidence exclusive of the disputed documents themselves, *see, e.g.,* United States v. Shewfelt, 455 F.2d 836, 840 (9th Cir. 1972); Kockums Industries v. Salem Equipment, 561 F. Supp. 168, 171 (D.Or. 1983), while other courts have considered both the independent evidence and the disputed documents in determining whether a prima facie case has been shown, *see, e.g.,* In re Berkley Co., 629 F.2d 548, 553 (8th Cir.

[11]** In deciding plaintiff's motion to compel and in applying the legal principles discussed above to the facts of this case, the critical issue (assuming that defendants have met their burden of establishing attorney-client and work product protection) is whether plaintiff has established a prima facie case of conspiracy to refuse to negotiate independently or to refuse to take a license under plaintiff's patents in violation of the antitrust laws. If plaintiff has established a prima facie case, then the Court must also consider whether plaintiff has demonstrated that the documents at issue were made in furtherance of the conspiracy. [6] If no prima facie case has been established, then the protections of the attorney-client privilege and work product doctrine should remain inviolate.

[12]** ***HN3***[]

A prima facie case could be established by either direct or circumstantial evidence showing an agreement among defendants refusing to take a license or to negotiate with plaintiff. It could also be shown by evidence of an agreement not to take any action with respect to settlement or licensing without notifying and seeking the approval of the other members of the conspiracy. [7] *See* *Jones Knitting Corp. v. Morgan, 244 F. Supp. 235, 238 (E.D.Pa. 1965)*, *aff'd. in pertinent part,* *361 F.2d 451 (3d Cir. 1966)*. Plaintiff concedes that he has no direct evidence of an agreement preventing settlement negotiations or licensing except upon terms acceptable to the group. However, plaintiff argues that the circumstantial evidence here is sufficient to establish a prima facie case. In addition to evidence of the joint counsel arrangement and several meetings and correspondence between the defendants in the Claims Court litigation, plaintiff points to a number of depositions and documents which arguably suggest that defendants exchanged information regarding settlement negotiations. Plaintiff argues that such an exchange necessarily restricted each defendant from acting independently. **[**13]** Plaintiff, therefore, concludes that the exchange of settlement information through the device of joint counsel violated the antitrust laws by displacing an individual pattern of decision making with what, in essence, amounts to a group boycott. *See* Plaintiff's Opening Brief in Support of His Motion to Compel at 8-9 (Dkt. No. 134); Plaintiff's Reply Brief in Support of His Motion to Compel at 6-8 (Dkt. No. 141).

[14]** However, plaintiff's argument suffers from a "leap in logic" by assuming that the **[*18]** exchange of settlement information, in the context of a joint defense with common counsel representing both of the alleged conspirators, constitutes prima facie evidence of an agreement not to settle or take a license except upon terms approved by the group. None of these circumstances support plaintiff's conspiracy claim. First, as plaintiff concedes, defendants had a right to take joint legal action and to hire joint counsel in response to a common problem. Their ***HN5***[] joint defense, standing alone, cannot provide any basis for antitrust liability. *See Zenith Radio Corp. v. Matsushita Elec. Indus. Co., 513 F. Supp. 1100, 1155-57 (E.D.Pa. 1983)*, *rev'd in part and aff'd. in part*, *723 F.2d 238 (3d Cir. 1983)* (Noerr-Pennington doctrine protects joint defense of legal proceedings from Sherman Act liability absent showing that litigation is pursued in bad faith as mere sham). Second, defendants' attendance at meetings concerning plaintiff's infringement claims, particularly in the context of a joint defense, is insufficient without more to give rise to any inference of conspiracy. *Id.* ***[**15]*** *at 1149* (attendance at meeting is

---

1980). The Court does not need to resolve that issue here since, under either standard, plaintiff has failed to demonstrate a prima facie case. In fact, the disputed documents submitted to the Court for *in camera* inspection lend further support to defendant's position that no conspiracy or refusal to negotiate independently with plaintiff ever existed. Therefore, even assuming *arguendo* that the Court should consider the disputed documents themselves in determining whether plaintiff has established a prima facie case, plaintiff has not satisfied his burden of proof.

[6] The Court notes that plaintiff has made no showing at all with respect to this requirement of the crime/fraud exception. Moreover, the Court is convinced, after carefully viewing the documents *in camera,* that none of the documents were prepared in furtherance of the alleged conspiracy to violate the antitrust laws. Instead, the documents were prepared in order to effectively litigate the Claims Court action.

[7] As stated in *Gould v. Control Laser Corp. [1978-2 TRADE CASES P62,385], 462 F. Supp. 685, 692-93 (M.D.Fla. 1978)*, *aff'd.,* *650 F.2d 617 (5th Cir. 1981)*: "***HN4***[] Unless [plaintiff] can prove that each participating member of the group agreed, as alleged, not to recognize the validity of the patent and not to accept licensing except upon terms approved by the group, [plaintiff's antitrust] claim must fail." The crucial inquiry is whether plaintiff has produced evidence of an agreement among defendants which had the effect of restraining individual freedom of action and preventing settlement negotiations or licensing except upon terms acceptable to the group.

insufficient without more to give rise to inference of conspiracy). Finally, defendants' exchange of settlement information is, in the absence of any evidence that the exchange restrained individual freedom of action, insufficient to permit an inference of conspiracy since, as Judge Becker has recently pointed out, no case has ever held that the mere exchange of information, in itself, is a violation of the antitrust laws. [8] *Id. at 1150-52*.

[16]** Indeed, in the circumstances of this case, where each defendant independently refused to take a license or settle with plaintiff long before the joint defense of the Claims Court litigation began, where other third party defendants present at the December 7, 1979 meeting did in fact settle with plaintiff after the joint defense began, and where individual settlement discussions with both Bendix and Brown & Sharpe continued after the appearance of common counsel, it is inherently implausible to suggest that the exchange of settlement information had the effect of restraining individual freedom of action. Absent some evidence that the exchange of information had such an effect, it is difficult to see how there could be any possible anticompetitive consequences violating Section One of the Sherman Act. As I suggested in *Jones Knitting Corp. v. Morgan, supra, 244 F. Supp. at 239*, it is entirely reasonable for joint defendants to keep each other advised of individual settlement negotiations. What was illegal in *Jones Knitting Corp. v. Morgan* was the conspirators' agreement to communicate with and gain the approval of each other before negotiating. The illegality of that agreement **[**17]** was based on the restraining effect it had on each individual company's freedom of action. Here, by contrast, there is no evidence of any promise that one defendant would seek the approval **[*19]** of the other before negotiating, nor is there any evidence that each defendant's refusal to settle was in any way influenced or affected by the other's. At best, the evidence shows that counsel may have informed each defendant of settlement decisions or information made or known by the other. In these circumstances, the Court cannot conclude that plaintiff has met his burden of establishing a prima facie case of a conspiracy in violation of the antitrust laws. Accordingly, any protection afforded to the documents submitted for *in camera* inspection by the attorney-client privilege or work product doctrine should remain intact.

An appropriate Order shall be entered.

End of Document

---

[8] The fact that defendants exchanged settlement information can be viewed as evidence that defendants were aware of each other's actions and therefore engaged in consciously parallel business behavior. However, the Third Circuit has consistently held that ***HN6***[] proof of consciously parallel business behavior, without more, is insufficient evidence of an agreement in violation of the antitrust laws unless the circumstances under which the parallel behavior occurred make the inference of rational independent choice less attractive than that of concerted action. These circumstances include a showing of acts by defendants in contradition of their own economic interests and satisfactory demonstration of a motivation to enter an agreement. *See Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105, 114 (3d Cir. 1980)*; *Bogosian v. Gulf Oil Corp., 561 F.2d 434, 446 (3d Cir. 1977)*, *cert. denied*, ***434 U.S. 1086, 98 S. Ct. 1280, 55 L. Ed. 2d 791 (1978)***; *Venzie Corp. v. United States Mineral Products, 521 F.2d 1309, 1314 (3d Cir. 1975)*. Here, while both defendants determined to refuse to take a license from plaintiff and could thus be found to have engaged in parallel business behavior, there is nothing to suggest that defendants acted against their independent economic interests in refusing to settle or that defendants had any motive or reason to limit their individual freedom by agreeing to refuse to deal with plaintiff. In this situation, the inference that defendants independently refused to settle is much more plausible than an inference that their refusal was the result of concerted action. Therefore, the Court concludes that, absent proof that defendants' actions were against their independent economic interests, the exchange of settlement information is insufficient to permit an inference of conspiracy.

HN5[] **Conspiracy, Elements**

In assessing summary judgment motions which turn on whether evidence exists to support the existence of a conspiracy, because conspirators rarely leave trails of direct evidence proving the agreement, broad latitude is permitted for the inference of facts from the totality of the circumstances.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Evidence > Inferences & Presumptions > Inferences

HN6[] **Summary Judgment, Entitlement as Matter of Law**

Only when reasonable inference-drawing degenerates into groundless speculation will circumstantial evidence prove insufficient support an inference of conspiracy for summary judgment.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN7[] **Summary Judgment, Evidentiary Considerations**

In a motion for summary judgment, all admissible evidence, direct and circumstantial, must be examined in order to determine what legitimate inferences could be drawn as to the ultimate facts in issue, and this must be done without fragmentizing or compartmentalizing the evidence.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN8[] **Summary Judgment, Entitlement as Matter of Law**

Although the evidence might not be compelling to a jury, and although proceeding to trial might prove costly and wasteful, a court is not permitted to grant summary judgment merely because it believes that the plaintiff's case might be stronger. Only in the absence of any significant probative evidence of a conspiracy may a court cut short a plaintiff's right to a full trial on the merits.

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

Labor & Employment Law > Collective Bargaining & Labor Relations > Strikes & Work Stoppages

HN9[] **Exemptions & Immunities, Labor**

That an agreement may have been produced by coercion does not immunize it from antitrust liability.

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

HN10[] **Exemptions & Immunities, Labor**

Liability in antitrust actions has been extended not only to unions who coerce agreements from employers, but also to employers who accede to union demands.

Antitrust & Trade Law > Exemptions & Immunities > Labor > Nonstatutory Exemptions

Business & Corporate Compliance > ... > Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Subjects

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Labor > Statutory Exemptions

HN11[] **Labor, Nonstatutory Exemptions**

The non-statutory antitrust immunity exemption generally applies when a union, acting with a non-labor party, seeks to attain goals which are mandatory or permissive subjects of bargaining under the National Labor Relations Act, *29 U.S.C.S. § 158 (1982)* et seq., unless the Union acts with a predatory anti-competitive purpose.

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > General Overview

Labor & Employment Law > Collective Bargaining & Labor Relations > Right to Organize

HN12[] **Exemptions & Immunities, Labor**

Section 8(e) of the Labor Management Relations Act, *29 U.S.C.S. § 158(e)*, generally makes it an unfair labor practice for a labor organization to enter into a "hot cargo" agreement with an employer. Nonetheless, the construction industry proviso to section 8(e) protects agreements between unions and employers in the construction industry relating to the contracting or subcontracting of work to be done at the site of construction.

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > General Overview

HN13[] **Exemptions & Immunities, Labor**

See section 8(e), *29 U.S.C.S. § 158(e)*.

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

Labor & Employment Law > Collective Bargaining & Labor Relations > Strikes & Work Stoppages

HN14[] **Exemptions & Immunities, Labor**

The proviso does not exempt subcontracting agreements from antitrust liability that were not sought or obtained in the context of a collective bargaining relationship, even though they are covered by the plain language of the statute.

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

HN15[] **Exemptions & Immunities, Labor**

Where an agreement entered into outside of the collective bargaining context imposes a direct restraint on the business market with anticompetitive effects not flowing naturally from the elimination of competition over wages and working conditions, predatory intent is irrelevant.

Antitrust & Trade Law > Sherman Act > General Overview

HN16[] **Antitrust & Trade Law, Sherman Act**

An agreement is unlawful under the Sherman Act, *15 U.S.C.S. § 1*, only if it results in an unreasonable restraint of trade.

Antitrust & Trade Law > Sherman Act > General Overview

HN17[] **Antitrust & Trade Law, Sherman Act**

The mere fact that an agreement has some anticompetitive effects not flowing naturally from the elimination of competition over wages and working conditions does not lead automatically to a conclusion that the agreement violates the antitrust laws. An agreement which is found unprotected by the labor exemption must still be examined under traditional antitrust analysis to determine if it has a sufficient anticompetitive effect to constitute an antitrust infraction.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Civil Procedure > ... > Summary Judgment > Supporting Materials > Memoranda of Law

HN18[] **Regulated Practices, Price Fixing & Restraints of Trade**

Under the per se rule the alleged agreement would be presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm it caused or the business excuse for its use. In contrast, a rule of reason approach would require the trier of fact to conduct a detailed examination of the affected business and the nature of the restraint imposed.

Judges: Schwartz, District Judge.

Opinion by: SCHWARTZ

Opinion

[*918] SCHWARTZ, District Judge.

James Julian, Inc. ("Julian"), a construction contractor, brought this action to obtain relief from various union, non-union, and individual defendants under *sections 1* and *2* of the Sherman Antitrust Act (*15 U.S.C. §§ 1*, *2*), under section 303 of the Labor Management Relations Act (*29 U.S.C. § 187*) and under state tort law. The non-union **[**2]** defendants, Raytheon Company ("Raytheon") and Raytheon Service Company ("RSC"), [1] reached a settlement with Julian and have been dismissed from the action. [2] The remaining union defendants are: Building

[1] Raytheon and RSC will, for convenience's sake, be referred to jointly as "Raytheon."

[2] Two other defendants were voluntarily dismissed under *Fed. R. Civ. Pro. 41(a)*: Dean E. Bensley and Metropolitan District Council of Philadelphia and Vicinity, United Brotherhood of Carpenters and Joiners of America. Docket Item ("Dkt.") 93.

and Construction Trades Council of Delaware ("Trades Council") and its President, Frank E. DiMauro, Operating Engineers Local 542 ("Operating Engineers") and its agent Albert W. Spanich, Iron Workers Local 451 ("Iron Workers") and its agent Edward F. Peterson, and Wharf and Dock Builders and Pile Drivers Local Union No. 454 of the United Brotherhood of Carpenters and Joiners of America ("Wharf and Dock Builders").

Prior opinions may be consulted for a more detailed factual background. **[**3]** [3] The central facts are as follows. Julian and RSC signed a letter of intent, or "teaming agreement," in 1976 under which Julian was to act as general contractor in the construction of a solid waste disposal plant **[*919]** for the Delaware Solid Waste Authority (the "Authority"). Julian's troubles began in 1978, when work on the project commenced. Its employees were represented by United Mineworkers District 50, now Local 15253 of the United Steel Workers of America, which was not a member of the Trades Council. At two meetings held in November of 1978, Raytheon representatives met with the Trades Council and its member unions. There is evidence that various union spokesman demanded at those meetings that project work be assigned to Trades Council unions and threatened to disrupt construction if their demands were not met. Picketing later occurred on several occasions. Raytheon, allegedly succumbing to union pressures, contracted a portion of project work to Raymond International Buildings, Inc. ("Raymond"), which employed Trades Council workers, and ultimately terminated Julian's contract.

[4]** The Iron Workers and Albert W. Spanich have moved for partial summary judgment on Count I of Julian's complaint, which alleges the Sherman Act violations. The remaining defendants have moved for summary judgment not only on the Sherman Act claim but also on the LMRA section 303 claim (Count III) and state tort claim (Count VI). [4]

The Court has already denied two potentially case dispositive motions in this case. In 1980 the Court denied a motion to dismiss for failure to state a claim upon which relief could be granted and for lack of subject matter jurisdiction. In that opinion the Court held that Julian alleged sufficient facts to state a Sherman Act claim against the defendants and that the claim fell outside of the "statutory" and "non-statutory" labor exemptions to the antitrust laws. *James Julian, 499 F. Supp. at 955-58*. In addition, the Court held that Julian's complaint alleged **[**5]** a valid claim under section 303 of the LMRA for damages resulting from a violation of section 8(b)(4) of the National Labor Relations Act ("NLRA"), *29 U.S.C. § 158(b)(4) (1982)*. [5] Finally, the Court held that it had pendent jurisdiction to hear the state tort claims under *United Mine Workers of America v. Gibbs, 383 U.S. 715, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966)*.

In February, 1983, the Court denied a motion for summary judgment brought by defendants Iron Workers and Peterson. Sufficient admissible and probative evidence existed, **[**6]** the Court held, to permit the question of an antitrust conspiracy to proceed to trial. *James Julian, 557 F. Supp. at 1063-66*. The Court also denied summary judgment on the section 303 and pendent state claims. *Id. at 1066-67*.

Although some new legal theories are now raised in the recent briefing, and although additional defendants have joined in this second summary judgment motion, the essence of the pending motion is a repeat of the prior motion:

---

[3] *See* *James Julian, Inc. v. Raytheon Co., 557 F. Supp. 1058 (D. Del. 1983)*; *James Julian, Inc. v. Raytheon Co., 499 F. Supp. 949 (D. Del. 1980)*; *James Julian, Inc. v. Raytheon Co., 93 F.R.D. 138 (D.Del. 1982)*.

[4] Counts II, IV and V were limited to claims against the non-union defendants who are no longer parties to this action.

[5] Section 8(b)(4) makes it an unfair labor practice for a labor organization, *inter alia*, to

> threaten, coerce, or restrain any person engaged in commerce or in any industry affecting commerce, where . . . an object thereof is --
>
> (A) forcing or requiring any employer . . . to enter into any agreement which is prohibited by [section 8(e)];
>
> (B) forcing or requiring any person . . . to cease doing business with any other person. . . .

29 U.S.C. § 158(b)(4).

defendants contend that insufficient evidence exists to support an antitrust claim because of the various exemptions from antitrust liability enjoyed by labor unions. No significant discovery is relied upon in this motion that was not available at the time of the prior summary judgment motion. Thus, for the third time, the Court must deny defendants' motion and move this case towards trial.

I. *Antitrust Claims*

Defendants claim that insufficient evidence exists of a conspiracy between themselves and Raytheon. Because the unions acted alone, defendants assert, the unions **[*920]** are immune from antitrust liability under the "statutory" antitrust exemption provided by sections 6 and 20 of the Clayton Act, *15 U.S.C. § [**7] 17* and *29 U.S.C. § 52*, and the Norris-LaGuardia Act, *29 U.S.C. §§ 104*, *105*, and *113*. *See* *Connell Construction Co. v. Plumbers & Steamfitters Local Union No. 100, 421 U.S. 616, 621-22, 44 L. Ed. 2d 418, 95 S. Ct. 1830 (1975)*; *United Mine Workers v. Pennington, 381 U.S. 657, 661-62, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)*. In any event, defendants argue, even if the unions did reach an agreement with Raytheon, such an agreement is entitled to "non-statutory" immunity because it was related to collective bargaining and was not entered into for the purpose of restraining competition. Finally, defendants contend, even if an agreement between themselves and Raytheon existed, and even if such an agreement is unprotected by an antitrust exemption, plaintiff's claim still must fail because Julian cannot show antitrust injury or unreasonable restraint of trade.

Plaintiff concedes that an agreement solely among the union defendants would be immune to antitrust attack. It is well settled that ***HN1***[] when unions act alone in their self interest their actions are statutorily exempt from the antitrust laws. *See* *Connell, 421 U.S. at 622-23*; *United States v. Hutcheson, 312 U.S. 219, 232-33, [**8] 85 L. Ed. 788, 61 S. Ct. 463 (1941)*; *Feather v. United Mine Workers, 711 F.2d 530, 541 (3d Cir. 1983)*; *Jou-Jou Designs, Inc. v. International Ladies Garment Workers Union, 643 F.2d 905, 910 (2d Cir. 1981)*. Instead, Julian contends that the Trades Council and its member unions pressured Raytheon into reaching an agreement to contract work to Raymond and then to terminate its contract with Julian. Although some agreements with non-union entities are entitled to nonstatutory antitrust immunity, this agreement, Julian asserts, is not immune because it was not "sought or obtained in the context of a collective-bargaining relationship," *Woelke & Romero Framing, Inc. v. NLRB, 456 U.S. 645, 653, 72 L. Ed. 2d 398, 102 S. Ct. 2071 (1982)*.

A. *Agreement with Non-Union Entities*

The Court must first address defendants' primary argument on summary judgment: that the unions acted alone, not in concert with a non-union entity.

HN2[] Summary judgment is a drastic remedy which the Court may resort to only if the moving party demonstrates that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. *Sunshine Books, Ltd. v. Temple [**9] University, 697 F.2d 90, 95 (3d Cir. 1982)*. Moreover, ***HN3***[] all inferences drawn from the underlying facts must be viewed in the light most favorable to the party opposing the motion. *Id*. ***HN4***[] In this case defendants have filed sworn affidavits denying the existence of an agreement or conspiracy. Plaintiff is therefore not entitled to rest solely on its complaint. It must produce "significant probative evidence" demonstrating the existence of a factual dispute as to the allegations in its complaint. *Sunshine Books, 697 F.2d at 96*; *James Julian, 557 F. Supp. at 1062*.

Special difficulties arise ***HN5***[] in assessing summary judgment motions which turn on whether evidence exists to support the existence of a conspiracy. As the Third Circuit Court of Appeals recently observed in *In re Japanese Electronic Products Antitrust Litigation, 723 F.2d 238 (3d Cir. 1983)*, conspirators in an illegal enterprise rarely leave trails of direct evidence proving the agreement. *Id. at 304*. "Broad latitude" is therefore permitted for the inference of facts from "the totality of the circumstances." *Id*. ***HN6***[] Only when "reasonable inference-drawing degenerates into groundless speculation" will circumstantial **[**10]** evidence prove insufficient to support an inference of conspiracy. *Id*. "All ***HN7***[] admissible evidence, direct and circumstantial," must be examined "in order to determine what legitimate inferences could be drawn as to the ultimate facts in issue," and this must be done without "fragmentizing or compartmentalizing the evidence." *Id. at 305*. *See* *Continental Ore Co. v. Union [*921] Carbide & Carbon Corp., 370 U.S. 690, 698-99, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962)*.

As in the prior opinion, the Court believes plaintiff has produced significant probative evidence demonstrating the presence of a factual dispute as to existence of a conspiracy with Raytheon. ***HN8***[] Although this evidence might not be compelling to a jury, and although proceeding to trial might prove costly and wasteful, the Court is not permitted to grant summary judgment merely because it believes that the plaintiff's case might be stronger. Only in the absence of any significant probative evidence of a conspiracy may a district judge cut short a plaintiff's right to a full trial on the merits.

Three incidents in particular motivated the Court's earlier holding denying the Iron Workers' summary judgment motion: Peterson's **[**11]** attendance at the November 8, 1978, meeting between the Authority, the Trades Council and Raytheon; his attendance at the July 5, 1979, meeting of the Trades Council; and the Iron Workers' participation in October, 1979, picketing. *James Julian, 557 F. Supp. at 1063*. The Court explained: "The act of picketing, when coupled with attendance at the November 8, 1978, meeting where unlawful actions were discussed, adequately links moving defendants with the unlawful purpose." *Id. at 1065*.

> Julian conclusively has demonstrated participation in picketing and attendance at meetings. The existence of a conspiracy is very much an issue and this case should go to a jury. While Julian may not ultimately prevail against moving defendants, it is not the province of this Court, at this juncture, to deprive it of the right to proceed."

James Julian, 557 F. Supp. at 1065. [6]

[12]** The above is as true today as it was last February. The Court will not parse in detail the evidence for a second time. Plaintiff has produced evidence placing defendants at meetings with Raytheon and connecting defendants with the picketing of Julian's job site. Plaintiff further has produced evidence of communications between Raytheon, Authority and union personnel, relating to the Trade Council's jurisdictional complaint, up until the time of Julian's termination. Briefing by defendants isolates various communications made by specific individuals and segregates events in an effort to establish that the occurrences in 1978 and 1979 do not, in aggregate, form a conspiracy. [7] That effort constitutes precisely the sort of fragmentizing and compartmentalizing forbidden in summary judgment.

[13]** **[*922]** Defendants further argue that an antitrust conspiracy between Raytheon and the union defendants may not be inferred merely from evidence that Raytheon responded to union secondary pressures. They rely on Judge Shapiro's recent opinion in *Altemose Construction Co. v. Building & Construction Trades Council*, No. 73-773 (E.D. Pa. July 5, 1983). Judge Shapiro explained in *Altemose* that

> It would at best be "mere speculation." as well as contradictory to the intent of labor's statutory exemption, if a jury were permitted to draw an inference of conspiracy from the favorable results of union secondary tactics.

---

[6] Although the prior opinion focused on the Iron Workers' involvement in a conspiracy with the *other unions* rather than on the role played by *Raytheon* in the alleged conspiracy, the briefing did contend that no conspiracy with non-labor parties existed. *See* Opening Brief of Defendants Iron Workers and Peterson in Support of Motion for Summary Judgment, Dkt. 112 at 8; Reply Brief of Defendants Iron Workers and Peterson in Support of Motion for Summary Judgment, Dkt. 121 at 14-15. Thus, despite defense counsel's contention to the contrary at oral argument, *see* Transcript of June 12, 1984, Hearing, Dkt. 161, at 59-60, the issue of Raytheon's involvement in the alleged conspiracy was not raised for the first time in the pending motions.

[7] They also argue that Julian needs "clear proof" that statements by various individuals were authorized or ratified by each defendant and needs "hard evidence" of a conspiracy. Those are not, however, appropriate summary judgment standards. There is significant probative evidence tending to show that the union defendants acted jointly in furtherance of a common goal. *See* Minutes of November 16, 1978 Business Agents Meeting, Dkt. 157, at A-370 (describing "Raytheon Problem" and "possible meeting tomorrow with Operating Engineers, Wharf and Dock Builders and Raytheon"); Deposition of James Au, Dkt. 157, at A-421-A-422 (describing job site encounter with John McCrae, Business Manager and President of Wharf and Dock Builders, Joe O'Donoghue, Business Manager of Local 542, and Al Spanich, President of Local 542); Deposition of James Au, Dkt. 157, at A-466 (describing picketing in October 1979 as a "combination of all the Building Trades Council"); Minutes of December 17, 1979 Special Business Agents Meeting, Dkt. 157, at 371 (describing President DiMauro's report on "present status of developments at Pigeon Point Landfill Project").

Id., slip op. at 63. *See also* *C & K Coal Co. v. United Mine Workers, 704 F.2d 690, 699 (3d Cir. 1983)*.

Julian, however, unlike Altemose Construction Co., rests its case on more than evidence that employers responded to secondary tactics. Julian has produced evidence of meetings attended by representatives of Raytheon and of communications between union officials and Raytheon. [8] Evidence of an agreement in this case therefore surpasses mere speculation. This is evidence which "tends to exclude the possibility that the [Unions] and [Raytheon] **[**14]** were acting independently," *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 104 S. Ct. 1464, 1471, 79 L. Ed. 2d 775 (1984)*, and tends to prove a "conscious commitment to a common scheme designed to obtain an unlawful objective." *Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105, 111 (3d Cir. 1980)*, *cert. denied*, *451 U.S. 911, 68 L. Ed. 2d 300, 101 S. Ct. 1981 (1981)*.

[15]** That the agreement, if any, may have been produced by coercion, does not immunize it from antitrust liability. In *Connell*, a union picketed a general contractor to extract an agreement under which the contractor would subcontract work only to firms under contract with the union. The contractor signed the agreement under protest and brought suit to challenge its legality. The Supreme Court held that the agreement was subject to antitrust scrutiny. [9]

[16]** **[*923]** The Third Circuit Court of Appeals has ventured even further than the *Connell* ***HN10***[] Court, extending liability not only to *unions* who coerce agreements from employers, but also to *employers* who accede to

---

[8] Evidence that seeds of conspiracy were planted at the November 8, 1978, meeting include a memorandum by Robert J. Storella, RSC's Senior Contract Administrator, which states, in part:

> a. Since the present pile testing is almost completed anyway, the Operating Engineers will not insist on replacing the 4 "non-union" workers with union operators provided that Raytheon assures the Building and Trades that 100% union personnel (i.e. Building and Trades) will be used when the job itself is actually started.
>
> b. They want our answer by this Friday (11/10). If it is not a favorable reply, the Operating Engineers and the Dock Workers will put up a picket line at the site on Monday morning.
>
> c. We told them we would give them our answer by Friday.

Dkt. 157, at A-307. Storella later explained that RSC "required Julian to utilize a Building Trades Contractor, Raymond International, to drive piles rather than his own work force," and described this move as "a concession to achieve labor peace based on threats of a picket." Letter from Robert J. Storella to N. C. Vasuki, June 27, 1979, Dkt. 157, at A-324. Evidence further shows that Theodore W. Ryan, President of the Trades Council, knew of the contract modification giving Raymond the pile work through conversations with Vasuki, Contract Officer at the Delaware Solid Waste Authority. *See* Deposition of T. Ryan at 76-77, Dkt. 157, at 534-335.

With respect to Julian's ultimate termination, there is further evidence of conspiracy. Evidence shows that Jacob Kreshtool, an attorney for the Operating Engineers, told Vasuki in late October, 1979, that he would file suit challenging an Authority bond issue but that the suit would be dropped if the entire project were given to Building Trade workers. *See* November 1, 1974, Memorandum from J. J. Mahon to E. L. Kane, Dkt. 157, at A-348. Furthermore, on December 5, 1979, Dean Bensley, RSC's President, wrote to Vasuki and explained that he had been "in direct contact with Mr. DiMauro," and had told DiMauro that RSC considered the Building Trades "as potential allies on this project." Dkt. 157, at A-350. Although this evidence is merely circumstantial, and although it is far from convincing, the Court cannot conclude that it is neither significant nor probative of a conspiracy.

HN9[] -

[9] Justice Douglas dissented specifically on the grounds that no conspiracy was alleged because Connell "maintained only that Local 100 coerced it into signing the subcontracting agreement." *Connell, 421 U.S. at 638* (Douglas, J., dissenting).

The concept of a coerced agreement violating ***antitrust law*** is not peculiar to the labor arena. It has long been held that group boycotts and vertical price restraints imposed by a manufacturers or suppliers on their retailers through threats or coercion may constitute "agreements" subject to antitrust attack. *See, e.g.,* *Monsanto Co. v. Spray-Rite Service Corp., 104 S. Ct. at 1471* & n.10. *Altemose*, where no evidence of an agreement existed, is fully consistent with this rule.

union demands. In *Consolidated Express, Inc. v. New York Shipping Association, 602 F.2d 494 (3d Cir. 1979)* ("*Conex*"), the Court of Appeals explained that it was not unfair to require employees to "resist excessive union claims." *Id. at 520*.

> Employers are not, after all, without remedies against illegal demands. They can refuse to bargain and the Board will, we must presume, sustain that refusal to bargain. They can accede to the union demand, and then sue, as Jewel Tea Company and Connell Construction Company did, to invalidate the agreement under federal law. Or they can simply refuse to implement the agreement, once adopted, because it is in violation of § 8(e). . . . Affirmative obligations imposed by nonlabor federal statute may on occasion require an employer to resist illegal union demands even at the cost of a strike.

*Id. See also Larry V. Muko, Inc. v. Southwestern Pennsylvania Building & Construction Trades Council, 609 F.2d **[**17]** 1368, 1375 (3d Cir. 1979)* ("*Muko I*") (agreement entered into as result of union handbilling could be found to violate antitrust laws). [10]

In this case, so long as an agreement existed between Raytheon and the defendants, it is irrelevant for antitrust purposes whether Raytheon entered the agreement happily or grudgingly.

B. *Non-Statutory Exemption*

Defendants argue that even if an agreement existed between themselves and Raytheon, the agreement is entitled to non-statutory antitrust **[**18]** immunity because 1) the unions' purpose was to protect and standardize area wage standards and working conditions; 2) the unions' actions were lawful under section 8(e) of the NLRA (the "construction industry proviso"); and 3) the unions lacked predatory intent.

1. *Area Standards Protest*

HN11[] The non-statutory exemption generally applies "when a union, acting with a non-labor party, seeks to attain goals which are mandatory or permissive subjects of bargaining under the National Labor Relations Act, unless the Union acts with a predatory anti-competitive purpose." *Feather v. United Mine Workers of America, 711 F.2d 530, 542 (3d Cir. 1983)*. The non-statutory exemption thus serves as an accommodation to labor goals by protecting conduct that otherwise might constitute a violation of federal ***antitrust law***. *See Connell, 421 U.S. at 622-23*; *James Julian, 499 F. Supp. at 956*. [11]

[19]** Defendants claim exemption for their activities because, they argue, their picketing was confined to the purpose of standardizing area wages and working conditions. Such a purpose, they correctly argue, **[*924]** even if achieved through agreement with non-union entities, is immune from antitrust liability. As the Supreme Court in *Connell* explained:

> The nonstatutory exemption has its source in the strong labor policy favoring the association of employees to eliminate competition over wages and working conditions. Union success in organized workers and standardizing wages ultimately will effect price competition among employers, but the goals of federal labor law

---

[10] Professor Areeda, commenting on *Muko I*, argues that it is "strange to extract treble damages from the victim of lawful union pressure who had no choice but to acquiesce in the union's demands if he wished to survive." P. Areeda, ***Antitrust Law*** para. 229.2a, at 83 (Supp. 1982). He nonetheless recognizes the existence of a contrary argument, similar to that raised in the *Conex* case, that "antitrust liability would stiffen the resistance of the victim so as to discourage the union from exerting the pressure." *Id*.

[11] The outer limits of the exemption were delineated by the Third Circuit Court of Appeals in *Muko I*:

> An agreement between a union and a business organization, outside a collective bargaining relationship, which imposes a direct restraint upon a business market, and which is not justified by congressional labor policy because it has actual or potential anticompetitive effects that would not flow naturally from the elimination of competition over wages and working conditions, is not exempt from antitrust scrutiny.

Muko I, 609 F.2d at 1373.

> never could be achieved if this effect on business competition were held a violation of the antitrust laws. The Court therefore has acknowledged that labor policy requires tolerance for the lessening of business competition based on differences in wages and working conditions.

Connell, 421 U.S. at 622. *See also* Amalgamated Meat Cutters v. Jewel Tea Co., 381 U.S. 676, 689, 14 L. Ed. 2d 640, 85 S. Ct. 1596 (1965).

Evidence exists in this case, however, from which a jury could conclude that defendants' **[**20]** purpose was not restricted to protecting area wages and working conditions. Rather, record evidence exists supporting Julian's contention that the defendants picketed to force Julian to hire Trades Council labor in place of Steel Workers labor and to force Raytheon to agree to terminate Julian. The unions' use of signs announcing an area standards protest during certain picketing does not establish as a matter of law that the unions were not also pursuing a less publicized objective. *See* N.L.R.B. v. International Brotherhood of Electrical Workers, Local 265, 604 F.2d 1091, 1097 (8th Cir. 1979); San Francisco Local Joint Executive Board of Culinary Workers, Bartenders, Hotel, Motel and Club Service Workers, 203 NLRB 199 (1973), *aff'd*, 166 U.S. App. D.C. 204, 509 F.2d 537 (D.C. Cir. 1975). As this Court previously stated:

> what might facially appear as a legitimate picket line may well have illegitimate, secondary motives. *See* Bexar Plumbing Co., Inc. v. NLRB, 536 F.2d 634, 636 (5th Cir. 1976); NLRB v. Local 307, Plumbers United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry of the United States and Canada (ALC-CIO), 469 ***[**21]*** F.2d 403, 408 (7th Cir. 1972). The current factual scenario neatly fits within these cases -- despite avowed legitimate goals of picketing, substantial evidence supports an inference that the real goal was the preclusion of Julian. As such, summary judgment is inappropriate.

Julian, 557 F. Supp. at 1066-7 (footnote omitted).

2. *Section 8(e): Construction Industry Proviso*

The unions claim exemption under section 8(e) of the ***HN12***[] Labor Management Relations Act, 29 U.S.C. § 158(e). [12] Section 8(e) generally makes it an unfair labor practice for a labor organization to enter into a "hot cargo" agreement with an employer. Nonetheless, the "construction industry proviso" to section 8(e) protects agreements between unions and employers in the construction industry "relating to the contracting **[*925]** or subcontracting of work to be done at the site of construction. . . ."

[22]** The proviso is not, however, as broad as it might literally appear. According to the Supreme Court, ***HN14***[] the proviso does not exempt subcontracting agreements "that were not sought or obtained in the context of a collective bargaining relationship, even though they [are] covered by the plain language of the statute." Woelke & Romero Framing, Inc. v. NLRB, 456 U.S. at 653. Thus, where "stranger" picketing is used to pressure an employer with whom the union has no collective bargaining relationship, "and whose employees it has no interest in

---

[12] ***HN13***[] Section 8(e) provides in part:

> It shall be an unfair labor practice for any labor organization and any employer to enter into any contract or agreement, express or implied, whereby such employer ceases or refrains or agrees to cease or refrain from handling, using, selling, transporting or otherwise dealing in any of the products of any other employer, or to cease doing business with any other person, and any contract or agreement entered into heretofore or hereafter containing such an agreement shall be to such extent unenforceable and void: *Provided*, That nothing in this subsection shall apply to an agreement between a labor organization and an employer in the construction industry relating to the contracting or subcontracting of work to be done at the site of the construction, alteration, painting, or repair of a building, structure, or other work. . . .

29 U.S.C. § 158(e).

Agreements protected by the construction industry proviso to section 8(e) are also protected from antitrust liability. *See* Kaiser Steel Corp. v. Mullins, 455 U.S. 72, 85, 70 L. Ed. 2d 833, 102 S. Ct. 851 (1982); *Altemose*, slip op. at 43-44 & n.67.

representing, into signing union signatory subcontracting agreements," the agreements are unprotected. *Id. at 653-54 n.8*.

Here, evidence supports Julian's allegation that Raytheon agreed with the unions to cease doing business with Julian in order to replace Steel Workers with Trades Council employees. The unions and Raytheon were not in a collective bargaining relationship nor did they execute a subcontracting agreement such as that approved in *Woelke and Romero*. Rather, as in *Connell*, there is evidence to suggest that the unions had no interest in representing Julian's or Raytheon's employees and instead sought to require Julian **[**23]** or Raytheon to subcontract with *other* companies hiring Trades Council employees. Furthermore, evidence suggests that the unions' final goal was to require Raytheon to replace Julian with a different contractor entirely, and have *that* contractor hire (or subcontract others to hire) Trades Council labor. [13]

[24]** Defendants Operating Engineers and Spanich argue that "if Local 542 had succeeded and Julian had been forced to employ Operating Engineers, it would *not* have occurred in the absence of Julian signing a collective bargaining agreement." Opening Brief of Operating Engineers and Spanich, Dkt. 152, at 40. The record, however, does not evidence union desire to form a collective bargaining relationship with Julian, nor is that Julian's theory. Instead, Julian contends that defendants sought to pressure Raytheon to subcontract work to employers *other than Julian* and, eventually, to force Julian off the project entirely. These actions do not fall within a collective bargaining relationship any more than did those in *Connell*.

Taking a different approach, the other defendants argue that a collective bargaining relationship existed because Julian and Raytheon were engaged in a "joint venture" and should be treated as "joint employers" of all project employees. *See* Opening Brief of Defendants Building Trades Council, DiMauro, Ironworkers, Peterson and Wharf & Dock Builders, Dkt. 150 at 28-29. "An agreement between the unions and Raytheon would possess a sufficient collective **[**25]** bargaining nexus," they argue, to satisfy *Connell. Id.* at 29. Defendants cite no support for their joint venture theory, nor does the court believe that Julian should be considered a "joint employer" of workers who are engaged in work for a subcontractor which was assigned work against Julian's wishes allegedly belonging to Julian. In any event, Julian certainly cannot be considered a joint employer under an arrangement between the unions and Raytheon which provided for Julian's termination from the construction project.

3. *Predatory Intent*

Defendants argue that Julian must, under Supreme Court precedent, prove that **[*926]** the unions acted with predatory intent in order to establish a valid antitrust claim. The evidence in this case, defendants argue, shows only that the unions sought to preserve area wage standards, not that they intended to ruin competition.

The Court cannot agree with either contention. The Supreme Court's plurality opinion in *Pennington* has generally been interpreted as requiring proof of predatory intent where the challenged agreement concerns "subjects at the 'very heart' of the collective bargaining process." *Conex, 602 F.2d at 516*; **[**26]** *Smitty Baker Coal Co. v. United Mine Workers, 620 F.2d 416, 428-30 (4th Cir. 1980)*, *cert. denied*, *449 U.S. 870, 66 L. Ed. 2d 89, 101 S. Ct. 207 (1980)*; 1 P. Areeda & A. Turner, ***Antitrust Law***, para. 229e, at 211 (1978). A different analysis, however, has been applied in other contexts. As the Third Circuit Court of Appeals explained in *Conex*, the Supreme Court in *Connell* abandoned the intent requirement of *Pennington*. ***HN15***[] Where an agreement entered into outside of the collective bargaining context imposes a "direct restraint on the business market" with anticompetitive effects not

[13] This case does not involve a dispute, outside the collective bargaining context, involving "shoulder-to-shoulder" friction between union and non-union workers. *See* *James Julian, 499 F. Supp. at 957*; *Pacific Northwest Chapter of the Associated Builders & Contractors, Inc. v. N.L.R.B., 654 F.2d 1301, 1319-21 (9th Cir. 1981)* (en banc), *aff'd sub nom, Woelke & Romero, 456 U.S. 645, 72 L. Ed. 2d 398, 102 S. Ct. 2071* (*Connell* presents alternative requirements of either a collective bargaining relationship or a threat of shoulder-to-shoulder friction with non-union workers). Rather, it involves a territorial dispute between workers represented by *different* unions, not the type of "shoulder-to-shoulder" friction described by the Supreme Court in *Connell* or *Woelke & Ramero*.

flowing "naturally from the elimination of competition over wages and working conditions," predatory intent is irrelevant. *See* Conex, 602 F.2d at 517, *quoting* Connell, 420 U.S. at 625. [14]

[27]** As explained earlier, the Court cannot decide on summary judgment that defendants' goal was limited to preserving area standards. The jury must decide whether defendants sought only to protect area wage standards or whether they sought to eliminate Julian from the project site in order to replace Steel Worker members with Trades Council union members. If the latter was their purpose, their alleged agreement with Raytheon would, indeed, have a direct anticompetitive effect on the business market not flowing naturally from the elimination of competition over wages and working conditions. As in *Connell*, it would have the effect of excluding an employer from the market despite a competitive advantage the employer might enjoy because of efficiencies and would thus restrain trade more than was necessary to achieve a legitimate labor goal. Conex, 602 F.2d at 518-20. [15]

[28]** C. *Anticompetitive Effects*

Defendants argue that Julian has not established sufficient injury to competition to support its antitrust claim.

HN16[] An agreement is unlawful under section 1 of the Sherman Act [16] **[**29]** only if it results in an *unreasonable* restraint of trade. Chicago Board of Trade v. United States, 246 U.S. 231, 62 L. Ed. 683, 38 S. Ct. 242 (1918); Larry V. Muko, Inc. v. Southwestern Pennsylvania Building & Construction Trades Council, 670 F.2d 421, 428 (3d Cir. 1982) ("*Muko II*"). ***HN17***[] The mere fact that an agreement, like that in *Connell*, **[*927]** has some anticompetitive effects not flowing naturally from the elimination of competition over wages and working conditions does not lead automatically to a conclusion that the agreement violates the antitrust laws. That is, an agreement which under *Connell* is found unprotected by the labor exemption must still be examined under traditional antitrust analysis to determine if it has a sufficient anticompetitive effect to constitute an antitrust infraction. Muko II, 670 F.2d at 426-27. [17]

The parties have not briefed the issue of whether a rule of reason or *per se* analysis should apply, although implicit in defendants' briefs is the assumption that rule of reason is appropriate. Plaintiff's brief argues that even under rule of reason analysis it has demonstrated sufficient competitive injury to survive summary judgment. ***HN18***[] Under the *per se* rule the alleged agreement between defendants and Raytheon would be "presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm [it] caused or the business excuse for [its] use." Northern Pacific Railway Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958). In

---

[14] The Third Circuit's brief one-sentence summary of the non-statutory exemption in *Feather* which indicated that "generally" a predatory purpose is required, Feather, 711 F.2d at 542, cannot be read as overruling the extensive interpretation of *Connell* contained in *Conex* and reaffirmed in *Muko II*.

[15] The *Conex* court created a defense in damage actions, not available in declaratory judgment or injunctive actions, for cases in which the defendant "could not reasonably have foreseen that the subject matter of the agreement being challenged would be held to be unlawful under § 8(b) (4) or § 8(e)" and where the agreement was "'intimately related' to the object of collective bargaining thought at the time to be legitimate, and went no further in imposing restraints in the secondary market than was reasonably necessary to accomplish it." Conex, 602 F.2d at 521; *see also* Feather, 711 F.2d at 542. The availability of this defense is an issue which must be litigated at trial.

[16] Defendants have ignored entirely plaintiff's Sherman Act section 2 claim. To the extent plaintiff alleges an attempt to monopolize, effect on the market place is irrelevant (although probable effect is very relevant). *See* United States v. Columbia Steel Co., 334 U.S. 495, 531-32, 92 L. Ed. 1533, 68 S. Ct. 1107 (1948) (reasonable restraint of trade not in violation of section 1 may nonetheless constitute an attempt to monopolize under section 2); Swift & Co. v. United States, 196 U.S. 375, 396, 49 L. Ed. 518, 25 S. Ct. 276 (1905) (attempt to monopolize claim needs proof of intent and dangerous probability of success).

[17] Nor does a finding that the agreement violates section 8(e) *per se* make the agreement illegal. Muko II, 670 F.2d at 427 n.5.

contrast, a rule of reason approach would require the trier of fact to conduct "a detailed examination of the affected business and the nature of the restraint imposed." Muko II, 670 F.2d at 428.

The Court holds in this case that rule of reason analysis must apply and agrees **[**30]** with Julian that the issue of antitrust liability must await trial. The Third Circuit Court of Appeals in *Muko II*, while rejecting the position offered by some commentators that conduct in the labor area should never be *per se* unlawful, warned against "mechanical or imprudent application of the *per se* rule in the labor context." Muko II, 670 F.2d at 427; *see* Handler & Zifchak, *Collective Bargaining and the Antitrust Laws: The Emasculation of the Labor Exemption*, 81 Colum. L. Rev. 459, 511 (1981). [18] The Court explained that only "classic" group boycotts -- those involving attempts by competitors to exclude horizontal competitors -- are *per se* unlawful. Muko II, 670 F.2d at 430. *Muko II* involved an action by a non-union contractor against a fast-food chain operator and two labor trades councils challenging an agreement between the councils and the fast-food operator to hire only trades council labor. The agreement was not, the *Muko II* court held, a classic group boycott. 670 F.2d at 432.

> Simply put, a small retailer has been picketed by a union. To preserve its business, the firm agrees to purchase union-made goods in the future. We **[**31]** cannot agree with Muko . . . that this is the kind of behavior against which the *per se* rule traditionally has been invoked.

Id.

Similarly, in this case Julian alleges only picketing of a local builder and an agreement to purchase services of particular unions in the future. To borrow language from *Muko II*, "this is not a case in which one competitor, through concerted action with a supplier or customer, attempts to cut another, horizontal competitor out of the market place." [19] Muko II, 670 F.2d at 432. There is no "suggestion of attempted price fixing." *Id*. "The record is barren of anything to suggest that either of the defendants wished, through their **[**32]** concerted action, to gain advantage over [Julian] in an *economic* or *competitive* sense." *Id*. "Unlike *Conex*, in which the defendant union imposed a widespread restraint of trade affecting the entire shipping industry, **[*928]** the 'refusal to deal' in this case involved only one relatively small buyer." *Id*. [20]

Under a rule of reason analysis, the Court is unable to state as a matter of law that defendants did not unreasonably restrain competition in the relevant market. [21] Plaintiff has presented expert evidence tending to show that defendants **[**33]** harmed competition in several geographic and product markets. *See* Report of Dr. Jeffrey Perloff, Dkt. 157, at A-205. Defendants have offered no expert rebuttal evidence and, in fact, have entirely ignored Julian's expert report in their briefs. Thus, the Court cannot grant summary judgment on the issue of whether defendants unreasonably restrained trade.

---

[18] Earlier language in *Conex* had suggested that conduct which stripped a union of its antitrust exemption would necessarily constitute an antitrust violation, *see* Conex, 602 F.2d at 523-24, but *Muko II* limited the holding of *Conex* as applying to a case involving a classic group boycott. Muko II, 670 F.2d at 427.

[19] It may be a case in which one *union* attempts to cut another *union* from the marketplace, but plaintiffs wisely have not suggested that such action would lose the protection of Clayton Act sections 6 and 20.

[20] While this case is distinguishable from *Muko II* as involving a termination of an existing contract, that distinction, alone, is insufficient to make defendants' alleged actions *per se* illegal under the antitrust laws.

[21] If the Trades Council unions had sought solely to substitute themselves as Julian's employees in place of the Steel Workers, that effort would not constitute an antitrust violation because it would not have lead to a net increase in restraint of trade over that created by the existing arrangement between Julian and the Steel Workers. *See* Jou-Jou Designs v. International Ladies Garment Workers Union, 643 F.2d 905, 910 (2d Cir. 1981). Evidence supports Julian's theory, however, that the unions forced Julian off the project site, thus affecting competition beyond the substitution in a collective bargaining relationship of one group of employees for another.

[34]** II. *Section 303 and State Tort Claims*

Defendants other than Operating Engineers and Spanich have moved for summary judgment on Julian's remaining claims, arguing, first, that picketing and violent conduct by the Operating Engineers cannot be attributed to their organizations and, second, that any picketing they themselves conducted was limited to the "primary" objective of protecting area standards. [22] **[**35]** As explained earlier, however, these issues cannot be decided on summary judgment. Although plaintiff's task at trial will be burdensome, the Court cannot hold that no material issue of fact remains to be litigated. Some evidence exists suggesting a secondary objective behind the unions' picketing, thus precluding summary judgment on the section 303 claim. In addition, evidence supports a conspiracy or agency theory, which might impose liability on defendants for the tortious acts committed by others. [23] As a consequence, defendants' motion must be denied on Julian's remaining claims.

An appropriate order will issue.

End of Document

[22] Section 8(b)(4) prohibits only picketing for "secondary" objectives, not "primary" objectives. *See* *National Woodwork Manufacturers Association v. NLRB, 386 U.S. 612, 619-33, 18 L. Ed. 2d 357, 87 S. Ct. 1250 (1967)*. Area standards picketing would not involve an unlawful objective, while picketing to force one party to cease doing business with another would. *See id*.

[23] The parties have not briefed the state tort law question of vicarious tort liability under a conspiracy or agency theory.

* Upon consideration of the petition for rehearing with suggestion for rehearing en banc, filed by the appellee, a majority of the panel has voted to deny rehearing, and a majority of the judges of the court in active service has voted not to rehear the case en banc; the petition is therefore DENIED. Judge Swygert of the panel voted to rehear the case. Judge Wood's position is as follows: "Judge Wood voted to grant en banc consideration of the original majority opinion, but takes no position with regard to the amended opinion from which Judge Swygert again dissents as the amended opinion and dissent have not been seen or considered by the parties." Judge Coffey joins in Judge Wood's comment.

The panel majority and dissenting opinions have been amended with regard to the standard of judicial review of orders granting or denying preliminary injunctions. The amended opinions are issued herewith and supersede the original opinions issued on August 31, 1984.

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

HN1[] **Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing**

Section 3 of the Clayton Act, *15 U.S.C.S. § 14*, makes it unlawful to sell goods on the condition, agreement, or understanding that the purchaser shall not use or deal in the goods of a competitor or competitors of the seller, where the effect of such condition, agreement, or understanding may be to substantially lessen competition or tend to create a monopoly in any line of commerce.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Irreparable Harm

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN2[] **Grounds for Injunctions, Irreparable Harm**

In every case in which the plaintiff wants a preliminary injunction he must show that he has "no adequate remedy at law", and, unless the statute under which he is suing excuses a showing of irreparable harm, that he will suffer "irreparable harm" if the preliminary injunction is not granted. The plaintiff must also show that an award of damages at the end of trial will be inadequate, which does not mean wholly ineffectual, but does mean seriously deficient as a remedy for the harm suffered.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN3[] **Private Actions, Remedies**

Where the only remedy sought at trial is damages, the two requirements of irreparable harm and no adequate remedy at law merge. The question is then whether the plaintiff will be made whole if he prevails on the merits and is awarded damages.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Civil Procedure > Remedies > Injunctions > General Overview

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Public Interest

HN4[] **Injunctions, Preliminary & Temporary Injunctions**

In deciding whether to grant a preliminary injunction, the court must also consider any irreparable harm that the defendant might suffer from the injunction, that is, harm that would neither be cured by the defendant's ultimately prevailing on the merits or fully compensated by a *Fed. R. Civ. P. 65(c)* injunction bond. If the plaintiff does show some likelihood of success, the court must then determine how likely that success is, because this affects the balance of relative harms. The more likely the plaintiff is to win, the less heavily need the balance of harms weigh in his favor; the less likely he is to win, the more need it weigh in his favor. Sometimes an order granting or denying a preliminary injunction will have consequences affecting the public interest, which must be weighed as well.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN5[] Injunctions, Preliminary & Temporary Injunctions

The application of the principles regarding the determination of whether a preliminary injunction should be granted requires the seasoned judgment of the district court, what is usually called the court's "discretion."

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN6[] Standards of Review, Abuse of Discretion

The standard of review in cases involving preliminary injunctions is whether the judge exceeded the bounds of permissible choice in the circumstances, not what the appellate court would have done if it had been in his shoes.

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

Civil Procedure > Judicial Officers > Judges > General Overview

HN7[] Standards of Review, Clearly Erroneous Review

Ordinarily the trial judge's balancing of the harms to the parties would be entitled to substantial deference by the reviewing court, but not if the balancing is infected by a clear error of fact, or an error of law.

Antitrust & Trade Law > Clayton Act > General Overview

HN8[] Antitrust & Trade Law, Clayton Act

In order to prevail on its claim that a defendant violated § 3 of the Clayton Act, *15 U.S.C.S. § 14*, a plaintiff will have to show both that there was an agreement, though not necessarily an explicit agreement between it and defendant that plaintiff would not carry a product line competitive with defendant's and that the agreement was likely to have a substantial though not necessarily an immediate anticompetitive effect.

Civil Procedure > Judicial Officers > Judges > General Overview

Energy & Utilities Law > Pipelines & Transportation > Eminent Domain Proceedings

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN9[] **Judicial Officers, Judges**

It now appears most unlikely that exclusive-dealing agreements, whether challenged under § 3 of the Clayton Act, *15 U.S.C.S. § 14* or *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, will be judged by the simple and strict test of Standard Stations. They will be judged under the Rule of Reason, and thus condemned only if found to restrain trade unreasonably.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN10[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The exclusion of one or even several competitors, for a short time or even a long time, is not ipso facto unreasonable. The welfare of a particular competitor who may be hurt as the result of some trade practice is the concern not of the federal antitrust laws, but of state unfair competition law.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

HN11[] **Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing**

The exclusion of competitors is cause for antitrust concern only if it impairs the health of the competitive process itself.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

HN12[] **Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing**

A plaintiff must prove two things to show that an exclusive-dealing agreement is unreasonable. First he must prove that it is likely to keep at least one significant competitor of the defendant from doing business in a relevant market. If there is no exclusion of a significant competitor, the agreement cannot possibly harm competition. Second, he must prove that the probable, but not certain, effect of the exclusion will be to raise prices above, and therefore reduce output below, the competitive level, or otherwise injure competition; he must show in other words that the anticompetitive effects, if any, of the exclusion outweigh any benefits to competition from it.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

HN13[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

Exclusive-dealing contracts terminable in less than a year are presumptively lawful under § 3 of the Clayton Act, *15 U.S.C.S. § 14*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

HN14[] **Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing**

The calculus of competitive effect must also include some consideration of the possible competitive benefits of exclusive dealing in the industry. Competition is the allocation of resources in which economic welfare or consumer welfare is maximized; it is not rivalry per se, or a particular form of rivalry, or some minimum number of competitors.

Counsel: Lee N. Abrams, Chicago, Illinois Kenneth J. Jurek, John N. Touchy, Hatem H. El-Gabri, for Defendant-Appellant.

Michael W. Coffield, Chicago, Illinois, Daniel Pope, Gregory Friedman, Susan Frangetti, for Plaintiff-Appellee.

Judges: Bauer and Posner, Circuit Judges, and Swygert, Senior Circuit Judge. Swygert, Senior Circuit Judge, dissenting.

Opinion by: POSNER

Opinion

[*381] POSNER, Circuit Judge.

This appeal requires us to consider both the standard for granting (and reviewing grants of) preliminary injunctions, and substantive issues of exclusive dealing under ***HN1***[] section 3 of the Clayton Act, *15 U.S.C. § 14*, which makes it unlawful to sell goods "on the condition, agreement, or understanding that the . . . purchaser . . . shall not use or deal in the goods . . . of a competitor or competitors of the . . . seller, where the effect of such . . . condition, agreement, or understanding may be to substantially lessen competition or tend to create a monopoly in any line of commerce."

Roland Machinery Company, a substantial **[**3]** dealer (its gross revenues exceed $10 million a year) in construction equipment and related items, serving a 45-county area in central Illinois, was for many years the area's exclusive distributor of International Harvester's line of construction equipment. International Harvester got into serious financial trouble and in 1982 sold its construction-equipment division to Dresser Industries. Dresser promptly signed a dealership agreement with Roland. The agreement provided that it could be terminated by either party, without cause, on 90 days' notice. It did not contain an exclusive-dealing clause (that is, a clause forbidding the dealer to sell any competing manufacturer's construction equipment). Eight months after signing the agreement Roland **[*382]** signed a similar agreement with Komatsu, a Japanese manufacturer of construction equipment. Several months after discovering that Roland had done this, Dresser gave notice that it would exercise its contract right to terminate its dealership agreement with Roland without cause. Roland brought this suit shortly before the end of the 90-day notice period, charging that Dresser had violated section 3 of the Clayton Act and other **[**4]** provisions of federal and state law. The district judge granted Roland a preliminary injunction based solely on the section 3 charges, and Dresser has appealed under *28 U.S.C. § 1292(a)(1)*. None of Roland's other charges is before us on this appeal.

At the hearing on Roland's motion for preliminary injunction, Dresser presented evidence that it had cut off Roland because it was afraid that Roland intended to phase out the Dresser line and become an exclusive Komatsu dealer, and because it believed that as long as Roland (a well-established firm) remained a Dresser dealer, no other dealer in the area would be willing to handle Dresser equipment, as this would mean competing with Roland. The usual practice in the industry is for dealers not to carry competing lines, and Dresser presented evidence that this makes for more aggressive promotion of each line. Roland, however, presented evidence that it had no intention of phasing out Dresser equipment, that it was terminated because the dealership contract contained what Roland at argument called a "secret" term requiring Roland to deal exclusively in Dresser equipment, and that the sudden termination would **[**5]** bankrupt it or at least cause it serious loss. But it seems that only about 50 percent of Roland's revenues are derived directly or indirectly from Dresser equipment, and only about 10 percent from selling new Dresser equipment (the other 40 percent coming from renting and servicing equipment, and from selling parts); and Dresser argues that Roland could survive simply by promoting Komatsu equipment aggressively -- which it intended to do anyway.

After a two and a half day hearing, the district judge concluded that if Dresser were allowed to cut off Roland pending the trial of the case Roland would probably go out of business -- an injury to Roland greater than the harm to Dresser from being forced to continue dealing with Roland in the interim. But because comments by Roland's general manager "raise some doubts as to the sincerity of Roland's current claims that it plans to aggressively distribute Dresser products both now and in the future," the judge conditioned the preliminary injunction on Roland's "maintain[ing], within normal economic fluctuations, the approximate market share which it now has obtained for Dresser products."

On the probable merits of Roland's section **[**6]** 3 claim, the judge found that while Dresser's contract with Roland contained no exclusive-dealing requirement, Roland "has adequately shown that an implied exclusive dealing arrangement existed between itself and Dresser. The Defendant's own evidence showed that it considered a distributor which carried a competing line as inimical to its own interest. In the mind of Dresser, a distributor must either live or die with the manufacturer's product." Having thus found an agreement (which is a prerequisite to liability under section 3 of the Clayton Act, see, e.g., *Ron Tonkin Gran Turismo, Inc. v. Fiat Distributors, Inc., 637 F.2d 1376, 1389 (9th Cir. 1981)*, and cases cited there), the judge considered whether Roland had raised a "substantial question" as to whether the agreement was likely to lessen competition substantially. Dresser manufactures 16 or 17 percent of the construction equipment sold in central Illinois (defined as Illinois south of Chicago and north of the latitude of St. Louis), and Komatsu only 1 percent. Roland accounts for all these sales. The judge found that Komatsu (which has no exclusive dealerships anywhere in the midwest) could not have gotten **[**7]** into this market except by persuading a dealer for another manufacturer, such as Roland, to carry Komatsu equipment as a second line.

The first bone of contention between the parties is the proper standard for granting a preliminary injunction and for appellate review of such a grant. Each party is able to cite numerous decisions in support of its view of the proper standard, simply because the relevant case law is in disarray in both this and other circuits. Many of our cases say that to get a preliminary injunction a plaintiff must show each of four things: that he has no adequate remedy at law or will suffer irreparable harm if the injunction is denied; that this harm will be greater than the harm the defendant will suffer if the injunction is granted; that the plaintiff has a reasonable likelihood of success on the merits; and that the injunction **[*383]** will not harm the public interest. See, e.g., *Technical Publishing Co. v. Lebhar-Friedman, Inc., 729 F.2d 1136, 1138-39 (7th Cir. 1984)*; *Alexander v. Chicago Park District, 709 F.2d 463, 467 (7th Cir. 1983)*; *O'Connor v. Board of Education, 645 F.2d 578, 580 (7th Cir. 1981)*. **[**8]** Although described in the cases as a four-factor test, the test actually involves five factors, unless "no adequate remedy at law" and "irreparable injury" mean the same thing. In ordinary equity parlance they do not. See 11 Wright & Miller, Federal Practice and Procedure § 2944, at p. 401 (1973). But *Fox Valley Harvestore, Inc. v. A.O. Smith Harvestore Products, Inc., 545 F.2d 1096, 1097 n. 1 (7th Cir. 1976)*, suggests that they may mean the same thing in the preliminary-injunction setting. Further adding to the uncertainty is the fact that we usually say no adequate remedy at law *or* irreparable harm (as in *Technical Publishing, Alexander*, and *O'Connor*), but sometimes no adequate remedy at law *and* irreparable harm, as in *Fox Valley, supra, 545 F.2d at 1097*. And our recent decision in *American Can Co. v.*

Mansukhani, 742 F.2d 314, 325 (7th Cir. 1984), states that the plaintiff must establish "the threat of irreparable harm for which there is no adequate remedy at law."

Maybe there is a sixth factor. Some cases, by stating that the purpose of a preliminary injunction is to preserve the status quo, see, e.g. **[**9]** , EEOC v. City of Janesville, 630 F.2d 1254, 1259 (7th Cir. 1980), imply that this is another thing the plaintiff must prove; and it is true that if the plaintiff asks for more than a return to the status quo he is apt to be turned down on that ground. See, e.g., SCM Corp. v. Xerox Corp., 507 F.2d 358, 361 (2d Cir. 1974). But "status quo" is ambiguous. The preliminary injunction in this case maintained the status quo in one sense: it continued Roland as a Dresser dealer. But it changed the status quo in another: it made the dealership agreement no longer terminable by either party on 90 days' notice.

Some of our cases imply that although each of the four factors must be considered, the plaintiff need not prevail on all four. See, e.g., Reinders Bros. v. Rain Bird Eastern Sales Corp., 627 F.2d 44, 49 (7th Cir. 1980); Fox Valley, supra, 545 F.2d at 1098. But other cases say that "a preliminary injunction is an extraordinary remedy which is not available unless plaintiffs carry their burden of persuasion as to all of the [four] prerequisites." Shaffer v. Globe Protection, Inc., 721 F.2d 1121, 1123 (7th Cir. 1983). **[**10]** To the same effect see, e.g., Technical Publishing Co., supra, 729 F.2d at 1139; Singer Co. v. P.R. Mallory & Co., 671 F.2d 232, 234 (7th Cir. 1982) ("All of these conditions must be satisfied before the drastic remedy of an injunction will be ordered."); but cf. *Illinois* Bell Tel. Co. v. Illinois Commerce Comm'n, 740 F.2d 566, 571 (7th Cir. 1984) ("where the plaintiff seeks an injunction [preliminary or permanent] to prevent the violation of a federal statute that specifically provides for injunctive relief, it need not show irreparable harm"). Still other cases do not mention the four factors, see, e.g., Valley Liquors, Inc. v. Renfield Importers, Ltd., 678 F.2d 742 (7th Cir. 1982), or propose a different standard, see Omega Satellite Products Co. v. City of Indianapolis, 694 F.2d 119, 123 (7th Cir. 1982).

With respect to the individual factors, some cases imply that the first (first two, if no adequate remedy at law and irreparable harm are meant to be separate factors) is presumptively satisfied in any dealer-termination case, presumably because the dealer's loss of profits would **[**11]** be difficult to quantify. See Menominee Rubber Co. v. Gould, Inc., 657 F.2d 164, 167 (7th Cir. 1981); Reinders Bros. v. Rain Bird Eastern Sales Corp., supra, 627 F.2d at 53. But these are alternative holdings, and the strongest statement of this position, in Milsen Co. v. Southland Corp., 454 F.2d 363, 366 (7th Cir. 1971), appears to be a dictum. *Fox Valley* can be read to require that the plaintiff go much further and show that the termination has "crippled if not destroyed [its] ability to carry on [its] antitrust case." 545 F.2d at 1098. See generally Note, *The Irreparable Harm Requirement **[*384]** for Preliminary Injunction Relief in Antitrust Distributor Termination Cases*, 61 B.U.L. Rev. 507, 516-21 (1981).

It is in the dealer-termination cases, too, that we find an alternative formulation to "reasonable likelihood of success," another of the traditional four (or five, or six) factors. *Fox Valley* alternates "reasonable likelihood of success" with "some likelihood of success," 545 F.2d at 1098, while *Milsen* just says "success on the merits," 454 F.2d at 366, **[**12]** leaving unclear just how fair a prospect of success is necessary. The Supreme Court has said, "likely to prevail on the merits." Doran v. Salem Inn, Inc., 422 U.S. 922, 931, 45 L. Ed. 2d 648, 95 S. Ct. 2561 (1975). "Some likelihood of success" seems to be an abbreviated version of the formula in Hamilton Watch Co. v. Benrus Watch Co., 206 F.2d 738, 740 (2d Cir. 1953) (Frank, J.), that the plaintiff's contentions on the merits must be "so serious, substantial, difficult and doubtful, as to make them a fair ground for litigation and thus for more deliberate investigation." We adopted this formula in Mytinger & Casselberry, Inc. v. Numanna Laboratories Corp., 215 F.2d 382, 385 (7th Cir. 1954), but later references are more gingerly. See Milsen Co. v. Southland Corp., supra, 454 F.2d at 366 n.3; Mullis v. Arco Petroleum Corp., 502 F.2d 290, 293 (7th Cir. 1974); Fox Valley, supra, 545 F.2d at 1097-98; W.A. Mack, Inc. v. General Motors Corp., 260 F.2d 886, 890 (7th Cir. 1958); see also Benson Hotel Corp. v. Woods, 168 F.2d 694, 697 (8th Cir. 1948). **[**13]** Most of our cases continue to speak of "reasonable likelihood," but as the appearance of both "reasonable" and "some" likelihood in *Fox Valley* suggests, it is unclear how much practical difference there is between these formulations.

With respect to the scope of appellate review, the picture is especially blurred, as pointed out by Judge Friendly in a dictum in Buffalo Courier-Express, Inc. v. Buffalo Evening News, Inc., 601 F.2d 48, 59 (2d Cir. 1979), that Judge Eschbach of our court has called cogent. Shango v. Jurich, 681 F.2d 1091, 1097 (7th Cir. 1982). Most cases in this and other circuits denote the standard of review either as abuse of discretion, see, e.g., *SEC v. Suter, 732 F.2d 1294, 1301 (7th Cir. 1984)*, or as "clear" abuse of discretion. See quotation in next paragraph from *Alexander; United States Steel Corp. v. Fraternal Ass'n of Steelhaulers, 431 F.2d 1046, 1048 (3d Cir. 1970)*. The older cases, such as *Mytinger & Casselberry, supra, 215 F.2d at 384-85*, are especially emphatic about the limited scope of appellate review. Although the Supreme Court routinely employs the abuse **[**14]** of discretion formulation, see *Doran v. Salem Inn, Inc., supra, 422 U.S. at 932*; *Brown v. Chote, 411 U.S. 452, 457, 36 L. Ed. 2d 420, 93 S. Ct. 1732 (1973)*, and cases cited, it is not clear whether the standard of review was actually at issue in any of the Court's cases; the abuse of discretion standard seems to have been assumed rather than examined. One of our cases implies that there is broader appellate review of an order granting than of an order denying a preliminary injunction, *Milsen Co. v. Southland Corp., supra, 454 F.2d at 369* -- but how much broader is unclear. Several of our cases do not specify a standard of review, but imply that it is the same standard as is used to review district court judgments involving the application of a substantive rule to the facts found by the district judge. *Mullis, Valley Liquors*, and *Omega Satellite Products* are all such cases.

One case says that an order denying a preliminary injunction will not be reversed "unless there is demonstrated to be a clear abuse of the trial court's discretion or clear error in the trial court's findings." *Alexander v. Chicago Park District, supra, 709 F.2d at 467*. **[**15]** A variant of this test, found in several cases, is that a grant or denial of a preliminary injunction will not be reversed unless there has been a clear abuse of discretion, "a certain mistake of law," or clearly erroneous factfindings. E.g., *Atari, Inc. v. North American Philips Consumer Electronics Corp., 672 F.2d 607, 613 (7th Cir. 1982)*. Now it might seem that if the trial judge's findings are not clearly erroneous and he has made no legal **[*385]** errors, there would be no basis for reversal and hence no place for the abuse of discretion standard -- unless the judge was not applying a standard; but we have seen that preliminary injunctions are supposed to be granted or denied in accordance with a standard, and not as a matter of judicial grace. Determinations that involve applying a legal standard to a state of facts are commonly treated as factfindings for purposes of the clearly-erroneous standard, see 9 Wright & Miller, Federal Practice and Procedure §§ 2589-2590 (1971), but in any event are not considered discretionary determinations. The reference to "certain" mistake of law adds little, for any purely legal determination made by the trial judge in **[**16]** granting or denying a preliminary injunction is subject to plenary appellate review, see, e.g., *Pratte v. NLRB, 683 F.2d 1038, 1044 (7th Cir. 1982)*; *Delaware & Hudson Ry. v. United Transport. Union, 146 App. D.C. 142, 450 F.2d 603, 620 (D.C. Cir. 1971)*, just as any purely legal determination underlying a final judgment is. Maybe, however, the formulation in *Atari* is intended to distinguish between ordinary factfindings (including findings resulting from the application of a substantive standard, such as that of negligence, to the who-did-what-to-whom facts), as to which the clearly-erroneous standard clearly applies, and the balancing of harms that is required in a preliminary-injunction decision. The striking of the balance often requires a comparison of imponderables that invites an exercise of judgment by the district judge to which the court of appeals will defer even more broadly than where the judge has applied a substantive standard such as negligence -- provided the judge has not committed a clear error of fact, or an error of law.

Several other decisions in this circuit, however, suggest that the term abuse of discretion when used **[**17]** in the context of appellate review of orders granting of denying preliminary injunctions means just that there are no errors of law and no clearly erroneous findings of fact. Support for this position in this circuit is found in *Hillhaven Corp. v. Wisconsin Dep't of Health & Social Services, 733 F.2d 1224, 1226 (7th Cir. 1984)* (per curiam) ("we can only reverse the district court's action [granting a preliminary injunction] if it is clearly erroneous or represents a mistake of law. The totality of the factors must point to a clear departure from the proper exercise of the district judge's discretion."); *Machlett Laboratories, Inc. v. Techny Industries, Inc., 665 F.2d 795, 798 (7th Cir. 1981)* ("The latter injury . . . is plainly outweighed by the certain injury to Techny of going out of business, and therefore it must be deemed an abuse of discretion to find the opposite."), and *Charles v. Carey, 627 F.2d 772, 776 (7th Cir. 1980)* ("misapplication of the law to particular facts is an abuse of discretion"). Other circuits have suggested that "abuse of discretion" means error, period: "What we mean, when we say that a court abused **[**18]** its discretion, is merely that we think that it made a mistake." *Pearson v. Dennison, 353 F.2d 24, 28 n. 6 (9th Cir. 1965)*; see also *In re Josephson, 218 F.2d 174, 182 (1st Cir. 1954)* (Magruder, J.). Although neither of these was an injunction case, *Clemons v. Board of Education, 228 F.2d 853, 857 (6th Cir. 1956)*, was, and it says that "misapplication of the law to the facts is in itself an abuse of discretion" requiring reversal. See also *Omega Importing Corp. v. Petri-Kine*

Camera Co., 451 F.2d 1190, 1197 (2d Cir. 1971) (Friendly, J.). Finally, many opinions that say "abuse of discretion" appear to review the district court's order as searchingly as they would any nondiscretionary determination. See, e.g., Godinez v. Lane, 733 F.2d 1250, 1262 (7th Cir. 1984); United Church of the Medical Center v. Medical Center Comm'n, 689 F.2d 693, 698-701 (7th Cir. 1982); Dos Santos v. Columbus-Cuneo-Cabrini Medical Center, 684 F.2d 1346, 1349-52 (7th Cir. 1982).

Our discussion of the standard for ruling on requests for preliminary injunctions, and of the standard for **[**19]** appellate review of such rulings, should have made clear that it is not possible to reconcile all the precedents, or even just all the ones in this circuit. But the apparent discord is mostly verbal. Beneath the welter of apparently **[*386]** conflicting precedents we sense agreement on the following principles:

1. ***HN2***[] In every case in which the plaintiff wants a preliminary injunction he must show that he has "no adequate remedy at law," and (unless the statute under which he is suing excuses a showing of irreparable harm, as in *Illinois Bell Tel. Co. v. Illinois Commerce Comm'n, supra, 740 F.2d at 571*) that he will suffer "irreparable harm" if the preliminary injunction is not granted. The absence of an adequate remedy at law is a precondition to any form of equitable relief. The requirement of irreparable harm is needed to take care of the case where although the ultimate relief that the plaintiff is seeking is equitable, implying that he has no adequate remedy at law, he can easily wait till the end of trial to get that relief. (On the distinction between "no adequate **[**20]** remedy at law" and "irreparable harm" see Fiss & Rendleman, Injunctions 59 (2d ed. 1984).) Only if he will suffer irreparable harm in the interim -- that is, harm that cannot be prevented or fully rectified by the final judgment after trial -- can he get a preliminary injunction. ***HN3***[] Where the only remedy sought at trial is damages, the two requirements -- irreparable harm, and no adequate remedy at law -- merge. The question is then whether the plaintiff will be made whole if he prevails on the merits and is awarded damages.

2. In saying that the plaintiff must show that an award of damages at the end of trial will be inadequate, we do not mean wholly ineffectual; we mean seriously deficient as a remedy for the harm suffered. See Semmes Motors, Inc. v. Ford Motor Co., 429 F.2d 1197, 1205 (2d Cir. 1970) (Friendly, J.); 11 Wright & Miller, *supra*, § 2944, at p. 396. A damages remedy can be inadequate for any of four reasons:

(a) The damage award may come too late to save the plaintiff's business. He may go broke while waiting, or may have to shut down his business **[**21]** but without declaring bankruptcy. Of course, even if the plaintiff declares bankruptcy, his trustee in bankruptcy can get a damage award; but probably it will not cover all the losses incident to the bankruptcy. The award may be inadequate even if the plaintiff leaves the business without becoming insolvent. As Judge Friendly noted in a case involving the termination of an automobile dealer, "the right to continue a business in which William Semmes had engaged for twenty years and into which his son had recently entered is not measurable entirely in monetary terms; the Semmes want to sell automobiles, not to live on the income from a damages award." Semmes Motors, Inc. v. Ford Motor Co., supra, 429 F.2d at 1205.

(b) The plaintiff may not be able to finance his lawsuit against the defendant without the revenues from his business that the defendant is threatening to destroy. But in an age of contingent-fee contracts this will rarely be a decisive consideration.

(c) Damages may be unobtainable from the defendant because he may become insolvent before a final judgment can be entered and collected. See discussion in Signode Corp. v. Weld-Loc Systems, Inc., 700 F.2d 1108, 1111 (7th Cir. 1983). **[**22]**

(d) The nature of the plaintiff's loss may make damages very difficult to calculate. Consider a loss, but not a crippling loss (that would be case (a)), of business profits. In principle, any profits lost by Roland as a result of being terminated for breach of an implied exclusive-dealing contract can be monetized, and awarded as damages; but in practice it may be very difficult to distinguish the effect of the termination from the effect of other things happening at the same time, and to project that effect into the distant future. On the difficulties encountered in trying to calculate damages for lost profits, see, e.g., Taylor v. Meirick, 712 F.2d 1112, 1119-22 (7th Cir. 1983); Hayes v. Solomon, 597 F.2d 958, 976-77 (5th Cir. 1979); Note, *Private Treble Damage Antitrust Suits: Measure of Damages for Destruction of All or Part of a Business*, 80 Harv. L. Rev. 1566, 1577-86 (1967).

[*387] 3. ***HN4***[] In deciding whether to grant a preliminary injunction, the court must also consider any irreparable harm that the defendant might suffer **[**23]** from the injunction -- harm that would not be either cured by the defendant's ultimately prevailing in the trial on the merits or fully compensated by the injunction bond that *Rule 65(c) of the Federal Rules of Civil Procedure*s requires the district court to make the plaintiff post. The cases do not usually speak of the defendant's *irreparable* harm, but the qualification is implicit; if the defendant will not be irreversibly injured by the injunction because a final judgment in his favor would make him whole, the injunction will not really harm him. But since the defendant may suffer irreparable harm from the entry of a preliminary injunction, the court must not only determine that the plaintiff will suffer irreparable harm if the preliminary injunction is denied -- a threshold requirement for granting a preliminary injunction -- but also weigh that harm against any irreparable harm that the defendant can show he will suffer if the injunction is granted.

4. Besides showing that he has no adequate remedy at law and that he will suffer irreparable harm unless the preliminary injunction is granted, the plaintiff has another threshold to cross: that of showing some likelihood **[**24]** of succeeding on the merits. It is not enough that the failure to get the injunction will be a disaster for him whereas the injunction would be only a minor inconvenience to the defendant. Equity jurisdiction exists only to remedy legal wrongs; without some showing of a probable right there is no basis for invoking it. But although unwilling therefore to go as far as the Ninth Circuit in *Costandi v. AAMCO Automatic Transmissions, Inc., 456 F.2d 941, 943 (9th Cir. 1972)* (per curiam), which upheld the grant of a preliminary injunction without any consideration at all of the probable outcome of the trial, we agree that the threshold is low. It is enough that "the plaintiff's chances are better than negligible. . . ." *Omega Satellite Products Co. v. City of Indianapolis, supra, 694 F.2d at 123*. See also *Washington Metropolitan Area Transit Comm'n v. Holiday Tours, Inc., 182 App. D.C. 220, 559 F.2d 841, 842 n.1, 842-44 (D.C. Cir. 1977)* ("substantial case on the merits" good enough for a stay pending appeal (analogous to a preliminary injunction), even though "ultimate success by the movant is [not] a mathematical probability," and **[**25]** the court's "own approach may be contrary to movant's view of the merits"); *West Virginia Highlands Conservancy v. Island Creek Coal Co., 441 F.2d 232, 235 (4th Cir. 1971)* ("probable right," used interchangeably with "substantial issues"). And see the excellent discussion in Comment, *Probability of Ultimate Success Held Unnecessary for Grant of Interlocutory Injunction*, 71 Colum. L. Rev. 165 (1971).

5. If the plaintiff does show some likelihood of success, the court must then determine how likely that success is, because this affects the balance of relative harms (point 3 above). The more likely the plaintiff is to win, the less heavily need the balance of harms weigh in his favor; the less likely he is to win, the more need it weigh in his favor. This is a most important principle, and one well supported by cases in this and other circuits, and by scholarly commentary. See *Hyatt Corp. v. Hyatt Legal Services, 736 F.2d 1153, 1159 (7th Cir. 1984)*; *Omega Satellite Products Co. v. City of Indianapolis, supra, 694 F.2d at 123*; *American Hospital Ass'n v. Harris, 625 F.2d 1328, 1331 (7th Cir. 1980)* **[**26]** ("The required showing of probability of success on the merits 'varies with the quality and quantum of harm that [the moving party] will suffer from the denial of an injunction,'" quoting *District 50, United Mine Workers of America v. International Union, United Mine Workers of America, 134 App. D.C. 34, 412 F.2d 165, 168 (D.C. Cir. 1969))*; *Dan River, Inc. v. Icahn, 701 F.2d 278, 283 (4th Cir. 1983)*, and cases cited there; *Roth v. Bank of the Commonwealth, 583 F.2d 527, 538 (6th Cir. 1978)*; *Washington Metropolitan Area Transit Comm'n v. Holiday Tours, Inc., supra, 559 F.2d at 843-44*; *Canal Authority v. Callaway, 489 F.2d 567, 576-77 (5th Cir. 1974)*; *Virginia Petroleum* ***[*388]*** *Jobbers Ass'n v. FPC, 104 App. D.C. 106, 259 F.2d 921, 925 (D.C. Cir. 1958)* (per curiam) (stay pending appeal) ("injury held insufficient to justify a stay in one case may well be sufficient to justify it in another, where the applicant has demonstrated a higher probability of success on the merits"); 11 Wright Miller, *supra*, § 2948, at pp. 453-55; Developments in the Law, *Injunctions*, 78 Harv. L. Rev. 994, 1056 (1965) **[**27]** ("Clear evidence of irreparable injury should result in a less stringent requirement of certainty of victory; greater certainty of victory should result in a less stringent requirement of proof of irreparable injury") (footnote omitted).

A variant of this "sliding scale" approach is illustrated by *Charlie's Girls, Inc. v. Revlon, Inc., 483 F.2d 953, 954 (2d Cir. 1973)* (per curiam): "One moving for a preliminary injunction assumes the burden of demonstrating either a combination of probable success and the possibility of irreparable injury or that serious questions are raised and the balance of hardships tips sharply in his favor." See also *William Inglis & Sons Baking Co. v. ITT Continental Baking Co., 526 F.2d 86, 88 (9th Cir. 1975)*. This approach and the "sliding scale" approach are treated as identical in *American Hospital Ass'n v. Harris, supra, 625 F.2d at 1331*.

The idea underlying these equivalent approaches is that the task for the district judge in deciding whether to grant or deny a motion for preliminary injunction is to minimize errors: the error of denying an injunction to one who will in fact (though no one can **[**28]** know this for sure) go on to win the case on the merits, and the error of granting an injunction to one who will go on to lose. The judge must try to avoid the error that is more costly in the circumstances. That cost is a function of the gravity of the error if it occurs and the probability that it will occur. The error of denying an injunction to someone whose legal rights have in fact been infringed is thus more costly the greater the magnitude of the harm that the plaintiff will incur from the denial and the greater the probability that his legal rights really have been infringed. And similarly the error of granting an injunction to someone whose legal rights will turn out not to have been infringed is more costly the greater the magnitude of the harm to the defendant from the injunction and the smaller the likelihood that the plaintiff's rights really have been infringed.

6. Sometimes an order granting or denying a preliminary injunction will have consequences beyond the immediate parties. If so, those interests -- the "public interest" if you will -- must be reckoned into the weighing process just described. See *Yakus v. United States, 321 U.S. 414, 440-41, 88 L. Ed. 834, 64 S. Ct. 660 (1944)*; **[**29]** *Delaware River Port Authority v. Transamerican Trailer Transport, Inc., 501 F.2d 917, 924 (3d Cir. 1974)*.

7. ***HN5***[] The application of the above principles requires the seasoned judgment of the district court -- what is usually called the court's "discretion," although the use of the term in the present context has been criticized. "Perhaps the most important area where parroting the discretion phrase is likely to lead to wrong decision is the review of the grant of denial of preliminary injunctions." Friendly, *Indiscretion About Discretion*, *31 Emory L.J. 747, 773 (1982)*. As so often in law the trouble comes from using the same word in different senses. When we speak of an issue as being committed to the district court's discretion, intending to imply by this that the scope of appellate review should be extremely limited, we generally have reference to one of three different (but closely related, and sometimes identical) types of issue: one not decided according to a standard; one not susceptible of uniform treatment across cases; one not decided on the basis **[**30]** of evidence reasonably accessible to the appellate court through the record of the proceedings in the trial court. See *Mosey Mfg. Co. v. NLRB, 701 F.2d 610, 615 (7th Cir. 1983)* (en banc); *United States v. McCoy, 517 F.2d 41, 44 (7th Cir. 1975)*; *United States v. Criden, 648 F.2d 814, 817-18 (3d Cir. 1981)*; *Noonan v. Cunard S.S. Co., 375 F.2d 69, 71 (2d Cir. 1967)* **[*389]** (Friendly, J.). Criminal sentences, rulings on most discovery questions, and rulings on evidentiary questions where the issue is prejudicial impact on the jury illustrate the three types of discretionary judgment. Their common characteristic is that either the need for or the feasibility of appellate review is very limited. The trial judge is supposed to tailor a criminal sentence to the particular characteristics of the defendant (including his demeanor) and may weight the various characteristics as he pleases; a proper assessment of jury prejudice requires first-hand observation of the jurors; discovery issues frequently call for managerial rather than juristic judgments. All are determinations where appellate review is limited to **[**31]** deciding whether the district judge abused his discretion -- or even, as in the review of a criminal sentence, whether he exercised discretion; if he did, and the sentence is within statutory limits, the court of appeals cannot reverse. See *United States v. Ely, 719 F.2d 902, 906-07 (7th Cir. 1983)*, and cases cited there.

Rulings on requests for preliminary injunctions, it may be argued, do not have the relevant characteristics of these examples. As in this case, usually they are made on a trial-type record. Many preliminary-injunction hearings take as long as the average federal trial, which lasts only three days. (Estimated from Tables C8 and C9 in the 1983 Annual Report of the Director of the Administrative Office of the U.S. Courts.) The hearing here lasted two and a half days. Moreover, the analytical procedure for deciding whether to grant or deny a motion for preliminary injunction, sketched earlier, constitutes a true legal standard. It does not call for a discretionary -- in the sense of standardless or intuitive -- judgment, or for a consideration of numerous factors none enjoying any particular weight, or for an evaluation of factors inaccessible **[**32]** to a reviewing court (there may of course be credibility issues, but this is no more likely than in the mine run of federal civil cases). The factors to be considered are few and definite; they are as we have said spread out on a record; and they are to be compared in a particular sequence and in accordance with a specific formula which requires first deciding whether the plaintiff has crossed specified thresholds and then weighting the parties' likely harms from the grant and denial of the preliminary injunction, respectively, by the strength of the plaintiff's case.

Although there is a sense in which equitable relief is inherently discretionary because historically, and still to a large extent, there is no absolute right to an equitable remedy, see *Weinberger v. Romero-Barcelo, 456 U.S. 305, 311-13, 72 L. Ed. 2d 91, 102 S. Ct. 1798 (1982)*; *Yakus v. United States, supra, 321 U.S. at 440*; *Meredith v. City of Winter Haven, 320 U.S. 228, 235, 88 L. Ed. 9, 64 S. Ct. 7 (1943)*; *Wisconsin v. Weinberger, 745 F.2d 412, 425 (7th Cir. 1984)*, this is a different meaning of discretion, one that actually cuts against a highly **[**33]** deferential standard of review when as in this case the district court *grants* the preliminary injunction. "The granting of a preliminary injunction is an exercise of a very far-reaching power, never to be indulged in except in a case clearly demanding it." *Warner Bros. Pictures, Inc. v. Gittone, 110 F.2d 292, 293 (3d Cir. 1940)* (per curiam), quoted in *Buffalo Courier-Express v. Buffalo Evening News, supra, 601 F.2d at 59*; see also 11 Wright & Miller, *supra*, § 2942, at p. 368, and cases cited there; and the *Milsen, Shaffer*, and *Singer* cases cited earlier in this opinion. The exercise of a power so far-reaching ought to be subject to effective, and not merely perfunctory, appellate review. "Congress would scarcely have made orders granting or refusing temporary injunctions an exception to the general requirement of finality . . . if it intended appellate courts to be mere rubber-stamps save for the rare cases when a district judge has misunderstood the law or transcended the bounds of reason." *Omega Importing Corp. v. Petri-Kine Camera Co., supra, 451 F.2d at 1197*.

These considerations may explain why, as **[**34]** we pointed out earlier, many cases that recite "abuse of discretion" as the standard of review actually review the district **[*390]** judge's order granting or denying a preliminary injunction as if the standard were clear error (both for pure factfindings and for the district judge's application to those findings of the principles for granting or denying preliminary injunctions) or mere error (for pure legal determinations). In these cases, the words "abuse of discretion" are not being used literally, to refer only to cases where the ruling being reviewed is a discretionary one. It seems, therefore, that the words describe a range of standards (see, e.g., *United States v. Criden, supra, 648 F.2d at 817*), in which the amount of deference given the trial judge's rulings varies with the nature of the ruling -- a range that overlaps clear error, and even error, period. See Friendly, *supra*, at 764, 784; Rosenberg, *Judicial Discretion of the Trial Court, Viewed from Above*, 22 Syracuse L. Rev. 635, 650-53 (1971); the cases cited in these two articles; and the *Pearson, Clemons*, and *Omega Importing* cases cited earlier in this opinion. The **[**35]** other end of the range is described in *Delno v. Market St. Ry., 124 F.2d 965, 967 (9th Cir. 1942)*: "Discretion . . . is abused when the judicial action is arbitrary, fanciful or unreasonable, which is another way of saying that discretion is abused only where no reasonable man would take the view adopted by the trial court." See also *Deitchman v. E.R. Squibb & Sons, Inc., 740 F.2d 556, 563 (7th Cir. 1984)*; *Harrington v. DeVito, 656 F.2d 264, 269 (7th Cir. 1981)*. This may be the appropriate formula when reviewing a determination as to whether a discovery order should have been granted, or whether an objection to a question asked a witness should have been sustained as unduly prejudicing a party in the eyes of the jury. But it does not follow that it is the appropriate formula for reviewing orders granting or denying preliminary injunctions.

Where in this range should appellate review of a decision granting (or denying) a preliminary injunction be located? We have mentioned the factors pushing review toward the upper end of the range, where abuse of discretion merges with clear error (or even mere) error. Other factors push in **[**36]** the other direction. Judge Friendly himself, in his *Omega Importing* opinion from which we quoted earlier, stated that the court of appeals in reviewing such a decision not only must accept the district court's credibility findings, and give due regard to its (other) factfindings, but also must "give proper regard to . . . its 'feel' of the case." *451 F.2d at 1197*. The processing of an application for a preliminary injunction often requires the district judge to negotiate informally but intensively with the parties over such matters as the scheduling of discovery and the scope and time of the hearing, and these negotiations may give the judge a sense for the proper disposition of the application for a preliminary injunction that the appellate court will not be able to obtain from the appeal papers. And we have already noted the presence of imponderable factors when the judge is balancing the harms to the parties from granting or denying the preliminary injunction. Although, considering the nature of the judge's determination and the stakes to the parties, we do not think the term abuse of discretion can be limited to cases where the judge can be said to have acted **[**37]** irrationally or fancifully (*Delno*), we also do not think, considering the imponderable character of the balancing process and the judge's superior feel for the issues which a cold transcript may not fully communicate to the reviewing court, that we are entitled to substitute our judgment for the district judge's. See, e.g., *Wesley-Jessen Division v. Bausch & Lomb Inc., 698 F.2d 862, 864 (7th Cir. 1983)*. ***HN6***[] The question for us is whether the judge exceeded the bounds of permissible choice in the circumstances, not what we would have done if we had been in his shoes.

We need not be any more precise than this about the meaning of "abuse of discretion" in the context of appellate review of orders granting or denying preliminary injunctions in order to decide this case. (Nor need we decide whether the denial of a preliminary injunction should be reviewed more deferentially than a grant, on the theory that all equitable relief is in some -- **[*391]** but perhaps largely historical -- sense discretionary with the trial judge; nor whether the standard of review should be different **[**38]** when the district judge grants or denies a preliminary injunction without having held an evidentiary hearing.) For as we are about to see, the district judge committed a clear factual error and a legal error that require us to set aside his conclusion on the balance of harms, and another legal error with respect to the probable success of Roland on the merits of its antitrust claim.

Applying to the present case the general approach to the analysis of preliminary-injunction cases that we have outlined, we begin by noting that Roland has satisfied the threshold requirements of proving that it has no adequate remedy at law and that it will suffer irreparable harm if preliminary injunctive relief is denied it. Of course it can if it wins at trial get a damage award that will, in principle, compensate it for any interim losses. But the nature of the losses that it fears is such as to make the calculation of these damages a difficult and not very satisfactory process -- better than nothing, but not so sure a method of rectifying the wrong to Roland (if there was a wrong) that we can be confident that none of the harm to it in the interim will be irreparable harm. But we think the district **[**39]** judge clearly erred in finding that without the preliminary injunction Roland probably would go out of business. So far as we can tell, although half of Roland's revenues are derived directly or indirectly from the sale of Dresser construction equipment only 10 percent come from sales of new equipment, which would be cut off if the dealership were cancelled. Roland's revenues from renting Dresser equipment should not be affected by the cancellation of the franchise, at least until its present stock wears out, and that should not be till after the trial is over. Roland's parts business (and therefore its maintenance business as well) will, however, be affected, by the difference between the cost of parts when bought directly from the manufacturer (as Roland now does) and the cost of parts bought from another dealer. The record indicates that the second cost is 20 percent higher than the first. Although Roland sells parts to its customers at an average mark-up of 27 or 28 percent over the cost of buying parts from Dresser, the difference between that mark-up and the 20 percent mark-up that it will have to pay to get the same parts from a dealer might well be too little to cover Roland's **[**40]** selling expenses. But Roland is selling service as well as parts, and its labor costs will not be affected by its not being able to buy parts directly from Dresser.

The greatest weakness in Roland's proof of business losses is that Roland projected its sales of Komatsu equipment to continue at the same, naturally very low, level at which it sold that equipment in the first year of its Komatsu dealership. This is unrealistic. Surely Roland expects to do better in its second and subsequent years. In sum, the loss of the Dresser distributorship will be painful, but it will not be fatal. And bear in mind that we are concerned only with the period between now and the entry of a final judgment; it is only these interim losses that are relevant in deciding whether Roland is entitled to a preliminary injunction.

Turning to the harm to Dresser from the grant of the preliminary injunction, we think the district judge was too confident of his ability to ward off that harm by requiring as a condition of the injunction that Roland maintain Dresser's market share. The judge was right that Dresser faces the prospect of a substantial loss of goodwill if, while this litigation is wending its **[**41]** way to completion, Roland curries favor with Komatsu (with whom Roland's long-range future as a dealer in construction equipment probably lies) by selling Komatsu equipment in preference to Dresser equipment. This is the danger that called forth the restriction that the judge imposed. But a federal judge, however able and experienced, is in no position to supervise a dealership in construction equipment, as the judge undertook to do by requiring that Roland maintain, within "normal economic **[*392]** fluctuations," Dresser's "approximate" market share in central Illinois. The decree may protect Dresser to some extent -- but in doing so it will harm competition between Dresser and Komatsu. And it cannot protect Dresser fully. Dresser "will be frozen into an intimate and continuous relationship with a dealer it no longer wishes to be associated with. . . . One of the reasons the contract was of so short duration and subject to such short cancellation notice may be assumed to be that one of the undoubted rights a manufacturer still has is to use its own judgment with respect to those whom it wishes to appoint as its dealers. To bear this burden for an indefinite number of years **[**42]** is a great hardship." *Jack Kahn Music Co. v. Baldwin Piano & Organ Co., 604 F.2d 755, 764 (2d Cir. 1979)*.

HN7[] Ordinarily the trial judge's balancing of the harms to the parties would be entitled to substantial deference by the reviewing court, in accordance with our earlier discussion of the scope of appellate review -- but not if the balancing is infected by a clear error of fact, or an error of law. The judge in this case made a clearly erroneous finding of fact when he found that Roland probably would go out of business if the injunction was not issued; and he committed an error of law when he failed to consider the possible impact on competition of the provision of the injunction that freezes Dresser's market share until the end of the lawsuit.

Once we set aside the erroneous aspects of the district judge's analysis of the balance of harms, rejecting his finding that Roland probably would go out of business, and his attempt to freeze Dresser's share of Roland's business, we are left with no certain sense of where the balance of harms lies. We cannot say that without the **[**43]** restriction we have disapproved, Dresser will be harmed more if the preliminary injunction is kept in force until the case is tried (no trial date has been set) and judgment entered than Roland will be harmed if the injunction is dissolved. But as there is no clear balance of hardships in favor of the injunction, Roland cannot prevail merely by showing that it has raised a substantial question regarding the legality of Dresser's action in terminating it. It must show that it is more likely than not to win. For only then would the error of denying Roland a preliminary injunction should it later win on the merits be more costly than the error of granting it the injunction should it later lose on the merits.

HN8[] In order to prevail on its section 3 claim, Roland will have to show both that there was an agreement, though not necessarily an explicit agreement (see *Tire Sales Corp. v. Cities Service Oil Co., 637 F.2d 467, 474 (7th Cir. 1980)*; *McElhenney Co. v. Western Auto Supply Co., 269 F.2d 332, 338 (4th Cir. 1959))*, between it and Dresser that it not carry **[**44]** a line of construction equipment competitive with Dresser's, and that the agreement was likely to have a substantial though not necessarily an immediate anticompetitive effect. Regarding the first of these required showings, the record of the preliminary-injunction proceeding contains no evidence that either Roland or any other Dresser dealer agreed with Dresser not to carry a competing manufacturer's line. Nothing in the dealership agreement even hints at a requirement of exclusive dealing, and the fact that after signing the agreement with Dresser Roland applied for a Komatsu dealership is evidence that Roland itself did not think it had made an implied commitment to exclusive dealing. True, Dresser prefers exclusive dealers -- so much so as to be willing to terminate its only dealer in a large marketing area. The district judge believed that evidence of this preference, coupled with the absence of any reason for Dresser's having terminated Roland other than Roland's having taken on an additional line of construction equipment, established a prima facie case of agreement. But an agreement requires a meeting of minds, and there is no evidence that Roland ever thought itself bound **[**45]** to carry only the Dresser line. Indeed, at argument Roland disclaimed any knowledge of what it describes as the implied exclusive-dealing term in the contract; it called it a "secret" term, echoing the district **[*393]** judge's description of exclusive dealing as something "in the mind of" Dresser. One mind is not enough for a meeting of minds. The fact that Dresser was hostile to dealers who would not live and die by its product (as the district judge put it), and acted on its hostility by canceling a dealer who did the thing to which it was hostile, does not establish an agreement, but if anything the opposite: a failure to agree on a point critical to one of the parties. See Turner, *The Definition of Agreement Under the Sherman Act: Conscious Parallelism and Refusals to Deal*, 75 Harv. L. Rev. 655, 686 (1962); *Filco v. Amana Refrigeration, Inc., 709 F.2d 1257, 1266-67 (9th Cir. 1983)*.

Actually, it is not important whether Dresser's antipathy to nonexclusive dealing was secret. Assume that Dresser made clear to Roland and its other dealers that it wanted only exclusive dealers and would exercise its contract right to terminate, immediately **[**46]** and without cause, any dealer who took on a competing line. The mere announcement of such a policy, and the carrying out of it by canceling Roland or any other noncomplying dealer, would not establish an agreement. See, e.g., *Dillon Materials Handling, Inc. v. Albion Industries, 567 F.2d 1299, 1306 (5th Cir. 1978)*. It would be a classic example of the conduct permitted by *United States v. Colgate & Co., 250 U.S. 300, 305-06, 63 L. Ed. 992, 39 S. Ct. 465 (1919)*, a decision whose continued vitality despite much criticism is attested to by the Supreme Court's approving reference to it in *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 104 S. Ct. 1464, 1469, 79 L. Ed. 2d 775 (1984)*. See also *Russell Stover Candies, Inc. v. FTC, 718 F.2d 256,* *260 (8th Cir. 1983)*. True, there is some evidence that Dresser, fearing the competition of Komatsu, made efforts to discover which of its dealers were considering dealing with Komatsu. Surveillance could in some circumstances intimidate -- could be the stick that forced dealers into a tacit understanding not to handle a competitor's goods. See *Yentsch v. Texaco, Inc., 630 F.2d 46, 54 (2d Cir. 1980)*. **[**47]** But there is no evidence that it was such here, when Roland within months after signing a dealership agreement with Dresser went and signed another one with Komatsu. The district judge did not rely on evidence of surveillance in concluding that there was an implicit exclusive-dealing agreement.

Dresser's preference for exclusive dealers, its effort to find out whether its dealers were exclusive dealers, and its terminating Roland when it found out that Roland no longer was its exclusive dealer do not support an inference "both that the distributor communicated its acquiescence or agreement" to exclusive dealing "and that this was sought by the manufacturer." *Monsanto Co. v. Spray-Rite Service Corp., supra, 104 S. Ct. at 1471 n. 9*. But even if Roland can prove at trial that there was an exclusive-dealing agreement, it will have grave difficulty -- we infer from this record -- in proving that the agreement is anticompetitive. The objection to exclusive-dealing agreements is that they deny outlets to a competitor during the term of the agreement. At one time it was thought that this effect alone would condemn exclusive-dealing agreements under section 3 of the Clayton **[**48]** Act, provided that the agreements covered a large fraction of the market. See *Standard Oil Co. v. United States, 337 U.S. 293, 314, 93 L. Ed. 1371, 69 S. Ct. 1051 (1949)* ("*Standard Stations*"). Although the Supreme Court has not decided an exclusive-dealing case in many years, ***HN9***[] it now appears most unlikely that such agreements, whether challenged under section 3 of the Clayton Act or *section 1* of the Sherman Act, will be judged by the simple and strict test of *Standard Stations*. They will be judged under the Rule of Reason, and thus condemned only if found to restrain trade unreasonably. See, e.g., *Jefferson Parish Hospital District No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 1575-76, 80 L. Ed. 2d 2 (1984)* (concurring opinion); *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 333-35, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961)*; *American Key Corp. v. Cumberland Associates , 579 F. Supp. 1245, 1256-57 (N.D. Ga. 1983)*.

[*394] **[**49]** ***HN10***[] The exclusion of one or even several competitors, for a short time or even a long time, is not *ipso facto* unreasonable. The welfare of a particular competitor who may be hurt as the result of some trade practice is the concern not of the federal antitrust laws, see *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 2740 n. 14, 81 L. Ed. 2d 628 (1984)*, but of state unfair competition law, see *Sutliff, Inc. v. Donovan Cos., 727 F.2d 648, 655 (7th Cir. 1984)*, which is not involved in this appeal. The competitor in question, Komatsu, is not even a party to this case.

HN11[] The exclusion of competitors is cause for antitrust concern only if it impairs the health of the competitive process itself. See *Products Liability Ins. Agency, Inc. v. Crum & Forster Ins. Cos., 682 F.2d 660, 663-65 (7th Cir. 1982)*. Hence ***HN12***[] a plaintiff must prove two things to show that an exclusive-dealing agreement is unreasonable. First he must prove **[**50]** that it is likely to keep at least one significant competitor of the defendant from doing business in a relevant market. If there is no exclusion of a significant competitor, the agreement cannot possibly harm competition. Second, he must prove that the probable (not certain) effect of the exclusion will be to raise prices above (and therefore reduce output below) the competitive level, or otherwise injure competition; he must show in other words that the anticompetitive effects (if any) of the exclusion outweigh any benefits to competition from it.

Roland has as yet made very little effort to establish either of these two things. On the present record it appears that Komatsu cannot be kept out of the central Illinois market even if every manufacturer of construction equipment prefers exclusive dealers and will cancel any dealer who switches to the Komatsu line. Komatsu is the second largest manufacturer of construction equipment in the world. Its total sales of such equipment are four times as great as Dresser's. Already it is a major factor in the U.S. construction-equipment market; in some items it outsells Dresser. The nationwide practice of exclusive dealing has not kept **[**51]** Komatsu from becoming a major factor in the U.S. market, apparently in a short period of time. The reason is evident. Since dealership agreements in this industry are terminable by either party on short notice, Komatsu, to obtain its own exclusive dealer in some area, has only to offer a better deal to some other manufacturer's dealer in the area. It need not fear being sued for interference with contract; Roland would not be breaking its contract with Dresser if it gave Dresser the heave-ho, provided it gave 90 days' notice. Maybe if Roland had known that it would be cut off by Dresser as soon as it was, it would have demanded some guarantees from Komatsu to tide it over the period of transition when Komatsu was not yet as well established a name in central Illinois as Dresser (though Dresser itself was in a sense new to the market); and probably Komatsu would have given Roland these guarantees to get a foothold in the central Illinois market. The likeliest consequence of our dissolving the preliminary injunction would be to accelerate Komatsu's efforts to promote its brand through the Roland dealership.

Admittedly this analysis may exaggerate the smoothness with which the **[**52]** competitive process operates. Knowing that it cannot move gradually into central Illinois by persuading dealers to carry its line as a second line, Komatsu may expand more slowly than it would otherwise have done, and at somewhat higher cost. And since the national market in construction equipment appears to be highly concentrated (although the record is scanty in this regard, particularly in its omission of any data on foreign sales, which may conceivably be part of the U.S. market, properly defined), any impediments to new competition may harm consumers by keeping prices at noncompetitive levels -- though whether the industry at present is or is not highly competitive must be a matter of conjecture on this record. But with all this conceded we still cannot agree that Roland has shown a substantial anticompetitive effect, actual or potential, from the alleged exclusive-dealing agreement, when we reflect on Komatsu's **[*395]** strength and on the fact that neither Dresser nor, it appears, any other manufacturer has long-term exclusive-dealing contracts. ***HN13***[] Exclusive-dealing contracts **[**53]** terminable in less than a year are presumptively lawful under section 3. See ABA Antitrust Section, ***Antitrust Law*** Developments 98 (2d ed. 1984); Sullivan, Handbook of the Law of Antitrust 485-86 (1977); cf. Marvel, *Exclusive Dealing*, 25 J. Law & Econ. 1, 6 (1982). This one was terminable in 90 days. Finally, Komatsu undoubtedly has the resources to establish its own dealership in central Illinois, if it cannot lure away someone else's dealer despite the lack of long-term contracts binding dealers to their existing suppliers.

HN14[] The calculus of competitive effect must also include some consideration of the possible competitive benefits of exclusive dealing in this industry. Competition is the allocation of resources in which economic welfare (consumer welfare, to oversimplify slightly) is maximized; it is not rivalry per se, or a particular form of rivalry, or some minimum number of competitors. See *Products Liability Ins. Agency, Inc. v. Crum & Forster Ins. Cos., supra, 682 F.2d at 663-65*. If, as Dresser argues, exclusive dealing leads dealers to promote **[**54]** each manufacturer's brand more vigorously than would be the case under nonexclusive dealing, the quality-adjusted price to the consumer (where quality includes the information and other services that dealers render to their customers) may be lower with exclusive dealing than without, even though a collateral effect of exclusive dealing is to slow the pace at which new brands, such as Komatsu, are introduced. Cf. *Beltone Electronics Corp.*, FTC Complaints and Orders para. 21,934 at p. 22,394 (FTC July 6, 1982). The evidence on this point is slim. But it is at least plausible that Dresser, having if we may judge from its operation in central Illinois only one dealer in a large territory, would want that dealer to devote his efforts entirely to selling Dresser's brand. A dealer who expresses his willingness to carry only one manufacturer's brand of a particular product indicates his commitment to pushing that brand; he doesn't have divided loyalties. See *Sulmeyer v. Coca-Cola Co., 515 F.2d 835, 840 n. 2 (5th Cir. 1975)*. If the dealer carries several brands, his stake in the success of each is reduced. Suppose, though there is contrary evidence in the record, **[**55]** that Roland intended to promote Dresser and Komatsu products with equal vigor. It is still the case that if Roland failed to promote Dresser vigorously, it would have Komatsu to fall back on -- but Dresser might suffer a drastic decline in the central Illinois market, all of its eggs being in the Roland basket. Exclusive dealing may also enable a manufacturer to prevent dealers from taking a free ride on his efforts (for example, efforts in the form of national advertising) to promote his brand. The dealer who carried competing brands as well might switch customers to a lower-priced substitute on which he got a higher margin, thus defeating the manufacturer's effort to recover the costs of his promotional expenditures by charging the dealer a higher price. See Marvel, *supra*, at 6-25.

Therefore, even if, in signing on with Komatsu, Roland did not intend to discontinue its sales of the Dresser line eventually and in the meantime to begin phasing Dresser out, Dresser still has a plausible argument that an exclusive dealer would promote its line more effectively than a nonexclusive dealer, and by doing so would increase competition in the market for construction equipment. The **[**56]** argument is no more than plausible; it is supported by very little evidence; it may be wrong. But when we consider how tenuous is the evidence that exclusive dealing in this market will exclude or even significantly retard Komatsu -- how tenuous even is the inference that there was an exclusive-dealing agreement -- even weak evidence of competitive gains from exclusive dealing must reinforce our conclusion that Roland has failed to show that it is more likely than not to prevail at the trial on the merits.

It should go without saying that although we have concluded that the district judge should not have granted Roland's motion for a preliminary injunction, our **[*396]** discussion of the probable merits of Roland's antitrust claim is tentative. We do not exclude the possibility that on the fuller record made in the trial on the merits Roland will succeed in establishing its claim.

REVERSED.

Dissent by: SWYGERT

Dissent

SWYGERT, Senior Circuit Judge, dissenting.

I commend the majority's effort to delineate a coherent standard for the grant of preliminary injunctions. And I support the test set forth by the court, except I firmly believe that principles of equity jurisprudence **[**57]** require the maintenance of the "abuse of discretion" standard of review which has heretofore been recognized in this and other circuits, but which the majority does not fully adopt or support. Moreover, I find the district court's decision granting Roland a preliminary injunction sustainable even under the majority's interpretation of that standard.

I

Although the majority nominally retains the abuse of discretion standard, it substitutes the common understanding that has been given that term in the grant or denial of preliminary injunctions for a new interpretation, requiring strict scrutiny by the reviewing court for isolated errors of fact or mistakes of law, thus leaving little flexibility for the district court in taking an overall view of the totality of circumstances. Apparently the majority believes that if the district court reaches a conclusion on the evidence with which the reviewing court disagrees, the district court's determination regarding the balance of harms and the overall propriety of granting or denying injunctive relief is entitled to no deference whatsoever.

The majority recognizes that the overwhelming weight of precedent has uncritically accepted the **[**58]** abuse of discretion standard. *See, e.g., Doran v. Salem Inn, Inc., 422 U.S. 922, 923, 45 L. Ed. 2d 648, 95 S. Ct. 2561 (1975)*; *Brown v. Chote, 411 U.S. 452, 457, 36 L. Ed. 2d 420, 93 S. Ct. 1732 (1973)*; *Menominee Rubber Co. v. Gould, Inc., 657 F.2d 164, 166 (7th Cir. 1981)*; *Reinders Brothers, Inc. v. Rain Bird Eastern Sales Corp., 627 F.2d 44, 49 (7th Cir. 1980)*; *Milsen Co. v. Southland Corp., 454 F.2d 363, 369 (7th Cir. 1971)*; *United States Steel Corp. v. Fraternal Ass'n of Steelhaulers, 431 F.2d 1046, 1048 (3d Cir. 1970)*; 11 C. Wright & A. Miller, *Federal Practice & Procedure* § 2962, at 633 (1973) (hereinafter "Wright & Miller") and cases cited therein. As the majority illustrates, *see ante* slip op. at 7-10, although the courts almost unanimously have paid lip service to the abuse of discretion standard, when examined closely the cases reveal several inconsistencies in this respect. *See also Buffalo Courier-Express, Inc. v. Buffalo Evening News, Inc., 601 F.2d 48, 59 (2d Cir. 1979)*. *See generally* Hammond, *Interlocutory Injunctions: Time for* **[**59]** *a New Model*?, 30 U. Toronto L.J. 240, 240-41, 259-63 (1980) (hereinafter "Hammond, *New Model*"); Luebsdorf, *The Standard for Preliminary Injunctions*, 91 Harv. L. Rev. 525, 525-27, 537-40 (1978); *Developments in the Law -- Injunctions*, 78 Harv. L. Rev. 994, 1070 (1965) (hereinafter "*Developments*"). Often the court will add other language to the standard such as "clear error" or "mistake of law." *See ante* slip op. at 4-10; 11 Wright & Miller, *supra*, § 2962, at 633-37. The few courts that have undertaken to define abuse of discretion have failed to agree on a definition. *See ante* slip op. at 7-10; Friendly, *Indiscretion About Discretion*, *31 Emory L.J. 747, 762-64 (1982)*. Most important perhaps, the actual scrutiny with which appellate courts have reviewed preliminary injunction decisions by lower courts has differed markedly irrespective of the seeming consensus on the applicable standard of review. *See ante* slip op. at 7-10. This last inconsistency, which exists in all types of cases, has given rise to the criticism that formulation of the standard of review is a purely verbal exercise because **[**60]** reviewing courts will decide a case as they see fit regardless of the standard of review. If a reviewing court wishes to sustain a decision **[*397]** of a lower court, it will claim deference to the lower court in accord with the applicable standard. If a reviewing court wishes to reverse a decision of a lower court, it will find whatever degree of error is necessary under the applicable standard.

Despite the inconsistencies and the ring of truth to the foregoing criticism, I believe that the majority's discussion of the standard of review represents a fundamental misunderstanding of the role of preliminary injunctive relief in our legal system and the role of the district courts in dispensing that relief. I endorse the four-part test set forth by the majority for determining the propriety of granting a preliminary injunction. I believe, however, that the formulation of that or any other test cannot replace the role of discretion in the decision to grant or deny a preliminary injunction. I further believe that the discretion must lie with the district court in the first instance.

The interlocutory injunction developed in England in the courts of equity. Like other equitable **[**61]** remedies, injunctions were designed to offer relief when legal remedies were unavailable or inadequate to protect the parties' rights. *See Developments, supra*, at 997-98. Thus, it has been said that equity developed to relieve the harshness of the law. Despite the merger in our federal system of equity and law courts, a preliminary injunction is still considered an extraordinary remedy that is granted not as a matter of right. *See* 11 Wright and Miller, *supra*, § 2948, at 428.

A preliminary injunction is different from a remedy at law because it is both equitable and interlocutory. Unlike a remedy at law which generally requires only that a party pay damages, an injunction requires the party enjoined to do something or to refrain from doing something. Framing an injunctive decree is completely unlike assessing damages. Balancing harms and sliding scales are unique to equitable remedies. Determining a plaintiff's likelihood of success on the merits prior to trial is unique to interlocutory relief. To fulfill its role of softening the harshness of the law and offering relief when a legal remedy is unavailable, the rules for granting preliminary injunctive relief **[**62]** must remain flexible and able to account for a myriad of situations. In sum, the decision whether to grant a preliminary injunction does not lend itself to a rigid legal formulation. *See* *Lemon v. Kurtzman, 411 U.S. 192, 201, 36 L. Ed. 2d 151, 93 S. Ct. 1463 (1973)* ("In equity, as nowhere else, courts eschew rigid absolutes and look to the practical realities and necessities inescapably involved in reconciling competing interests. . . ."); *Hecht & Co. v. Bowles, 321 U.S. 321, 329, 88 L. Ed. 754, 64 S. Ct. 587 (1944)* ("The essence of equity jurisdiction has been the power of the Chancellor to do equity and to mould each decree to the necessities of the particular case. Flexibility rather than rigidity has distinguished it."); *cf.* *United States v. McCoy, 517 F.2d 41, 44* (7th Cir.), *cert. denied*, *423 U.S. 895, 46 L. Ed. 2d 127, 96 S. Ct. 195 (1975)* (trial judge is given discretion where "the factors which may properly influence his decision are so numerous, variable and subtle that the fashioning of rigid rules would be more likely to impair his ability to deal fairly with a particular problem than to lead to a **[**63]** just result").

Because the preliminary injunction is an extraordinary remedy that may impose a great burden on defendants and is granted before a full trial or a final determination of liability, the notion of leaving the decision to the unbridled discretion of judges is particularly troublesome. *See* O. Fiss & D. Rendleman, *Injunctions*, at 104-06 (2d ed. 1984); Hammond, *New Model, supra*, at 272 ("A discretionary formula, though fashionable, raises the dangers of potential judicial arbitrariness with respect to a remedy which is often dispositive of litigation and the difficulties of mounting an appeal from a discretion. These difficulties are not really solved by assuming that there will always be a succession of level-headed men called judges on the Clapham omnibus who will exercise considered judgment."). Thus, I endorse the majority formulation of a coherent test to guide both the district courts and the reviewing courts. I believe, however, that within the confines of that **[*398]** test the district court does and must exercise a large degree of discretion. Balancing the harms, determining the plaintiff's likelihood of success on the merits, and balancing **[**64]** together the harms and likelihood of success on a sliding scale all require discretionary judgments. *See* *United States Steel Corp. v. Fraternal Ass'n of Steelhaulers, supra, 431 F.2d at 1048*. Discretion also inheres in the framing of an injunctive decree appropriate to the situation and the parties. *See* *Hecht Co. v. Bowles, supra, 321 U.S. at 329*; *Duran v. Elrod, 713 F.2d 292, 297 (7th Cir. 1983)*, *cert. denied*, *465 U.S. 1108, 104 S. Ct. 1615, 80 L. Ed. 2d 143 (1984)*. There are as many possible decrees in any given case as there are judges. Although the test set forth by the majority will help guide the discretion of the courts, it cannot replace that discretion.

The discretion that inheres in the decision whether to grant a preliminary injunction cannot rest with the reviewing court but must lie in the district court. First, it must be remembered that the district court has the responsibility for making a final determination on the merits of the case. The lower court should also be entrusted to determine whether a preliminary injunction is necessary to preserve a state of affairs such that the court will **[**65]** be able to grant meaningful relief upon conclusion of a full trial. Second, given the flexibility of the standard for preliminary injunctive relief and the necessity for discretionary judgments, two courts could easily arrive at different though equally viable conclusions. Refusal to defer to the decision of the lower court in the first instance frequently will result in a substitution of the judgment of the reviewing court for that of the district court. This is a poor use of judicial resources. Wright, *The Doubtful Omniscience of Appellate Courts*, 41 Minn. L. Rev. 751, 778-80 (1957). Finally, and most importantly, if discretionary judgments must be made (as I believe they must) in deciding to grant or deny preliminary injunctive relief, the trial court with its greater knowledge of the case and the parties and "superior opportunity to get 'the feel of the case'" is in a better position than a reviewing court to make those judgments. *Noonan v. Cunard Steamship Co., 375 F.2d 69, 71 (2d Cir. 1967)* (quoting *Cone v. West Virginia Pulp & Paper Co., 330 U.S. 212, 216, 91 L. Ed. 849, 67 S. Ct. 752 (1947))*; *see* Rosenberg, *Judicial* **[**66]** *Discretion of the Trial Court, Viewed from Above*, 22 Syracuse L. Rev. 635, 662-63 (1971); Wright, *The Doubtful Omniscience of Appellate Courts, supra*, 41 Minn. L. Rev. at 781-82.

The majority lists three types of matters that are generally referred to the district court's discretion: a matter not decided according to a standard; a matter not susceptible of uniform treatment; and a matter not decided on the basis of evidence reasonably accessible to the appellate court through the record of the proceedings in the trial court. *See ante* slip op. at 15-16. The majority lists illustrations of these three types of discretionary judgment: criminal sentences; rulings on most discovery questions; and rulings on evidentiary questions where the issue is prejudicial impact on the jury. Deciding whether to grant a preliminary injunction has similarities with all three types of discretionary matters listed by the majority.

The test delineated today by the majority is unquestionably a standard, but so is a criminal sentencing statute. The key in both situations is that the standard contains a vast amount of flexibility so that the court can take into **[**67]** account the infinite variety of situations that may arise. *See A.L.K. Corp. v. Columbia Pictures Industries, Inc., 440 F.2d 761, 763 (3d Cir. 1971)*. Like formulation of a criminal sentence, the formulation of an injunctive decree is often tailored to the individual circumstances of the case and the parties, and the inherent "rightness" that the situation demands. *See, e.g., Inland Steel Co. v. United States, 306 U.S. 153, 157-58, 83 L. Ed. 557, 59 S. Ct. 415 (1939)*; Wright & Miller, *supra*, § 2947, at 424-26 and cases cited therein; *Developments, supra*, at 1063-64.

[*399] Deciding that a matter is susceptible of uniform treatment assumes the answer to the question posed by the majority's discretionary judgment analysis. If uniform treatment is sought, then a rigid legal formula is developed and discretion is dispensed with. If, on the other hand, discretion is deemed to be an element of a decision, uniformity is not expected. In my view, uniform treatment historically has not been and should not be a goal in preliminary injunction decisions, without, of course, condoning arbitrary decisionmaking. The decision to grant or deny **[**68]** a preliminary injunction should depend on the unique circumstances of and the parties in each case. I do not believe that uniform treatment is even possible under the test adopted today. The test is flexible, at least in theory. The sliding scale approach by its nature is antithetical to uniformity. Unique facts are certain to exist in each case which must be factored into the test. The decision to grant or deny preliminary injunctive relief simply defies mechanical treatment.

Finally, despite the majority's contention that a preliminary injunction hearing produces a record similar to a trial record, a reviewing court does not have the same access to evidence that the district court has or that the reviewing court has after trial. The district court's greater knowledge of the case and the parties and its ability to engage in extensive dialogue with the parties is particularly important in an abbreviated proceeding such as a preliminary injunction hearing. In that kind of hearing the parties do not have the same opportunity to develop their arguments and create their record that is essential to a meaningful review by an appellate court which has no prior acquaintance with the **[**69]** case and little if any opportunity to question the parties. In addition, a reviewing court may not have the same access to findings by the district court before trial as after trial. A trial judge may well be hesitant before trial and before presentation of all of the evidence to make explicit or final findings on witness credibility and other matters which the judge is in a unique position to make for fear that the findings will constrain or prejudice the final resolution of the case. Accordingly, the judge's decision to grant or deny a preliminary injunction may be influenced by unstated and preliminary findings. We should encourage trial judges to refrain from making absolute findings that may impede a fair final resolution on the merits and at the same time to determine the appropriateness of preliminary injunctive relief on the basis of all of the evidence then available to them. I fear that the majority's refusal to defer to the judgments of the trial judge will encourage the opposite; judges will be forced either to make their conclusions explicit and absolute or disregard them. It is worth noting that to the extent a decision by a reviewing court is not based on deference **[**70]** to the trial judge, the decision will have the inevitable and baneful effect of constraining and prejudicing the judge's final resolution of the case.

Because the decision to grant or deny preliminary injunctive relief ought to lie within the discretion of the district court in the first instance, our review of that decision ought to be bound by the abuse of discretion standard. The district court's decision involves some nondiscretionary judgments, such as preliminary factual findings and application of both the proper test for injunctive relief and, where necessary, the correct substantive law. Because the district judge is in a superior position to make preliminary judgments based on incomplete evidence, even these judgments should be reviewed with greater than usual deference. And, even assuming that the district court has committed an isolated error of fact or an isolated mistake of law, the court's ultimate decision to grant or deny preliminary injunctive relief should be reversed only if it constitutes an abuse of discretion under the totality of the circumstances. *See* *Menominee Rubber Co. v. Gould, Inc., supra, 657 F.2d at 166*; *Reinders Brothers, Inc. v. Rain Bird Eastern Sales Corp., supra, 627 F.2d at 49*. **[**71]** The majority rejects this view by focusing exclusively on individual aspects of the case, **[*400]** at the expense of taking an overall view of the issue before the district court.

This circuit has adopted a definition of abuse of discretion that offers expansive protection to the decision of the district court. An abuse of discretion occurs only when no reasonable person could take the view adopted by the trial court. *American Medical Ass'n v. Weinberger, 522 F.2d 921, 924 (7th Cir. 1975)*. *See also* *Duran v. Elrod, supra, 713 F.2d at 297*; *Harrington v. DeVito, 656 F.2d 264, 269 (7th Cir. 1981)*, *cert. denied*, *455 U.S. 993, 71 L. Ed. 2d 854, 102 S. Ct. 1621 (1982)*; *Particle Data Laboratories, Inc. v. Coulter Electronics, Inc. , 420 F.2d 1174, 1178 (7th Cir. 1969)*. It can be argued that such an extreme limitation on the scope of appellate review is inappropriate in preliminary injunction cases in which there is a delineated standard (however flexible) and a large body of case law on the subject. *See generally* *United States v. Criden, 648 F.2d 814, 817-18 (3d Cir. 1981)*; Friendly, **[**72]** *Indiscretion About Discretion, supra*, 31 Emory L.J. at 762-73. At a minimum, however, the abuse of discretion standard of review of preliminary injunction decisions means that the appellate court should not second guess the balances struck by the district court if there is reasonable support in the record for those balances; doubts should be resolved in favor of the district court's decision. At a minimum, abuse of discretion means much greater deference than the majority gives today to the decision of the court below.

II

Turning to the facts of the instant case, I conclude that the district court's decision granting Roland a preliminary injunction was not an abuse of discretion even if the majority's interpretation of that standard of review is employed. That is, even assuming that isolated errors of fact or mistakes of law all but erase any discretion that the district court might otherwise have, I can find no such errors in this case.

The majority concedes that Roland satisfied the threshold requirements of proving that it has no adequate remedy at law and that it will suffer irreparable injury if injunctive relief is denied. *Ante* slip op. at 20. Based upon its **[**73]** *de novo* review of the evidence, the majority decides that the district court has committed errors of fact and, as a result, the district court's judgment as to the balance of harms is entitled to no deference. The majority then itself concludes that the balance of harms between Roland and Dresser is approximately equal and thus that Roland must show a substantial likelihood of success on the merits. Finding that Roland has failed sufficiently to show an exclusive dealing agreement with anticompetitive effect, the majority concludes that preliminary injunctive relief is unwarranted.

There are several holes in the majority's conclusion that the district court clearly erred in finding tha Roland would probably go out of business if its Dresser distributorship is terminated. The majority concedes that the purchase of

Dresser parts from other dealers at a twenty percent markup could render the sales of parts unprofitable but concludes that Roland could still derive profits on the sale of service in connection with the parts business. There is no evidence and no guarantee, however, that the profits derived from the sale of service are sufficient to render the parts business ultimately **[**74]** profitable. The majority also finds that Roland's revenues from the rental of Dresser equipment "should not be affected by the cancellation of the franchise, at least until its present stock wears out, and that should not be till after the trial is over." *Ante* at 391. In the absence of knowing the size and condition of Roland's present stock of rental equipment, the lifespan of such equipment, or when the trial will be over, the majority's finding is untenable. The majority also finds that Roland's projected future earnings from sales of Komatsu equipment is unrealistically low. The majority, however, offers no more realistic projection. Purely speculative earnings should not be the basis for denying preliminary injunctive relief. The court can take **[*401]** appropriate action if and when those earnings come to pass. If Roland's earnings from the sales of Komatsu equipment increase to the point that the injunction is no longer necessary to protect Roland's status as an ongoing business, the court can always dissolve or modify the injunction. *See* *United States v. Swift & Co., 286 U.S. 106, 119, 76 L. Ed. 999, 52 S. Ct. 460 (1932)*; *Developments, supra* **[**75]** , at 1080-86. Finally, the majority completely ignores the loss of goodwill, business reputation, and credit rating that Roland will suffer if its Dresser distributorship is terminated. *Roland Machinery Co. v. Dresser Industries, Inc.*, No. 84-3038, Order of March 27, 1984, at 8 (C.D. Ill.) (hereinafter "Order"). *See* *Menominee Rubber Co. v. Gould, Inc., supra, 657 F.2d at 167*; *Reinders Brothers, Inc. v. Rain Bird Eastern Sales Corp., supra, 627 F.2d at 53*. *See generally* Comment, *The Irreparable Harm Requirement for Preliminary Injunctive Relief in Antitrust Distributor Termination Cases*, 61 B.U.L. Rev. 507, 516-21 (1981).

At a minimum, Roland will lose twenty-four percent of its annual gross profits if Dresser terminates Roland's distributorship. *See* Operating Statement of Roland from Nov. 1, 1982-Oct. 31, 1983, Plaintiff's Exhibit No. 11A at 2. This assumes that Roland will be able to continue its sales of Dresser parts at a twenty percent markup and that Roland will lose no revenues on its rental of Dresser equipment. This figure does not take into account the loss of profits on service rendered in connection with **[**76]** the sale of new Dresser equipment or the loss of revenues as a result of Roland's loss of goodwill, business reputation, and credit rating. This figure is sufficient in my mind to support the testimony of Roland's treasurer and comptroller who concluded, after reviewing Roland's financial records, that Roland could not survive as an ongoing business past 1985 if Dresser were allowed to terminate Roland's distributorship. See Preliminary Hearing Transcript, vol. 1, at 81. In sum, the evidence supports and nothing the majority has stated indicates any error in the district court's conclusion that Roland would probably disappear as a business entity if Dresser did not continue to supply Roland with new machines and parts. See Order at 8.

Even if there is only a small likelihood that Roland will go out of business if its Dresser distributorship is terminated, that possibility must be considered because the harm to Roland, if its business is destroyed, is so great. A small business enterprise is endowed with a "soul" identified with its owner who has created and nurtured the enterprise into a useful and successful business. As the majority recognizes, *see ante* slip op. at 11, **[**77]** the harm to the owner from the loss of a business enterprise is not compensable. Earl Roland "want[s] to sell [construction equipment machinery], not to live on the income from a damages award." *Semmes Motors, Inc. v. Ford Motor Co., 429 F.2d 1197, 1205 (2d Cir. 1970)*. *See also* *Milsen Co. v. Southland Corp., supra, 454 F.2d at 366*; *Bateman v. Ford Motor Co., 302 F.2d 63, 66 (3d Cir. 1962)*.

Even assuming that Roland would not be forced out of business if Dresser terminated the distributorship, Roland will still suffer substantial harm in terms of loss of profits and loss of goodwill and business reputation. This harm is given little weight by the majority. The majority merely finds that Roland will be able to continue in business if its Dresser distributorship is terminated and concludes that the harm to Roland if the injunction is not granted is equivalent to the harm to Dresser if the injunction is granted. *See ante* slip op. at 21-23.

In assessing the harm to Dresser that the injunction will cause, the majority dismisses as unworkable the district court's conditional decree that requires Roland to maintain Dresser's **[**78]** market share within normal economic fluctuations. *Ante* slip op. at 21-22. The majority merely substitutes its judgment for that of the district court. The majority ignores the condition of the decree which permits Dresser to obtain additional distributors in Roland's territory. See Order at 15. The majority also ignores the district court's finding that **[*402]** there was no evidence to support Dresser's contention that Roland would cease or had ceased vigorously to market Dresser products. See Order at 8-9. Drafting a conditional decree so as to protect the interests of all of the parties is entirely appropriate. *See* Inland Steel Co. v. United States, supra, 306 U.S. at 156-58; Milsen Co. v. Southland Corp., supra, 454 F.2d at 369. I see no reason to doubt the district court's competence to enforce the decree in this instance. I would commend the district court for its sensitivity to the interests of both parties.

The mistake of law the majority identifies is the district court's failure "to consider the possible impact on competition of the provision of the injunction that freezes Dresser's market share until the end of the lawsuit. **[**79]** " *Ante* at 392. In my view, the majority's so-called legal error is irrelevant in determining if the district court properly granted a preliminary injunction. Whether a particular term of the preliminary injunction has anticompetitive effects goes only to the question of the proper scope of the decree, not to the question of whether, on balance, the plaintiff or the defendant would suffer more by the imposition of some form of injunctive relief.

I agree with the majority that the injunctive decree, even as conditioned by the district court, cannot fully protect Dresser. Nevertheless, I believe the majority has not come close to showing that the balance struck by the district court was clear error, let alone an abuse of discretion. *Cf.* Menominee Rubber Co. v. Gould, Inc., supra, 657 F.2d at 167 ("The imbalance between the hardship [the distributor] would suffer if terminated [including the loss of good will and disruption of business] versus the hardship [the defendant] would suffer if the status quo were maintained is . . . apparent . . ."); Reinders Brothers, Inc. v. Rain Bird Eastern Sales Corp., supra, 627 F.2d at 53 (balance of harms **[**80]** found in favor of plaintiff where termination of distributorship would damage plaintiff's goodwill, plaintiff continued to use defendant's product, and defendant was free to set up competing distributors in plaintiff's territory); Milsen Co. v. Southland Corp., supra, 454 F.2d at 366 ("Courts which have entered injunctions against [franchise] terminations have weighed the equities and found the plaintiff's side more substantial . . .").

Concluding that the balance of hardships is even, the majority holds that Roland must show that it was more likely than not that Roland would prevail on the merits of its claim that Dresser engaged in an exclusive dealing policy in violation of section 3 of the Clayton Act, 15 U.S.C. § 14 (1982). The district court concluded that Roland raised a "substantial question" whether there existed an implied exclusive dealing arrangement between Roland and Dresser which tended to substantially lessen competition in the relevant market. Order at 14. Even without the benefit of the newly-clarified test announced today, the district court applied the correct standard for determining Roland's likelihood of success **[**81]** on the merits given the court's finding that the balance of harms tipped decidedly in favor of Roland. Therefore, the district court's entire analysis is sustainable even under the majority's interpretation of the abuse of discretion standard.

In addition, I believe that the evidence supports the conclusion that Roland is more likely than not to prevail on its section 3 claim. I am not as confident as the majority that *Colgate, see* United States v. Colgate & Co., 250 U.S. 300, 306-07, 63 L. Ed. 992, 39 S. Ct. 465 (1919), retains much validity with respect to exclusive dealing claims which arguably are subject to the rule of reason rather than a per se rule. *See* Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 104 S. Ct. 1464, 1470, 79 L. Ed. 2d 775 (1984) ("It is of considerable importance that . . . concerted action on non-price restrictions, be distinguished from price-fixing agreements, since under present law the latter are subject to per se treatment and treble damages. On a claim of concerted price-fixing, the antitrust plaintiff must present evidence sufficient to carry its burden of proving that there was such an agreement."). **[**82]** **[*403]** Nevertheless, there is sufficient evidence in the record that Dresser did more than merely independently maintain an exclusive dealing policy.

Dresser engaged in extensive surveillance of Roland and other distributors which Dresser believed had or might sign agreements to deal with Komatsu. Dresser's Senior Vice-President of Operations and Acting President of the Construction Equipment Group requested reports on Dresser distributors dealing with Komatsu and such reports were prepared. *See* Plaintiff's Exhibits 34, 35, 52, 53, & 67, at 110-17. Dresser's President of Construction Equipment International instructed a Regional Manager to monitor Roland at the time Roland was preparing to sign an agreement with Komatsu. *See* Plaintiff's Exhibit 67, at 125. A Dresser Territorial Sales Manager obtained notes from another distributor of a purported conversation with Roland concerning the Komatsu contract. *See* Hearing Transcript, vol. 2, at 204-05; Plaintiff's Exhibit 63, at 52-55. There is also evidence suggesting that Dresser offered one distributor an additional incentive, *i.e.*, an additional territory, to induce the distributor not to sign an agreement **[**83]** with Komatsu. *See* Plaintiff's Exhibit 58, at 59-60. This evidence is sufficient at this stage to show that Dresser's conduct more likely than not exceeded the type of conduct permitted under *Colgate, supra.* *Cf. Albrecht v. Herald Co., 390 U.S. 145, 149-50, 19 L. Ed. 2d 998, 88 S. Ct. 869 (1968)* (combination found to exist where manufacturer hired second distributor to compete with first distributor who was not following suggested price); *United States v. Parke, Davis & Co., 362 U.S. 29, 45-47, 4 L. Ed. 2d 505, 80 S. Ct. 503 (1960)* (agreement found to exist where acquiescence of retailers in suggested prices was secured by threats of termination); *FTC v. Beech-Nut Packing Co., 257 U.S. 441, 454-55, 66 L. Ed. 307, 42 S. Ct. 150 (1922)* (institution of policing system to detect price-cutters and refusing to sell to price-cutters until they agreed to conform to suggested prices found to exceed the conduct permitted under *Colgate*); *Greene v. General Foods Corp., 517 F.2d 635, 658 (5th Cir. 1975)*, *cert. denied*, *424 U.S. 942, 47 L. Ed. 2d 348, 96 S. Ct. 1409 (1976)* (institution **[**84]** of "device for policing the conduct of distributors" and "monitoring of [distributor's] pricing to his . . . customers" found to go "far beyond the simple announcement of terms and refusal to deal with a noncomplying independent distributor that is still permissible under *Colgate*"). *See generally* L. Sullivan, *Handbook of the Law of Antitrust* § 139, at 393-95 (1977). As the district court found, *see* Order at 10-11, Dresser offered no persuasive evidence of its reason for terminating Roland's distributorship other than an implied exclusive dealing condition. While this evidence may not be sufficient to ultimately prove the existence of an agreement, it is sufficient at this early stage of the litigation to meet the majority's greater than not likelihood test.

Finally, in concluding that Roland failed to establish any anticompetitive effect resulting from Dresser's conduct, the majority completely ignores the evidence before and the findings of the district court. Roland argued before the district court that the relevant geographic market included those counties that Roland contracted to service for Dresser. Dresser offered no evidence concerning the relevant **[**85]** geographic market. The district court therefore defined the relevant geographic market as that part of Central Illinois in which Roland normally receives requests and supplies bids from construction equipment consumers. *See* Order at 11-12. The majority does not dispute this finding, but discusses Komatsu's standing in both the world and national markets for construction equipment. *See ante* slip op. at 26-27. The majority finds that "the nationwide practice of exclusive dealing has not kept Komatsu from becoming a major factor in the U.S. market" and concludes that the practice will not do so in Central Illinois. *Id.* This conclusion ignores (but does not refute) the district court's findings that Komatsu had tried but failed to infiltrate the Central Illinois market through the use of exclusive dealers and that the Central Illinois market **[*404]** is unique because it is "the backyard" of Caterpillar, "the world's number one producer and seller of construction equipment." Order at 12-13. The majority suggests that its decision will actually help Komatsu's entry into the market because "the likeliest consequence of our dissolving the preliminary injunction would **[**86]** be to accelerate Komatsu's efforts to promote its brand through the Roland distributorship." *Ante* at 394. In fact, the evidence shows that exclusive Komatsu distributorships shave failed to survive in Central Illinois and Roland itself has been unable to produce sufficient profits from the sale of Komatsu products to survive. Of course, when the distributor fails, Komatsu's attempt to infiltrate the market also fails. On the basis of this evidence, the district court concluded: "Removal of the Dresser distributorship would probably [*i.e.*, more likely than not] doom Roland to the same end that all other Komatsu distributors have fallen [and] effectively prevent Komatsu from entry into the Central Illinois market." Order at 13. The district court's conclusion is based on the evidence presented to the court and is not clearly erroneous.

Finally, although the district court does not mention this finding in its discussion on the merits of Roland's section 3 claim, the court earlier in the opinion notes:

Only recently has the construction equipment machinery market engaged in significant price competition, having previously operated under the pricing "umbrella" of the **[**87]** dominating market leader Caterpillar. Apparently non-price factors dictated the decisions of most construction machinery purchasers in the past, a trend Dresser apparently anticipates in the future. . . .

Order, at 9 n.3. Roland apparently quoted lower prices on Komatsu equipment when submitting price quotations to customers on competing Dresser and Komatsu machinery. *Id.* This suggests that the entry of foreign competitors such as Komatsu into the United States market has triggered some price competition in the industry. At least it suggests that Komatsu may be offering consumers a lower-priced alternative. If this is so, the consumer value, as the majority calls it, is clearly promoted by Komatsu's entry into the construction equipment market.

The majority's analysis of the instant case is precisely the type of substitution of judgment about which I warned in the first part of this dissent. I find the district court's decision well-reasoned, based on the evidence, and without either errors of fact or mistakes of law. Notwithstanding its rhetorical reaffirmation of the abuse of discretion standard, the majority applies that standard in a way that allows it to reverse **[**88]** the judgment below when, in its view, the district court has committed any isolated "clear" error of fact or "mere" error of law. Indeed, the majority undertakes a sweeping *de novo* review of the evidence and reaches a conclusion contrary to that of the district court. Such *de novo* review usurps the authority of the district court to decide whether a preliminary injunction is necessary to protect the interests of the parties pending trial and the court's ability to render final relief after trial. Moreover, the decision by the majority, despite its disclaimer, will necessarily prejudice the district court's ultimate decision after a full trial. I would affirm the district court's grant of a preliminary injunction.

Terre Du Lac Asso. v. Terre Du Lac, Inc.

Brownlee, III, Jefferson City, Missouri, for Defendants.

Judges: Hungate, District Judge.

Opinion by: HUNGATE

Opinion

[*258] MEMORANDUM

HUNGATE, District Judge.

Numerous pretrial motions are pending in this action, including four motions to dismiss as to which the Court heard oral argument on August 9, 1984. The action is premised upon a sixteen-count complaint arising out of defendants' actions with regard to the sale of land in a particular subdivision.

Initially, and apart from the merits of the pending motions, the Court declines to exercise pendent jurisdiction over counts seven through fourteen. With the Court having, as it does, some 360 pending lawsuits, justice and the effective administration of courts are best served by permitting plaintiff's **[**2]** eight pendent counts to be dealt with in the state court. [1] As noted by Congressman Neal Smith, Chairman of the House Appropriation Committee's Subcommittee on Commerce, Justice, State and Judiciary, in an interview published in *The Third Branch*, vol. 16, no. 8 (Aug. 1984), the judiciary can alter its own workload to some extent for the purpose of dealing with increasing caseloads. The courts may some day have to cease looking elsewhere for help and examine their own operations

[1] Anyone who disagrees with this proposition should attempt the formulation of suitable, comprehensible jury instructions for a case with nine parties, eight federal counts, and eight state counts.

and rulings in situations where alternative remedies are available and are adequate to compensate for any injuries sustained.

The court cannot be governed by, but must not be oblivious to, the docket impact of its rulings. For example, district courts face an incipient epidemic of civil RICO treble damage cases. If the present litigation **[**3]** blizzard continues unabated, simply adding judges will not remedy the problems **[*259]** of justice delayed being justice denied. Accordingly, plaintiff's state law claims will be dismissed without prejudice.

Defendants, in their four separate motions to dismiss plaintiff's amended complaint, urge dismissal of each of the remaining eight counts. Counts one through six are based on the Interstate Land Sales Full Disclosure Act, *15 U.S.C. § 1701 et seq.* (Land Sales Act); count fifteen is based on the Racketeer Influenced and Corrupt Organizations Act (RICO), *18 U.S.C. § 1961 et seq.*; and count sixteen is based on the Sherman Antitrust Act, *15 U.S.C. § 1 et seq.* (Sherman Act).

Plaintiff association purports to sue both on its own behalf and for its members as purchasers in the Terre du Lac subdivision. Essentially, plaintiff's complaint seeks redress for injuries allegedly sustained as a result of unfulfilled promises as to numerous aspects of living in the subdivision. Specifically, plaintiff complains of unfinished roads, water and sewage systems, failure to transfer ownership of various amenities to the association, utility service charges, and use of the country club facilities.

[4]** As noted above, counts one through six allege violations of the Land Sales Act, which provides that "[a] purchaser or lessee may bring an action at law or in equity against a developer or agent if the sale or lease was made in violation of section 1703(a) of this title." § 1709(a). Clearly, the plaintiff association does not have standing to sue on its own behalf as to these counts, since it does not allege any purchase or lease from defendants. Plaintiff asserts, however, that it has associational standing to represent the claims of its members under these counts. Defendants vigorously contest this assertion.

In *Warth v. Seldin, 422 U.S. 490, 511, 95 S. Ct. 2197, 2211, 45 L. Ed. 2d 343 (1975)*, the Court found that an association could have representative standing, even without injury to itself, so long as any one member satisfies the requirement of justiciability and "so long as the nature of the claim and of the relief sought does not make the individual participation of each injured party indispensible to proper resolution of the cause. . . ." The requirements for associational standing were further clarified in *Hunt v. Washington Apple Advertising Commission, 432 **[**5]** U.S. 333, 343, 97 S. Ct. 2434, 2441, 53 L. Ed. 2d 383 (1977)*:

> Thus we have recognized that an association has standing to bring suit on behalf of its members when: (a) its members would otherwise have standing to sue in their own right; (b) the interests it seeks to protect are germane to the organization's purpose; and (c) neither the claim asserted nor the relief requested requires the participation of individual members in the lawsuit.

In *Hunt, id.*, a Washington state agency sought to challenge the constitutionality of a North Carolina statute requiring that all apples sold or shipped into North Carolina in closed containers be identified by only the applicable federal grade or a designation that the apples were not graded. The Supreme Court held that the state agency did have associational standing, noting that "neither the interstate commerce claim nor the request for declaratory and injunctive relief requires individualized proof and both are thus properly resolved in a group context." *Id. at 344, 97 S. Ct. at 2442*.

Assuming, *arguendo*, that plaintiff fulfills the first two *Hunt* requirements for associational standing, the Court finds that plaintiff **[**6]** fails to satisfy the third requirement that "neither the claim asserted nor the relief requested requires the participation of individual members in the lawsuit." Counts one, two, four, and the portions of count six which incorporate the first three counts, are based on defendants' alleged fraudulent representations and course of business as to plaintiff's members. That being the case, it is clear that each injured party must participate in the lawsuit in order to divulge the extent of the misrepresentation to which the purchaser was exposed.

Plaintiff argues that it can establish the existence and breach of promises **[*260]** without the need of *each* individual member, Memorandum in Opposition to Defendants' Motions to Dismiss Plaintiff's First Amended Complaint at 14, and that so long as this is established as to a sufficient number of members to justify specific performance, there is no need for individual participation. However, the Court does not agree with plaintiff's apparent contention that the third *Hunt* requirement precludes associational standing only when the nature of the relief sought requires individual participation by each member. Rather, both the relief **[**7]** and the claim must be able to proceed without participation of individual members. Although plaintiff's associational requests for relief do not require such participation, their claims of fraud, upon which the requests for relief are predicated, must each be supported with testimony as to particular fraudulent misrepresentations. This, in turn, requires individual participation by individual members alleging injury. *See, i.e.,* *Harris v. McRae, 448 U.S. 297, 321, 100 S. Ct. 2671, 2690, 65 L. Ed. 2d 784 (1980)* (women's group lacked standing to raise free exercise challenge to Hyde Amendment, since free exercise case necessitates showing of coercive effect of enactment as it operates against individual in practice of religion).

This reasoning does not apply to count three or to the portion of count six which charges aiding and abetting as to count three. Count three alleges injury resulting from the issuance of false property reports. To establish defendants' liability for false property reports under the Land Sales Act, "a plaintiff is not required to prove that each purchaser relied in some way on the omission or misrepresentation but only that a material misrepresentation or **[**8]** omission existed in the statement of record at the time the property was sold." *Bryan v. Amrep Corp., 429 F. Supp. 313, 317 (S.D.N.Y.1977)*. Neither the nature of the claim asserted nor the relief requested requires individual participation.

Nonetheless, the Court finds that plaintiff also lacks standing as to these claims under the reasoning set forth in *Associated General Contractors of North Dakota v. Otter Tail Power Co., 611 F.2d 684 (8th Cir.1979)*. [2] In that case, a nonprofit association, with both union and nonunion general contractors as members, alleged that an agreement between defendant corporations and numerous labor unions violated antitrust and state labor laws. The Eighth Circuit held that "the association is clearly not in a position to speak for its members. . . . Their status and interests are too diverse and the possibilities of conflict too obvious to make the association an appropriate vehicle to litigate the claims of its members." *Id. at 691*. The Court stated in support:

> Some members are not qualified and others are not willing to work on the project; some stand to benefit from working on the project under the Agreement and still others **[**9]** will be hurt by not being able to do so.

Id. Significantly, the Court's finding of potential conflict was made despite the fact that the association had voted unanimously to bring the lawsuit, observing that it is the Court's responsibility to determine whether members' interests required individual representation. *Id*.

Here, the Court need not search extensively in order to find potential conflict. Some members, as argued by defendants, may believe that the value of their property is diminished by the very fact of this lawsuit, or may find that it is not in their best interests to have their mandatory dues expended in this fashion. One defendant is also a board member of the plaintiff association.

As noted in *Minnesota Public Interest Research Group v. Selective Service System, 557 F. Supp. 925, 935 (D.Minn.1983)*, the Eighth Circuit "appears fairly ready to find that a diversity of view necessitates **[**10]** individualized participation, preventing representational standing." In light of the Eighth Circuit's holding, the Court must reject plaintiff's argument for the more **[*261]** liberal approach taken by the Tenth Circuit in *National Collegiate Athletic Association v. Califano, 622 F.2d 1382 (10th Cir.1980)*. Accordingly, all of plaintiff's claims under the Land Sales Act must be dismissed without prejudice to the right of any individual members to seek relief on their own behalf.

---

[2] This reasoning is equally applicable to the Land Sales Act counts disposed of *supra*.

Plaintiff's lack of associational standing, as set forth above in regard to its members' claims under the Land Sale Act, also mandates dismissal of its members' claims in counts fifteen and sixteen. In these latter two counts, however, under RICO and the Sherman Act, plaintiff has asserted standing on its own behalf in addition to alleging associational standing. The Court, therefore, addresses plaintiff's claims under these counts separately.

As to plaintiff's RICO count, the Court will sustain defendants' motions to dismiss for the reason that none of the named defendants have been criminally convicted of any of the predicate acts listed in RICO. [3] The "pattern of racketeering activity" alleged **[**11]** by plaintiff consists of mail fraud, in that defendants are charged with mailing false property reports, and false representations to potential purchasers, and receiving checks from purchasers through the mail. However, as conceded orally by counsel for plaintiff, none of these defendants have been convicted of any of the alleged predicate acts of mail fraud.

In a recent and well-reasoned decision, the Second Circuit has determined that criminal conviction of a predicate act must precede a private civil suit under RICO. *Sedima, S.P.R.L. v. Imrex Co., 741 F.2d 482 (2d Cir.1984)*. In *Sedima*, the distinguished Second Circuit examined the statute itself, its legislative history, and previous case law; all of which, it concluded, suggest the necessity of restricting the availability of **[**12]** RICO's civil penalties to those persons whose potential (defendants) have been found criminally guilty of committing a predicate act. Otherwise, RICO would "permit defendants in every 'garden-variety' fraud or securities violation case to be stigmatized as 'racketeers', on the basis of a preponderance of the evidence. . . ." *Id., at 503*.

To find otherwise would also allow treble damages to be awarded on only a preponderance of the evidence, and would further have a severe effect on the court's dockets.

The Court also finds plaintiff's antitrust claim on its own behalf to be without merit. In count sixteen, plaintiff alleges that defendants are violating ***antitrust law*** by way of an illegal tie-in arrangement between golf memberships in the Terre du Lac Golf and Country Club and lots offered for sale by defendants in the subdivision. Plaintiff complains of defendants' practice of waiving the membership initiation fee for persons whose lot is purchased from defendants, whereas those persons who purchase lots from anyone else and desire to obtain a golf membership must pay a substantial initiation fee. Plaintiff alleges that this practice precludes sellers from obtaining the fair **[**13]** market value of their lots.

In arguing the merits of defendants' motions to dismiss, all parties rely on the recently decided case of *Jefferson Parish Hospital District No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*. As noted therein, "the essential characteristic of an invalid tying arrangements lies in the seller's exploitation of its control over the typing product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms." *Id. at 1558*.

The Court agrees with defendants that no such tying is alleged by plaintiff's complaint, and that plaintiff has failed to state **[*262]** a claim for which relief could be granted under the antitrust laws. Purchasers are not required to buy golf club memberships in order to buy land in the subdivision, nor are they required to buy land from the defendants in order to purchase golf club memberships. Accordingly, the Court finds that count sixteen must be dismissed.

Also pending in this action is a motion to intervene as defendant by the Missouri Public Service Commission and a motion to vacate the Court's August **[**14]** 9, 1984, protective order. Because this order dismisses plaintiff's complaint in its entirety, those motions are moot.

ORDER

A memorandum dated this day is hereby incorporated into and made a part of this order.

---

[3] The determination whether a prior criminal conviction is a prerequisite to a civil RICO recovery was left open in the recent case of *Alexander Grant and Company v. Tiffany Industries, Inc., 742 F.2d 408 (8th Cir.1984)*.

IT IS HEREBY ORDERED that the Court declines to exercise pendent jurisdiction as to Counts VII through XIV, and those counts are dismissed without prejudice.

IT IS HEREBY FURTHER ORDERED that the motion to dismiss filed by defendants Terre du Lac, Inc., and James O. Kwon be and the same is granted.

IT IS HEREBY FURTHER ORDERED that the motion to dismiss filed by defendant CIT Corporation be and the same is granted.

IT IS HEREBY FURTHER ORDERED that the motion to dismiss filed by defendants Terre du Lac Golf and Country Club, Inc., Terre du Lac Country Club Associates, Sensibar Enterprises, Inc., and Moill, Ltd., be and the same is granted.

IT IS HEREBY FURTHER ORDERED that the motion to intervene filed by the Missouri Public Service Commission be and the same is denied as moot.

IT IS HEREBY FURTHER ORDERED that the motion to vacate the protective order entered August 9, 1984, be and the same is denied as moot.

Thomas J. Boodell, Jr., Boodell, Sears, Sugrue, Giambalvo & Crowley, Chicago, Illinois, for Defendant.

Judges: Cummings Chief Judge, Eschbach and Flaum, Circuit Judges. Flaum, Circuit Judge, concurring in part and dissenting in in part.

Opinion by: CUMMINGS

Opinion

[*1253] CUMMINGS, Chief Judge:

These five appeals have been consolidated and grow out of antitrust litigation involving an alleged nationwide price-fixing conspiracy among manufacturers of folding cartons in violation of the Sherman Act (*15 U.S.C. § 1*). The appeals have been filed by two former defendants and six former class-member plaintiffs and relate chiefly to the district court's disposition of an approximately $6,000,000 reserve fund established to pay late claims and to meet various expenses **[**2]** and contingencies connected with the distribution of the $200,000,000 settlement fund. The litigation is fully described in the joint memorandum opinion of District Judges Robson and Will reported in *557 F. Supp. 1091 (N.D. Ill. 1983)*.

On September 19, 1979, the district court entered a final judgment approving the settlement agreement providing for payment by the 25 defendants of $200,000,000 into a fund for distribution to the plaintiff class. Six days thereafter the court appointed the Folding Carton Administration Committee ("Administration Committee") which is also involved in these appeals. The settlement agreement provided for a cut-off date of September 6, 1979, for claims but later claims were honored with judicial assent.

On March 6, 1980, the district court approved distribution of 97% of the fund, which by then had grown to approximately $206,000,000, and decided that the balance be held in reserve for potential late claims and errors in distribution. All timely claims were paid by the Administration Committee by the end of April 1980. Some late claims were subsequently paid with court approval. Others still pend.

On September 3, 1982, the Administration **[**3]** Committee (composed of two counsel for the plaintiff class, one who had represented a defendant and an independent fourth) recommended that the $6,000,000 in the reserve fund plus future interest be used to establish a private "Antitrust Development and Research Foundation" to promote the study of complex litigation and various substantive and procedural aspects of ***antitrust law***. Thereafter six former **[*1254]** plaintiff class members [1] and two former defendants [2] filed motions in the district court, which had retained jurisdiction of the case, seeking distribution of the remainder of the settlement fund to plaintiff class members or otherwise *pro rata* to the settling defendants. Two of the class members [3] also requested return to class-member plaintiffs of fees and costs that had been awarded to counsel for the Administration Committee, or in the alternative that they be audited, with excessive fees and costs returned to them, and that the expenses paid to the Administration Committee's accounting firm be subjected to an independent accounting. We granted a temporary stay in April 1983 and granted a stay pending appeal on May 3, 1983, so that no more late claims have been **[**4]** paid [4] nor has the suggested Foundation been organized. At the same time we postponed any action on the Administration Committee's motion to dismiss the appeals.

We now hold that we have jurisdiction over this matter pursuant to the collateral order doctrine for the reasons given in *In re General Motors Corporation Engine Interchange Litigation, 594 F.2d 1106, 1117-1121 (7th Cir. 1979)*. Therefore the motion to dismiss is denied.

As to the district court's February 17, 1983, distinguished opinion, we agree that neither the plaintiff class nor the settling defendants have any right to the reserve fund. We also agree **[**5]** that under these circumstances, it was appropriate for the district court to consider the *cy pres* doctrine or Fluid Class Recovery to achieve an equitable disposition of the reserve fund. We discussed the "fluid recovery" concept in *Simer v. Rios, 661 F.2d 655, 675-677 (7th Cir. 1981)*, but refused to utilize it. As in *Simer*, the $200,000,000 paid by these defendants surely counsels deterrence, has disgorged illegally obtained profits and has satisfied the compensatory factor of the Sherman Act, so that fluid recovery is not needed. [5] Consequently it was inappropriate for the district court to utilize the reserve fund to establish a tax-exempt Foundation for research on complex antitrust litigation and on various substantive aspects of the antitrust laws, as suggested by the Administration Committee.

[6]** The district court directed that the funding of the Foundation should not commence until February 17, 1984, one year from the date of its opinion. That period was provided to the Administration Committee for the payment of additional late claims. *557 F. Supp. at 1110*. Because of our temporary stay order of February 17, 1983, and our May 3, 1983, stay pending appeal, that beneficial one-year extension was of no effect. Therefore, the Administration Committee should hold the reserve fund available for one year from the date of this opinion to cover

[2] The Mead Corporation and Federal Paper Board Company, Inc.

[3] Cumberland Farm Dairies, Inc. and Pantry Pride Enterprises, Inc.

[4] The last distribution to late claimants was apparently on May 27, 1982.

[5] For a comprehensive discussion of this subject, see Developments in the Law -- Class Actions, 89 Harv. L. Rev. 1318, 1516-1536 (1976); for refusal to utilize the analogous concept of creative sentencing in the criminal field, see *United States v. Wright Contracting Co., 728 F.2d 648, 650-653 (4th Cir. 1984)*, where the court of appeals overturned district court orders requiring defendants to contribute substantial sums to private charitable organizations.

the cost of locating absent class members and making appropriate payments to them from the principal and accrued interest of the reserve fund.

After careful consideration, we conclude that the establishment of the proposed Foundation would be carrying coals to Newcastle. There has already been voluminous research with respect to multidistrict antitrust litigation and the substantive and procedural aspects of the antitrust **[*1255]** laws by judges, lawyer specialists, law schools, bar associations, Congressional committees, the Department of Justice and the Federal Trade Commission, and it is a continuing project of **[**7]** all those concerned. In our view, establishing an unneeded Foundation for these purposes from the reserve fund would be a miscarriage of justice and an abuse of discretion. Instead, after the passage of a year hence for making appropriate payments to absent or tardy class members and for absorbing appropriate expenses, we direct that the remainder of the reserve fund escheat to the United States. The reason given by the district court for not ordering escheat to the United States government was that the federal statutory terms established in *28 U.S.C. §§ 2041* and *2042* for escheat do not apply. However, the spirit of those statutes is certainly satisfied and indeed the technical Congressional requirements present no real obstacles.

Thus *28 U.S.C. § 2041* is now entitled "Deposit of monies in pending or adjudicated cases," and the text applies to "All monies paid into any court of the United States or received by the officers thereof, in any case pending or adjudicated in such court * * *." Here the $200,000,000 fund was paid into the district court or its officers, namely, the Administration Committee, thus satisfying that portion **[**8]** of the escheat statute. The immediately succeeding Section initially refers to "money deposited under *section 2041*" and provides that money so deposited and unclaimed for five years shall be deposited in the federal Treasury "in the name and to the credit of the United States." The district court stated that it could not approve escheat to the United States because five years had not then elapsed since the deposit of the fund and the right to the money had not been adjudicated. *557 F. Supp. at 1103*. But almost five years have now elapsed, and we are permitting unpaid class members to claim until a year from this opinion, which will be well beyond the unclaimed five years specified in *Section 2042*. Moreover, the right to the money among the parties hereto was adjudicated in the February 17, 1983, district court opinion and in 1979 when it approved the settlement agreement. In view of the generous time period afforded by the district court and us, it is doubtful that any claimants will come along thereafter. Nevertheless, the open-ended closing sentence of *28 U.S.C. § 2042* will allow "Any claimant entitled" thereto to recover from the United States **[**9]** after the escheat. *Hodgson v. Wheaton Glass Co., 446 F.2d 527 (3d Cir. 1971)*. Accordingly, the statutory terms for federal escheat have been sufficiently satisfied.

As noted, *28 U.S.C. § 2042* permits an entitled claimant to recover from the United States. To that extent, the escheat is impermanent [6] and also raises no unconstitutional taking. Since any legitimate claimant has been afforded an adequate remedy against the United States, there is no bar to interim governmental use of the escheated money "deposited in the Treasury and to the credit of the United States." [7] Because the settlement stemmed from defendants' alleged violations of *Section 1* of the Sherman Act (*15 U.S.C. § 1*), it is much more appropriate to have the escheat benefit the United States rather than to adopt the labyrinthine methodology employed by the dissent to justify escheat to the states.

[10]** **[*1256]** Five *amici curiae* non-claimant members of plaintiff class [8] favor the district court's order of February 17, 1983, insofar as it gives such persons an additional year to present claims. Our resolution grants a

[6] Some of the cases cited in the dissent are thus accurate in stating that the escheat to the United States is not permanent.

[7] The Supreme Court decision addressing state escheat cited by the dissent, *Texas v. New Jersey, 379 U.S. 674, 13 L. Ed. 2d 596, 85 S. Ct. 626 (1965)* did not involve property in dispute under federal law and therefore the role of the United States as a depositary under *28 U.S.C. § 2042* was not implicated. That case does not inject state *parens patriae* principles into matters solely within federal jurisdiction. Here the fund arose out of defendants' alleged violations of the federal antitrust laws. None of the cases relied upon in the dissent involves a situation comparable to the present one, so that this opinion is not in conflict with other cases involving *28 U.S.C. §§ 2041* and *2042*.

[8] Avery International Corp., Handschy Chemicals, Inc., John C. Gilmore, Textor Corporation and Zachary Confections, Inc.

similar grace period but of course provides for escheat thereafter instead of for the Foundation championed by *amici*.

The order of February 17, 1983, and the order of March 3, 1983, approving fees and costs are affirmed except with respect to the establishment of the Foundation. As to the reserve fund, we hold that any portion (including interest) remaining a year herefrom after the payment of meritorious claims and expenses by the Administration Committee shall escheat to the United States subject to the conditions expressed in 28 U.S.C. §§ 2041 and 2042. Motion to dismiss appeals denied; costs to be borne by the respective parties. **[**11]** [9]

Concur by: FLAUM (In Part)

Dissent by: FLAUM (In Part)

Dissent

FLAUM, Circuit Judge, concurring in part and dissenting in part.

I agree that the district court abused its discretion in holding that the unclaimed portion of the settlement fund would be used to create an Antitrust Research Foundation. To the extent that the majority opinion holds that the unclaimed fund shall "escheat" and, in effect, remain permanently available in the United States Treasury to pay late claims pursuant to 28 U.S.C. § 2042, I dissent. The federal government cannot escheat unclaimed property. [1] The majority avoids this by saying that the federal government may have "interim" use of the funds until claimants present themselves, while recognizing that the claimants will never present themselves. As a practical **[**12]** matter, the majority is allowing an escheat, and indeed, the majority refers to its result as an escheat.

[13]** I agree that nonclaiming class members should be allowed an additional year in which to file claims. During that year, any late claimants who can show good cause may, in the discretion of the district court, be paid their share of the settlement fund. After the cut-off date, any remaining funds should be deposited with the United States Treasury. I would hold that at that time, any state that can establish a right to escheat under its law may petition to escheat its share of the fund.

A.

Where a district court's order is a product of a choice among a number of options and reflects a weighing of the equities and an appellate court holds that the district court abused its discretion in making the particular choice that it made, the appropriate course is for the appellate court to remand the case. *See, e.g.,* Ketchum v. Byrne, 740 F.2d 1398, slip op. at 27-28 (7th Cir. 1984) (as amended). Here, the district court was faced with a number of possible choices, and after weighing the equities, held that the fund should be used to establish an antitrust foundation. The majority and I agree that this use was an abuse of discretion. I join in the majority's decision **[**14]**

---

[9] All arguments presented by the litigants have been fully considered. Most of them were properly rejected in the opinion below. Those not covered there or in this opinion do not merit discussion.

[1] It may be that the United States may forfeit funds deposited into the Treasury under section 2042 where a statute gives the government a right to assert a beneficial interest or ownership of the funds. *See* United States v. Iovenelli, 403 F.2d 468 (7th Cir. 1968) (government may have right to money used to bribe federal agent, pursuant to 18 U.S.C. § 3612); In re Escheat of Monies Deposited, 187 F.2d 131 (3d Cir. 1951) (same). *See also* United States v. Farrell, 196 U.S. App. D.C. 434, 606 F.2d 1341, 1344-45 & n.7 (D.C. Cir. 1979) (summary of statutory forfeiture). The United States may also assert a reversionary interest in unclaimed funds where such reversion is permitted by statute. *See* 38 U.S.C. § 3202(e) (any funds of deceased veteran derived from federal veterans' benefits paid to decedent that would escheat to state shall escheat to United States). One court has noted that although § 3202(e) uses the term "escheat," the statute actually permits reversion, not escheat. In re Estate of Novotny, 446 F. Supp. 1027, 1031-35 (S.D.N.Y. 1978). Here, there is no statute allowing the federal government to assert a beneficial interest in damages in a private antitrust action.

[*1257] not to remand this case to allow the district court to dispose of the funds only because, in reaching its result, the district court clearly held that nonclaiming class members had the superior equitable right to the funds. *In re Folding Carton Antitrust Litigation, 557 F. Supp. 1091, 1107 (N.D. Ill. 1983)*. The district court thus chose among its options. I do not hold, and I do not understand the majority to hold, that this holding was an abuse of discretion. Thus, I do not preclude, and I do not understand the majority to preclude, a district court in another case from dividing unclaimed funds among claiming class members or allowing the funds to revert to the defendants.

B.

Section 2042 provides in pertinent part:

> In every case in which the right to withdraw money deposited in court . . . has been adjudicated or is not in dispute and such money has remained so deposited for at least five years unclaimed by the person entitled thereto, such court shall cause such money to be deposited in the Treasury in the name and to the credit of the United States. Any claimant entitled to any such money may, on petition to the court and upon notice **[**15]** to the United States attorney and full proof of the right thereto, obtain an order directing payment to him.

The majority holds that under *section 2042*, the money will "escheat" to the United States and remain available to pay late claimants who file. The majority notes that, as a practical matter, the class members who have not yet filed claims probably will never file. Thus, the question becomes what should happen to the money.

The United States government cannot obtain title to the money. *Section 2042* operates only to change the depositary of unclaimed funds; it is not a federal escheat statute. 7 Pt. 2 Moore's Federal Practice para. 67.04 (1984). It does not operate to change the ownership of the funds; even though the money is deposited "in the name and to the credit of" the United States, the United States obtains no beneficial interest in the funds but merely holds the money as trustee for the rightful owners. *See* *United States v. Klein, 303 U.S. 276, 279-80, 82 L. Ed. 840, 58 S. Ct. 536 (1983)*; *Stapleton v. $2,438,110, 454 F.2d 1210, 1214-15* (3d Cir.), *cert. denied*, *409 U.S. 894, 34 L. Ed. 2d 151, 93 S. Ct. 111 (1972)*; **[**16]** *In re Moneys Deposited, 243 F.2d 443, 445 (3d Cir. 1957)*; *United States v. Cochrane, 87 F.2d 3, 4 (5th Cir. 1936)*. Thus, there can be no permanent escheat to the United States. *United States v. Seventeen Thousand, Four Hundred Dollars in Currency, 524 F.2d 1105, 1109 (10th Cir. 1975)* (Doyle, J., dissenting) (deposit under *section 2042* does not act as escheat); *Hodgson v. Wheaton Glass Co., 446 F.2d 527, 535 (3d Cir. 1971)*; *United States v. Iovenelli, 403 F.2d 468, 469 (7th Cir. 1968)*; *see* *Hansen v. United States, 340 F.2d 142 (8th Cir. 1965)*. Moreover, allowing the United States to take title to the money may well be unconstitutional as depriving claimants of property without due process of law. *See* *American Loan & Trust Co. v. Grand Rivers Co., 159 F. 775 (C.C. Ky. 1908)*. [2] Thus, the unclaimed funds at issue here do not, and cannot, become the property of the United States. The remaining funds merely will sit in the United States Treasury. It may be, as the majority states, that an escheat to the federal government would be "appropriate." Regardless of **[**17]** whether such a result is appropriate, it is not authorized by law.

Because some nonclaiming class members will never come forward, and because **[*1258]** they have the superior equitable right to the funds, the task becomes to compensate them as nearly as possible. [3] Nonclaiming class members "are at least the equitable owners of their respective shares in the recovery." *Boeing Co. v. Van Gemert, 444 U.S. 472, 482, 62 L. Ed. 2d 676, 100 S. Ct. 745 (1980)*.

[18]** Traditionally, unclaimed property escheats to the states. *See* *Hodgson v. Wheaton Glass Co., 446 F.2d at 535*. A number of courts have recognized that money deposited under *section 2042* may escheat to the states. *See*

---

[2] Prior to the decision in *American Loan & Trust Co.*, the statute did not permit claimants to petition for return of their money. Following the decision, the statute was amended to its present form. *See* Act of March 3, 1911, c. 224, 96 Stat. 1083. Thus, the issue of the constitutionality of a permanent escheat to the United States has not arisen since the 1911 amendment. *See* *In re Moneys Deposited, 243 F.2d 443 (3d Cir. 1957)*.

[3] This is the purpose behind both the fluid recovery and *cy pres* theories. *See* Newberg, Class Actions § 7570 (1977).

id.; see also United States v. Klein, 303 U.S. 276, 58 S. Ct. 536, 82 L. Ed. 840 (1938); Stapleton v. $2,438,110, 454 F.2d at 1214. This is true even where, as here, the unclaimed property is created under federal law. *See* Hodgson v. Wheaton Glass Co., 446 F.2d at 535; In re Moneys Deposited, 243 F.2d 443 at __. I would not preclude the states here from petitioning to escheat the fund. Unlike the federal government, a state government may escheat unclaimed property on behalf of its citizens because the state stands as *parens patriae* as to its citizens. [4] *See* Comment, *Damage Distribution in Class Actions: The Cy Pres Remedy*, 39 U. Chi. L. Rev. 448, 453-58 (1972). The state acts to represent those of its citizens who do not collect their unclaimed property.

[19]** The theory of allowing an escheat to the states is that nonclaiming class members will benefit indirectly to the extent that the state uses the fund to benefit all of its citizens. Obviously, this results in an imperfect fit between the class harmed -- the nonclaiming class members -- and the class benefitted -- all citizens. However, awarding the fund to either the defendants or the claiming class members results in an even less perfect fit because it ensures that nonclaiming members will receive no benefit.

Allowing escheat to the states serves the purpose of the ***antitrust law***, class action settlements, and the purpose of the reserve fund at issue here. First, to the extent that ***antitrust law*** serves a deterrence purpose, it is served through any plan not resulting in return of the fund to the defendants. This purpose is not as applicable where, as here, the damages are created pursuant to a settlement agreement in which the defendant admits to no wrongdoing. To the extent that the ***antitrust law*** has a compensatory rationale, escheat serves it by allowing each member of the class some degree of recovery, even if indirect. Second, this court has noted that "the class action **[**20]** . . . is primarily a device to vindicate the rights of individual class members." *In re General Motors Corporation Engine Interchange Litigation, 594 F.2d 1106, 1128 n.33 (7th Cir. 1979)*, *cert. denied*, *444 U.S. 870, 62 L. Ed. 2d 95, 100 S. Ct. 146 (1980)*. Escheat allows the rights of every class member to be vindicated in some sense. Finally, the district court stated that "the reserve fund itself was established for the express purpose of benefitting those class members who might appear and file late claims." *In re Folding Carton Antitrust Litigation, 557 F. Supp. at 1107*. Again, escheat is the best way to ensuring that the reserve fund will be put to an approximation of its intended use. *See generally* Comment, *Damage Distribution, supra* at 453-58.

In this case, the non-claiming class members are citizens of different states. Thus, under a *parens patriae* theory, no one state may escheat the entire fund. I would hold that each state may escheat a portion **[*1259]** according to the rule announced in *Texas v. New Jersey, 379 U.S. 674, 13 L. Ed. 2d 596, 85 S. Ct. 626 (1965)*. In that case, several **[**21]** states invoked the original jurisdiction of the Supreme Court to determine which state was entitled to escheat money belonging to creditors, living in different states, of a corporation. The Court held that the state of each creditor's last-known address should be entitled to escheat the creditor's share. To the extent that a creditor's last-known address is in a state that does not provide for escheat of that property, the state of corporate domicile would be permitted to escheat that portion, subject to the right of the state of the last known address to recover if its law later permitted escheat. *Id. at 680-82*. The Court based its result not on "statutory or constitutional provisions or . . . past decisions nor . . . logic . . . [but rather] ease of administration and of equity. . . . We believe that the rule we adopt is the fairest, is easy to apply, and in the long run will be the most generally acceptable to all the States." *Id. at 683*.

Applying the rule to the facts of this case, and guided by the principles of "ease of administration and of equity" behind the rule, I would allow each state to escheat that portion of the fund that represents **[**22]** its share of the number of nonclaiming class members whose last address is within its state as compared to the total number of nonfiling claimants. A list of all such addresses was compiled when the notices of the settlement were sent out to all

---

[4] The theory of the state as *parens patriae* is used in the antitrust class action context in three distinct senses. First, it refers to the traditional power of the state to protect those of its citizens who cannot protect themselves, by collecting their unclaimed property. Second, it refers to attempts by states to extend their traditional power and sue on behalf of their citizens allegedly injured. Third, it refers to attempts by states to sue for alleged injury to the general economy of the state itself. In this case, I refer to *parens patriae* only in its first sense.

class members. To the extent that a state's law does not permit escheat of the property, the money will remain in the Treasury, subject to escheat should the state change its law. [5]

[5] Some states have a provision in their escheat statute permitting the owner of the property to reclaim the property after escheat. *See* Uniform Disposition of Unclaimed Property Act § 19; *see, e.g.*, Ill. Rev. Stat. ch. 141, § 119.

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN4[] **Remedies, Damages**

The test of whether treble damages are penal has three parts: one, whether the purpose of the statute is to redress individual or public wrongs; two, whether recovery under the statute runs to the injured individual, or to the public; and three, whether the authorized recovery is wholly disproportionate to the harm suffered. In promulgating the Racketeer Influenced and Corrupt Organizations Act (RICO), Congress expressly finds that the problem of racketeering is primarily public, not private, including draining resources from the economy, subverting the democratic process, and undermining the general welfare. Second, a treble damage award under RICO runs to a person injured in his business or property by reason of a violation of *§ 1962* of RICO, codified at *18 U.S.C. § 1962*. Third, treble damages under RICO are wholly disproportionate to the injury, just as in the Clayton Act.

Opinion by: EUBANKS

Opinion

[*1241] OPINION AND ORDER

EUBANKS, Chief Judge.

Before the Court is the motion of the defendant Federal Deposit Insurance Corporation ["FDIC"], as receiver of the defunct Penn Square Bank, N.A., to strike the plaintiff's claim for treble damages under the Racketeer Influenced and Corrupt Organizations Act ["RICO"], *18 U.S.C. § 1964(c) (1982)*. Pursuant to the Court's order of July 9, 1984, the parties **[**2]** have submitted supplemental briefs and the motion is now at issue. For the reasons stated below, the motion is granted.

This Court has previously ruled that ***HN1***[] punitive damages, permissible under state law, cannot be assessed against the FDIC as receiver of a failed bank. *E.g., Professional Asset Management, Inc. v. Penn Square Bank, N.A., 566 F. Supp. 134 (W.D. Okla.1983)*. However, the allowability of treble damages under RICO against the FDIC is a question of first impression.

This is, fundamentally, a question of statutory construction. The resolution of that question must begin with the statute itself. *E.g., United States v. Turkette, 452 U.S. 576, 580, 101 S. Ct. 2524, 2527, 69 L. Ed. 2d 246 (1981)*. ***HN2***[] *Section 1964(c)* of RICO provides: "Any person injured in his business or property by reason of a violation of *section 1962* of this chapter . . . shall recover threefold the damages he sustains . . ." *18 U.S.C. § 1964(c)*.

[*1242] Although Congress used the verb "shall" in *Section 1964(c)*, it is not necessarily mandatory. *See* 2A C. Sands, *Sutherland on Statutory Construction* § 57.03 (1973). The treble damages provision of *Section 1964(c)* is drawn from federal ***antitrust* [**3] *law***, [1] specifically Section 4 of the Clayton Act, *15 U.S.C. § 15 (1982)*. [2] *See, e.g.*, 115 Cong.Rec. 9567 (1969) (statement of Sen. McClellan). Early cases construing the nearly identical language in the Clayton Act implied that a treble damages action survived the death of a defendant-violator, but did not so hold. *Barnes Coal Corp. v. Retail Coal Merchants Ass'n, 128 F.2d 645, 649 (4th Cir.1942)*; *Hicks v. Bekins Moving & Storage Co., 87 F.2d 583, 585 (9th Cir.1937)*; *Moore v. Backus, 78 F.2d 571, 575-76 (7th Cir.1935)*, *cert. denied*, *296 U.S. 640, 56 S. Ct. 173, 80 L. Ed. 455 (1935)*. *See* American Bar Association Section of ***Antitrust Law***, *Antitrust Developments 1955-1968* 305 & n. 37 (1968); A. Stickells, *Federal Control of Business -- Antitrust Laws* § 188 at 712 (1972). However, courts that have confronted the issue directly have held that such actions survive only for actual, not treble, damages. *Rogers v. Douglas Tobacco Board of Trade, 244 F.2d 471, 483 (5th Cir.1957)*; *RSE, Inc. v. H & M, Inc., 90 F.R.D. 185 (M.D.Pa.1981)*; *Shires v. Magnavox Co., 432 F. Supp. 231, 235 (E.D.Tenn.1976)*; *Vandervelde v. Put & Call Brokers & Dealers Ass'n* ***[**4]*** *, 344 F. Supp. 118, 156-57 (S.D.N.Y. 1972)*; *Haskell v. Perkins, 28 F.2d 222, 224 (D.N.J.1928)*, *rev'd on other grounds*, *31 F.2d 53 (3d Cir.1929)*, *cert. denied*, *279 U.S. 872, 49 S. Ct. 513, 73 L. Ed. 1007 (1929)*. *See* American Bar Association Section of ***Antitrust Law***, ***Antitrust Law*** *Developments (Second)* 483 (1984). The rationale on which these decisions are based is that ***HN3***[] treble damages under Section 4 are penal in character and should not be assessed against the estate of a deceased malefactor. *E.g., Rogers, supra, 244 F.2d at 483*.

[5]** This rationale is compelling and applies with equal or greater force to RICO treble damages against the FDIC as receiver. ***HN4***[] The test of whether treble damages are penal has three parts: one, whether the purpose of the statute is to redress individual or public wrongs; two, whether recovery under the statute runs to the injured individual, or to the public; and three, whether the authorized recovery is wholly disproportionate to the harm suffered. *Murphy v. Household Finance Corp., 560 F.2d 206, 209 (6th Cir.1977)* (stating the test and collecting the cases). First, in promulgating RICO, Congress expressly found that the problem of racketeering was primarily public, not private, including draining resources from the economy, subverting the democratic process, and

---

[1] It does not follow from this that Congress intended to import all of the peculiar rules of ***antitrust law*** into RICO, *see, e.g., In re Longhorn Securities Litigation, 573 F. Supp. 255, 270 (W.D. Okla.1983)*. Indeed, RICO's legislative history makes this quite clear. *E.g.*, 115 Cong.Rec. 9567 (1969) (statement of Sen. McClellan).

[2] Section 4 provides: "Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws . . . shall recover threefold the damages by him sustained . . ." *15 U.S.C. § 15*.

undermining the general welfare. 84 Stat. 922-23 (1970) (findings and purpose of the Organized Crime Control Act of 1979, title IX of which is RICO). Second, a treble damage award under RICO runs to a "person injured in his business or property by reason of a violation of Section 1962 . . ." 18 U.S.C. § 1964(c). Third, treble damages under RICO are wholly disproportionate to the injury, just as in the Clayton Act. *See* **[**6]** 3 C. Sands, *Sutherland on Statutory Construction* § 59.02 at 4 (1974). *Cf.* Rogers, supra, 244 F.2d at 483-84. *But cf.* United States v. Bornstein, 423 U.S. 303, 313-17, 96 S. Ct. 523, 529-32, 46 L. Ed. 2d 514 (1976) (False Claim Act's double damages provision is compensatory, to make the government whole for "costs delays, and inconveniences occasioned by fraudulent claims"); Murphy, supra, 560 F.2d at 209-11 (Truth in Lending Act's double damages provision is compensatory; doubling merely provides for liquidated damages).

[*1243] Though one of the three elements of the test indicates that treble damages RICO are remedial, it appears on balance that they are in fact penal. It would be plainly unjust to permit such an award against the receiver, for innocent depositors and creditors alone would be punished, not the putative wrongdoer, the bank. *Cf.* Bowles v. Farmers National Bank of Lebanon, Kentucky, 147 F.2d 425, 428-30 (6th Cir.1945) (treble damages under the Emergency Price Control Act of 1942); Professional Asset Management, supra, 566 F. Supp. at 137 (punitive damages under state law).

There is one, rather analogous case to the contrary, but the **[**7]** court declines to follow it in the case at bar. State Farm Fire and Casualty Co. v Estate of Caton, 540 F. Supp. 673 (N.D.Ind.1982). In *Caton*, the court held as a matter of law that treble damages under RICO could be assessed against the estate of a deceased individual. Initially, because the case involved an individual, and not a national bank, it is inapposite. [3] Secondly, as a decision of another district court, it is not binding.

Finally, *Caton* is not even very persuasive. Although the court employed the proper test of whether treble damages under RICO are penal or remedial, id. at 681, its analysis is unsound. Congress did not explicitly denominate RICO's treble damages as remedial. It did provide that RICO as a whole "shall be liberally construed to effectuate its remedial purposes." 84 Stat. 947; 18 U.S.C. § 1961 note (liberal **[**8]** construction of provisions). But this does not necessarily imply that the statute is wholly remedial; rather, it simply directs the courts not to apply the traditional rule of strict construction in penal statutes. *See* 3 C. Sands, *supra*, § 59.07.

Furthermore, the *Caton* court's reliance on United States v. Cappetto, 502 F.2d 1351 (7th Cir.1974), *cert. denied*, *420 U.S. 925, 95 S. Ct. 1121, 43 L. Ed. 2d 395 (1975)*, is misplaced as the premise from which to conclude that treble damages under Section 1964(c) are remedial. In *Cappetto*, the Seventh Circuit was considering a governmental injunction action under Section 1964(a) and (b), not a private action for treble damages under 1964(c). 502 F.2d at 1354-55. RICO cannot fairly be characterized *in toto* as either penal or remedial; instead, it must be analyzed *seriatim*. Certain provisions of RICO are clearly penal, 18 U.S.C. §§ 1963(a), (c), and others are remedial, 18 U.S.C. § 1964(a), (b). Its treble damages provision is not so plain, but the Court here concludes that it is essentially penal.

Accordingly, the FDIC's motion to strike the plaintiff's prayer for treble damages on his RICO claim should be **[**9]** and hereby is granted. If the plaintiff prevails on that claim against the FDIC, then he is legally entitled only to actual damages.

End of Document

[3] There is a strong argument that supports the court's decision in *Caton*, based on the facts. *See* id. at 682. However, it simply does not apply here.

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN1[] **Intentional Interference, Defenses**

The tort of interference with prospective advantage consists of intentional and improper methods of diverting or taking business from another which are not within the privilege of fair competition. There are five essential components to the tort: an economic relationship containing the probability of future economic benefits accruing to the plaintiffs, defendant's knowledge of the existence of that relationship, defendant's intentional commission of acts designed to disrupt the relationship, actual disruption thereof and damages proximately caused thereby.

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

Torts > ... > Prospective Advantage > Intentional Interference > Defenses

HN2[] Contracts Law, Breach

In the case of interference with a contract, it is well established that a person is not justified in inducing a breach of contract simply because he is in competition with one of the parties to the contract and seeks to further his own economic advantage at the expense of the other. On the other hand, with the tort of prospective advantage (where inducing a breach of contract is not involved) the law recognizes a more extensive privilege to interfere for the sake of competition.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN3[] Summary Judgment, Evidentiary Considerations

It is clear that a movant for summary judgment may discharge its burden by demonstrating that if the case went to trial there would be no competent evidence to support a judgment for the plaintiff.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Specific Intent

HN7[] **Sherman Act, Claims**

There are three necessary elements of an attempt to monopolize claim. The first is the presence of a specific intent to destroy competition or build a monopoly. Such an intent may be shown or inferred by the commission of a Sherman Act *§1* violation, *15 U.S.C.S. § 1*. Alternately, such intent may be shown through proof of the specific intent to set prices or exclude competition in a portion of the market without legitimate business purpose. Second, the specific intent must be accompanied by either predatory or anticompetitive conduct or a substantial claim of restraint of trade directed to accomplishing the unlawful purpose, or sufficient market power to accomplish the unlawful purpose. Third, there must be causal antitrust injury. Unilateral refusals to deal, in conjunction with these requisite elements, have been held to constitute an attempt to monopolize in violation of *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*.

Civil Procedure > ... > Justiciability > Standing > General Overview

HN11[] **Private Actions, Standing**

The Ninth Circuit has established the "target area" formula for determining standing. Under this doctrine, one who is only incidentally injured by a violation of the antitrust laws, "the bystander who was hit but not aimed at," cannot recover against the violator.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN12[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

A group boycott is a restraint which generally is the means used for effectuating a concerted refusal to deal. An essential element to a group boycott claim is concerted action.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] **Per Se Rule & Rule of Reason, Per Se Violations**

Generally, the mere compilation and dissemination of pricing information among competitors does not constitute a per se violation of the Sherman Act, *15 U.S.C.S. § 1 et seq.* However, an exchange of price information coupled with a restriction of output or otherwise specific actions designed to achieve a uniformity of prices among competitors would constitute a per se violation of the Sherman Act, *15 U.S.C.S. § 1 et seq.*

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN14[] **Regulated Practices, Price Fixing & Restraints of Trade**

Where illegal price fixing results in an artificially high price, those who pay the fixed price may recover the difference between the fixed price and the price which would otherwise have prevailed absent the illegal price fixing. And, although determining what the price would have been absent a conspiracy may require some speculation, a wrongdoer should not be permitted to invoke the uncertainty created by his own wrong and use it to preclude a plaintiff's recovery.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Torts > Business Torts > General Overview

HN15[] **Private Actions, Remedies**

Recovery of lost profits is measured in any of three ways: The "before and after" method, the "yardstick method," or the "sales projection" method. The "before and after" method compares two periods of time in the antitrust claimant's business -- the period during which his business suffered from the antitrust violations, and a previous or subsequent period free from the effect of the antitrust violations. Specifically, the claimant is awarded the difference between, his net profits during a period either before the antitrust violations began or after they had ceased and their effects had ended, and his net profits during the period of the antitrust violations. The period used for comparison with the damage period must be a fair measure of the claimant's profits. The Ninth Circuit has held that the before and after method of measuring damages may be used only where there has been some showing that the market conditions in the two periods were similar but for the impact of the violation.

Opinion

[*1293] MEMORANDUM DECISION AND ORDER

The parties to this action filed multiple motions before the Magistrate, as follows:

1. The motion of defendant R & K Distributors for summary judgment. Timely objections to the Magistrate's recommendation were filed. The Court reviews this motion *de novo*.

2. Plaintiff's motion for summary judgment on its price fixing claim. The Magistrate's recommendation was objected to; hence, the Court reviews *de novo*.

3. Defendant Chambers' motion for summary judgment on plaintiff's antitrust claims. Timely objections were filed to the Magistrate's recommendations; hence, the Court reviews the matter *de novo*.

4. **[**2]** Defendant Amana's motion for summary judgment on plaintiff's antitrust claim. Timely objections to the Magistrate's recommendations were filed. The Court reviews the matter *de novo*.

5. Defendant Chambers' motion for summary judgment on plaintiff's pendent state causes of action. Neither the plaintiff nor the defendants filed timely objections to the Magistrate's recommendations. The Court reviews the Magistrate's recommendations under the clearly erroneous standard. [1]

The Magistrate, although hearing the motions at different times, filed the majority of his recommendations simultaneously. Each motion was addressed separately, although there is a demonstrable relationship among the motions.

I

PLAINTIFF'S COMPLAINT

Plaintiff's complaint alleges the following facts which do not appear to be contested:

D & R Distributing (hereinafter D & R) is a California corporation engaged in the wholesale distribution of major kitchen household appliances. **[**3]** It also owns and operates retail appliance stores in Modesto and Fresno. From an unspecified date in 1954, and continuing until October 1, 1980, **[*1294]** Chambers Corporation (hereinafter Chambers) a Delaware corporation, and a wholly owned subsidiary of Rangaire Corporation (hereinafter Rangeaire) sold Chambers brand household cooking appliances pursuant to an agreement that was at least partially in writing, and contained a standard form "Franchise Agreement." The complete terms of this agreement are the subject of one of the pending motions.

Prior to the 1973 agreement, D & R had been Chambers' exclusive distributor for Stanislaus, Merced, Fresno, Madera, Kern, Kings and Tulare Counties (the San Joaquin Valley). The 1973 agreement expanded D & R to the whole of Northern California.

The 1973 agreement was terminated October 1, 1980, by Chambers.

Amana Refrigeration (hereinafter Amana), an Iowa corporation, sells Amana brand household and refrigeration appliances nationwide.

R & K Distributors (hereinafter R & K), is a California corporation, which distributes, on a wholesale level, built-in appliance products of various manufacture, including those of Chambers, Rangaire Corporation **[**4]** (hereinafter

---

[1] See *Gonzales v. Harris, 514 F. Supp. 991 (E.D. Cal. 1981)*.

Rangeaire), a Texas corporation. Rangaire is a building contractor, produces and sells limestone and lime products, and owns all of Chambers' stock. It is not clear from the First Amended Complaint whether Rangaire manufactures and sells appliances independent of its ownership of Chambers.

We turn to the motions.

II

THE MOTIONS OF R & K FOR SUMMARY JUDGMENT [2]

The motions of R & K can be properly considered independently of the other motions before the Court.

As pointed out above, the distributorship arrangement between D & R and Chambers was terminated by Chambers on October 1, 1980. R & K is accused by D & R with legal responsibility for this event.

Plaintiff now seeks damage from R & K **[**5]** on account of this termination on the grounds of antitrust violations and a pendent state tort claim.

First, plaintiff claims that its distributorship was terminated by Chambers in violation of the Sherman Antitrust Act "pursuant to and in furtherance of a combination and conspiracy between defendant Chambers Corporation and defendant R & K to unreasonably restrain and unlawfully tie the sale of Chambers brand products with complimentary dominant cooking appliance products, including Jenn-Air and KitchenAid, and pursuant to a combination and scheme to engage in a discriminatory pricing system."

As to the pendent state claim, plaintiff claims that R & K interfered with plaintiff's "prospective economic advantages" under its distributorship agreement with Chambers Corporation by making misrepresentation about the capabilities and intentions of R & K as a prospective distributor of Chambers' products, which induced Chambers Corporation to terminate plaintiff's distributorship.

R & K's presentation has refuted plaintiff's allegations and all reasonable inferences that might be drawn therefrom. When pressed, at deposition or through other discovery devices, for the production of evidence **[**6]** to support these allegations, plaintiff's officers and witnesses have conceded that none exist, save and except an in-house memoranda developed by defendant Chambers' personnel, and distributed only among Chambers' personnel. Presumably, this memorandum was the principal source of information relied upon by the Chambers' executives to choose R & K as the successor distributor to plaintiff. Assuming, without deciding, that such document **[*1295]** would be admissible against R & K under one of the many exceptions to the hearsay rule, we analyze that document to determine its probative effect on the issues tendered by R & K's motion.

Advantages Of Having R & K As Chambers Distributor:

1. Strong position as true distributor of premium priced products -- KitchenAid and Jenn-Air.
2. Excellent financial position requiring no factory assistance in warehousing inventory.
3. Strong professional sales force, 11 field salesmen and 50 demonstrators. Experienced management.
4. Over 300 established dealers, long term and loyal.
5. Nationally recognized prestigious distributor who would influence other desirable distributors we would like, such as:

    REMCO-Federated - Chicago **[**7]** and Davenport
    W. D. Alexander - Atlanta
    Dean Distributor - Portland
    Domestic Supply - Seattle

---

[2] R & K's original motion was entitled "Motion to Dismiss Amended Complaint." It is based on *Fed.R. Civ. P. 12(b)(2)*, *(6)*. It should be noted that R & K was named in the First Amended Complaint for the first time. R & K's original motion was denied. R & K then filed the instant motion for summary judgment.

Elm Distributors - Denver
Jack Riggs is committed to using his considerable influence to help Chambers secure powerful distributors throughout USA.
6. R & K is committed to opening branch operations in Sacramento and Fresno.
7. R & K is largest Jenn-Air distributor in country and is on record as being committed to Chambers regardless of future moves by Jenn-Air.
8. Experience in selling premium priced cooking equipment, having been large Corning distributor before merger with Amana.
9. Highly professional in their relationship with dealers as shown in exhibits, i.e., franchise agreements, etc.
10. Very promotional with in-house capability. This proposal represents the very best opportunity to improve our market position to date. We suggest a meeting with the R & K organization in San Francisco between our top management and R & K, at the earliest possible date. R & K is prepared to begin as a full operating distributor on October 1, 1980."

Plaintiff first argues that this document supports the inference that R & K made false and fraudulent misrepresentations to Chambers' officials. **[**8]** He points to paragraph 3 concerning the available R & K personnel. As previously indicated, the record indicates clearly that the contents of paragraph 3, as well as other reference R & K's capabilities, represents the interpretation of the Chambers' employees who prepared the memorandum rather than reflecting statements by R & K officers and other employees.

However, for this analysis, even if we assumed that plaintiff's arguments are correct, and further that R & K officers and employees made such statements, would this create a triable issue of fact which would entitle the plaintiff to go to trial?

It is the Court's view that the antitrust elements of this case are controlled by *A. H. Cox & Co. v. Star Machinery Co., 653 F.2d 1302 (9th Cir. 1981)*. There, as here, plaintiff Cox was displaced by defendant distributor Star as the exclusive distributor for truck cranes in the Seattle area which were manufactured by the defendant R & K Products. There, as here, plaintiff sued the replacement distributor as well as the manufacturer, who had replaced plaintiff, on antitrust grounds.

In affirming defendant's motion for summary judgment, the circuit court stated:

> . . . The **[**9]** economic impact resulting from a change in distributors is not altered merely because the dealer initiated contact or actively sought the change, provided the manufacturer ultimately makes the decision based on its independent business judgement. Appellant has advanced no evidence of dealer coercion here, and therefore the attempt to cast this arrangement in horizontal terms must fail.
>
> **[*1296]** Under the foregoing principles, appellant cannot prevail because it has failed to adduce any evidence of anticompetitive effect or intent which would distinguish this dealer substitution case from the myriad of decisions upholding changes in distributors. That one distributor will be hurt when another succeeds in taking its line will be axiomatic in some markets, as it was here, but the intent to cause that result is not itself prohibited by the antitrust laws. The intent proscribed by the antitrust laws lies in the purpose to harm competition in the relevant market, not to harm a particular competitor.

A.H. Cox & Co. v. Star Machinery Co., supra, at 1307.

To the Court's mind, these principles are determinative of the instant case. Accordingly, it is the decision of the Court **[**10]** to follow the Magistrate's recommendation and to grant R & K's motion for summary judgment on the antitrust theory.

The Magistrate, in his recommendation, did not address the plaintiff's alternate state theory of tortious interference with a prospective economic advantage. Accordingly, the Court considers this theory of recovery *de novo*, reviewing the mass of supporting and opposing material proffered by the parties.

HN1[] The tort of interference with prospective advantage consists of intentional and improper methods of diverting or taking business from another which are not within the privilege of fair competition. 4 Witkin, Summary of California Law (8th Ed. 1974) § 392 at p. 2643. There are five essential components to the tort: (1) an economic relationship containing the probability of future economic benefits accruing to the plaintiffs, (2) defendant's knowledge of the existence of that relationship, (3) defendant's intentional commission of acts designed to disrupt the relationship, (4) actual disruption thereof and (5) damages proximately caused thereby. *Olivet v. Frischling (1980) 104 Cal. App. 3d 831, 837, 164 Cal. Rptr. 87*.

The critical issue in this tort is whether **[**11]** the interference was justified. In determining this question we must observe an important distinction between interference with a contract and interference with relationships which can be disturbed without a breach of contract. *HN2*[] In the case of interference with a contract, it is well established that a person is not justified in inducing a breach of contract simply because he is in competition with one of the parties to the contract and seeks to further his own economic advantage at the expense of the other. *See Olivet v. Frischling, id*., n.1. On the other hand, with the tort of prospective advantage (where inducing a breach of contract is not involved) the law recognizes a more extensive privilege to interfere for the sake of competition. *Shida v. Japan Food Corp. (1967) 251 Cal. App. 2d 864, 866, 60 Cal. Rptr. 43*.

Plaintiff and defendant agree that liability in this case turns on whether or not the defendant R & K engaged in "improper means" to persuade Chambers to switch to R & K as the distributor. *See Shida v. Japan Food Corp., id*. The use of improper means of persuasion, *i.e*., fraudulent misrepresentations, would obviate any privilege of fair competition.

In **[**12]** support of its summary judgment motion, defendant introduced deposition testimony that the Chambers Marketing Plan for Northern California was prepared by Mr. Adams and Mr. Pruitt of Chambers, and more importantly, testimony of these two gentlemen that the representations alleged to have been made by defendant R & K were in fact never made. Mr. Adams and Mr. Pruitt testified that the statements which form the basis of plaintiff's allegations against R & K were due to a poor choice of words on the part of Chambers and the statements contained in them, attributable to R & K, were, in fact, never made.

Defendant R & K also submitted deposition testimony of Mr. J. Riggs that he never made any statement to Chambers regarding using his influence to help Chambers secure powerful distributors. **[*1297]** (Depo. J. Riggs, Vol. II, 164:24-28.) However, as to the other representations, Mr. Riggs testified that he does not recall whether or not he made such representations to Chambers. (Depo. of J. Riggs, Vol. II 163:15-16, 25.)

Plaintiff contends that defendant has not met its summary judgment burden in that it has not submitted any evidence of its motive or purpose in wooing Chambers. However, *HN3*[] **[**13]** it is clear that the movant may discharge its burden by demonstrating that if the case went to trial there would be no competent evidence to support a judgment for the plaintiff, *Doff v. Brunswick Corp., 372 F.2d 801, 805 (9th Cir. 1967)*.

The critical deficiency in plaintiff's case on the pendent state cause of action is its lack of any evidence that the defendants committed any acts which were not justified under the general principles of competition. On the basis of the facts developed by the respective parties in support and in opposition to R & K's motion for summary judgment, the case is similar to *Shida v. Japan Food Corp, supra.* There, as here, an exclusive distributorship for a food item was granted to the plaintiff by the manufacturer, said distributorship specifically to be renewable on an annual basis. During the seven successive renewals, plaintiff increased its production by approximately 400 percent. At the behest of defendant, plaintiff's manufacturer did not renew its contract with the plaintiff. In reversing the bench judgment for the plaintiff, the appellate court stated:

> In the case at bench it appears from the findings of the trial court that the award **[**14]** of damages rests exclusively upon the assumption that it was an actionable wrong to induce Waimanalo Ko-Ko Company not to renew its agreement with plaintiff. There is no finding that defendant used any improper means to persuade Waimanalo, or that any illegal restraint of competition was created, or that defendant had any purpose beyond the obvious objective of advancing its own interest as a competitor.

Shida v. Japan Food Corp., supra, at 867.

It should be noted that the instant motions for summary judgment are before the Court only after extensive discovery has been undertaken. This is not a case wherein the plaintiff has not had ample opportunity to probe all of the hidden recesses of its corporate opponents in order to discover evidence from which inferences favorable to its position might be drawn. It is not been able to develop even a scintilla of such evidence. [3]

[15]** With the antitrust claims against R & K removed from the action, an alternate ground for granting R & K judgment on the pendent state claims is lack of jurisdiction in this Court, once the federal claims are gone. We have two California corporations proceeding against each other on a state cause of action which is not so interwoven with the remaining issues to cause the Court to retain its discretionary jurisdiction.

III

CHAMBERS AND RANGAIRE'S MOTION FOR SUMMARY JUDGMENT

A. *Plaintiff's Claims Based Upon Defendants' "Refusal to Deal*" [4]

Paragraphs 22 and 22A are the basis of plaintiff's allegations in this regard. They read:

> "In August, 1980, defendant Chambers Corporation refused to deal and terminated plaintiff as the exclusive direct purchaser and primary distributor of Chambers brand products in Northern California and Western Nevada pursuant to and in furtherance of a combination and conspiracy between defendant Chambers Corporation **[**16]** and defendant R & K Distributors, Inc. to unreasonably restrain and unlawfully tie the sale of Chambers brand products with complimentary dominant cooking appliance products, including **[*1298]** Jenn-Air and Kitchen Aid, and pursuant to a combination and scheme to engage in a discriminatory pricing system. Said combination and conspiracy violates Section 1 and 2 of the Sherman Act, 15 U.S.C. 1,2." (Paragraph 22)
>
> "On or about August 15, 1981, defendant Chambers Corporation refused to deal with, and terminated plaintiff as the exclusive factory distributor in Northern California and Western Nevada for Chambers brand products. Said refusal to deal and termination was accompanied by anticompetitive intent. Said refusal to deal and termination produced anticompetitive effects. Said refusal to deal violates Sections 1 and 2 of the Sherman Act, 15 U.S.C. §§ 1 and 2." (Paragraph 22A)

The moving defendants invite us to assume the truth of these allegations and to grant their motion as a matter of law.

The defendant then cites the usual compilation of distributorship cases to buttress its position. The plaintiff, on the other hand, cites cases that have at their nexus strong evidence **[**17]** of price fixing [Lessig v. Tidewater Oil Co. 327 F.2d 459 (9th Cir. 1964)], refusal to deal as formerly after acquisition of a competitor [California Steel and Tube v. Kaiser Steel Corp., 650 F.2d 1001 (9th Cir. 1981)], where the evidence established an anti-competitive effect or purpose [Fount-Wip, Inc. v. Reddi-Wip, 568 F.2d 1296 (9th Cir. 1978), and Program Engineering v. Triangle Publication, 634 F.2d 1188 (9th Cir. 1981)]. Thus, the plaintiff does not meet defendants' legal contentions that Chambers' unilateral refusal to deal with D & R, without more, does not state a claim under the Sherman Act. [5]

B. *Plaintiff's Allegation That Chambers' Refusal to Deal was Accompanied by "Anti-Competitive Intent" and Produced "Anti-Competitive Effects*." (Paragraph 22A, Plaintiff's Amended Complaint.

---

[3] See the Court's comments concerning the Chambers in-house memorandum, *supra*, which analysis is equally relevant here.

[4] The Court adopts a "compartmentalized" approach to this motion.

[5] We have already dealt with the claim of conspiracy between Chambers and R & K. (See part I, *supra*.)

Sierra Wine and Liquor v. Heublein, Inc., 626 F.2d 129, 133 (9th Cir. 1981), states **[**18]** the rule to be:

> "Nor is United liable for violation of Sherman § 1. A manufacturer which switches distributorships violates antitrust laws only if 'the refusal to deal, manifested by a combination or conspiracy, is so anticompetitive, in purpose or effect, or both, as to be an unreasonable restraint of trade.' *Alpha Distrib. Co. of Cal., Inc. v. Jack Daniels Distillery*, 454 F.2d at 452. *See* Mutual Fund Investors v. Putnam Management Co., 553 F.2d 620 (9th Cir. 1977); *Joseph E.* Seagram & Co., Inc. v. Hawaiian Oke & Liquors, Ltd., 416 F.2d 71, 77-78 (9th Cir. 1969), *cert. denied*, *396 U. S. 1062, 90 S. Ct. 752, 24 L.Ed2d 755 (1970)*. Again, 'combination or conspiracy ' is a necessary condition of liability, and the district court was correct in finding, on the facts before it, that there was neither."

On the other hand, California Steel and Tube v. Kaiser Steel Corp., supra, at 1003-1004, teaches that:

> **HN4**[] "A unilateral refusal to deal may violate the Sherman Act if it is accompanied by anti-competitive acts or purpose. Times-Picayune v. United States, 345 U.S. 594, 625, 73 S. Ct. 872, 889, 97 L. Ed. 1277 (1953). Such a refusal may constitute an **[**19]** unreasonable restraint of trade even if it is justified by legitimate business reasons. Program Engineering, Inc. v. Triangle Publications, Inc., 634 F.2d 1188, 1195 (9th Cir. 1980)."

And again:

> **HN5**[] "The elements required to establish a claim of attempt to monopolize in this circuit have been variously stated, but generally plaintiff must show: (1) specific intent to destroy competition, (2) predatory conduct directed to accomplishing that purpose, and (3) dangerous probability of success. Janich Bros., Inc. v. American Distilling Co., 570 F.2d 848, 853 (9th Cir. 1977), *cert. denied*, *439 U.S. 829, 99 S. Ct. 103, 58 L. Ed. 2d 122 (1978)*; **[*1299]** Hallmark Industry v. Reynolds Metals Co., 489 U.S. 8 (9th Cir. 1973), *cert. denied*, *417 U.S. 932, 94 S. Ct. 2643, 41 L. Ed. 2d 235 (1974)*. These elements need not be established independently.

The Court agrees with the defendants' statement of the law. It is clearly the law of the Circuit that:

> **HN6**[] " 'It has been consistently held in this circuit that it is not a violation of the Sherman Act for a manufacturer to conspire with others to simply switch distributors at one of its exclusive franchises and to cease **[**20]** doing business with the former dealer. ' *Golden Gate Acceptance Corp. v. General Motors Corp*., 597 F.2d at 678; Marquis v. Chrysler Corp., 577 F.2d 624 (9th Cir. 1978); Dreibus v. Wilson, 529 F.2d 170, 172-74 (9th Cir. 1975); Bushie v. Stenocord Corp., 460 F.2d 116, 120 (9th Cir. 1972); *Alpha Distrib. Co. of* Cal., Inc. v. Jack Daniel Distillery, 454 F.2d 442, 452 (9th Cir. 1972); Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd, 416 F.2d 71, 78 (9th Cir. 1969), *cert. denied*, *396 U.S. 1062, 90 S. Ct. 752, 90 S. Ct. 752, 24 L. Ed. 2d 755 (1970)*. That the termination of dealings may affect the entity refused is immaterial when the refusal is 'for business reasons which are sufficient to the manufacturer in the absence of any arrangement restraining trade. ' Bushie v. Stenocord Corp., 460 F.2d at 119.

Chandler Supply Co. v. GAF Corp., 650 F.2d 983, 989 (9th Cir. 1980).

Were this a case where the prior relationship had not been that of a distributor-supplier, D & R's allegations in Paragraphs 22 and 22A may have been sufficient as a matter of law. Since we have already resolved the only conspiracy issue raised by the pleadings in **[**21]** D & R's Sherman Act § 1 claims, the Court finds Chambers and Rangaire are entitled to summary judgment thereon.

C. *D & R's Sherman Act § 2 Claims*.

At the outset, we note that defendants point to the Magistrate's failure to address their motion as to D & R's § 2 claims. Since we review the Magistrate's recommendations *de novo*, this omission, if it did occur, is not material to our consideration.

Section 2 of the Sherman Act is violated when a refusal to deal is used as leverage to maintain or extend the trader's monopoly power, or in an attempt to monopolize some part of the market place. 1 Von Kalinowski, Antitrust Laws and Trade Regulation para. 2.03(2)(a) at p. 2-31. D & R designates this claim as an attempt to monopolize.

The phrase "attempt to monopolize" means the employment of methods, means and practices which would, if successful, accomplish monopolization, and which, though falling short, nevertheless approach so close as to create a dangerous probability of it. Although the completed offense of monopolization under Section 2 only requires a general intent to do the acts leading to a monopoly, a specific intent to destroy competition or build monopoly is essential **[**22]** to liability. *Knutson v. Daily Review, Inc., 548 F.2d 795, 813 (9th Cir. 1976)*.

HN7[] There are three necessary elements of an attempt to monopolize claim. The first is the presence of a specific intent to destroy competition or build a monopoly. Such an intent may be shown or inferred by the commission of a Section 1 violation (e.g., in *Lessig v. Tidewater Oil Co., id*., the court found Section 1 violation consisting of defendant's resale price fixing and exclusive dealing). Alternately, such intent may be shown through proof of the specific intent to set prices or exclude competition in a portion of the market without legitimate business purpose. *Hallmark Indus. v. Reynolds, 489 F.2d 8, 12 (9th Cir. 1973)*. Second, the specific intent must be accompanied by either (1) predatory or anticompetitive conduct or a substantial claim of restraint of trade directed to accomplishing the unlawful purpose, or (2) sufficient market power to accomplish the unlawful purpose. Kintner, Federal ***Antitrust Law***, § 13.4 at p. 425 and see *Hunt-Wesson Foods, Inc. v. Ragu Foods, Inc., 627 F.2d 919 (9th Cir. 1980)*. Third, there must be **[*1300]** causal antitrust injury. *Cal. Computer Products* ***[**23]*** *v. Intern Business Machines, 613 F.2d 727, 738 (9th Cir. 1979)*.

Unilateral refusals to deal, in conjunction with these requisite elements, have been held to constitute an attempt to monopolize in violation of § 2 of the Sherman Act. *See* Kintner, Federal ***Antitrust Law***, Vol. II § 10.25 at p. 148. D & R alleges all three in its amended complaint.

HN8[] On a motion for summary judgment by a defendant on the ground that plaintiff has no valid claim, the defendant, as the moving party, has the burden of producing evidence, of the necessary certitude, which negatives the opposing party's claim, regardless of where the ultimate burden of proof would lie at trial. *National Industries v. Republic Nat. Life Ins. Co., 677 F.2d 1258, 1265 (9th Cir. 1982)* and generally, 6 Moore's Federal Practice para. 56.15(3) at p. 56-480.

However, Chambers-Rangaire assert that they accept for purposes of the summary judgment motion that all of D & R's factual assertions are true; that despite the truth of all the facts asserted by plaintiff, summary judgment should be granted, essentially, because plaintiff has failed, under any reasonable construction of the undisputed facts, to support a claim under **[**24]** Section 2 of the Sherman Act as a matter of law.

D & R's Answer is predictable; it is the burden of the moving party to demonstrate the absence of a genuine issue as to any material fact, and since Chambers-Rangaire offer no evidence, D & R is entitled to the Court's judgment on this point. This analysis overlooks the fact that Chambers-Rangaire rest not on what they can prove, but rather, on the basis that the facts marshalled by D & R on this issue are not sufficient, *as a matter of law*, to go to the jury.

The Court concurs with Chambers-Rangaire and grants their motion for summary judgment as to plaintiff's claims based on § 2 of the Sherman Act.

IV

PRICE DISCRIMINATION CLAIMS

Plaintiff's Robinson-Patman Act claim, 15 U.S.C. § 13 reads as follows:

> "Beginning sometime in 1975, or earlier, the exact date being presently unknown to plaintiff, defendant sold built-in household cooking appliances of its own manufacture, which products were of like grade and quality to Chambers brand built-in household cooking appliances to Amana Corporation; Sears, Roebuck & Co.; and Roper Corporation, among others, at different and lower prices than the prices at which defendant sold **[**25]** the same products under the Chambers brand name to plaintiff. Said unlawful price discrimination violates *Section 2(a)* of the Robinson-Patman Act, *15 U.S.C. § 13*."

After reviewing the Magistrate's recommendation and the evidence presented by the parties, it appears to this Court that the Magistrate was correct in determining that there is a genuine issue of fact regarding the question of "like grade and quality" which must go to the jury. However, this determination does not end the Court's inquiry.

The defendant argues that even if the private label ovens sold to Amana were of "like grade and quality" as the Chambers-brand ovens, it is still entitled to summary judgment because the price differentials between the two types of ovens were not discriminatory. Alternately, defendants assert that even if the price differentials were discriminatory, they did not substantially injure, destroy or prevent competition. Finally, they contend that even if the price differentials were discriminatory and did substantially injure, destroy or prevent competition, they did not cause compensable injury to plaintiff and thus defendant is entitled to summary judgment on the price discrimination **[**26]** claim.

The defendants buttress their position by contending that had plaintiff requested the manufacture of the private label ovens it **[*1301]** would have received them at the same price Amana did.

The resolution of this issue however turns on the resolution of the question of "like grade and quality" and since there is a factual issue remaining as to like grade and quality, the question of the price differentials being nondiscriminatory cannot be resolved at this stage of the proceedings. If for example the products are in fact of like grade and quality, then the private label arrangement is merely a facade behind which defendant hides so that it might charge different prices to different customers. The fact that plaintiff could have also benefitted from such a facade does not demonstrate that such an arrangement is not discriminatory as a matter of law.

Plaintiff must demonstrate at trial that the alleged price differential tended, substantially, to lessen or injure competition. Defendant argues that plaintiff's answer to interrogatories in which plaintiff was asked what facts it relied on to establish that the price differentials substantially injured or lessened competition, **[**27]** is insufficient to prove injury to competition and thus defendant is entitled to summary judgment.

Plaintiff's evidence shows that Mr. Watters, a research analyst of Chambers, testified both: 1) that he felt Chambers distributors were at a competitive disadvantage against Amana (Depo. 14:18-22), and 2) that they *weren't* at a competitive disadvantage. (Depo. 13:11-18).

If the question of substantial injury of competition alone were the critical issue, summary judgment would be denied in light of the dispute as to whether or not such injury existed. However, the critical question in a third line injury case such as plaintiff alleges here is whether or not the favored purchaser (Amana Refrigeration) actually passed on part of the discount given it by Chambers to Amana West Coast. *See* Von Kalinowski, *id*., § 5.07[2].

Defendant argues that plaintiff "has simply adduced no evidence to support its conclusion that . . . any lower price offered by Amana [Refrigeration] was the result of the price differentials upon which plaintiff bases its claim." However, defendant does not point to any interrogatory or deposition in which such information was sought and not given by plaintiff.

[28]** Finally, defendant argues that even if the discriminatory price differentials substantially injured competition, it is entitled to summary judgment because such price discrimination did not cause compensable injury to plaintiff. ***HN9***[] A private treble damage plaintiff "must make some showing of actual injury attributable to a violation of the Robinson-Patman Act. *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)*.

However, plaintiff's answer to Chambers interrogatories indicates that plaintiff lost sales to its retail dealer customers including nine specified customers due to the discriminatory price differentials allowed by defendant. If such loss of sales is true, plaintiff will have sufficiently met its damage requirements for a *§ 2(a)* violation. See *Allen Pen Co. v. Springfield Photo Mount Co., 653 F.2d 17, 22 (1981)*.

Consequently, defendant's motion for summary judgment as to plaintiff's Robinson-Patman Act claim is denied.

V

PLAINTIFF'S MOTION BASED ON DEFENDANT CHAMBERS-RANGAIRE EXCLUSIVE DEALING ARRANGEMENT

Paragraph 19 of plaintiff's amended complaint alleges:

> "Beginning sometime in 1977 and continuing until **[**29]** August 15, 1980, defendant Chambers Corporation coerced plaintiff into contracts, combinations and conspiracies to prevent competition in the manufacture, distribution and sale of products manufactured and sold by actual and/or potential competitors of defendant Chambers Corporation and/or defendant Rangaire Corporation. By said unlawful contracts, combinations and conspiracies, **[*1302]** plaintiff was coerced, on threat of termination and refusal to deal, to refrain from purchase of household cooking appliances other than Chambers brand products for wholesale distribution by plaintiff. Said contracts, combinations and conspiracies violate *Section 1* and *Section 2* of the Sherman Act, *15 U.S.C. 1*, *2*."

Paragraph 20 of plaintiff's amended complaint alleges:

> "Beginning sometime in 1973 and continuing up to October 1, 1980, defendant made sales of Chambers brand household cooking appliances to plaintiff on the condition, agreement and understanding that D&R Distributing would commit itself not to purchase or deal at wholesale in household cooking appliances of any manufacturers of kitchen appliances or any other actual or perceived competitor of Chambers Corporation and/or **[**30]** defendant Rangaire Corporation. Defendant thereafter policed the exclusive dealings arrangement by requiring and inducing plaintiff to refuse to distribute at wholesale any household cooking or other appliances other than Chambers brand products, and further, by extracting commitments that plaintiff would forbear from becoming the exclusive distributor for household appliance products other than Chambers brand products. Said unlawful contreact [sic] violates *Section 1* of the Sherman Act, *15 U.S.C. 1*, and *Section 3* of the Clayton Act, *15 U.S.C. 14*."

Plaintiff asserts that paragraphs 19 and 20 allege alternative substantive antitrust rules: #19 alleges a group boycott by plaintiff and defendants against competitors of defendants; #20 alleges an exclusive dealings arrangement between itself and defendant whereby plaintiff would refrain from distributing products of defendant's competitors.

In support of its contention that paragraph 19 alleges a traditional group boycott, per se violation of the antitrust laws, plaintiff directs the court's attention to its response to defendant's interrogatory no. 3(g), wherein plaintiff explains its per se allegations to the defendant:

> "The **[**31]** violation set forth in paragraph 19 constitutes a per se violation of the Sherman Act. The enlistment by Chambers Corporation, through coercive threats, of a third party, here the plaintiff, in an agreement not to trade with a manufacturer who competes with Chambers Corporation comprises a boycott, condemned under the Sherman Act. [citations] Traders may not exclude or inhibit a competitor trying to enter or compete in a market by coercing or inducing a customer not to deal with the competitor. [citations] Under the facts recited above, and incorporated herein by this reference, Chambers Corporation enlisted and induced plaintiff, an independent entity, on threat of termination, not to trade with competitors of Chambers Corporation, namely, Kelvinator Company, Gray and Dudley, and Roper Corporation."

It is evident from plaintiff's papers in opposition to the summary judgment motion and plaintiff's responses to interrogatories that paragraph 19 is aimed at two injuries: (1) a group boycott against defendant's manufacture-competitors and (2) loss of business from competing manufacturers.

Defendant's challenge to the first type of injury, viz., the group boycott involving plaintiff **[**32]** and defendant raises a question of standing. ***HN10***[] Standing is a question of law to be decided by the court. *John Lenore & Co. v. Olympia Brewing Co., 550 F.2d 495 (9th Cir. 1977)*.

HN11[] The Ninth Circuit has established the "target area" formula for determining standing. Under this doctrine, one who is only incidentally injured by a violation of the antitrust laws, "the bystander who was hit but not aimed at," cannot recover against the violator. *Karseal Corp. v. Richfield Oil Corp., 221 F.2d 358, 363 (9th Cir. 1955)*.

It appears clear to this court that D&R Distributing does not have standing to assert **[*1303]** the injuries of defendant's competing manufacturers.

The second injury plaintiff complains of in para. 19 is its own loss of business from competing manufacturers, specifically, Kelvinator Company, Gray and Dudley and Roper Corporation, allegedly caused by defendant's exclusive dealing arrangement. However, this injury is more appropriately and clearly encompassed in para. 20.

Accordingly, the Court orders summary judgment for Chambers-Rangaire as to Paragraph 19 of plaintiff's amended complaint.

Paragraph 20 of plaintiff's amended complaint alleges an exclusive dealing **[**33]** arrangement between itself and defendant in violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*, and *Section 3* of the Clayton Act, *15 U.S.C. § 14*. Plaintiff has withdrawn its assertion of a violation of the Clayton Act. It now proceeds only on its alleged *§ 1* of the Sherman Act violation.

In order to succeed with its *§ 1* claim at trial, plaintiff must demonstrate that an exclusive dealing arrangement exists, and that the performance of such an arrangement or contract will foreclose competition in a substantial share of the relevant product and geographic markets. Antitrust Adviser, 2d Ed. § 2.3 at p. 85 and *see Twin City Sportserv., Inc. v. Charles O. Finley & Co., 512 F.2d 1264, 1274-1275 (9th Cir. 1975)* (although Court addresses *§ 3* of Clayton Act, it is equally applicable to *§ 1* of the Sherman Act).

Essentially, defendant's argument is as follows: 1) plaintiff has failed to establish the existence of an exclusive dealing arrangement; 2) even if plaintiff has established an exclusive dealing arrangement, it has failed to adequately define the relevant market; but, 3) even if plaintiff has established the exclusive dealing arrangement and has adequately defined **[**34]** the relevant markets, it has failed to "adduce any evidence that the alleged exclusive dealings arrangement or any other alleged restraint of trade had an adverse effect upon a substantial portion of the relevant market.

Initially, the Court notes that the defendants have failed to introduce any evidence regarding the existence or nonexistence of an exclusive dealing arrangement for the time period involved in this lawsuit. Defendant's evidence to the effect that defendant thought that plaintiff would be unable to handle its large distribution area if it took on other manufacturers' products or the fact that in the past plaintiff did in fact distribute products for other manufacturers adds nothing to the question of the existence or abuse of an exclusive dealing arrangement. The defendants have failed to demonstrate that there is no genuine issue as to the existence or nonexistence of this critical fact.

Next, defendant argues that plaintiff has failed to adequately define the relevant markets. However, plaintiff's answers to interrogatories indicate that the relevant geographic market is Northern California and the relevant product markets are 1) electric built-in ovens, 2) electric **[**35]** built-in cooktops, and 3) 42-inch gas built-in cooktop surface units. Defendant may believe that to classify the product markets in the way in which plaintiff has done is "absurd", but that is insufficient support for its summary judgment motion.

Finally, defendant is correct that *at trial* plaintiff must prove that the exclusive dealing arrangement foreclosed competition in a substantial share of the relevant markets. The court recognizes that the defendant could sustain its summary judgment burden by conclusively showing that all the material facts are in evidence and that under no interpretation of such facts could the plaintiff demonstrate the foreclosure of competition in a substantial share of the relevant markets. *First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 20 L. Ed. 2d 569, 88 S. Ct. 1575 (1968)*. Before defendant would be entitled to summary judgment, however, it must demonstrate that all the evidence is in and with it, plaintiff cannot prove that competition in the relevant markets was foreclosed as a result of the alleged exclusive **[*1304]** dealing arrangement. Defendant has not done this.

Accordingly, defendant's motion for summary judgment **[**36]** as to plaintiff's exclusive dealings claim as alleged in Paragraph 20 is denied.

VI

PLAINTIFF'S GROUP BOYCOTT CLAIMS

Paragraph 23 of plaintiff's complaint states:

> "Beginning sometime in November 1980, or eaerlier [sic], the exact date being unknown to plaintiff, defendant entered into and carried out contracts, combinations and conspiracies to restrain interstate trade and commerce in the relevant market by effectuation of group boycotts depriving plaintiff of Chambers brand products from interstate sources of supply including Acropolis Wholesale Lumber of Salt Lake City, Utah; Designer Kitchens of Pohoenix, [sic] Arizona; Shreiber Engineering of Los Angeles, California; and ADD Distributors of Omaha, Nebraska. Said contracts, combinations and conspiracies violate *Sections 1* and *2* of the Sherman Act, *15 U.S.C. 1*, *2*."

HN12[] A group boycott is a restraint which generally is the means used for effectuating a concerted refusal to deal. Horsley, Per se Illegality and Concerted Refusals to Deal, 13 B.C. Indus. & Com. L.Rev. 484 (1972), found at n. 500 in Kintner, § 10.28 p. 155. An essential element to a group boycott claim is concerted action. Kintner: Federal ***Antitrust*** **[**37]** ***Law***, Vol. II, at §§ 10.27-10.38.

The concerted action alleged by plaintiff was between C&R and each participant listed in paragraph 23 of plaintiff's complaint, viz., Acropolis Wholesale Lumber of Salt Lake City, Designer Kitchens of Phoenix, Shreiber Engineering of Los Angeles, and ADD Distributors of Omaha.

Initially, defendants C&R argue that all the alleged participants to the group boycott claim, in their respective depositions, have stated that they chose not to do business with plaintiff because of business reasons, i.e., insufficient profit, and not due to any group boycott intentions or actions on the part of defendants C&R. Defendants' position is that since there is no concerted action and more importantly, no genuine issue of fact as to the existence of any concerted action, plaintiff's group boycott claim must fail and the court should grant summary judgment.

However, plaintiff has introduced evidence demonstrating that a factual question regarding the existence of concerted action among Chambers and at least one of the participants designated in paragraph 23 of his complaint exists.

Gary Bateman, the employee of the owner of Acropolis Wholesale Lumber and the one **[**38]** who is responsible for its purchasing, testified in his deposition that the vice-president of Chambers Corp. called and asked if a particular shipment ordered by Acropolis was intended for delivery to California and if so, Chambers Corp. wanted Bateman to know that two prior attempts to place such an order had already been made, and, although Chambers could not prevent Acropolis from making any such sale and delivery, it would prefer that Acropolis not make the particular shipment. (Deposition of Gary Bateman, 78:5-88.) On the other hand, Gary Bateman also testified that Dick Paras, the manager of Acropolis Wholesale Lumber, decided not to make the sale because, in addition to freight charges and the hassle with Chambers, no money would really be made on the sale. (Deposition of Gary Bateman, 111:9-13.)

The Court concludes that plaintiff has demonstrated a genuine issue of material fact, sufficient to withstand the motion for summary judgment, as to whether Acropolis Wholesale Lumber of Salt Lake City, Utah, was involved in "concerted action" with defendant or made a legitimate business decision.

Defendant next posits that the per se rule of unreasonableness is not applicable in **[**39]** the instant case because the alleged **[*1305]** group boycott is pursuant to a vertical restraint which would be governed by the Rule of Reason analysis.

Defendant argues that since plaintiff declared that it was proceeding with a per se case and not a rule of reason, once it is determined that a per se analysis is not applicable, plaintiff cannot choose to proceed with a rule of reason analysis. Defendants cite no authority for this proposition. There are cases where the court of appeals declined to proceed with a rule of reason analysis based on a *stipulation* to such effect between the parties and not any established rule of law. Plaintiffs would not be precluded from proceeding with their claim under a rule of reason analysis were the per se rule deemed to be inapplicable.

The law regarding concerted refusals to deal, or group-boycotts, is currently unsettled. One court discussing group boycotts noted "to state that the law concerning group boycotts and Section 1 of the Sherman Act lacks consistency would be to understate the truth by a wide margin." *Cullum Electric and Mechanical Inc. v. Mechanical Contractors Assn., 436 F. Supp. 418 (1976)*, *aff'd* *569 F.2d 821 (4th* ***[**40]*** *Cir. 1978)*. Conduct identified as a group boycott is no longer automatically considered as per se illegal, at least by the lower courts. Kintner, *id*. § 10.31 at p. 169. Some courts will examine whether the parties involved in the concerted refusal to deal are horizontally or vertically integrated, applying the rule of per se illegality to the former and the rule of reason to the latter. See cases cited in *Ron Tonkin Gran Turismo v. Fiat Distributors, 637 F.2d 1376, 1381-1388 (9th Cir. 1981)*.

The classification of agreements as between horizontally integrated businesses, i.e., agreements between competitors at the same level of market structure such as among manufacturers, or among distributors), and agreements between vertically integrated businesses i.e., agreements between persons at different levels of the market structure such as manufacturers and distributors, is however not always sufficiently informative or conclusive. See, e.g., *Cernuto Inc. v. United Cabinet Corp., 595 F.2d 164 (3rd Cir. 1979)* [agreement typically vertical, i.e. between a manufacturer and its distributor, judged by per se rule of illegality because, where agreement initiated by distributor **[**41]** the restraint was primarily horizontal in nature in that one customer is seeking to suppress its competition by utilizing the power of a common supplier and for purpose of controlling prices.]

Commentators in the field of ***antitrust law*** suggest that courts analyze the reasons underlying the concerted refusals to deal to determine whether they are exclusionary or anticompetitive and whether the particular practice in question is at least potentially reasonably ancillary to joint, efficiency-creating economic activities. Antitrust Advisor, 2d Ed., Supp. § 1.32 at pp. 36-46 and cases cited therein. The basic inquiry should be whether there is some plausible likelihood that the arrangement at hand has an efficiency-creating potential. If it does, it should be analyzed under the rule of reason. If not, per se illegality is appropriate. Antitrust Adviser, id., Supp. at p. 47.

After reviewing the papers in support of and in opposition to defendant's motion for summary judgment, this Court concludes that the defendants have failed to submit sufficient evidence from which a determination as to whether the per se rule of illegality or the rule of reason should be applied to the instant case **[**42]** can be made. Accordingly, defendant's motion for summary judgment on that issue is denied.

VII

PLAINTIFF'S PRICE FIXING CLAIM AGAINST DEFENDANTS CHAMBERS AND AMANA REFRIGERATION

Paragraph 18 of plaintiff's First Amended Complaint alleges:

> Beginning on January 5, 1977 and continuing at least to the time this complaint was filed, Chambers Corp. and Amana **[*1306]** Refrigeration entered into and carried out a contract, combination and conspiracy to fix, stabilize, peg, control and regulate prices on sales of self-cleaning pyrolytic electric built-in wall ovens and

other built-in kitchen appliance products sold under Amana and Chambers brand names. Said contract, combination and conspiracy unreasonably restrained interstate trade and commerce in California and in the U.S. in violation of *Section 1* and *Section 2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*.

Plaintiff's theory is that defendants Chambers Corporation and Amana agreed to an exchange of distributor price lists with the intent of fixing prices.

HN13[] Generally, the mere compilation and dissemination of pricing information among competitors does not constitute a per se violation of the Sherman Act. *United States v. United* ***[**43]*** *States Gypsum Co., 438 U.S. 422, 441, 57 L. Ed. 2d 854, 872, 98 S. Ct. 2864, n.16 (1978)*, *United States v. Container Corp., 393 U.S. 333, 21 L. Ed. 2d 526, 89 S. Ct. 510(1969)* (Fortas concurring) , *Krehl v. Baskin Robbins Ice Cream Co., 664 F.2d 1348, 1357 (9th Cir. 1982)*, *Rutledge v. Electric Hose & Rubber Co., 327 F. Supp. 1267, 1272 (C.D.Cal. 1971)*, and *see* discussion in Kintner, *Federal* ***Antitrust Law***, Vol. II, §§ 10.2-10.14. However, an exchange of price information coupled with a restriction of output or otherwise specific actions designed to achieve a uniformity of prices among competitors would constitute a per se violation of the Sherman Act. *United States v. American Linseed Oil Co., 262 U.S. 371, 67 L. Ed. 1035, 43 S. Ct. 607 (1923)*, *Krehl, id*., and *Morton Salt Co. v. United States, 235 F.2d 573, 576-577 (10th Cir. 1956)*, and *United States v. Citizens National Bank, 422 U.S. 86, 113, 45 L. Ed. 2d 41, 62, 95 S. Ct. 2099 (1975)*.

Defendants correctly point out that mere price similarity, when faced with identical or similar products involving similar costs necessarily requiring somewhat similar prices, standing alone, would be too insubstantial **[**44]** a foundation to support an inference of an unlawful price fixing conspiracy. *See* *Krehl, supra, at p. 1357, n.22*. This clearly falls short of the type of conduct accompanying price information exchange which courts have found to be per se illegal. *See, e.g.,* *United States v. American Linseed Oil Co., supra.* However, the ultimate test is not only what the actual effect is on prices, but whether such agreements interfere with "the freedom of traders and thereby restrain their ability to sell in accordance with their own judgment." *Plymouth Dealers' Ass'n. of No. Cal. v. United States, 279 F.2d 128, 132 (4th Cir. 1960)*.

Plaintiff relies on its evidence of an agreement between Chambers/Rangaire and Amana to exchange prices as the sole justification for concluding that defendants committed a per se violation of the Sherman Act. This is clearly not the law and plaintiff fails, as a matter of law, in its attempt at summary judgment. The Court concludes that the Magistrate was correct in denying plaintiff's cross-motion for summary judgment.

VIII

DEFENDANT CHAMBERS MOTION RE PRICE FIXING

However, the court notes that defendants, in support of their motion for summary judgment **[**45]** on plaintiff's price fixing claim, introduce evidence that one of Amana's executives responsible for setting the price of its ovens never examined or perused Chambers' price list, but, rather, fixed the price of its ovens by determining the cost of production and then adding a percentage profit figure to this amount. (Affidavit of George Tolbert). However, Mr. Tolbert's superiors to whom he sent his final prices for approval have not declared that they never saw the Chambers' price list or used it in finally determining Amana's price structure. Although defendant's counsel argues in its brief that Chambers' executives and departments responsible for price setting used the same procedure and did not examine Amana's price list, there is **[*1307]** no evidence of this presented to the Court for its consideration.

Rather, Mr. O. E. Pritchard, the Cost Manager for Chambers and the person who was responsible "for determining the standard cost of production of ovens sold by Chambers to its regional distributors under the Chambers brand states that, "I was periodically requested by my superiors at Chambers to determine the standard cost of [the ovens in question] for use in determining **[**46]** the price to be charged by Chambers for such ovens." Then, in his affidavit, Mr. Newton of Chambers testified that Mr. Hill or Mr. Grimes of Chambers determined what percentage of profit Chambers wanted to receive on its ovens. Nowhere does Chambers introduce evidence that the price list of Amana was not used or considered in effecting Chambers' own prices.

All inferences to be drawn in a summary judgment motion must be drawn in favor of the non-moving party. The movant must make a showing that makes it quite clear what the facts are as established by the evidence, and that excludes any real doubt as to the existence of any genuine issue of material fact. 6 *Moore's*, para. 56-15[3], at pp. 56-466 - 56-473. If the executives at Chambers who are responsible for establishing and finalizing the price to its distributors, in fact, examined and considered Amana's price lists in determining their own prices, the jury would be entitled to decide that an agreement to regulate, stabilize or otherwise fix prices did in fact exist. Such an inference by the fact finder would entitle plaintiff to a "per se" finding of antitrust liability.

Defendants argue, alternately, that even if the plaintiff **[**47]** prevails on the issue of liability, plaintiff has presented no evidence of injury in fact, or, alternately, any evidence from which plaintiff's damage might be computed.

The antitrust plaintiff may recover three types of damages: (1) Its increased costs, (2) lost past profits, and (3) reduction in the value of his business. Antitrust-Treble Damages -- Injury, 16 A.L.R. Fed 14, 19. Of course, double recovery is not allowed, *id*. In the instant case, it appears that plaintiff seeks to recover its increased costs in the form of overcharges for the fixed-price items, or, alternately, its lost net profits measured by the "before and after" method.

Defendant posits that there is only one proper type of recovery -- that of increased costs measured by the amount of overcharge for the fixed item. Although this is generally considered the most simple method of fixing damages, (Antitrust Adviser, 2d Ed., § 12.50 at p. 899) it is not the exclusive remedy. *See Washington State Bowling Prop. Ass'n. v. Pacific Lanes, Inc., 356 F.2d 371, 379 (9th Cir. 1966)*, *cert. denied 384 U.S. 963, 16 L. Ed. 2d 674, 86 S. Ct. 1590*, and 16 A.L.R.Fed. at p. 19.

Commonly, the increased cost damages **[**48]** involve a price overcharge. ***HN14***[] Where illegal price fixing results in an artificially high price, those who pay the fixed price may recover the difference between the fixed price and the price which would otherwise have prevailed absent the illegal price fixing. 16 A.L.R.Fed. 19; *Chattanooga Foundry and Pipe Works v. Atlanta, 203 U.S. 390, 396, 51 L. Ed. 241, 27 S. Ct. 65 (1906)*; and *Thomsen v. Cayser, 243 U.S. 66, 88, 61 L. Ed. 597, 37 S. Ct. 353 (1917)*. And, although determining what the price would have been absent a conspiracy may require some speculation. A wrongdoer should not be permitted to invoke the uncertainty created by his own wrong and use it to preclude a plaintiff's recovery. *National Constructors v. National Elec. Contractors, 498 F. Supp. 510, 518, 538 (D.Md. 1980)*.

HN15[] Recovery of lost profits is measured in any of three ways: The "before and after" method, the "yardstick method," or the "sales projection" method. 16 A.L.R. Fed 20. Plaintiff states that it has chosen the "before and after" method.

The "before and after" method compares two periods of time in the antitrust claimant's business -- the period during which his business suffered from the antitrust **[**49]** violations, and a previous or subsequent period **[*1308]** free from the effect of the antitrust violations. Specifically, the claimant is awarded the difference between, (1) his net profits during a period either before the antitrust violations began or after they had ceased and their effects had ended, and (2) his net profits during the period of the antitrust violations. *Bigelow v. RKO Radio Pictures, Inc., 327 U.S. 251, 90 L. Ed. 652, 66 S. Ct. 574 (1946)*, and 16 A.L.R.Fed. 21. The period used for comparison with the damage period must be a fair measure of the claimant's profits. 16 A.L.R.Fed., *id*. The Ninth Circuit has held that the before and after method of measuring damages may be used only where there has been some showing that the market conditions in the two periods were similar but for the impact of the violation. *Pac. Coast Agri. Export Ass'n. v. Sunkist Growers, Inc., 526 F.2d 1196, 1206-1207 (9th Cir. 1975)*.

Plaintiff asserts that the "starting point for computing the overcharge extracted from plaintiff and other direct purchasers during the period of the price fix" is the 41.5% profit margin of Chambers and the 26% profit margin of Amana. Plaintiff **[**50]** then correctly points out the relevant inquiry: "The issue then is to determine what the price in a free and open market would have been but for the artificial price-fix imposed on the market by Chambers and Amana."

First, the margin of profit received by defendants, while relevant, is not determinative. Plaintiff would need to demonstrate that, at a minimum, the margin of profit was appreciably different during the period of antitrust violation than during the periods of no antitrust violation. Plaintiff says nothing more than is mentioned above. Nor, in its answers to interrogatories, does plaintiff do more than to mention what the range of profit margin of defendants was -- without indicating any specific time period for purposes of comparison.

More importantly, the difference between the price charged to plaintiff and defendants' marginal cost of production, without more, is not necessarily relevant nor necessarily indicative of what the "overcharge" was. Granted, in a free, ideally competitive market, often prices will not be much greater than the marginal cost of production. And true, in some monopoly cases, the fact that prices are much greater than the marginal cost of production **[**51]** is some indication of control over prices. However, it is necessary to know more than defendants' mere marginal cost of production. One can be competitive and still be able to charge more than the marginal cost of production -- assuming the market will bear it.

In summary, defendants' position is that all of plaintiff's evidence, as demonstrated by its answers to interrogatories, fails to present evidence of damages.

Implicit from the facts given in plaintiff's answers regarding the issue of damages is that the "free market, non-fixed price" during the antitrust violation period is evidenced by the price Chambers sold the relevant products to Amana, which price is less than it sold the same products to D & R.

Granted, plaintiff could have given more complete answers to defendants' interrogatories, but for purposes of this summary judgment motion, in view of the fact that all inferences must be drawn in plaintiff's favor, plaintiff has some evidence of injury and some evidence from which the jury could calculate the amount of damages.

Plaintiff does not mention its use of the "before and after" method of calculating damages in its answers to interrogatories.

Accordingly, it is **[**52]** ordered that:

1. Plaintiff's Motion for Summary Judgment on the Sherman Act claims is denied, and

2. Defendant Chambers' and Amana's Motions for Summary Judgment on the plaintiff's price fixing claims are likewise denied.

Counsel for the moving defendants are to prepare and lodge with the Court *separate* judgments consistent with this Memorandum Decision and Order and lodge the same within twenty (20) days of the date of this Order. Counsel for the plaintiff shall **[*1309]** have twenty (20) days to object to the *form* of such judgments.

HN1[] **Regulated Practices, Market Definition**

Although potential competition resulting from easy entry can as logically be appraised as part of market definition, the court utilizes the traditional analysis of defining the market in terms of existing competitors.

Opinion by: WINTER

Opinion

[*977] WINTER, Circuit Judge:

Appellants Waste Management, Inc. ("WMI") and EMW Ventures **[**2]** Incorporated ("EMW") appeal from Judge Griesa's decision, *588 F. Supp. 498 (1983)*, after a bench trial, that WMI's acquisition of EMW violated section 7 of the Clayton Act, as amended, *15 U.S.C. § 18*, and from the resultant order that WMI divest Texas Industrial Disposal, Inc. ("TIDI"), a former EMW subsidiary.

We reverse.

BACKGROUND

This government antitrust action challenges WMI's acquisition of EMW's common stock. After the district court denied the government's motion for a temporary restraining order, the acquisition was consummated, and the case proceeded to trial before Judge Griesa sitting without a jury.

We summarize those facts that are not in dispute. WMI is in the solid waste disposal business. It provides services in twenty-seven **[*978]** states and had revenues of approximately $ 442 million in 1980. At the time of the acquisition, EMW was a diversified holding company that owned a subsidiary by the name of Waste Resources, which was in the waste disposal business in ten states and had revenues of $ 54 million in 1980.

WMI and Waste Resources each had subsidiaries that operated in or near Dallas. [1] WMI has one subsidiary, **[**3]** American Container Service ("ACS") in Dallas, and another, Texas Waste Management, in the Dallas suburb of Lewisville. Waste Resources had a Dallas subsidiary called Texas Industrial Disposal, Inc. ("TIDI"). WMI now operates TIDI as a WMI sub.

Waste collection involves several different types of equipment and serves the needs of various types of customers. For present purposes, it is important to distinguish between "non-containerized" and "containerized" equipment. "Non-containerized" refers to trucks with compactors into which trash cans and bags are loaded by hand. "Containerized" equipment consists of two types of receptacles, "dumpsters" and "roll off," each emptied by different kinds of trucks. Dumpsters typically have a volume **[**4]** of one to eight cubic yards and are emptied by "front-load" trucks that pick the dumpsters up with clamps and empty them into a hopper. Roll-off containers range up to 50 cubic yards in volume and are carried to a dump, emptied and then returned. Trucks that transport roll-off containers are known, not surprisingly, as roll-off trucks. If the customer desires containerized service, the waste hauler provides the dumpster or roll-off container.

There are various relevant classes of customers: (i) single or multiple dwelling residential customers; (ii) apartment complexes of varying size, (iii) "business" customers -- stores, restaurants, etc., and (iv) "industrial" customers -- construction sites, factories, etc. Customers choose among the kinds of services according to their individual needs, the quantity of trash produced being a critical factor.

The parties strenuously disagree over the proper definition of the relevant product and geographic markets. The government contended in the district court that the product market should be defined in terms of equipment type and that front-load and roll-off waste collection service each constitutes a separate product market. WMI argued **[**5]** that the market includes all forms of waste collection. The district court adopted a definition of the relevant product market that differed from the positions of both parties. Judge Griesa concluded that the product market included all trash collection, except for collection at single-family or at multiple family residences or small apartment complexes. Rejecting WMI's contentions as to the relevant geographic market, the district court excluded Tarrant County, which includes Fort Worth, thus limiting the market to Dallas County plus a small fringe area.

Based on revenue data, Judge Griesa found that the combined market share of TIDI and ACS was 48.8%. [2] He viewed that market share as *prima facie* illegal under *United States v. Philadelphia National Bank, 374 U.S. 321, 364-66, 10 L. Ed. 2d 915, 83 S. Ct. 1715 (1963)*. Agreeing with appellants that entry into the product market is easy -- indeed, individuals operating out of their homes can compete successfully "with any other company" -- Judge Griesa nevertheless held that proof of ease of entry did not rebut the *prima facie* showing of illegality. The district **[*979]** court therefore ordered WMI to **[**6]** divest itself of TIDI. Because we conclude that potential entry into the

---

[1] The government's challenge to the merger also involved WMI and Waste Resources' subsidiaries in Houston. Judge Griesa upheld the merger so far as the Houston companies were concerned, and no appeal was taken. We thus address only the legality of the acquisition of TIDI.

[2] As mentioned *supra*, WMI had a second subsidiary, Texas Waste Management, in the Dallas geographic market. The government offered no market share data for Texas Waste Management, and the district court did not consider it in its determination of market share. Since the government failed to carry its burden on this issue, we also decline to consider Texas Waste Management's share.

relevant Dallas market by new firms or by firms now operating in Fort Worth is so easy as to constrain the prices charged by WMI's subs, we reverse on the grounds that the merged firm does not substantially lessen competition.

DISCUSSION

WMI raises the following claims which we treat *seriatim*: (1) the district court's definition of the relevant geographic and product markets and its determination of WMI's post-merger market share are erroneous; and (2) the district court erred in rejecting WMI's rebuttal of the *prima facie* case.

A. **[**7]** *Market Definition and Determination of Market Share*

In determining the relevant product and geographic market, Judge Griesa considered only firms that presently collect waste in competition with WMI's subs TIDI and ACS. He thus did not consider the effect of potential competition by new entrants upon the market power of the merged firm but rather treated this as part of the rebuttal to the *prima facie* case. ***HN1***[] Although potential competition resulting from easy entry can as logically be appraised as part of market definition, *see* R. Posner, ***Antitrust Law*** 132-33 (1976), we will utilize the traditional analysis of defining the market in terms of existing competitors.

We thus begin by determining which firms presently collect waste in actual competition with WMI (a term we use henceforth to include TIDI and ACS). WMI provides waste disposal services to business and industrial customers as do a number of other private haulers. Neither WMI nor these other haulers provides substantial services to residential customers since residential waste is generally collected by private or municipal **[**8]** haulers who provide only limited services to business/industrial customers. Residential and business/industrial customers are thus served largely by different firms.

One reason for the distinction between residential and business/industrial collection is found in customer preferences for collection by particular equipment at existing prices. Thus, residential customers largely prefer non-containerized service while business/industrial customers usually opt for containerized hauling. There is of course overlap, and the district court therefore did not define the market solely in terms of equipment distinctions. Some large apartment complexes prefer containerized service (and were included by Judge Griesa as customers in the relevant market), and some businesses make do with hand collection (also included as customers in the relevant market).

Another reason for the distinction (as modified by the overlaps) between residential and business/industrial collection is that most private haulers provide only containerized service and most municipalities provide only non-containerized service. The largest municipality, the City of Dallas, provides no containerized service. Moreover, **[**9]** the few municipalities that do provide containerized service to business/industrial customers were included as sellers in the relevant product market.

At bottom, however, the distinction between residential and business/industrial service rests on two facts, one economic and the other political. First, customers with large amounts of trash have a greater need for containerized service than do customers with smaller quantities; the former tend to be business/industrial and the latter residential. Second, the latter customers are, for political reasons, served by hand collection provided at low prices by municipalities. At the fringe, of course, some business/industrial customers have sufficiently little trash to be able to choose hand collection at existing prices while some residential customers, such as large apartment complexes, prefer containerized service. Some business/industrial customers haul their trash themselves, although **[*980]** the record indicates that is not a feasible alternative for many at existing prices.

Customer preferences for service, therefore, turn largely on the quantity of trash produced, and different kinds of equipment are most useful for different **[**10]** quantities of trash. It might be that in a market without municipal haulers the larger private haulers would offer a full line of services, and the relevant product market would be all trash collection. However, the decision of the City of Dallas and other municipalities to provide non-containerized service has narrowed the market available to private haulers. The fact that only a small fringe of customers have a meaningful choice at existing prices between hand collection, containerized service, or self-hauling demonstrates that the bulk of business/industrial customers will view the alternatives as economically feasible only when confronted with substantial increases in the cost of containerized service. We regard this as legally sufficient to support Judge Griesa's view of which existing firms presently compete with WMI. [3]

[11]** Nor is there support for WMI's claim that the power of Dallas or other municipalities to provide containerized service is a constraint on the prices charged by private firms serving the market so defined. Such an expansion of services would be essentially political since the City of Dallas is not a profit-seeking entrepreneur, and there is no evidence that such a decision is likely absent very substantial price increases by private haulers.

Indeed, for all of the smoke blown by WMI over Judge Griesa's market definition, internal TIDI documents fully support his findings. In October, 1980, TIDI completed a "Budget Questionnaire" that had been sent by Waste Resources. This required TIDI to list its major competitors by name, percentage of market, and kinds of equipment. TIDI listed only private haulers as competitors, and these provided almost exclusively containerized service. The major competitors included therein were five private firms with 83 trucks suitable for containerized service and two trucks suitable for hand collection. This questionnaire amply documents Judge Griesa's conclusions as to the product market as defined in terms of existing competitors.

The district **[**12]** court found the relevant geographic market to be Dallas County, plus a small fringe, but not Tarrant County, of which the city of Fort Worth is part. WMI argued below, and continues to argue here, that the relevant geographic market consists of the entire Dallas-Fort Worth metropolitan area. We disagree. Dallas and Fort Worth constitute a Single Standard Metropolitan Statistical Area based on the Office of Management and Budget's judgments regarding economic and social integration. Nevertheless, the bulk of existing Dallas and Fort Worth haulers presently operate exclusively in their respective cities. Only a few, situated near the border between Dallas and Tarrant Counties, do business in both. The area between the two cities is not heavily urbanized and some of the towns between them have granted long term exclusive franchises to waste collectors. Since the travel times between the more heavily populated cities is 45 to 50 minutes, daily service between both areas by the same trucks would be costly. Existing firms that presently compete with WMI are thus found for the most part only in Dallas County, a finding consistent with the TIDI Budget Questionnaire.

The district **[**13]** court found that TIDI's and ACS's combined share of the market so **[*981]** defined was 48.8%. This finding was based on a comparison of revenues of the various haulers within this market, and it is to that evidence that we now turn.

In the pre-acquisition Budget Questionnaire filled out by TIDI, it listed its major competitors and gave their approximate market shares. TIDI's responses and Judge Griesa's findings are compared as follows:

Name	TIDI's Estimate of Approximate % of Market	Judge Griesa's Finding of % of Market
ACS	26	22.5
Moore Ind.	15	11.1
BFI	10	7.2
AIDS	5	3.4
S.C.A.	4	2.5

[3] We reject WMI's contention that the district court violated its due process rights by defining a market against which it had no opportunity to defend. Since appellant argued at trial that *every* waste hauler should be included in the market definition, it plainly responded to all less inclusive alternatives. To the minor extent that the district court deviated from an analysis of equipment-based distinctions as debated by the parties, that deviation was to appellant's advantage. By including in the market all business/industrial customers, even those that use non-containerized equipment, the court diluted appellant's market share by counting the revenues that Dallas and other municipalities receive from business establishments.

TIDI calculated its own market share as 40-45%, as compared with the 26.3% found by Judge Griesa. The difference between the TIDI estimates and Judge Griesa's findings are accounted for by Judge Griesa's inclusion of municipal revenues from business/industrial waste disposal.

WMI's principal challenge to these findings focuses upon the admission into evidence of two revenue surveys of various firms prepared respectively by an expert retained by the government and by paralegal employees of the Justice Department. However, so far as the **[**14]** surveys relate to the revenues of the largest private haulers, they are fully corroborated by other testimony or exhibits, and we find no contrary evidence in the record. To the extent the surveys relate to the revenues of smaller private haulers or of municipalities serving business/industrial customers, their exclusion would not significantly affect Judge Griesa's findings as to market share. Accordingly, if error was committed, it was harmless. We have reviewed other evidentiary issues raised by WMI but have concluded that they too are, at best, harmless error.

B. *WMI's Rebuttal*

HN2[] A post-merger market share of 48.8% is sufficient to establish *prima facie* illegality under *United States v. Philadelphia National Bank, 374 U.S. 321, 10 L. Ed. 2d 915, 83 S. Ct. 1715 (1963)*, and its progeny. That decision held that large market shares are a convenient proxy for appraising the danger of monopoly power resulting from a horizontal merger. *Id. at 362-63*. Under its rationale, a merger resulting in a large market share is presumptively illegal, rebuttable **[**15]** only by a demonstration that the merger will not have anticompetitive effects. *Id. at 363*. Thus in *United States v. General Dynamics Corp., 415 U.S. 486, 39 L. Ed. 2d 530, 94 S. Ct. 1186 (1974)*, the Court upheld a merger of two leading coal producers because substantially all of the production of one firm was tied up in long-term contracts and its reserves were insubstantial. Since that firm's future ability to compete was negligible, the Court reasoned that its disappearance as an independent competitor could not affect the market.

WMI does not claim that 48.8% is too small a share to trigger the *Philadelphia National Bank* presumption. Rather, it argues that the presumption is rebutted by the fact that competitors can enter the Dallas waste hauling market with such ease that the finding of a 48.8% market share does not accurately reflect market power. WMI argues that it is unable to raise prices over the competitive level because new firms would quickly enter the market and undercut them.

In discussing ease of entry, Judge Griesa stated:

> Defendants in the present case urge that even if the Government has made a prima facie **[**16]** showing on the basis of market share statistics, there are circumstances which undermine the significance of these statistics. Among the arguments in this regard are:
>
> > (1) It is so easy to enter the trash collection market that the relative competitive strength of a company cannot properly be measured solely with respect to the existing companies in the market, but must take into account potential new entrants.
> >
> > **[*982]** (2) Over the past several years there has been a trend toward deconcentration, involving steady entry into the market by new companies.
> >
> > * * *
>
> The Court agrees that entry into the trash collection business is relatively easy, and the barriers to entry not great. A person wanting to start in the trash collection business can acquire a truck, a few containers, drive the truck himself, and operate out of his home. A great deal depends on the individual's personal initiative, and whether he has the desire and energy to perform a high quality of service. If he measures up well by these standards, he can compete successfully with any other company for a portion of the trade, even though a small portion. If he does not measure up, he is less successful **[**17]** or fails.
>
> Over the last 10 years or so a number of companies have started in the commercial trash collection business, performing containerized service. A few, including TIDI and ACS, have grown to substantial size, presumably because of good management and service, and also as a result of acquiring other companies. The majority of

> new entrants have either remained relatively small or disappeared as independent entities by going out of business or being acquired by larger companies.
>
> There is no showing of any circumstance, related to ease of entry or the trend of the business, which promises in and of itself to materially erode the competitive strength of TIDI and ACS. With regard to the legal effect of low entry barriers and potential competition in a § 7 case, there is no persuasive authority for allowing such factors to overcome a strong prima facie showing of concentration in the *existing* competitive structure.

The Supreme Court has never directly held that ease of entry may rebut a showing of *prima facie* illegality under *Philadelphia National Bank*. However, on several occasions it has held that **[**18]** ***HN3***[] appraisal of the impact of a proposed merger upon competition must take into account potential competition from firms not presently active in the relevant product and geographic markets. *United States v. Falstaff Brewing Corp., 410 U.S. 526, 35 L. Ed. 2d 475, 93 S. Ct. 1096 (1973)*; *Federal Trade Commission v. Procter & Gamble Co., 386 U.S. 568, 87 S. Ct. 1224, 18 L. Ed. 2d 303 (1967)*; *United States v. Penn-Olin Chemical Co., 378 U.S. 158, 12 L. Ed. 2d 775, 84 S. Ct. 1710 (1964)*. *Falstaff*, for example, involved a large national brewer that did no business in the northeast section of the country until it acquired Narrangansett, the largest brewer in New England. Reversing a district court finding that Falstaff was not likely to enter the New England market *de novo*, the Supreme Court concluded that the very existence of Falstaff as a potential entrant might constrain brewers in the northeast to maintain competitive price levels as a means of forestalling entry by Falstaff. Under that decision, therefore, potential entrants must be considered in appraising a merger.

Moreover, under *General Dynamics*, **[**19]** ***HN4***[] a substantial existing market share is insufficient to void a merger where that share is misleading as to actual future competitive effect. In that case, long-term contracts and declining reserves negated the inference of market power drawn from the existing market share. In the present case, a market definition artificially restricted to existing firms competing at one moment may yield market share statistics that are not an accurate proxy for market power when substantial potential competition able to respond quickly to price increases exists.

Finally, the *Merger Guidelines* issued by the government itself not only recognize the economic principle that ease of entry is relevant to appraising the impact upon competition of a merger but also state that it may override all other factors. ***HN5***[] Where entry is "so easy that existing competitors could not succeed in raising prices for any significant period of time," the government has announced that it will usually not challenge a merger. *United States Department* ***[*983]*** *of Justice 1984 Merger* **[**20]** *Guidelines*, 46 Antitrust & Trade Reg. Rep. (BNA) No. 1169 Spec. Supp. § 3.3, at S-6. If the Department of Justice routinely considers ease of entry as relevant to determining the competitive impact of a merger, it may not argue to a court addressing the same issue that ease of entry is irrelevant. We conclude, therefore, that ***HN6***[] entry by potential competitors may be considered in appraising whether a merger will "substantially lessen competition." [4]

[21]** Turning to the evidence in this case, we believe that entry into the relevant product and geographic market by new firms or by existing firms in the Fort Worth area is so easy that any anti-competitive impact of the merger before us would be eliminated more quickly by such competition than by litigation. *See* R. Bork, The Antitrust Paradox 222 (1978). Judge Griesa specifically found that individuals operating out of their homes can acquire trucks and some containers and compete successfully "with any other company." The government's response to this factual finding is largely to the effect that economies of scale are more important than Judge Griesa believed.

---

[4] Section 7 of the Clayton Act, *15 U.S.C. § 18 (1982)* provides in relevant part:

> ***HN7***[] No person engaged in commerce or in any activity affecting commerce shall acquire, directly or indirectly, the whole or any part of the stock or other share capital and no person subject to the jurisdiction of the Federal Trade Commission shall acquire the whole or any part of the assets of another person engaged also in commerce or in any activity affecting commerce, where in any line of commerce or in any activity affecting commerce in any section of the country, the effect of such acquisition may be substantially to lessen competition, or to tend to create a monopoly.

As with his other findings of fact, however, this one is not clearly erroneous, as there are examples in the record of such entrepreneurs entering and prospering.

In any event, entry by larger companies is also relatively easy. At existing prices most Fort Worth and Dallas haulers operate within their own cities, but it is clear from the record that Fort Worth haulers could easily establish themselves in Dallas if the price of trash collection rose above the competitive level. Although it may be true that daily travel **[**22]** from Fort Worth to Dallas and back is costly, there is no barrier to Fort Worth haulers' acquiring garage facilities in Dallas permitting them to station some of their trucks there permanently or for portions of each week. The risks of such a strategy are low since substantial business can be assured through bidding on contracts even before such garage facilities are acquired, as one Fort Worth firm demonstrated by winning such a contract and then opening a facility in a Dallas suburb. That example can hardly be ignored by WMI or other Dallas haulers (not to mention their customers) in arriving at contract bids. The existence of haulers in Fort Worth, therefore, constrains prices charged by Dallas haulers, much as Falstaff constrained pricing by northeast breweries.

The fact that such entry has not happened more frequently reflects only the existence of competitive, entry-forestalling prices, as contemplated in *Falstaff. 410 U.S. at 532-537*. We have no doubt that, if WMI were now to seek to acquire a major hauler in Fort Worth, the *Falstaff* decision would compel us to treat the Fort Worth hauler as a potential competitor of WMI. We perceive no reason why **[**23]** Fort Worth haulers should be treated as potential competitors in those circumstances but not in the present case.

Judge Griesa's conclusion that "there is no showing of any circumstances, related to ease of entry or the trend of the business, which promises in and of itself to materially erode the competitive strength of TIDI and ACS" is consistent with our decision. TIDI and ACS may well retain their present market share. However, in view of the findings as to ease of entry, that share can be retained only by competitive pricing. Ease of entry constrains not only WMI, but every firm in the market. Should WMI attempt to exercise market power by raising prices, none of its smaller **[*984]** competitors would be able to follow the price increases because of the ease with which new competitors would appear. WMI would then face lower prices charged by all existing competitors as well as entry by new ones, a condition fatal to its economic prospects if not rectified.

The government argues that consumers may prefer WMI's services, even at a higher price, over those of a new entrant because of its "proven track record." We fail to see how the existence of good will achieved through **[**24]** effective service is an impediment to, rather than the natural result of, competition. The government also argues that existing contracts bind most customers to a particular hauler and thereby prevent new entrants from acquiring business. If so, they also prevent the price increases until new entrants can submit competitive bids.

Given Judge Griesa's factual findings, we conclude that the 48.8% market share attributed to WMI does not accurately reflect future market power. Since that power is in fact insubstantial, the merger does not, therefore, substantially lessen competition in the relevant market and does not violate Section 7.

Reversed.

Opinion

[*349] Order Granting in part and Denying in Part Defendants' Motion for Summary Judgment

LYNCH, D.J.:

The complaint in this antitrust action alleges a concerted refusal by the defendants to deal with the plaintiffs. This matter is before the court on the defendants' motion for summary judgment based on the statute of limitations. After reviewing the papers and argument of counsel, the court concludes that the defendants' motion must be granted in part and denied in part. The defendants cannot be held liable for any damages caused by unlawful acts committed more than four years before this suit was filed; however, the statute of limitations, does not protect the defendants from liability for any damages caused by unlawful acts committed within four years of the date this suit was filed.

I. Facts

During the relevant period, plaintiff Stuart Conn ("Conn") operated gift and clothing shops that catered to Japanese tourists visiting San Francisco, California. Western Shoe Gallery, Inc. and Silvermint were two of the names under which Conn operated. [1] The defendants are a diverse **[*350]** group; most significantly, **[**2]** they include competing gift shops and package tour companies, all catering to the Japanese tourist trade. All of the tour operators are American subsidiaries or agents of Japanese Corporations, and they were all members of the Japanese Tour Operator's Association ("JTOA"), which is also a defendant.

[3]** The tour operators provided, among other things, bus tours around northern California. The tours frequently included stops at gift shops oriented towards Japanese tourists. Conn alleges that the defendants conspired to boycott him and to drive him out of the relevant market because he refused to pay secret rebates to the tour operators; the tour operators allegedly brought tourists to the defendant gift shops because these shops paid

---

[1] Another of Conn's business entities, the Upstairs Corporation, has already been dismissed from this action because its corporate status had been suspended by state authorities, and it therefore lacked capacity to sue. The defendants have now moved for summary judgment against Western Shoe Gallery, Inc. on the same ground; Western Shoe Gallery's corporate status was suspended on April 2, 1984. The defendants' motion is denied on this issue, however, because Conn has shown that the corporate status of Western Shoe Gallery, Inc. was reinstated as of July 27, 1984. Throughout this opinion, the plaintiffs are referred to simply as "Conn" because it is clear that the defendants did not distinguish between the various entities controlled by Mr. Conn.

rebates based generally upon the value of the purchases made at the store by tourists brought in by the particular tour operator. The tourists were unaware of the rebates. Conn further alleges that the tour operators disparaged his stores and attempted to control where the tourists shopped even when they were not in an organized group. Conn brought this action alleging violations of sections 1 and 2 of the Sherman Act (15 U.S.C. §§ 1 & 2), section 2(c) of the Robinson-Patman Act (15 U.S.C. § 13(c)), state antitrust laws, and state tort law.

II. Discussion

A. Defendants' Liability for Acts Committed Before February 9, 1978

The defendants bring this motion for summary judgment on the ground that the statute of limitations has run on each of Conn's **[**4]** claims. [2] The longest of the statutes in question is ***HN1***[] 15 U.S.C. section 15b, which requires that suits for damages under the Sherman Act be brought "within four years after the cause of action accrued." After reviewing the affidavits and documents submitted by the defendants, the court has no doubt that Conn had actual knowledge of the defendants' scheme more than four years before February 9, 1982, when this lawsuit was filed. Indeed, on November 28, 1977, Conn's current attorney wrote a letter to one of the defendants; that letter outlined the very conspiracy alleged in this action and threatened to file suit. Therefore, Conn may not recover any damages caused by acts committed before February 9, 1978. Conn attempts to avoid the statute of limitations altogether by invoking the doctrine of fraudulent concealment. *See Mt. Hood Stages, Inc. v. Greyhound Corp., 555 F.2d 687, 698 (9th Cir. 1977)*, *cert. denied*, *449 U.S. 831, 66 L. Ed. 2d 36, 101 S. Ct. 99 (1980)*. This contention is completely without merit.

[5]** Although Conn's fraudulent concealment argument suffers from many flaws, it is sufficient to note that by 1977, at the latest, Conn had *actual knowledge* of the operative facts which are the basis of his claims. Regardless of any actions taken by the defendants to conceal their conduct, Conn's actual knowledge of the alleged antitrust violation prevents him from asserting fraudulent concealment. *See Aurora Enterprises v. National Broadcasting Co., 688 F.2d 689, 693 (9th Cir. 1982)*; *Rutledge v. Boston Woven Hose & Rubber Co., 576 F.2d 248, 249-50 (9th Cir. 1978)*; *Dayco Corp. v. Goodyear Tire & Rubber Co., 523 F.2d 389 (6th Cir. 1975)*.

B. Defendants' Liability for Acts Committed After February 9, 1978

The defendants argue that this *entire action* is barred under *In re Multidistrict Vehicle Air Pollution, 591 F.2d 68* (9th Cir.), *cert. denied*, *444 U.S. 900, 100 S. Ct. 210, 62 L. Ed. 2d 136 (1979)*, and *David G. Orgell, Inc. v. Geary's Stores, Inc., 640 F.2d 936* (9th Cir.), *cert. denied*, *454 U.S. 816, 102 S. Ct. 92, 70 L. Ed. 2d 84 (1981)*, **[*351]** because *all* of Conn's causes of action accrued when he learned of the alleged conspiracy. The **[**6]** court disagrees. Conn may recover damages caused by acts committed after February 9, 1978.

> ***HN2***[]
>
> Generally, a cause of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business. . . . In the context of a continuing conspiracy, to violate the antitrust laws . . . this has usually been understood to mean that each time a plaintiff is injured by an act of the defendants a cause of action accrues to him to recover the damages caused by that act and that, as to those damages, the statute of limitations runs from the commission of the act.

Air Pollution, 591 F.2d at 71 (quoting *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 28 L. Ed. 2d 77, 91 S. Ct. 795 (1971)*).

---

[2] The defendants have also argued that Conn's equitable claims are barred by laches. We need not decide this claim, however, because Conn stated at oral argument that he had abandoned his claims for equitable relief.

Thus, Conn may recover only for damages caused by forbidden "overt acts" within the limitations period. *Air Pollution, 591 F.2d at 71*. In the instant case, discovery provided by the defendants reveals many recent overt acts of the conspiracy. No fewer than six of the tour operator defendants have stated in answers to interrogatories that they continue to receive rebates from some or all of the gift shop defendants. The **[**7]** amount of each rebate is generally calculated as a percentage of the sales made to the tourists brought in by the particular tour operator. The defendants admit that they do not inform the tourists about the rebates.

Documents produced by the defendants also raise material questions of fact as to whether the JTOA has been used as a vehicle to maintain and enforce the group boycott. In 1979, for example, one member apparently felt it necessary to address the JTOA membership to dispel rumors that it was a "spy" for Conn. In 1980, another member had to explain why one of Conn's advertisements appeared in a tourists map of the United States. Also in 1980, one of the defendant tour operators threatened to withdraw from the JTOA because of another defendant's "movement toward" Conn and a rival tour operator allied with Conn. Policy discussions were also held among JTOA members; at one meeting, members stated that they planned to steer tourists to the defendant gift shops and to collect commissions. Other discovered documents reveal that the American subsidiaries of Japanese companies continued, until at least 1980, to send back to Japan intelligence reports concerning Conn and his operations. **[**8]** [3]

On the strength of this evidence, the court concludes that there do exist genuine issues of material fact as to whether, prior to 1978, the alleged concerted refusal to deal was "irrevocable, immutable, permanent and final" as those terms are used in the *Air Pollution* case. *591 F.2d at 71*.

The plaintiff in *Air Pollution* alleged a concerted refusal by the defendants to purchase plaintiff's pollution control device. The defendants **[**9]** had initially refused to purchase plaintiff's device more than four years before the suit was filed. The court found that the statute of limitations began running on plaintiff's entire claim at the time of this initial refusal. The *Air Pollution* court followed two Fifth Circuit cases and ruled that

> ***HN3***[] where the violation is final at its impact, for example, where the plaintiff's business is immediately and permanently destroyed, or where an actionable wrong is by its nature permanent at initiation without further acts, then the acts causing damage are unrepeated, and suit must be brought within the limitations period and upon the initial act.

[*352] *Air Pollution, 591 F.2d at 72* (quoting *Poster Exchange, Inc. v. National Screen Service Corp., 517 F.2d 117, 126-27 (5th Cir. 1975)*, *cert. denied*, *423 U.S. 1054, 46 L. Ed. 2d 643, 96 S. Ct. 784 (1976))*; *see also* *Imperial Point Colonnades Condominium, Inc. v. Mangurian, 549 F.2d 1029* (5th Cir.), *cert. denied*, *434 U.S. 859, 98 S. Ct. 185, 54 L. Ed. 2d 132 (1977)* (also cited in *Air Pollution, 591 F.2d at 72*).

The *Air Pollution* court concluded that any violation was final before the limitations **[**10]** period despite the fact that contacts initiated by plaintiff within the limitations period were again rebuffed. The court described these contacts as "forlorn inquiries" because the defendants had indicated "clearly and irrevocably an intent to look to their own devices or modifications thereof for the [next] model year." *591 F.2d at 72*. The court explained that the relevant market was unique because the integration of original equipment automobile parts required much planning and lead time. The court also noted that plaintiff's pollution control device staff had been substantially disassembled before the limitations period and concluded that the initial refusals to deal with plaintiff had been "irrevocable, immutable, permanent and final." *Id*.

---

[3] Conn also contends that in 1980 two of the defendant tour operators demanded rebates from Conn and that certain of his employees did authorize such payments for a limited period of time. The evidence on this issue, however, consists only of Conn's answers to the defendants' interrogatories; these answers were verified by Mr. Conn, but only on information and belief. The court cannot consider this evidence because it does not meet the requirements of *rule 56(e) of the Federal Rules of Civil Procedure*. *S & S Logging Co. v. Barker, 366 F.2d 617, 624 n.7 (9th Cir. 1966)*.

The facts at bar are very different from those present in *Air Pollution*. Most significantly, the alleged concerted refusal to deal with Conn could only be maintained through affirmative conduct by the defendants. The defendant gift, 739 shop operators continued to pay the secret rebates and the defendant tour operators had to channel or steer each new group of tourists away from Conn and toward the defendant gift shops. **[**11]** Indeed, in one sense it is the individual tourist who decides whether to deal with Conn, and the defendant tour operators had to exert influence on each new tourist arriving in San Francisco. Moreover, as discussed above, the JTOA may have been used as a vehicle for keeping the conspiracy together; any such actions within the limitations period would be additional "overt acts;" such acts would necessarily indicate that the *concerted* refusal to deal was not "irrevocable, immutable, permanent and final." *Air Pollution, 591 F.2d at 72*.

These facts also distinguish the instant case from *David Orgell, Inc. v. Geary's Stores, Inc., 640 F.2d 936* (9th Cir.), *cert. denied*, *454 U.S. 816, 102 S. Ct. 92, 70 L. Ed. 2d 84 (1981)*, in which the defendants refused to sell goods to the plaintiff both within and without the limitations period. The court found that the plaintiff's later offers were "forlorn inquiries" and held that the suit was barred under *Air Pollution. Orgell*, 640 F.2d at 638. However, the refusal, within the limitations period, of plaintiff Orgell's two offers to buy the defendants' wares cannot compare in scope, frequency, or effort exerted with the affirmative **[**12]** conduct of the defendants in this case. [4]

[13]** Our conclusion is reinforced by an analysis of the purposes of the statute of limitations in antitrust cases. Those purposes are "to put old liabilities to rest and to **[*353]** relieve courts and parties from 'stale' claims where the best evidence may no longer be available. P. Areeda and D. Turner, ***Antitrust Law*** para. 325 at 119 (1978). The defendants are not exposed to liability for acts committed before February 9, 1978; the repose purpose of the statute of limitations applies with full force to these acts. However, no useful purpose is served by immunizing the defendants' *continued* affirmative acts that allegedly injure Conn unlawfully. ***HN4***[] "Employing the limitations statute to immunize recent repetition or continuation of violations and damages occasioned thereby not only extends the statute beyond its purpose, but also conflicts with the policies of vigorous enforcement of private rights through private actions." *Poster Exchange, 517 F.2d at 127-28*. In addition, the bulk of the evidence relevant to defendants' more recent acts will also be of a recent vintage.

III. Conclusion

For the foregoing reasons, the court concludes that the statute of limitations embodied **[**14]** in *15 U.S.C. section 15b* bars any antitrust claim for damages caused by acts committed before February 9, 1978; the statute of limitations does not, however, bar Conn's antitrust claims for damages caused by acts committed after February 9, 1978. [5]

---

[4] The short and cryptic opinion in the *Orgell* case can conceivably be read to hold that a concerted refusal to deal is *always* final from its inception. The *Orgell* court did not explain why the later offers were "forlorn inquiries by one all of whose reasonable hopes had been previously dashed;" this contrasts sharply with the approach of the *Air Pollution* court, which justified its conclusion by reference to the characteristics of the automobile original equipment supply market. Moreover, the *Poster Exchange* case, upon which *Air Pollution* was based, clearly rejected the argument that a concerted refusal to deal is *always* final from its inception. Indeed, the *Poster Exchange* court explicitly assumed that any new refusal to deal *ordinarily* would constitute a new overt act giving rise to a new cause of action. *517 F.2d at 128-29*. For this reason, the *Air Pollution* court found it necessary to explain why the new refusal to deal in that case merely responded to a "forlorn inquiry" and did not give rise to a new cause of action. This court therefore declines to adopt the interpretation of *Orgell* suggested above. Without a clear statement from the Ninth Circuit, we will not adopt such a rigid rule, which goes well beyond *Air Pollution* and *Poster Exchange*, and which conflicts with the basic premise that "each time a plaintiff is injured by an act of the defendants a cause of action accrues to him to recover the damages caused by that act. . . ." *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 28 L. Ed. 2d 77, 91 S. Ct. 795 (1971)*.

[5] The applicable limitations period for Conn's ***HN5***[] state law antitrust claims is also four years. *Cal. Bus. & Prof. Code §§ 16750.1* & *16755*. ***HN6***[] A three year statute of limitations governs Conn's claims under the California Unfair Practices Act. *Cal. Bus. & Prof. Code §§ 17000*-101. *See* *Cal. Civ. Proc. Code § 338(1)*. Conn's ***HN7***[] state common law claims are governed by a two year statute of limitations. *Cal. Civ. Proc. Code § 339(1)*. The parties have not addressed, and the court does

[15]** It Is So Ordered.

---

not decide, whether the continuing violation rationale of *Zenith, Poster Exchange*, and *Air Pollution* applies to Conn's state law claims.

Mergers & Acquisitions Law > Antitrust > General Overview

HN6[] **Antitrust Statutes, Clayton Act**

The core question in a case under the Clayton Act, *15 U.S.C.S. § 18*, is whether a merger may substantially lessen competition.

Antitrust & Trade Law > Clayton Act > General Overview

Mergers & Acquisitions Law > Merger Guidelines

HN7[] **Antitrust & Trade Law, Clayton Act**

It is well established that a violation of the Clayton Act, *15 U.S.C.S. § 18*, is proven upon a showing of reasonable probability of anticompetitive effect.

Evidence > ... > Government Privileges > Official Information Privilege > Deliberative Process Privilege

Evidence > Privileges > Government Privileges > General Overview

Evidence > ... > Government Privileges > Official Information Privilege > General Overview

HN8[] **Official Information Privilege, Deliberative Process Privilege**

The deliberative process privilege permits the government to withhold documents that reflect advisory opinions, recommendations and deliberations comprising part of a process by which government decisions and policies are formulated.

Evidence > ... > Government Privileges > Official Information Privilege > Deliberative Process Privilege

Evidence > Privileges > Government Privileges > General Overview

Evidence > ... > Government Privileges > Official Information Privilege > General Overview

HN9[] **Official Information Privilege, Deliberative Process Privilege**

A document must meet two requirements for the deliberative process privilege to apply. First, the document must be pre-decisional -- it must have been generated before the adoption of an agency's policy or decision. Second, the document must be deliberative in nature, containing opinions, recommendations, or advice about agency policies.

Evidence > Privileges > Government Privileges > General Overview

HN10[] **Privileges, Government Privileges**

Purely factual material that does not reflect deliberative processes is not protected.

Evidence > ... > Government Privileges > Official Information Privilege > Deliberative Process Privilege

Evidence > Privileges > Government Privileges > General Overview

Evidence > ... > Government Privileges > Official Information Privilege > General Overview

HN11[] **Official Information Privilege, Deliberative Process Privilege**

The deliberative process privilege is a qualified one. A litigant may obtain deliberative materials if his or her need for the materials and the need for accurate fact-finding override the government's interest in non-disclosure.

Evidence > Privileges > Government Privileges > General Overview

HN12[] **Privileges, Government Privileges**

Among the factors to be considered in making the determination of whether a litigant may obtain deliberative materials are 1) the relevance of the evidence; 2) the availability of other evidence; 3) the government's role in the litigation; and 4) the extent to which disclosure would hinder frank and independent discussion regarding contemplated policies and decisions.

Antitrust & Trade Law > Federal Trade Commission Act > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN13[] **Antitrust & Trade Law, Federal Trade Commission Act**

The Federal Trade Commission (FTC) meets its burden of proving the likelihood of success if it raises questions going to the merits so serious, substantial, difficult and doubtful as to make them fair ground for thorough investigation, study, deliberation and determination by the FTC in the first instance and ultimately by the Court of Appeals.

Opinion by: PER CURIAM

Opinion

[*1159] The Federal Trade Commission appeals from the district court order denying the Commission's application for a preliminary injunction to block a proposed joint venture involving Warner Communications Inc. and Polygram Records, Inc. We reverse.

FACTS

Warner Communications Inc. is a diversified communications company that operates three record labels (Warner, Atlantic and Elektra/Asylum) and distributes prerecorded music in the United States and abroad. In 1983, Warner was the second largest distributor **[**2]** of prerecorded music in the United States. Polygram Records, Inc., owned by N. V. Philips and Siemens AG, operates classical and popular record labels and distributes prerecorded music here and abroad. In 1983, Polygram was the sixth largest distributor of prerecorded music in the United States. Warner and Polygram plan to merge part of their record operations and form a joint venture company. Under the terms of the proposed joint venture, Polygram would close its distribution operations in the United States and the joint venture company would distribute Polygram's records.

The Federal Trade Commission brought an action seeking a preliminary injunction under section 13(b) of the Federal Trade Commission Act, *15 U.S.C. § 53(b)*, to block the proposed merger until the completion of administrative proceedings. The Commission alleged that the proposed joint venture would violate section 7 of the Clayton Act (*15 U.S.C. § 18*) and section 5 of the Federal Trade Commission Act (*15 U.S.C. § 45*).

During discovery, the defendants requested that the Commission produce two memoranda prepared by members of the Commission's **[**3]** Bureau of Economics. The memoranda, prepared before the Commission filed the action for preliminary relief, recommended that the Commission not challenge the merger. The district court ordered the Commission to produce the memoranda.

On April 10, 1984, the district court denied the Commission's motion for a preliminary injunction. On April 12, 1984, the Commission filed an Emergency Motion for Injunction Pending Appeal, which we granted.

We now reverse the district court decision because the district court applied an incorrect legal standard and improperly relied on the Bureau of Economics memoranda. Applying the correct legal standard, we hold that preliminary injunctive relief is warranted.

DISCUSSION

Section 13(b) of the Federal Trade Commission Act provides that ***HN1***[] "upon a proper showing that, weighing the equities and considering the Commission's likelihood of ultimate success, such action would be in the public interest . . . a preliminary injunction may be granted. . . ." *15 U.S.C. § 53(b)*. **[**4]** Section 13(b) ***HN2***[] places a lighter burden on the Commission than that imposed on private litigants by the traditional equity standard; the Commission need not show irreparable harm to obtain a preliminary injunction. *See* Conference Report **[*1160]** No. 924, 93d Cong., 1st Sess. 11, *reprinted in* 1973 U.S. Code Cong. & Admin. News 2533; *Federal Trade Commission v. Weyerhaeuser Co., 214 U.S. App. D.C. 254, 665 F.2d 1072, 1082 (D.C. Cir. 1981)*.

HN3[] In determining whether to grant a preliminary injunction under section 13(b), a court must 1) determine the likelihood that the Commission will ultimately succeed on the merits and 2) balance the equities. *Federal Trade Commission v. Simeon Management Corp., 532 F.2d 708, 713-14 (9th Cir. 1976)*. **HN4**[] The denial of a motion for preliminary injunction will be reversed only if the district court abused its discretion or based its decision on an erroneous legal premise. *American Motorcyclist Association v. Watt, 714 F.2d 962, 965 (9th Cir. 1983)*; **[**5]** *Simeon Management Corp., 532 F.2d at 711*.

I. THE DISTRICT COURT DECISION

A. Correct Legal Standard Under Section 7

The Commission argues that the district court order denying preliminary injunctive relief should be reversed because the court applied an incorrect legal standard. In its order, the district court said that the recorded music market does not operate in a manner conducive to "collusion," that "collusion" was unlikely at the record label level and that "collusion" regarding prices, critical non-price elements and new releases was impossible. The court mentioned "collusion" in seven of its 18 conclusions of law.

"Collusion" is "[a] secret combination, conspiracy, or concert of action between two or more persons for fraudulent or deceitful purpose." Black's Law Dictionary 240 (5th Ed. 1979). It implies the existence of fraud, the employment of fraudulent means, or the employment of lawful means to accomplish an unlawful purpose. *Id.*

It appears that the district court was applying *section 1* of the Sherman Act when it required a showing of collusion. *Section 1* prohibits every unreasonable "contract, combination . . . or conspiracy, **[**6]** in restraint of trade or commerce." *15 U.S.C. § 1*. It is unlawful, for example, for businesses that compete in the same market to collude by entering into agreements which divide up the market. *See* *Aydin Corp. v. Loral Corp., 718 F.2d 897, 899-900 (9th Cir. 1983)*; *Krehl v. Baskin-Robbins Ice Cream Co., 664 F.2d 1348, 1354 (9th Cir. 1982)*.

Section 7 of the Clayton Act **HN5**[] requires far less than a showing of collusion. Section 7 prohibits mergers whose effect "*may be* substantially to lessen competition, or to tend to create a monopoly." *15 U.S.C. § 18* (emphasis added). It was intended to arrest the anticipated anticompetitive effects of acquisitions and other intercorporate transactions in their incipiency. *See* *United States v. E.I. du Pont de Nemours & Co., 353 U.S. 586, 589, 597, 1 L. Ed. 2d 1057, 77 S. Ct. 872 (1957)*; *Ash Grove Cement Co. v. Federal Trade Commission, 577 F.2d 1368, 1378* (9th Cir.), *cert. denied*, *439 U.S. 982, 58 L. Ed. 2d 653, 99 S. Ct. 571 (1978)*; **[**7]** *United States v. Coca-Cola Bottling Co., 575 F.2d 222, 23*l (9th Cir.), *cert. denied*, *439 U.S. 959, 58 L. Ed. 2d 351, 99 S. Ct. 362 (1978)*. **HN6**[] The "core question [in a Section 7 case] is whether a merger may substantially lessen competition. . . ." *Federal Trade Commission v. Procter & Gamble Co., 386 U.S. 568, 577, 87 S. Ct. 1224, 18 L. Ed. 2d 303 (1967)*. **HN7**[] It is well established that a section 7 violation is proven upon a showing of reasonable probability of anticompetitive effect. *See, e.g.,* *Lektro-Vend Corp. v. Vendo Co., 660 F.2d 255, 274 (7th Cir. 1981)*, *cert. denied*, *455 U.S. 921, 71 L. Ed. 2d 461, 102 S. Ct. 1277 (1982)*.

Since Section 7 requires only a showing of reasonable probability of anticompetitive effect and the district court required a showing of collusion, we conclude that the court applied an incorrect legal standard.

B. Bureau of Economics Memoranda

The Commission argues that the district **[**8]** court erred also in ordering production **[*1161]** of and in relying on the two memoranda prepared by members of the Bureau of Economics. The Commission contends that the memoranda were protected from disclosure under the government's "deliberative process privilege." **HN8**[] This privilege permits the government to withhold documents that reflect advisory opinions, recommendations and deliberations comprising part of a process by which government decisions and policies are formulated. *NLRB v. Sears, Roebuck & Co., 421 U.S. 132, 150, 44 L. Ed. 2d 29, 95 S. Ct. 1504 (1975)*. It was developed to promote frank and independent discussion among those responsible for making governmental decisions, *Environmental Protection Agency v. Mink, 410 U.S. 73, 87, 35 L. Ed. 2d 119, 93 S. Ct. 827 (1973)*, and also to protect against premature disclosure of proposed agency policies or decisions. *Coastal States* *Gas Corp. v. Department of*

Energy, 199 U.S. App. D.C. 272, 617 F.2d 854, 866 (D.C. Cir. 1980). The ultimate purpose of the privilege is to protect the **[**9]** quality of agency decisions. *Sears, 421 U.S. at 151*.

HN9[] A document must meet two requirements for the deliberative process privilege to apply. First, the document must be predecisional -- it must have been generated before the adoption of an agency's policy or decision. *Coastal States*, 617 F.2d at 866. The Bureau of Economics memoranda satisfy this requirement. The authors investigated the proposed joint venture and drafted the memoranda before the Commission made the decision to challenge the venture. *See White v. IRS, 707 F.2d 897, 902 (6th Cir. 1983)*. Second, the document must be deliberative in nature, containing opinions, recommendations, or advice about agency policies. *Coastal States*, 617 F.2d at 866. ***HN10***[] Purely factual material that does not reflect deliberative processes is not protected. *Mink, 410 U.S. at 87-89*. The Bureau of Economics memoranda contain analyses of the record industry and the merger's **[**10]** potential effects on competition, and recommendations on whether the Commission should challenge the venture. Analyses and recommendations play a critical role in the Commission's decision whether or not to challenge a merger. The memoranda go to the heart of the deliberative and policy-making processes. Moreover, the factual material in the memoranda is so interwoven with the deliberative material that it is not severable. *See Binion v. Department of Justice, 695 F.2d 1189, 1193 (9th Cir. 1983)*. The deliberative process privilege applies to the two memoranda.

HN11[] The deliberative process privilege is a qualified one. A litigant may obtain deliberative materials if his or her need for the materials and the need for accurate fact-finding override the government's interest in non-disclosure. *See United States v. Leggett & Platt, Inc., 542 F.2d 655, 658 (6th Cir. 1976)*, *cert. denied*, *430 U.S. 945, 51 L. Ed. 2d 792, 97 S. Ct. 1579 (1977)*; **[**11]** *United States v. American Telephone and Telegraph Co., 524 F. Supp. 1381, 1386 n.14 (D.D.C. 1981)*. ***HN12***[] Among the factors to be considered in making this determination are: 1) the relevance of the evidence; 2) the availability of other evidence; 3) the government's role in the litigation; and 4) the extent to which disclosure would hinder frank and independent discussion regarding contemplated policies and decisions. *See, e.g., Carl Zeiss Stiftung v. V.E.B. Carl Zeiss, Jena, 40 F.R.D. 318, 327-329 (D.D.C. 1966)*, *aff'd*, *128 U.S. App. D.C. 10, 384 F.2d 979* (D.C. Cir.), *cert. denied*, *389 U.S. 952, 19 L. Ed. 2d 361, 88 S. Ct. 334 (1967)*; *In re Franklin National Bank Securities Litigation, 478 F. Supp. 577, 583 (E.D.N.Y. 1979)*; 2 J. Weinstein & M. Berger, Weinstein's Evidence para. 509[07] at 46-47 (1982).

In the present case, the Bureau of Economics memoranda are relevant; they contain material regarding various aspects of market structure and the merger's effect on competition. However, information regarding market structure and competitive effects was available to the defendants. The defendants **[**12]** presented extensive evidence on relevant market, market structure, barriers to entry and effects on competition. Because the defendants were able to obtain and introduce evidence on **[*1162]** these issues, they had little need for the memoranda.

The parties characterize differently the government's role in this litigation. Although the memoranda take positions which conflict with the Commission's litigation position, the defendants have presented no evidence of bad faith or misconduct on the part of the Commission. The fact that the Commission has in the past disclosed reports supporting its litigation position does not show bad faith in this case, nor does the fact that, prior to its decision to sue, the Commission disclosed the conclusions reached in one of the memoranda. Only the conclusions were disclosed; the analysis was kept secret.

Finally, compelled disclosure of the memoranda almost certainly injures the quality of agency decisions. It chills frank discussion and deliberation in the future among those responsible for making governmental decisions. It also encourages the Commission to have deliberative reports and recommendations prepared only by those economists **[**13]** who will draw the conclusions sought by the Commission.

Since the defendants were able to obtain and present evidence on the merger's effects on competition, there was no bad faith or misconduct on the part of the Commission, and compelled disclosure would likely hinder effective agency decision making, we conclude that the district court abused its discretion in ordering the production of the memoranda.

The record reflects that the district court relied on the memoranda and that this improper reliance materially affected its decision to deny injunctive relief. In its order, the court said that the affidavits, declarations, other exhibits "and, in particular," the two Bureau of Economics memoranda established that the Commission was unlikely to succeed on the merits of the claim. The error was not harmless.

II. WHETHER TO GRANT PRELIMINARY RELIEF

The decision whether to grant preliminary relief turns on a determination of the likelihood of the Commission's success on the merits and on a balance of the equities. *Simeon Management Corp., 532 F.2d at 714*. We do not accord the usual deference to the district court's findings regarding relevant market, market **[**14]** concentration and barriers to entry because these findings were improperly based on the Bureau of Economics memoranda.

A. Likelihood of Success

The issue is whether the Commission has demonstrated a likelihood of ultimate success. ***HN13***[] The Commission meets its burden if it "raise[s] questions going to the merits so serious, substantial, difficult and doubtful as to make them fair ground for thorough investigation, study, deliberation and determination by the FTC in the first instance and ultimately by the Court of Appeals." *Federal Trade Commission v. National Tea Co., 603 F.2d 694, 698 (8th Cir. 1979)*; *Federal Trade Commission v. Beatrice Foods Co., 190 U.S. App. D.C. 328, 587 F.2d 1225, 1229 (D.C. Cir. 1978)* (statement of Judges MacKinnon and Robb); *Federal Trade Commission v. Rhinechem Corp., 459 F. Supp. 785, 789 (N.D. Ill. 1978)*; *Federal Trade Commission v. Lancaster Colony Corp., 434 F. Supp. 1088, 1091 (S.D.N.Y. 1977)*; *but see* *Federal Trade Commission v. Atlantic Richfield Co., 549 F.2d 289, 291 (4th Cir. 1977)* **[**15]** (court imposes more rigorous burden).

The parties have presented conflicting evidence on the relevant product market, market concentration, market shares, barriers to entry and the merger's probable effect on competition. ***HN14***[] Our present task is not to make a final determination on whether the proposed merger violates Section 7, but rather to make only a preliminary assessment of the merger's impact on competition. *See* *Federal Trade Commission v. Food Town Stores Inc., 539 F.2d 1339, 1344 (4th Cir. 1976)*. ***HN15***[] Factors to consider when determining the impact on competition include the market shares of the merging firms, industry trends towards concentration, the degree of concentration **[*1163]** within the industry, prior mergers by the firms in question and the barriers to entry in the industry. *Marathon Oil Co. v. Mobil Corp., 530 F. Supp. 315, 325* (N.D. Ohio), *aff'd*, *669 F.2d 378 (6th Cir. 1981)*, *adhered to*, *669 F.2d 384* (6th **[**16]** Cir.), *cert. denied*, *455 U.S. 982, 71 L. Ed. 2d 691, 102 S. Ct. 1490 (1982)*. This list of factors is not exhaustive.

HN16[] The relevant product market is determined by examining the reasonable interchangeability of use between the product and substitutes for it. *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*. ***HN17***[] The boundaries of the market may be determined by considering such factors as industry or public recognition of the market, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors. *Id.;* *Equifax, Inc. v. Federal Trade Commission, 618 F.2d 63, 66 (9th Cir. 1980)*.

The Commission argues that the relevant market is prerecorded music, which includes all recorded sound performances sold to consumers in the form of singles, long playing albums, cassettes, tapes, eight track cartridges and **[**17]** compact disks. The defendants contend that the relevant market is recorded music, which includes "home tapes" of prerecorded music. The determination of relevant market is critical because the respective markets have significantly different structures.

The Commission offered record company documents and affidavits from company officials that indicate that the record industry recognizes prerecorded music as a market separate from the recorded music market. Although there is no direct evidence that consumers regard the prerecorded music market as a separate market, prerecorded music has distinct characteristics. Prerecorded music, unlike home tapes, is a ready-to-play product, sold in an attractive package which often includes artwork and liner notes. These characteristics suggest that prerecorded music and home tapes are not interchangeable. Also, there is a price difference of approximately 300 percent between home tapes and prerecorded music, and the Commission presented evidence that an increase in the price of prerecorded music would not cause a massive shift to home taping.

The Commission also presented evidence that 1) the prerecorded music industry is moderately concentrated **[**18]** at the distributor level and 2) the top four record distributors command approximately 67 percent of the domestic market. Warner, the company with the second highest share, distributes 18.9 percent of the prerecorded music products and Polygram, with the sixth highest share, distributes 7.1 percent. If the proposed joint venture is completed, the market share of the combined firm would be approximately 26 percent and the market share of the top four firms would be approximately 75 percent. [1]

The parties agree that there has been a trend toward increased concentration among record distributors. The record reflects that many companies have recently **[**19]** terminated their distribution operations. Many other record companies have attempted to enter the distribution market but have failed.

The Commission presented evidence showing the difficulty of entering the distribution market due to high capital costs, lack of expertise, inability to attract top performers, disadvantages in obtaining radio air play and point of sale promotion, and inability to demand and receive payment from retailers on an equal basis with established distributors. Moreover, the Commission presented evidence that sub-distributors and video distributors could not become national prerecorded music distributors because of the special expertise and facilities required. Finally, affidavits **[*1164]** from record company executives suggest that at least $125,000,000 in sales at wholesale is required to maintain a national record distribution operation. There is an insufficient supply of independently produced prerecorded music to allow a new entrant to obtain and sustain this volume.

The Commission has made a tenable showing that the relevant market is prerecorded music, that this market is moderately concentrated, that there is a trend toward increased concentration, **[**20]** that the proposed joint venture would accelerate this trend and that there are substantial barriers to entry. The government has met its burden of demonstrating a likelihood of success by presenting evidence sufficient to raise "serious, substantial, difficult" questions regarding the anticompetitive effects of the proposed joint venture. *See* *National Tea, 603 F.2d at 698*; *Rhinechem Corp., 459 F. Supp. at 789*; *Lancaster Colony Corp., 434 F. Supp. at 1091*.

In so holding, we do not ignore the evidence presented by the defendants which conflicts with the Commission's evidence. Because the issue in this action for preliminary relief is a narrow one, we do not resolve the conflicts in the evidence, compare concentration ratios and effects on competition in other cases, or undertake an extensive analysis of the antitrust issues. *See* *Lancaster Colony Corp., 434 F. Supp. at 1094, 1096*. We hold only that the Commission has met its burden of showing a likelihood of success on the merits.

The defendants attempt to justify the proposed merger by arguing that the merger would not be the cause for the reduction in the **[**21]** number of distributors and any resulting anticompetitive effects, because Polygram intends to leave the distribution market due to economic necessity. (The parties agree that Polygram is not asserting a "failing company" defense.) *See* *International Shoe Co. v. Federal Trade Commission, 280 U.S. 291, 302, 74 L. Ed. 431, 50 S. Ct. 89 (1930)*; *Brown Shoe, 370 U.S. at 346*.) We reject the argument. In *United States v. Phillips Petroleum Co., 367 F. Supp. 1226 (C.D. Cal. 1973)*, *aff'd mem.*, *418 U.S. 906, 94 S. Ct. 3199, 41 L. Ed. 2d 1154 (1974)*, the court rejected a similar argument that an acquisition would not violate section 7 where the acquired company intended to go out of business. It said:

> Section 7 ***HN18***[] is concerned only with the effect upon competition of an acquisition, and the statutory language was carefully drafted to refer only to an acquisition's effect. If the acquisition has a substantial anticompetitive effect, it is illegal under § 7. . . . The issue in an antitrust case is not a determination of **[**22]** the reasons for selling, but only the anticompetitive effect of the sale.

[1] We recognize that statistics concerning market share and concentration are not conclusive indicators of anticompetitive effects, but they provide a meaningful context within which to address the question of the merger's competitive effects. *See* *United States v. General Dynamics Corp., 415 U.S. 486, 498, 39 L. Ed. 2d 530, 94 S. Ct. 1186 (1974)*.

Id. at 1258-59.

The defendants cite several cases in which courts have upheld mergers and affirmed the denial of preliminary injunctions where a financially troubled company or a weak competitor has been acquired by a strong competitor. *See, e.g., Lektro-Vend Corp. v. Vendo Co., 660 F.2d 255 (7th Cir. 1981)*, *cert. denied*, *455 U.S. 921, 71 L. Ed. 2d 461, 102 S. Ct. 1277 (1982)*; *Federal Trade Commission v. National Tea Co., 603 F.2d 694 (8th Cir. 1979)*; *United States v. International Harvester Co., 564 F.2d 769 (7th Cir. 1977)*. Such decisions have been criticized by courts and commentators. *See, e.g., Kaiser Aluminum & Chemical Corp. v. Federal Trade Commission, 652 F.2d 1324, 1338-40 (7th Cir. 1981)*; 4 P. Areeda & D. Turner, ***Antitrust Law*** para. 935 b, c (1980). In *Kaiser, supra*, the court said that "financial weakness, while perhaps relevant in some cases, is probably the weakest ground of all for justifying a merger." *652 F.2d at 1339*. The acquisition of **[**23]** a financially weak company hands over the company's customers to the acquiring company, thereby deterring competition by preventing others from securing those customers. *Id.* Also, a "weak company" defense would expand the failing company doctrine, a defense which has strict limits. *Id.*

Phillips Petroleum and *Kaiser* provide persuasive reasons for rejecting or attaching little weight to a defense of financial **[*1165]** plight as a ground for justifying a merger. However, we need not resolve the question of how much weight, if any, should be given to the weak financial condition of a company in a section 7 case. We hold only that a company's stated intention to leave the market or its financial weakness does not in itself justify a merger.

B. Balance of Equities

The second step in deciding whether to grant a preliminary injunction is to balance the equities. *Simeon Management Corp., 532 F.2d at 714*. Although ***HN19***[] private equities may be considered, public equities receive far greater weight. *Federal Trade Commission v. Weyerhaeuser Co., 214 U.S. App. D.C. 254, 665 F.2d 1072, 1083 (D.C. Cir. 1981)*; **[**24]** *Federal Trade Commission v. National Tea Co., 603 F.2d 694, 697 & n.4 (8th Cir. 1979)*; *but see Federal Trade Commission v. Food Town Stores, Inc., 539 F.2d 1339, 1344, 1346 (4th Cir. 1976)* (private equities not to be considered). ***HN20***[] When the Commission demonstrates a likelihood of ultimate success, a countershowing of private equities alone does not justify denial of a preliminary injunction. *Weyerhaeuser, 665 F.2d at 1083*.

HN21[] Public equities may include "beneficial economic effects and pro-competitive advantages for consumers." *Federal Trade Commission v. Pharmtech Research, Inc., 576 F. Supp. 294, 299 (D.D.C. 1983)*. In the present case, because the record contains conflicting evidence on the anticompetitive effects of the merger, it is unclear whether these equities support the grant or denial of injunctive relief.

A different public equity, however, supports the grant of injunctive relief. **[**25]** ***HN22***[] A denial of a preliminary injunction would preclude effective relief if the Commission ultimately prevails and divestiture is ordered. *See Federal Trade Commission v. Great Lakes Chemical Corp., 528 F. Supp. 84, 87 (N.D. Ill. 1981)*. Since the proposed joint venture calls for Polygram to dismantle its distribution operations, it would be exceedingly difficult for Polygram to revive the operations to comply with a divestiture order. The defendants argue that effective relief would still be possible because the Commission could compel Polygram to make alternate distribution arrangements upon withdrawing from the joint venture. In light of the high concentration in the distribution market, however, it may not be possible to make an arrangement which is permissible under section 7.

With respect to private equities, the defendants argue that a preliminary injunction would force them to abandon the joint venture. The defendants would not be able to operate effectively due to the uncertainties resulting from the pendency of the proposed transaction. Polygram asserts that its efforts to sign artists have been hindered **[**26]** and that many employees have left the company because of the uncertainty. The defendants also argue that there are private equities in allowing Polygram to escape its troubled financial condition by merging with Warner, *see*

United States v. G. Heileman Brewing Co., 345 F. Supp. 117, 122-24 (E.D. Mich. 1972), and in allowing Polygram's shareholders to reap the benefits of the merger. *See* *Great Lakes Chemical, 528 F. Supp. at 98*.

Although these asserted private injuries are entitled to serious consideration, private equities alone do not outweigh the Commission's showing of likelihood of success. *Weyerhaeuser, 665 F.2d at 1082-83*. Since the Commission has demonstrated a likelihood of success and the public equities do not support the denial of injunctive relief, a preliminary injunction is warranted.

CONCLUSION

We reverse the district court's denial of the Commission's application for a preliminary injunction. The preliminary injunction shall remain in effect until the completion of the administrative proceedings. Because undue delay could force the parties to abandon the proposed merger, the Commission is ordered to expedite **[**27]** proceedings. We shall retain jurisdiction to ensure compliance with this order.

IT IS SO ORDERED.

Civil Procedure > Trials > Judgment as Matter of Law > Judgment Notwithstanding Verdict

Civil Procedure > ... > Standards of Review > Substantial Evidence > General Overview

HN1[] **Reviewability of Lower Court Decisions, Adverse Determinations**

The appellate court's standard for determining the propriety of granting j.n.o.v. is the same as that used by the trial court. The appellate court must affirm the trial court if, without accounting for the credibility of the witnesses, the court finds that the evidence and its inferences, considered as a whole and viewed in a light most favorable to the nonmoving party, could support only one reasonable conclusion -- that the moving party is entitled to judgment notwithstanding the adverse verdict. Neither the trial court nor the appellate court is free to weigh the evidence or reach a result that it finds more reasonable as long as the jury's verdict is supported by substantial evidence.

Civil Procedure > ... > Standards of Review > Substantial Evidence > General Overview

HN2[] **Standards of Review, Substantial Evidence**

Substantial evidence is more than a scintilla; it is such relevant evidence that a reasonable mind might accept as adequate to support a conclusion.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN3[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A tying arrangement occurs when a seller refuses to sell one product (the tying product) unless the buyer also purchases another (the tied product).

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN4[] **Tying Arrangements, Per Se Rule**

Three primary elements establish a per se illegal tying arrangement: (1) a tie-in between two distinct products or services; (2) sufficient economic power in the tying product market to impose significant restrictions in the tied product market; and (3) an effect on a not insubstantial volume of commerce in the tied product market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN5[] **Price Fixing & Restraints of Trade, Tying Arrangements**

There are two other independent, but related, elements of a tying arrangement. First, the seller of the tying product must have an economic interest in the sale of the tied product. Second, there must be a showing that the seller of the tying product coerced to some extent the purchaser into buying the tied product. Coercion occurs when the buyer must accept the tied item and forego possibly desirable substitutes. It may be shown directly through evidence that the purchaser was actually coerced, or indirectly from a showing that an appreciable number of buyers have accepted burdensome terms, such as a tie-in, and there exists sufficient economic power in the tying product market.

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN11[] **Robinson-Patman Act, Claims**

A key requirement for a § 2(a) of the Robinson-Patman Act, *15 U.S.C.S. § 13*, claim is a showing that there have been at least two completed, substantially contemporaneous sales by the same seller.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Specific Intent

HN12[] **Monopolies & Monopolization, Attempts to Monopolize**

There are three interrelated elements in an attempt to monopolize claim: (1) a specific intent to control prices or destroy competition in some part of commerce; (2) predatory or anticompetitive conduct directed to accomplishing the unlawful purpose; and (3) a dangerous probability of success. Conduct is the most critical element. Specific intent alone will not support an attempted monopolization claim. Predatory or anticompetitive conduct, however, can support an inference of specific intent and dangerous probability of success.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN13[] **Actual Monopolization, Anticompetitive & Predatory Practices**

When evidence of specific intent of unfair or predatory conduct is ambiguous, the plaintiff must introduce evidence of conduct amounting to a substantial claim of restraint of trade or conduct clearly threatening to competition or clearly exclusionary. The conduct must be such that its anticipated benefits were dependent upon its tendency to discipline or eliminate competition and thereby enhance the firm's long term ability to reap the benefits of monopoly power. Such conduct is not true competition; it makes sense only because it eliminates competition. It does not enhance the quality or attractiveness of the product, reduce its cost, or alter the demand function that all competitors confront. Its purpose is to create a monopoly by means other than mere competition.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN14[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The Ninth Circuit Court of Appeals has approved cost-based methods of determining when a price is predatory. Costs are divided into fixed costs (those that do not vary with changes in output) and variable costs (which do so vary). Total cost is the sum of fixed and variable costs. Marginal cost is the increment to total cost that results from producing an additional unit of output. Average cost, or average total cost, is obtained by dividing total cost by output. Likewise, average variable cost is the sum of all variable costs divided by output. Average cost is thus higher than average variable cost for all output levels.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN15[] **Actual Monopolization, Anticompetitive & Predatory Practices**

If the plaintiff proves the prices charged by the defendant were below marginal cost or average variable cost, a prima facie case is made and the burden shifts to the defendant to show that the prices were justified without regard to any anticipated destructive effect they might have on competitors. If the price is above average variable cost, but below average total cost, the burden remains on the plaintiff to otherwise show the predatory nature of the pricing. This can be done if the evidence shows that the defendant sacrificed greater profits or incurred greater losses than necessary in order to eliminate the plaintiff. Last, above average total cost pricing will sustain a monopolization claim only if the plaintiff offers clear and convincing evidence that the defendant's pricing policy was predatory.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN16[] **Monopolies & Monopolization, Attempts to Monopolize**

If market conditions are such that a course of conduct described by the plaintiff would be unlikely to succeed in monopolizing the market, it is less likely that the defendant actually attempted to monopolize the market.

Opinion

[*1186] J. BLAINE ANDERSON, Circuit Judge:

Airweld, Inc., a distributor of industrial gases, brought an action against Airco, Inc., a manufacturer of industrial gases, alleging a variety of antitrust violations including price discrimination, attempted monopolization, and tying arrangements. After a jury trial, the district court granted Airco's motion for judgment notwithstanding the verdict (j.n.o.v.). *576 F. Supp. 676 (D. Oregon 1983)*. Airweld appeals.

I. BACKGROUND

A. *Facts*

This action involves the industrial gas market in the Portland, Oregon area. Industrial gases are often divided into two types: "atmospheric" gases, such as hydrogen, oxygen, nitrogen, helium and argon; and "fuel" gases, such as acetylene and propane. Atmospheric **[**2]** gases are extracted from the atmosphere and generally fuel gases are produced through combining various elements or compounds. Industrial gases are generally sold in two forms. They are compressed into cylinders for resale by distributors and they are also sold in bulk, sometimes in liquid form, to larger industrial buyers.

In 1968, Stanton Richardson, who had been employed by Airco for 23 years, purchased **[*1187]** Industrial Specialties Co. (ISCO), an industrial gas and welding products distributor in Portland, Oregon. ISCO, now known as Airweld, Inc., had been a distributor of Airco, Inc. products since at least the early 1960's. Airco was, and apparently still is, one of the major manufacturers of industrial gas and welding products in this country. It has an acetylene plant in Portland and manufactures atmospheric gases in nearby Vancouver, Washington.

After Richardson's purchase, Airweld and Airco entered into a new distributorship agreement. The contract had a five-year term, but was terminable by either party upon one year's notice. At this time, Airweld became the sole distributor of Airco products in Portland and Airco ceased acting as its own distributor in **[**3]** that locale.

In 1973, a new three-year agreement was executed. Soon, however, Airweld became unhappy with Airco's price increases in argon and, on or before April 1, 1975, Airweld gave notice of its intent to terminate the atmospheric gas portion of the agreement. Negotiations to reconcile the differences failed and on March 31, 1976, the entire Airweld-Airco relationship ended.

1. *Tying Claim Facts*

In 1969, Airweld began to purchase acetylene from another manufacturer. When Airco learned of this, it told Richardson, Airweld's president, that it would terminate the agreement if outside purchases of acetylene continued. Airweld then resumed buying the gas from Airco. Airweld allegedly acquiesced because it did not feel it could economically secure another source of supply for atmospheric gases at economically feasible prices.

From 1969 to 1971, Rexarc, a manufacturer of acetylene plants, encouraged Richardson to build his own plant. Richardson was interested in this prospect because Rexarc was convinced that Airweld would save substantially on the cost of acetylene. Airco indicated to Richardson, however, that Airweld could not remain a distributor if it built its **[**4]** own plant. Airweld continued purchasing its acetylene requirements from Airco until the agreement terminated in 1976.

2. *Price Discrimination Facts*

Airweld's price discrimination claim involves agreements that Airco had with the Linde Division of Union Carbide Corp. and Liquid Air, Inc., two of the other major manufacturers of industrial gases in this country. Since at least 1968, Airco and Linde had a formal agreement to "swap" atmospheric gases on a national basis. For example, Linde did not have an atmospheric gas manufacturing plant in the Portland area prior to at least 1976. Airco would supply Linde with these gases from its Vancouver, Washington facility, and Linde made its gases available to Airco at its Indiana facility. Gas was traded only as available. Imbalances in the amount respectively received were to be kept within 50 million cubic feet, and only on a short term basis. Originally, imbalances were to be remedied solely through the provision of product. This changed, and in July 1974 through April 1976, "settlement values" were to be used. The settlement value was a trade price set for the particular gas.

In 1973, a similar, although less formal, agreement **[**5]** was entered between Airco and Liquid Air in which Airco agreed to supply Liquid Air with gas from Vancouver and Liquid Air made its gases produced in Phoenix available to Airco. Imbalances over one million cubic feet were to be rectified by use of a settlement price of $.080 per cubic foot.

Linde and Liquid Air each sold the atmospheric gases they received from Airco in the swaps in bulk to industrial users as well as to distributors in cylinder form. Airweld competed with Linde and Liquid Air to some extent in the bulk user market.

3. *Attempt to Monopolize Facts*

After Airweld terminated the distribution agreement, Airco decided to establish its own distributor in the Portland area, called Airco Welding Supply (AWS). Airco invested $400,000 to $500,000 in this operation. **[*1188]** Since Airco was without any cylinder gas and hard goods customers in Portland after Richardson terminated the distribution agreement, AWS attempted to attract these customers back to using Airco products. It did this by approaching Airweld customers and offering lower prices. The evidence showed that at least some of the prices quoted by AWS were below its average total cost.

Airco also **[**6]** sought to obtain A & A Welding Supply, owned by Al Fick, as an Airco hard goods distributor for the Portland area. A & A was a relatively small distributor and it rejected Airco's proposals. Fick testified that Airco officials stated they were going to regain the market share lost when Airweld terminated the agreement. He also stated that Airco, through AWS, targeted his customers and offered them lower prices because he declined to become an Airco distributor.

Airweld also presented evidence that in the early 1970's, Airco encouraged it to distribute argon to "small bulk" customers. To service this need, Airweld invested in "stations" from which to supply the small bulk user. Airweld grew rapidly in this market and it became one of the most important facets of its business. By 1975, Airweld had begun to compete to some extent with Airco's bulk gas supplier in Portland, Airco Industrial Gases. Around that same time, Airco raised its prices on argon and this ultimately was the major reason Airweld decided to terminate the relationship. Richardson claimed that Airco was "squeezing" him out of the bulk argon business in the hope of taking over the accounts he had secured.

B. **[**7]** *Procedure*

Airweld filed this action on December 10, 1979. On August 12, 1980, the district court denied Airco's motion to dismiss the complaint based on the four-year statute of limitations, *15 U.S.C. § 15b*, ruling that the limitations period was tolled by a Federal Trade Commission proceeding against Airco instituted on May 19, 1977. Thus, the claims period was extended through May 19, 1973.

Airco's motion for summary judgment was denied on December 29, 1981, and the case proceeded to a two-week trial in February, 1982. A directed verdict by Airco at the close of plaintiff's evidence was denied. Airco elected not to present any evidence. On March 1, 1982, the jury returned special verdicts in favor of Airweld, finding that Airco had unlawfully engaged in a tying arrangement, price discrimination, and in an attempt to monopolize a portion of the industrial gas market. Judgment, with damages of $1,139,799 after trebling, was entered accordingly.

Airco then moved for judgment notwithstanding the verdict (j.n.o.v.) and/or a new trial. The j.n.o.v. was granted and the trial court also conditionally granted the new trial. Airweld appeals.

II. **[**8]** STANDARD OF REVIEW

HN1[] Our standard for determining the propriety of granting j.n.o.v. is the same as that used by the district court. [1] *See California Computer Products v. I.B.M. Corp., 613 F.2d 727, 734 (9th Cir. 1979)*.

> We must affirm the district court if, without accounting for the credibility of the witnesses, we find that the evidence and its inferences, considered as a whole and viewed in a light most favorable to the nonmoving party, can support only one reasonable conclusion -- that the moving party is entitled to judgment notwithstanding the adverse verdict. Neither the district court nor this court is free to weigh the evidence or reach a result that it finds more reasonable as long as the jury's verdict is supported by substantial evidence.

[*1189] *William Inglis & Sons Baking Co. v. ITT Continental Baking Co., 668 F.2d 1014, 1026 (9th Cir. 1981)*, (citations omitted), *cert. denied*, *459 U.S. 825, 103 S. Ct. 57, 74 L. Ed. 2d 61 (1982)*. **[**9]** ***HN2***[] Substantial evidence is more than a scintilla; it is such relevant evidence that a reasonable mind might accept as adequate to support a conclusion. *Janich Bros., Inc. v. American Distilling Co., 570 F.2d 848, 853 n.2 (9th Cir. 1977)*, *cert. denied*, *439 U.S. 829, 58 L. Ed. 2d 122, 99 S. Ct. 103 (1978)*.

III. THE TYING ARRANGEMENT [2]

[10]** ***HN3***[] A tying arrangement occurs when "a seller refuses to sell one product (the tying product) unless the buyer also purchases another (the tied product)." *Roberts v. Elaine Powers Figure Salons, Inc., 708 F.2d 1476, 1478-1479 (9th Cir. 1983)*. ***HN4***[] Three primary elements establish a per se illegal tying arrangement:

> (1) a tie-in between two distinct products or services; (2) sufficient economic power in the tying product market to impose significant restrictions in the tied product market; and (3) an effect on a not insubstantial volume of commerce in the tied product market.

---

[1] The granting of a motion for new trial is subject to a less stringent standard. The trial court may order a new trial if it believes the jury's verdict is clearly against the weight of the evidence and we may reverse that decision only if we find it to be an abuse of discretion. *Janich Bros., Inc. v. American Distilling Co., 570 F.2d 848, 1027 (9th Cir. 1977)*, *cert. denied*, ***439 U.S. 829, 58 L. Ed. 2d 122, 99 S. Ct. 103 (1978)***.

[2] Airweld claimed that the tying arrangement violated both *section 1* of the Sherman Act, *15 U.S.C. § 1*, and *section 3* of the Clayton Act, *15 U.S.C. § 14*. This court has stated that the elements for establishing a violation under each provision are virtually the same. *Moore v. Jas. H. Matthews & Co., 550 F.2d 1207, 1214 (9th Cir. 1977)*; *see In re Data General Corp. Antitrust Litigation, 490 F. Supp. 1089, 1100 (N.D. Cal. 1980)* (the distinction has faded beyond recognition). In our analysis, therefore, we treat them alike.

Robert's Waikiki U-Drive, Inc. v. Budget Rent-A-Car Systems, Inc., 732 F.2d 1403, 1407 (9th Cir. 1984) (citing *Elaine Powers, 708 F.2d at 1479*); *see Jefferson Parish Hospital District No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 1557-1561, 80 L. Ed. 2d 2 (1984)*.

[11]** ***HN5***[] The courts have identified two other independent, but related, elements. First, the seller of the tying product must have an economic interest in the sale of the tied product. Second, there must be a showing that the seller of the tying product "coerced" to some extent the purchaser into buying the tied product. "Coercion occurs when the buyer must accept the tied item and forego possibly desirable substitutes." *Moore v. Jas. H. Matthews & Co., 550 F.2d 1207, 1217 (9th Cir. 1977)*. It may be shown directly through evidence that the purchaser was actually coerced, or indirectly "from a showing that an appreciable number of buyers have accepted burdensome terms, such as a tie-in, and there exists sufficient economic power in the tying product market." *Id.* (citation omitted).

The district court granted Airco's motion for j.n.o.v. because there was no "substantial evidence of a tie during the limitations period." *576 F. Supp. at 678*. The court reached this result despite its conclusion that Airweld offered substantial evidence of a tying arrangement during the late 1960's. What the court found lacking was evidence that during the claims period Airco **[**12]** coerced Airweld into purchasing acetylene because of its threats to discontinue supplying atmospheric gases. Not only must a defendant seek to require purchase of the tied item, it must have the power to do so. *Hyde, 104 S. Ct. at 1558*.

The gist of the district court's reasoning is that Airweld failed to prove a continuing antitrust violation. There is a four-year statute of limitations for antitrust claims. *15 U.S.C. § 15b*. This action was filed on December 10, 1979. The district court ruled prior to trial that the four-year period was tolled by a Federal Trade Commission action against Airco, which extended the limitations period to May 19, 1973. The evidence showed that Airweld's tying claim accrued prior to May, 1973; Airco attempted to dissuade Airweld in the late 1960's and the early 1970's from either securing an alternative supply of acetylene or building its own plant. The court found, however, that no overt acts designed to enforce the tie occurred during the relevant portion of the claims period.

As a general rule, a cause of action accrues when a defendant commits an act **[*1190]** that injures the plaintiff. *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 28 L. Ed. 2d 77, 91 S. Ct. 795 (1971)*; **[**13]** *In re Multidistrict Vehicle Air Pollution, 591 F.2d 68, 71* (9th Cir.), *cert. denied*, *444 U.S. 900, 100 S. Ct. 210, 62 L. Ed. 2d 136 (1979)*. Since Airweld's tying cause of action first accrued under these general principles prior to the beginning of the limitations period, it had to rely on one of two doctrines. First, and primarily, Airweld argues that the continuing violation exception to the general rule of accrual applies. Second, Airweld relies on the related rule that a cause of action does not accrue on the date of injury if damages are speculative. *Id.*

HN6[] The effect of a continuing violation is to restart the statute of limitations. In the context of a conspiracy to violate *section 1* of the Sherman Act, the cause of action will begin to run anew whenever the defendant commits an overt act in furtherance of the conspiracy. *See Zenith Radio Corp., 401 U.S. at 338*. ***HN7***[] The cause of action may also reaccrue, in the absence of a conspiracy to **[**14]** violate the antitrust laws, when the defendant commits an act which by its nature is a continuing antitrust violation. *Kaiser Aluminum, Inc. v. Avondale Shipyards, Inc., 677 F.2d 1045, 1051 (5th Cir. 1982)*, *cert. denied*, *459 U.S. 1105, 74 L. Ed. 2d 953, 103 S. Ct. 729 (1983)*. An example of this latter type of continuing violation is when a defendant actively enforces an illegal contract. *Aurora Enterprises, Inc. v. National Broadcasting Co., 688 F.2d 689, 694 (9th Cir. 1982)* (citing *Twin City Sportservice, Inc. v. Charles O. Finley & Co., 512 F.2d 1264, 1270 (9th Cir. 1975))*.

Importantly, for the cause of action to reaccrue Airweld was required to show Airco committed acts which not only caused it injury but also caused antitrust injury during the limitations period. *National Souvenir Center v. Historic Figures, Inc., 234 U.S. App. D.C. 222, 728 F.2d 503, 509 (D.C. Cir. 1984)*; *Kaiser, 677 F.2d at 1055*; *Electroglas, Inc. v. Dynatex Corp., 497 F. Supp. 97, 105 (N.D.Cal. 1980)*. In the context of a tying arrangement, competitive injury is presumed when **[**15]** the elements discussed above are shown. *See Hyde, 104 S. Ct. at 1556*.

Therefore, Airweld was required to show that Airco had the ability and actually did enforce the tie of acetylene to atmospheric gases during the claims period.

The parties agree that the contracts entered into are not illegal. The 1973 agreement involved requirements contracts for oxygen and acetylene in cylinders, and also provided for the supply of liquid argon, oxygen and nitrogen in bulk. In and of themselves, the contracts did not tie the sale of acetylene to the allegedly unique or desirable atmospheric gases. Therefore, Airweld's argument that it was injured and its cause of action accrued with each purchase of acetylene avails it nothing. ***HN8***[] Purchases under a legal contract do not constitute a "seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms." *Hyde, 104 S. Ct. at 1558*. Certainly, the parties' voluntary conduct **[**16]** pursuant to the contracts does not involve "active enforcement of an illegal contract." *Aurora Enterprises, 688 F.2d at 694*.

Airweld also argues that, based on Airco's prelimitations period discouragement of Airweld's attempt to secure another source of acetylene, the jury could have inferred that it was coerced during the claim period. Again we disagree. While the district court focused on lack of evidence of acts of coercion during the claims period, what we find most critical is Airweld's failure to offer sufficient proof of Airco's *ability* to force Airweld to purchase its acetylene during the claims period. ***HN9***[] Coercion takes place in the context of power in the tying product market, not in a vacuum. *Hyde, 104 S. Ct. at 1560-1561*; *see* *Robert's Waikiki, 732 F.2d at 1407*. The record is virtually devoid of any evidence from which the jury could have found that Airco's posture in the atmospheric gas market in Portland was such **[*1191]** that it could require Airweld to purchase its acetylene. All the record shows is Richardson's **[**17]** equivocal statements that prior to 1973 Airco was the only supplier that he felt could economically provide atmospheric gases to Airweld in Portland. In particular, he stated that in 1969, Liquid Air, one of the two other manufacturers operating in Portland, probably could not have supplied him because Liquid Air was already buying some of its own supplies from Airco. He also stated that prior to 1973, Liquid Air indicated it would not be able to supply him. Finally, he testified that after he terminated the agreements with Airco in April 1975, he had not yet checked to see if alternative manufacturers would supply him. After the termination notice, he stated that Linde and, initially, Liquid Air indicated they would not be able to supply a full line of atmospheric gases. Air Products, another manufacturer, did, however, agree to replace Airco as Airweld's argon source. Soon, Liquid Air offered a full line of industrial gas to Airweld.

This evidence does not prove that Airco had a corner on the atmospheric gas market in Portland. For the jury to have concluded that it did was mere speculation, and the trial court was obligated not to sustain its finding. In fact, the evidence **[**18]** shows the atmospheric gas market in Portland was competitive. Once Airweld cut its ties to Airco, the other suppliers became available when they learned Airweld was now a serious customer.

Even assuming that Airco threatened to terminate the distribution agreement during the claims period does not, then, show that it forced Airweld into purchasing acetylene. ***HN10***[] A unilateral refusal to deal is not violative of the antitrust laws. *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 104 S. Ct. 1464, 1469, 79 L. Ed. 2d 775 (1984)*. Airweld's evidence showed nothing more.

Airweld also argues that the speculative damage exception to the general rule of accrual applies. Assuming that Airweld offered sufficient proof of a tying arrangement imposed prior to 1973, it nonetheless is only entitled to damages for injury incurred during the claims period, May 1973 to May 1977. *Hanson v. Shell Oil Co., 541 F.2d 1352, 1361 (9th Cir. 1976)*, *cert. denied*, *429 U.S. 1074, 50 L. Ed. 2d 792, 97 S. Ct. 813 (1977)*. If, as Airweld claims, it was injured **[**19]** with each purchase of acetylene, that injury was certainly complete when all the purchases of acetylene under the first agreement were consummated. That apparently would have been no later than April 1, 1973, when the second agreement went into effect. Airweld offered no proof that purchases of acetylene under the first agreement occurred after that time. In conclusion, we affirm the district court's j.n.o.v. on this claim. [3]

---

[3] Airweld also claims that the jury's verdict in Airweld's favor on the attempt to monopolize the acetylene market claim should still stand. We disagree. Attempt to monopolize will be discussed in more detail later in another context. At this point, we need only

[20]** IV. PRICE DISCRIMINATION

The district court also granted Airco's motion for j.n.o.v. on the price discrimination claim. Airweld had alleged that Airco's swaps of industrial gases with Linde and Liquid Air violated section 2(a) of the Robinson-Patman Act, *15 U.S.C. § 13*, which prohibits discrimination "in price between different purchasers of commodities of like grade and quality." *See Foremost Pro Color, Inc. v. Eastman Kodak Co., 703 F.2d 534, 547 (9th Cir. 1983)*, *cert. denied*, *465 U.S. 1038, 104 S. Ct. 1315, 79 L. Ed. 2d 712 (1984)*. ***HN11***[] A key requirement for a Robinson-Patman section 2(a) claim is a showing that there have been at least two completed, substantially contemporaneous sales by the same seller. *Id.; see Bruce's Juices, Inc. v. American Can Co., 330 U.S. 743, 755, 91 L. Ed. 1219, 67 S. Ct. 1015 (1947)*; **[*1192]** *Rutledge v. Electric Hose & Rubber Co., 511 F.2d 668, 677 (9th Cir. 1975)*.

The district court ruled that as a matter of law the swaps were not sales. In reaching **[**21]** its decision, it relied on the only decision of which we are aware that has held that exchanges of the same product are not sales within the ambit of the Robinson-Patman Act, *American Oil Co. v. McMullin, 508 F.2d 1345, 1353 (10th Cir. 1975)*. In *McMullin*, the Tenth Circuit rejected the argument that an exchange of like types of gasoline between petroleum manufacturers constituted a sale, at least on the record before it. Nor can we, on this record, conclude that the exchange of fungible atmospheric gases by manufacturers are "sales."

Also, we agree with the district court's alternative holding that even if there were "sales," Airweld never actually proved discrimination in price. Airweld never proved when the sales actually occurred and therefore that they were contemporaneous to its purchases. Although it attempted to use the "settlement price" schedule to prove the price charged, Airweld never showed that the settlement price was ever used to settle accounts. We note further that because Airweld was not a manufacturer, it simply was in no position to swap. It could not offer Airco the same "price" as Liquid Air and Linde because it could not offer large **[**22]** quantities of gas at areas around the country where Airco did not have a manufacturing plant. It could not, therefore, offer the same consideration as Linde and Liquid Air. For these reasons, we conclude that the district court correctly granted Airco's motion for judgment notwithstanding the verdict on this claim.

V. ATTEMPT TO MONOPOLIZE

The trial court also overturned the jury's finding that Airco attempted to monopolize the cylinder gas market in Portland. Airweld argues that substantial evidence was before the jury from which it could infer that Airco attempted to monopolize the market by trying to squeeze Airweld out of the bulk argon business and by Airco Welding Supply's below cost pricing.

HN12[] There are three interrelated elements in an attempt to monopolize claim: "(1) a specific intent to control prices or destroy competition in some part of commerce; (2) predatory or anticompetitive conduct directed to accomplishing the unlawful purpose; and (3) a dangerous probability of success." *William Inglis & Sons Baking Co., 668 F.2d at 1027*.

In *Inglis* **[**23]** , the relationship of these elements was discussed in detail. *Id. at 1027-1031*. Conduct is the most critical element. Specific intent alone will not support an attempted monopolization claim. *Id. at 1028*. Predatory or anticompetitive conduct, however, can support an inference of specific intent and dangerous probability of success. *Id. at 1028-1029*.

Airweld argues that it offered adequate proof of Airco's intent to eliminate it as a competitor as discipline for the decision to terminate the distributorship agreement. In particular, Airweld points to evidence that shows Airco officials intended to "target" Airweld's accounts and to testimony that Airco officials stated Airco would get its share of the Portland marketplace back "any way it could."

---

state that Airweld's failure to prove a substantive tying violation precludes it from claiming that Airco's actions in that respect also constituted an attempt to monopolize. *See Foremost Pro Color, Inc. v. Eastman Kodak Co., 703 F.2d 534, 543 (9th Cir. 1983)*, *cert. denied*, ***465 U.S. 1038, 104 S. Ct. 1315, 79 L. Ed. 2d 712 (1984)***.

This evidence is slim proof at best of specific intent to "destroy competition." Airco's desire to regain a share of the marketplace, and in so doing reduce Airweld's share, does not show an intent to interfere with the competitive process. As noted in *Inglis*, the "intent to vanquish a rival in an honest competitive struggle cannot help to establish an antitrust violation." **[**24]** *668 F.2d at 1028* (footnote omitted).

Our focus, then, must be on the sufficiency of Airweld's proof of unfair or predatory conduct. ***HN13***[] When, as here, evidence of specific intent is ambiguous, the "plaintiff must introduce evidence of conduct amounting to a substantial claim of restraint of trade or conduct clearly threatening to competition or clearly exclusionary." *Id. at 1030* (footnote omitted).

> **[*1193]** [The conduct] must be such that its anticipated benefits were dependent upon its tendency to discipline or eliminate competition and thereby enhance the firm's long term ability to reap the benefits of monopoly power. Such conduct is not true competition; it makes sense only because it eliminates competition. It does not enhance the quality or attractiveness of the product, reduce its cost, or alter the demand function that all competitors confront. Its purpose is to create a monopoly by means other than mere competition.

Id. at 1030-1031 (footnote omitted).

Airweld presented evidence which it argued showed **[**25]** that Airco encouraged it to enter the small bulk argon market and then attempted to "squeeze" it out and take over the accounts Airweld had secured. First, we fail to see how this evidence relates to Airweld's claim that Airco attempted to monopolize the cylinder gas market. Bulk argon is not sold in cylinders. This conduct also precedes the general time frame in which Airweld claims the attempt to monopolize occurred. Second, this is not conduct that amounts to "a substantial claim of restraint of trade" or that is "clearly threatening to competition or clearly exclusionary." *Id. at 1030*. Airco's price increases in the argon it sold to Airweld were not inherently anticompetitive. Airweld was not, as it seems to assert, locked into buying argon from Airco. After a price increase, Airweld had the right to shop the market to secure a better deal. If Airco failed to meet the lower price, Airweld could purchase from a new supplier.

Airweld also attempted to prove that Airco subsidized the AWS "company" store with up to $500,000 in order to enable it to engage in predatory below-cost pricing. Simply stated, "pricing is predatory only where the firm forgoes short-term **[**26]** profits in order to develop a market position such that the firm can later raise prices and recoup lost profits." *Id. at 1031* (quoting *Janich Bros. v. American Distilling Co., 570 F.2d at 856*).

HN14[] This circuit has approved cost-based methods of determining when a price is predatory:

> Costs are divided into *fixed costs* (those that do not vary with changes in output) and *variable costs* (which do so vary). *Total cost* is the sum of fixed and variable costs. *Marginal cost* is the increment to total cost that results from producing an additional unit of output. *Average cost*, or *average total cost*, is obtained by dividing total cost by output. Likewise, *average variable cost* is the sum of all variable costs divided by output. Average cost is thus higher than average variable cost for all output levels.

Transamerica Computer Co. v. IBM Corp., 698 F.2d 1377, 1384-1385 (9th Cir.) (footnote omitted), *cert. denied*, *464 U.S. 955, 104 S. Ct. 370, 78 L. Ed. 2d 329 (1983)*; *see* **[**27]** *Inglis, 668 F.2d at 1033-1038*.

HN15[] If the plaintiff proves the prices charged by the defendant were below marginal cost or average variable cost, a prima facie case is made and the burden shifts to the defendant to show "that the prices were justified without regard to any anticipated destructive effect they might have on competitors." *Inglis, 668 F.2d at 1036*. If the price is above average variable cost, but below average total cost, the burden remains on the plaintiff to otherwise show the predatory nature of the pricing. *Id. at 1036*. This can be done if the evidence shows "that the defendant sacrificed greater profits or incurred greater losses than necessary in order to eliminate the plaintiff." *Id.; see* *Zoslaw* *v. MCA Distributing Corp., 693 F.2d 870, 888 (9th Cir. 1982)*, *cert. denied*, *460 U.S. 1085, 103 S. Ct. 1777, 76 L. Ed. 2d 349 (1983)*. Last, above average total cost pricing will sustain a monopolization claim only if the plaintiff offers "clear and convincing evidence . . . that the defendant's **[**28]** pricing policy was predatory." *Transamerica Computer Co., 698 F.2d at 1388*.

At trial, Airweld attempted to prove, through an Airco official's testimony, **[*1194]** that 47 of 50 prices offered to 17 Airweld customers were below Airco's average variable cost. On appeal, Airweld contends only that these price quotes were below *average total* cost. Airco argues that only a few of these price quotes were below average total cost.

Since below average total cost pricing does not prove Airweld's claim, Airweld was required to offer additional proof of anticompetitive conduct. *Zoslaw, 693 F.2d at 888*. In addition to its cost evidence, Airweld offered evidence to show that price competition was an unnecessary (and impliedly frowned upon) method of entering the Portland market; competition normally occurred in the area of services. The simple reason that most gas distributors in Portland engaged in only limited price competition does not mean, however, that it was an unfair means of competition for Airco to do so. If we held otherwise, it "would support the perverse rationale that a defendant may not compete by lowering its prices 'if competition **[**29]** would injure its competitors. '" *Id.* (quoting *California Computer Products, Inc. v. IBM Corp., 613 F.2d at 742*).

The other examples of anticompetitive conduct relied upon by Airweld do not aid its claim. The argon "squeeze" and targeting of customers have already been discussed. Neither of these practices is inherently anticompetitive.

Airco's conduct is most reasonably understood as a response to market conditions. Once Airweld terminated the distributorship agreement, Airco's presence in the Portland cylinder gas market was lost. In an effort to regain some or part of that market, it charged prices lower than Airweld, who had become one of its competitors. ***HN16***[] "If market conditions are such that a course of conduct described by the plaintiff would be unlikely to succeed in monopolizing the market, it is less likely that the defendant actually attempted to monopolize the market." *Inglis, 668 F.2d at 1030* (footnote omitted); *see* *Zoslaw, 693 F.2d at 888*. This is the situation here. Similarly, even if Airco's prices were below **[**30]** average total cost, this is not the type of conduct "clearly threatening to competition or clearly exclusionary" which a plaintiff must prove in order to show that a firm without market power intended to monopolize the market. *See Inglis, 668 F.2d at 1028*. As Professors Areeda and Turner discuss, promotional below cost pricing may be a valid means for a firm to attempt to gain entry into a market. III P. Areeda & D. Turner, ***Antitrust Law*** para. 716 (1978).

For the foregoing reasons, we affirm the district court's j.n.o.v. on the attempted monopolization claim. Below average total cost pricing, without more, is not the kind of conduct that will support a finding of attempted monopolization by a firm without market power.

VI. CONCLUSION

The judgment of the district court is

AFFIRMED.

HN2[] **International Aspects, Commerce With Foreign Nations**

Under section 7 of the Sherman Act, *15 U.S.C.S. § 6a (1982)*, the proscriptions of the Act apply to trade or commerce with foreign nations, other than import transactions, only when the conduct providing the basis for the claim has a direct, substantial and reasonably foreseeable anticompetitive effect on United States domestic, import or export commerce. This section clearly exempts from United States ***antitrust law*** conduct that lacks the requisite domestic effect, even where such conduct originates in the United States or involves American-owned entities operating abroad.

Opinion

[*1103] MEMORANDUM OPINION AND ORDER

MARY JOHNSON LOWE, D.J.

Plaintiff Eurim-Pharm GmbH has brought this action against defendants Pfizer, Inc., Pfizer Group Limited, Pfizer GmbH, Pfizer Italiana, S.P.A., Pfizer France, S.A., Laboratoires Pfizer S.A.R.L., and Pfizer Corporation, claiming violations of *section 1* of the Sherman Act, as amended (*15 U.S.C. § 1*). Defendants have moved pursuant to *Rules 12(b)(1)* and *12(b)(6) of the Federal Rules of Civil Procedure* to dismiss the complaint for lack of subject matter jurisdiction and failure to state a claim upon which relief can be granted. For the reasons set forth below, the motion is granted.

Background

Plaintiff is a limited entity organized and existing under the laws of the Federal Republic of Germany with its principal place of business in Piding/Reichenhall, Federal Republic. Plaintiff is engaged in business as a distributor, wholesaler, importer and exporter of brand-name pharmaceutical products produced by multinational pharmaceutical **[**2]** companies. There are six named defendants as well as an undetermined number of unnamed co-conspirators. Of the six named defendants, Pfizer, Inc. is a Delaware corporation with its principal place of business in New York, New York. Pfizer, Inc. is engaged in interstate and foreign commerce in various businesses including the formulation, manufacture and sale of pharmaceutical products. The five remaining named defendants are all wholly-owned foreign subsidiaries of Pfizer, Inc., incorporated in and with their principal places of business throughout Europe and Central America. These foreign subsidiaries are all engaged in the business of manufacturing pharmaceutical products, solely within Europe. The unnamed co-conspirators are foreign manufacturers, distributors, jobbers and wholesalers of Pfizer pharmaceutical products, whose identities presently are not known to the plaintiff. [1]

---

[1] In *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 52 U.S.L.W. 4821, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*, the Supreme Court held that a parent corporation and its wholly-owned subsidiaries are incapable of conspiring with each other

[3]** **[*1104]** *Facts*

The essence of plaintiff's claim is that defendants participated in a price-fixing and market allocation scheme to maintain their stronghold on the world market of the antibiotic Vibramycin after defendants' patent of the drug expired. Plaintiff alleges, and for purposes of this motion we must assume to be true, that under this scheme Pfizer, Inc. granted an exclusive license for producing Vibramycin to a foreign manufacturer in each major foreign market. These foreign manufacturers consisted of either wholly-owned foreign subsidiaries of Pfizer, Inc. or local foreign manufacturing companies. The foreign manufacturers agreed with Pfizer, Inc. to restrict their sales of Vibramycin to distributors, wholesalers and jobbers who in turn agreed to confine their sales to specific geographic areas assigned by Pfizer, Inc. at prices prescribed by Pfizer, Inc. and/or the foreign manufacturer. Any distributor, wholesaler or jobber who failed to honor this agreement with the foreign manufacturer would initially be warned by oral communications and would later be subject to reprisals, such as reduced allocations or delayed shipments. If these warnings and reprisals **[**4]** were not successful, the distributor, jobber or wholesaler would be terminated. In certain instances, Pfizer, Inc. would institute a trademark infringement action against those who did not comply with established policy.

Plaintiff alleges that as a result of this scheme, Pfizer, Inc. has maintained a substantial share of the world market for antibiotic products, both prior to and after the expiration of defendants' patents. Further, plaintiff claims that the price of Vibramycin has been and continues to be artificially inflated due to defendants' activities.

Plaintiff has sold Vibramycin in the Federal Republic of Germany since 1975. [2] In 1979 plaintiff was able to obtain Vibramycin in the United Kingdom at a price substantially lower than that available from the authorized distributors in the Federal Republic of Germany. Plaintiff repackaged the United Kingdom Vibramycin for direct sale to German retail pharmacies. During this time, Pfizer, Inc. brought a trademark infringement action against plaintiff in the German regional court, contending that plaintiff's repackaging and sale of Vibramycin violated Pfizer's rights as holder of the Vibramycin trademark. The German court granted **[**5]** an injunction barring plaintiff's repackaging and sale of United Kingdom Vibramycin in the Federal Republic. On appeal, the court lifted the injunction and found that the use of a national trademark to exclude competition from the sale of goods acquired in another member state of the European Economic community violated Articles 30 and 36 of the Treaty of Rome. This decision was affirmed by the Court of Justice of the European Communities.

Defendants base their motion to dismiss the complaint upon plaintiff's failure to allege the requisite effect on United States import or domestic commerce. According to defendants, the applicability of the United States antitrust statutes to foreign business transactions is limited to "conduct" which has a "direct, substantial, and reasonably foreseeable effect" on United States domestic, import or export commerce. Sherman Act, ch. 647, § 7, *15 U.S.C.* ***[**6]*** *§ 6a (1982)*. Defendants urge that the challenged activities fail to have an anticompetitive effect on United States domestic, import or export commerce because the transactions underlying this action and the effect of these transactions occurred solely within Europe, and the primary actors were European companies doing business solely within Europe.

Plaintiff argues that defendants have participated in and continue to participate **[*1105]** in a worldwide conspiracy which has affected United States domestic commerce by artificially inflating the price of Vibramycin in the United States.

---

for the purposes of *section 1* of the Sherman Act as *section 1* does not reach conduct that is "wholly unilateral". Therefore, it is clear that plaintiff can no longer claim that Pfizer, Inc., the parent corporation, conspired with is foreign subsidiaries to violate the antitrust laws. However, since we find that the Court lacks subject matter jurisdiction on other grounds, we need not address the question whether plaintiff has adequately pleaded a conspiracy between Pfizer, Inc. and the non-subsidiary companies mentioned in the complaint.

[2] It is not clear from the parties' papers whether plaintiff continues to sell Vibramycin in the Federal Republic of Germany.

Discussion

Section 7 of the Sherman Act sets forth the criteria for determining United States antitrust jurisdiction over international business transactions. *15 U.S.C. § 6a (1982)*. ***HN1***[] Under section 7, United States ***antitrust law***

> shall not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign nations unless --
>
> (1) such conduct has a direct, substantial, and reasonably foreseeable effect --
>
> > (A) on trade or commerce which is not trade or commerce with foreign nations, or on import trade or import commerce with foreign nations; **[**7]** or
> >
> > (B) on export trade or export commerce with foreign nations, of a person engaged in such trade or commerce in the United States; and
>
> (2) such effect gives rise to a claim under the provisions of *sections 1 to 7* of this title, other than this section.
>
> If *sections 1 to 7* of this title apply to such conduct only because of the operation of paragraph (1)(b), then *sections 1 to 7* of this title shall apply to such conduct only for injury to export business in the United States.

Section 7, also known as the Foreign Trade Antitrust Improvements Act, was added to the Sherman Act in 1982 when Congress enacted the Export Trading Companies Act. Due to the absence of case law concerning this amendment, we must turn to the legislative history for guidance in reaching our decision.

The legislative history of section 7 indicates that the amendment was designed to accomplish two main goals. First, the amendment was intended to eliminate the perception among business people that United States ***antitrust law*** is a barrier to efficiency-enhancing joint export activities. H.R. Rep. No. 97-686, 97th Cong., 2d Sess. 2, *reprinted in* 1982 U.S. Code Cong. & Ad. News at 2487 (hereinafter **[**8]** cited as "House Report"). Congress sought to place American-owned companies operating entirely abroad or in United States export trade on equal footing with their foreign-owned competitors by freeing them from the possibility of dual and conflicting antitrust regulation. "No longer is there any possibility that, because of uncertainty growing out of American ownership, such firms will be subject to a different and perhaps stricter regimen of antitrust than their competitors of foreign ownership." House Report at 10, *reprinted in* 1982 U.S. Code Cong. & Ad. News at 2495.

Second, Congress acted to eliminate the uncertainty that had arisen from the confusing array of standards employed by federal courts for determining when United States antitrust jurisdiction attaches to international business transactions. House Report at 2, *reprinted in* 1982 U.S. Code Cog. & Ad. News at 2487. [3] **[**9]** Congress adopted a single objective test that would "serve as a simple and straightforward clarification of existing American

---

[3] Even before the enactment of section 7, it was the situs of the effect which determined whether United States ***antitrust law*** applied to a particular transaction. *United States v. Aluminum Co. of America, 148 F.2d 416, 443-44 (2d Cir. 1945)* (Learned Hand, J.). However, in applying this rule, courts had arrived at different formulations for the nature and quantum of "effects" needed. *See, e.g., National Bank of Canada v. Interbank Card Association, 666 F.2d 6, 8 (2d Cir. 1981)* (any anticompetitive effect on either United States commerce within the United States or export commerce from the United States); *Dominicus America Bohio v. Gulf & Western Industries, Inc., 473 F. Supp. 680, 687 (S.D.N.Y. 1979)* (not necessary for the effect on foreign commerce to be both substantial and direct as long as it is not *de minimus*); *Waldbaum v. Worldvision Enterprises, Inc., 1978-2 Trade Case (CCH) P 62,378, at 76,257 (S.D.N.Y. 1978)* (anticompetitive effects in the United States); *Industria Sciliana Asfalti, Bitumi, S.P.A. v. Exxon Research & Engineering Co*., 1977-1 Trade Case (CCH) Par. 61.256 at 70,784 (S.D.N.Y. 1977) (impact upon United States commerce); *Todhunter-Mitchell & Co., Ltd. v. Anheuser-Busch, Inc., 383 F. Supp. 586, 587 (E.D. Pa. 1974)* (direct effect on the flow of foreign commerce into or out of the United States).

law and **[*1106]** the Department of Justice enforcement standards." House Report at 2, *reprinted in* 1982 U.S. Code Cong. & Ad. News at 2487-88. [4]

HN2[] Under section 7, the proscriptions of the Sherman Act apply to trade or commerce with foreign nations, other than import transactions, only when the conduct providing the basis for the claim has a direct, substantial and reasonably foreseeable anticompetitive effect on United States domestic, import or export commerce. The amendment clearly was intended to exempt from United States ***antitrust law*** conduct that lacks the requisite domestic effect, even where such conduct originates in the United States or involves American-owned entities operating abroad.

Section 7 does not, however, preclude all persons or entities injured abroad from recovering under United States antitrust laws. When the activity complained of has a demonstrable effect on United States domestic **[**10]** or import commerce, foreign corporations injured abroad may seek recovery under the Sherman Act. [5] As the House Report states, section 7 "preserves antitrust protections in the domestic marketplace for all purchasers, regardless of nationality or the situs of the business. . . ." House Report at 10, *reprinted in* 1982 U.S. Code Cong. & Ad. News at 2495.

In the case at bar, plaintiff fails to allege in its complaint any effect on United States trade or commerce resulting from defendants' alleged conduct. Plaintiff merely alleges that the effects of defendants' activities have been to: (1) create artificially high and inflated prices for Vibramycin (the complaint does not specify *where* prices have **[**11]** been inflated); (2) restrict distribution of Vibramycin to defendants and those selected by defendants; (3) prevent pharmaceutical wholesalers, jobbers and distributors from selling to customers of their choice; and (4) exclude wholesalers, jobbers and distributors from the sale of Vibramycin in interstate and foreign commerce. Moreover, it is apparent from plaintiff's Memorandum in Opposition to Defendants' Motion to Dismiss that even if plaintiff were given an opportunity to amend its complaint, it would be unable to allege the requisite effects on United States trade or commerce.

Plaintiff concedes in its memorandum that defendants' conduct lacks a direct, substantial and reasonably foreseeable effect on either import commerce into the United States or export commerce from the United States. Plaintiff argues, however, that defendants' activities have had a spillover effect on domestic commerce within the United States. Plaintiff characterizes defendants' conduct as a worldwide cartel directed by Pfizer, Inc. from the United States to ensure that prices for Vibramycin remained at or increased to monopolistic levels after the patent for the drug had expired. Plaintiff claims that **[**12]** this worldwide price-fixing and market allocation conspiracy had the direct, substantial and reasonably foreseeable effect of artificially inflating the price of Vibramycin in the United States. According to plaintiff, from 1981 to 1983 the price for 500 capsules of 100 milligrams of Vibramycin rose from $343.95 to $550.64, representing more than a 38% increase when drug prices during the same period rose only 15%. In addition, plaintiff maintains that due to the expiration in 1982 of defendants' patent on Vibramycin, the price should have declined, not have increased.

Even assuming the truth of plaintiff's allegations that the United States price of Vibramycin has risen since the expiration **[*1107]** of defendants' patent, plaintiff has failed to allege any facts demonstrating a causal connection between defendants' conduct in Europe and the price increase in the United States. Plaintiff has not and apparently cannot allege [6] that defendants' conduct has prevented the import of foreign manufactured Vibramycin into the

---

[4] The objective nature of this test is evident from the use of "reasonably" and "foreseeable". The test is whether the effect would have been evident to a reasonable person making practical business judgments, not whether actual knowledge or intent can be shown. House Report at 9, *reprinted in* 1982 U.S. Code Cong. & Ad. News at 2494.

[5] Where the conduct is solely export oriented, only domestic exporters (injured in the United States) have a remedy under the Sherman Act. "But a foreign firm whose non-domestic operations were injured by the very same export oriented conduct, would have no remedy under our antitrust laws." House Report at 11.

United States or prevented United States companies other than Pfizer, Inc. from manufacturing and selling the drug in the United States. Indeed, plaintiff has made **[**13]** no allegations whatsoever regarding the manufacture, sale or marketing of Vibramycin in the United States other than its allegation that the United States price has increased. Thus the link between defendants' conduct abroad and the price of Vibramycin in the United States is far from apparent.

Plaintiff has utterly failed to establish that defendants' alleged foreign price-fixing and market allocation scheme resulted in an anticompetitive effect on United States domestic or import commerce. This is precisely the type of case Congress sought to eliminate from United States antitrust jurisdiction when it amended the Sherman Act in 1982 to "more clearly **[**14]** establish when antitrust liability attaches to international business activities." House Report at 7, *reprinted in* 1982 U.S. Code Cong. & Ad. News at 2492 (remarks of Chairman Rodino). Accordingly, this Court grants defendants' motion to dismiss for lack of subject matter jurisdiction.

IT IS SO ORDERED.

End of Document

---

[6] After defendants filed their motion to dismiss, plaintiff was on full notice of the issues involved. Yet plaintiff's responding memorandum does not contain allegations sufficient to cure the deficiencies in the complaint. It is reasonable to assume that plaintiff has no further facts to allege with respect to the impact of defendants' conduct in the United States.

HN3[] **Administrative Law, Agency Rulemaking**

The major shipper-protective limits on Interstate Commerce Commission's exemption authority are *49 U.S.C.S. §§ 10101a(6)* and *10505(a)(2)(B)*. The former provision establishes that national railroad policy is to maintain reasonable rates where there is an absence of effective competition so long as railroads earn revenues which exceed the amount necessary to maintain the rail system and to attract capital. The latter limits the exemption power where regulation is necessary to protect shippers from the abuse of market power.

Antitrust & Trade Law > Regulated Industries > Transportation > Railroads

HN5[] **Monopolies & Monopolization, Actual Monopolization**

The ability of a firm to price discriminate is an indicator of significant monopoly power.

Administrative Law > Judicial Review > Standards of Review > Deference to Agency Statutory Interpretation

Governments > Legislation > Interpretation

Administrative Law > Judicial Review > Standards of Review > General Overview

HN6[] **Standards of Review, Deference to Agency Statutory Interpretation**

Considerable weight should be accorded to an agency's construction of a statutory scheme it is entrusted to administer. This is especially so where the agency is assigned to formulate a policy accommodating competing policies or interests. But there are limits to the court's deference. If the agency's notice represents a reasonable accommodation of conflicting policies that were committed to the agency's care by the statute, the court should not disturb it unless it appears from the statute or its legislative history that the accommodation is not one that Congress would have sanctioned.

Governments > Legislation > Interpretation

Transportation Law > Rail Transportation > General Overview

Transportation Law > Carrier Duties & Liabilities > Market Dominance

HN7[] **Legislation, Interpretation**

The rate reasonableness provision of 18 U.S.C.S. § 10101a(6) and the "abuse of market power" provision of 18 U.S.C.S. § 10505(a)(2)(B) should be read as reflecting the policies of the statutory scheme of which they are a part. It is unreasonable to view a statutory scheme that allows shippers to complain that a market dominant carrier is charging rates that unnecessarily generate excessive profits as being indifferent concerning the distribution of economic rents between monopolistic carriers and their captive shippers. Similarly, such an indifference seems incompatible with a scheme that allows a shipper to complain that its higher rate is unjustified because necessary carrier revenues could be more equitably generated elsewhere on the carrier's system. Protecting the revenues of shippers who face carriers with market power was an essential goal, though not the only goal, of the compromise that produced the Staggers Rail Act, *49 U.S.C.S. § 10505*.

HN8[] **Administrative Law, Agency Rulemaking**

Though competitive forces may exist and somewhat constrain railroad power, when they nevertheless do not rise to the level of "effective competition" the Interstate Commerce Commission must explain why reliance on them is sufficient to protect those interests of shippers protected in the Staggers Rail Act, *49 U.S.C.S. § 10505*, and alluded to in the policy declarations of 18 U.S.C.S. §§ 10101a(6), 10505(a)(2)(B).

Administrative Law > Judicial Review > Standards of Review > General Overview

HN9[] **Judicial Review, Standards of Review**

An agency cannot hide the standards under which it operates, for the courts are unable to evaluate whether its reasoning meets the reasoned decision-making requirement unless they know against what standards its factual findings have been judged.

Counsel: John Louis Oberdorfer, with whom Scott N. Stone, Robert Stauffer, and Garret G. Rasmussen, were on the brief, for Petitioners Coal Exporters Association of the United States, Inc. and National Coal Association in No. 83-1629.

C. Michael Loftus, with whom David A. Sutherland, was on the brief, for Petitioner Eastern Coal Transportation Conference in No. 83-1633 and Intervenor Coastal States Energy Company in Nos. 83-1629 and 83-1633.

W. Glenn Scammel, Attorney, Interstate Commerce Commission, with whom John Broadley, General Counsel, and Lawrence H. Richmond, Deputy Associate General Counsel, Interstate Commerce Commission, and John J. Powers, III and John P. Fonte, Attorneys, Department of Justice, were on the brief, for Respondents. J. Paul McGrath, Assistant Attorney General, entered an appearance for Respondent United States of America.

Robert Eden Martin, with whom G. Paul Moates, Vincent F. Prada, Richard W. Kienle, Roland W. Donnem, Richard B. Allen, Renee D. Rysdahl, and Emried D. Cole, Jr., were on the brief, for Intervenors Norfolk & Western Railroad Company et al. in Nos. 83-1629 and **[**2]** 83-1633. Richard A. Hollander, entered an appearance for Intervenors Norfolk & Western Railway Company et al. in No. 83-1629.

Gordon P. MacDougall, was on the brief for Intervenor Patrick W. Simmons in Nos. 83-1629 and 83-1633.

Noel Hemmendinger, was on the brief for Intervenors Nippon Steel Corporation et al. in No. 83-1629.

Milton E. Nelson, Jr., Richard E. Weicher, Kendall T. Sanford, Thormund A. Miller, Louis P. Warchot, Stuart E. Vaughn, J. Thomas Greene, and Fredereck W. Read, III, were on the brief for Intervenours Atchison, Topeka & Santa Fe Railway Company et al. in No. 83-1629. Robert B. Batchelder, entered an appearance for Intervenors Atchison, Topeka & Santa Fe Railway Company et al.

Judges: Wright, Tamm, and Mikva, Circuit Judges. Opinion for the court filed by Circuit Judge Wright.

Opinion by: WRIGHT

Opinion

[*78] WRIGHT, Circuit Judge:

In this case we review a decision of the Interstate Commerce Commission to exempt all rail transportation of coal destined for export through United States ports from all provisions of the Interstate Commerce Act (ICA), as amended. [1] Here, challenges are brought to the exemption decision by organizations of coal producers **[**3]** and other export coal shippers.

This case began when, on March 30, 1981, the Norfolk & Western Railway Company, a major carrier of export coal, filed a petition with the ICC under the exemption provision of the Staggers Rail Act of 1980, *49 U.S.C. § 10505 (1982)*. [2] The petition sought an exemption from regulation for all export coal traffic moving by rail through Atlantic and Gulf ports. In September 1981 ICC issued a notice of proposed exemption in which it requested comments on partial or complete exemption of export coal traffic moving through all United States ports. *Notice of Proposed Exemption, Railroad Exemption -- Export Coal, 46 Fed. Reg. 44529 (September 4, 1981),* **[**4]** Joint Appendix

[1] The provisions of the Interstate Commerce Act, as amended, may be found at 49 U.S.C. Subtitle IV (1982). For the Interstate Commerce Commission's decision, *see Ex Parte No. 346 (Sub-No.7), Railroad Exemption -- Export Coal, 367 ICC 570 (1983)* (hereinafter cited as *Decision*).

[2] Pub. L. No. 96-448, Title II, § 213, 94 STAT. 1912 (1980).

(JA) 173. A large number of comments were received, including comments from a number of federal government entities. Railroads uniformly favored an exemption, and their position was supported by the United States Department of Transportation. Mine owners and other shippers opposed the exemption, as did a number of river carrier, port, and ocean carrier interests, the Departments of State and Commerce, the ICC's Office of Special Counsel, and the United States Trade Representative. The Department of Justice took no position except to state that any such exemption must end antitrust immunity for exempted transportation. *Ex Parte No. 346 (Sub-No. 7), Railroad Exemption* -- *Export Coal, 367 ICC 570, 571 (1983)* (hereinafter cited as *Decision*).

On March 3 and 4, 1983 the Commission announced its decision to exempt export coal and advised that an opinion explaining the decision was being prepared. On June 9, 1983 the **[**5]** decision was issued. *See* note 1 *supra*. ICC Chairman Taylor filed a dissenting opinion.

This case again focuses this court on the exemption provision of the Staggers Act, **[*79]** *49 U.S.C. § 10505 (1982)*, *see* *Brae Corp. v. United States, 238 U.S. App. D.C. 352, 740 F.2d 1023 (D.C. Cir. 1984)* (reviewing ICC exemption of boxcar transportation); *see also* *Simmons v. ICC, 225 U.S. App. D.C. 84, 697 F.2d 326 (D.C. Cir. 1982)*; *McGinness v. ICC, 213 U.S. App. D.C. 297, 662 F.2d 853 (D.C. Cir. 1981)*. [3] **[**7]** In particular, this case

---

[3] The exemption provision, in relevant part, reads:

> ***HN1***[] In a matter related to a rail carrier providing transportation subject to the jurisdiction of the Interstate Commerce Commission under this subchapter, the Commission shall exempt a person, class of persons, or a transaction or service when the Commission finds that the application of a provision of this subtitle --
>
> (1) is not necessary to carry out the transportation policy of *section 10101a* of this title; and
>
> (2) either (A) the transaction or service is of limited scope, or (B) the application of a provision of this subtitle is not needed to protect shippers from the abuse of market power.

49 U.S.C. § 10505(a) (1982). In this case the Commission made no finding with respect to the issue of "limited scope," relying instead on its finding relating to "abuse of market power." *See* *Decision, supra note 1, 367 ICC at 586 n.37*.

Section 10101a, referred to in the exemption provision, reads:

> In regulating the railroad industry, it is the policy of the United States Government --
>
> (1) to allow, to the maximum extent possible, competition and the demand for services to establish reasonable rates for transportation by rail;
>
> (2) to minimize the need for Federal regulatory control over the rail transportation system and to require fair and expeditious regulatory decisions when regulation is required;
>
> (3) to promote a safe and efficient rail transportation system by allowing rail carriers to earn adequate revenues, as determined by the Interstate Commerce Commission;
>
> (4) to ensure the development and continuation of a sound rail transportation system with effective competition among rail carriers and with other modes, to meet the needs of the public and the national defense;
>
> (5) to foster sound economic conditions in transportation and to ensure effective competition and coordination between rail carriers and other modes;
>
> (6) to maintain reasonable rates where there is an absence of effective competition and where rail rates provide revenues which exceed the amount necessary to maintain the rail system and to attract capital;
>
> (7) to reduce regulatory barriers to entry into and exit from the industry;
>
> (8) to operate transportation facilities and equipment without detriment to the public health and safety;
>
> (9) to cooperate with the States on transportation matters to assure that intrastate regulatory jurisdiction is exercised in accordance with the standards established in this subtitle;

requires that we examine two closely related ICC findings, each of which is required by *Section 10505* as a precondition to ICC's exercise of exemption authority. The first finding was that the regulation lifted in this exemption was "not necessary to carry out the [national rail] transportation policy of [*49 U.S.C.] section 10101a*[.]" *49 U.S.C. § 10505(a)(1) (1982)*. The second finding was that the regulation was "not needed to protect shippers from the abuse of market power." *See id.* *§ 10505(a)(2)(B)*. The two findings are particularly intertwined **[**6]** in this case because petitioners, as shippers, most emphasize an element of national rail transportation policy that assures the maintenance of "reasonable rates where there is an absence of effective competition and where rail rates provide revenues which exceed the amount necessary to maintain the rail system and to attract capital[.]" *Id.* *§ 10101a(6)*. Obviously, the policy reflected in that element substantially overlaps with the provision relating to "protect[ing] shippers from the abuse of market power." Because the ICC's conclusions with respect to these legal **[*80]** standards reflect an unreasonable interpretation of their meaning, we must vacate and remand the exemption decision. [4]

---

(10) to encourage honest and efficient management of railroads and, in particular, the elimination of noncompensatory rates for rail transportation;

(11) to require rail carriers, to the maximum extent practicable, to rely on individual rate increases, and to limit the use of increases of general applicability;

(12) to encourage fair wages and safe and suitable working conditions in the railroad industry;

(13) to prohibit predatory pricing and practices, to avoid undue concentrations of market power and to prohibit unlawful discrimination;

(14) to ensure the availability of accurate cost information in regulatory proceedings, while minimizing the burden on rail carriers of developing and maintaining the capability of providing such information; and

(15) to encourage and promote energy conservation.

49 U.S.C. § 10101a (1982).

[4] Petitioners have also argued that ICC's exemption decision must be vacated for failure to comply with a variety of procedural requirements of the Administrative Procedure Act and other laws. Because of our disposition of the case on other grounds, we need reach no conclusions regarding the merits of most of these challenges. One of these challenges, however, we shall examine.

Petitioners contend that Commissioner Gradison, who voted in the exemption decision, was obliged to disqualify herself because her impartiality in this proceeding "might reasonably be questioned." *28 U.S.C. § 455(a) (1982)*. Because Commissioner Gradison may choose to participate in future proceedings concerning the matters raised in this case, we will discuss the contention that she should have disqualified herself in this proceeding.

Petitioners argued below that the Commission's Canon of Conduct, 49 C.F.R. § 1000.735-14(a) (1983), obliged Commissioner Gradison to disqualify herself in this case. In relevant part that canon states: "Members * * * shall not participate in any matter in which they have a substantial pecuniary interest or in which their impartiality might reasonably be questioned." Petitioners do not contend that Commissioner Gradison had any pecuniary interest in the outcome of this case. But they do contend that her impartiality "might reasonably be questioned." They point out that earlier in her career she had been an employee of the Southern Railway Company for eight years. Petitioners also point out that subsequent to Gradison's resignation from Southern it merged with the Norfolk & Western Railway Company, which was the original proponent of the exemption at issue in this case. Commissioner Gradison denied petitioners' motion for disqualification and filed a detailed explanation of her reasoning. Joint Appendix (JA) 177-195.

We reject petitioners' contention that it was improper for Commissioner Gradison to have denied the motion for her disqualification. Petitioners contend that "her duties [at Southern] included developing a rate structure for deregulated fresh fruits and vegetables with a view in part to gain experience should other areas of traffic be exempted." Reply brief of petitioners Coal Exporters Association of the United States, Inc. and National Coal Association (CEA/NCA) at 25 n.49. But even if this were so, such an employment record in itself implies no impropriety in her fully participating in exemption cases such as this. No contention is made that her prior employment experience is significant for reasons other than that it involved the Commissioner in a presumably partisan way in the general issues of rail carrier deregulation. Yet even on this issue no specific evidence of a closed mind is given. It is not surprising that a member of ICC has had substantial employment experience with a rail carrier.

[8]** Two interrelated challenges of petitioners will be discussed in this opinion. First, petitioners challenge the decision on the basis that the reasoning the ICC used to analyze the record before it and justify its action in relation to that record was arbitrary and capricious in violation of Section 10 of the Administrative Procedure Act, *5 U.S.C. § 706(2)(A)(1982)*. Second, petitioners argue that the ICC's interpretation of the Staggers Act's exemption authority, as reflected in the reasoning of the ICC's opinion, is an unreasonable one in relation to the statute's wording and legislative history. The latter argument focuses on the meaning of the provisions protective of shipper interests, particularly *49 U.S.C. §§ 10101a(6)* and *10505(a)(2)(B) (1982)*. Our analysis turns more on this latter contention, but the two arguments are closely interrelated.

I. A GENERAL OVERVIEW OF THE STAGGERS RAIL ACT

Before analyzing the reasoning of the ICC and the challenges to the decision, it is useful to review the decision's statutory basis. The Staggers Rail Act of 1980 was a complex and comprehensive amendment to the ICA. The primary goal **[**9]** of the Act was to revitalize the railroad industry by reducing or eliminating regulatory burdens. **[*81]** Faced with railroad bankruptcies and the need to assure railroads of adequate revenues, Congress revamped the structure of railroad regulation in order to restore the industry to health.

The Staggers Act was not, however, a simple deregulation of the railroad industry. Instead, it was a simultaneous recognition of two conditions. On the one hand, Congress recognized that in large parts of the rail industry heavily regulated rail carriers faced competitive conditions. In many cases these carriers competed with other modes of transportation which were unregulated and therefore able to be more innovative and flexible. Congress found that too often the ICA's regulatory framework had become an unnecessary and crippling burden on the rail industry, and was an impediment to the industry's ability to attract the capital necessary to meet the nation's future needs.[5] **[**12]** On the other hand, however, Congress recognized that sometimes competition would be insufficient to protect the legitimate interests of shippers, small carriers, and the public, and thus that full deregulation of **[**10]** the industry was unjustified by industry conditions. The legislation that eventually became the Staggers Act was subject to significant modification during floor debate, with many of the successful amendments supported by legislators who feared that the bills that emerged from the committees might not afford adequate protection to

---

Nor is it surprising that ICC's rulemaking proceedings may involve policies that affect many rail carriers. The fact that a Commissioner had in the past done work for a carrier that has involved that person in the general areas of policy that surround a rulemaking cannot be sufficient to prevent that Commissioner's participation in that rulemaking. A Commissioner is not required to repudiate her past experiences upon assuming public office. Prior involvement in the general public issues facing an agency is not in itself a basis for disqualification from agency actions concerning those issues. *Cf. Ass'n of Nat'l Advertisers, Inc. v. FTC, 201 U.S. App. D.C. 165, 627 F.2d 1151 (D.C. Cir. 1979)*, *cert. denied*, ***447 U.S. 921, 100 S. Ct. 3011, 65 L. Ed. 2d 1113 (1980)***. *See also Laird v. Tatum, 409 U.S. 824, 34 L. Ed. 2d 50, 93 S. Ct. 7 (1972)* (Memorandum of Rehnquist, J.).

[5] Congressional findings were explicitly set out in § 2 of the Act. Among them were findings that

> (3) today, most transportation within the United States is competitive;
>
> (4) many of the Government regulations affecting railroads have become unnecessary and inefficient;
>
> (5) nearly two-thirds of the Nation's intercity freight is transported by modes of transportation other than railroads;
>
> (6) earnings by the railroad industry are the lowest of any transportation mode and are insufficient to generate funds for necessary capital improvements;
>
> (8) failure to achieve increased earnings within the railroad industry will result in either further deterioration of the rail system or the necessity for additional Federal subsidy; and
>
> (9) modernization of economic regulation for the railroad industry with a greater reliance on the marketplace is essential in order to achieve maximum utilization of railroads to save energy and combat inflation.

Pub. L. No. 96-448, § 2, 94 STAT. 1896 (1980), *reprinted at 49 U.S.C. § 10101a* note (1982).

Similarly, § 3 set out as a goal of the Act "reform [of] Federal regulatory policy so as to preserve a safe, adequate, economical, efficient, and financially stable rail system[.]" Pub. L. No. 96-448, § 3 (2), 94 STAT. 1897 (1980), *reprinted at 49 U.S.C. § 10101a* note (1982).

shippers where they might otherwise suffer from abuses of market power. The resulting Act was a compromise that enjoyed overwhelming support. Although the legislation was without doubt a significant reduction in railroad regulation, as this court has said, "The legislation * * * did not strip the Commission of its power and duty to protect shippers from the unreasonably high rates of carriers with market dominance." *Burlington Northern Inc. v. United States, 213 U.S. App. D.C. 52, 661 F.2d 964, 973 (D.C. Cir. 1981)*. Both before and after the amendments the bills' sponsors agreed that the underlying approach of the legislation was to move toward much greater reliance on market forces rather than regulation to govern rail carriage, but to temper that move with a policy of retaining regulation where the market would be insufficient to protect **[**11]** shippers and the public from abusive railroad practices. [6]

[13]** **[*82]** The Staggers Act exemption provision is an "important cornerstone" of the overall statutory scheme in that it represents Congress' determination that there be continuing evaluation of the appropriateness of regulation and continuing deregulation where consistent with the Act's policies. H.R. Rep. No. 96-1035, 96th Cong., 2d Sess. 60 (1980). It is also a recognition that an administrative agency is better suited than Congress to evaluate on a continuing basis the specific need for the various aspects of the regulatory scheme in particular contexts. [7] There is no doubt that the exemption provision was intended to give ICC very broad authority to eliminate unnecessary regulation. *See* *American Trucking Assn's, Inc. v. ICC, 656 F.2d 1115, 1118-1120 (5th Cir. 1981)*. Congress' delegation of exemption authority to ICC, however, was a conditional one. It included guidelines that conditioned that authority so as to preserve the policy balance embodied in the Act. As the Conference Report specified, the task of the agency is "to determine where [there] can be deregulat[ion] consistent with the policies of Congress." H.R. Conf. Rep. No. 96-1430, 96th Cong. **[**14]** , 2d Sess. 105 (1980). The statute sets out these policies as conditions on the Commission's exemption authority. ***HN2***[] Where ICC properly finds the conditions to be present, it has no choice but to grant an exemption. But in the absence of such findings ICC has no exemption authority. [8]

As we discussed, petitioners in this case challenge the reasoning used by the Commission with respect to two limits with which Congress **[**15]** conditioned the ICC's exemption power: the element of national rail policy concerned

---

[6] The legislative history of the Act is full of descriptions of it by conference committee members, sponsors, leading proponents, and floor leaders as a detailed and delicate compromise that accommodated the interests of carriers, shippers, and the public, reducing or eliminating regulation where appropriate and preserving regulatory protection for shippers where necessary. *See, e.g.*, 126 Cong. Rec. S14005 (daily ed. Sept. 30, 1980) (comments of Sen. Exon); *id.* at S14003 (comments of Sen. Cannon); *id.* (comments of Sen. Long); *id.* at H10086-H10087 (comments of Rep. Rahall); *id.* at H8555-H8556 (comments of Rep. Loeffler); *id.* at H8550-H8551 (comments of Rep. Rahall).

More important, this compromise nature is reflected throughout the Act. It is most recognizable in those general policy provisions of the Act that speak to shipper interests. The statement of goals includes as one of the Act's goals "to provide a regulatory process that balances the needs of the carriers, shippers, and the public[.]" Pub. L. No. 96-448, § 3(4), 94 STAT. 1897 (1980), *reprinted at* 49 U.S.C. § 10101a note (1982). Similarly, the statute's declaration of national rail policy includes such policies as "to maintain reasonable rates where there is an absence of effective competition and where rail rates provide revenues which exceed the amount necessary to maintain the rail system and to attract capital," *id.* *§ 10101a (6)*, and "to avoid undue concentrations of market power[.]" *Id.* *§ 10101a (13)*. As we discuss in text, the elements of national rail policy limit the Commission's exemption power, *id.* *§ 10505(a)(1)*, and the power is further limited where the regulation to be lifted is "needed to protect shippers from the abuse of market power." *Id.* *§ 10505(a)(2)(B)*.

[7] As the Conference Report states:

> The policy underlying [the exemption] provision is that while Congress has been able to identify [*sic*] broad areas of Commerce where reduced regulation is clearly warranted, the Commission is more capable through the administrative process of examining specific regulatory provisions and practices not yet addressed by Congress to determine where they can be deregulated consistent with the policies of Congress. * * *

H.R. Conf. Rep. No. 96-1430, 96th Cong., 2d Sess. 105 (1980).

[8] *See* note 3 *supra* and accompanying text.

with maintaining reasonable rail rates in the absence of effective competition, *see* 49 U.S.C. § 10101a(6) (1982), and the explicit limit on the ICC's ability to grant exemptions from regulatory provisions "needed to protect shippers from the abuse of market power." *See id.* § 10505(a)(2)(B). To understand how these issues arise in this case, we must turn to the Commission's complex opinion, that opinion's view of the export coal industry, and the Commission's analysis of the legal significance of its factual findings.

II. THE ICC's FINDINGS RESPECTING THE EXPORT COAL INDUSTRY

The ICC's opinion is premised on the general finding that in the absence of regulation railroads would be sufficiently constrained by various forms of competition that they would not be expected to abuse any market power they might hold with respect to shippers of export coal. Four forms of competition were offered and discussed by the Commission: (1) the competition that U.S. railroads face because the coal they carry for export must compete in a world coal market where numerous countries **[**16]** actively produce and market coal for export; (2) the geographic competition that each railroad faces because the coal it carries **[*83]** must compete with coal produced in other regions of the United States; (3) the intermodal competition that each railroad faces because shippers can switch to other railroads to carry their coal; and (4) the intermodal competition that a railroad faces because shippers can switch to other modes of transportation, *e.g.*, trucks, barges, or pipelines.

Petitioners argue here and they and the dissenting chairman of the Commission argued below that these factors simply cannot be expected to effectively constrain railroad market power, that 95 percent of the U.S. coal mines producing for export are served by only one rail line and have no practical alternative method of shipping their coal to port, and that after deregulation these shippers will likely fall victim to the monopolistic practices of the railroads upon which they must rely. They challenge much of the data relied on by ICC and assert that much relevant evidence was ignored or mischaracterized to justify a result contrary to the clear weight of the evidence. The Commission counters that **[**17]** past pricing patterns support the hypothesis that railroad practices have been constrained by market forces and, more important, the Commission predicts how future behavior will be sufficiently constrained. The dispute is in part a dispute over ICC's use of evidence in the record, but it is also a dispute over the legal question of how much constraint market forces must place on railroad behavior before the Commission can deregulate under the exemption provision. We will summarize ICC's discussion with respect to each of the four competitive factors, as well as petitioners' challenges to ICC's discussion. We will then analyze ICC's discussion of the significance of past railroad price behavior and, more important, its discussion of the legal significance of predicted future behavior. In this discussion ICC's understanding of the statutory standards for exemption emerged. We vacate because it is clear to us that ICC misunderstood the content of the statute's demands.

A. *Competition in the World Coal Market*

A large portion of the ICC opinion was devoted to explaining the position of U.S. coal in the world coal market. *See* *Decision, supra, 367 ICC at 571-576.* **[**18]** The analysis focused on the fact that "United States coal shippers face intense competition from major coal suppliers around the world[; that] these competitors are large, well organized, and sometimes government-supported firms in Australia, South Africa, Canada, Poland, and West Germany[; and] that suppliers in these countries have been quite effective in expanding their market shares in recent years * * *." *Id.* at 572.

The opinion painted a picture of a market in which nations aggressively market coal for use in Western Europe and the Far East for steel manufacture (called metallurgical coal or met coal) and generating electricity (called steam coal). Foreign purchasers initially evaluate suppliers "on the basis of quality and security of supply[,]" and because "usually this process identifies several qualified suppliers[, purchasers reach a] final decision * * * almost invariably * * * on the basis of competitive price." *Id.* at 573-574. The market is price sensitive in that any increase in the delivered price of U.S. coal will likely result in a decrease in the quantity demanded and an increase in the quantity of coal purchased from **[**19]** other exporting nations. *Id.* at 575. Because rail transportation costs are a significant component of the delivered price of export coal, the market's price sensitivity, in ICC's view, will limit the ability of railroads to raise rates.

ICC admitted a number of factors that could arguably limit the degree of competition and create substantial foreign reliance on U.S. coal. For example, due to political instability, labor problems, export quotas, or insufficient capital, "to some extent, each of the countries competing with the United States has been hampered in its efforts to expand production." *Id.* at 574. The United States, in contrast, has been a dependable, long-term coal source that can **[*84]** thus demand a higher price. *Id.* at 576. Similarly, ICC admits that coal is not fungible: "There are certain requirements for particular uses because coal must possess the proper ash, moisture, sulfur, and carbon content, have the requisite volatility, and supply the necessary thermal units to be effective at a given site." *Id.* at 573. These "specifications are more rigid for metallurgical" coal, which "must be **[**20]** of a very high quality[,]" *id.*, and this has made "the United States * * * the chief supplier because of its high quality Appalachian coal." *Id.* at 575.

However, ICC went on to explain that these sorts of factors would not give the United States market power in the world market. It found that in spite of the fact that the U.S. is the most dependable supplier of coal and has substantial reserves, "the current development of [other] exporting countries and their plans for further expansion * * * leave little doubt that world coal supply will increase to meet any future increases in demand." *Id.* at 574. [9] It similarly found that the variability of coal qualities, the need for specified qualities for different uses, and the general high quality of U.S. met coal should not alter the conclusion that the U.S. cannot raise its coal prices without lowering its market share. ICC explained, "It is clear that technological improvements in the production of coke and the manufacture of steel, as well as greater experience in blending coals of disparate characteristics to achieve a desired quality of coke, have lessened the restrictions on metallurgical **[**21]** coal and permitted the use of lower grade coal. This has allowed more suppliers into the market and greatly heightened worldwide competition for metallurgical coal sales." *Id.* at 573 (footnote omitted). Moreover, any premium that U.S. coal can demand on the basis of quality or reliability of supply is already reflected in coal prices. *Id.* at 576.

ICC's analysis of the world coal market leads it to the conclusion that any increase in U.S. coal's delivered price will lead purchasers to increase their purchase from other **[**22]** nations. The U.S. market share would thus decline. Although the Commission's opinion contains no economic analysis of exactly how sensitive the world market would be to any U.S. price increases -- indeed the discussion is quite general -- it does conclude that the world market is "extremely sensitive to changes in the delivered price." *Id.* at 574. At one point it describes the world "pricing arena" as one "in which the world delivered price of coal is highly constrained by competitive market forces[.]" *Id.* at 592. At another point it concludes that "price competition for export coal is such that even a 10-percent increase in the delivered price of American coal can be the difference between obtaining a market or losing it entirely." *Id.* at 593.

ICC Chairman Taylor in his dissent and petitioners in this court react to ICC's analysis of the world market by challenging its relevance. Even if the world market is such that U.S. market share will decline as price increases, and indeed even if it would establish a world "price cap" above which market share would decline rapidly enough to reduce export coal profits, this would still **[**23]** not protect American shippers from abuses of market power by railroads. [10] The issue is not whether American interests **[*85]** have market power in the world coal market, but

---

[9] *See also* [*Decision, supra note 1, 367 ICC at 575*]() ("Coal production has now been expanded throughout the world beyond the reasonable ability of the current market to absorb it, and this surplus is aggravated by the current decline in the world price of oil. These trends ensure that there will most likely continue to be vigorous price competition in the world * * * market at least for the near future." (footnote omitted)).

[10] Petitioners did not agree that U.S. rail carriers would lack market power in the world market. For example, one brief cites statistics that first show that 2/3 of all U.S. coal exports are met coal and only 1/3 are steam coal. They go on to show that in 1980 2/3 of Western Europe's met coal imports were from the U.S. They also point out that the Department of Justice, in its filing to the Commission, "stated that the U.S. 'appears to be the dominant supplier' of low and medium volatile metallurgical coal, and that * * 'U.S. railroads would have substantial market power' because 'N&W and CSX (Chessie) have a virtual duopoly on the transportation of met coal.'" CEA/NCA brief at 32 n.*, *quoting* JA 639-640 (Justice Department submission to ICC). ICC Chairman Taylor similarly noted:

> There is considerable question regarding the effectiveness of competition in the movement of metallurgical (met) coal to Western Europe. The U.S. supplies 55 percent of Western European met coal and is considered the "swing supplier." The

whether one component of the American export picture, railroads, have market power in relation to another component, coal producers and other shippers. Even if there is a "price cap" that prevents raising the delivered price of export coal, a railroad could still use monopoly power to raise rates to coal shippers and appropriate to itself an unreasonable portion of the profits generated by each shipment. Because of the cap, a captive shipper would be forced to lower its share of the total coal revenues if confronted with a rail rate increase. Although the existence of a world price cap for delivered U.S. coal means that foreign consumers will not have to pay a higher price, it does not assure that the division of revenues between the railroads and U.S. shippers will be a reasonable one. *See id.* at 600-601 (Chairman Taylor, dissenting).

[24]** B. *Geographic Competition*

In addition to the world market's constraining effect on rail pricing, ICC emphasized that geographic, intramodal, and intermodal competition would also constrain the practices of deregulated railroads. ICC began its analysis of geographic competition with an explanation of the regional nature of U.S. export coal production. "Eastern" coal is that mined in the Appalachian coal-field. Until 1979 the export coal industry centered around shipments of Appalachian metallurgical coal, but since that year's huge oil price increases steam coal export has also become important. *Id.* at 575. Eastern coal export includes both met and steam coal, and export production is mostly shipped to Europe. *Id.* at 577-579. "Midwestern" coal has a relatively high sulfur content and is mined in Ohio, Indiana, and Illinois. *Id.* at 577. ICC does not make clear to what use this coal is put when exported, but export production mostly goes to Europe as well. *Id.* at 579. [11] "Western" export coal includes coal from Colorado and Utah, where "small though increasing amounts" are sent to the Far East **[**25]** through West Coast ports. Coal from Wyoming's Powder River Basin, though there are vast tonnages, does not yet move for export because of its low BTU content. Prior to the 1979 oil price increase, virtually no western or Midwestern coal was exported. By the third quarter of 1981 these coals made up about 12 percent of total export coal traffic.

Generally, different rail carriers transport the export coals of different regions. In the East and Midwest two rail systems transport most of the export coal: the Norfolk & Western Railway Company and the Chessie System (which includes both the Baltimore & Ohio and the Chesapeake & Ohio). Conrail transports small amounts of eastern export coal. Other railroads operate in the West. *Id.* at 577-579. ICC's belief that **[**26]** to some degree competition between regions would act as a restraint on railroad power is premised on the notion that a foreign purchaser could purchase American coal from another American region if a price increased as a result of a railroad's raising prices. This would result in that railroad's loss of business just as if the purchaser had switched to the coal of another country. *Id.* at 579.

In support of its prediction the Commission cites the growth of western and Midwestern export sales between 1979 and 1981 and the fact that during the same period the eastern railroads' percentage share of nationwide export traffic dropped. As ICC concluded:

> **[*86]** Although generally western coal for export now moves only to the Pacific Rim countries and the primary export market for eastern and Midwestern coal is in Europe, competition among the regions appears to be growing. * * *

Id.

---

major alternative suppliers, Australia (labor problems), Poland (strikes and martial law), South Africa (political unrest and self-imposed quotas), and the U.S.S.R. are not considered reliable substitutes for U.S. coal.

Decision, supra note 1, 367 ICC at 600 n.78 (Chairman Taylor, dissenting).

[11] Petitioners made an issue of what the possible uses of Midwestern coal were. They offered evidence to show that it could not practicably be used as a substitute for either eastern steam coal or met coal. *See* note 15 *infra*.

The idea that regional competition could be a significant constraint on railroad practices was challenged below in Chairman Taylor's dissent. He and the petitioners complained that, by ignoring the differences between coal qualities, volumes, and costs that result **[**27]** in part from geographic distance, the Commission found significance where none could reasonably be found:

> Geographic and product competition within the United States is neither a counterbalance nor a solution to the problem. The coal producing regions of the U.S. do not compete with each other for most of the export market. According to the railroads' own testimony, the vast coal reserves now available in the Powder River Basin (Montana and Wyoming) are a very long distance from port (over 1,000 miles) and the coal in such reserves is not of export quality, because its energy value is less than 10,000 BTU's and it has a relatively high moisture content. [Midwestern coal] is not of met quality and has too much sulfur for all but a small part of the steam coal export market. Coal from Colorado, Utah, and New Mexico goes to Japan, where there appears to be some competition with eastern coal. However, these western reserves produce no met coal, and the delivered price to Japan of eastern steam coal is more than $20 per ton higher than the delivered price of [this western coal]. Therefore, competition between the two sources is minimal. Almost all of our steam and met **[**28]** coal exports to Europe move through Atlantic ports.

Id. at 602 (Chairman Taylor, dissenting).

C. *Intramodal Competition*

Although Chairman Taylor and petitioners argue strenuously that export coal producers are largely captive to particular railroads and would thus be subject to railroad market power, the Commission found that intramodal competition (*i.e.*, competition between railroads) would provide significant constraints on railroad practices.

ICC did agree to many of the facts that underlay Chairman Taylor's and petitioners' arguments. In the East "very few mines are located on the lines of more than one railroad." *Id.* at 577-578. And "export coal originated on the lines of an eastern rail carrier is generally transported in single-line service to that carrier's own export coal facility." *Id.* at 578. Deviations from single-line rail transit would bring into play joint or combination rates that would be substantially above the single-line rates. *Id.* at 577 n.19. In the West, "as in the East, individual mines are generally located on the lines of only one railroad." *Id.* at 579. **[**29]** For a variety of reasons, in spite of these facts ICC found that intermodal competition would be a significant restraint on railroad practices.

The Commission focused its analysis not on the individual mine but on an export coal "broker known as a transshipper." *Id.* at 571. Most export shipments are arranged by transshippers, which are very large companies that enter contracts with foreign purchasers, put together orders from a number of U.S. mines, and then arrange transportation. The mines may be owned by the transshipper or by other companies. *Id.* Because of the great size of the leading transshippers, and more importantly because they are free to fill their orders from mines on several rail lines, they have substantial bargaining power with respect to rail rates. *Id.* at 572. Their bargaining power may be even further heightened because many are owned by larger conglomerates that "may in some instances be able to exert leverage over particular railroad rates" as a result of other rail shipments with the railroad. *Id.*

ICC also argued that a large portion of export coal comes from mines owned by **[*87]** large coal companies, and **[**30]** that many of these companies own numerous mines located on different railroads. *Id.* at 578. Such a shipper's ability to shift production among its mines might allow it to pit one railroad against another and thus create intramodal competition to reduce a railroad's bargaining power. *Id.*

Again, the dissent and petitioners bitterly dispute the Commission's analysis and assert that the Commission failed to make certain inquiries necessary to its theory's validity and ignored significant evidence that would have called its theory into question. For example, Chairman Taylor first argued that the Commission ignored significant reasons to doubt that transshippers could sufficiently constrain railroads.

> The premise underlying the argument that export contracts can be freely filled from mines on more than one railroad is also unrealistic. First, export tonnage is frequently a blend of coal from several mines, and many

> times, some mines are on one railroad, some on another. Second, for a shipper to be able to substitute tonnage from a mine on a second railroad, certain conditions must be met, i.e., the tonnage must be available and not already committed to a **[**31]** long-term contract, the extraction costs must be relatively the same, and the tonnage from the second mine must be technologically substitutable for the tonnage from the first. Shippers point out that the chance for such substitution does not usually occur, especially since the Chessie hauls primarily met coal and the N & W primarily steam coal. [12] Third, there must be no price leadership, in that if one railroad raises its rates, the other will not, or at least not to the same level. It appears highly unlikely that all three of the foregoing conditions would coalesce, and even if they did, the advantage would accrue only to the particular shippers affected. The fact remains that 95% of the mines producing export coal are captive to the railroads that serve them.

Id. at 602. He then argued that the Commission's theory concerning the power of large shippers was similarly built on assumptions about the industry that ran counter to the evidence.

> The argument that big shippers can play one railroad against another (i.e., by substituting tonnage from mines served by more than one carrier) is still less convincing, even were one to ignore the problem **[**32]** of lack of substitutability [of particular coals]. When a shipper negotiates with a railroad, its corporate affiliation is less important than its access to alternate transportation. There are over 100 companies involved in the export coal trade. Although some of the shippers are large, with connections to still larger entities, only 24 percent of the mines served by the Chessie System and the N & W are controlled by operators having mines on both railroads. As for the West and the Midwest, there appears to be virtually no possibility of substitution between railroads at the present time.

Id. at 602-603.

[33]** D. *Intermodal Competition*

The Commission also concluded that deregulated railroads would have their market power constrained by competition with other modes of transportation. Three other modes are mentioned in the opinion: trucks, barges, and pipelines. The Commission noted, however, that truck and barge movement of export coal would not be feasible in the West. *Id.* at 579.

In support of its reliance on intermodal competition the Commission cites data showing that 13 percent of all coal production in the nation is transported by truck, *id.* at 578 & n.21, which demonstrates that **[*88]** trucks can successfully compete for short-haul movements of coal. [13] While mine-to-port traffic is usually long-haul, in the Commission's estimate trucks can "create[] the real potential for intermodal truck-barge or truck-rail movement to compete with an all-rail movement." *Id.* at 578.

[34]** To the extent a mine has access to inland waterways, ICC reasoned, barges can offer an alternative to rail carriage. This can result from a truck-barge combination or from direct access to waterways. The Commission offered statistics showing that "during the first 9 months of 1981, 17 percent of reported tidewater and coastal port shipments (nearly all of which is for export) was handled by inland water carriers." *Id.*

---

[12] According to a study submitted to the Commission on behalf of petitioners, the two major eastern railroads had to a great extent divided the export market between them according to coal type. Thus, in 1980, Norfolk & Western participated in shipping 93% of all eastern steam coal tonnage shipped for export, while Chessie participated in 13%. Chessie participated in shipping 81% of all met coal tonnage, while Norfolk & Western participated in 24%. *See* JA 994.

[13] It seems undisputed that the 13% figure refers to all coal produced, not just coal produced for export. *See* Decision, supra note 1, 367 ICC at 601 (Chairman Taylor, dissenting). Petitioners submitted evidence that less than 1% of export coal is transported to port by truck. CEA/NCA brief at 17 & n.**.

The last form of intermodal competition mentioned by the Commission is coal-slurry pipeline movement. There is no discussion of this, but at two point competitions from coal-slurry pipeline is referred to as being a "partial" or "potential" competitive restraint on railroad power. *Id.* at 589 n.42, 594.

Petitioners and the dissenter dispute most of the premises on which the Commission built the argument for intermodal competition. They first point out that, although the Commission refers to coal-slurry pipeline competition, no such pipeline exists in the United States, *see id.* at 601 (Chairman Taylor, dissenting), and petitioners argue that construction of one would require difficult-to-pass federal legislation.

Petitioners **[**35]** challenge the Commission's reliance on barge transport by arguing that ICC's 17 percent estimate of coal transported at least in part by barge neglects to note a number of important points: (1) The figure was submitted by the railroads and conflicts with a previous ICC estimate placing the figure at seven percent, CEA/NCA brief at 18 n.**. (2) Much of the coal traffic that was transported in part by barge was initially carried from the mine by the same railroad that would otherwise have taken it to port via single-line route. A railroad that serves the origin exclusively would thus have power to determine the extent of export barge traffic movement and its cost. [14] **[**36]** (3) Much of the barge-transported coal is high-sulfur Midwestern coal, which offers little competition to lower-sulfur eastern steam or met coal. [15] (4) Even if some mines are close enough to waterways to be able to use barges without initial reliance on a railroad, such a situation is quite rare.

Their reaction to the Commission's discussion of truck transport was to emphasize that coal is a commodity of sufficient bulk that "truck competition is not economically **[*89]** practical for large shipments **[**37]** or long distances." *Decision, supra, 367 ICC at 601* (Chairman Taylor, dissenting).

E. *The Commission's Discussion of Rail Pricing History*

After discussing these forms of competition, the Commission turned to the history of rail pricing of export coal shipments and concluded that that history supported the conclusion that the competitive factors in fact had constrained railroad pricing. Two arguments were relied on.

First, the Commission noted that no maximum rate complaints concerning export coal rates had been filed prior to 1980. "Moreover, the 1980 complaints appear to have been filed not because of any new railroad rate actions, but because section 229(b) of the Staggers Act provided that rates not challenged by a certain date would forever thereafter be conclusively presumed lawful." *Id.* at 580. In contrast to the pattern for domestic coal transport, where the railroads sought to test and expand the bounds of the rate standards -- thus generating many complaints -- export coal carriers "were content to raise their rates only in connection with general rate increases for all traffic[,]" and "indeed, the railroads 'flagged out' **[**38]** of several general rate increases on export coal." *Id.*

---

[14] Both petitioners and the dissenter note that, until complaints had been filed with ICC, eastern rail carriers, to discourage use of barges, had charged rates on export coal going to the Ohio River that were higher than the rates charged on export coal going to the railroads' Atlantic port facilities:

> Barge transportation [thus] almost always involves a prior movement by rail, which makes the railroad indispensable to the water carrier's ability to carry coal. * * * [Only] because the shippers and competing barge lines had recourse under the Interstate Commerce Act [did] the railroads drop[] their rates to the river to the domestic level.

Decision, supra note 1, 367 ICC at 601 (Chairman Taylor, dissenting).

[15] Although ICC did not explain its assertion that high-sulfur Midwestern coal was substitutable for other coals, Chairman Taylor argued that Midwestern coal "is not of met quality and has too much sulfur for all but a small part of the steam coal export market." *Decision, supra note 1, 367 ICC at 602* (Chairman Taylor, dissenting). Evidence submitted by petitioners supported this view. They contended that Midwestern coal cannot be substituted for met coal because of its sulfur content and cannot easily be substituted for steam coal in Europe because of European air pollution requirements that focus on coal quality. They argued that much of the coal exported from the Midwest is used in cement manufacture and thus is not in competition with higher quality steam and met coals. *See* CEA/NCA brief at 27 & n.* (*citing* studies at JA 876-878, 1130).

The Commission also compared the overall rise in coal prices and rail prices from 1969 to 1974, and from 1969 to 1981, and found that the comparisons showed "at a minimum that the unregulated shippers of export coal have considerable economic bargaining power in the contest over division of the economic rents from export coal. * * This history indicates that the pricing restraint of rail carriers was not the result of the exercise of regulatory power by this Commission, but rather resulted from the play of market forces." *Id.* at 580-581.

Again, the opponents of the decision have argued that the Commission has misused data and ignored relevant factors. They argue that the 1980 complaints concerning export rail rates have never been litigated by the Commission, were accompanied by evidence that rates were generating revenues 200%-300% above the railroads' variable costs, and thus are strong evidence of railroad market power and cannot be so lightly dismissed by the Commission. *See* CEA/NCA brief at 33-34. Moreover, they challenge ICC's history of railroad pricing because its figures emphasize pricing **[**39]** behavior before 1976 when rail rates were heavily regulated. [16] Figures limited to the period since 1976, they say, would show significant railroad market power. [17]

[40]** III. ICC's PREDICTIONS OF FUTURE RAILROAD BEHAVIOR AND ITS ANALYSIS OF THE EXEMPTION PROVISION'S LEGAL STANDARDS

The foregoing discussion summarizes ICC's evaluation of data concerning competitive forces that would limit deregulated railroads' ability to abuse market power or unreasonably raise rates. It also reflects the challenges made to this part of ICC's analysis. ICC and the railroad intervenors have in their briefs and at oral argument contended that the Commission, as an expert agency, was entitled to make the factual findings and analyses that it did and **[*90]** based on those findings to conclude that an exemption could be granted because market forces would sufficiently constrain railroads. Petitioners repeatedly assert that ICC's findings and analysis were counter to the evidence presented, ignored significant data and comments, and thus should be found arbitrary and capricious. The finding that market forces would *sufficiently* constrain railroad behavior, however, is only in part a question of analysis of data; it begs the question how much market constraint on railroad behavior is sufficient. Put another way: what must ICC find before an exemption is justified? **[**41]** This is a legal, not a factual, question, and it involves not so much an analysis of the factual record concerning the structure of the relevant industry, but an examination of precisely what ICC actually found, what legal standard ICC used, and an analysis of how that conforms to congressional intent and the reasoned decision-making requirement. When we examine ICC's explanation of the legal theory for its decision, however, we discover that much of the basis for ICC's decision to exempt export coal is only indirectly related to many of the competitive factors that it discussed at such length.

A. *ICC's Findings with Respect to the Existence of "Market Power" and the presence of "Effective Competition" and ICC's Predictions Concerning Price Discrimination by Railroads*

As discussed, ***HN3***[] the major shipper-protective limits on ICC exemption authority are *49 U.S.C. §§ 10101a(6)* and *10505(a)(2)(B) (1982)*. The former provision establishes that national railroad policy is "to maintain reasonable rates where there is an absence of effective competition" so long as railroads earn revenues "which exceed the

---

[16] In 1976 Congress enacted the Railroad Revitalization and Regulatory Reform Act of 1976 (4-R Act), Pub. L. No. 94-210, 90 STAT. 31 (1976). This forerunner of the Staggers Act was a significant lessening of regulation. In contrast, before 1976 "the ICC was charged with general superintendence of rates for transportation by rail. A 'just and reasonable' standard controlled all rates, rail users could challenge the reasonableness of rates, at any time, and the Commission had authority to determine what constituted a just and reasonable rate in each case." *Ford Motor Co. v. ICC, 230 U.S. App. D.C. 92, 714 F.2d 1157, 1158 (D.C. Cir. 1983)*.

[17] *See* joint reply brief of petitioner Eastern Coal Transportation Conference and intervenor-petitioner Coastal States Energy Company at 14 ("Far more probative is the record from 1976 to 1981 when, utilizing new rate freedoms granted by the 4-R Act, carrier rates on export metallurgical coal rose by 59.5%. During the same period, minehead prices for the same product *declined* by almost 9%." (emphasis in original)).

amount necessary to maintain the rail system and to **[**42]** attract capital." The latter limits the exemption power where regulation is necessary to "protect shippers from the abuse of market power."

We begin with our analysis by noting that ***HN4***[] the limits these provisions place on ICC's exemption power are met with a proper finding of an absence of "market power" and the presence of "effective competition." *See, e.g., Brae Corp. v. United States, supra*, 740 F.2d at , slip op. at 28 (Commission found no "market dominance"), *id.* at , slip op. at 33 (Commission found no "monopoly power by railroads"). In this case, however, ICC never explicitly reached a conclusion that the railroad system carrying export coal would face "effective competition" and lack "market power." Indeed, the Commission specified that "the issue is not whether deregulation will give the railroads *some* market power but whether we conclude that an exemption will result in abuse. * * * We point out that we may make a ['not needed to protect shippers from the abuse of market power'] finding even when there is no effective competition." *Decision, supra, 367 ICC at 592* (emphasis in original). [18]

[43]** ICC's predictions concerning future railroad pricing policies make even clearer that its exemption decision was not premised on either an implicit or an explicit finding of "no market power" or of "effective competition." ICC's discussion of how the railroads are likely to behave in an unregulated environment rested on the premise that unregulated railroads would be able and willing to price discriminate actively among coal shippers. Price differences would not **[*91]** simply reflect differing costs of providing transportation, but instead would reflect the availability to each shipper of transportation alternatives and each shipper's long-term marginal costs.

The regime of price discrimination envisioned by the Commission clearly assumes some significant degree of railroad monopoly power. First, it is well established that ***HN5***[] the ability of a firm to price discriminate is an indicator of significant monopoly power. *See, e.g.*, 2 P. AREEDA & D. TURNER, ***ANTITRUST LAW*** 342 ("Persistent price discrimination * * * clearly indicates * * * that there is a lack of effective competition in the market where the higher net returns are made. In other words, it shows that the seller has **[**44]** market power."); R. BORK, THE ANTITRUST PARADOX 395 (1978) (it is "essential" to " persistent or stable price discrimination in favor of specific customers" that a "seller possess[] * * * a substantial degree of market power or monopoly"); R. POSNER, ***ANTITRUST LAW*** 63 (1976) ("persistent discrimination is very good evidence of monopoly because it is inconsistent with a competitive market"); L. SULLIVAN, HANDBOOK OF THE LAW OF ANTITRUST 89 (1977) ("A firm will not discriminate unless it has market power."). Second, the way the Commission discussed its predictions of price discrimination makes clear that it assumed railroads would have some significant degree of monopoly power.

ICC's prediction of future price discrimination was, in part, framed as a response to the comments opposing the exemption filed by the Departments of State and Commerce, the petitioners, and National Economic Research Associates (NERA), a research firm that submitted an extensive economic study on petitioners' behalf. These groups raised most of the points already discussed concerning the likely inability of competitive factors to supply effective competition to export coal carriers. They concluded that an **[**45]** exemption would allow railroads to use monopoly power to raise rates substantially, and that that would reduce demand for U.S. coal abroad and thus reduce production levels. ICC summarized these arguments as follows:

> [They] believe that the railroads are[, because of the high proportion of shippers who are captive,] in a position to extract substantial premiums without fear of diverting traffic to other carriers. They fear that if export coal were deregulated the railroads would choose to raise rates to the point where a given volume will maximize revenues, even though some coal producers are excluded from the market and overall production is reduced.

---

[18] The Commission was correct in this assertion. The Conference Report makes clear that even where there is no effective competition constraining railroad market power an exemption may be proper if there will nevertheless be no abuse of market power. The kinds of situations envisioned, however, are not clear. The only one alluded to in the report is where other federal remedies would assure that market power will not be abused. *See* H.R. Conf. Rep. No. 96-1430, *supra note 7, at 105* ("The bill permits exemptions wherever regulation is not needed to prevent abuses of market power, regardless of the presence of effective competition. * * * The conferees anticipate that through the exemption process the Commission will eventually reduce its exercise of authority to instances where regulation is necessary to protect against abuses of market power where other federal remedies are inadequate for this purpose.").

> They perceive substantial potential for railroad abuse of market power and predict severely reduced coal exports and an overall decline in the Nation's prosperity.

Decision, supra, 367 ICC at 583; *see also id.* at 584.

The Commission's principal response was to assert that railroads would not price as would "simple monopolists" and reduce production levels. Instead, by price discrimination they could receive both monopoly revenues *and* maximized production. In the Commission's **[**46]** words:

> Opponents argue that railroads would accept the loss of some export coal since the loss would be more than offset for the railroads by an increased return on each ton of coal moved at higher rates. However, opponents' belief is the result of their mistaken assumption of uniform rate increases, *e.g.*, in the NERA model, the railroads are assumed to act like simple monopolists. A simple monopolist must accept the loss of one customer's business in order to raise prices to its other customers. The railroads, however, have persuaded us that they are not likely to act as simple monopolists but will price their services according to the cost and demand characteristics of each particular mine in order to retain the traffic. * * *

Id. at 592-593. [19] Indeed, the Commission attached an appendix to its decision where **[*92]** it analyzed the NERA study and offered as its major reason for not crediting it that "the NERA study is * * * based on a simple rather than a discriminating monopoly situation as discussed in the text." *Id.* at 615 (Appendix A).

[47]** ICC never explicitly found the presence of "effective competition." Moreover, its extensive discussion of the railroads' ability to sustain a regime of price discrimination based on shippers' long-term marginal costs and access to transportation alternatives, its description of such price discrimination as "a discriminating monopoly situation," and its emphasis on its authority to grant an exemption even if there would be market power and no effective competition, all make clear that ICC was not implicitly finding that these factors established a situation of effective competition. [20] Instead, ICC accepted a model of railroad price discrimination under which carriers -- because of the

---

[19] *See also Decision, supra note 1, 367 ICC at 587-588*:

> Exemption will free the railroads to maximize their revenues by pricing on the basis of market demand and each mine's long-run marginal cost (including a return on cost of capital). By charging some of their more price-sensitive mines a lower rate and keeping them in the market, the railroads will be able to increase their revenue above what they would realize by increasing prices uniformly, as they have done in the past.

(Footnote omitted.)

[20] Our discussion of price discrimination and our citation to ***antitrust law*** texts is, of course, not meant to imply that ICC's understanding of "effective competition" must "strictly conform" to ***antitrust law*** standards. *See* S. Conf. Rep. No. 94-595, 94th Cong., 2d Sess. 148 (1976) ("While the absence of effective competition test is not intended to strictly conform [*sic*] with the standards of the antitrust laws, it is intended that when the Commission administers the test it will recognize the absence of forces which normally govern competitive markets.") (report on the 4-R Act).

We also note that ICC's discussion of such competitive factors as geographic, intramodal, and intermodal competition did not attempt to analyze or define the degree to which these forces could actually provide shippers and receivers with substantial enough quantities of sufficiently substitutable goods or services at competitively practical prices. The absence of such relatively specific inquiries would seem to be another factor indicating that "effective competition" was not found. *See Market Dominance Determinations and Consideration of Product Competition, 365 ICC 118, 132-135 (1981)*.

What the Commission clearly did argue in its opinion was that market forces did establish "substantial" constraints on railroad behavior. But that is not in conflict with the existence of monopoly power. As a leading economics text explains, all firms, even the pur monopolist -- an entity which rarely exists in the real world -- are subject to limits established by market forces. The issue is how effective are the limits.

price cap for American coal in the world market -- would price within the constraint of not raising the delivered price of the coal, and thus could maximize their profits without reducing production. The method by which rates would be determined and revenues divided between shippers and railroads is explained as follows:

> If (1) the world market will tolerate a port price of $50 a ton, (2) a mineowner could produce the coal for $20 a ton, and (3) the railroad could haul it to the port for **[**48]** $20 a ton, then the available profit to be shared between the producer and the railroad would be $10 a ton. If the railroad **[*93]** has numerous alternatives and the coal producer has none, the railroad would be likely to receive much of the $10 a ton profit. Similarly, if the coal producer is the party with the opportunities to mitigate the adverse consequences of failure to agree, then the coal producer would receive much of the profit. In many instances, both parties will probably have some alternatives, and the division of the profit should be somewhere between these limits. Under all possible divisions of the available profit, the competitive price of $50 a ton would prevail in the marketplace, and there would be no effect on the volume of coal purchased or produced. * * *

Decision, supra, 367 ICC at 582.

[49]** Although this model of price discrimination explains how railroads might earn monopoly profits without lowering production, it says nothing about what the distribution of rents between shippers and carriers would be. All it says is that the division will be at a point between that at which the shipper only recovers its costs while the carrier recovers all rent and that at which the shipper recovers all rent while the carrier recovers only its costs. *See id.* at 595 ("the railroads will * * * set their rates in an area between an individual mine's long-run marginal cost of extraction at the current cost of capital and the world market price"). The precise point will be determined by the amount of transportation competition that does exist for any particular shipper within this basically monopolistic framework. The competitive factors that we earlier discussed thus again become important. The degree to which they are present in any given case will determine the distribution of rents between shipper and carrier.

We will return to the question of exactly what legal import the Commission has assigned to these competitive factors when we discuss the ICC's analysis **[**50]** of the "not needed to protect shippers from the abuse of market power" provision of *Section 10505(a)(2)(B)*. But first we turn to ICC's analysis of the provisions of the rail transportation policy, particularly the provision relating to "reasonable rates."

B. *ICC's Analysis of the Rail Transportation Policy and Particularly of Section 10101a(6)*

In order to grant an exemption ICC must find that the regulations to be lifted are "not necessary to carry out the transportation policy of [*49 U.S.C. § 10101a*]." *49 U.S.C. § 10505(a)(1) (1982)*. In its opinion ICC stated that it found that "continued regulation of export coal traffic is not needed to carry out any of the 15 elements of rail transportation policy set out in *49 U.S.C. 10101a*." *Decision, supra, 367 ICC at 586*. Although it discussed how the exemption would further a number of the policy provisions, it hardly mentioned the provision of the policy most

---

> The policies adopted by a pure monopolist are affected by certain indirect and potential forms of competition. Clearly, the monopolist is not completely insulated from the effects of actions taken in the rest of the economy. All commodities are rivals for the consumer's favor * * *. Clearly this rivalry occurs among different products, as well as among the producers of a given commodity. For example, meat competes in this sense with butter, eggs, and even men's suits. Of course, the extent of the competition from other products depends on the extent to which other products are substitutes for the monopolist's product. For example, even if a firm somehow could obtain a monopoly on the supply of steel in a particular market, it would still face considerable competition from producers of aluminum, plastics, and other materials that are reasonably good substitutes for steel.

E. MANSFIELD, MICROECONOMICS: THEORY AND APPLICATIONS 281 (3d ed. 1979).

Nor is there a conflict between ICC's predictions of future exercise of railroad monopoly power and its descriptions of past pricing behavior as being restrained by "the play of market forces." *Decision, supra note 1, 367 ICC at 581*. A close reading of its discussion of past pricing reveals that it states only that past behavior "is not the kind of behavior which we think characterizes entities exercising *unrestrained* market power." *Id.* at 580 (emphasis added).

clearly related to petitioners' claims, the provision that it is national policy "to maintain reasonable rates where there is an absence of effective competition and where rail **[**51]** rates provide revenues which exceed the amount necessary to maintain the rail system and to attract capital." *49 U.S.C. § 10101a(6) (1982)*. The Commission mentioned *Section 10101a(6)* only once in its opinion, and then in a footnote that implied that the provision was inapplicable.

The one mention of *Section 10101a(6)* came in response to shippers' citations to various parts of the legislative history that referred to the need for protecting "captive shippers," particularly coal shippers. The Commission's cryptic response was simply that

> export coal must be distinguished from domestic coal transportation. Export coal traffic is not the captive traffic for which Congress continued rate regulation. See *49 U.S.C. 10101a(6)*. Rather, as we discuss elsewhere in this report, this traffic is subject to vigorous and growing competition from the world market and other transportation modes and energy sources, and these forces will provide adequate restraints on rates.

Decision, supra, 367 ICC at 585 n.32.

This reference to *Section 10101a(6)* is troubling. The section is intended to **[*94]** protect **[**52]** shippers of any commodity where there is an absence of effective competition. Here, the Commission made no finding of effective competition. As discussed, such a finding would clearly have been in substantial tension with other language in the opinion. In spite of the assertedly "vigorous and growing" competitive restraints on the railroads' ratemaking power, the Commission predicted a regime of price discrimination that assumed railroad market power over shippers. Thus the Commission must still justify the exemption's consistency with *Section 10101a(6)*'s assurance of reasonable rates in the absence of effective competition. [21] **[**53]** What explanation there is appears in the Commission's more general analysis of the "abuse of market power" provision. [22]

C. *ICC's* **[**54]** *Analysis of the "Abuse of Market Power" Standard of Section 10505(a)(2)(B) and its Application to This Case*

Most of ICC's analysis of why continued regulation "is not needed to protect shippers from the abuse of market power" focused on the establishment of rail rates and the division of revenues between railroads and shippers under the predicted system of price discrimination. It is also where the Commission made clear its understanding of

---

[21] "Effective competition" is not only the standard for rate protection contained in *§ 10101a(6)*. It is also the standard in the rate provisions themselves. The Staggers Act withdrew ICC jurisdiction to regulate the rates of carriers who do not have "market dominance" over the relevant shipper. *49 U.S.C. § 10709(c) (1982)*. "Market dominance" was defined as "an absence of effective competition from other carriers or modes of transportation, for the traffic or movement to which a rate applies." *Id. § 10709(a)*. As we have said, the agency made no explicit or implicit finding of "effective competition."

[22] Although the reference discussed in text was the only reference to *§ 10101a(6)*, the failure to discuss the section explicitly is not in itself fatal. But the Commission must nonetheless offer reasoning that assures this court that *§ 10101a(6)*'s protection was properly considered and applied.

> The national transportation policy must guide the ICC in all its decisions. However, the ICC need not explicitly discuss in its decision each factor enumerated * * *. All that is necessary is that the essential basis of the ICC's rationale be clear enough so that a court can satisfy itself that the ICC has performed its function. * * *

Alamo Express, Inc. v. ICC, 673 F.2d 852, 860 (5th Cir.1982) (citations omitted).

An explanation of the exemption's conformity with the rate reasonableness policy is especially important here, where petitioners throughout their participation below emphasized their concerns for rate reasonableness and submitted substantial amounts of evidence to support their contention that rates will not be reasonable after exemption.

the "abuse of market power" concept as it applies to an exemption where market power does in fact exist. We look at this analysis to understand the Commission's conception of its responsibility to assure that reasonable rates will be maintained, and because we conclude that there was no proper consideration of the shipper protective limitations on the exemption power, we vacate the exemption granted in this case.

The Commission began its analysis of the "abuse of market power" concept by recalling that it had found that "strong worldwide competition" existed for export coal, and that American rail carriers could not by their unilateral action raise the delivered price that foreign users would pay. Given the Commission's expectation **[**55]** that the railroads were so constrained by the world price, the Commission asserted that

> the issue of the potential for market abuse by the railroads must be analyzed in the context of the question of whether the railroads will be able to appropriate all of the economic rents created by the difference in the costs for producing and shipping export coal and the world market price for that coal.

Decision, supra, 367 ICC at 592. It then went on to conclude that "the railroads will not price their services so as to reduce American coal production." *Id.* These two elements become, for the Commission, the standard under which it evaluates whether or not an exemption will result in an abuse **[*95]** of market power. In other words, so long as coal shippers are not forced to reduce production (*i.e.*, so long as the rail rate leaves them a share of the revenue that covers their costs, including their costs of capital) and so long as they are not wholly excluded from any economic rents above that level, their rate is "reasonable" and there is no "abuse of market power."

Use of this standard can be seen in the Commission's repeated equation of a **[**56]** situation of reasonable rates or the absence of market power abuse with the situation in which shippers recovered their costs and were thus able to maintain production levels and maybe even to acquire some economic rents. *See id.* at 587 (transshippers will have sufficient leverage "to prevent the railroads from appropriating all the rents"); *id.* at 593 (railroads will not "raise rates to the point where the traffic stops moving"); *id.* (rate increases are unlikely to be so high as "to reduce the volume of export coal significantly or to force the mineowners into a situation where their return on investment would be inadequate"); *id.* (railroads will not "appropriate all the economic rents"); *id.* at 594 (railroad will not abuse its market position by "raising rates to the point where the traffic stops").

One aspect of this standard is crucial: It is a standard which, in effect, views the distribution of economic rents between carriers with market power and shippers to be largely a matter of regulatory indifference, so long as shippers get some bare minimum. Other than assuring that production will not decline and that **[**57]** "all" rents will not go to the carriers, the Commission only assures that "economic rent will be divided in accordance with the relative bargaining power of the parties involved in particular cases. In some cases the shipper will have leverage; the converse will be true in others." *Id.* at 595 n.67. This regulatory indifference was viewed as proper, in spite of the fact that the situation envisioned would be one in which market power would exist and indeed determine the distribution of rents. As the Commission had stated, "Coal rates in an exempt environment will reflect the interplay of the economic strengths of all parties. That result is, we believe, exactly what Congress meant when it enjoined us in the [national transportation policy] to allow 'to the maximum extent possible' competition and demand for services to establish rail rates." *Id.* at 587.

It is important to note the role, within the Commission's legal argument, played by some of the competitive factors discussed at such length earlier in the opinion. In particular, such factors as geographic, intramodal, and intermodal competition provide the parties with the bargaining power **[**58]** that will determine the division of economic rents between them. But because the Commission views almost all divisions as consistent with the policies of the Act, so long as shippers are not deprived of all rents, the legal importance of these factors seems very slight. Although the Commission, throughout its opinion, continues to insist in general terms that these competitive forces will give shippers substantial bargaining power and thus constrain railroads and assure reasonable rates, it simultaneously voices a standard under which any shipper bargaining power, over a bare minimum, is legally sufficient. We will return to evaluate the Commission's reliance on these competitive forces after evaluating the legal validity of the standard used by the Commission.

D. *The Legal Validity of the ICC's Understanding of the Statute's Protection for Shippers*

We vacate the Commission's exemption decision because the stated standard is a wholly unreasonable construction of the Staggers Act's accommodation between shipper and carrier interests. The concept of rate reasonableness in the Act is a complex one and one whose precise definition was generally left to ICC. Nevertheless, **[**59]** it is clear that Congress did intend for the concept to embody certain considerations, and that the division of revenues between monopolistic carriers and shippers (even when the shipper is still able to fully recover **[*96]** its costs) was certainly not a matter of regulatory indifference.

We take the Commission, in evaluating the exemption according to the standard we discussed, to be articulating a construction of the statutory phrase "abuse of market power." We also take that phrase to include within it *Section 10101a(6)*'s reasonable rate policy. We recognize that ***HN6***[] " considerable weight should be accorded to an [agency's] construction of a statutory scheme it is entrusted to administer[.]" *Chevron, U.S.A., Inc. v. Natural Resources Defense Council, Inc., 467 U.S. 837, , 104 S. Ct. 2778, 2782, 81 L. Ed. 2d 694 (1984)*. This is especially so where the agency is assigned to formulate a policy accommodating competing policies or interests. But there are limits to our deference. "If [the agency's] notice represents a reasonable accommodation of conflicting policies that were committed to the agency's care by the statute, we should not disturb **[**60]** it unless it appears from the statute or its legislative history that the accommodation is not one that Congress would have sanctioned." *Id., 467 U.S. at , 104 S. Ct. at 2783*, *quoting* *United States v. Shimer, 367 U.S. 374, 383, 6 L. Ed. 2d 908, 81 S. Ct. 1554 (1961)*. Here we admit that the Commission has substantial discretion as to how to carry out Congress' instruction concerning the accommodation of shipper and rail carrier interests; but wherever the bounds of its discretion are, we have no doubt that the agency's accommodation, as announced and applied in this case, "is not one that Congress would have sanctioned." Because of the newness and complexity of the statutory scheme, and because the agency has given us little help in interpreting the statute, [23] we will concentrate on only what we feel is the most obvious flaw in the agency's position.

[61]** The legislative history of the Staggers Act is filled with references to the need to reduce rail regulation, and two reasons were repeatedly cited: regulations had often become unnecessary for protection of shippers and the public because of the development of effective competition to rail carriage, and inefficient because they had deprived railroads of the ability to earn adequate revenues to attract the capital necessary for economic health. These concerns were what motivated Congress' deregulatory moves, and the record and legislation is filled with references to these concerns both as the reasons for deregulation *and as the limits of deregulation*.

This can easily be seen in the wording of Section 1010a(6) which adopts a policy of affirmatively seeking maintenance of reasonable rates (1) "where there is an absence of effective competition," and (2) "where rail rates provide revenues which exceed the amount necessary to maintain the rail system and to attract capital." But the same interplay of concerns can be seen throughout the structure of rate regulation in the Act, a structure we will briefly summarize.

Most of the rate provisions that seek to assure carrier freedom **[**62]** do so in the name of either effective competition or carrier revenue needs. Thus ICC has no jurisdiction to find a rate unreasonable unless it first finds that the carrier has "market dominance," *49 U.S.C. § 10709 (c) (1982)*, a term defined as "an absence of effective competition from other carriers or modes of transportation, for the traffic or movement to which a rate applies." *Id. § 10709(a)*. Jurisdiction was further limited **[*97]** on the basis of a carrier's revenue needs. The Act established a presumption of no market dominance where a carrier's revenues from the rate would exceed its variable costs by

[23] Although the agency announced a standard concerning the "abuse of market power" provision, it did little to explain, in terms of the statute's language, structure, or history, why the concerns for protecting shippers from carrier monopoly power were met by that standard. In light of this absence of explanation, we note "that the limit placed on the judicial role by an agency's interpretation of a statute 'assumes an adequately articulated administrative decision interpreting the relevant statutory law within a range of reasonableness.'" *Northern Colorado Water Conservancy District v. FERC, 235 U.S. App. D.C. 79, 730 F.2d 1509, 1517 (D.C. Cir. 1984)*, *quoting* *Obremski v. OPM, 226 U.S. App. D.C. 111, 699 F.2d 1263, 1269 (D.C. Cir. 1983)*; *see also* *FEC v. Democratic Senatorial Campaign Committee, 454 U.S. 27, 37, 70 L. Ed. 2d 23, 102 S. Ct. 38 (1981)* ("the thoroughness, validity, and consistency of an agency's reasoning are factors that bear upon the amount of deference to be given an agency's ruling").

less than a designated percentage. *Id.* *§ 10709(d)*. Even if a carrier is found to be market dominant, there are congressionally provided for zones of rate flexibility based, once again, on revenue adequacy. Within them rates can be increased if a carrier's revenues are found to be inadequate. *Id.* *§ 10707a*. *See generally* *Arkansas Power & Light Co. v. ICC, 233 U.S. App. D.C. 189, 725 F.2d 716, 719 (D.C. Cir. 1984)*.

These provisions mirror ICC's traditional justifications for allowing carriers with market power **[**63]** some degree of price discrimination against captive shippers. Use of market power is justified where needed for revenue adequacy.

> The theory of differential pricing is that rates on some rail services must be set above full cost to compensate for services on which railroads are required to price below full cost to remain competitive.

Id. at 718 n.3; *see also* *San Antonio, Texas v. United States, 203 U.S. App. D.C. 249, 631 F.2d 831, 852 (D.C. Cir. 1980)*; *Houston Lighting & Power Co. v. United States, 196 U.S. App. D.C. 224, 606 F.2d 1131, 1148 (D.C. Cir. 1979)*, *cert. denied*, *444 U.S. 1073, 62 L. Ed. 2d 755, 100 S. Ct. 1019 (1980)*.

The statutory scheme's link between revenue needs and rate freedom also, however, serves to limit the rate freedom of rail carriers with market power. As the Conference Report explained, "When the industry is earning revenues which are adequate, it is appropriate for the Commission to have the authority to review rate increases more carefully." H.R. Conf. Rep. No. 96-1430, *supra, at 91*. Concern for limiting the rate freedom of carriers with market dominance also appears in the **[**64]** Long-Cannon Amendment to the Staggers Act, which directs ICC to consider, in determining whether to investigate certain rates.

> (i) the amount of traffic which is transported at revenues which do not contribute to going concern value and efforts made to minimize such traffic; [and]
> (ii) the amount of traffic which contributes only marginally to fixed costs and the extent to which, if any, rates on such traffic can be changed to maximize the revenues from such traffic[.]

49 U.S.C. § 10707a(e)(2)(B) (1982). The same factors are to be considered in rate reasonableness determinations. *Id.* *§ 10707a(e)(2)(C)*. The underlying logic of these instructions is that monopolistic discrimination should not be used to generate funds that could more efficiently and equitably be recovered elsewhere. The provision certainly assumes that the degree to which a monopolistic carrier will be able to extract rents from a captive shipper will be in some way limited by the carrier's revenue needs.

> The drafters * * * were primarily concerned about shippers of coal and other so-called "captive" shippers, and the amendment sought to assure that rate **[**65]** flexibility would not result in such shippers bearing a disproportionate share of responsibility for the needed improvement in the railroads' financial position. * * *

Arkansas Power & Light Co., 365 ICC 983, 988 (1982). [24]

Elsewhere in *Section 10707a* the idea that revenue needs were not only a justification for rate flexibility but also a limit on monopolistic pricing was made even clearer. In considering challenges to the reasonableness of certain authorized rate increases, **[**66]** the Commission was ordered to "give due consideration to whether the carrier proposing the rate increase has attained **[*98]** adequate revenues, * * * *giving regard to preventing a carrier with adequate revenues from realizing excessive profits on the traffic involved* * * *." *49 U.S.C. § 10707a(e)(1)* (emphasis added). Indeed, the Conference Report expresses an even stronger concern for monopolistic rail carriers extracting "excessive profits" when it declares that "this language is not intended to imply that excessive profits for inadequate revenue carriers are reasonable." H.R. Conf. Rep. No. 96-1430, *supra, at 94*.

---

[24] Just as the drafters were concerned with such equitable concerns regarding captive shippers, they were also concerned with disproportionately burdening, as a class, the shippers of any particular captive commodity. Thus the Act requires rate reasonableness determinations to include consideration of "the carrier's mix of rail traffic to determine whether one commodity is paying an unreasonable share of the carrier's overall revenues." *49 U.S.C. § 10707a(e)(2)(C)(iii) (1982)*.

HN7[] The rate reasonableness provision of Section 10101a(6) and the "abuse of market power" provision of Section 10505(a)(2)(B) should be read as reflecting the policies of the statutory scheme of which they are a part. It is unreasonable to view a statutory scheme that allows shippers to complain that a market dominant carrier is charging rates that unnecessarily generate excessive profits as being indifferent concerning the distribution of economic rents between monopolistic carriers and their captive shippers. Similarly, such an indifference **[**67]** seems incompatible with a scheme that allows a shipper to complain that its higher rate is unjustified because necessary carrier revenues could be more equitably generated elsewhere on the carrier's system. Protecting the revenues of shippers who face carriers with market power was an essential goal, though not the only goal, of the compromise that produced the Staggers Act.

ICC rested its standard, in part, on Section 10101a(1) of the rail transportation policy, which speaks of establishing reasonable rates "to the maximum extent possible" through reliance on "competition and the demand for services." *See* Decision, supra, 367 ICC at 587. But this must be read in conformity with the other provisions and policies of the Act. HN8[] Though competitive forces may exist and somewhat constrain railroad power, when they nevertheless do not rise to the level of "effective competition" ICC must explain why reliance on them is sufficient to protect those interests of shippers protected in the Act and alluded to in the policy declarations of Sections 10101a (6) and 10505(a)(2)(B). The standard that it put forth to do this here was not a reasonable one.

ICC also made reference **[**68]** to the policy of promoting railroad revenue adequacy. *See id.* at 587-588. But it saw this duty as the equivalent of maximizing railroad revenue. Again, this fails to accept that the Act was a compromise, recognizing shippers' as well as carriers' interests. It here sought to maximize railroad revenue with no reference to the actual revenue needs of the carriers involved or the size of the revenue gains they would likely receive from the exemption, or the degree to which needed revenue gains would be disproportionately subsidized by one group.

The only protection that ICC recognized as a legal duty to provide shippers was to assure that rail rates would not prevent shippers' full cost recovery and would not totally exclude them from the division of economic rents. This was unreasonable and accordingly it is a basis for vacating the exemption.

E. *The Importance of Geographic, Intramodal, and Intermodal Competition*

Much of the debate in the briefs and at oral argument focused on the Commission's adoption of certain data to determine that significant geographic, intramodal, and intermodal competition would constrain railroad behavior. We discussed this **[**69]** in detail in Part II *supra*. We have not, however, reached specific conclusions on these challenges. We can instead, for a number of reasons, generally reject the Commission's assertion that these competitive factors justify the exemption.

First, the legal importance that the Commission attributed to these factors is not clear. Although the Commission repeatedly referred to these factors as substantial restraints on railroad behavior that made regulation unnecessary, it did not find that, as a result, the railroads lacked market power. Moreover, within the legal standard **[*99]** used by the Commission these factors play a minimal role. The exemption is justified, said the Commission, so long as production is not reduced and some economic rents go to shippers. In its view production would not decline because of the world price cap and the self-interest of the price-discriminating monopolist, so the only significance of the other competitive factors would be to determine the division of rents between shippers and carriers. It is uncontroversial that *some* rents will go to shippers, and above that level, the Commission seemed to believe, the distribution is legally unimportant. **[**70]** Thus the legal importance of these competitive factors would be minimal in spite of the Commission's repeated references to them.

One might argue, however, that when the Commission discussed the standard on which the exemption was based, it was doing so within the understanding that the division of rents would, because of these competitive factors, equal some undisclosed balance that would constitute a condition of reasonable rates and nonabuse of market power. Indeed, the Commission repeatedly referred to these factors when it asserted this conclusion. Except for its discussion of the standard we have rejected, however, the Commission never attempted to explain in nonconclusory terms how much competition was necessary, or what condition would constitute one of reasonable rates and nonabuse of market power. Thus such an argument cannot save the exemption. ***HN9***[] An agency cannot hide the standards under which it operates, for we are unable to evaluate whether its reasoning meets the reasoned decision-making requirement unless we know against what standards its factual findings have been judged. *See* *Environmental Defense Fund, Inc. v. Ruckelshaus, 142 U.S. App. D.C. 74, 439 F.2d 584, 596 (D.C. Cir.1971).* **[**71]**

CONCLUSION

As we have discussed, the Commission's opinion predicts a pricing regime in which there will not be an absence of market power with respect to shippers. Indeed, the regime is premised on the railroads' use of market power. Nevertheless, the Commission predicts that railroad behavior will not constitute "abuse of market power," as it understands the phrase. We have found the Commission's understanding of that statutory phrase to be unreasonable in that it largely ignores the protections Congress meant to guarantee to shippers. We thus hold the Commission's grant of the exemption petition to have been not in accordance with law. We vacate the Commission's decision and order, and we remand the case to the Commission for any further proceedings that may be appropriate.

So ordered.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

HN2[] Tying Arrangements, Defenses

A plaintiff must make three important demonstrations in order to establish a per se illegal tying arrangement: (1) two separate products with the sale of one conditioned on the purchase of the other; (2) a seller with sufficient economic leverage in the tying market to appreciably restrain competition in the tied product market; and (3) a tie-in affecting a not insubstantial amount of interstate commerce. A suggested additional requirement requires that a plaintiff demonstrate that some "modicum of coercion" be exerted upon the purchaser of the tied product by the seller of the tying product. If the plaintiff establishes the above elements, defendant may defend itself "by an affirmative showing of business justification."

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN3[] Price Fixing & Restraints of Trade, Tying Arrangements

Under whatever rubric, coercion is a necessary element of an illegal tying arrangement.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

HN4[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

In order to prove a per se tying arrangement, the likelihood of some coercion must be shown and ordinarily if the purchaser must purchase the tied product in order to get the tying product and the seller has market power in the tying product coercion may be presumed.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN5[] Price Fixing & Restraints of Trade, Tying Arrangements

With respect to the "function of the aggregate" test, separateness is determined in part by whether the products are normally sold or used as a unit and whether their joint sale effects savings beyond those of combined marketing. The critical factor is the extent to which a producer's offerings are in response to independently structured consumer demand. The two-product inquiry is defined as whether there is a "sufficient demand" for the purchase of the tied product separate from the tying product to identify a distinct product market in which it is efficient to offer the two separately.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN6[] Price Fixing & Restraints of Trade, Tying Arrangements

No tying arrangement exists unless it is also demonstrated that the purchase of the tying product is conditioned on the purchase of the tied product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN7[] Price Fixing & Restraints of Trade, Tying Arrangements

Evidence that tying language in a contract was actually enforced is not necessary to show a tie-in unless the contract itself does not demonstrate a formal tying agreement.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN8[] Price Fixing & Restraints of Trade, Tying Arrangements

The second factor in determining the existence of a per se illegal tying arrangement is whether the seller has some special ability -- usually called market power -- to force a purchaser to do something that he would not do in a competitive market. The use of a per se standard is, indeed, appropriate only if the existence of forcing is probable, i.e., there exists a substantial potential for impact on competition resulting from the economic power of the seller. This standard can be met if the plaintiff makes one of the following showings: (1) the seller has a high share of the tying product market; (2) the tying product is a unique product that the seller's competitors are not able to offer; and (3) a substantial number of consumers have accepted the tie-in and no factor other than the economic power of the seller explains that acceptance.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN9[] Price Fixing & Restraints of Trade, Tying Arrangements

A showing of uniqueness is made by the plaintiff if it can show that the alleged tying product is sufficiently unique to give defendant a competitive advantage in the tying product market. If the tying product is sufficiently desirable to consumers or is a product not easily replicated or commonly available, then the producer of the tying product is likely to have sufficient leverage to restrain the tied product market. Some courts hold that this demonstration can be made when a seller has economic power by virtue of a patent or a copyright in the tying product. Although the ownership of a trademark is not conclusive of economic power, some courts hold that a franchisor's trademark control over a common product confers sufficient economic power to establish a tie.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN10[] Price Fixing & Restraints of Trade, Tying Arrangements

The uniqueness showing with respect to allegedly tied product can be made whenever there are some buyers who find a seller's product uniquely attractive, and are therefore willing to pay a premium above the price for the nearest substitute.The concern is not with the restraint on competition in the tying product but on competition in the market for the tied product. What is required is not monopoly power in the tying product market, but only sufficient power to enable the seller to restrict competition in the tied product. If a seller's product is distinctive, not available from other sources, and sufficiently attractive to some buyers to enable the seller by tying arrangements to foreclose a part of the market for a tied product, the adverse impact on competition in the tied product is not diminished by the fact that other sellers may be selling products similar to the tying product.

HN14[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

A defendant can excuse itself from an otherwise per se illegal tying arrangement if it can demonstrate the existence of a business justification. The defendant bears the burden of proving that justification.

Opinion

[*1508] OPINION AND ORDER

This is an antitrust action, presently before the court on cross-motions for summary judgment. Plaintiff The Mozart Company, successor in interest to Eurasian Automotive Products, Inc., a wholesale automotive parts distributor, brought suit against defendant Mercedes-Benz of North America ("MBNA") alleging violations of *§§ 1* and *2* of the Sherman Act and § 3 of the Clayton Act, *15 U.S.C. §§ 1*, *2*, and *14*. Mozart contends that provisions of the Dealer Agreement between MBNA and each Mercedes-Benz franchised dealer constitute a per se tying violation of *15 U.S.C. §§ 1* and *14*. Plaintiff alleges additionally that MBNA conspired with the franchised dealers to boycott independent replacement parts distributors, such as Eurasian, in further violation of *§ 1*, and also attempted to monopolize the sale in the United States of replacement parts usable in Mercedes automobiles in violation of *§ 2*. **[**2]** Defendant objects to the use of a per se rule and argues that a rule of reason standard should apply in this case. Since, according to defendant, the evidence Mozart has introduced concerning MBNA's alleged conduct involving threats, coercion and intimidation would be insufficient to permit plaintiff to prevail under a rule of reason standard, defendant's motion for summary judgment should be granted.

This court has had previous occasion to deal with most of the issues raised in this litigation. In *United States v. Mercedes-Benz of North America, Inc., 517 F. Supp. 1369 (N.D. Cal. 1981)* ("*MBNA*"), after detailed consideration of the arguments raised by both parties, the court held that ***HN1***[] the per se standard applied. It then proceeded to deny both the government's and MBNA's motions for summary judgment and ordered the case to proceed to trial on "the issue of defendant's economic power and, if that be established, whether defendant can demonstrate sufficient business justification for a tying arrangement." *Id. at 1373*. At the same time, the court held that no factual dispute existed as to whether the Mercedes-Benz automobile and Mercedes replacement parts were two separate **[**3]** products tied together by the MBNA Dealer Agreement, or whether the agreement affected a not insubstantial amount of interstate commerce. *Id. at 1391*.

[*1509] Other courts have also considered tying arrangement claims brought against MBNA. In *IAP, Inc. v. Mercedes-Benz of North America, Inc., 571 F. Supp. 262 (D.N.J. 1983)* ("*IAP*"), the court went on at some length about the history of automobile production in general and the manufacture of replacement parts in particular. *Id. at 265-67*. It then cited *Pick Mfg. Co. v. General Motors Corp., 80 F.2d 641 (7th Cir.)*, *aff'd per curiam*, *299 U.S. 3, 57 S. Ct. 1, 81 L. Ed. 4 (1936)*, which held that since "the preservation of the good will of the public is directly involved," General Motors did not violate § 3 of the Clayton Act by requiring Chevrolet and Buick dealerships to sell only genuine GM replacement parts or parts authorized by *GM. 80 F.2d at 643-44*. According to the *IAP* court, *Pick* created an automobile replacement parts "exception" to ***antitrust law*** that, in essence, forecloses any tying claim of this sort against any automobile manufacturer. *571 F. Supp. at 167-68*. [1]

[4]** In another action against Mercedes, *Metrix Warehouse, Inc. v. Daimler-Benz A.G., 1982-2 Trade Case (CCH) P 64,861 (D. Md. 1982)* ("*Metrix I*"), the court denied both parties' motions for summary judgment for substantially the same reasons as this court did in *MBNA*. *Id*. at 72,280. Following the decision in *IAP*, however, the *Metrix* court reconsidered its earlier opinion, concluded that *Pick* was controlling precedent, and granted summary judgment in favor of Daimler-Benz and MBNA. *Metrix Warehouse, Inc. v. Daimler-Benz A.G., 1984-1 Trade Cas. (CCH) P 65,766 (D. Md. 1982)* ("*Metrix II*"). Then, following the opinion of the Supreme Court in *Jefferson Parish Hospital Dist. No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)* ("*Hyde*"), the court determined that its second opinion in the case had been "premature," concluded that *Hyde* showed the notion of a *Pick* exception to be untenable, vacated *Metrix II*, and reinstated *Metrix I*. *Metrix Warehouse, Inc. v. Daimler-Benz A.G.*, No. N 79-2066 (D. Md. June 11, 1984) ("*Metrix III*").

---

[1] The specific issue before the *IAP* court was whether plaintiffs, instead of meeting defendant's motion for summary judgment, could dismiss their complaint with prejudice to themselves and without costs, but without prejudice to members of a purported class of plaintiffs which they attempted to have certified. *517 F. Supp. at 263-65*. The court determined, *inter alia*, that since defendant had gone to great expense and trouble to prepare its motion for summary judgment, and plaintiffs had never met that motion as required by the Rules of Civil Procedure, defendant's motion for summary judgment would be granted. *Id. at 269-70*. The court's discussion of the nature of plaintiffs' claim and the *Pick* "exception" was therefore unnecessary in deciding the issue before it.

Now this court must decide once again whether summary judgment should be in favor of or against **[**5]** MBNA. After thorough consideration of the extensive documentary evidence, memoranda, and oral argument presented by both parties, the court has concluded that it must deny both motions for summary judgment. The court has found no reason to disturb its previous determination that a per se standard should be used to test the alleged tying violation at issue here. It also remains clear that Mercedes-Benz automobiles and Mercedes replacement parts are two separate products tied together by the MBNA Dealer Agreement, and that this arrangement affects a not insubstantial amount of interstate commerce. Substantial factual disputes exist regarding whether MBNA had sufficient economic power to coerce its dealers into the tying arrangement and a conspiracy to boycott, and, if that is demonstrated, whether MBNA had sufficient business justification for its conduct. There is also dispute regarding the issue of MBNA's attempt to monopolize the sale of Mercedes replacement parts.

I. *Factual Background* [2]

[6]** Defendant MBNA, since 1965 the exclusive United States distributor of Mercedes-Benz automobiles, markets its passenger cars and genuine and approved replacement **[*1510]** parts through approximately 400 franchised dealerships. [3] **[**7]** Each dealer becomes party to a standard written Dealer Agreement, the second part of which contains numerous "Standard Provisions." Paragraph 9C of that part of the agreement provides:

> Dealer shall neither sell or offer to sell for use in connection with MB passenger cars nor use in the repair or servicing of MB passenger cars any parts other than genuine MB parts or parts expressly approved by DBAG if such parts are necessary to the mechanical operation of such MB passenger cars.

Part one of the Dealer Agreement defines "MB parts" as "parts, accessories, components, assemblies, and optional equipment for MB passenger cars supplied by MBNA, DBAG, [4] or DBNA." [5]

Plaintiff rests its claim of a per se illegal tying arrangement on Paragraph 9C quoted above. Mozart contends further that in connection with this arrangement MBNA coerced its dealers into a conspiracy to boycott all independent replacement parts distributors, such as Eurasian Automotive Products, and also attempted to monopolize the sale of Mercedes replacement parts in the United States.

II. *The Applicable Standard*

In *MBNA*, defendant's primary arguments in favor of its own motion for summary judgment were that "because of the nature of its franchise [arrangements], per se tying standards are inapplicable and that a rule of reason is the appropriate standard for determining restraint of trade." *517 F. Supp. at 1374*. Even though this court determined in that action that a per se tying standard did indeed apply, MBNA repeats the same argument in this proceeding, contending **[**8]** that the cases of *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)* and *Jefferson Parish Hospital Dist. v. Hyde, supra*, plus a series of franchise/trademark cases decided by the Court of Appeals for the Ninth Circuit, compel a different result. According to Mercedes, these cases, taken together, stand for the proposition that tying arrangements are not per se illegal unless they are imposed upon the ultimate consumer. This means, contends defendant, that the law of tying essentially has no application to exclusive dealing arrangements between franchisors and franchisees. These remarkable conclusions do not find support in the authority MBNA cites. Neither *GTE Sylvania* nor *Hyde* provides a basis for the argument that a per se standard should not apply in this case, and the Ninth Circuit cases relied upon only support the theory

---

[2] For a more detailed discussion of MBNA's operational structure and parts distribution system, see this court's opinion in *United States v. Mercedes-Benz of North America, Inc., 517 F. Supp. 1369, 1373-74 (N.D. Cal. 1981)*.

[3] This case deals only with replacement parts. It is not argued nor could it be that parts for original use are separate products. Furthermore plaintiff's claim does not involve warranty parts. (Pl.'s Mem. Supp. Summ. Judgment, at 48; Pl.'s Reply Mem., at 23).

[4] Daimler-Benz A.G., the manufacturer of Mercedes automobiles, trucks, and other vehicles, and their replacement parts.

[5] Daimler-Benz of North America, Inc., the exclusive United States importer of DBAG products.

that MBNA "may condition the sale of the passenger *car* on use of the Mercedes-Benz trademark." *MBNA, 517 F. Supp. at 1374* (emphasis in original). [6]

[9]** As this court pointed out in *MBNA, GTE Sylvania* essentially overruled *United States v. Arnold, Schwinn & Co., 388 U.S. 365, 18 L. Ed. 2d 1249, 87 S. Ct. 1856 (1967)* and criticized the *Schwinn* court for departing from a long line of authority treating vertical restrictions as subject to the rule of reason and for adopting the per se rule without performing the analysis required **[*1511]** by *Northern Pacific Railway Co. v. United States, 356 U.S. 1, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*. While some may have believed *GTE Sylvania* argued the Supreme Court's abandonment of the per se rule, *Hyde* certainly has dispelled that notion insofar as tying arrangements are concerned. Unlike its observation in *GTE Sylvania* that some vertical restrictions have an economic benefit, the court in *Hyde*, using a *Northern Pacific* analysis, announced its continuing belief that most tying arrangements are inherently anticompetitive. [7] Furthermore, application of the per se rule to tying arrangements has a thirty-seven year history. By contrast the per se rule was short-lived in vertical restriction cases. Moreover, the reasoning of the *GTE Sylvania* opinion gives **[**10]** no hint that the per se rule "long . . . applied to tying arrangements because of 'their pernicious effect on competition and lack of any redeeming virtue'" was no longer to be applied to those cases. *MBNA, 517 F. Supp. at 1377* (quoting *Northern Pacific Ry. Co., 356 U.S. at 5*). Defendant's assertion that *GTE Sylvania* somehow upsets established tying law is therefore clearly without foundation.

Mercedes nevertheless contends that *Hyde* all but forecloses the use of a per se standard in tying cases. The case holds, according to defendant, that a per se standard **[**11]** can be used only if the alleged tying arrangement is shown, through market analysis, to impose an actual restraint on the ultimate consumer's freedom of choice.

This argument mischaracterizes the holding and reasoning of the case. [8] In fact the court could not have made it clearer: "It is far too late in the history of our antitrust jurisprudence to question the proposition that certain tying arrangements pose an unacceptable risk of stifling competition and are therefore unreasonable 'per se. '" *104 S. Ct. at 1556*. The essential characteristic of such an arrangement, the Court continued, is the seller's power to "force" a purchaser to do what he would not do in a purely competitive market. When it is "probable" that a consumer would be "forced" into the purchase of the tied product because of the seller's "market power" in the tying product market, per se condemnation, which is by definition "condemnation without inquiry into actual market conditions," is warranted with respect to the arrangement. *Id. at 1558-60*. Such market power can be demonstrated, the Court noted, by a showing that the "seller's share of the market is high" or by evidence that he "offers a unique product **[**12]** that competitors are not able to offer. . . ." *Id. at 1560-61*. The alleged tying arrangement at issue in *Hyde* was an exclusive contract between the hospital and a firm of anesthesiologists that provided for all anesthesiological services offered by the hospital to be performed by the firm. *Id. at 1554-56*. Because there was no showing that the hospital had any probable forcing power in the tying product market of hospital services, the per se standard was not applicable in that case. *Id. at 1561-67*.

---

[6] These cases, *California Glazed Products, Inc. v. Burns & Russell Co., 708 F.2d 1423 (9th Cir.)* *cert. denied*, ***464 U.S. 938, 104 S. Ct. 348, 78 L. Ed. 2d 314 (1983)***; *Klamath-Lake Pharmaceutical Ass'n v. Klamath Medical Service Bureau, 701 F.2d 1276 (9th Cir.)* *cert. denied*, **464 U.S. 822, 104 S. Ct. 88, 78 L. Ed. 2d 96 (1983)**; *Hamro v. Shell Oil Co., 674 F.2d 784 (9th Cir. 1982)*; and *Krehl v. Baskin-Robbins Ice Cream Co., 664 F.2d 1348 (9th Cir. 1982)* all consider whether the products involved in the alleged tying arrangements were "separate products," not whether a per se standard applied. These cases are therefore discussed, *infra*, in the "separate products" section.

[7] Justice O'Connor argued forcefully that tie-ins have economic utility. However, she could persuade only three other members of the Court to join her. In her rationale she relied in part on the reasoning of Justice White in *Fortner Enterprises, Inc. v. United States Steel Corp., 394 U.S. 495, 22 L. Ed. 2d 495, 89 S. Ct. 1252 (1969)* ("*Fortner I*"). Justice White, however, joined with the *Hyde* majority in upholding the per se rule.

[8] Defendant's reading of the Court's opinion is based largely on the concurring opinion of Justice O'Connor, which, although MBNA disagrees, clearly is at fundamental variance with the opinion of the Court regarding the continued validity of per se analysis. *See*, *104 S. Ct. at 1569, 1576* (O'Connor, J., concurring).

Hyde thus makes no change in the law concerning the use of a per se standard in tying cases. The three-part test articulated by this court in *MBNA* continues to have validity. **[**13]** *See* Digidyne Corp. v. Data General Corp., 734 F.2d 1336, 1338 (9th Cir. 1984). There is also no indication in *Hyde* or in any other authority that tying analysis is only relevant when the tie is imposed on the ultimate consumer. The alleged tie-in in *Hyde* was imposed on the consumer of hospital services, and was therefore analyzed from that perspective. Nothing in the case suggests that all tying cases must be analyzed from that point of **[*1512]** view, and no other cases impose that criterion. In Anderson Foreign Motors, Inc. v. New England Toyota Distributor, Inc., 475 F. Supp. 973 (D. Mass. 1979), plaintiff automobile dealers contended that a requirement by Toyota that they use Toyota delivery services in order to purchase Toyota passenger cars was an illegal tying arrangement. Agreeing that the dealers were the appropriate consumers from whose perspective the tie should be analyzed, the court concluded that the plaintiffs should be allowed to go to trial on their claim, noting that "dealer freedom of choice is an important value protected by tie-in law." *Id. at 984*. *Accord,* Grappone, Inc. v. Subaru of New England, Inc., 534 F. Supp. 1282, 1289 (D.N.H. **[**14]** 1982); Joe Westbrook, Inc. v. Chrysler Corp., 419 F. Supp. 824, 835 (N.D. Ga. 1976).

In Blanton v. Mobil Oil Corp., 721 F.2d 1207 (9th Cir. 1983), Mobil dealers contended that the parent company had, among other things, coerced them into a tying arrangement that required them to purchase other Mobil products in addition to gasoline in order to retain their dealerships. The court viewed the evidence to indicate that "Mobil dealers were used as captive consumers of Mobil products," and were therefore victims of an illegal tying arrangement. *Id. at 1211*.

Finally, in the recent case of *Digidyne*, the court determined that defendant Data General's refusal to license a software system except to purchasers of its "central processing units" was an illegal tie. *734 F.2d at 1338*. Data General sold these materials "primarily to original equipment manufacturers ("OEMs") who combine them with application software . . . to create a complete computer system for resale." *Id. at 1342*. The tie was therefore imposed on these OEMs, not on the ultimate consumer of the finished computer product. *Id. at 1342-44*. Thus, defendant's "ultimate consumer" argument is without merit.

[15]** *Hyde* also appears to put to rest any possibility that *Pick* creates an "automobile replacement parts exception" to antitrust tying law. In *MBNA*, this court suggested that "the law of tying has evolved substantially since 1935 and . . . the considerations relied on by that court are more properly construed as possible arguments for a business justification defense rather than as reasons mitigating against the application of a per se standard." *517 F. Supp. at 1376*. As noted above, the *IAP* and *Metrix II* decisions have since appeared to give some new vitality to *Pick*. This is not the case, however. The discussion of *Pick* in *IAP* was dictum unnecessary to the result the court reached. [9] What is more, the court relied for this dictum solely upon *Pick* without any discussion of the lengthy history of tying cases after *Pick. Pick* was decided in 1935 and affirmed by the Supreme Court in 1936. Adoption of the per se rule in tying cases did not take place until 1947 when the Supreme Court decided International Salt Co. v. United States, 332 U.S. 392, 396, 92 L. Ed. 20, 68 S. Ct. 12 (1947). Since *International Salt* there have been substantial developments **[**16]** in the law of tying and application of the per se rule. All of this was inexplicably ignored by the *IAP* court.

The *Metrix II* court reconsidered its opinion regarding *Pick* after *Hyde* was decided, and issued *Metrix III*, which succinctly states that "*Jefferson Parish [Hyde*] concisely summarizes the state of tie-in law, and leaves no room for the so-called *Pick* 'exception. "' *Id. at 3*. *Pick* clearly has no current application other than shedding light on the business justification defense explained below.

III. *Per Se Tying Standard*

Given the continued vitality of the per se standard as applied to tying cases, it remains to be determined whether the arrangement at issue in this case is an illegal tie which warrants per se condemnation. As this court noted in *MBNA*, **HN2**[] a plaintiff must make three important demonstrations in order to establish a per se illegal tying arrangement:

---

[9] *See*, note 1, *supra*.

[*1513] "1. Two separate products with the sale of one **[**17]** conditioned on the purchase of the other;
"2. A seller with sufficient economic leverage in the tying market to appreciably restrain competition in the tied product market; and
"3. A tie-in affecting a not insubstantial amount of interstate commerce."

517 F. Supp. at 1378 (citations omitted); *see also* Digidyne, 734 F.2d at 1338. Other cases have suggested an additional requirement: that some "modicum of coercion" be exerted upon the purchaser of the tied product by the seller of the tying product. Robert's Waikiki U-Drive, Inc. v. Budget Rent-A-Car Systems, Inc., 732 F.2d 1403, 1407 (9th Cir. 1984); Roberts v. Elaine Powers Figure Salons, Inc., 708 F.2d 1476, 1479 (9th Cir. 1983). If the plaintiff establishes the above elements, defendant may defend itself "by an affirmative showing of business justification." MBNA, 517 F. Supp. at 1378; *see also* Moore v. James H. Matthews & Co., 550 F.2d 1207, 1217 (9th Cir. 1977) ("*Moore I*").

The development of the coercion aspect is less than clear. In attempting to characterize it, one court suggested that tying law is "a kind of semantic shell game." Ungar v. Dunkin' Donuts of America, Inc., 531 F.2d 1211, ***[**18]*** 1223 (3d Cir.), *cert. denied*, *429 U.S. 823, 97 S. Ct. 74, 50 L. Ed. 2d 84 (1976)*. Some courts have looked at coercion in terms of whether the two products were, in fact, tied together, i.e., whether the purchaser was required to buy the tied product in order to get the tying product. Id. at 1224. Other have examined it in terms of market power, concluding that coercion is likely if a seller has a patent, a unique product or a substantial market share. *See* Robert's Waikiki, 732 F.2d at 1407.

HN3[] Under whatever rubric, coercion is a necessary element of an illegal tying arrangement. From the early days of per se application the rule has been that when a buyer is free to purchase the product separately there is no coercion. Northern Pacific Ry. Co., 356 U.S. at 6 n.4. This year in *Hyde* the Supreme Court emphasized the need for some coercion holding that the per se rule may only be used "if the existence of forcing is probable." 104 S. Ct. at 1560. However, the Court goes on to evaluate it in terms of market power, saying that "the likelihood that market power exists and is being used to restrain competition in a separate market is sufficient to make per se condemnation **[**19]** appropriate." Id. at 1561. From all this it is possible to conclude that ***HN4***[] the likelihood of some coercion must be shown and that ordinarily if the purchaser must purchase the tied product in order to get the tying product and the seller has market power in the tying product coercion may be presumed. For the reasons explained in subparagraph A.2 and subparagraph B below, plaintiffs have clearly established the "modicum of coercion" necessary to invoke the per se standard. Thus the court finds coercion based on the Dealer Agreement and the fact of its acceptance by a large number of dealers who have stated they believe they had no choice. That evidence, while sufficient to show forcing is likely, is not sufficient to meet the more rigorous requirement of market power sufficient to impose significant restraints on competition in the tied product market. [10]

[20]** A. *Separate Products Tied Together*

1. *Two Separate Products*

In *MBNA*, defendant contended that the Mercedes-Benz passenger car and its replacement parts were not separate products. In making this argument it relied upon a number of authorities, but principally Principe v. McDonald's Corp., 631 F.2d 303 (4th Cir. 1980), *cert. denied*, *451 U.S. 970, 68 L. Ed. 2d 349, 101 S. Ct. 2047 (1981)*, which held that McDonald's franchisees could be required to operate only on premises leased to them by the parent company. This was not an illegal tying arrangement, reasoned the court, because "the challenged aggregation is an essential ingredient **[*1514]** of the franchised system's formula for success," making the franchise and the premises lease "a single product." Id. at 309. MBNA contended that the Mercedes replacement parts arrangement was like the McDonald's lease requirement, since "the purchase of MBNA replacement parts is an 'integral component' of its [MBNA's] franchised business method." MBNA, 517 F. Supp. at 1380.

[10] The court in *Moore I* also noted that the seller of the tying product should have an economic interest in the tied product. 550 F.2d at 1216. MBNA clearly has an economic interest in the allegedly tied replacement parts. MBNA, 517 F. Supp. at 1378 n.10.

This court rejected that argument, noting that while the McDonald's arrangement was essential to the company's purpose of providing **[**21]** fast food products, the basic purpose of a Mercedes-Benz franchise was the distribution of Mercedes-Benz passenger cars, not Mercedes replacement parts. *Id. at 1380-81*. It was held that "there is nothing inherent in the Mercedes-Benz franchise or trademarked automobile that prevents . . . replacement parts from being provided from non-approved sources." *Id. at 1381*. Notwithstanding this reasoning, defendant, citing a number of recent trademark/franchise cases that essentially stand for the same proposition as *Principe*, renews the same contention here. This court must again reject it.

MBNA relies principally on *Krehl v. Baskin-Robbins Ice Cream Co., 664 F.2d 1348 (9th Cir. 1982)*. In that case, ice cream store franchisees contend that "Baskin-Robbins ice cream products are unlawfully tied to the sale of the Baskin-Robbins trademark." *Id. at 1351*. The court rejected this claim. Distinguishing between a "business format" franchise system and a "distribution" franchise structure, it noted that while a "business format franchise is usually created merely to conduct business under a common trade name," with the distributor franchise "the franchised outlets serve as conduits **[**22]** through which the trademarked goods of the franchisor flow to the ultimate consumer." *Id. at 1353*. Since "the Baskin-Robbins trademark merely served to identify the ice cream products distributed by the franchise system," the ice cream and its trademark were not separate products, and tying law therefore had no application to the case. *Id. at 1354*.

None of that is relevant to this case. MBNA vigorously insists that *Krehl* stands for the proposition that "the law of 'tying' has no application at all to exclusive dealing arrangements used by manufacturers in the distribution of products to consumers through retail outlets displaying the manufacturer's trademark" (Def.'s Brief Opp. Summ. Judgment at 27), and that MBNA can therefore require its franchised dealers to sell only genuine or approved Mercedes replacement parts. This reasoning mischaracterizes *Krehl*. The court in that case said tying law did not apply to that particular situation because the purpose of the franchise was to distribute the trademarked ice cream; the trademark and the product it identified were therefore not separate. The purpose of a Mercedes-Benz franchise, as this court previously held, is the **[**23]** sale of Mercedes-Benz automobiles. *MBNA, 517 F. Supp. at 1381*. The Mercedes-Benz passenger car and its trademark are therefore not separate products. That reasoning could not be extended to cover any and all other products a franchisor may wish to distribute through a franchisee, however, without swallowing the whole of antitrust tying principles. Indeed, such a state of affairs would make it possible for MBNA or any other franchisor to require its franchisees to distribute "any product it decided to manufacture," whether or not those products were essential to the purpose of the franchise. *Id. at 1380*. *Krehl* cannot be read to support such a result. [11]

[24]** The other cases cited by defendant are likewise unavailing. In *Hamro v. Shell Oil Co., 674 F.2d 784 (9th Cir. 1982)*, a Shell service station operator alleged that the requirement that he purchase Shell gasoline in order to obtain a Shell franchise was an illegal tying arrangement. *Id. at 786.* **[*1515]** In rejecting the claim, the court merely determined that the Shell trademark and the gasoline the franchise had been established to distribute were not separate products. *Id. at 787-88*.

In *California Glazed Products, Inc. v. Burns & Russell Co., 708 F.2d 1423 (9th Cir.)*, *cert. denied*, *464 U.S. 938, 104 S. Ct. 348, 78 L. Ed. 2d 314 (1983)*, a trademark licensee who manufactured finished masonry blocks alleged that an agreement requiring it to purchase from the licensor the trademarked ingredients to finish the blocks was an illegal tie. *Id. at 1426*. The court rejected the claim, holding that since the license existed for the purpose of distributing the trademarked ingredients, those ingredients and its trademark were not separate products. *Id. at 1427-30*.

In *Klamath-Lake Pharmaceutical Ass'n v. Klamath Medical Service Bureau, 701 F.2d 1276 (9th Cir.),* **[**25]** *cert. denied*, *464 U.S. 822, 104 S. Ct. 88, 78 L. Ed. 2d 96 (1983)*, the assignee of the claims of a number of individual

[11] Defendant makes much of the argument that since a Mercedes franchise is a "distribution" franchise rather than a "business format" franchise, *Krehl* and the other franchise cases apply to this litigation. As has been clearly demonstrated, Mercedes passenger cars and their replacement parts are separate products; these arguments about the format of the franchise aid MBNA not at all with respect to the sales of replacement parts.

pharmacies contended that a health insurance provider's policy of dispensing drug benefits only through its own pharmacy was an illegal tying arrangement. *Id. at 1284*. The court held that this arrangement came within the "business of insurance" exception to ***antitrust law*** provided by the McCarran-Ferguson Act, and was therefore not an illegal tie. *Id. at 1284-87*. Plaintiff alleged further, however, that the requirement that subscribers to the health plan exercise their drug benefits only at the provider's pharmacy also constituted an illegal tying arrangement. *Id. at 1288-89*. The court rejected this claim, holding that since the subscriber's "purchase of drugs in the required manner was the consummation of the pharmacy benefit, not an unwanted and unnecessary product tied to the desired product," the pharmacy benefit and the restriction on the use of pharmacy services were one product. *Id. at 1289-90*.

Some comments the *Klamath* court made are relevant to the present action. Referring to ***HN5***[] the "function of the aggregate" test articulated in **[**26]** *Siegel v. Chicken Delight, Inc., 448 F.2d 43 (9th Cir. 1971)*, *cert. denied*, *405 U.S. 955, 92 S. Ct. 1172, 31 L. Ed. 2d 232 (1972)*, the court said that "separateness is determined in part by whether the products are normally sold or used as a unit and whether their joint sale effects savings beyond those of combined marketing. [Citation to *Siegel, 448 F.2d at 48*.] The critical factor is the extent to which a producer's offerings are in response to independently structured consumer demand." *701 F.2d at 1289*. The Supreme Court has defined the two-product inquiry as whether there is a "sufficient demand" for the purchase of the tied product separate from the tying product "to identify a distinct product market in which it is efficient to offer" the two separately. *Hyde, 104 S. Ct. at 1563* (citing approvingly this court's earlier decision in *MBNA* as well as *Siegel*). *See also* *Digidyne, 734 F.2d at 1339*. [12]

[27]** It remains undisputed in this action that "MBNA has separate personnel and price lists for new car and replacement part sales," and that "many replacement (as well as original) parts are manufactured by outside suppliers." *MBNA, 517 F. Supp. at 1380*. It is also clear that there is a demand for Mercedes replacement parts separate from the demand for the Mercedes-Benz passenger car itself. This court therefore finds, for a second time, that the Mercedes-Benz automobile and its replacement parts are separate products.

2. *Products Tied Together*

HN6[] No tying arrangement exists, however, unless it is also demonstrated that the **[*1516]** purchase of the tying product is conditioned on the purchase of the tied product. In *MBNA*, this court determined that the "express wording of the Dealer Agreement" tied the purchase of Mercedes-Benz passenger cars to the purchase of MBNA-supplied replacement parts. *517 F. Supp. at 1381-84*. It so concludes again now.

Defendant previously argued that notwithstanding the language of Paragraph 9C of the Dealer Agreement, the understood practice is that "dealers are free to purchase non-Mercedes-Benz parts and that [this] evidence of the parties' **[**28]** understanding should be controlling." *Id. at 1381*. Defendant repeats that argument here, with the additional contention that two other provisions of the Dealer Agreement, taken together with Paragraph 9C, demonstrates the lack of a tie between the Mercedes-Benz automobile and its replacement parts.

Paragraph 9D of the Dealer Agreement provides:

> Dealer shall not represent as new, genuine MB parts or as parts approved by DBAG any parts used by it in the repair or servicing of MB passenger cars, which are not in fact new, genuine MB parts or parts expressly approved by DBAG or MBNA.

Paragraph 13F of the Agreement provides: [13]

---

[12] Defendant argues that *Siegel* is an "odd-ball" case that is a singular exception to the rule established in the franchise/trademark cases. *Siegel* cannot be dismissed so easily. The Supreme Court saw fit to treat *Siegel* approvingly in *Hyde* when the Court included it in an enumeration of cases consistent with its two-product analysis. *104 S. Ct. at 1563 n.35*. The tied products in that case were clearly not central to the purpose for which the franchise had been established, and thus were part of an illegal tie-in. The replacement parts at issue in this case are also not central to the purpose of the Mercedes franchise. If other elements are demonstrated, they also may be shown to be part of an illegal tie.

> If Dealer sells for use in the repair of any MB Product any parts which are not genuine MB Parts or parts expressly approved by DBAG or MBNA, Dealer will advise the purchaser by appropriate written notice on the Invoice that such parts are not genuine MB Parts supplied by MBNA and are not warranted by MBNA. Dealer will also, by appropriate written notice on the Invoice, advise the purchaser of the source of such parts and of the warranty, if any, given by the supplier of such parts.

According to defendant, since Paragraph 9D provides for **[**29]** disclosure by the dealer of the use or sale of any non-MBNA parts, "if Paragraph 9C compelled exclusive dealing with MBNA, Paragraph 9D would be to no purpose at all." (Def.'s Brief Supp. Summ. Judgment, at 14). Moreover, MBNA continues, the basic, "implicit" purpose of Paragraphs 9C and 9D is to provide for "full and conspicuous disclosure"; Paragraph 13F is the "explicit" declaration of that purpose. *See, id*. And, in any event, continues defendant, 9C is, in practice, irrelevant, since "dealers interpret [it] (as well as the other provisions of the Agreement) in various ways, or they simply ignore it. Some do not know of it; others interpret it as going only to 'safety related' parts; all feel free to overlook it." *Id. at 15*. In sum, contends MBNA, all 9C does is require dealers to "buy some MBNA parts as a condition of the privilege to display the trademark." *Id*.

None of these arguments is sufficient to convince this court to alter its previous **[**30]** determination of this question. Notwithstanding any other provision of the Agreement, Paragraph 9C clearly forbids the use or sale of non-genuine or unapproved replacement parts "if such parts are necessary to the mechanical operation of such MB passenger cars." That has nothing to do with "full and conspicuous disclosure"; it clearly prohibits dealers from using or selling certain equipment.

It is also clear that these three provisions deal with different types of replacement parts. While Paragraph 9C pertains only to parts "necessary to the mechanical operation" of the car, Paragraphs 9D and 13F, which do not contain this limiting language, clearly pertain only to those non-genuine parts that 9C does not prohibit dealers from using. Thus, Paragraph 9C cannot be read into superfluity or given interpretations its language will not bear, as defendant would wish; if it had no purpose, it would not be in the Agreement. [14]

[31]** **[*1517]** Defendant's further attempt to scuttle 9C by arguing that the dealers either interpreted it to suit their own purposes or ignored it entirely is also without merit. Even if the dealers did feel free to ignore the provision -- and there is substantial evidence to the contrary -- the fact of the existence of tying language is enough to evidence a tie. As this court previously noted, such language by itself has considerable "coercive potential," and ***HN7***[] evidence that it was actually enforced is not necessary to show a tie-in unless "the contract itself does not demonstrate a formal tying agreement." *MBNA, 517 F. Supp. at 1381-82* and n.17; *see also* *Northern Pacific Ry. Co., supra, 356 U.S. at 11-12*; *Ungar v. Dunkin' Donuts of America, Inc., supra, 531 F.2d at 1224*. Since Paragraph 9C clearly does contain tying language, the fact that some dealers may have ignored it does not defeat the existence of a tie.

The fact that Paragraph 9C applies only to those parts "necessary to the mechanical operation" of the car also does not defeat the existence of a tie. In *MBNA*, this court noted that this language was ambiguous, rendering it impossible for the dealers to know **[**32]** what parts were covered in the proscription. There was also considerable evidence suggesting that the phrase referred, in practice, to virtually the entire automobile. *Id. at 1382* and nn.18-19. [15] These factors led the court to conclude that the limiting language did not alter the explicit tying arrangement the provision imposes, and it sees no reason to change that determination now.

---

[13] This provision was added to the Agreement in 1983.

[14] The fact that MBNA earlier considered and then rejected a less restrictive version of Paragraph 9C indicates that the provision was not intended to be without effect. *See*, "Business Justification" section, *supra*.

[15] MBNA officials still appear to consider parts "necessary to the mechanical operation" of the Mercedes car to include virtually the entire car. *E.g*. (Stoehr Dep. at 249-54, Pl.'s App. II).

It is true that Paragraph 9C permits the use of outside parts if they have been "expressly approved" by DBAG. As this court has noted, the existence of an illegal tie-in may in fact be defeated if an actual "approved source" clause and approval mechanism exist. *Id. at 1382-83*. The court determined, however, that no such procedures were available to Mercedes dealers, and the hint in 9C at some possible approval mechanism was therefore **[**33]** illusory. *Id. at 1383-84*. The court has been given no reason to find otherwise now.

For the foregoing reasons, the court is constrained to conclude, for a second time, that the Mercedes-Benz automobile and its replacement parts are separate products tied together by Paragraph 9C of the MBNA Dealer Agreement. [16]

[34]** B. *Sufficient Economic Power*

HN8[] The second factor in determining the existence of a per se illegal tying arrangement is whether "the seller has some special ability -- usually called 'market power' -- to force a purchaser to do something that he would not do in a competitive market." *Hyde, 104 S. Ct. at 1559*. The use of a per se standard is, indeed, appropriate only if "the existence of forcing is probable," i.e., there exists a "substantial potential for impact on competition" resulting from the economic power of the seller. *Id. at 1560*. This standard can be met if the plaintiff makes one of the following showings:

1. The seller has a "high" share of the tying product market, *id*.;

2. The tying product is a unique product that the seller's competitors are not able to offer, *id. at 1560-61*;

[*1518] 3. A substantial number of consumers have accepted the tie-in and no factor other than the economic power of the seller explains that acceptance. *MBNA, 517 F. Supp. at 1384*; *see also, Hyde, 104 S. Ct. at 1561 n.26* (quoting *Northern Pacific Ry., 356 U.S. at 7-8*).

Plaintiff bases its argument primarily on the second, or "uniqueness" factor, **[**35]** though it does suggest that the third factor is also met here. [17]

As this court held in *MBNA*, ***HN9***[] a showing of uniqueness is made by the plaintiff if:

> . . . it can show that the alleged tying product, the Mercedes-Benz automobile, is sufficiently unique to give defendant a competitive advantage in the tying product market. If the tying product is sufficiently desirable to consumers or is a product not easily replicated or commonly available, then the producer of the tying product is likely to have sufficient leverage to restrain the tied product market.

517 F. Supp. at 1385-86 (citations omitted). Some courts have held that this demonstration can **[**36]** be made when a seller has economic power by virtue of a patent or a copyright in the tying product. *See, e.g., United States v. Loew's Inc., 371 U.S. 38, 45-46, 9 L. Ed. 2d 11, 83 S. Ct. 97 (1962)*. In *Northern Pacific Ry*., the Court held that the railroad's vast land holdings gave it a unique bargaining position sufficient to establish the requisite economic

---

[16] Defendant argues that since plaintiff in its damage study admits that BMW imposed no tying arrangement on its dealers, and BMW has in its dealer agreement a provision similar to Paragraph 9C, plaintiff in effect admits that MBNA is not acting in restraint of trade. (Def.'s Brief Supp. Summ. Judgment, at 4, 12, 13, 23, 24, 37). This argument misconstrues the import of the damage study and plaintiff's use of it.

The damage study deals specifically with impact, something that is not at issue in this proceeding. The study took as an assumption the belief of the former officers of Eurasian Automotive Parts that "whereas MBNA was coercing the Mercedes-Benz dealers to eliminate outside purchases, and insisting that the dealers had agreed not to buy except from MBNA and that they honor their agreement 'or else,' BMW employees were not coercing the BMW dealers." (Pl.'s Brief Opp. Summ. Judgment, at 30-31). The provision in the BMW agreement is thus of no import in analyzing whether MBNA's products are tied together.

[17] Plaintiff also attempts to argue that the market dominance test is also met here, since the market for the tying product, the Mercedes-Benz passenger car, consists of the Mercedes dealers. (Pl.'s Reply Brief, at 22-23). This argument misconstrues the nature of the market dominance test. *See, Digidyne, 734 F.2d at 1336, 1340 (9th Cir. 1984)*.

power. 356 U.S. at 7-8. Although the ownership of a trademark "is not conclusive of economic power," MBNA, 517 F. Supp. at 1386, some courts have held that a franchisor's trademark control over a common product confers sufficient economic power to establish a tie. *E.g.,* Siegel v. Chicken Delight, 448 F.2d at 49-50.

Mozart contends that such factors as the special advantages a Mercedes dealer enjoys and the alleged technological superiority and immense prestige of the Mercedes-Benz passenger car make this automobile and the opportunity to distribute it so uniquely valuable that its producer has power to "force" the dealers to purchase the tied product, MBNA replacement parts. [18] Defendant contends that none of this is sufficient to demonstrate uniqueness for the purpose of establishing economic power on the part **[**37]** of MBNA. Relying primarily on United States Steel Corp. v. Fortner Enterprises, Inc., 429 U.S. 610, 51 L. Ed. 2d 80, 97 S. Ct. 861 (1977) ("*Fortner II*"), MBNA argues that its product is not unique "in the antitrust sense" because Mozart has not shown that it confers on the manufacturer "something approaching the insulation of a patent or a copyright." (Def.'s Brief Supp. Summ. Judgment, at 40). The proper focus in this inquiry, contends defendant, is not the self-laudatory comments of MBNA officials, or the praises heaped upon the Mercedes-Benz passenger car by satisfied customers or automobile critics, but is rather the capacities of MBNA's competitors. Unless it can be shown that they are somehow prevented from marketing products comparable to those offered by MBNA, continues defendant, Mercedes products are not sufficiently unique to give MBNA economic power over the tying product market. *Id*.

[38]** Defendant appears to read *Fortner II* to require a producer to have something approaching a monopoly in the tying product market in order for its product to be unique. MBNA made this argument in the previous action before this court; it was rejected then, MBNA, 517 F. Supp. at 1386, and must be again now. *Fortner II* does contain language indicating that "the question is whether the seller has some advantage **[*1519]** not shared by his competitors in the market for the tying product," 429 U.S. at 620, and that the producer's competitors must be "in some way prevented from offering the distinctive product themselves." Id. at 621 (quoting Fortner I, 394 U.S. at 505). The Court's opinion made it clear, however, that this reasoning did not impose a monopoly requirement, and that ***HN10***[] the uniqueness showing could be made "whenever there are some buyers who find a seller's product uniquely attractive, and are therefore willing to pay a premium above the price for the nearest substitute. . . ." Id. 429 U.S. at 621 n.14 (quoting Note, *The Logic of Foreclosure: Tie-In Doctrine after Fortner v. U.S. Steel*, 79 Yale L.J. 86, 93-94 (1969)). As the court in *Digidyne* **[**39]** noted:

> The concern is not with the restraint on competition in the tying product but on competition in the market for the tied product. What is required is not monopoly power in the tying product market, but only sufficient power to enable the seller to restrict competition in the tied product. If a seller's product is distinctive, not available from other sources, and sufficiently attractive to some buyers to enable the seller by tying arrangements to foreclose a part of the market for a tied product, the adverse impact on competition in the tied product is not diminished by the fact that other sellers may be selling products similar to the tying product.

734 F.2d at 1345. Thus, the plaintiff in that case was able to demonstrate economic power by showing that defendant's software package, arguably the best available and protected by copyright, was sufficiently unique to allow defendant to "force" purchasers of that product to also purchase other materials. Id. at 1340-42. This economic power, based on uniqueness, was further enhanced, in the court's view, by the fact that many of the defendant's customers had become, by virtue of their economic investment, "locked **[**40]** in" to the use of the tying product. Id. at 1342-43.

Such a strong showing has not been made by plaintiff in this case. This court previously noted that "the Mercedes-Benz passenger car is one of the world's finest automobiles and that the Mercedes-Benz trademark, a three-pointed star in a circle, is recognized worldwide for its representation of automotive luxury, performance and technology." MBNA, 517 F. Supp. at 1373. Plaintiff's impressive array of evidence reinforces these impressions, but does little else. ***HN11***[] A prestigious and desirable trademark can be persuasive evidence of economic power, id. at 1387, but this court is unwilling to determine, as a matter of law, that the prestige of the Mercedes-Benz

[18] Plaintiff bases this argument on portions of the extensive deposition and documentary evidence generated by this litigation, mostly on the deposition testimony of MBNA officials. *See*, (Pl.'s Mem. Supp. Summ. Judgment, at 12-24).

trademark, taken together with the evidence of the product's technological, safety and luxury preeminence, bestows on MBNA sufficient economic power to force its dealers to accept an illegal tie-in. All of this evidence should be heard and evaluated by a fact-finder at trial before a conclusive determination regarding uniqueness is made.

Mozart also argues, however, that MBNA's economic power is demonstrated by the fact that no explanation other than defendant's ability **[**41]** to impose a tie-in could account for the acceptance of the burdensome terms of Paragraph 9C by the Mercedes dealers. Plaintiff contends that the dealers continued to purchase replacement parts from MBNA, despite the fact that independent distributors offered equivalent parts for much less, because they feared that their two-year franchise agreements would not be renewed if they did otherwise. (Pl.'s Mem. Supp. Summ. Judgment, at 24-27).

HN12[] In order to make such a demonstration of economic power, plaintiff must show that a significant number of customers in the market have accepted the tie-in, and that there are no explanations other than MBNA's economic power for that acceptance. *MBNA, 517 F. Supp. at 1385*. Mozart falls slightly short on both of these counts. As in *MBNA*, plaintiff has defined the universe of potential buyers as all Mercedes-Benz dealers, and alleges that since 100% of them accepted the adverse terms, a significant number of customers accepted **[*1520]** the tie-in. *See, id*. Again, "there is no identified population against which to compare the 400 Mercedes dealers. Plaintiff might argue that 400 represents an appreciable number of buyers from a total population **[**42]** of import car dealers or of import luxury car dealers. Plaintiff has not attempted such a showing." *Id*.

Plaintiff also has not demonstrated that fear of nonrenewal of franchises is the only possible explanation for the dealers' purchase of parts from MBNA. Indeed, some dealers suggest that the "spectre of non-renewal" did not haunt them at all, and that they had other reasons for purchasing parts directly from Mercedes. [19]

At least one court has determined that since an automobile manufacturer was able to impose burdensome terms on "a significant number of buyers, *i.e*., its dealers," the manufacturer had sufficient economic power to impose an illegal tie. *Grappone, Inc. v. Subaru of New England, Inc., 534 F. Supp. at 1282, 1290* and n.21. This finding was made, however, after a trial enabled the fact-finder to fully hear and evaluate the evidence. The same procedure must occur in this case. This court therefore declines to conclude, as a matter **[**43]** of law, that MBNA had sufficient economic power to impose an illegal tying arrangement on its franchised dealers.

The court makes that conclusion even though there is considerable evidence that dealers were coerced into the purchase of replacement parts from MBNA. The evidence plaintiff uses to demonstrate the fact of coercion consists primarily of letters, deposition testimony, and MBNA Visitor Reports, which were filled out by MBNA field representatives after inspection tours of Mercedes-Benz dealerships. This evidence seems to indicate that at least some Mercedes dealers or their parts employees felt coerced into buying only genuine MBNA parts, if only "safety-related" parts. Parts managers talk of being harassed by MBNA parts representatives regarding the purchase of outside replacement parts, and some evidence points to possible sanctions imposed against one dealer for his failure to abide by the company policy regarding outside purchases. Defendant's evidence essentially consists of eleven volumes of deposition testimony from numerous Mercedes dealers from around the country who say they have never felt threatened or coerced into buying replacement parts solely from MBNA. Although **[**44]** there is surely enough evidence here to satisfy the "modicum of coercion" requirement, this court nevertheless declines to decide the issue of economic power on summary judgment.

C. *Effect on Interstate Commerce*

In the previous action before this court, it was determined, as a matter of law, that a not insubstantial amount of interstate commerce was affected by the alleged tying arrangement. *MBNA, 517 F. Supp. at 1387-88*. The court has been given no reason to change its previous finding, and therefore concludes, for a second time, that a sufficient amount of commerce was involved in this arrangement to satisfy this element of the per se analysis.

---

[19] *See* (Terian Dep., Def.'s App. IX, at 1313-15).

The court has thus far concluded that the per se tying standard applies in this case. It has also been determined, as a matter of law, that (1) the Mercedes-Benz passenger car and its replacement parts are separate parts tied together by Paragraph 9C of the Dealer Agreement, and (2) that the tie affects a not insubstantial amount of interstate commerce. The court has also determined that the issue of economic power must be decided at trial. [20]

[45]** IV. *Business Justification*

As this court has noted, ***HN14***[] a defendant can excuse itself from an otherwise per se illegal **[*1521]** tying arrangement if it can demonstrate the existence of a business justification. *Id. at 1388*. The defendant bears the burden of proving that justification. *Id*.

MBNA maintains that the arrangement at issue in this case is necessary to make sure that the customer "will get the real thing" in terms of new cars, service, and repairs, and is essential to protecting the quality of the Mercedes-Benz passenger car and the goodwill of the customer. (Def.'s Brief Supp. Summ. Judgment, at 1-9). Mozart contends that, on the contrary, MBNA is without business justification for the tying arrangement for two reasons: 1) a less restrictive alternative that would maintain the quality of replacement parts is available to Mercedes; and 2) in any event, the quality control argument MBNA makes is without merit, since replacement parts of appropriate design and quality are available from other sources. (Pl.'s Mem. Supp. Summ. Judgment, at 27-35).

Plaintiff's first contention is based on the fact that in drafting Paragraph 9C of the Dealer Agreement MBNA first **[**46]** considered, then rejected, the following version:

> Dealer shall not use, sell, or offer to sell parts other than genuine MB parts or parts expressly approved by DBAG or DBNA if such parts are
> (a) necessary to the mechanical operation of Mercedes-Benz passenger cars; and
> (b) not equivalent in quality and design to genuine MB parts expressly approved by DBAG or DBNA.

Id. at 29 (quoting Armstrong *TLC* Dep. Exh. P-12, at 18-19, Pl.'s App. IV). This version, alleges Mozart, would have addressed MBNA's concerns regarding quality without conferring on Mercedes an "uncontrolled silent veto" with respect to outside parts. *Id. at 29-30*.

Moreover, plaintiff contends, MBNA does not, in any event, have a quality control problem. MBNA purchases 80% of its replacement parts from DBAG; of those parts, one-half are manufactured by DBAG, and one-half are purchased by Daimler-Benz from original equipment manufacturers ("OEMs"), who produce the parts according to DBAG manufacturing and quality control specifications. A selection of the OEM parts are subjected to a "second round" of tests by DBAG, even though they have already been tested by their manufacturer. **[**47]** *MBNA, 517 F. Supp. at 1389*. The remaining 20% of the replacement parts purchased by MBNA come directly from OEMs who "have met DBAG's standards for the quality of their parts and inspection procedures." *Id. at 1389 n.32*. Mozart, citing deposition and declaration evidence, alleges that "almost all" of the replacement parts sold by Eurasian Automotive Products were manufactured by these OEMs, that Mercedes officials knew this, and that independent distributors even offered parts purchased directly from DBAG parts outlets. (Pl.'s Mem. Supp. Summ. Judgment, at 31-32). Moreover, contends plaintiff, MBNA officials had never heard of accidents caused by defective parts sold by independent distributors, and had indeed heard of no defective part sold by those distributors. In fact, according to Mozart, Eurasian had a better record with warranty claims than Mercedes, who has needed to have many "recall campaigns." *Id. at 33-35*. In sum, Mozart asserts that MBNA's quality control justification lacks merit because the parts marketed by Eurasian were, in fact, of the same quality as many of those used, and even marketed, by DBAG and MBNA.

---

[20] Defendant also makes much of the argument that a private plaintiff, as opposed to the government, is somehow required, even in a per se case, to prove the entire case, including damages, in order to prevail on any point, and cannot therefore move for partial summary judgment. This argument is without substance. ***HN13***[] Relevant authority makes it clear that the per se standard is not different for private and government suits. *E.g., Hyde, 104 S. Ct. at 1556-61*; *Digidyne, 734 F.2d at 1338, 1339*.

In response, Mercedes claims that its legitimate **[**48]** business objective "is to wed the customer to [the Mercedes-Benz] brand of automobile" and "to keep the car in first class running order." Citing authority used unsuccessfully in its attempt to remove the case from the purview of the per se standard and place it within the parameters of the franchise/trademark cases, MBNA argues that the business of affording the customer "reliable service and quality replacement parts" is an "inseparable aspect of the business of selling new cars" and "vital to good will and competitiveness." (Def.'s Brief Supp. Summ. Judgment, at 1-6). Since, according to defendant, MBNA has no direct control over the quality and design testing of the OEMs and **[*1522]** other manufacturers of replacement parts, and indeed could not have such control, it has no assurance that those parts are of the requisite quality and has a legitimate fear of inferior parts coming from those sources. *Id. at 7-9* and n.2. Defendant also calls into question Mozart's characterization of MBNA's warranty record and recall campaigns, *id. at 42-44*, and, pointing to the allegedly faulty brake disc marketed by Eurasian in 1976, contends that some parts sold by OEMs (apparently **[**49]** those not intended for DBAG, but solely for the wholesale market) and other manufacturers of "copy parts" are often inferior, and "sometimes dangerously inferior in quality," to genuine DBAG parts. *Id. at 7-9, 19-20*. MBNA does admit that 20% of its parts purchases are from OEMs whose parts have not gone through DBAG's rigorous "second test," but suggests that these OEMs were superior to others, that they had never forced its dealers to buy such parts, and that MBNA "is now in the process of establishing a quality control program in the United States that will duplicate what is done in Germany." *Id. at 45*.

MBNA's argument regarding the distinction between the distribution, servicing and repair of passenger cars and the sale of other consumer goods is not without merit. *See, MBNA, 517 F. Supp. at 1390*. Indeed, this court has noted that MBNA "has an important legitimate interest in protecting its trademarked automobile and public confidence in the quality and safety of the product." *Id*. [21] The crucial question is whether the alleged tying arrangement imposed on Mercedes dealers is necessary to protect that interest. The inquiry can only be resolved in defendant's favor **[**50]** if MBNA can demonstrate that its quality control procedures are necessary to protect the passenger car's quality, and show that replacement parts of appropriate quality are unavailable elsewhere. *Id*.

[51]** Plaintiff has presented an impressive array of argument and evidence which strongly suggests that defendant will have great difficulty meeting its burden here. Defendant's only substantial response to that showing, beyond asserting that it has a legitimate interest in the quality of its product, is to cite the declaration of DBAG inspection director Albrecht Koster. (Koster Decl., Def.'s App. XII, at 1803-25). Koster alleges that from 1981 to 1983, numerous shipments from OEMs contained defective parts, *id*. at 1815-18, which, according to MBNA, demonstrates the need for DBAG quality control procedures. Koster also asserts that it would be impossible for DBAG to monitor the quality control procedures of the numerous OEMs, thereby rendering it impossible to know for sure whether the outside parts are of the requisite quality. *Id*. at 1823-24. As plaintiff points out, Koster's declaration deals with replacement part difficulties which took place after the time period relevant in this litigation, and his conclusions regarding the possibility of receiving quality parts from elsewhere is also subject to question. [22] MBNA

---

[21] Plaintiff argues that the Magnusson-Moss Warranty, Federal Trade Commission Act of 1974, *15 U.S.C. §§ 2301 et seq.*, especially § 2302(c), is "clear demonstration of Congressional intent that tying arrangements cannot be justified on the ground of preserving goodwill." (Pl.'s Reply Brief, at 23). It is not at all clear to the court that this statute, which prohibits a warrantor from conditioning the warranty on the use of a certain product, and is specifically aimed at prohibiting "the implementation of tying arrangements by means of warranties" (Pl.'s Mem. Supp. Summ. Judgment, at 49) (quoting ***Harmsco, Inc., 41 Fed. Reg. 34,368, 34,369 (1976))***, destroys MBNA's interests discussed here. It is true, of course, that a tie cannot be imposed by Mercedes unless it demonstrates that such an arrangement is the only way the safety and quality of its product can be assured. If such an arrangement proves necessary, this statute would not prohibit it. *See, id., at 48* (quoting House Report of § 2302(c)).

[22] Koster suggests that it would be economically infeasible to require DBAG to monitor all the OEMs who sell on the open market. *Id*. at 1823-24. This does not mean, however, that there are not other possible means available to insure the quality of the parts used in the Mercedes car. Perhaps some quality control system could be implemented directly at the dealer level. The fact that the requirement of quality control poses some problems does not excuse MBNA from doing it. Additionally, Koster and MBNA both appear to misread the import of *Volkswagenwerk A.G. v. Bundeskartellamt* (the "Federal Cartel Office"), No. KVR 8/80 (September 11, 1981). The German court merely held that under German law, VW could not be required to monitor the

also cites the deposition **[*1523]** testimony of parts **[**52]** manager Don Williams, who suggests that, although he does not know "for sure," some OEMs whose parts are rejected by MBNA leave those parts in Mercedes boxes and then sell them to the independent parts distributors, who then sell them to dealers in the same boxes. This, continues Williams, makes it difficult to tell, for warranty and disclosure purposes, whether the part is MBNA-approved or not. (Williams Dep., Def.'s App. I, at 77-78). This testimony is admittedly speculative and is therefore of little probative value.

[53]** As the foregoing discussion indicates, defendant has not made a sufficient showing of the need for DBAG quality control procedures or of the unavailability of quality parts from outside sources to prevail on its own motion for summary judgment. The court also declines, however, to grant plaintiff's motion for summary judgment on this issue. There are serious questions of fact in dispute on the business justification defense that preclude a grant of summary judgment for either party.

If plaintiff is able to establish the requisite economic power to impose an illegal tying arrangement, MBNA will have the opportunity to "demonstrate the necessity for its quality control procedures and the unavailability of comparable mechanically necessary replacement parts from non-MBNA sources." *MBNA, 517 F. Supp. at 1390*.

V. *The Conspiracy and Monopoly Claims*

In addition to the claim of a per se illegal tying arrangement, Mozart alleges that MBNA also engaged, with its dealers, in a conspiracy to boycott independent distributors, and also attempted to monopolize, through "resale price maintenance," the sale of Mercedes-Benz replacement parts, in violation of *15 U.S.C. §§ 1* and *2*. The court **[**54]** does not find it necessary to discuss in detail the parties' arguments regarding these claims. The main focus of argument and dispute has been the tying allegation, and the court need do no more here than state that it declines plaintiff's invitation to grant summary judgment as to the conspiracy claim on its own motion, and also will not grant defendant's motion for summary judgment on both claims. There is sufficient dispute regarding coercion to permit the conspiracy claim to proceed to trial, and neither party has mustered sufficient argument on the monopoly claim to justify summary judgment treatment.

VI. *Conclusion*

Based on the foregoing discussion, the court determines that since there are genuine issues of fact regarding the points raised in plaintiff's motion for summary judgment, that motion must be DENIED. Because the per se standard is applicable as to the tying count, and sufficient factual dispute remains as to the conspiracy and monopoly counts, defendant's motion for summary judgment is also DENIED.

As permitted by *Fed. R. Civ. P. 54(d)*, the court finds that there is no substantial controversy as to the following facts:

1. The Mercedes-Benz passenger car and **[**55]** its replacement parts are separate products tied together by the terms of Paragraph 9C of the MBNA Dealer Agreement; and

2. The tying arrangement affects a substantial amount of interstate commerce.

This matter will proceed to trial on the illegal tying arrangement claim on the issues of:

1. Whether MBNA has sufficient economic power to restrain competition in the tied product market; and

2. Whether MBNA has a legitimate business justification for the tying arrangement at issue in this case and on the conspiracy and monopoly claims.

[*1524] 3. On the conspiracy and monopoly claims.

---

quality control processes of the OEMs. (Def.'s App. XIV, at 2123). Again, this does not dispose of the matter, for there could conceivably be other means of insuring the quality of replacement parts coming from OEMs.

IT IS SO ORDERED.

General Leaseways, Inc. v. National Truck Leasing Asso.

United States Court of Appeals for the Seventh Circuit

LexisNexis® Headnotes

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN1[] **Injunctions, Preliminary & Temporary Injunctions**

The cases in the Seventh Circuit usually say that a district judge asked to issue a preliminary injunction must consider four things: the harm (1) to the plaintiff and (2) to the defendant from the denial or grant of the injunction, respectively, (3) the likelihood of the plaintiff's prevailing on the merits when the case is tried, and (4) the effect on the public of granting or denying the preliminary injunction.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN2[] **Injunctions, Preliminary & Temporary Injunctions**

The heart of the four-factor test is a comparison of the likelihood, and the gravity, of two types of error: erroneously granting a preliminary injunction, and erroneously denying it. The likelihood of an error depends on the merits of the case as they appear from the preliminary-injunction hearing. If the plaintiff seems quite likely to win the case when it is tried, then the probability that granting the preliminary injunction will give him an undeserved benefit will seem small, and granting the injunction will be the decision that minimizes the likelihood of an error.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN3[ ] **Injunctions, Preliminary & Temporary Injunctions**

If a plaintiff will be hurt more by denial of the preliminary injunction than the defendant will be hurt by its grant, the gravity of the error in denying the preliminary injunction should it turn out later that the plaintiff was entitled to the injunction, there would of course be no error if it turned out he was not entitled, clearly exceeds that of erroneously granting it; and the disparity is further magnified if the public as well as the plaintiff will be harmed by denying but not by granting the injunction.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN4[ ] **Price Fixing & Restraints of Trade, Vertical Restraints**

A firm that is free from effective competition will reduce its output below the competitive level. Consumers will pay more when supply is scarcer, yet it will cost the firm less to produce a smaller supply--so the firm's profits will be greater at the reduced output. One way the firm can free itself from competition is by agreeing with sellers of the same product that they will not enter each other's markets; such an agreement will create a series of regional or local monopolies. An agreement on output equates to a price-fixing agreement. If firms raise price, the market's demand for their product will fall, so the amount supplied will fall too--in other words, output will be restricted. If instead the firms restrict output directly, price will as mentioned rise in order to limit demand to the reduced supply. Thus, with exceptions, raising price, reducing output, and dividing markets have the same anticompetitive effects.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN5[ ] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

If the elimination of competition is apparent on a quick look, without undertaking the kind of searching inquiry that would make the case a Rule of Reason case in fact if not in name, a practice is illegal per se.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN6[ ] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Under the Rule of Reason analysis, a plaintiff must first prove that a defendant has sufficient market power to restrain competition substantially. If not, the inquiry is at an end; the practice is lawful. But if it seems that the defendant does have the power to restrain trade substantially, then inquiry proceeds to the question whether the challenged practice is likely--with due consideration for any justificatory evidence presented by the defendant--to help rather than hurt competition, viewed not as rivalry as such but as the allocation of resources that maximizes consumer welfare.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Civil Procedure > ... > Equity > Maxims > General Overview

Civil Procedure > Preliminary Considerations > Equity > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Unclean Hands

HN7[] **Regulated Practices, Price Fixing & Restraints of Trade**

Whenever some maxim of equity, such as that to get equitable relief you must have "clean hands," collides with the objectives of the antitrust laws, the equity maxim must give way.

Counsel: Jeffery M. Cross, Ross & Hardies, Chicago, Illinois, for Plaintiff.

Rodney D. Joslin, Jenner & Block, Chicago, Illinois, for Defendant.

Opinion by: POSNER

Opinion

[*589] POSNER, Circuit Judge.

The defendants in this antitrust suit appeal under *28 U.S.C. § 1292(a)(1)* from the grant of a preliminary injunction to the plaintiff, General Leaseways, a company engaged in the business of leasing trucks. The principal (and to simplify this opinion we shall assume the only) defendant is an association of such firms, the National Truck Leasing Association, which decided to suspend General Leaseways indefinitely -- the practical equivalent of expelling it.

The roughly 130 members of the Association lease trucks to businesses on a "full service" basis. This means that the lessor rather than the **[**2]** lessee is responsible for maintaining the trucks and for repairing them if they break down. The leases are short term or long term, local or "over the road." The last of these terms, which means that the lessee may drive the truck anywhere in the country, is critical to this case. Over-the-road customers demand full service. The members of the Association, however, are local companies, none of which owns service facilities throughout the nation. The Association was created in order to set up and administer a reciprocal service arrangement that would enable each member to lease trucks on a full-service over-the-road basis and thus compete with the national truck-leasing companies, which have their own service depots all over the United States. The rules of the Association require each member to give the trucks of the other members prompt and efficient repair service; this is the reciprocal service arrangement. The rules do not regulate the price of the service.

Although reciprocal service is the Association's *raison d'etre*, the members also exchange information of a type normally exchanged through a trade association, engage in some other joint programs (including joint **[**3]** purchasing of fuel), and share a trademark owned by the Association, "NationaLease." But neither the Association nor its members advertise or otherwise promote the trademark extensively, and most **[*590]** members do not even use the mark in their business names.

If this were all there was to the Association, there would be no antitrust controversy. But there is more. Each member operates under a franchise from the Association that designates the particular location at which he may do

* Hon. William J. Campbell, of the Northern District of Illinois, sitting by designation.

business as a National franchisee and forbids him to do business as a National franchisee at any other location. The rules of the Association also forbid the franchisee to affiliate with any other full-service truck-leasing enterprise, such as Hertz or Avis. The significance of the location restriction and the nonaffiliation requirement lies in the fact that the markets for full-service commercial truck leases are local: the lessee invariably leases the truck from a firm having an outlet within a few miles (no more than 25) of the lessee's place of business. For short-term leases the inconvenience of sending the lessee's driver a longer distance to pick up the truck is decisive. For long-term **[**4]** leases the decisive factor is that regular maintenance (as distinct from emergency repair) is part of the full-service package and is therefore provided at the outlet from which the truck is rented. In either case one truck-leasing firm can compete with another only if it has a sales and service outlet near the other's. But the Association's policy is to space franchise locations 10 or (more commonly) 20 miles apart, so that franchisees will not be able to compete for many of the same customers. The franchisee can if he wants open an outlet at an unauthorized location under a different name, but trucks rented under that name would not be entitled to reciprocal service; and even if the member were willing to forgo that advantage, he still could not open an outlet under license from another full-service truck-leasing enterprise such as Hertz or Avis without being expelled from the Association. The overall effect of the Association's rules is thus to severely limit over-the-road leasing competition between members of the Association, since, to engage in such competition, a lessor that does not have its own national service network or access to that of a national company such as Hertz **[**5]** or Avis needs reciprocal service.

General Leaseways decided to defy the location and nonaffiliation restrictions, and it brought this suit to prevent the Association from expelling it for its infractions. The preliminary injunction orders the Association not to expel it pending the trial on the merits. The Association's appeal requires us to consider the standards for granting preliminary injunctions and the outer bounds of permissible cooperation among competitors under *section 1* of the Sherman Act, *15 U.S.C. § 1*.

HN1[] The cases in this circuit usually say that a district judge asked to issue a preliminary injunction must consider four things: the harm (1) to the plaintiff and (2) to the defendant from the denial or grant of the injunction, respectively, (3) the likelihood of the plaintiff's prevailing on the merits when the case is tried, and (4) the effect on the public of granting or denying the preliminary injunction. The latest such decision is *Libertarian Party v. Packard, 741 F.2d 981*, slip op. at 4-5 (7th Cir. 1984). But , **[**6]** ***HN2***[] the heart of the four-factor test is a comparison of the likelihood, and the gravity, of two types of error: erroneously granting a preliminary injunction, and erroneously denying it. *Omega Satellite Products Co. v. City of Indianapolis, 694 F.2d 119, 123 (7th Cir. 1982)*. The likelihood of an error depends on the merits of the case as they appear from the preliminary-injunction hearing. If the plaintiff seems quite likely to win the case when it is tried, then the probability that granting the preliminary injunction will give him an undeserved benefit will seem small, and granting the injunction will be the decision that minimizes the likelihood of an error. ***HN3***[] If, moreover, the plaintiff will be hurt more by denial of the preliminary injunction than the defendant will be hurt by its grant, the gravity of the error in denying the preliminary injunction should it turn out later that the plaintiff was entitled to the injunction (there would of course be no error if it turned out he was *not* entitled) will clearly exceed that **[**7]** of erroneously granting it; and the disparity **[*591]** will be further magnified if the public as well as the plaintiff will be harmed by denying but not by granting the injunction. The hypothetical case we have just described is an easy one for granting a preliminary injunction. And it is this case.

Expulsion from the Association would force General Leaseways to cease doing business under the NationaLease name and, more important, would deny it the right to obtain prompt and efficient service from members of the Association. This would not wreck General Leaseways completely, because it has other franchises; and, in any event, if it wins the suit, it will be entitled to damages for the loss of business caused by its expulsion. But since its National franchises are a major part of General Leaseways' business, expulsion might be a grievous, though probably not a lethal, blow. Out of a total of 17 franchises under which General Leaseways does business, four are from National. We do not know what fraction of General Leaseways' business is done under them, but the difficulties of proving lost profits (on which see, e.g., *Taylor v. Meirick, 712 F.2d 1112, 1119-22 (7th Cir. 1983)*, **[**8]** and *Hayes v. Solomon, 597 F.2d 958, 976-77 (5th Cir. 1979))* make it chancy to rely on a damage award to provide full compensation even where as in this case a preliminary injunction is not necessary to keep the plaintiff afloat while the suit is proceeding toward final judgment.

The countervailing harm to the Association from being forced to clasp a viper to its breast during what may be the protracted period until final judgment is rendered must also be considered, see *Jack Kahn Music Co. v. Baldwin Piano & Organ Co., 604 F.2d 755, 764 (2d Cir. 1979)*, but probably it is less than the harm to General Leaseways from being expelled. The principal thing the Association complains about is being forced to share confidential information with a firm whose expansion threatens to destroy the present balance among the Association's members. But the Association assures us that the information that members exchange under its auspices is the kind normally exchanged among members of a trade association, and is not so sensitive that it could significantly impair competition between General Leaseways and the other members -- if it were, the Association might **[**9]** stand condemned under other and clearer antitrust grounds than those advanced by General Leaseways. See *United States v. United States Gypsum Co., 438 U.S. 422, 441 n. 16, 446 n. 22, 57 L. Ed. 2d 854, 98 S. Ct. 2864 (1978)*; *Penne v. Greater Minneapolis Area Bd. of Realtors, 604 F.2d 1143, 1148 (8th Cir. 1979)*. It seems, then, that while the harm to General Leaseways if the preliminary injunction is denied is not of terminal gravity, the harm to the Association if the injunction is granted will, on the Association's own representations, be slight indeed.

Since the balance of harms strongly favors the grant of the preliminary injunction, it is not necessary for us to decide whether General Leaseways is certain or even highly likely to prevail at trial; it is enough that it has raised a substantial question on the merits. See, e.g., Roland Machinery Co. v. Dresser Industries, Inc., supra, slip op. at 12-14; *American Hospital Ass'n v. Harris, 625 F.2d 1328, 1331 (7th Cir. 1980)*; *Charlie's Girls, Inc. v. Revlon, Inc., 483 F.2d 953, 954 (2d Cir. 1973)* (per curiam). Until a few years ago it would have been possible **[**10]** to opine confidently not only that General Leaseways had some chance of prevailing but that it had an overwhelming chance: that when firms in the same line of business agree not to enter each other's territories they violate *section 1* of the Sherman Act even if they might be able to show that dividing markets had yielded economic benefits greater than any plausible estimate of the costs in diminished competition; that, in short, horizontal market divisions are illegal per se. See, e.g., *United States v. Topco Associates, Inc., 405 U.S. 596, 608, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972)*; *United States v. Sealy, Inc., 388 U.S. 350, 356-57, 87 S. Ct. 1847, 18 L. Ed. 2d 1238 (1967)*; *Timken Roller Bearing Co. v. United States, 341 U.S. 593, 598, 95 L. Ed. 1199, 71 S. Ct. 971 (1951)*; *United* ***[*592]*** *States v. Nationwide Trailer Rental System, Inc., 156 F. Supp. 800* (D. Kan.), aff'd without opinion, *355 U.S. 10, 2 L. Ed. 2d 20, 78 S. Ct. 11 (1957)*.

In both *Sealy* and *Topco*, a group of small competitors had divided markets on geographic lines as an incident to the sharing of a trademark, and the **[**11]** group argued that its market share was too small to make cartelization a palpable danger to competition or a plausible explanation of what it was doing. Apparently each group was just trying to prevent members from taking a free ride on other members' efforts to promote the trademark. And yet in both cases the market division was held to be a per se violation of *section 1*. In *Sealy* (as in *Timken*) the division of markets was coupled with price fixing, against which ***antitrust law*** has long come down very hard -- though, as we shall see, price fixing and division of markets have identical competitive effects. But *Topco* held that horizontal market division is illegal per se even if price fixing is not present. *405 U.S. at 609* at n. 9.

This case is even stronger for condemnation, because the free-rider argument made by National Truck Leasing Association is much weaker than the free-rider arguments in *Sealy* and *Topco*. A member of the Sealy group who promoted the Sealy trademark in his sales area by extensive (and expensive) advertising could not recoup his expenses by charging the people who saw his ads for the privilege of seeing them; virtually no **[**12]** one will pay to consume advertising. He could recoup only by selling his mattresses at a price that covered those expenses along with all his other costs. It is this form of recoupment that the free rider -- in *Sealy*, a manufacturer of mattresses under the same trademark who has not borne the expense of promoting the mark -- thwarts by invading the territory of the advertising manufacturer: by seeking, in other words, to reap where he has not sown. But members of National Truck Leasing Association charge each other for emergency repair service.

The Association argues that they do not charge the full price: that is, do not charge the premium -- indeed, the extortionate -- price they could get in an unregulated market for providing the prompt service to which members of the Association are entitled by its rules. When a truck breaks down, the owner is pretty much at the mercy of the nearest repair service. Unless he owns the service or has a contract with the owner or the sort of reciprocal-service arrangement that the Association has created for its members, he will not have access to a competitive market in repairs. (The salvage of ships in distress involves surprisingly similar **[**13]** problems, on which see Gilmore & Black, The Law of Admiralty 578-81 (2d ed. 1975).) Therefore, if one member of the Association -- General Leaseways, say -- grew so large relative to the others that it was consistently demanding more repairs on its trucks than it was performing on its fellow members' trucks, it would be exploiting the "underpricing" of repair service by the other members.

This argument is terribly speculative, though. As a member of the Association grows, he puts himself in a position to expect more service calls on himself (because he is serving a larger area) as well as to demand more service from others. Moreover, there is no evidence that the Association seeks to limit the growth of its members so that all remain about the same size. Also the Association does not limit repair prices, and it has not explained why its members do not (has not even shown they do not) charge fully remunerative prices for the repair services they provide each other. Even if they do refrain from gouging one another, such forbearance would be a burden or cost of repairing a fellow member's truck only if that repair job made it impossible to do another repair job that would fetch **[**14]** a higher price. The Association put in no evidence that this has ever happened.

It is not repairs that sellers find hard to charge for directly. It is *information* -- in the form of advertising, showroom display, sales demonstrations, courteous and informed salesmen, and other presale services -- that free riders in previous cases were **[*593]** able to take advantage of because the information was being "given away" by a seller who could recover his cost only by selling the product to the consumer who used the information. Repairing is not informing. And National's franchisees do little advertising or other promotion of the NationaLease trademark. They are selling to businesses, not consumers, and advertising usually is less important in selling to businessmen than to consumers. But whatever the reason for the lack of promotional effort, the division of markets cannot (on this record) be justified as a measure for promoting the NationaLease mark.

Aware that this is an easy case for condemnation under *Sealy* and *Topco*, the Association urges in veiled but unmistakable terms that these decisions are no longer good law, having been superseded by *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*, **[**15]** and *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*. *Sylvania* held that manufacturers can limit the sales territories of their distributors and dealers when it is reasonable to do so in order to prevent free riding. The Association argues that it is a detail whether the territorial restriction is imposed by the manufacturer on his dealers or by a group of manufacturers on each other, provided the restriction is a reasonable measure to prevent free riding.

The free-rider problem in *Sylvania* arose because dealers who had spent money promoting Sylvania television sets risked being undercut by other dealers -- dealers who had not made such expenditures, and who were thus exploiting the market created by the dealers who had. The free riders could undersell the other dealers because their costs of promotion naturally were lower. The same free-riding problem had called forth the territorial restrictions invalidated in *Sealy* and *Topco*. In all three cases there was plenty of interbrand competition, which is to say competition between sellers of the brand in question and sellers of other brands **[**16]** of the same product (mattresses, groceries, television sets), so the fact that the trademark licenses eliminated intrabrand competition was not worrisome. If the restriction on intrabrand competition did not enable the trademark licenses to make their brand more attractive to consumers, consumers would switch to competing brands.

There is, then, notwithstanding the approving citation of *Topco* in *Sylvania*, see *433 U.S. at 58 n. 28*, and in such later cases as *National Collegiate Athletic Ass'n (NCAA) v. Board of Regents, 468 U.S. 85, 104 S. Ct. 2948, 2959 n. 18, 2960* nn. 19, 21, *82 L. Ed. 2d 70 (1984)*; *Bunker Ramo Corp. v. United Business Forms, Inc., 713 F.2d 1272, 1283-84 (7th Cir. 1983)*; *Ohio-Sealy Mattress Mfg. Co. v. Sealy, Inc., 585 F.2d 821, 830-31 (7th Cir. 1978)*, and *United States v. Koppers Co., 652 F.2d 290, 293-94, 296 (2d Cir. 1981)*, a tension between *Sylvania* on the one hand and *Sealy* and *Topco* on the other. But since National Truck Leasing Association has not yet made a plausible free-rider argument, this is not the case -- not at the preliminary-injunction stage, **[**17]** anyway -- to try to resolve the tension.

Broadcast Music upheld the blanket licenses by which associations of composers sell musical performance rights to radio stations and other performance outlets. Since the blanket license gives the licensee, for a fixed fee, the right to play any composition in the association's library, it eliminates price competition among the composers belonging to the association. Nevertheless the Supreme Court held that the blanket license was not a per se violation of section 1 of the Sherman Act. National Truck Leasing Association argues in effect that after *Broadcast Music* no reasonable cartel agreement can be a per se violation of section 1. We hesitate to read the decision so broadly. Access to a repertoire of thousands of songs is not something the individual composer can give, so what the performing-rights associations are engaged in is not (or not just) the suppression of price competition among composers. It is the provision of a distinctive product -- access to a vast musical repertoire. Each **[*594]** association is the "producer," and is entitled to price its "product" as it wants as long as it does not collude with the other association. **[**18]** So viewed, *Broadcast Music* was not a cartel case.

There is nothing distinctive about the product involved in this case. Many firms offer full-service over-the-road commercial truck leasing; the Association merely makes it easier for small firms to offer it, by providing a reciprocal service arrangement that enables each member to provide his customers with emergency repair service anywhere in the nation. Unlike the composers' associations in the *Broadcast Music* case, this association sells nothing.

If this analysis is too formalistic -- if *Broadcast Music* is more realistically described as a case where the Supreme Court, though aware that an exclusive sales agency normally is a method of cartelization (see, e.g., *United States v. American Smelting & Refining Co., 182 F. Supp. 834, 855 (S.D.N.Y. 1960)*; Stigler, The Organization of Industry 41 (1968)), upheld exclusive sales agencies of composers because of the enormous efficiency of selling musical performing rights jointly (see *NCAA v. Board of Regents, supra, 104 S. Ct. at 2961*, where *Broadcast Music* is so described) -- National Truck Leasing Association still loses. ASCAP **[**19]** and BMI could not provide ready access to their entire repertoires if each radio station had to negotiate separately with each composer over the price of each song. But National's members could -- were it not for the territorial restrictions -- compete in each other's territories while continuing to provide each other emergency repair services of a specified quality at a specified price. Of course this would make the members each other's competitors in leasing and customers in repairs. But firms often have both a competitive and a supply relationship with one another. A manufacturer of aluminum might both sell aluminum to fabricators and do its own fabrication in competition with its customers. Airlines compete but also feed passengers to each other. Railroads compete but also join in offering through routes and joint rates. Oil companies compete in some markets and are joint venturers in others. It does not follow that because two firms sometimes have a cooperative relationship there are no competitive gains from forbidding them to cooperate in ways that yield no economies but simply limit competition. Compare *49 U.S.C. § 10706* (antitrust exemption of **[**20]** common carrier rate agreements); Newspaper Preservation Act, *15 U.S.C. §§ 1801-1804*; *Committee for an Independent P-I v. Hearst Corp., 704 F.2d 467, 481-82 (9th Cir. 1983)*; 4 Areeda & Turner, ***Antitrust Law*** para. 947, at p. 170 (1980).

After argument in this case, the Supreme Court decided the *NCAA* case, *supra*, and again refused to hold that an agreement between competitors not to compete was illegal per se under the Sherman Act. The agreement was among the college football teams that belong to the NCAA, and limited the number of football games that each team could license for television broadcast. The Supreme Court described this agreement as one to limit output. *104 S. Ct. at 2960*. That is the equivalent of a division of markets. ***HN4***[] A firm that is free from effective competition will reduce its output below the competitive level (whether directly or, as we shall see in a moment, indirectly by raising price). Consumers will pay more when supply is scarcer, yet it will cost the firm less to produce a smaller supply -- so the firm's profits will be greater at the reduced output. One way the firm can free itself from competition **[**21]** is by agreeing with sellers of the same product that they will not enter each other's markets; such an agreement will create a series of regional or local (sometimes, as in *Timken*, national) monopolies. An agreement on output also equates to a price-fixing agreement. If firms raise price, the market's demand for their product will fall, so the amount supplied will fall too -- in other words, output will be restricted. If instead the firms restrict output directly, price will as mentioned rise in order to limit demand to the reduced supply. Thus, with exceptions not relevant here, raising price, reducing output, **[*595]** and dividing markets have the same anticompetitive effects.

The Court held nevertheless that the NCAA's agreement to limit output had to be tested under the Rule of Reason, because organized athletic competition is "an industry in which horizontal restraints on competition are essential if the product is to be available at all." *Id. at 2961*. The essence of successful league competition is maintaining a balance of power among the competitors -- a goal antithetic to the goals of competition in a conventional economic market. *NCAA* may seem to go a **[**22]** step beyond *Broadcast Music* toward a regime in which only unreasonable horizontal restraints are illegal, because the Court in *NCAA* did not condition the applicability of the Rule of Reason on proof that the particular restriction that had been challenged was necessary if the product was to be brought to market at all. There was, however, a plausible connection between the specific restriction and the essential character of the product. Since the balance of power among the teams in the NCAA might be disturbed by disparities in team wealth, limiting the ability of the more popular teams to cash in on their popularity through unrestricted televising of their games might have promoted the NCAA's essential lawful objectives. It was arguable, in other words, that the television output restriction was "ancillary" to a lawful main purpose. See *United States v. Addyston Pipe & Steel Co., 85 F. 271, 281-82 (6th Cir. 1898)*, aff'd as modified, *175 U.S. 211, 44 L. Ed. 136, 20 S. Ct. 96 (1899)*; *Lektro-Vend Corp. v. Vendo Co., 660 F.2d 255, 265-66 (7th Cir. 1981)*; *Los Angeles Memorial Coliseum Comm'n v. National Football League, 726 F.2d 1381, 1395-96 (9th Cir. 1984)*; **[**23]** Bork, The Antitrust Paradox 29-30 (1978). But in this case the organic connection between the restraint and the cooperative needs of the enterprise that would allow us to call the restraint a merely ancillary one is missing. Although some degree of cooperation among members of National Truck Leasing Association in providing reciprocal services may well promote competition in the truck-leasing industry, no reason has been suggested why that cooperation requires that members be forbidden to compete with each other in leasing trucks.

The per se rule would collapse if every claim of economies from restricting competition, however implausible, could be used to move a horizontal agreement not to compete from the per se to the Rule of Reason category. We are told, therefore, to apply the per se rule when "the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output." *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., Supra*, 442 U.S. at 19-20, quoted in *National Collegiate Athletic Ass'n v. Board of Regents, supra, 104 S. Ct. at 2960*. In other words, **[**24]** ***HN5***[🡅] if the elimination of competition is apparent on a quick look, without undertaking the kind of searching inquiry that would make the case a Rule of Reason case in fact if not in name, the practice is illegal per se.

Taking a quick look here, we conclude, on the basis of the record compiled in the preliminary-injunction hearing, that the division of markets among National Truck Leasing Association's members is a per se violation of *section 1* of the Sherman Act. It is a horizontal market division that does not appear to be ancillary to the reciprocal provision of service or any other lawful activity. Our conclusion is reinforced, though only slightly, by some of the documents in the record. For example, one National franchisee writes another: "We have all the competition we need from the outside without having to compete with our 'brothers'. " And a consultant states with reference to the question of multiple franchises in large metropolitan areas: "Generally, adding an additional franchise to a metropolitan market has minimal benefits to the system as a whole (additional dues), and individual members (an additional service location). **[**25]** However, it has potentially significant competitive disadvantages to existing members in the multifranchise market." We attach rather little weight to internal company documents used to show **[*596]** anticompetitive intent, because, though they sometimes dazzle a jury, they cast only a dim light on what ought to be the central question in an antitrust case: actual or probable anticompetitive effect. But here they corroborate an inference of anticompetitive effect based on the objective evidence of what the defendant had done.

As it is possible that we are wrong in holding that this case is governed by the per se rule, we shall follow the prudent example of the court of appeals in the *NCAA* case (see *Board of Regents v. National Collegiate Athletic Ass'n, 707 F.2d 1147, 1157 (10th Cir. 1983)*, aff'd, *468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984))* and decide also whether, if the case were governed by the Rule of Reason, we would still have to uphold the preliminary injunction on the present record.

HN6[🡅] With the Rule of Reason becoming a more popular **[**26]** rule of decision in the wake of *Sylvania*, some progress has been made toward giving it some structure by requiring that the plaintiff first prove that the defendant has sufficient market power to restrain competition substantially. See, e.g., *Jack Walters & Sons Corp. v. Morton Building, Inc., 737 F.2d 698, 702 (7th Cir. 1984)*; *Valley Liquors, Inc. v. Renfield Importers, Ltd., 678 F.2d 742, 745 (7th Cir. 1982)*; *Graphic Products Distributors, Inc. v. Itek Corp., 717 F.2d 1560, 1568 (11th Cir. 1983)*; *Muenster

Butane, Inc. v. Stewart Co., 651 F.2d 292, 298 (5th Cir. 1981); cf. Lektro-Vend Corp. v. Vendo Co., supra, 660 F.2d at 268; Easterbrook, *Vertical Arrangements and the Rule of Reason*, 53 Antitrust L.J. 135, 157-68 (1984). If not, the inquiry is at an end; the practice is lawful. But if it seems that the defendant does have the power to restrain trade substantially, then inquiry proceeds to the question whether the challenged practice was likely -- with due consideration for any justificatory evidence presented by the defendant -- to help rather than hurt competition, **[**27]** viewed not as rivalry as such but as the allocation of resources that maximizes consumer welfare.

The markets for commercial truck leasing are, as we have said, local because of customer preference; and General Leaseways presented evidence that within these local markets, profits are higher the fewer the leasing firms. This suggests an absence (more precisely, a weakness) of competition. In a fully competitive market, price is equal to cost (appropriately measured) regardless of the number of firms; in a noncompetitive market, price rises as the number of firms falls, because collusion is easier with fewer firms. To counter this evidence the Association offered evidence of no great probative force, see United States v. Philadelphia National Bank, 374 U.S. 321, 366-67, 10 L. Ed. 2d 915, 83 S. Ct. 1715 (1963), that the members of the industry consider themselves to be in intense rivalry, and more impressive evidence that truck-leasing companies compete with one another, with motor common carriers, and even with their own customers, who can always buy their own trucks. However, national truck-leasing companies such as Hertz, Avis, and Ryder are not (so far as the **[**28]** record shows) present in every market. And since motor common carriers remain heavily regulated by the federal government (see 49 U.S.C. §§ 10701, 10702, and especially 10704(a)(1)), there is no assurance that the rates these carriers charge are competitive rates; if they are supracompetitive, they create an umbrella beneath which colluding sellers of a substitute product can charge supracompetitive prices too. And while some customers of commercial truck-leasing firms might buy their own trucks if truck-leasing rates rose significantly above the competitive level, others would not have sufficient trucking needs to justify buying their own trucks unless lease rates became astronomical; and even the customers in the first group would have to worry about getting emergency repair service at reasonable cost.

It is not a good enough answer to all this that new firms can easily enter the over-the-road truck-leasing business if rates rise above the competitive level. Since effective competition requires that each lessor be able to guarantee nationwide repair service **[*597]** for his trucks, either the new entrant must enter on a national scale, which would **[**29]** take time, or he must enter as a member of a league of small firms, such as the Association, which may take some time to arrange, too. This also answers the Association's argument that its members are free under its rules to enter each other's markets so long as they do not do so as franchisees either of national firms or of the Association. This means they can enter provided they do not enter on an efficient basis, which would require that they be leagued with other firms in a nationwide service network.

No doubt the Association, with all the competition it does face, is not a powerful cartel. And yet on this record we cannot say that the district judge clearly erred in finding that the restrictions that General Leaseways defied have a substantial anticompetitive potential. This finding is dispositive under the Rule of Reason because the Association's attempted justification based on free-rider problems is unpersuasive. Cf. North American Soccer League v. National Football League, 670 F.2d 1249, 1257-61 (2d Cir. 1982).

If, however, it is quite possible that the Association is attempting to cartelize the local markets its members do business in, what equity **[**30]** has General Leaseways in seeking even temporary protection from being expelled? If cartel members have a falling out, it might seem contrary to the spirit of ***antitrust law*** for a court to lend its aid to one side of the dispute or the other. The question we must ask, however, is not whether General Leaseways makes an appealing plaintiff but whether granting it a preliminary injunction (to be made permanent, presumably, if it prevails in the trial on the merits) would advance or retard the objectives of the antitrust laws. For ever since the Supreme Court, in Perma Life Mufflers, Inc. v. International Parts Corp., 392 U.S. 134, 20 L. Ed. 2d 982, 88 S. Ct. 1981 (1968), rejected the defense of *in pari delicto* in antitrust cases, it has been clear that ***HN7***[] whenever some maxim of equity (such as that to get equitable relief you must have "clean hands") collides with the objectives of the antitrust laws, the equity maxim must give way.

Preserving General Leaseways as a member in good standing of the Association would advance those objectives. If the Association is a cartel, **[**31]** still General Leaseways appears determined to disrupt it. And if General

Leaseways has no remedy against being expelled by the Association, the Association will be able with relative impunity (relative because there is always the possibility of governmental antitrust action) to use expulsion as a sanction against any member who refuses to abide by its anticompetitive restrictions. By depriving the Association of this sanction, the injunction encourages members to ignore those restrictions. There would be a problem if the injunction gave General Leaseways access to enough information about the other members' prices or costs to facilitate price fixing, but both parties assure us that the information exchanges made through the Association are lawful trade association activities (although one of the documents in the record refers to exchanging "intimate proprietary" information), and we are told that the Justice Department is monitoring this litigation. There would also be a problem -- a very serious one -- if General Leaseways were seeking damages measured by the loss of cartel profits that it might obtain as a member in good standing of the Association. See *Kestenbaum v. Falstaff Brewing Corp., 575 F.2d 564, 569-70 (5th Cir. 1978)*; **[**32]** *Murphy Tugboat Co. v. Crowley, 454 F. Supp. 847, 856 (N.D. Cal. 1978)*. But no issue of damages is before us.

Although we uphold the preliminary injunction, we do not mean to prejudge the outcome of the trial on the merits. Our conclusions are based on the incomplete record made in the preliminary-injunction proceeding. The full trial may cast the facts in a different light.

AFFIRMED.

Advisory Information & Management Systems, Inc. v. Prime Computer, Inc.

United States District Court for the Middle District of Tennessee, Nashville Division

September 20, 1984

No. 3-83-0972

Reporter

598 F. Supp. 76 *; 1984 U.S. Dist. LEXIS 23471 **; 1984-2 Trade Cas. (CCH) P66,237

Advisory Information and Management Systems, Inc., Plaintiff v. Prime Computer, Inc., Defendant

Core Terms

dealers, sales, hardware, software, market share, percent, manufacturer, products, orders, discounting, negotiations, summary judgment, rule of reason, restrictions, computer system, upgrade, preliminary injunction, complete system, added value, direct sale, end user, interbrand, practices, vertical, argues, retail, monopolization, cancellation, concerted activity, Sherman Act

LexisNexis® Headnotes

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Antitrust & Trade Law > Sherman Act > General Overview

HN1[] **Regulated Practices, Price Fixing & Restraints of Trade**

A Sherman Act, *15 U.S.C.S. § 1*, violation requires concerted action between the manufacturer and other distributors. Unilateral action of the manufacturer does not constitute a Sherman Act, *15 U.S.C.S. § 1* , violation.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Business & Corporate Compliance > ... > Distributorships & Franchises > Termination > Antitrust Issues

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Law > Distributorships & Franchises > Termination > General Overview

HN2[] **Regulated Practices, Private Actions**

Concerted action is not established merely by proof of a manufacturer's termination of a distributorship in response to complaints by other dealers. Rather, the antitrust plaintiff should present direct or circumstantial evidence that reasonably tends to prove that the manufacturer and others had a conscious commitment to a common scheme designed to achieve an unlawful objective.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Nonprice Restraints

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN3[] **Vertical Restraints, Nonprice Restraints**

Nonprice vertical restrictions are evaluated with lower scrutiny than price restrictions, which are per se illegal.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN4[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Vertical restraints, actions originating as unilateral action from the manufacturer, should generally be analyzed under the rule of reason.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN5[] **Regulated Practices, Price Fixing & Restraints of Trade**

To determine whether restrictions are imposed vertically or horizontally, the court must examine the effect and purpose of the restrictions.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN6[] **Price Fixing & Restraints of Trade, Vertical Restraints**

The per se rule applies where practices have a destructive effect on competition without redeeming qualities.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN7[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

Evidence of complaints from dealers to the manufacturer alone are insufficient to establish a horizontal restraint.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN8[] **Regulated Practices, Market Definition**

Although at trial, the plaintiff has the burden to show market definition, for summary judgment consideration, defendant, as movant, has the burden of establishing the issue in its own favor.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN9[] **Regulated Practices, Monopolies & Monopolization**

In determining whether a defendant had monopoly power, the court must examine the strength of competition, the probable development of the industry, customer demand, and the percentage of market share of the defendant.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN10[] **Actual Monopolization, Monopoly Power**

To determine whether defendant is liable for attempted monopolization under Sherman Act, *15 U.S.C.S. § 2*, the court must determine whether defendant has a dangerous probability of success. This requires a showing that the defendant possesses market strength that approaches monopoly power, the ability to control prices and exclude competition.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN11[] **Monopolies & Monopolization, Actual Monopolization**

Where there is strong competition in a rapidly developing industry, a market share of roughly 25 percent cannot present a dangerous probability of monopoly power.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN12[] **Injunctions, Preliminary & Temporary Injunctions**

In order to determine whether to grant a preliminary injunction pursuant to *Fed. R. Civ. P. 56(c)*, the court must evaluate (1) the merits of plaintiff's claim for ultimate relief; (2) the harm facing plaintiff if interim relief is denied; (3) the harm facing defendant or others if interim relief is granted; and (4) the public interest in granting or denying interim relief.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN13[] **Injunctions, Preliminary & Temporary Injunctions**

No single factor is determinative in assessing whether to grant a preliminary injunction; all must be weighed equitably. One of the considerations required is the probability that plaintiff will succeed on the merits. Additionally, plaintiff must demonstrate that in the absence of relief, plaintiff will be irreparably harmed.

Opinion by: WISEMAN

Opinion

[*79] Memorandum

WISEMAN, Ch. J.:

This case involves a dispute between Advisory Information and Management Systems, Inc. [AIMS] and Prime Computer, Inc. [Prime], and raises issues of ***antitrust law*** and contract law. The matters before the Court are plaintiff AIMS ' motion for a preliminary injunction and defendant Prime's motion for summary judgment. [1] In order to address these matters, it is necessary to examine the history of transactions between the two parties.

[2]** Prime is a manufacturer of small and medium-sized general purpose computers. It produces actual components or hardware, operating software, which manages the resources and operations of the computer system, application software, and accessories. Prime's components are produced to be compatible with one another so that add-on and upgrade equipment may be added to increase system performance without having to replace the entire system. Prime entered into several dealer agreements in 1978, including one with AIMS ' predecessor in interest, Tennessee Data Systems. The dealers apparently approached Prime because they desired hardware sufficient to support their application software, which performs special functions as part of a complete computer system. Prime retained these dealers because it did not produce very much application software at that time and wanted to market its products to end users who wished to purchase entire systems. (Finney Aff. para. 4; Kelly Aff. para. 3; Naylor Aff. para. 2). Prime's direct sales force had been unable to reach these customers successfully. Prime offered the dealers incentive price discounts to help their marketing. Prime emphasized that these dealer **[**3]** sales of Prime equipment were only for combined sales with the dealer's application software for users principally interested in complete systems with application software. (Finney Aff. para. 5; Kelly Aff. para. 3; Davidson Aff. para. 4).

AIMS is a full line dealer of hardware, software, systems, and service bureau operations. Its principal officer, William Cargile, was also an officer in Tennessee Data Systems. He entered into a dealer agreement with Prime, which was assigned to his new company, AIMS, on September 4, 1980. The dealer agreement did not specifically

[1] At oral argument on pending motions, June 22, 1984, plaintiff conceded that it is not entitled to summary judgment. Prime has continued to pursue its own motion for summary judgment.

prohibit sales of Prime hardware and equipment apart from complete systems incorporating application software. The agreement provided that the dealer was Prime's exclusive dealer of "Information" operating software in the area of Tennessee and was entitled to sell systems and products enumerated by Prime and listed in Schedule 2 to the agreement. (Kirby Aff. Exhibit A). The agreement also provided sales quotas, listing the number of systems the dealer was required to meet to satisfy and maintain the agreement. (*id*. 3.1 Schedule 3). Prime was obligated to install the equipment sold, (*id*. 7), and the dealer was required **[**4]** to promote the Prime products and to maintain facilities to display and demonstrate the systems (*id*. 8).

Prime became aware in early 1981 that some dealers engaged in "hardware-only" sales or sales of Prime's discounted equipment without application software. Prime considered these sales to be disruptive of **[*80]** its direct sales efforts and contrary to its original understanding with its dealers. (Finney Aff. para. 7; Kelly Aff. para. 4). Prime attempted to get the dealers to stop these sales and realized the dealer agreement did not squarely prohibit them. Prime contemplated reaching a new dealer agreement that would limit or remove the dealers' exclusive sales territories for its "Information" operating software and allow for direct sales of this software by Prime. (Finney Aff. para. 8, Kelly Aff. para. 5, Davidson Aff. paras. 5, 6). When presented with the new proposal in early 1982, the existing dealers refused to agree to it. (Finney Aff. para. 9; Kelly Aff. para. 6; Davidson Aff. para. 6; Naylor Aff. para. 3).

In mid-1982, Prime convened a "pricing task force." (Kaufman Supplemental Aff. Exhibit 13; Plaintiff's Appendix 136-37). The committee concluded that domestic **[**5]** sales were made with average discounts of about 20 percent. It found also that customers considered Prime "an aggressive and disorganized discounter." Prime's president "emphasized that discounting is a learned activity" that can be "unlearned." (*Id*.). Other Prime internal memoranda indicate that in June of 1982, it targeted AIMS as a "hardware broker," and in the same notice stressed that AIMS was in default of its dealer quota. (Kaufman Aff. Exhibit 4; Plaintiff's Appendix 81-82). Prime planned to place AIMS on probation for brokering and then terminate its dealer agreement. (*Id*.).

Prime sent notices to most of its dealers in June or July of 1982, advising them that they were in default of their dealer quotas. AIMS received one such letter on June 15, 1982. (Cargile Aff. para. 8 and Exhibit 3; Plaintiff's Appendix 11). At the July 1982 dealer meeting, many dealers, including AIMS, challenged the default letters and Prime's plans to remove the dealers' exclusivity for sales of "Information" software. (Kelly Aff. para. 9; Davidson Aff. paras. 7, 8; Naylor Aff. paras. 4, 5). Prime agreed to negotiate disagreements after the dealers considered retaining an attorney. Prime **[**6]** suspended action on the default letters pending analysis of the dealer program. (Cargile Aff. Exhibit 4; Plaintiff's Appendix 12). Most of Prime's dealers, 82 percent, were in default at this time. (Prime document-Plaintiff's Appendix 187). The dealers selected two negotiators, Davidson and Naylor, to negotiate on their behalf. AIMS and its president Cargile, authorized and supported these negotiations. They were informed of progress by the negotiators. (Davidson Aff. para. 8; Kelly Aff. para. 11; Naylor Aff. paras. 5, 6, & Exhibit A).

In the fall of 1982, AIMS ordered hardware from Prime for resale to DataMation Data Centers [DataMation], including a complete system as well as separate add-on and upgrade hardware. (Supplemental Cargile Aff. para. 21 and Exhibit 14; Plaintiff's Appendix 28, 43). Prime received notice on October 27, 1982, that AIMS was the source of equipment sold at discount to end users and installed and maintained by Prime's field engineering staff. Prime's vice president for marketing Bob Claussen emphasized that this must be stopped. (Prime document, Plaintiff's Appendix 123). Prime planned to "make a file" on AIMS because of this. (Plaintiff's Appendix 133).

[7]** The negotiations between Prime and the dealer committee produced a proposed new amendment to dealer agreements. (Kirby Aff. Exhibit B). The amendment allowed dealers to retain exclusivity for sales of "Information" software but allowed Prime to reduce areas of exclusivity for poor sales. It also reduced sales quotas for dealers. Additionally, it forbade "hardware-only" sales, allowing sales of add-on and upgrade equipment only where incorporated into a system with application software or dealer services "rendered prior to sale or lease to any end user." [2] (*Id*. para. 3). **[*81]** The amendment also provided for additions to the schedule of application software

---

[2] The applicable provision states:

allowed for incorporation into systems with Prime hardware. It provided that additions had to be made with the prior consent of Prime, "which consent shall not be unreasonably withheld." (*Id*.). *See supra* footnote 2. On November 5, 1982, Prime forwarded the proposed amendment to AIMS for acceptance. (Cargile Aff. paras. 10, 11 and Exhibit 5; Plaintiff's Appendix 4-5, 13).

[8]** There is some dispute regarding the "concerted activity" underlying adoption of the amendment. President Cargile asserts that the representatives of the dealer committee, Naylor and Davidson, had stated prior to negotiations that price cutting by DataMation and other "hardware brokers" had to be stopped by cutting off their supply. (Cargile Aff. para. 11, Plaintiff's Appendix 5). Cargile also claims that Prime's eastern operations dealer business manager, Jack Kelly, had told Cargile that Prime was under pressure from its direct sales force and other dealers to prevent sales to DataMation because their discounting practices competed with Prime and its dealers. (*Id*. § 5; Plaintiff's Appendix 4). These allegations support AIMS ' contention that the amendment was the result of concerted activity between Prime and the independent dealers. The negotiators themselves and Prime personnel, however, claim that the provision, called an "added value" provision, originated exclusively with Prime. (Davidson Aff. para. 10; Naylor Aff. para. 8; Kelly Aff. para. 16). They claim that the dealer negotiators fought against adoption of the added value provision but ultimately were forced to concede **[**9]** it to attain other concessions from Prime. (*Id*.). Davidson and Naylor each specifically deny ever making statements to Cargile that price cutting by hardware brokers had to be stopped by cutting off their supply. (Davidson Aff. para. 12; Naylor Aff. para. 10). Kelly specifically denies ever telling Cargile that he was under pressure from other dealers to prevent "hardware-only" sales. (Kelly Aff. para. 16). These statements support Prime's assertion that the added value restriction was adopted unilaterally by Prime, without concerted activity. At any rate, in September 1982, when Naylor and Davidson advised dealers of the progress of negotiations, they described the added value provision as "a desireable [sic] objective" and indicated no opposition to it. (Cargile Aff. Exhibit 7; Plaintiff's Appendix 21). They stressed that Prime wanted the provision "to try and stop gross discounting by a Dealer against PRIME's direct sales force, or against another Dealer." (*Id*.).

Prime dealers were given the choice of signing the amendment or continuing under their original agreements. (Davidson Aff. para. 11, Kelly Aff. para. 13, Naylor Aff. para. 9). Under the old agreements, however, **[**10]** most were threatened with default for failure to meet the previous quotas. Several days after sending the proposed amendment to AIMS for signature on November 5, 1982, Prime's Jack Kelly telephoned AIMS ' William Cargile to determine whether he would sign. Cargile indicated that he would agree to the amendment. (Kelly Aff. para. 11). On November 12, 1982, Kelly ordered AIMS ' pending orders "on hold" because they were "hardware only" orders and were contrary to the new amendment to the dealer agreement. (Kaufman Supplemental Aff. Exhibit 9, Plaintiff's Appendix 121; Kelly Aff. para. 14). On November 18, 1982, Kelly canceled the pending orders **[*82]** from AIMS. (Kaufman Supplemental Aff. Exhibit 8; Plaintiff's Appendix 103; Kelly Aff. para. 15). There is some dispute about whether Kelly informed Cargile that cancellation was based on the new amendment. (*Compare* Supplemental Cargile Aff. para. 25, Plaintiff's Appendix 29 *with* Kelly Aff. para. 15). Kelly did send a letter dated December 3, 1982, stating that the orders were cancelled because Prime "will not accept equipment-only orders for items being purchased by AIMS, Inc. for others, who, in turn, compete with our Direct **[**11]** Sales or Authorized Reseller Sales." (Cargile Supplemental Aff. Exhibit 17; Plaintiff's Appendix 57, 124, 139). Regardless of whether Prime actually relied on the amendment to the dealer agreement in canceling AIMS ' orders, the amendment provided a

---

"Dealer hereby certifies that each Prime system listed on the Prime Computer, Inc. Domestic Price List attached as Schedule 2 to the Dealer Agreement, purchased and licensed under the cited Dealer Agreement, is to be incorporated into a system consisting of Dealer application software, which Dealer then sells or leases in the regular course of its business. Dealer may substitute Dealer services for the requirement to add application software, and such services may be rendered by either the Dealer or any party in behalf of the Dealer or having a contractual relationship with the Dealer, so long as such services are rendered prior to sale or lease to any end user. Application software to be included in Prime Systems purchased hereunder is listed in Exhibit B attached hereto and made a part hereof. Additions to and deletions from the Exhibit B list of application software may be made from time to time subject to the prior written consent of Prime, which consent shall not be unreasonably withheld. Dealer agrees that in no event shall Prime systems purchased/licensed hereunder be resold, leased, or otherwise transferred without said application software or the performance of services by the Dealer as aforesaid. "

contractual basis for rejecting the orders. The amendment, when signed by Cargile for AIMS in November of 1982 had an effective date of September 15, 1982. (Kirby Aff. Exhibit B; Cargile Aff. para. 10 and Exhibit 5; Plaintiff's Appendix 16). After signing, AIMS was thus bound by the terms of the amendment for the pending orders that Prime canceled on November 18, 1982.

Sherman Act Section I

AIMS argues that Prime's cancellation of orders pursuant to its policy against "hardware only" sales was a violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*. This statute proscribes concerted activity in restraint of trade. Prime has challenged this allegation in a motion for judgment on the pleadings and in a motion for summary judgment. At the hearing on pending motions on June 22, 1984, this Court granted AIMS ' motion to amend its pleadings to allege a conspiracy between Prime and its dealers. AIMS has based its *Section 1* claims **[**12]** almost exclusively upon this theory, although it raised another theory in opposing Prime's motion for judgment on the pleadings. [3]

In *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*, the Supreme Court held that ***HN1***[] a *Section 1* violation requires concerted action between the manufacturer and other distributors. Unilateral action of the manufacturer does not constitute a *Section 1* violation. *See also* *United States v. Colgate & Co., 250 U.S. 300, 307, 39* ***[**13]*** *S. Ct. 465, 63 L. Ed. 992 (1919)* (Manufacturer may independently refuse to deal with distributors who sell below manufacturer's resale price). The *Monsanto* Court held that ***HN2***[] concerted action is not established merely by proof of a manufacturer's termination of a distributorship in response to complaints by other dealers. Rather, "the antitrust plaintiff should present direct or circumstantial evidence that reasonably tends to prove that the manufacturer and others 'had a conscious commitment to a common scheme designed to achieve an unlawful objective. '" *104 S. Ct. at 1471, 79 L. Ed. 2d at 785-86* (quoting *Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105, 111 (3d Cir. 1980))*.

In the present case, there is a fact issue regarding whether Prime was pressured into adopting its policy against hardware only sales. AIMS has presented evidence that Jack Kelly spoke of pressure from other dealers to prevent sales to hardware brokers, that the value added provision arose out of negotiations with the dealer ad hoc committee, that the dealer negotiators had spoken to AIMS of the need to prevent sales to hardware brokers, that other dealers may have informed Prime of AIMS' sales, **[**14]** and that Prime pressured AIMS to desist. Although Prime has submitted affidavits denying all such allegations of concerted activity, AIMS has clearly raised a factual issue of conspiracy that is inappropriate for summary judgment disposition. **[*83]** AIMS has not rested merely on dealer complaints.

AIMS has argued that Prime's practices are *per se* illegal price fixing, boycotting, and market division. Prime has argued that its practices are not *per se* *Section 1* violations, but practices which, analyzed under the rule of reason, are not unreasonably anticompetitive. In support of its price fixing argument, AIMS argues that the added value provision to which it was compelled to agree permits only the dealer who initially sold a computer system for Prime to sell add-on and upgrade hardware and equipment. This equipment, because of the compatibility of Prime's products, generally can be installed without reprogramming or other dealer services and is installed directly by Prime personnel. Moreover, upgrades do not ordinarily require new application software. The new amendment therefore locks in end users to deal only with the original dealer from whom the user purchased a system. **[**15]** AIMS argues that because this avoids price competition among dealers, it is *per se* unlawful concerted action to fix prices. Additionally, AIMS contends that the arrangement amounts to a boycott of discounters and a horizontal customer allocation among dealers, all *per se* violations of *Section 1* of the Sherman Act.

---

[3] Aims defended its pleading by arguing that it could be supported by a theory of a conspiracy between Prime and AIMS itself, where Prime actively coerced AIMS into unwilling compliance with its demands. This theory is inadequate because AIMS ' cooperation was unnecessary for the success of Prime's marketing arrangement. *See* *Barnosky Oils Inc. v. Union Oil Co. of California, 665 F.2d 74, 77-79 (6th Cir. 1981)* (no *section 1* conspiracy where plaintiff did not show defendant needed plaintiff's acquiescence).

Prime argues that the arrangement is a non-price restriction which is judged under the rule of reason to determine whether the practice constitutes an unreasonable restraint of competition. *See* Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977). Prime argues under this standard that its practices are not unreasonable because they beneficially enhance interbrand competition. Specifically, Prime urges that allowing dealers to sell only complete systems and subsequent upgrades only to those same purchasers of complete systems allows Prime to penetrate markets it could not otherwise reach, to control the quality and reputation of the systems installed, and to prevent dealers from free-riding on Prime's marketing efforts.

Prime has not required that AIMS sell to end users at a specific price; it has reserved certain **[**16]** sales for itself and required end users who desire upgrades to deal only with their original Prime dealers. Prime contends that restricting "hardware only" sales encourages dealers to develop the market for users of complete computer systems, thus enhancing Prime's ability to compete with other brands of computers. This also limits interbrand retail price competition among dealers and direct sales staff for add-on and upgrade equipment. Vigorous competition still remains among dealers in the market for complete computer systems.

It is well settled that ***HN3***[] nonprice vertical restrictions are evaluated with lower scrutiny than price restrictions, which are *per se* illegal. *See* Continental T.V. Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 51 n.18, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977). While the restrictions in this case reduce interbrand price competition and undoubtedly affect retail prices, they do not amount to retail price maintenance, which is illegal *per se* under Section 1. Preventing "hardware only" sales by dealers enhances Prime's access to end users of complete computer systems by ensuring that Prime dealers focus their sales on the full product market Prime employs them **[**17]** to reach. Hardware only sales diverted some dealers' attention from full-product sales, for which dealers receive discounts and training from Prime, and interfered with the sales efforts of Prime's direct sales force. Broad discounting by dealers could lead to dealers becoming clearinghouses for Prime equipment rather than maintainers of showrooms and promoters of full computer systems with Prime equipment and dealer application programs. This would weaken Prime's ability to compete interbrand.

Prime has also asserted interests in quality control and in avoiding the free-riding effect of having discounting dealers benefit from other dealers' and Prime's promotion service and marketing. AIMS contends this interest is illusory as far as service and **[*84]** quality control are concerned because Prime's field service personnel maintain the equipment regardless of who made the sale. Moreover, AIMS argues, dealer service under Prime's new system only becomes important *before* sales of systems; there is no incentive for the original dealers to provide services after the original sale because they will have the add-on and upgrade service on that account regardless of their subsequent **[**18]** efforts. AIMS also dismisses Prime's quality control interest as "makeweight." Because Prime routinely authorized the application software to be sold with its systems, and maintains all equipment itself, AIMS argues that Prime has no legitimate concern that end users will be supplied with quality control.

Although many of these contentions are meritorious and should be considered by a factfinder at trial evaluating the reasonableness of Prime's restrictions, Prime has established that its measures are not price maintenance treated always as *per se* illegal. Discounting Prime hardware and selling in bulk is a form of free-riding on other dealers who deal only in complete systems and promote the systems and maintain exhibits as required by their dealer agreements. Moreover, Prime's ability to control approval of application software to be sold with equipment does foster quality by ensuring compatibility with the computer system. Because the measures enhance interbrand competition in this way and foster penetration of the market for users of complete systems, the added value provision is not *per se* illegal price maintenance. Like many other nonprice restraints, it has a price **[**19]** effect. Because it allows Prime to compete more effectively with its vigorous competitors, it is not without redeeming qualities.

In Davis-Watkins Co. v. Service Merchandise, 500 F. Supp. 1244 (M.D. Tenn. 1980), *aff'd*, 686 F.2d 1190, 1196-97 (6th Cir. 1982), *cert. denied sub nom., Service Merchandise Co. v. Amana Refrigeration, Inc., 466 U.S. 931, 104 S. Ct. 1718, 80 L. Ed. 2d 190 (1984)*, the Sixth Circuit held that ***HN4***[] vertical restraints, actions originating as unilateral action from the manufacturer, should generally be analyzed under the rule of reason. ***HN5***[] To determine whether restrictions are imposed vertically or horizontally, the court held that one must examine the effect and purpose of the restrictions. Because the court found the challenged restrictions were in the manufacturer's own interest and consistent with its market strategy, and because it found insufficient evidence of coercion by dealers to act against the manufacturer's own interest, the court upheld this Court's summary judgment finding that the market allocations in question did not amount to a horizontal group boycott, *per se* unlawful under *Section 1*.

The *Davis-Watkins* court relied substantially **[**20]** on *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*. The Court in *Sylvania* held that vertical restraints limiting the number of franchises authorized by a manufacturer must be analyzed under the rule of reason. Observing that ***HN6***[] the *per se* rule applies where practices have a destructive effect on competition without redeeming qualities, *id. at 50, 97 S. Ct. 2549, 53 L. Ed. 2d 568*, the Court emphasized that vertical restraints often benefit competition. Vertical restrictions, the Court held, "promote interbrand competition by allowing the manufacturer to achieve certain efficiencies in the distribution of his products." *Id. at 54, 97 S. Ct. 2549, 53 L. Ed. 2d 568*. The Court stressed that limitations on distributors of a manufacturer's products induce retailers to promote the products and prevent the "free rider" effect of retailers providing products without services. *Id. at 55, 97 S. Ct. 2549, 53 L. Ed. 2d 568*. Although the Court noted that some vertical restrictions might justify *per se* prohibition, it held that departures from the rule of reason must be based on demonstrated economic effect. *Id. at 58, **[**21]** 97 S. Ct. 2549, 53 L. Ed. 2d 568*. Thus, the Court established the rule of reason as the general rule for treatment of vertical restraints under *Section 1*.

As in *Davis-Watkins*, the evidence in this case does not establish a *per se* **[*85]** violation of *Section 1*. The flurry of papers and internal Prime memoranda indicate clearly that the prohibitions of "hardware only" sales originated with Prime. Although there is sufficient evidence of concerted activity to present the *Section 1* issue to a jury, AIMS has not presented the evidence required to indicate horizontal restraints, originating with dealers, to justify departure from the rule of reason. There is no evidence to establish dealer coercion causing Prime "to act otherwise than consistent with its marketing strategy." *Davis-Watkins*, 686 F.2d at 1199. Again, as in *Davis-Watkins*, ***HN7***[] evidence of complaints from dealers to the manufacturer alone would be insufficient to establish a horizontal restraint. *Id*. (citations omitted), *500 F. Supp. at 1249*.

The *Davis-Watkins* court supported its decision to apply the rule of reason with findings of potential benefits to interbrand competition in the form of attracting **[**22]** aggressive retailers and inducing them to promote the products actively, eliminating the free rider effect, creating an efficient market distribution system, and maintaining control over safety and quality of the product. *Id. at 1200-01* (quoting *Abadir & Co. v. First Mississippi Corp., 651 F.2d 422 (5th Cir. 1981))*. Finding these benefits, the court held the economic conditions that justify the *per se* rule were not present and therefore it did not apply. *Id. at 1201*. As found above in discussing whether the amendment is a price restraint, Prime's distribution system fosters interbrand competition in similar ways. It is appropriate for rule of reason analysis.

Prime has moved for summary judgment on the rule of reason issue, claiming that its actions do not have an unreasonable anticompetitive effect with reference to the overall effect on competition among all competitors in the relevant market. This motion must be denied. The data on Prime's ability to affect competition is inconclusive, but it is not insubstantial as a matter of law. Nor is it clear the Prime's policies have no effect on competition through retail prices. A trial on the merits is necessary to determine **[**23]** the reasonableness of Prime's system of distribution. *See Davis-Watkins, 500 F. Supp. at 1247*.

Sherman Act *Section 2*

AIMS has alleged that Prime took anticompetitive actions to monopolize trade and commerce in violation of *Section 2* of the Sherman Act, *15 U.S.C. § 2*. The issues under this cause of action revolve around Prime's market share and the definition of the relevant market. AIMS has not phrased its claim as one for attempted monopolization.

However, even if it is considered as such, [4], AIMS would have to demonstrate that Prime will achieve a substantial market share through its "hardware-only" restriction. *See* Nifty Foods Corp. v. Great Atlantic & Pacific Tea Co., 614 F.2d 832, 841 (2d Cir. 1980) (affirming summary judgment holding that plaintiff did not show that defendant with market share of 48 to 33 percent had a dangerous probability of success in attempted monopolization). *See also* White & White, Inc. v. American Hospital Supply Corp., 723 F.2d 495, 507 (6th Cir. 1983) (attempt to monopolize requires evaluation of market power).

[24]** There is conflicting and inconclusive evidence regarding both market definition and market share. ***HN8***[] Although at trial, the plaintiff has the burden to show market definition, for summary judgment consideration, Prime, as movant, has the burden of establishing the issue in its own favor. Hayden Publishing Co. v. Cox Broadcasting Corp., 730 F.2d 64, 68 (2d Cir. 1984). AIMS, asserting that Prime's market share is not insufficient for a Section 2 cause of action as a matter of law, has produced data demonstrating that Prime has focused on specified market segments. AIMS seeks to demonstrate that Prime's market **[*86]** share in the area of "32 bit superminicomputers" is substantial and that Prime "has monopoly or near monopoly power in the market segments which it has pursued." Memorandum In Opposition to Defendant's Motion for Summary Judgment at 25.

AIMS produced evidence showing that the "32 bit superminicomputer" systems and the comparable mainframe systems, both of which perform distributed data processing functions, [5] are not reasonable substitutes for one another. (Schaider Declaration paras. 5, 6). Mainframe systems perform functions in a series, while superminicomputers **[**25]** allow for scattered workstations and tasks performed out of sequence. (*Id*. para. 6). In support of his conclusion that the data processing industry regards "32 bit superminicomputers" as a separate market, AIMS ' expert relies on an article printed in the June 7, 1984, issue of the *Wall Street Journal*. (Schaider Declaration Exhibit 1). Excluding mainframe systems in his market share calculations, Schaider produces market share data showing Prime had a 59.7 percent market share in 1979, 54.2 percent in 1980, and 45.8 percent in 1981. (*Id*. para. 7, Exhibit 2). The *Wall Street Journal* article stated that Prime's market share dropped from 33 percent in 1980 to 16 percent in 1983. AIMS has also produced a confidential Prime memorandum dated June 12, 1984, in response to the *Wall Street Journal* article. Included is a letter from the data company that supplied the figures for the article. The company explains that the 1983 figure should have ranged from 16 to 18 percent, and that the article should have based its figures on the dollar value of Prime systems rather than the unit shipment market share. This could have increased market share figures for Prime 3 to 7 percentage **[**26]** points. This would result in figures of a maximum of 40 percent market share in 1980 declining to a maximum market share of 25 percent in 1983. The data company also stated that Prime's market share erosion was halted in 1983.

Prime has produced evidence from another market data firm indicating that there is no separate market for "superminicomputers" and that other systems are reasonable substitutes. (Bushee Affidavit para. 3). Bushee concludes that Prime's market share has never exceeded 2.2 percent of the minicomputer market. Even considering a separate market for "superminicomputers," Bushee concludes Prime's market share did not exceed 3.7 percent of that market. (*Id*.). Because Prime is the party moving for summary judgment and there is a genuine, unreconciled dispute regarding market share, the evidence must be considered in the light most favorable to AIMS. Therefore, the Court will examine Prime's market share within **[**27]** the market segments identified by AIMS in Prime's advertising and planning documents. [6]

---

[4] The Section 2 offense of monopolization requires, if anything, an even greater showing of market power than does attempted monopolization. *See generally* United States v. E.I. DuPont de Nemours & Co., 351 U.S. 377, 76 S. Ct. 994, 100 L. Ed. 1264 (1956).

[5] According to AIMS, this is one of the submarket areas on which Prime has focused.

[6] The market for add-on and upgrade equipment on its own cannot be considered a relevant market. *See, e.g.,* Telex Corp. v. IBM Corp., 510 F.2d 894, (10th Cir.), *cert. dismissed*, ***423 U.S. 802, 96 S. Ct. 8, 46 L. Ed. 2d 244 (1975)*** (compatible computer peripherals do not constitute a relevant market).

HN9[] In determining whether Prime had monopoly power, the Court must examine the strength of competition, the probable development of the industry, customer demand, and the percentage of market share of the defendant. *Hayden Publishing Co., Inc. v. Cox Broadcasting Corp., 730 F.2d 64, 69 (2d Cir. 1984)*. *HN10*[] To determine whether Prime is liable for attempted monopolization under *Section 2*, the Court must determine whether Prime has a dangerous probability of success. This requires a showing that the defendant possesses "market strength that approaches monopoly power -- the ability to control prices and exclude competition." **[**28]** *White & White, Inc. v. American Hospital Supply Corp., 723 F.2d 495, 507 (6th Cir. 1983)* (quoting *Richter Concrete Corp. v. Hilltop Concrete Corp., 691 F.2d 818, 826 (6th Cir. 1982))*.

This Court holds that AIMS *Section 2* claim must be dismissed. It is clear and **[*87]** beyond dispute that the computer industry is developing rapidly and that competition is very intense. This is reflected in the changing market share figures in the Bushee affidavit, the changing hardware and equipment available, the rapidly changing marketing strategies, the frequent changes of personnel between companies, and the large number of competing companies within the industry. (*See e.g*. Kaufman Aff. Exhibit 3, Plaintiff's Appendix 78). AIMS itself has acknowledged the rapid development of the industry in conjunction with its contract claims.

HN11[] Where there is strong competition in a rapidly developing industry, the Sixth Circuit concludes that a market share of roughly 25 percent cannot present a dangerous probability of monopoly power. *White & White, 723 F.2d at 508*; *Richter Concrete, 691 F.2d at 826* (30 percent share of market insufficient). *See also* *Lektro-Vend Corp. v. Vendo Co* ***[**29]*** *., 660 F.2d 255, 271 (7th Cir. 1981)*, *cert. denied*, *455 U.S. 921, 102 S. Ct. 1277, 71 L. Ed. 2d 461 (1982)* (and citations); *United States v. Empire Gas Corp., 537 F.2d 296, 305-07 (8th Cir. 1976)*, *cert. denied*, *429 U.S. 1122, 97 S. Ct. 1158, 51 L. Ed. 2d 572 (1977)*; *Terry's Floor Fashions v. Burlington Industries, 568 F. Supp. 205, 214 (E.D.N.C. 1983)*. [7]

Prime's maximum market share of 25 percent in 1983 had stabilized from the year before. Market figures were therefore the same in 1982 when the challenged practices occurred. Competition in the field shows no signs of abating. It is also significant in determining Prime's ability to monopolize that the actions challenged as antitrust denied products to dealers only for certain types of sales. Prime did not close off all of its products to all dealers. Thus, AIMS has demonstrated no significant probability of monopolization.

Contract [30] Claims**

AIMS has raised several contract claims against Prime. One of these concerns Prime's refusal to sell any model 9950 systems to independent dealers such as AIMS. Prime authorized sales of the model 9950 only through direct sales, and through the "Authorized Distributor Program." (Cargile Aff. Exhibit 8, Plaintiff's Appendix 23). AIMS claims that in negotiations for the dealer agreement, Prime gave assurances that its entire line of products would be available. AIMS also contends that Prime's failure to make all of its products available is contrary to Prime's good faith obligations and its obligation not to destroy or injure AIMS ' contract rights. *See* *Uproar Co. v. NBC, 81 F.2d 373, 376-77* (1st Cir.) (citations omitted), *cert. denied*, *298 U.S. 670, 56 S. Ct. 835, 80 L. Ed. 1393 (1936)*. [8]

There is a genuine dispute regarding whether Prime gave assurances that the entire line of products would be available. **[**31]** President Cargile of AIMS asserts that Prime's representative did give these assurances and stated that assurances that newly developed products would be available were "of central importance because of the rapid advances in computer technology." (Cargile Aff. para. 5, Plaintiff's Appendix 3). Prime's representative at the time denies this, claiming he told Cargile only the hardware Prime believed necessary for marketing application software would be available. (Finney Aff. paras. 11, 12; *see also* Davidson Aff. para. 14). The initial dealer agreement and its amendment never provided that all compatible hardware would be available, nor was all compatible hardware included on the original schedule. (Finney Aff. para. 11; Horne Aff. para. 3). It provided the dealer with discretion to add or delete hardware. Moreover, because the dealer agreement provides an integration

---

[7] Prime's market figures, however, are significant enough for AIMS ' rule of reason case under *Section 1*.

[8] The dealer agreement provides that it shall be construed under the laws of Massachusetts.

clause, contemporaneous oral statements would constitute inadmissible parole evidence. (*See* Kirby Aff. Exhibit A P.23 para. 24.1) (integration clause).

[*88] AIMS ' contention regarding sales of the 9950 must therefore be dismissed. Prime has demonstrated that the hardware presently available to AIMS is not **[**32]** obsolete and insubstantial. Prime hardware available for sale to AIMS accounts for 70 percent of Prime's hardware sales in the first quarter of 1984. (Horne Aff. para. 4). Moreover, AIMS has been treated no differently from other dealers. The 9950 system is not available to any dealer. If AIMS had not declined to become an Authorized Distributor, it would have access to 9950 sales. AIMS has the same rights to hardware as all other dealers. The dealers have banded together to protect their rights before. AIMS is adequately protected from overreaching by paragraph 5.5 of the dealer agreement, which provides that Prime shall not use its powers to delete equipment to effect termination of the dealer. AIMS has not sought to invoke the protection of this provision.

AIMS ' remaining contract claims stand on firmer ground. These claims involve Prime's compliance with the added value restriction. *See supra* footnote 2. The first claim involves Prime's rejection of AIMS ' orders for computer systems because of the policy and the contract provision prohibiting "hardware-only" sales. AIMS claims that Prime rejected the orders without affording AIMS the opportunity to specify the application **[**33]** software or services being sold prior to or in conjunction with the hardware ordered. (*See* Cargile Supplemental Aff. paras. 21-26; Plaintiff's Appendix 28-29). Prime asserts that Prime's rejection of orders was due to AIMS ' refusal to specify its compliance with the dealer agreement. (*See* Kirby Aff. Ex. 3, Plaintiff's Appendix 148). As discussed *supra*, however, it is unclear whether Prime relied on the amendment in rejecting the earlier orders. AIMS subsequently specified application software to be sold along with Prime hardware. (*See* Cargile Aff. Exhibit 10, Plaintiff's Appendix 26). Prime requested further specifications on other orders. (Kaufman Aff. Exhibit 6, Plaintiff's Appendix 90). The issue of contract compliance on this issue is not clear enough for summary judgment disposition. Moreover, Prime's compliance with the provision of the new amendment may be relevant to the antitrust issues as well. Accordingly, Prime's motion for summary judgment on this issue is denied.

AIMS may also take to trial its claim that Prime unreasonably withheld authorization of application software to be sold along with Prime equipment. AIMS has argued that Prime's refusal to **[**34]** approve additional application software was contrary to Prime's contractual obligation not to withhold authorization of additional software unreasonably. (*See supra* footnote 2). Prime rejected AIMS ' proposed additions to Schedule 1 approved application software because it was "reluctant to expand the relationship between the parties under present circumstances." (Kaufman Aff. Exhibit 6, Plaintiff's Appendix 90). Cargile of AIMS asserts that Prime never previously requested documentation or other formal testing for approval of application software. (Supplemental Cargile Aff. para. 26, Plaintiff's Appendix 29). There is conflicting evidence regarding whether Prime had standards for evaluating proposed application software for approval. (*Compare* Schaider Declaration para. 4 *with* Horne Aff. paras. 5, 6). Therefore, this issue must proceed to trial.

Preliminary Injunction

For the following reasons, AIMS ' motion for a preliminary injunction is ***HN12***[] denied. In order to determine whether to grant a preliminary injunction pursuant to *Fed. R. Civ. P. 56(c)*, the Court must evaluate (1) the merits of plaintiff's claim for ultimate relief; (2) the harm facing plaintiff if interim **[**35]** relief is denied; (3) the harm facing defendant or others if interim relief is granted; and (4) the public interest in granting or denying interim relief. *E.g., Friendship Materials, Inc. v. Michigan Brick, Inc., 679 F.2d 100, 102-04 (6th Cir. 1982)*; *Roth v. Bank of the Commonwealth, 583 F.2d 527, 536-38 (6th Cir. 1978)*, *cert. dismissed per stipulation*, *442 U.S.* ***[*89]*** *925, 99 S. Ct. 2852, 61 L. Ed. 2d 292 (1979)*; *Mason County Medical Association v. Knebel, 563 F.2d 256, 260-62 (6th Cir. 1977)*. ***HN13***[] No single factor is determinative; all must be weighed equitably. *Roth, 583 F.2d at 537-38*. One of the considerations required is the probability that plaintiff will succeed on the merits. *Id*. (citations omitted). Additionally, plaintiff must demonstrate that in the absence of relief, plaintiff will be irreparably harmed. *Friendship Materials, 679 F.2d at 103* (citations omitted) (injunctive action for antitrust violations).

AIMS seeks a preliminary injunction to forbid Prime from enforcing the "added value" provision of the dealer agreement and from refusing to sell its entire line of compatible equipment to AIMS for resale. AIMS asserts that would be irreparably **[**36]** harmed without preliminary relief, citing cases holding that loss of a product line constitutes irreparable injury to a full-line dealer such as AIMS. *See* *Blackwelder Furniture Co. of Statesville Inc. v. Seilig Manufacturing Co., Inc., 550 F.2d 189, 196-97 (4th Cir. 1977)*; *Bergen Drug Co., Inc. v. Parke, Davis & Co., 307 F.2d 725, 728 (3d Cir. 1962)*. These cases do not apply here because they involved a manufacturer's refusal to supply its entire product line to a particular retailer, treatment which discriminated against that particular dealer. Here, Prime has not placed AIMS at a disadvantage to other dealers, for AIMS has access to the same equipment as other dealers. Moreover, Prime has not closed off its entire product line to all dealers, but only a portion of it. AIMS has not demonstrated that money damages would not adequately compensate its alleged loss of profits, nor that its business failure and entry into bankruptcy was caused by Prime's restrictions. Although AIMS argues that it will be unable to salvage its business without preliminary relief, plaintiff has not explained why other dealers in the same position have not been driven into bankruptcy. While preliminary **[**37]** relief would clearly aid AIMS reorganization, other equitable considerations require denial of the preliminary injunction.

AIMS insists that immediate action is necessary to protect its interests, yet it waited one and one-half years after cancellation of its orders to bring this action for an injunction. This delay belies AIMS ' claim to irreparable harm. *See* *Gianni Cereda Fabrics, Inc. v. Bazaar Fabrics, Inc., 335 F. Supp. 278, 280 (S.D.N.Y. 1971)* (quoting *Gillette Co. v. Ed Pinaud, Inc., 178 F. Supp. 618, 622 (S.D.N.Y. 1959))*. Moreover, injunctive relief would not preserve the status quo as much as it would expand AIMS ' position under the contract. *See* *Morgan v. Fletcher, 518 F.2d 236, 239 (5th Cir. 1975)* (citations omitted) (purpose of preliminary injunction is to preserve the status quo).

There are other reasons why the equities weigh against granting the injunction. Although Prime's viability would not be threatened by injunctive relief, its distribution system would be greatly disrupted. Its discount for sales of complete systems would be arguably misappropriated to allow a dealer to make large numbers of wholesale sales. AIMS has not demonstrated a sufficient **[**38]** likelihood of success to justify the harms that would result from the preliminary relief AIMS has requested. Nor would any public interest mandate granting the injunction.

Conclusion

For the reasons discussed above, the Court concludes: AIMS ' claim for violations of the Sherman Act, *Section 1* will proceed under the rule of reason; AIMS ' *Section 2* claim is dismissed; AIMS ' contract claims will proceed to trial as limited in this memorandum; and AIMS ' motion for a preliminary injunction is denied. The state unfair trade practices claims will also proceed to trial because they are not appropriate for summary judgment disposition.

Nat'l Bancard Corp. v. Visa

HN1[] **Costs & Attorney Fees, Clayton Act**

Under § 4 of the Clayton Act, *15 U.S.C.S. § 15*, any person injured in his business or property by reason of anything forbidden in the antitrust laws may recover treble damages plus costs and attorney fees. The U.S. Supreme Court has stated that § 4 on its face contains little in the way of restrictive language but has read the "by reason of" language as encompassing several separate and analytically distinct elements, each implying that the statute is not as broad as its words suggest.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN2[] Private Actions, Standing

Neither courts nor parties to antitrust actions have been scrupulous in their attempts to keep the various restrictions on a plaintiff's right to a treble damage action separate and distinct. All seem to agree that a plaintiff must initially establish the existence of a causal connection between defendant's antitrust violation and plaintiff's injury. Once the causal connection between plaintiff's injury and defendant's act is shown, however, the courts begin to differ about what additional elements a plaintiff must prove in order to successfully bring a treble damage action.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Commercial Law (UCC) > Sales (Article 2) > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN3[] Private Actions, Remedies

The cases suggest there are at least two, perhaps three, requirements for standing in addition to causation to maintain a treble damage action. The first of these requirements takes many forms, as most courts vacillate between the two alternative techniques of (a) measuring the directness of the injury complained about and (b) asking whether the plaintiff falls within the target area of the violation. The second requirement, which some courts do not distinguish from the standing requirement, is that an antitrust plaintiff must prove he has suffered "antitrust injury," i.e., injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. Finally, some plaintiffs must also address the issue of defensive and offensive use of "pass-on" damages.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN4[] Private Actions, Standing

While no circuit continues to apply a strict "direct injury" test in determining standing, courts borrow from the language of that analysis to discourage or dismiss suits brought by plaintiffs whose injuries result from chains of events too speculative to justify treble damages.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN5[] Private Actions, Standing

The other test popular among courts for determining standing focuses on the nature of the antitrust violation and the plaintiff's relationship to the area of the economy claimed to have been injured by the defendant's conduct. Called the "target area" test, it requires the plaintiff to establish that he was within that section of the economy endangered by a breakdown of competitive conditions in a particular industry and that the illegal practices were aimed at him.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN6[] **Private Actions, Standing**

Problems in applying the "direct injury" and "target area" tests have led the Third Circuit, and to some extent the Eighth Circuit, to reject both tests in favor of a case-by-case approach called the "factual matrix" test. The Sixth Circuit has adopted for antitrust matters the test employed for determining standing in administrative law cases, i.e. requiring the plaintiff to show that its affected interests arguably are within the "zone of interests" protected by the antitrust statutes.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN7[] **Private Actions, Remedies**

At the heart of the Third Circuit's "factual matrix" test is a recognition of the reason for the existence of different requirements under § 4 of the Clayton Act, *15 U.S.C.S. § 15*, i.e., the multifaceted problem of determining when a person is sufficiently injured in his business or property by reason of anything forbidden in the antitrust laws so as to be eligible to sue for treble damages.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

HN8[] **Private Actions, Standing**

Whether the issue is the definition of injury in § 4 of the Clayton Act, *15 U.S.C.S. § 15*,the use of pass-on theories, or the proper scope of the standing doctrine, the necessary line drawing is informed by an inquiry into what posture best effectuates the dual purposes of the treble damage remedy, that of compensating victims of antitrust violations for their injuries and deterring violators by depriving them threefold of the fruits of their illegality, while at the same time furthering the overriding goal of the antitrust laws, preserving competition. Aside from these basic objectives of antitrust enforcement, courts must address additional concerns by determining whether antitrust goals would be furthered by adopting a particular position. Among such concerns are whether a duplicative or ruinous recovery will result and whether resolution of the claim will unduly complicate trial by necessitating the pursuit of complex and conjectural economic lines of causation and effect.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN9[] **Private Actions, Standing**

As to the issue of "directness" of injury, the U.S. Supreme Court first identifies the chain of causation then highlights the importance of finding an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement and therefore diminish the justification for allowing a more remote party to perform the office of private attorney general.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN10[] Private Actions, Standing

The indirectness of an alleged injury also implicates the strong interest in keeping the scope of complex antitrust trials within practically manageable limits. Cases stress the importance of avoiding either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN11[] Regulated Practices, Trade Practices & Unfair Competition

The antitrust laws do not require a potential plaintiff to take extraordinary measures to avoid anticompetitive activity; in fact, this is one of the things the antitrust laws are designed to prevent.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN12[] Regulated Practices, Private Actions

The defense of pass-on damages is only applicable where there is an existing cost-plus contract or its functional equivalent; that is, this defense is appropriate only where there exists a contract in which the impact of the illegal overcharge is determined in advance of the actual overcharge without reference to the interactions of supply and demand and other market forces.

Antitrust & Trade Law > Clayton Act > General Overview

HN13[] Antitrust & Trade Law, Clayton Act

See *15 U.S.C.S. § 26*.

Antitrust & Trade Law > Clayton Act > Claims

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > Remedies > Injunctions > General Overview

HN14[] Clayton Act, Claims

Most courts take a less constrained view of standing in suits involving injunctive relief than in those demanding treble damages. Even indirect purchasers can maintain actions for injunctive relief because the policy considerations underlying the pass-on rule are not implicated in claims for injunctive relief.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN15[] **Private Actions, Standing**

To achieve standing under *15 U.S.C.S. § 26*, all a plaintiff must prove is that it is threatened with loss or injury cognizable in equity proximately resulting from the antitrust violation. Some courts have interpreted this proximate cause standard as one no more rigorous than the general rule of standing.

Antitrust & Trade Law > Sherman Act > General Overview

HN16[] **Antitrust & Trade Law, Sherman Act**

See *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN17[] **Regulated Practices, Price Fixing & Restraints of Trade**

The legality of an agreement or regulation cannot be determined by a simple test, as whether it restrains competition. Every agreement concerning trade, every regulation of trade, restrains. To bind, to restrain, is of their very essence. The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition.

Antitrust & Trade Law > Sherman Act > General Overview

HN18[] **Antitrust & Trade Law, Sherman Act**

Stated simply, the governing law has been that the Sherman Act, *15 U.S.C.S. § 1*, bans all concerted arrangements adopted for the purpose of reducing competition or that, regardless of purpose, have a significant tendency to reduce competition. However, arrangements that are adopted for and tend to achieve other legitimate purposes do not fall within the condemnation of the Sherman Act merely because of some incidental and inconsequential restraining effect on competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN19[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The per se doctrine and the rule of reason together tend to condemn arrangements having the purpose or effect of significantly restraining competition and to validate those that do not. The per se rule forecloses any analysis of the purpose of a restraint or the nature, extent, and degree of its market effect, thus avoiding the necessity for an incredibly complicated and prolonged economic investigation into the entire history of the industry involved, as well as related industries, in an effort to determine at large whether a particular restraint has been unreasonable. Thus the per se rule is generally limited to those categories of restraints for which no elaborate study of an industry is needed to establish that their nature and effect is plainly or manifestly anticompetitive. To be manifestly anticompetitive, agreements or practices must have a pernicious effect on competition and lack any redeeming virtue.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Energy & Utilities Law > Pipelines & Transportation > Eminent Domain Proceedings

HN20[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The rule of reason is an all-embracing enumeration to make sure that no form of contract or combination by which undue restraint was achieved could escape condemnation. The function of "reason" in the analysis is to discriminate between restraints that are undue and those that are not. The rule of reason does not open the field of inquiry to any argument in favor of a challenged restraint that may fall within the realm of reason. Instead, the inquiry is limited to whether the restraint in question is one that promotes competition or one that suppresses competition.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Evidence > Burdens of Proof > Allocation

HN21[] **Regulated Practices, Price Fixing & Restraints of Trade**

The "facial unreasonableness test" is actually a two-part test that, unlike either the per se or rule of reason tests, shifts the burden of proof from the plaintiff to the defendant. Once the plaintiff has sustained its burden of proving that defendant's activities are a significant restriction affecting competition and that the defendant has significant market power, the burden then shifts to the defendant to show that the particular practice in question is justified by its competitive needs, that it is reasonably necessary to accomplish legitimate goals, and that it is narrowly tailored to that end.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > General Overview

Business & Corporate Law > Joint Ventures > Formation

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Joint Contracts

Antitrust & Trade Law > Exemptions & Immunities > Exempt Cartels & Joint Ventures

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > US Federal Energy Regulatory Commission

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Business & Corporate Law > Joint Ventures > General Overview

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > Authorities & Powers

Energy & Utilities Law > Antitrust Issues > Antitrust Immunity

Mergers & Acquisitions Law > Antitrust > Joint Ventures

HN22[] **Exemptions & Immunities, Collectives & Cooperatives**

While joint ventures are not immune from antitrust scrutiny, the antitrust laws allow restraints necessary to accomplish pro-competitive objectives of joint ventures and similar organizations. When these restraints, sometimes called ancillary restraints are addressed, per se prohibitions are not applied because it cannot be said that in the aggregate, the gains from imposition of the per se rule will far outweigh the losses. As the U.S. Supreme Court has recognized, joint ventures are not usually unlawful, at least not as price fixing schemes, where the agreement on price is necessary to market the product at all. Accordingly, such agreements are analyzed under the rule of reason so that courts can weigh their pro-competitive effects.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN23[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

In separating those price-fixing arrangements to which the per se rule is to be applied from those to be examined under a rule of reason analysis, courts are to assess whether facially the practice always or almost always tends to restrict output or whether it is likely to contribute to the creation of economic efficiency.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Joint Contracts

Business & Corporate Law > Joint Ventures > General Overview

Mergers & Acquisitions Law > Antitrust > Joint Ventures

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN24[] **Types of Contracts, Joint Contracts**

Courts are to compare the product of the joint venture to the individual offerings of the venture's members and determine whether the venture offers pro-competitive abilities that its members acting alone could not offer.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Immigration Law > Admission of Immigrants & Nonimmigrants > Visa Eligibility & Issuance > Issuance of Visas

HN25[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

A practice is not unlawful per se where there is no legal, practical, or conspiratorial impediment to making alternate arrangements.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN26[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Under the rule of reason test, it is plaintiff's burden to establish that the practice complained of has an adverse impact on competition. In making this a determination, the relevant question is not whether the challenged practice is the most competitive device that can be imagined or the least restrictive but simply whether it is reasonable; i.e., not unduly restrictive of competition. So long as a practice is fairly necessary to achieve a legitimate purpose, it is not unlawful under the rule of reason. In applying this standard, the competitive benefits of the challenged practice are weighed against its alleged harmful effects and a violation of the Sherman Act, *15 U.S.C.S. § 1*, will be found only where the balance tips decidedly in favor of the latter.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN27[] Per Se Rule Tests, Manifestly Anticompetitive Effects

A plaintiff must shoulder the burden in the "rule of reason" analysis to demonstrate the balance tipping in plaintiff's favor. That is, the plaintiff must demonstrate that defendant's alleged anticompetitive effects outweigh the pro-competitive benefits of the practice. Moreover, in meeting its burden, a plaintiff must prove far more than that the practice it challenges has had an effect on its business. The existence or non-existence of market power in a relevant market is a critical consideration.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN28[] Regulated Practices, Market Definition

A relevant market or "area of competition" consists of two elements: products and geography. The former element is defined by reference to the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and the substitutes for it.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN29[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The burden of proof in a rule of reason case rests with the plaintiff. The rule of reason requires "a systematic comparison" of the negative effects of the restraint on competition, if any, with any alleged positive effects on interbrand competition stemming from the restraints.

Judges: [1]** Hoeveler

Opinion by: WILLIAM HOEVELER

Opinion

[*1235] *MEMORANDUM OPINION AND FINDINGS OF FACT AND CONCLUSIONS OF LAW*

INTRODUCTION

This case involves a claim by plaintiff, NaBanco that defendant, VISA has violated the Sherman Antitrust Act, causing plaintiff damages. Defendant issues the VISA card, used by many as a method of payment for goods and services, in connection with the transfer of transaction paper from a merchant through its bank to the **[*1236]** card issuing bank. VISA regulations call for payment of an interchange fee ("IRF") if its exchange system is used. The interchange fee is set by the VISA Board of Directors. plaintiff, among other things, asserts that the methods of setting and determining the interchange fee involves price fixing and are anti-competitive. Defendant asserts that the setting of the fee is reasonable, not only in method but in amount, and further that the VISA regulations encourage competition and are not in violation of the Act. The Court has determined that the plaintiff, NaBanco has failed to prove its case and that judgment shall be entered in favor of the defendant, VISA.

The last 150 years have witnessed the evolution of several distinct **[**2]** methods of payment for goods and services. Just as we once moved from an economy which relied heavily on barter as a primary means of exchange to an economy based on cash, so we now find ourselves increasingly becoming a "cashless" society. Today it is not unusual to find major sectors of the buying public foresaking cash in favor of credit cards [1] and, even more recently, debit cards. [2] Unlike consumer currency purchases, however, these newer payment forms leave a residue of paper credits and debits which must somehow be cleared in order to complete a particular consumer transaction.

[3]** Like any major economic transition, the movement from cash to cashless payment systems is not without growing pains. This case is itself evidence of the fact that social or economic change often leaves in its wake those who feel aggrieved by the process. National BanCard Corporation ("NaBanco") brought this action against VISA U.S.A., Inc. [3] and the members of the VISA Board of Directors (hereinafter referred to collectively as "VISA") for alleged violations of *Section 1* of the Sherman Act, *15 U.S.C. § 1*. In its complaint NaBanco alleged a continuing combination and conspiracy by VISA to fix and maintain the price paid for bank credit card "interchange" transactions. For this claimed offense NaBanco sought damages in excess of three million dollars, trebling of damages, injunctive relief, attorneys' fees, and costs. Jurisdiction of this court was invoked pursuant to Sections 4 and 15 of the Clayton Act, *15 U.S.C. § § 15* and *26*, and pursuant to *28 U.S.C. § 1337*.

[4]** The case was tried by the court without a jury. It began May 10, 1982. and, to accommodate the pressing criminal docket of the Southern District of Florida, continued in segments of one or more weeks until its conclusion in January of 1984. The total trial time was in excess of nine weeks during which the court reviewed thousands of pages of exhibits and heard in person or by deposition dozens of witnesses, experts and otherwise. Based upon

---

[1] The term "credit card" is actually a misnomer. Not all so-called credit cards authorize the issuance of "credit," i.e., an opportunity to pay off amounts owed over an extended period of time at some rate of interest. To the extent that any credit card does not require a cardholder to pay for a purchase at the point of sale, however, a "free" or "convenience use" period is endemic to all credit card systems.

[2] A "debit" card typically accesses a cardholder's asset account at the card-issuing bank although a line of credit may be available as "overdraft" protection when the account balance reaches zero.

[3] VISA is a member of VISA International, which administers the VISA system worldwide. Through VISA International, the VISA card is honored in 120 countries and has 100 million cardholders and 3 1/2 million merchants worldwide. Cards issued by members of VISA are accepted internationally, and cards issued by members of VISA International outside the U.S. are accepted by merchants in the U.S. With the consent of the parties, the issues and discovery in this case were limited to activities in the United States. Russell TR. 5-6 1/16/84.

this record, and for the reasons enunciated below, the court finds that plaintiff NaBanco has failed to prove any of the alleged antitrust violations with which it has charged VISA.

THE BANK CREDIT CARD INDUSTRY

The issues raised in this case can best be defined and understood in the context of **[*1237]** the bank credit card industry and its history.

In the early 1800's, the two principal means of commercial transactions payment devices were bank notes issued by state banks and drafts. [4] These payment forms satisfied the needs of commerce at a time in history when consumers and merchants would usually reside and do business in the same geographical area. Accordingly, payment media rarely had to be sent beyond the local area. Bank notes, **[**5]** issued by the local bank or banks, circulated through the immediate region and were used to a far greater degree than currency is used today. In the larger local transaction, and also in the relatively infrequent long-distance transaction, the draft was the typical medium used. [5]

[6]** However, rapid technological changes in both transportation and communication in the mid-1800's, heightened the need for a medium of exchange which was acceptable to diverse and unknown persons across the country and which could travel easily and cheaply. The check was increasingly employed to meet these needs. [6]

Despite the check's utility, other payment devices arose to meet more specific consumer needs. About a century after the check gained common acceptance, the bank credit card was introduced. The chief antecedents of this card were the retail merchant's "open book" account **[**7]** [7] and the somewhat later-developed but more closely-analogous "travel and entertainment" cards. [8] Unlike either of its two predecessors, however, the bank credit card has come to play a much more versatile role in the universe of payment systems. The bank credit card provides many of the same services as the personal check, but, in addition, provides retailers of goods and services an extra measure of protection from the risk of default. Incident to the system, and in most cases, the banks, not the retailers, are responsible for seeking payment from the retailers' customers.

---

[4] Wm. F. Baxter, Bank Interchange of Transactional Paper: Legal and Economic Perspectives, The Journal of Law & Economics, Vol. XXVI (3) Oct. 1983, p. 556.

[5] *Id.* at p. 557. If a consumer became indebted to a distant merchant, the consumer would execute payment by purchasing a draft from his local bank made payable to the merchant as payee. The draft would instruct the merchant's bank to make payment to the merchant in the amount of the indebtedness. For this, the consumer paid a substantial fee. If the consumer maintained a payments balance with the bank, this sum would be debited from the account. If not, the consumer's would be obligated physically to transport to the merchant bank a mutually acceptable form of currency.

[6] *Id.* at p. 560. The consumer would send the check to the distant merchant who presented it at his bank for collection. When the bank accepted the instrument for collection, it might credit the merchant's account immediately or await payment by the consumer's bank. The check itself was sent via a number of correspondent banks to the consumer's bank, where the consumer's account was debited that amount upon arrival of the check.

[7] *Id.*at p. 572. A form of short-term, interest fee credit to customers whose patronage is highly valued. These customers tend to be persons whose time costs are high, who shop regularly at a particular retail outlet in high volumes, often buying more higher priced items.

[8] *Id.* at 572-73. Travel and Entertainment cards. ("T & E Cards") Developed as an answer to an increasingly mobile post-WWII society. The issuing organization (notably American Express and Diners Club) signs up merchants across the country of the type frequently patronized by travelers: hotels, resorts, restaurants, and a small number of prestigious retail outlets. Annual fees are normally much higher than those charged for the VISA or MasterCard and the system as a whole tends to cater to more "upscale" clientele.

[8]** As in the case of the check, the bank credit card system is principally a four-party payment arrangement. It involves: (1) cardholders who use bank credit cards to purchase goods and services; (2) merchants who accept bank credit cards in exchange for goods and services; (3) financial institutions (issuer banks) which issue cards to, and contract with, cardholders; and (4) financial institutions (merchant banks) which contract with merchants to accept the bank credit card and thereafter manage the bank credit card accounts of these merchant clients.

[*1238] A typical transaction can be most simply described as follows: Once a potential consumer has opened a bank credit card account with a particular issuing bank, he or she may use that bank credit card in lieu of cash to purchase goods and services from any merchant participating in that particular bank credit card system. The merchant, after a sale, then transmits the consumer/cardholder's draft evidencing this transaction (referred to in the parlance of the industry as "paper") to its merchant bank, this sum being immediately credited to the merchant's account minus a small charge agreed upon earlier by contract (called the **[**9]** "merchant discount"). If the merchant bank happens to be the same bank which issued the card, the consumer/cardholder's account in the bank will be processed "in-house" in what has been described as an "on-us" transaction. When the issuer bank differs from the merchant bank, the process becomes more complicated. First, the merchant bank sends the transactional paper to the issuer bank. The issuer bank then will either send the merchant bank the requisite sums due and owing from its cardholder, or will directly credit the merchant bank's account at the issuer bank, if the merchant bank has such an account. In either case, the issuer bank is ultimately responsible for the sums due and owing from its cardholders, and thus, absent a breach of agreed procedure by the merchant or merchant bank, the issuing bank bears the risk of default by the cardholder.

The process by which transactional paper is moved from the merchant bank to the issuer bank involves certain costs. In the system at issue here, the issuer bank withholds a small amount (called the "interchange fee") from the monies due and owing the merchant bank to cover the costs of this processing. Even more simply stated, the merchant **[**10]** bank (if not the issuer of the card used in a sale) must process the paper generated by the sale to realize both the small profit hopefully provided in the merchant's discount charge to the retailer and reimbursement for the sale amount credited to the account of the retail merchant. The paper then goes to the issuer bank which reimburses the merchant bank but only after the deduction of the interchange fee. This interchange fee is the subject of the dispute in this case.

THE PARTIES

The VISA System: Its History and Its Product

One of the most successful three-party bank cards was the California-based Bank of America's ("BA's") local prototype credit card program, the BankAmericard. This program expanded in 1960 to a statewide system to take advantage of the ever-increasing pool of people amenable to credit card use within the state. This expansion increased the base over which the costs of the system could be spread. Still, the nationwide expansion of its principal competitors' operations (travel and entertainment cards) in conjunction with dramatic technological changes in data-processing and electronic communications soon led BA to develop its own national credit card **[**11]** program in 1966.

The BA network was achieved by means of a franchise program which permitted BA-licensed local banks across the country to issue credit cards bearing the BankAmericard name. The licensee banks actually owned the credit cards they issued, and created their own receivables by signing up local merchants who would accept the card. Licensees were also encouraged to engage other non-issuer banks as their agents to expand the merchant base still further.

With the advent of the BankAmericard licensing program came the concept of the interchange fee, referred to earlier as a means of paying for costs associated with transferring transactional paper. Included in the licensing agreement was a provision indicating the sum or "fee" licensees were entitled to receive when purchasing their cardholders' paper in interchange. The agreement provided that the merchant-servicing licensee had to send to the card-issuing licensee either the actual merchant discount earned in each interchange transaction, **[*1239]** or the merchant bank's "average" merchant discount. (Emerson. TR. at 54. 1/13/84); Russell. TR. at 15. (1/16/84); Exh. 2007.

Between 1966 and early 1970, many of the BA licensees **[**12]** grew in size and expertise and accordingly moved for the creation of a system which could more accurately reflect their individual interests and concerns, as well as address some of the more pressing problems facing the licensee system. (Larkin, TR. 232-33; (1/11/83). These concerns led to the formation of NBI, a for-profit, non-stock-membership corporation which was established in 1970.

Along with the formation of NBI came a new conceptual model for the interchange fee. The new fee was adopted by the NBI Board of Directors in 1971, in response to serious problems of uncertainty and instability which the old fee system could not resolve since it was based upon each merchant bank's interpretation of how much was due and owing to issuer banks. The new, uniform fee was based upon a cost-reimbursement methodology developed in conjunction with Arthur Anderson and Co., the national accounting firm, and was called the "Issuer's Reimbursement Fee" (hereinafter referred to as "IRF"). This fee or charge reflected the concept of calculated reimbursement.

In 1977, NBI changed its name to VISA and exclusive rights to the name "BankAmericard" reverted to BA. To become a VISA member, of which there **[**13]** were approximately 13,400 in 1983, a financial institution must be eligible for federal deposit insurance. Upon proper application, any eligible institution can serve either as a proprietary member or as an agent of a proprietary member. There were 1866 proprietary members in 1983. Each can perform the function of issuing cards to cardholders and of signing merchants to participate in the VISA system. Proprietary members also elect VISA's governing Board of Directors which makes the rules under which the system operates. Agent members, 11,537 strong in 1983, elect only to contract with merchants on behalf of proprietary members; they are not eligible to vote for Board members and therefore do not play as significant a role as proprietary members in determining VISA policy.

It is important to understand that at all times material to the claims in this case, VISA did not require its participating members to interchange paper through the VISA system. Rather, members could elect to exchange transactional paper pursuant to separately negotiated agreements with other members without the imposition of an exchange fee by the VISA system. If, however, members choose instead to interchange **[**14]** their paper through VISA, the data on the paper will be sent in electronic form by the merchant bank (or its processing agent) through what is known as the VISA Base II computer system to the issuer bank (or its processing agent). It is only when members use BASE II to interchange their paper that interchange will be governed by the highly complex set of VISA Operating Regulations, which includes the IRF and other rules governing the conditions under which issuer banks are required to "purchase" transactional paper from merchant banks.

NaBanco

Plaintiff, NaBanco, formed under the name Southern Bankcard Corporation in 1974, is neither a proprietary nor an agent member of VISA. It is not eligible for VISA membership because it is not a financial institution eligible for federal deposit insurance. It participates in the VISA bank credit card business by contracting with various VISA members to serve as their processing agent, thereby obtaining access to the VISA Base II system.

In its capacity as an agent for a VISA member, NaBanco typically performs activities similar to those performed by merchant banks, such as providing authorization services and services relating to the processing **[**15]** of merchant transactions. [9] The **[*1240]** majority of NaBanco's business is with VISA members who have already negotiated and contracted with particular merchants. Bull TR. 670-72 (5/13/82). NaBanco then provides its services pursuant to the contract it has with the VISA member, ordinarily electing not to be paid a transaction fee for such

---

9 In a few instances, NaBanco has also served as an agent of a VISA member on the card issuing side. As a result, NaBanco "receives" IRF in the same sense that it sends it out; re, under the contract it negotiated with the VISA member. Exh. 515. Bull Tr. 752-56 (5/13/82).

services but to receive instead most or all of the merchant discount revenues that merchants would otherwise remit to the VISA member. In return for these merchant discount receipts, NaBanco agrees to discharge the VISA member's obligation to pay the IRF whenever sending data in interchange through VISA's Base II system. Bull Tr. 336 (5/11/82) Exh. 6. Nevertheless, under VISA's rules, the VISA member continues to remain legally liable to VISA for payment of the interchange fee on all such transactions.

[16]** In a minority of cases, NaBanco, on behalf of VISA members, negotiates directly with merchants regarding merchant discount rates and other terms of the services to be provided to them. In this capacity, NaBanco competes with nearly all of the VISA members, and testimony both from merchants and from VISA members indicates that NaBanco is one of the leading contenders for the business of major retailers nationwide. [10]

THE NATURE OF THIS ACTION

Among other bases for plaintiffs charges of antitrust violations by defendant, plaintiff contends **[**17]** that the interchange fee requirement (when processing through BASE II) diminishes its ability to compete for merchant business on an equal basis with VISA member banks which do both issuing and merchant business. The "on-us" transaction (where the card issuing bank and the merchant contracting bank are the same) does not present the need for interbank exchange. Thus, says NaBanco, these proprietary members of VISA -- who have cooperated in mandating the interchange fee in non "on-us" transactions, have curtailed its ability to compete.

"On-us" transactions occur with the greatest frequency in the immediate geographic vicinity of a VISA member bank (especially where that member is a large card issuer) since it is in this area that a local merchant is most likely to have an account with the same bank as an area resident/cardholder.

NaBanco argues that in order to compete effectively with VISA member banks, it has had to develop relationships with merchants outside its immediate geographic market and find retailers with sufficient locations, or a broad enough customer base, so that the effects of "on-us" transactions are eliminated or at least minimized. Bull. TR. 249 (5/11/82). NaBanco **[**18]** also claimed it has found it necessary to sign up merchants in the United States who cater to tourists whose cards have been issued outside the United States. Alternatively, NaBanco argued it has had to establish agency relationships with banks outside the United States since the interchange fee charged on international transactions has traditionally been less than that charged for domestic exchanges. Bull. TR. 275-277 (5/11/82).

Nonetheless, NaBanco has claimed it can cite numerous examples of its inability to compete with VISA member banks for merchant contracts due to the competitive advantage these banks enjoy from "on us" transactions. Given the fact that both "on-us" and IRF transactions involve many of the same types of processing costs whether they occur "in-house" or not, NaBanco has **[*1241]** questioned the intent of VISA in setting particular IRF levels. Specifically, NaBanco has contended that IRF is not cost-related and, therefore, is either unnecessary or set intentionally high so as to discourage competitors such as NaBanco.

In the NaBanco scenario, individual merchant banks compete with it to sign up and serve merchants but unfairly so when they are also in the **[**19]** position of issuer banks because in this latter sense they act like a group of competitors who have conspired to sell goods to one another (actually to themselves) at a lower rate than the one offered NaBanco as a non-issuer bank thus affecting the price at which NaBanco can offer its merchants services. Since NaBanco believes that individual issuer and merchant banks can and should negotiate with one another over the price to be paid for transactional paper, VISA member banks, says NaBanco, are nothing more than a group of competitors whose setting of IRF is akin to horizontal price-fixing for transactional paper and, therefore, such conduct is absolutely proscribed by *Section 1* of the Sherman Act.

---

[10] NaBanco describes itself as the "premier nonbank third party credit clearinghouse." Ex. 361. During 1976-1980, NaBanco's revenues went from $ 1 million to $ 9 million. In that same period, its earnings increased from $ 69,000 to $ 565,000. Among the major merchants for whom NaBanco is the processor are County Seat Stores, Eckerd Drugs, Waldenbooks, and Petrie Stores, and many major department stores, including Burdines' and Rich's. Bull TR. 1052-61 (9/13/82) Exh. 2199.

In terms of remedies, NaBanco has asked that this court enjoin VISA from setting IRF at any level other than "par" (zero) so that financial institutions with large numbers of "on-us" transactions will have no competitive edge over entities like NaBanco which have few or none. Essentially, NaBanco has asked the court to "fix" its own price for IRF but in accordance with terms NaBanco considers fair. Alternatively, NaBanco has asked the court to enjoin VISA from setting any particular IRF, **[**20]** thus permitting each merchant bank (or NaBanco) to establish individually-negotiated "IRFs" with issuer banks. In addition, NaBanco has sought over three million dollars in damages, trebled, to compensate it for the several years during which it paid IRF to its alleged detriment.

STANDING TO SUE

Before reaching any of NaBanco's antitrust arguments, it is necessary to address defendant VISA's argument that NaBanco lacks standing under the antitrust laws to bring its action. Since NaBanco brought this action seeking both damages and injunctive relief, and since the standards for standing differ as to each, two separate but related standing analyses follow.

Standing to Bring The Treble Damages Claim

HN1[] Under Section 4 of the Clayton Act, "any person . . . injured in his business or property by reason of anything forbidden in the antitrust laws" may recover treble damages plus costs and attorney's fees. *15 U.S.C. § 15*. [11] The Supreme Court has stated that § 4 on its face contains little in the way of restrictive language, but has read the "by reason of" language cited above as encompassing several separate and analytically distinct elements, each implying that the statute is **[**21]** not as broad as its words suggest.

HN2[] Neither courts nor parties to antitrust actions have been scrupulous in their attempts to keep the various restrictions on a plaintiff's right to a treble damage action separate and distinct. All seem to agree that a plaintiff must initially establish the existence of a causal connection between defendant's antitrust violation and plaintiff's injury. *McClure v. Undersea Indus., Inc., 671 F.2d 1287, 1289* (11th Cir. 982), *cert. denied, 103 S. Ct. 1427 (1983)* ("The term 'fact of damage' refers to causation and simply means 'that the antitrust violation cause injury to the antitrust plaintiff.'" (quoting *Alabama v. Blue Bird Body Co., Inc., 573 F.2d 309, 317 (5th Cir. 1978)*.)). Once the causal connection between plaintiff's injury and defendant's act is shown, however, the courts begin **[**22]** to differ about what additional elements a plaintiff must prove in order to successfully bring a treble damage action.

HN3[] The cases suggest there are at least two, perhaps three, additional requirements for **[*1242]** standing to maintain a treble damage action. The first of these requirements takes many forms, as most courts vacillate between the two alternative techniques of (a) measuring the directness of the injury complained about and (b) asking whether the plaintiff falls within the target area of the violation. The second requirement, which some courts do not distinguish from the standing requirement, is that an antitrust plaintiff must prove he has suffered "antitrust injury," as defined in *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1983)*; i.e., injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. [12] Finally, some plaintiffs must also address the issue of defensive and offensive use of "pass-on" damages, considered by the Supreme Court in *Hanover Shoe v. United Shoe Mach. Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)* and *Illinois* **[**23]** *Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. For the most part, courts deal with this last issue in conjunction with their discussions of the

---

[11] There is also a "*commerce clause*" requirement under Section 4; however, the parties have already stipulated to the fact that the practices examined in this case affect commerce.

[12] "The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. It should, in short, be the 'type of loss that the claimed violations . . . would be likely to cause.'" *429 U.S. at 489* (emphasis in original) (quoting *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 125, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969))*.

standing argument, perhaps because of a dearth of Supreme Court opinions delineating the standing requirement; however, it is important to note that neither *Hanover Shoe* nor *Illinois Brick* are "standing" cases per se. Therefore, to the extent the policies these cases promote are relevant to a discussion of a plaintiff's right to bring a treble damage action and are not addressed in a court's discussion of a plaintiff's "standing" to bring such an action, they must be separately considered.

[24]** *Tests for Standing*

Lower federal courts have adopted various tests for antitrust "standing" to preclude suits by plaintiffs considered too remote from the alleged violation to be entitled to recover damages. Some cases have applied a "direct injury" test of standing which focuses on the relationship between the plaintiff and the alleged antitrust violator. *Repp v. F.E.L. Publications, Ltd., 688 F.2d 441, 444-45 (7th Cir. 1982)*; *Malamud v. Sinclair Oil Corp., 521 F.2d 1142, 1149 (6th Cir. 1975)*; *In re Multidistrict Vehicle Air Pollution M.D.L. No. 31, 481 F.2d 122, 127 (9th Cir. 1973)*, *cert. denied, 414 U.S. 1045 (1973)*. Generally, a plaintiff separated from the violator by one or more intermediate tiers of victims lacks standing under the direct injury test because, by analogy to tort law, the injury received is too remote to be fairly characterized as proximately resulting from the defendant's antitrust violation. ***HN4***[] Today, no circuit continues to apply a strict "direct injury" test. Instead, courts borrow from the language of that analysis, as well as from that of *Hanover Shoe* and *Illinois Brick,* to discourage or dismiss suits brought by plaintiffs whose **[**25]** injuries result from chains of events too speculative to justify treble damages. In essence, this is the position taken by VISA in arguing that NaBanco is not a "direct purchaser" of IRF and is therefore not eligible to recover overcharging damages. Only the merchant banks with which NaBanco contracts or, alternatively, the merchants themselves, are direct enough purchasers of IRF to be eligible to sue under Section 4 according to VISA. There is some support for VISA's position in cases which have held, based in part on the policies underlying *Illinois Brick,* that a plaintiff who purchased from a non-conspiring competitor of horizontal price-fixing defendants may not recover damages on the theory that the company from which it purchased charged an artificially inflated price under the "umbrella" of the defendant's price-fixing conspiracy. *Mid-West Paper Prods., supra,* at 587; *In re Folding Carton Antitrust Litigation, 88 F.R.D. 211, 219-20 (N.D. Ill. 1980)*; *In re Petroleum Prods. Antitrust Litigation, **[*1243]** 497 F. Supp. 218, 227-228 (C.D. Cal. 1980)*, *aff'd on other grounds*, *691 F.2d 1335 (9th Cir. 1982)*; *Liang v. Hunt, 477 F. Supp. 891, 896-97 (N.D. Ill. **[**26]** 1979)*; *cf.* *In re Petroleum Prods. Antitrust Litigation, 691 F.2d 1335, 1341 (9th Cir. 1982)* *(Illinois Brick* bars umbrella claim in the context of a multi-tiered distribution chain).

HN5[] The other test popular among courts and, as NaBanco is quick to point out, routinely employed in this Circuit, focuses on the nature of the antitrust violation and the plaintiff's relationship to the area of the economy claimed to have been injured by the defendant's conduct. *Const. Aggregate Transport v. Florida Rock Ind., 710 F.2d 752 (11th Cir. 1983)*; *Litton Sys., Inc., v. American Tel. & Tel. Co., 700 F.2d 785, 821 (2d Cir. 1983)*; *Aurora Enters., Inc. v. National Broadcasting Co., 688 F.2d 689, 692-93 (9th Cir. 1982)*; *In re Municipal Bond Reporting Antitrust Litigation, 672 F.2d 433, 435-36 (5th Cir. 1982)*; *Engine Specialties, Inc. v. Bombardier Ltd., 605 F.2d 1, 12-15 (1st Cir. 1979)*, *cert. denied, 446 U.S. 983, 64 L. Ed. 2d 839, 100 S. Ct. 2964 (1980)*; *see also* *Cleary v. Chalk, 159 U.S. App. D.C. 415, 488 F.2d 1315, 1319 n.17 (D.C. Cir. 1973)*, *cert. denied, 416 U.S. 938, 40 L. Ed. 2d 289, 94 S. Ct. 1940 (1974)* (citing decisions under the target area standard **[**27]** without expressly adopting that test). Called the "target area" test, it requires the plaintiff to establish that he was "within that section of the economy . . . endangered by a break-down of competitive conditions in a particular industry" and that the illegal practices were aimed at him. *Jeffrey v. Southwestern Bell, 518 F.2d 1129, 1131 (5th Cir. 1975)*. *See also* *Yoder Bros., Inc. v. California-Florida Plant Corp., 537 F.2d 1347 (5th Cir. 1976)*; *see also* *Southern Concrete Co. v. United States Steel Corp., 535 F.2d 313 (5th Cir. 1976)*; *Buckley Towers Condominium, Inc. v. Buchwald, 533 F.2d 934 (5th Cir. 1976)*.

Unfortunately, courts which have used a target area analysis to determine antitrust standing have never agreed on the general requirements of the test, sometimes resulting in apparently inconsistent conclusions. This situation led the Court in *Yoder Bros., supra, 1360*, to comment: "A test focusing on the sector of the economy is more stated than applied." ***HN6***[] Similar kinds of problems in applying the "direct injury" test have led the Third Circuit, as well, (and to some extent the Eighth Circuit; *Paschall v. Kansas City Star Corp., 605 F.2d 403, 409-10 (8th **[**28]***

Cir. 1979)) to reject both tests in favor of a case-by-case approach called the "factual matrix" test. Cromar Co. v. Nuclear Materials & Equipment Corp., 543 F.2d 501 (3d Cir. 1976). The Sixth Circuit has adopted for antitrust matters the test employed for determining standing in administrative law cases, i.e. requiring the plaintiff to show that its affected interests arguably are within the "zone of interests" protected by the antitrust statutes. Malamud v. Sinclair Oil Corp., 521 F.2d 1142, 1148 (6th Cir. 1975); *see also* Chrysler Corp. v. Fedders Corp., 643 F.2d 1229, 1234 (6th Cir. 1981), *cert. denied, 454 U.S. 893, 70 L. Ed. 2d 207, 102 S. Ct. 388 (1981)*.

HN7[] At the heart of the Third Circuit's "factual matrix" test is a recognition of the reason for the existence of different Section 4 requirements; i.e., the multifaceted problem of determining when a person is sufficiently "injured in his business or property by reason of anything forbidden in the antitrust laws" so as to be eligible to sue for treble damages. Thus, the *Mid-West Paper Prods.* court concluded that only together do the separate Section 4 requirements "constitute the judicial gloss upon the words **[**29]** of § 4 by which the courts have patrolled the portals to a treble damage action." *Mid-West Paper Prods.,* supra, 582. Citing the observation of the Supreme Court in *Hawaii v. Standard Oil Co., 405 U.S. 251, 31 L. Ed. 2d 184, 92 S. Ct. 885 (1972)*, that underlying the precepts that guard access to Section 4 is the recognition that the treble damage action represents a congressional determination that the antitrust laws be enforced in large measure by "private attorneys general" who are encouraged to sue by the prospect of recovering three times their actual damages, the Third Circuit went on to say:

> **[*1244]** ***HN8***[] Accordingly, whether the issue is the definition of injury in § 4, or the use of pass-on theories, or the proper scope of the standing doctrine, the line drawing that necessarily takes place is informed by an inquiry into what posture best effectuates the dual purposes of the treble damage remedy, namely, compensating victims of antitrust violations for their injuries and deterring violators by depriving them threefold of "the fruits of their illegality," while at the same time furthering the overriding goal of the the antitrust laws - preserving competition. **[**30]** *Mid-West Paper Prods.* at 583 (quoting *Hawaii v. Standard Oil Co., 405 U.S. 251, 262, 92 S. Ct. 885, 891, 31 L. Ed. 2d 184 (1972))*. Aside from these basic objectives of antitrust enforcement, . . . additional concerns must be addressed in determining whether antitrust goals would be furthered by adopting a particular position. Among such concerns are whether a duplicative or ruinous recovery will result and whether resolution of the claim will unduly complicate the trial by necessitating the pursuing of complex and conjectural economic lines of causation and effect." (citations omitted).

This court could certainly do worse than to adopt these principles as its own in deciding whether or not NaBanco has standing to bring its treble damage action. This is not to say this court adopts the "factual matrix" test used by the Third Circuit. Neither, however, does the court feel bound by the dictates of the target area test as NaBanco urges. The Eleventh Circuit in *Construction Aggregate Transport (supra)* may have been correct in characterizing the Supreme Court's decision in *Blue Shield of Virginia v. McCready, 457 U.S. 465, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)* as implicitly **[**31]** sanctioning continued, flexible use of the target area test. The two recent Supreme Court decisions which have even addressed the standing issue, *Blue Shield* and *Associated Gen. Contractors, Inc. v. California State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*, while never going so far as to adopt any particular test, have acknowledged their existence as tools to be employed by courts to determine standing, as such tests are useful.

Nevertheless, the *Associated Gen. Contractors* case, following on the heels of *Blue Shield,* seems to have gone further than *Blue Shield* in not only refusing to adopt any of the particular tests used by various circuit courts but in actually delineating the skeleton of a new standing test for treble damage actions. The Supreme Court observed, in reference to different standing tests, that "these labels may lead to contradictory and inconsistent results." *Associated Gen. Contractors, supra.* Likening the task of federal judges to articulate a precise test to determine antitrust standing in treble damage actions to the struggle of common-law judges to announce a precise definition of the concept of "proximate **[**32]** cause," the Supreme Court emphasized the virtual impossibility of announcing a "black-letter rule that will dictate the result in every case," in light of the infinite variety of claims that can arise in the antitrust context. *Id. at 737*. Instead, the Supreme Court suggested that courts "analyze each situation in light of the factors set forth" in its analysis of the plaintiff's standing position in the case before it. *Id. at 908 n.33*.

In light of its opinion in *Associated Gen. Contractors,* the Supreme Court vacated and remanded two appeals court decisions for further consideration, [13] and, following that lead, several courts have concluded that the *Associated Gen. Contractors* opinion requires rejection of standing tests previously adopted by the courts of appeals. See *Southaven Land Co. v. Malone & Hyde, Inc., 715 F.2d 1079 (6th Cir. 1983)*; **[*1245]** see also *Meyer Goldberg, Inc. v. Goldberg, 717 F.2d 290 (6th Cir. 1983)*; *Merican, Inc. v. Caterpillar Tractor Co., 713 F.2d 958 (3rd Cir. 1983)*; *Indium Corp. of Am. v. Semi-Alloys, Inc., 566 F. Supp. 1344 (N.D.N.Y. 1983)*; *Chelson v. Oregonian Publishing Co., 715 F.2d 1368 (9th Cir. 1983)*. The Eleventh **[**33]** Circuit in *Construction Aggreg., (supra)* while citing the Supreme Court's *Associated Gen. Contractors* decision, did not expressly consider the effect of that decision on the continued validity of the target area analysis. Thus, the scope of *Construction Aggreg.* as it relates to this question limits its application to the facts of this case. *Associated General Contractors, supra, at 908 n. 33*.

Whether or not *Associated General Contractors* truly represents a new standard for antitrust "standing," or is rather a purely semantical argument, this court adopts its language as the most thorough pronouncement of the Supreme Court to date on the standing issue in treble damage actions. At its core, *Associated General Contractors* **[**34]** admonishes us "to evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them" in the context of common-law damages litigation in 1890. *74 L. Ed. 2d 723, 736*. As guideposts for this evaluation the Court pointed to "previously decided cases [which] identify factors that circumscribe and guide the exercise of judgment in deciding whether the law affords a remedy in specific circumstances." *74 L. Ed. 2d at 737*. In light of the facts before it the Supreme Court found at least two factors favoring judicial recognition of the plaintiff's antitrust claim: (1) a causal connection and (2) intent to harm, although as to this latter factor the Supreme Court reiterated its *Blue Shield* holding that "the availabliity of the § 4 remedy to some person who claims its benefit is not a question of the specific intent of the conspirators." *74 L. Ed. 2d 738*, (quoting *Blue Shield, 457 U.S. 465, 73 L. Ed. 2d 149, 102 S. Ct. 2540*.) Factors favoring the defendants and which the Supreme Court concluded were controlling in *Associated Gen. Contractors* included: (1) "the nature of the plaintiff's alleged injury," (citing *Brunswick v. Pueblo Bowl-O-Mat)* **[**35]** 738 and (2) "the directness or indirectness of their asserted injury." 739. ***HN9***[] As to the issue of "directness" the Supreme Court first identified the chain of causation then highlighted the importance of finding an

> "identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement . . . [and therefore] diminish the justification for allowing a more remote party to perform the office of private attorney general." (p. 741).

As part of its discussion of the "directness or indirectness" of the plaintiff's harm, the Supreme Court also raised its concerns about highly speculative damage claims, saying:

> ***HN10***[] "The indirectness of the alleged injury also implicates the strong interest, identified in our prior cases, in keeping the scope of complex antitrust trials within practically manageable limits. These cases have stressed the importance of avoiding either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other." 741-42.

Turning now to the case at hand, the court first points out that a plaintiff's "standing to sue" is a preliminary matter **[**36]** to be evaluated in this circuit upon the pleadings alone. *Const. Aggregate Transport at 763*; *Yoder Bros. at 1359* (standing to sue is a preliminary matter to be evaluated upon the allegations of the complaint). NaBanco's allegations that it has been unable to compete against VISA member banks for merchant contracts due to the competitive advantage these banks enjoy from "on-us" transactions seem sufficient on their face to suggest a harm causally related to VISA's setting of an IRF. **[*1246]** VISA's argument that NaBanco's own conduct severs the chain of causation because it has had realistic alternatives available to it to avoid paying IRF misses the mark. ***HN11***[] The antitrust laws do not require a potential plaintiff to take extraordinary measures to avoid anticompetitive activity; in fact, this is one of the things the antitrust laws are designed to prevent. *Simpson v. Union Oil Co., 377 U.S. 13, 17, 12 L. Ed. 2d 98, 84 S. Ct. 1051 (1964)*; *Columbia Broadcasting System, Inc., v. ASCAP, 562 F.2d 130, 136 (2d Cir. 1977)*, *rev'd on other grounds, 441 U.S. 1 (1979)*.

---

[13] *See, Industrial Inv. Dev. Corp. v. Mitsui & Co., 671 F.2d 876 (5th Cir. 1982), vacated,* ***103 S. Ct. 1244 (1983)****, on remand, 704 F.2d 785 (5th Cir. 1983)*; *Ostrofe v. H.S. Crocker Co., 670 F.2d 1378 (9th Cir. 1982), vacated,* ***103 S. Ct. 1244 (1983)****.*

Further, the court finds that, under any characterization of antitrust standing currently urged upon us, **[**37]** NaBanco is a technically proper party to bring suit for treble damages. Using the methodology developed by the Supreme Court in *Associated Gen Contractors,* the court does not find that plaintiff has alleged or proved any specific intent on the part of VISA to harm NaBanco or those who stand in NaBanco's shoes but neither is such intent a necessary prerequisite to Section 4 standing. Plaintiff's alleged injuries are of the type Congress sought to remedy in providing a private remedy for violations of the antitrust laws. This is not a case, like *Brunswick,* in which plaintiff argues that the anticompetitive behavior by defendant (here, the setting of IRF) led to loss of profits due to increased competition in the market. Rather, NaBanco complains that it has been unable to compete effectively with some VISA merchant banks due to price-fixing by VISA. NaBanco not only argues the potential for current competitive losses, but argues that innovative technological changes are being discouraged by VISA's anticompetitive activities. To the extent that such changes also present the possibility for increased competition in the future, NaBanco seems to have more than sufficiently met the **[**38]** requirement of Section 4 standing to bring its challenge to VISA's Interchange Fee Arrangement.

Finally, the court does not find that NaBanco's alleged harm is either too remote or indirect to prohibit it from bringing its treble damage action. In this case, the "chain of causation" between plaintiff's claimed injury and the alleged restraint promoted by VISA seems "direct" enough to sustain plaintiff's standing. To argue, as VISA does, that the more appropriate plaintiffs are the merchant banks because they alone are in privity with VISA is to ignore the economic reality. While it is true that VISA merchant banks remain ultimately responsible for IRF, they are not primarily liable for its payment in all cases. Primary liability also lies with NaBanco as the merchant banks's functional equivalent in those cases in which VISA merchant banks (in contract with NaBanco) choose not to process transactional paper generated by VISA card purchases. In this way NaBanco aids the smooth functioning of the VISA system, a role which VISA should be reluctant to attentuate inasmuch as some of its participating merchant banks evidently do not find it cost-effective to perform the processing function **[**39]** themselves. Further NaBanco points to significant technological changes which it has made to accommodate changes in VISA's processing methodology. Bull TR. 593 (5/12/82) P. Ex. 1172; D. Ex. 1180. Insofar as these are changes which have not had to be made by VISA merchant banks which use NaBanco or NaBanco-like institutions to process transactional paper, VISA member banks are hardly in a position to say that they are more directly affected by the setting of IRF than NaBanco.

Similarly, VISA's argument that *Illinois Brick* outlaws treble damages for "functional equivalents" is misplaced. *Associated Gen. Contractors* demonstrates that, to the extent that *Illinois Brick* is relevant to antitrust standing, it is so in how the policies identified and promoted by that decision relate to the standing issues presented in this case. The *Illinois Brick* Court was primarily concerned with problems of dual recovery and the possibility of having to calculate the variable incidence of harm experienced by different antitrust victims where offensive use of pass-on **[*1247]** damages was alleged. Arguably, these are problems which also arise in the context of this case. For instance, **[**40]** it is possible, as VISA points out, that some of the merchant banks with which NaBanco contracts actually absorb some of the costs and economic consequences associated with IRF in their individual contracts with NaBanco. This would, of course, cause problems for the court in calculating the extent of damage borne by NaBanco versus that borne by the merchant banks with which NaBanco contracts. But identifying the merchant banks as the more appropriate plaintiffs to bring this action does not eliminate our problems regarding the calculation of damages. In fact, it compounds them. At least when NaBanco pays IRF we can assume, even if not with complete accuracy, that it bears the full economic cost of that payment without having to examine its individual contracts with merchant banks. It becomes harder for us to make that assumption in the case of merchant banks which use NaBanco since these banks do not pay IRF directly but only by virtue of whatever amount their contracts with NaBanco suggest they pay. We have similar problems with VISA's alternative argument that merchants, not merchant banks, are more appropriate plaintiffs than NaBanco to bring this suit. If what VISA is really arguing **[**41]** is ***HN12***[] the defense of pass-on damages, the court notes that this defense is only applicable where there is an existing cost-plus contract or its functional equivalent; i.e., a contract in which the impact of the illegal overcharge is determined in advance of the actual overcharge without reference to the interactions of supply and demand and other market forces. *Hanover Shoe, 392 U.S. at 494* (supra); *In Re Plywood Antitrust Litigation 655 F.2d 627 (5th Cir. 1981)*.

An argument that NaBanco's contracts were really cost plus or a legal equivalent is, at least, superficially persuasive. However, NaBanco's response to what it perceived to be the IRF problem was varied and thus, presents a set of facts in which the "cost plus" assertion appears wanting.

Further, VISA's standing agreement suffers from a consideration of the second of the dual concerns of the *Illinois Brick* Court, the impairment of anti-trust enforcement by a reduced incentive to sue. In *Illinois Brick* and *Hanover Shoe* the Supreme Court voiced this particular argument in terms of the diffusion of benefits to each plaintiff when potential recoveries had to be divided among a large group of plaintiffs down **[**42]** the line of economic causation, saying: "Added to the uncertainty of how much of an overcharge could be established at trial would be the uncertainty of how that overcharge would be apportioned among the various plaintiffs." *Illinois Brick at 725*. By allowing enforcement only by those who actually pay IRF, we limit the pool of potential plaintiffs. Thus, the concern for reducing the effects of treble damage suits brought by indirect purchasers with a smaller stake in the outcome is alleviated. *Illinois Brick at 724*.

Even more importantly, however, we assure ourselves of a potential plaintiff at the very least. NaBanco does fall prey to some of the same conflicts of interest which beset many VISA member banks which both issue cards and serve merchants, raising questions about its ability to pursue vigorously any cause of action against VISA; however, in arguing that only merchant banks have standing to sue it, VISA essentially invites its members to sue themselves for antitrust violations from which they in fact may benefit. While the possibility of suit by VISA member banks does exist, it is also more reasonable to conclude that member banks will attempt to ameliorate any **[**43]** problems they have with the IRF via their more direct access to the VISA Board of Directors. This opportunity is less available to NaBanco as a VISA non-member.

Injunctive Relief

Aside from seeking treble damages, NaBanco asks the court to enjoin VISA from continuing to conspire to fix prices. This request is based on § 16 of the Clayton **[*1248]** Act, *15 U.S.C. § 26*, which states in relevant part:

> ***HN13***[] Any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws, . . . when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity. . . .

Given the fact the court has already recognized NaBanco's standing under § 4 of the Clayton Act, an elaborate discussion of NaBanco's standing under § 16 is unnecessary. ***HN14***[] Most "courts take a less constrained view of standing in suits involving injunctive relief than in those demanding treble damages . . . ." *Jeffrey v. Southwestern Bell, supra, at 1132*. **[**44]** Even indirect purchasers can maintain actions for injunctive relief. *In re Beef Indus. Antitrust Litigation, 600 F.2d 1148, 1167 (5th Cir. 1979)*, *cert. denied, 449 U.S. 905 (1980)*. This is because "the policy considerations underlying the pass-on rule are not implicated in claims for injunctive relief." *Id.* Neither the risk of exposure to multiple liability or the difficulty in tracing the allocation of the overcharging among different levels of purchasers is related to the issue whether a party should be entitled to sue for injunctive relief. Nor does the position taken in *Illinois Brick* that effective enforcement of the antitrust laws requires that only direct purchasers be permitted to sue for treble damages have validity in the context of § 16.

HN15[] To achieve standing under § 16 then, all NaBanco must prove is that it is threatened with loss or injury cognizable in equity proximately resulting from the antitrust violation. *Mid-West Paper Products* at 591. Some courts have interpreted this proximate cause standard as one "no more rigorous than the general rule of standing." *Tugboat, Inc. v. Mobile Towing Co., 534 F.2d 1172, 1174 (5th Cir. 1976)*. Even if this **[**45]** were not the case, and the line drawing for proximate causation was necessarily to be drawn somewhere between the general rule of standing and standing for treble damage actions, that need not concern us here. This is not a case involving facts making it necessary to "measure the outer range of standing to sue under § 16. *Mid-West Paper Products* at 593. NaBanco is not like "potential plaintiffs . . . who may only be remotely affected by the ripples caused by the conspirators' tampering with the supply and demand curve." *Id.* NaBanco contends " . . . that under all circumstances prevalent in the real economic world, money is passing from [its] hands into the pockets of [VISA member banks] as a result of [IRF]. . . ." *Mid-West Paper Products* at 593. In order to participate in the system, NaBanco must pay IRF or it cannot access issuer banks to complete payment transactions. These facts seem sufficient in light of the policies behind § 16 to give NaBanco standing.

PER SE VERSUS RULE OF REASON

Section 1 of the Sherman Act reads in pertinent part as follows:

> § 1 **HN16**[] Trusts, etc. in restraint of trade illegal; penalty
>
> Every contract, combination in the form **[**46]** of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. 15 U.S.C. § 1

In enacting Section 1, Congress condemned in broad language concerted conduct which restrains trade. With such guidance as might be found in the common law cases, it left to the courts the scope and meaning of this mandate. As has been the case with Section 16 of the Clayton Act, the very breadth of the condemnation unavoidably gives rise to ambiguity, leading courts long ago to conclude that Congress could not have literally meant to ban every contract which in any sense restrains trade. As Justice Brandeis pointed out in *Board of Trade of the City of Chicago v. United **[*1249]** States, 246 U.S. 231, 38 S. Ct. 242, 62 L. Ed. 683 (1918)*:

> **HN17**[] The legality of an agreement or regulation cannot be determined by so simple a test, as whether it restrains competition. Every agreement concerning trade, every regulation of trade, restrains. To bind, to restrain, is of their very essence. The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition **[**47]** or whether it is such as may suppress or even destroy competition. *Id. at 238*.

In the years since the adoption of the Sherman Act in 1890, a number of competing views have been put forward as to its meaning. **HN18**[] Stated simply, however, the governing law has been that the Sherman Act bans all concerted arrangements which are adopted for the purpose of reducing competition, or which, regardless of purpose, have a significant tendency to reduce competition. However, arrangements which are adopted for and tend to to achieve other legitimate purposes do not fall within the condemnation of the Act merely because of some incidental and inconsequential restraining effect on competition.

This general position has been reached, not directly, but through two subsidiary rules, **HN19**[] the per se doctrine and the rule of reason, which taken together tend to condemn arrangements which have the purpose or effect of significantly restraining competition and to validate those which do not. The per se rule forecloses any analysis of the purpose of a restraint or the nature, extent and degree of its market effect, thus avoiding "the necessity for an incredibly complicated and prolonged economic investigation **[**48]** into the entire history of the industry involved, as well as related industries, in an effort to determine at large whether a particular restraint has been unreasonable." *United States v. Northern Pacific Ry., 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*. Thus the per se rule is generally limited to those categories of restraints for which no elaborate study of an industry is needed to establish that their nature and effect is "plainly" or "manifestly" anticompetitive. *Broadcast Music, Inc. v. Columbia Broadcasting Sys., Inc., 441 U.S. 1, 8, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*; *Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 646, 64 L. Ed. 2d 580, 100 S. Ct. 1925 (1980)*; *National Society of Professional Engineers v. United States, 435 U.S. 679, 692, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978)*; *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 50, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*. To be manifestly anticompetitive, agreements or practices must have a "pernicious effect on competition and lack . . . any redeeming virtue." *United States v. Northern Pac. Ry., 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514* (quoted in *Sylvania, 433 U.S.* ***[**49]*** *at 58*).

HN20[] The classic definition of the rule of reason was enunciated in *Standard Oil, supra,* if asserted in its embryonic form in *United States v. Joint Traffic Ass'n, 166 U.S. 290, 17 S. Ct. 540, 41 L. Ed. 1007 (1897)*. As construed in *Standard Oil,* Section 1 of the Sherman Act was an "all-embracing enumeration to make sure that no form of contract or combination" by which undue restraint was achieved "could escape condemnation." *221 U.S. 1, 58-60*. The function of "reason" in the analysis is to discriminate between restraints which are "undue" and those which are not. In *Professional Engineers* the Supreme Court indicated that, contrary to its name and the suggestion of Mr. Justice White in *United States v. Trans-Missouri Freight Ass'n, 166 U.S. 290, 41 L. Ed. 1007, 17 S. Ct. 540 (1898)*, the rule of reason "does not open the field of inquiry to any argument in favor of a challenged restraint that may fall within the realm of reason." *Professional Engineers, 435 U.S. at 688*. Instead, the basic inquiry is limited to whether the restraint in question "is one that promotes competition or one that suppresses competition." *Id. at 691*. The opinion stressed that **[**50]** such an inquiry "is **[*1250]** confined to a consideration of impact on competitive conditions" and that the function of the court is "to form a judgment about the competitive significance of the restraint." *Id. at 690, 692*. Because the inquiry is limited to determining the "market impact" on competition, defenses "based on the assumption that competition itself is unreasonable" or upon considerations unrelated to the effect of the restraint on competition are irrelevant. *Id. at 696*.

NaBanco's Per Se Argument

At least twice before, [14] this court has considered and rejected NaBanco's argument that the action of the VISA Board of Director's in establishing and setting a fixed fee for interchange transactions is a "per se" violation of *15 U.S.C. § 1*. Despite this court's previous rulings on the matter, NaBanco has pressed the argument that the relevant market in this case is the market consisting of the five major general purpose credit cards. NaBanco argues further that the proper analytical framework within which to analyze whether VISA's activities have any competitive impact is one which consists of three separate and distinct "markets": one for card-issuing services; **[**51]** the second for merchant-servicing banks; the third for "IRF-like" interchange services. The card-issuing market consists of banks and other institutions which offer consumers various credit card services having a multiplicity of characteristics. Included among these characteristics are credit options and other money management capabilities, varying degrees of card recognition and/or acceptance rates, different convenience qualities, etc. The traits associated with the market for merchant banks are two-fold, including what NaBanco calls a "factoring service" and an "account carrying" or "clearinghouse" service. By "factoring service", NaBanco means the initial contract by which a merchant bank or a "NaBanco-like" institution agrees to "purchase" merchant receivable items created by consumer bank credit card use; NaBanco uses the second two terms to identify the mechanics of processing claims and paying accounts.

[52]** Each of these separate and distinct markets are national in scope according to NaBanco [Bull TR. 640-41 5/12/82], the competitors in the card-issuing market allegedly including not only VISA and Mastercard but also the traditional T&E cards (American Express, Carte Blanche, Diner's Club), certain debit cards, and bank ATM cards. NaBanco's description of the competitive actors in the merchant-servicing market includes those banks which act as merchant-servicing banks, as well as other entities such as NaBanco which provide the same kinds of general services to merchants, with varying degrees of emphasis, facilities, and expertise.

As mentioned earlier, NaBanco has taken the position that merchant banks are selling receivables to issuer banks, and the issuer banks, through the control of the VISA Board of Directors, are directly fixing the discounted price of those sales by means of the Base II exchange fee imposed on those members which elect to use Base II.

The Facial Unreasonableness Test

Alternatively, NaBanco argues that should the court determine the IRF is not per se illegal the test the court should apply in determining IRF's legality under the antitrust laws is ***HN21***[] the **[**53]** "facial unreasonableness test." This test, first enunciated in *United States v. Realty Multi-List, Inc., 629 F.2d 1351 (5th Cir. 1980)* is actually a two-

[14] NaBanco has raised the issue of per se validity several times: (1) two motions for preliminary injunction; (2) two motions for partial summary judgment; (3) trial brief; and (4) at trial. By order dated September 15, 1980, this Court denied NaBanco's various summary judgment motions.

part test which, unlike either the per se or rule of reason tests, shifts the burden of proof from the plaintiff to the defendant; i.e., once the plaintiff has sustained its **[*1251]** burden of proving that a defendant's activities are a "significant restriction" affecting competition and that the defendant has significant market power, the burden then shifts to the defendant to show that the particular practice in question is "justified by the competitive needs" of the defendant and also both "reasonably necessary to the accomplishment of the [defendant's] legitimate goals" as well as narrowly tailored to that end. *Id. at 1370*.

VISA's Answer to NaBanco's Per Se Argument

NaBanco buttresses its per se argument by pointing to a long line of cases, beginning with *United States v. Trenton Potteries Co., 273 U.S. 392, 71 L. Ed. 700, 47 S. Ct. 377 (1927)*, in which price fixing, as a concerted activity among competitors, is treated as a "naked" price constraint. *(See also Joint-Traffic Ass'n, supra, 568*.) This is **[**54]** true whether the price "fixed" is the ultimate price of a good or service or simply a component of the ultimate price. *Catalano, 446 U.S. 643, 645, 64 L. Ed. 2d 580, 100 S. Ct. 1925 (1980)*. Further, a price-fixing agreement that establishes maximum prices is considered to be as illegal as one establishing minimum prices. *Arizona v. Maricopa County Medical Society, 457 U.S. 332, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*; *see also Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, 340 U.S. 211, 95 L. Ed. 219, 71 S. Ct. 259 (1951)*.

This jurisprudence of per se price fixing validity exists because, for the most part, it has been difficult for courts to conceive of any example in which consequent enhancement of competition arises in the context of price fixing or, even if such enhancement occurred, that it could be so great as to render the restraint insignificant in accordance with the dictates of the rule of reason. *Lawrence Sullivan Antitrust,* W. Publishing Co., St. Paul, Minn. (1977) p. 196. Almost all the cases upon which NaBanco relies, however, display three unifying characteristics: (1) the practices examined were related to the market in such a way that if they **[**55]** were to have any effect at all it would be on price formation, (2) the practices lacked any significant degree of integration of functions among the competitors, and (3) the arrangements were not ones which helped to make or improve a market by facilitating trading, exchanging information, standardizing product or the like. Since price formation was affected, if there was any consequence at all, it is entirely fair and functionally accurate for courts to treat arrangements like these as naked restraints.

VISA, however, has successfully opposed NaBanco's arguments in prior proceedings in this case on the grounds that NaBanco's per se price fixing theory is simply inapposite to the economically complex practices at issue in this case. While acknowledging high levels of vigorous competition at both the card-issuing and merchant-servicing ends of its bank credit card system, VISA challenges NaBanco's "tri-market theory." First it contends that "issuer" banks and "merchant" banks are not two separately competing sets of VISA members. The terms are useful only as indicators of a member's role in any single interchange transaction. Nor is it accurate, says VISA, to speak of issuing and merchant **[**56]** banks as members with adverse interests. VISA further contends that it is meaningless to speak of a "product" offered at either the card-issuing or merchant-servicing end separated from its counterpart at the other. Bank credit cards, VISA argues, are useful only to the extent they provide the cardholder with purchasing options. All the characteristics which NaBanco asserts are so important to credit card differentiation, therefore, are only important to the extent they enhance any particular credit cardholder's purchasing options by increasing the numbers and kinds of participating merchants. Concomitantly, the numbers and kinds of participating merchants depends to a great extent on the numbers and kinds of consumer cardholders, as well as characteristics of individual merchant-servicing banks. In fact, (VISA asserts) the particular demand for merchant banks suggested by NaBanco would not exist but for **[*1252]** the demand by consumers for purchasing options. Viewed from the perspective of the participants, for the VISA service to exist at all there must be members willing to issue cards and members willing to sign merchants.

Thus, argues VISA further, the relevant market in this **[**57]** case is the market consisting of all nationwide payment services used in retail sales, including VISA, Mastercard, T&E cards, merchants' proprietary cards, merchants' open book credit, cash, travelers cheques, ATM cards, personal checks and check guarantee cards, rather than the market for the Interchange Fee which VISA contends is either non-existent or at most an example of market failure at its most extreme since only one buyer (the cardholder's issuer bank) reasonably exists for each piece of transactional paper. In making its argument then, VISA likens itself to a joint venture. The setting of IRF, far from being a naked restraint of trade as NaBanco asserts, rather becomes a device for sharing costs within the VISA system. This device, which, VISA argues is necessary in order to produce the VISA product, thereby enhances "interbrand" competition which VISA argues "is the primary concern of the ***antitrust law***." *Sylvania, 433 U.S. 36, 52 n.19, 53 L. Ed. 2d 568, 97 S. Ct. 2549*. Even if IRF were not necessary to market the VISA product, VISA argues it should be analyzed under the rule of reason because it is an agreement internal to a joint venture which yields efficiencies beneficial **[**58]** to competition, that its members, acting alone, could not offer, and which allows the venture to offer a product which is different from, and greater than, the sum of the individual products of its members. *Broadcast Music Inc., v. CBS, 441 U.S. 1, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*; *United States v. Multi-Realty, (supra).*

Rejection of the Per Se Rule

Previous discussions have consistently recognized the pro-competitive or efficiency creating potential of joint ventures and other cooperative organizations. ***HN22***[] While joint ventures are not immune from antitrust scrutiny, the anti-trust laws allow restraints necessary to accomplish pro-competitive objectives of joint ventures and similar organizations. *See, e.g., United States v. Realty-Multi List, Inc., 629 F.2d 1351, 1368 (5th Cir. 1980)*; *Central Iowa Power & Federal Energy Regulatory Commission, 196 U.S. App. D.C. 249, 606 F.2d 1156, 1163 (D.C. Cir. 1979)*. When these restraints, sometimes called "ancillary restraints" are addressed, per se prohibitions are not applied because it cannot be said that in the aggregate, the gains from imposition of the per se rule will far outweigh the losses. *Board of Regents of* **[**59]** *the University of Oklahoma v. National Collegiate Athletic Ass'n., 707 F.2d 1147, 1153 n.6 (10th Cir. 1983), cert granted; 104 S. Ct. 272 (1983)*. As the Supreme Court recognized in *Broadcast Music Inc., v. CBS, 441 U.S. 1, 23, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*, joint ventures "are not usually unlawful, at least not as price fixing schemes, where the agreement on price is necessary to market the product at all." *Accord, Arizona v. Maricopa County Medical Society, 457 U.S. 332, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*. Accordingly, such agreements are analyzed under the rule of reason so that courts can weigh their pro-competitive effects. *See, e.g., North American Soccer League v. Nat'l Football League, 670 F.2d 1249, 1259 (2d Cir. 1982)*, *Los Angeles Memorial Coliseum Commission v. National Football League, 468 F. Supp. 154 (C.D. Cal. 1979)*, reversed on other grounds *634 F.2d 1197 (9th Cir. 1980)*; *Northern Bank & Trust Co. v. National Bankamericard, Inc., 485 F.2d 119 (8th Cir. 1973) cert denied, 415 U.S. 918, 39 L. Ed. 2d 473, 94 S. Ct. 1417 (1974)*; *Smith v. Pro Football, Inc., 193 U.S. App. D.C. 19, 593 F.2d 1173 (D.C. Cir. 1978)*; *National Bank* **[**60]** *of Canada v. Interbank Card Ass'n, 507 F. Supp. 1113, 1122 (S.D.N.Y. 1980)* aff'd, *666 F.2d 6 (2d Cir. 1981)*; *Broadcast Music, Inc., v. Moor-Law, Inc., 527 F. Supp. 758, 765 (D. Del. 1981) aff'd 691 F.2d 490 (3d Cir. 1982)*; *Palmer v. Roosevelt Lake Log Owners Ass'n, 551 F. Supp. 486 (E.D. Wash. 1982)*.

[*1253] Given this background of jurisprudence, the Court concludes that IRF should be analyzed under the rule of reason because it is an agreement on the terms of interchange necessary for VISA to market its product and be an effective competitor. *Broadcast Music Inc., v. CBS 441 U.S. 1, 23, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*. The *Broadcast Music* case teaches that ***HN23***[] in separating those price-fixing arrangements to which the per se rule is to be applied from those to be examined under a rule of reason analysis, the Court is to assess whether "facially" the practice "always or almost always" tends to restrict output, or whether "facially" it is likely to contribute to the creation of "economic efficiency." Other than the testimony of one of NaBanco's experts, Louis A. Guth, plaintiff has failed to produce any evidence suggesting the existence of separate and **[**61]** independent card-issuing and merchant-servicing markets. All the evidence presented at trial has pointed to a complex set of inter-relationships between cardholder and merchant demands for the VISA service suggestive of a joint venture -- even if VISA cannot be properly characterized as one in the strictest sense of the word.

In VISA's case, profits and losses are not specifically shared among the various VISA members, nor is there any commingling of management functions. Furthermore, to the extent possible, each member engages as an independent unit in economic competition with other VISA members with respect to various aspects of their common venture. For example, merchant banks compete with issuer banks to sign up card-holders and, to the extent that certain banks perform both functions, VISA members compete with each and every one of their fellow affiliates.

Nevertheless, while considerations such as these may be important to courts considering joint venture labels, there is no requirement, for example, that a joint venture-like entity integrate or share costs in some prescribed fashion in order to survive per se scrutiny. See Louis, *"Restraint Ancillary to Joint Ventures and* **[**62]** *Licensing Agreements: Do Early and Topco Logically Survive Sylvania and Broadcast Music?"* 66 Va.L.Rev. 879, 896 n.114 (1980); *Los Angeles Memorial Coliseum Commission v. National Football League, 468 F. Supp. 154, 163 (C.D. Cal. 1979)* (applies rule of reason even though "profits and losses are not shared.)"

The fact that VISA members have integrated to the extent of agreeing on the terms of interchange, but have not fully integrated and still compete for cardholders and merchants, is typical of pro-competitive joint ventures and serves to maximize VISA's competitive potential. The fact of the matter is that even NaBanco does not go so far as to challenge the whole plethora of ancillary regulations attendant to the VISA structure, including, for example, the obligation of all issuer banks to reimburse the merchant banks (and thus the "NaBancos" in the system) for processing the transactional paper generated by their cardholders' use of their VISA cards. [15] It is, perhaps, appropriate to note parenthetically that so long as there are benefits to be parlayed into profits, NaBanco has elected to remain in VISA's beneficial ambit. Even if the Court were to conclude that VISA **[**63]** is not akin to a "joint venture;" we could not ignore NaBanco's reluctance to "throw the baby out with the bath water."

In any event, IRF serves to share substantial costs and risks between VISA members, and interchange transactions are an integration because in such transactions two different members combine their activities in order to offer a service to a cardholder and a merchant.

Thus, VISA is a joint venture in that terms most meaningful sense, i.e., whether or not the composite entities compete with one another in any meaningful sense in the marketplace under examination. Unwarranted emphasis upon formalistic aspects of the relationship of VISA and its member institutions ignores the subtle but more **[*1254]** significant interdependency of the members and their indivisibility with VISA. Assuming that VISA cardholders want unplanned **[**64]** and rapid access to merchants anywhere, regardless of whether their own bank signed a particular merchant, and that VISA merchants want unplanned and rapid access to each cardholder who enters their shop, regardless of whether the merchant's bank signed the cardholder, then some before-the-fact agreements must be made. The principal purpose of these agreements with member banks does not appear to be to improperly fix prices as NaBanco asserts but rather to provide a service which each member bank could not alone provide, namely, universal payments service which ensures that a VISA card will be honored by any merchant regardless of which bank issued it so long as that merchant displays the VISA logo on its door. Given past and current interstate banking regulations which once flatly proscribed and continues to inhibit the growth of single bank entities which cross state lines, it is hard to conclude otherwise. Even assuming that each VISA member could afford to issue its own card, there would be no assurances of universality since issuer banks and merchant banks might still differ as to exchange rates. Cardholders would either have to carry a suitcase full of cards representing the **[**65]** different banks which have contracts with particular merchants or suffer the disappointment of being unable to transact certain purchases with merchants whose merchant banks refused for some reason to contract with the cardholders' bank; to say nothing of the inconvenience and dissatisfaction of the merchant who must check each card out with its merchant bank even if it may mean that he will lose a sale. Prohibiting IRF would thus undermine "interbrand" competition, "which is the primary concern of the ***antitrust law***." *Continental T.V. Inc., v. GTE Sylvania, Inc., 433 U.S. 36, 52 n.19, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*.

Even if IRF were not necessary to market a payment services product of the type in question, it should be analyzed under the rule of reason because it is an agreement internal to a joint venture which yields efficiencies beneficial to competition. VISA's members, acting alone, could not offer such efficiencies which indeed allow the venture to offer

---

[15] As a further example, merchants in the VISA system are required to honor proper customer requests to use the card, and, of course, to abide by other system regulations.

a product which is different from, and greater than, the sum of the individual products of its members. *Broadcast Music, supra*; *Realty Multi List, Inc., supra.*

Broadcast Music and *Maricopa* do not **[**66]** require the court, as NaBanco contends, to make a subjective judgment as to whether a joint ventures product is "unique." Rather, they call for ***HN24***[] the court to compare the product of the venture to the individual offerings of the venture's members and determine whether the venture offers pro-competitive abilities which its members acting alone could not offer. *Broadcast Music, 441 U.S. at 21-23*; *United States v. Columbia Pictures Industries, 507* F. Supp*. 412, 430 (S.D.N.Y. 1980).* Thus the agreement to market compositions in *Broadcast Music* survived the per se test even though the individual composers could market their compositions on their own. *441 U.S. at 23-24*. The consolidation of thousands of what would otherwise be balkanized local cards into one internationally accepted card makes the VISA system a viable and competitive whole which is "truly greater than the sum of its parts." *Broadcast Music, 441 U.S. at 21-22*. A similar agreement (governing a cost sharing arrangement reimbursing one airline which provides credit card services to a passenger who flies on a different airline) accordingly was analyzed under the rule of reason and ultimately upheld by the Civil **[**67]** Aeronautics Board in *In Re UATP - 1976 Agreements,* 85- 11 C.A.B. 2481 (1980).

Further, IRF is properly analyzed under the rule of reason because it is not mandatory. Acting on behalf of its principals, NaBanco is and always has been free to negotiate different terms of interchange, (not using Base II) and some VISA issuers have been willing to make alternate arrangements. ***HN25***[] A practice is not unlawful **[*1255]** per se where as in this case, there is no legal, practical or conspiratorial impediment to making alternate arrangements. *Broadcast Music, Inc., v. CBS, 441 U.S. 1, 24, 60 L. Ed. 2d 1*, *99 S. Ct. 1551 (1977); In Re ATP-1976 Agreements,* 85-11 C.A.B. 2481 (1980).

The Supreme Court's decision in *Arizona v. Maricopa County Medical Society, 457 U.S. 332, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)* confirms this analysis. The agreement in *Maricopa* was held to be illegal per se because, unlike IRF, it fixed the prices charged to third parties by individual doctors for their own services. *102 S. Ct. at 2480*. Moreover, and also in contrast with the IRF arrangement, the *Maricopa* court granted summary judgment only after reporting six separate times -- that nothing **[**68]** in the record even arguably supported the defendants' assertion that agreement on a fee was necessary to market the product. *102 S. Ct. at 2477, 2477-78 n.26, 2478, 2479 n.33*. At the same time, the court in *Maricopa* confirmed the approach set forth in BMI and emphasized that agreements on price which are inherent in the structure and successful operation of a bona fide joint venture can be "perfectly proper." *102 S. Ct. at 2480*.

In *Northern Bank & Trust Co. v. National BankAmericard, Inc., 485 F.2d 119 (8th Cir. 1973)*, *cert denied, 415 U.S. 918, 39 L. Ed. 2d 473, 94 S. Ct. 1417 (1974)*, the Court refused to apply the per se rule because of lack of experience with the economics of a fledgling industry. In discussing a different by-law of VISA's predecessor NBI, the Court said:

> The bank card industry is a relatively new one and, with over eight billion dollars in annual business, a very large and important segment of our economy. Considering the importance of the industry and the lack of definitive information relating to competition therein, it would be a mistake to determine this case of first impression on a per se basis. This is especially true where it may result **[**69]** in the dilution of competition or the elimination of one of the two competitors, where this is not an aggregate of illegal restraints such as price fixing or exclusive territorial allocations and where the initial purpose in forming the joint venture, to produce a national credit card, is obviously not illegal. *485 F.2d 119, 129-130*.

Courts have been reluctant to apply the per se rule in cases involving whole markets which do not readily fit into the antitrust context. Prime examples of this type of situation are those cases involving challenges to the rules of sports associations. There is no compelling reason why many of the characteristics the courts have found to be fundamental to those organizations should not be found to be equally important to the functioning of the VISA system. Like the sports association, the VISA system is an example of an association where cooperation is as much a necessary part of the "game" as competition. Just as there is a need to establish some "rules of the game," affecting such matters as the size of the field, the number of players on a team, and the extent to which physical violence is to be encouraged or proscribed, [16] in order for there to **[**70]** be sports contests at all, so too there must be "rules" to enable the efficient coordination of the otherwise disparate operations of VISA members. Furthermore, just as the establishment of game rules by professional organizations does not mean that individual member clubs do not compete for players and fans or between each other on the playing field, the creation of VISA by-laws has not precluded competition among individual VISA members. In this way, cooperation and competition have made for the best of all possible worlds, a world which would probably not exist but for this particular combination. In *NCAA v. Board of Regents, (supra)*, the Supreme Court, while finding the television plan inquestion violative of the Sherman Act (because of its clear restraints), refused to apply the per se rule in a setting which (absent similar restraints) lends itself to comparison with the functional needs of the VISA system.

[71] [*1256]** In choosing to apply the rule of reason analysis to this case, the court also rejects the applicability of the so-called "facial unreasonableness" theory set forth in *Broadcast Music* and applied in *Realty Multi List.* First, it should be noted that *Realty Multi List* is a group boycott case, and not a case of alleged horizontal price fixing as is this case. In any event, if we assume that *Realty Multi List* applies to the facts of this case, it presents only a poor variation of the rule of reason test appropriate here in light of the "joint venture" nature of the VISA system. The *Realty Multi List* court suggests as much when it says: "This argument is, of course, a version of the rule of reason." *Id. at 1369*.

The facial unreasonableness theory can properly be invoked only where the practice at issue constitutes a "significantly restrictive rule of a combination or trade association with significant market power, which lacks competitive justification or whose reach clearly exceeds the combination's legitimate needs." *Id. at 1370*. Membership rules, such as those at issue in *Realty Multi List,* present viable candidates for invalidation as "significantly **[**72]** restrictive" under this test since they presumptively preclude competitors from participating in an essential market. But cost sharing arrangements among partners or venturers are not patently "restrictive" for the reasons addressed by this court in rejecting per se treatment.

Moreover, even if IRF appeared to be sufficiently "restrictive" to invoke the facial unreasonableness theory, a rule of reason analysis could be avoided only if plaintiff demonstrated that VISA possessed "significant market power" since it is, of course, unlikely that serious anticompetitive effect will result from exclusion from membership [or restrictive practices]" if such power is lacking. *Id. at 1372* at n.40. In this respect, the contrast between the VISA situation and the multiple listing service in *Realty Multi-List, Inc.,* is striking. Multiple listing services involving local markets and exclusionary membership rules almost invariably possess the requisite degree of market preclusion. Indeed, in *Realty Multi List,* the issue was hardly disputed, and there the issue was reserved for trial. *Id at 1372 n.39*. Here consideration of the relevant market reveals that VISA has no significant **[**73]** market power, notwithstanding plaintiff's suggestion that the court need not undertake a proper inquiry into demand cross-elasticities.

Furthermore, if we assume NaBanco could cross the "market power" threshold, the facts adduced at trial demonstrate sufficient pro-competitive justification to require that a full rule of reason inquiry be undertaken. The need for a cost-sharing mechanism within the VISA joint venture is itself sufficient justification as *Broadcast Music* indicates. This Court has already recognized, for example, that the question whether IRF could be replaced by "competition" at least presents an issue of fact, if we indulge the assumption that a negative answer to that question is not obvious.

In sum, care must be taken to avoid "easy labels," whether appearing in Latin (per se rules) or convenient shorthands ("facial unreasonableness"). The critical inquiry under the Sherman Act must be whether a challenged practice is anti-competitive in its economic effects. The explanation this court includes below of why IRF is highly competitive and thus lawful under the rule of reason confirms the conclusion that condemning the fee out of hand, as either per se unlawful **[**74]** or "facially unreasonable," would be a mistake.

---

[16] *NCAA v. Board of Regents of Univ. of Okla., 468 U.S. 85, 82 L. Ed. 2d 70, 104 S. Ct. 2948*.

RULE OF REASON ANALYSIS

Having, hopefully, illuminated the passage to a consideration of the reasonableness of VISA's fee plan, the court now turns to an analysis of the competitive effects of IRF as an agreement ancillary to a type of "joint venture." **HN26**[] Under the rule of reason test it is plaintiff's burden to establish that the practice complained of has an adverse impact on competition. *Graphic Products Distributors, Inc., v. Itek Corp. 717 F.2d 1560, 1573 (11th Cir. 1983)*. It should be stressed, however, that **[*1257]** in making this a determination, the relevant question is not whether the challenged practice is the *most* competitive device that can be imagined, or the "least restrictive," but simply whether it is reasonable; i.e., not "unduly" restrictive of competition. *GTE Sylvania, Inc., supra, 49*; *National Auto Brokers Corp. v. General Motors Corp., 572 F.2d 953, 960 (2d Cir. 1978)*, *cert. denied, 439 U.S. 1072, 59 L. Ed. 2d 38, 99 S. Ct. 844 (1979)*. So long as a practice is "fairly necessary" to achieve a legitimate purpose, it is not unlawful under the rule of reason. *Broadcast Music, Inc. v. Moor-Law, **[**75]** Inc., 527 F. Supp. 758, 769 (D. Del. 1981)*, quoting *American Motor* *Inns v. Holiday Inns, Inc., 521 F.2d 1230, 1248-49 (3d Cir. 1975)*. In applying this standard, the competitive benefits of the challenged practice are weighed against its alleged harmful effects and a violation of the Sherman Act will be found only where the balance tips decidedly in favor of the latter. *Columbia Broadcasting System, Inc. v. American Soc. of Composers, Authors and Producers, 620 F.2d 930, 934* (2d Cir.), *cert. denied, 450 U.S. 970, 67 L. Ed. 2d 621, 101 S. Ct. 1491 (1981)*; *National Bank of Canada v. Interbank Card Ass'n., 507 F. Supp. 1113, 1122 (S.D.N.Y. 1980)*.

As suggested above, **HN27**[] plaintiff must shoulder the burden, in "rule of reason" presentation to demonstrate the balance tipping in plaintiff's favor; that is, demonstrating that alleged "anticompetitive effects of the setting of an IRF decidedly outweigh the pro-competitive benefits of the practice. *See, e.g., Red Diamond Supply Inc., v. Liquid Carbonic Corp. 637 F.2d 1001, 1005, 1007* (5th Cir.; *cert denied, 70 L. Ed. 2d 102 (1981)*; *Continental TV, Inc., v. GTE Sylvania Inc., 433 U.S. 36, 49, 53 L. Ed. 2d 568, 97 **[**76]** S. Ct. 2549*, *Columbia Broadcasting System, Inc., v. A.S.C.A.P., 620 F.2d 930, 934* (2nd Cir., *cert. denied, 450 U.S. 970, 67 L. Ed. 2d 621, 101 S. Ct. 1491 (1981)*. Moreover, in meeting its burden, NaBanco must prove far more than that the practice it challenges has had an effect on its business. *See, e.g., Oreck Corp. v. Whirlpool Corp., 579 F.2d 126, 133-34 (2d Cir. 1978)*: *Balogh's of Coral Gables, Inc., vs. Getz, 510 F. Supp. 741, 748 (S.D. Fla. 1981)*; *JBL Enterprises, Inc., v. Jhirmack Enterprises, Inc., 509 F. Supp. 357, 366 (N.D. Cal. 1981)*. The existence or non-existence of market power in a relevant market is a critical consideration. *Spectrofuge Corp. v. Beckman Instruments, Inc., 575 F.2d 256, 277 (5th Cir. 1978)* *cert. denied 440 U.S. 939, 59 L. Ed. 2d 499, 99 S. Ct. 1289 (1979)*.

HN28[] A relevant market, or "area of competition," consists of two elements - products and geography. *Brown Shoe Co. v. United States, 370 U.S. 294, 324, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*. As for the former element, the Supreme Court has held that it is defined by reference to "the reasonable interchangability of use or the cross-elasticity of demand between the product **[**77]** itself and the substitutes for it." *Id. at 325*. *See also* *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 394-96, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*.

There is a defect in NaBanco's argument which can only be successfully dealt with by accepting VISA's argument that the sale of receivables makes no sense except in its connection with a payment service system. It is, perhaps, appropriate to point out parenthetically that NaBanco would not exist but for the payment systems. The court finds that the relevant market in this case consists of the market for payment systems as VISA contends. Not only did the testimony at trial suggest that VISA developed as the result of Bank of America's determination to provide and promote a payment system of nationwide proportions to compete with other payment systems then in existence, the evidence also indicated considerable success. The cross-elasticity of both demand for and supply of VISA and other payment devices is quite high. Both cardholders and merchants who testified at trial considered the VISA services equivalent or sufficiently close to a variety of payment systems used in retail **[*1258]** sales, including other **[**78]** credit cards, travelers cheques, cash, ATM cards, personal checks, and check guarantee cards. Edwards. TR. 110-124 (6/2/83); Baxter. TR. 24-35 (2/13/83); Phillips. TR. 144-151 (6/6/83); Emerson. TR. 20 (1/13/84). While each of these different payment service devices was not considered to be a close substitute for a VISA card for purchases of every possible product at every possible price, all payment services taken together were sufficient to provide, at the least, several close substitutes for a VISA card in any possible context. Cash, for example, might be a good substitute for face-to-face transactions involving small dollar amounts, while checks would be better for larger transactions involving long-distance exchanges. Phillips. TR. 144-151 (6/6/83); Baxter. TR. 24-35 (2/13/83).

Testimony by VISA experts also confirmed substitutability between VISA and other, technologically innovative, payment devices including but not limited to regional ATM cards (Cox. TR. 128-29 (1/13/83)), debit cards (Duffy. TR. 2870-72 (9/23/82)), as well as retail proprietary cards (Duffy. TR. 2667 (9/22/83)) and new multi-purpose cards like the Sears/Merrill Lynch cards now available. Cox. TR. 86-89, **[**79]** 128-29 (1/13/83).

To the extent that VISA also extends credit to consumers it can also be argued that it competes in the credit extension market along with commercial banks, savings and loan associations, consumer finance companies, credit unions, and certain competing credit cards such as Mastercard, department store proprietary cards, and oil company cards. NaBanco, however, has never alleged nor contended that VISA has any market power in this market, nor has it ever alleged that either VISA or its IRF requirement presented any anticompetitive effects therein. Therefore, the court does not include these credit extending devices within the relevant market except to the extent these devices also serve as payment system mechanisms (e.g. Mastercard, proprietary cards, oil company cards, etc.).

As for the geographic market which is relevant in the context of this case, there appears to be no issue: VISA competes nationally, indeed internationally, with competitive payment systems. Since NaBanco's business is similarly conducted on a nationwide scale, no relevant geographic sub-market is even arguably presented. NaBanco agrees with this. See NTB at 25.

Having already defined the relevant **[**80]** market as the nationwide market for payment systems, the court must still consider whether or not VISA's share of that market is such as to indicate that it wields power in that market. The Court concludes that it is not. VISA's share of the payment services market is probably less than five percent according to testimony heard at trial. Edwards 118-20 (6/3/83); Cox 139-40 (1/13/83). Exhibits 2089-2094. This share is far too small to allow VISA to have any legally pertinent anticompetitive effects Cox TR. 139-40 (1/13/84); Phillips TR. 156-58 (6/6/83); Guth TR. 3-4 (1/18/84).

Furthermore, in the opinion of NaBanco's own expert, Dr. Cox, the new regional ATM debit card networks will one day force VISA out of business unless VISA promptly reduces IRF. Cox TR. 41-42 (1/13/83). The existence and strength of this type of competition, implying as it does ease of entry into the market, together with the absence of abnormally high profits earned from VISA operations, (as testified to at trial), seems to preclude any compelling argument that VISA has market power. If VISA had any choice in the matter it would certainly seem appropriate for it to reduce IRF in light of the evidence presented.

[81]** Building on the foregoing comments, the Court makes and enters these additional and somewhat more specific findings of fact:

A. VISA lacks power in the relevant market. In the absence of such market power, VISA lacks the ability to impose any restraint detrimental to competition.

[*1259] 1. The relevant market in this case is the nationwide market for payment systems.

(a) Both parties agree that the geographic market is nationwide.

(b) The relevant product market in this case is a market consisting of VISA and all payment services used in retail sales. This market includes VISA, MasterCard, T & E cards, merchants' proprietary cards, merchants' open book credit, cash, travelers cheques, ATM cards, personal checks and check guarantee cards. None is a perfect substitute for a VISA card, but they are all quite good substitutes for each other and should be considered part of the same market. An examination of cross-elasticities of supply and demand demonstrates that the other payment services above are sufficiently close substitutes for the VISA card that they must be considered part of the same market.

B. VISA also competes in a market for the extension of credit to consumers. **[**82]** But NaBanco did not allege or contend that VISA had market power in the credit extension market, nor did it allege or contend that VISA or IRF had any anticompetitive effects in that market. That market includes other sources of credit available from commercial banks, savings and loans, consumer finance companies, credit unions and competing cards such as MasterCard, department store proprietary cards and oil company cards. *In the market so defined, VISA's share is less than 10% and VISA does not possess sufficient market power to effect an anticompetitive restraint.*

C. There is no market for the "sale" of cardholder transactions ("cardholder paper") from merchant banks to issuing banks, and it would be meaningless to use such a market for purposes of analysis in this case. Only the member which issued a card has any interest in acquiring from merchant banks transactions effected by that card.

D. VISA has a very insignificant share and no real power, in the payment service market.

(1) VISA's share of the payment service market is certainly less than 5%, and likely less than 3%. This share is far too small to allow VISA to have any anticompetitive effect.

(2) In the opinion **[**83]** of NaBanco's expert, Dr. Cox, the new regional ATM debit card networks will force VISA out of business if VISA does not reduce IRF soon. The existence and strength of this competition means that VISA does not have market power.

(3) Still further confirmation of the fact that VISA and it members lack significant market power is the absence of any abnormally high profits earned from VISA card operations.

(4) NaBanco's own arguments concede VISA's lack of market power. In its trial brief, it recognized that VISA and its members lack sufficient economic power over merchants to impose supracompetitive prices.

(5) Even if VISA currently had a large share of, and apparent power in, the relevant market, it still would not have market power because of the ease of entry into the market. There are no significant barriers to entry, particularly as a result of new technologies. The new ATM networks are an example of the easy entry into the marketplace. This ease of entry makes even more remote any possibility that VISA could impose an effective restraint.

(6) The fact that VISA and MasterCard set different IRF's during the early 1970's does not prove that either has market power. Rather, it **[**84]** confirms the existence of competition in the payment services market. On a transaction of the average size during that period, the difference was approximately only 10%.

The Interchange Fee is Pro-Competitive in Nature

IRF promotes the efficiency and competitiveness of VISA in two other related ways. The first, is of vital import to the day-to-day functioning of the system. As established, IRF eliminates the costly uncertainty **[*1260]** and prohibitive time and expense of "price negotiations at the time of the exchange" between the thousands of VISA members. *See* *Central Iowa Power Cooperative v. Federal Energy Regulatory Commission, 196 U.S. App. D.C. 249, 606 F.2d 1156, 1163 (D.C. Cir. 1979)* (establishment of price is necessary to the functioning of the cooperative and "to ensure that costs and benefits of the power pool will be shared fairly and predictably.") In doing so, it guarantees the universal acceptability that is at the heart of the competitive success of the product.

The second way in which the fee promotes efficiency and competitiveness is in a more long-term, economic sense. Briefly, the theory is that the parties to a national bankcard system must distribute **[**85]** the costs of the system in relation to prospective benefits so as to encourage members to engage in the appropriate balance of card-issuing and merchant-servicing. Far from being presumptively anticompetitive, the economics of bankcard pricing suggest that a "transfer payment" such as the IRF is precisely what one would expect to find in a bankcard joint venture seeking to price competitively in the payments systems market.

In the VISA "joint venture," both issuer and merchant banks perform essential roles, and both perform necessary tasks for the benefit of each other, which must be performed if the basic payment service is to be offered. As stated earlier, the more cardholders in the system, the more attractive the system is to merchants. At the same time, the more merchants in the system, the more attractive the card is to cardholders. In short, there is a fundamental economic interdependence between card issuing and merchant signing in the system. Edwards. TR. 9-11 (6/3/83); Baxter (6/2/83) (dep. 2 at 18-21); Ashby. TR. 1621-23. (9/15/82); Guth TR. 8. (1/18/84).

This fundamental interdependence can be felt within the system in two ways. First, the more cardholders in the system, **[**86]** the more attractive the card is to merchants, and the more merchant discount revenue is generated for merchant banks. As more merchants enter the system, and more cardholders develop, more cardholder revenue is generated for issuers. Second, as to the expense of operation, costs that the issuer banks bear, such as fraud or float costs or the costs of issuing the plastic, benefit the merchant and merchant bank in that they facilitate and encourage use of the cards at merchant locations. Similarly, the processing costs borne by the merchant banks are valuable to issuer banks. Edwards. TR. 9-11 (6/3/83); Cox. TR. 4-10, 75-77. (1/14/83); Bull. TR. 971-74 (5/15/82); Ashby. TR. 1604-10 (9/15/82).

Viewed from the perspective of the members then, for the VISA service to exist at all there must be members willing to issue cards and members willing to sign merchants. This system of interrelationships can be represented diagramatically as in Appendix I.

As asserted at trial, however, at the same time that these interrelationships exist between the cardholder and merchant sides of the VISA business, there also exists a serious cost imbalance between the two sides. VISA has contended, and the **[**87]** evidence suggests, that the card-issuing side of the payments business bears the substantial majority of the costs of the business, up to 88% of total system costs. Edwards. TR. 13-15 (6/3/83); Cox. TR. 55-61 (1/14/83). Notably, the issuing side bears most of the float costs and most of the credit and fraud losses Bull. TR. 907-17 (5/14/82); Edwards. TR. 13-15 (6/3/83). These costs are incurred on the issuing side by reason of VISA rules such as the rule which requires the issuer to pay the merchant bank for a transaction even if the cardholder never pays because such costs can be managed and controlled more efficiently by issuers. Edwards. TR. 13-15 (6/3/83).

There is nothing inherent in the system that suggests, much less guarantees, that the revenue stream that comes into the merchant bank from the merchant will correspond in its magnitude to the activity costs that must be incurred by the merchant **[*1261]** bank. Similarly, there is nothing to suggest, much less guarantee, that the revenue stream that comes into the card issuing banks from the cardholder will be equal in magnitude to the activity costs that the issuer banks incur. IRF serves the function of re-distributing the **[**88]** costs of the VISA service more equitably between the merchant and card issuer sides, that is, it is a "transfer payment" of sorts. In the process, IRF "equillibrates" the supply and the demand for VISA services by bringing the costs of the system in line with the revenues for each participating VISA member bank regardless of the role it plays, either merchant or issuer, in the VISA system. The economics of this analysis is depicted in diagrammatical terms in Appendix II.

Re-distribution is perhaps not the only alternative theoretically available to VISA to achieve this equilibrium, but it is the most, if not the only, realistic alternative. For example, VISA might attempt to meet the cost imbalance problem by suggesting to issuer banks that, where they can legally, they further raise the price of issuing a card, or charge a fee for the cardholder's float period. The evidence produced at trial, however, suggests that cardholder demand for cards drops off dramatically when yearly fees are raised. In addition, many state banking regulations have prohibited and continue to prohibit charging cardholders for the float period.

NaBanco has offered another alternative; private negotiation **[**89]** of individual "IRFs" which, initially at least, presents an interesting alternative. Again, in theory, private contracts between issuer and merchant banks would enable these banks to set a charge for IRF which would reflect the actual, true "price" which an issuer would be willing to pay - a price which would hopefully reflect the true costs of interchange after subtracting the additional costs experienced by issuer banks alone but from which merchant banks benefit. Transaction costs in this type of system would no doubt be high and stultifying since each and every bank would have to somehow contract each and every other bank with which it might have some card business contact. Further, there is no evidence to suggest that any "market" at all exists at the level of (and between) issuer and merchant banks. If there is a "market," it is a monopsonistic one as there is normally only one issuer bank willing to "purchase" any particular merchant bank's receivable. While each and every issuer bank might not behave monopsonistically, the incentive is certainly there for opportunistic behavior by some issuer banks which would take advantage of the situation by trying to exact higher and higher **[**90]** fees from merchant banks. What VISA calls the "free rider" problem, would likely lead to the system's collapse as more and more issuer banks following this course of action led more and more merchant banks to drop out of the system.

VISA's own history provides the proof that is necessary to come to this conclusion. Prior to the IRF regulation, VISA members acted in their own individual self-interest, and contrary to the interests of the system as a whole, in their dealings relating to interchange fees. Banks acted in a similar fashion in charging interchange on checks in the late 19th and early 20th centuries. Baxter (6/2/83) (dep. 2 at 37-43). Even one of NaBanco's own witnesses, Ms. Ashby, could not deny that she might increase her bank's interchange fee if VISA no longer set IRF. Ashby. TR. 1501-03 (9/15/82).

Thus IRF enables VISA to exist as a viable competitor in the payment systems market. Even if it could be proved that a sub-market for receivables exists, IRF increases interbrand competition in line with the policies outlined in *GTE* and *Sylvania.*

IRF is Reasonably Cost-Related

The persuasive evidence at trial suggested that IRF developed as a cost-related mechanism. **[**91]** VISA has spent thousands of dollars and hundreds of hours choosing a methodology which attempts to "average" out those costs associated with interchange and card issuing. Further the methodology **[*1262]** itself has undergone drastic changes from time to time.

Even from a purely theoretical standpoint, VISA has every incentive to set IRF at a level which establishes an equilibrium between the issuer and merchant sides of its operation. First, those members who are members of the VISA Board and therefore responsible for setting IRF invariably represent banks which both issue cards and sign up merchants.

Second, since the fee is only charged within the system, it is always a net "zero" to the VISA venture as a whole because dollar received by or on behalf of VISA member X is paid to on or behalf of member Y. Third, VISA members always have the option of altering the "mix" of their business between merchant and issuing activity. Finally, and perhaps most importantly, if consumer and merchant utilization must somehow be equalized, reducing demand by increasing merchant costs will necessarily reduce issuer demand and consequently reduce revenue opportunities on the issuing side of business.

[92]** Nevertheless, NaBanco has attacked VISA's IRF methodology as inadequate and unscientific and, as a result, "overbroad." Specifically NaBanco has challenged the particular elements which go into the formula by which VISA calculates "average" issuer bank costs. For example, NaBanco has challenged the fact that neither merchant nor issuer banks revenues are included in analyzing the fee level set by VISA, and that merchant bank costs are also not considered. This, NaBanco has argued, necessarily puts the entire financial burden of providing the "convenience use" period, for example, on the merchant banks - unfairly so NaBanco has claimed because 'revolving account' cardholders allegedly subsidize issuer banks for the costs associated with the float or convenience use period.

NaBanco has also attacked the "sampling" methodology used by VISA to determine which banks will be part of the larger, extended study by which VISA determines average costs. NaBanco has contended that VISA should use random sampling techniques to choose its sample banks, not the "purposeful" sampling engaged in by VISA.

The court finds that, contrary to NaBanco's arguments, the specific means used to calculate **[**93]** IRF -- the theory used to set it and the implementation of that theory -- while certainly not perfect, was and is careful, consistent, and within the bounds of sound business judgment. The cost reimbursement methodology in effect since 1973 was designed and recommended to VISA by Arthur Andersen after VISA solicited the advice of that accounting firm. Andersen was given free rein to design any appropriate methodology, both in 1973 and in its review of the VISA methodology in 1980. Friedman. TR. 15-18 (6/8/83); Stock. TR. 93-94 (1/5/83). Arthur Andersen carefully considered alternative methods for computing IRF, even some which have been suggested by NaBanco such as interchange at par. At the behest of VISA Arthur Andersen re-evaluated IRF methodology in 1977. Each time, Arthur Andersen concluded and VISA agreed that a cost-based methodology using systemwide average costs was preferrable to any other. Friedman. TR. 15-18 (6/8/83), TR. 7-8 (6/9/83).

IRF was designed to perform the equilibration function the court described earlier. Edwards TR. 73-76, 79-81 (6/3/83); Weil 31, 50-51 (1/9/84). It embodies the same analysis that a single firm such as American Express would conduct in order **[**94]** to allocate costs between its cardholder and merchant divisions were it to divide its business between the two. Weil. TR. 38-47 (1/9/84). These findings are true of both the 1973 and the 1981 methodology, even though the 1981 methodology contains refinements not present in the 1973 formula.

Similarly, the selection of the banks to be studied by Arthur Andersen is a careful process which yields banks that are, within limits, representative of the VISA system as a whole. VISA first examines the results of cost "questionnaires" made available to each member bank. Next it selects **[*1263]** from these five or six banks which appear to be representative of all member banks based on a number of factors, most particularly whether their per-unit costs are typical of the system as a whole. Schmidt. TR. 176-78 (6/9/83); Wecker. TR. 73 (1/11/84). This selection process is then reviewed and approved by Arthur Andersen before the banks are actually visited by the accounting firm for further study. Schmidt. TR. 176-78 (6/9/83). While it may be that, in the best of all worlds, random sampling would yield the most "accurate" results, and study and evaluation of each and every bank in the VISA system **[**95]** even better ones, the sampling technique employed by VISA is certainly adequate in light of the costs associated with systemwide evaluation. In fact, VISA's sampling technique seems to produce a more accurate result than does random sampling. Wecker. TR. 80-83, 100-108 (1/10/84), 100 (1/11/84); Exhibit 2810. If anything, the banks selected by VISA are representative of banks with slightly lower than average costs resulting in an IRF which is lower in amount than one of each banks true costs. Wecker. TR. 109-110 (1/10/84).

CONCLUSION

Plaintiff, NaBanco, having been conceived in and nourished by the enterprise it presently attacks, now finds one of the stabilizing mechanisms of that enterprise legally offensive. NaBanco seeks injunctive and damage relief, contending that the interchange fee, and particularly the manner of its setting, are both anti-competitive and in violation of the Sherman Act. Indeed, the plaintiff contends that the fabric under which it became successful is so faulty that it merits per se treatment and swift demise.

Because of the findings of fact and related conclusions of law previously set forth -- perhaps with prolixity justified only by the desire to **[**96]** make a complicated and important point evident -- the court rejects plaintiff's position and will enter judgment for defendant; not however, before some additional conclusory remarks.

The focal point of the case, the VISA interchange fee, was the product of turmoil created by the absence of an efficient method of transferring (distributing) costs incident to card issuing and merchant servicing functions in the early days of what became the present VISA system.

Considerable evidence was presented concerning the etiology of the IRF, the nature of VISA, the complicated method of setting the fee, the selection of banks for testing, the operation of NaBanco, the experience of various banks and bankers involved with VISA, MasterCard and NaBanco, as well as on other relevant points in issue. Both parties were well prepared and effective in presenting their positions. However, as the trial progressed and upon consideration of the totality of the evidence, it became increasingly clear not only that the plaintiff had not presented the more convincing and weightier evidence, but rather that the greater weight -- the more convincing evidence -- had been provided by defendant.

The present VISA **[**97]** business arrangement is relatively young. While describing it as a "joint venture" may be overly ambitious in the strict business organization sense, the term seems fairly applied from the anti-trust standpoint. The venture soon became aware that the "universality" of acceptance so vital to the system could not be achieved without a uniformity of regulation which included a non-divisive method of distributing costs. The more convincing evidence was that the mandated interchange fee (for the use of Base II) was necessary to achieve stability and thus universality; that to require exchange at par or remove the fee to permit negotiations for interchange charges among issuer and merchant banks would result in loss of competitiveness and chaos with the eventual destruction of the enterprise.

Indeed, one questions how much expertise is necessary to envision the consequences of literally thousands of issuer and merchant banks negotiating exchange fee contracts or ad hoc agreements for the purchase of specific paper where there is **[*1264]** no contract. The problem is stated: "A"--who has a card issued by a Miami bank visits a San Francisco store, whose bank has no exchange with the Miami **[**98]** bank. The Miami customer would simply be unable to use his card. Understandably, the store owner would accept only those cards authorized by his merchant bank. Universality is gone, and the enterprise is no longer competitive.

The argument that banks would eventually work out a par exchange is not borne out by VISA history. Different and more extreme methods of cost transfer (even if permitted in all states) would apparently impede the functioning of the system, rendering it less efficient, and thus less competitive.

The IRF serves to shave substantial costs and risks between VISA members and interchange transactions are an integration because in such transactions two different members combine their activities in order to offer a service to a cardholder and merchant. I conclude that to do violence to the method of setting the exchange fee would do violence to the functioning of the system.

IRF should be analyzed under the rule of reason because it is an agreement on the terms of interchange necessary for VISA to market its product and be an effective competitor. Prohibiting IRF would therefore undermine "interbrand" competition, "which is the primary concern of the ***antitrust law***." **[**99]** *Continental T.V., Inc., v. GTE Sylvania, Inc., 433 U.S. 36, 52 n. 19, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*. Even if IRF were not necessary to market the product, it should be analyzed under the rule of reason because it is an agreement internal to a type of joint venture which yields efficiencies beneficial to competition, that its members, acting alone, could not offer, and which allows the venture to offer a product which is different from, and greater than, the sum of the individual products of its members.

VISA's establishment of an IRF, whether or not it is literally "price fixing," is not "price fixing" in any meaningful sense of the word or in a sense which makes it a per se violation of the Sherman Act. Price fixing generally refers to an agreement on prices which otherwise would be set by market forces. However, market forces could not set IRF for a number of reasons, most notably the likelihood of opportunistic, free rider behavior of the type identified by the Supreme Court when it eschewed per se analysis in *Continental T.V. Inc., v. GTE Sylvania, Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*.

In addition, IRF is properly analyzed under the rule **[**100]** of reason because it is not mandatory. Acting on behalf of its principals, NaBanco is and always has been free to negotiate different terms of interchange, and VISA issuers have been willing to make alternate arrangements. A practice is not unlawful per se where, as in this case, there is no legal, practical or conspiratorial impediment to making alternate arrangements.

BMI and *Maricopa* do not require the Court to make a subjective judgment as to whether a joint venture's product is "unique." Rather, they call for the Court to compare the product of the venture to the individual offerings of the venture's members and determine whether the venture offers pro-competitive utilities which its members, acting alone, could not offer.

HN29[] The burden of proof in a rule of reason case rests with the plaintiff. The rule of reason requires "a systematic comparison" of the negative effects of the restraint on competition, if any, with any alleged positive effects on interbrand competition stemming from the restraints. In order to prevail, NaBanco has the burden of establishing that the anti-competitive effects of the setting of the IRF decidedly outweigh the pro-competitive benefits of the **[**101]** practice. It must show that the effects of the restraint were "substantially adverse," and that the adversity falls on market competition and not merely on its own business.

To establish anti-competitive effects, NaBanco must prove that VISA has **[*1265]** power in a relevant market. In order to establish such power NaBanco must begin by offering proof of "a well defined relevant market upon which the challenged anti-competitive actions would have a substantial impact." *(Graphic Products, supra at 1569*). NaBanco must then establish market power. (The ability to raise price significantly above the competitive level without losing all of one's business; *Graphic Products, at 1570*; the ability to raise prices above those which would be charged in a competitive market. Jefferson Parish Hosp. Dist. v. Hyde, 466 U.S. 2 n.46; 80 L. Ed. 2d 2, 104 S. Ct. 1551). Plaintiff has failed to establish its view of a relevant market and the court has found payment services to be the relevant market. In this market, VISA has little power. Even if this market definition were incorrect and VISA had short run power over price, it still would have no long-run monopoly power because there are **[**102]** few barriers to entry. Indeed, one of plaintiffs' experts predicted the demise of VISA due to competitive innovations, if VISA persists in maintaining the IRF.

Further, even if NaBanco had established that VISA had power in a relevant market and that IRF had substantial anti-competitive effects, VISA established that IRF is necessary to offer the VISA card -- a pro-competitive benefit which offsets any anti-competitive effects. In a rule of reason inquiry, the Court must evaluate the alternatives to the challenged practice as part of its weighing of the practice's pro-competitive effects. Although some cases place the burden on the plaintiff to establish that a realistic, viable and more pro-competitive alternative to the challenged practice exists, this court need not address the burden of proof issue. Assuming that the burden were VISA's, VISA met that burden.

Can it be said, in the factual setting presented here, that the IRF is a "market restraint of trade with no purpose except stifling of competition." White Motor Co. v. U.S., 372 U.S. 253, 9 L. Ed. 2d 738, 83 S. Ct. 696. I find, as a matter of fact and law that it is not, but rather, to borrow from *BMI* and *Realty* **[**103]** *Multi-List,* a method of integrating costs and risks which aids in the marketing of the product and permitting the public to utilize the service with such benefits as it may yield.

Judgment will this day be entered for defendant by separate order.

William Hoeveler

UNITED STATES DISTRICT JUDGE

DATED: SEPTEMBER 20, 1984

FINAL JUDGMENT

THIS CAUSE having come before the Court for non-jury trial before the undersigned Judge and the Court having heard argument of counsel, testimony of witnesses presented, reviewed exhibits presented and being otherwise advised in the premises, it is

ORDERED AND ADJUDGED that judgment be and it is hereby entered in favor of the defendant, VISA, U.S.A., and against the plaintiff, NATIONAL BANCARD CORPORATION. Costs which are properly taxable shall be done so by separate motion and order.

DONE AND ORDERED in Chambers at Miami, Florida, this 20th day of September, 1984.

William Hoeveler

U.S. District Judge

APPENDIX 1

(1) Figure 1 depicts the resulting demand-supply equilibriums when various demands by cardholders (dC), merchants (dM), and the system as a whole (dT) are superimposed on a graph representing the various marginal cost curves **[**104]** existing in the VISA system. The resulting price and quantity at the equilibrium (e) representing the intersection of dT and cT are equal to p* and q*.

The need for a transaction or interchange fee can be demonstrated by comparing the various line segments composing the dotted line q*e. In the process of producing an industry output of q*, merchant banks incur marginal costs in the amount of q*a and issuer banks incur marginal costs in the amount of q*d. The sum of these two sets of costs is q*e. In consideration for transactional services to facilitate q* exchanges, cardholders are willing to make expenditures in the amount of q*b and merchants are willing to make expenditures in the amount of q*c. The sum of these two revenue streams is q*e. What is important to note is that the marginal cost q*d of the activities performed by the issuer banks bears no necessary relation to the amount of revenue q*b forthcoming from the cardholders with whom these banks have contractual relationships. Similarly, the costs q*a associated with the activities performed by merchant banks have no necessary relation to the amount of revenue q*c forthcoming from the merchants with whom they have contractual **[**105]** relationships. The sum of the two revenue streams, however, must equal the sum of the two cost streams for the system to survive. Thus, whenever the revenue coming into a member bank does not match its **[*1266]** costs, there must be some side or transfer payment from either the merchant or the issuer bank to bring the receipts of each bank into balance. In the diagram, this transfer payment is represented by the line segment ac which exactly equals the surplus coming into the merchant bank depicted by line segment ac and the issuer bank's deficit depicted by line segment bd.

It should be noted that the position or shape of these lines are not based upon any particular "empirical" evidence. The lines are simply drawn in accordance with testimony presented by VISA at trial suggesting that BM revenues are greater than BI's revenues in the VISA system and that dC drops off considerably as prices rise. The important point is that so long as revenues to either issuer or merchant bank do not equal the costs to each of these banks, there will be a need for some kind of transfer payment.

APPENDIX 2

(1) Figure 1 illustrates the derivation of aggregate demand (dT) for transactional services **[**106]** of a given type in a single-merchant, single-cardholder economy. The quantity (q) axis is calibrated in units which represent the bundle of services that must be provided by VISA member banks and **[*1267]** their agents to *both* the cardholder (C) and the merchant (M) in order to facilitate the execution of one exchange of goods or services between cardholder and merchant. The price (p) axis represents the payments to member banks necessary to induce the requisite supply of services for any particular transaction.

Independently, neither cardholder or merchant necessarily confronts any particular price as the one he must pay in order to have his demand (dC) or (dM)) fulfilled. Thus, the individual demand curves of cardholder and merchant are drawn separately, each clearly demonstrating a different price (PC) or (PM)) which the cardholder or merchant is willing to pay for some level of services (q*); i.e., for any particular point on the combined demand curve, PC does not equal PM but their combined demand will be manifested by the price (p*) and quantity (q*) in this example.

(2) Figure 2 is similar to Figure 1 except that it is intended to represent total demand (dT) of all participating **[**107]** cardholders and merchants. While the individual demand schedules of particular cardholders must be aggregated vertically to reach a well-defined expression of aggregate demand for transactional services in a miniature economy, total cardholder demand and total merchant demand are firs summed horizontally to get total aggregate demand in a multi-cardholder/multi-merchant economy. This is because cardholders only trade with merchants and vice versa. Cardholders and merchants do not trade with other members of the set they represent.

(3) Figure 3 illustrates that relationships corresponding to that of cardholder and merchant on the demand side exist on the supply side as well. The cardholder has his banking relationship with one institution (IB) and the merchant typically has his with another bank (MB). Different tasks are performed for the cardholder than for the merchant. These different tasks mean different marginal costs ((cIB) or cMB)) for each bank for any particular transaction. Figure 3 depicts possible marginal cost curves for issuer banks and merchant banks, together with their vertical aggregation (cT) which corresponds to the total marginal cost per exchange facilitated by **[**108]** the two banks participating in that exchange. As was the case in Figure 2, Figure 3 represents the marginal cost curves one might expect in a multi-cardholder/multi-merchant economy.

Opinion by: POSNER

Opinion

[*599] POSNER, Circuit Judge.

This is an antitrust case of Doric simplicity -- yet some difficulty. Harold Vogel, an experienced gem appraiser, charges a flat one percent fee, subject to a minimum fee of $10. He was a member of the principal (and to simplify this opinion we shall pretend the only) defendant, the American Society of Appraisers, until it expelled him pursuant to a bylaw of the Society which states "that it is unprofessional and unethical for the appraiser to do work for a fixed percentage of the amount of value . . . which he determines at the conclusion of his work." His expulsion, published in the Society's newsletter on March 1, 1983, caused **[**2]** Vogel to lose referrals from members of the Society and from other appraisers. (Appraisers specialize -- Vogel, for example, in gems -- and therefore an appraiser will sometimes refer a customer to another appraiser.) Vogel brought this suit under *section 1* of the Sherman Act, *15 U.S.C. § 1*, alleging that the bylaw constituted a price-fixing agreement among the members of the Society and that his expulsion from the Society constituted a boycott of him by the members. He moved for a preliminary injunction that would have required his reinstatement pending the decision of the case on the merits. This was denied, and he appeals the denial under *28 U.S.C. § 1292(a)(1)*.

The Society argues that Vogel has not shown irreparable harm and therefore is not entitled to an injunction, regardless of the merits of his suit. *HN1*[] Although irreparable harm is (with minor and irrelevant exceptions) one of the prerequisites to obtaining a preliminary injunction, all it means is that the plaintiff is unlikely to be made whole by an award of damages or other relief **[**3]** at the end of the trial. See *Semmes Motors, Inc. v. Ford Motor Co.,*

* Hon. Myron L. Gordon, of the Eastern District of Wisconsin, sitting by designation.

429 F.2d 1197, 1205 (2d Cir. 1970) (Friendly, J.). This Vogel has shown. The consequences of his public expulsion from the appraisers' society will be hard to monetize for purposes of admeasuring damages but cannot be assumed to be trivial. True, there are methods of estimating a business loss due to an exclusionary act -- for example, **[*600]** by comparing the plaintiff's profits before and after the act occurred -- but the methods often are unreliable because of the difficulty of correcting for other things happening at the same time that may have affected those profits. See Note, *Private Treble Damage Antitrust Suits: Measure of Damages for Destruction of All or Part of a Business*, 80 Harv. L. Rev. 1566, 1577-86 (1967). And true, Vogel will be reinstated if he wins his case on the merits. But the losses he will suffer in the meantime are irreparable harm -- less harm than in some other preliminary-injunction cases, no doubt, but it could still be much greater than the harm to the defendant if the injunction were granted; and in that event the net harm from denial would **[**4]** clearly exceed the net harm from grant. In fact, the Society does not contend that reinstating Vogel temporarily would harm it in the slightest.

So Vogel has some equity in his application for a preliminary injunction -- but maybe not much. He argues that his right to permanent relief probably will appear as soon as he moves for summary judgment. This implies that when the district judge ruled on the application for a preliminary injunction the period of irreparable harm was expected to be brief and the amount of that harm therefore quite limited. There was no long-dragged-out trial in the offing during which the plaintiff's losses would be mounting up. ***HN2***[] Where the imbalance of harms is very great, the plaintiff is entitled to a preliminary injunction upon a showing just of a modest prospect of success on the merits. But if the balance is closer, whether because each party, or neither party, can show substantial harm if the ruling on the application for preliminary injunction goes against him, the plaintiff must show a greater likelihood of success in order to get the injunction. See **[**5]** Omega Satellite Products Co. v. City of Indianapolis, 694 F.2d 119, 123 (7th Cir. 1982); American Hospital Ass'n v. Harris, 625 F.2d 1328, 1331 (7th Cir. 1980); Charlie's Girls, Inc. v. Revlon, Inc., 483 F.2d 953, 954 (2d Cir. 1973) (per curiam). So it becomes important to inquire whether Vogel has a good chance, not just some chance, of winning this suit.

In considering his chances, we need not assess the boycott allegations separately. ***HN3***[] A boycott is illegal per se under the antitrust laws only if used to enforce a rule or policy or practice that is itself illegal per se. See Wilk v. American Medical Ass'n, 719 F.2d 207, 221 (7th Cir. 1983); Bruce Drug, Inc. v. Hollister, Inc., 688 F.2d 853, 859-60 (1st Cir. 1982); United States v. Realty Multi-List, Inc., 629 F.2d 1351, 1367-69 (5th Cir. 1980). In the Supreme Court's first case holding that boycotts were illegal per se, Eastern States Retail Lumber Dealers' Ass'n v. United States, 234 U.S. 600, 58 L. Ed. 1490, 34 S. Ct. 951 (1914), **[**6]** an association of lumber retailers had blacklisted wholesalers who had the temerity to compete with the members of the association by selling directly to consumers (that is, to the retailers' customers). The boycott was a method of enforcing a patently anticompetitive horizontal conspiracy and therefore was itself illegal per se. But ***HN4***[] if a rule of a private association is not illegal per se, neither is the enforcement of the rule, see Phil Tolkan Datsun, Inc. v. Greater Milwaukee Datsun Dealers' Advertising Ass'n, Inc., 672 F.2d 1280, 1285-89 (7th Cir. 1982), as by expelling a noncomplying member -- the normal method by which a private association enforces its rules.

If the bylaw forbidding members of the American Society of Appraisers to charge for appraisal on a fixed-percentage basis is a form of price fixing, it is illegal per se and Vogel, as a victim of illegal price fixing and an illegal boycott, would be entitled to reinstatement. It is not hard to find judicial statements to the effect that any interference with price brought about by an agreement between competitors **[**7]** is illegal price fixing. The best-known example is United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 221, 84 L. Ed. 1129, 60 S. Ct. 811 (1940): ***HN5***[] "Any combination which tampers with price structures is engaged in an unlawful activity. Even though the **[*601]** members of the price-fixing group were in no position to control the market, to the extent that they raised, lowered, or stabilized prices they would be directly interfering with the free play of market forces." And for a notable application of this formulation of the per se rule see Plymouth Dealers' Ass'n v. United States, 279 F.2d 128 (9th Cir. 1960). Although not all of the 4,500 members of the American Society of Appraisers compete with each other, some of the 63 gem appraisers who belong to the Society probably do, though all we really know is that four of the gem appraisers have their places of business in Illinois, as does Vogel. We shall assume for now, but return to the point later, that the bylaw is an agreement among competitors in a sense relevant to this suit; and in a literal sense, **[**8]** at least, the bylaw did "tamper" with a "price structure."

But ***HN6***[] judicial language about the per se illegality of competitors' tampering with price must, like all legal language, be read with sensitivity to its context. In general, the only types of horizontal price agreements that the antitrust laws have been held to forbid are those that have the purpose or likely effect of raising price above the competitive level. See *United States v. United States Gypsum Co., 438 U.S. 422, 441 n. 16, 446 n. 22, 57 L. Ed. 2d 854, 98 S. Ct. 2864 (1978)*. The classic example is the sellers' cartel, or price-fixing conspiracy (a covert cartel), which agrees to raise price above the competitive level or, what has the same competitive effect, to divide the market into exclusive territories, thus preventing the members from competing with each other. Sometimes competitors agree to discontinue particular forms of price competition, such as competition in credit terms; this too is forbidden, as its purpose and likely effect is to force the net price to the buyer above the competitive level. **[**9]** See, e.g., *Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 648-49, 64 L. Ed. 2d 580, 100 S. Ct. 1925 (1980)* (per curiam); *National Electrical Contractors Ass'n, Inc. v. National Constructors Ass'n, 678 F.2d 492, 501 (4th Cir. 1982)*; *United States v. American Radiator & Standard Sanitary Corp., 433 F.2d 174, 185-86 (3d Cir. 1970)*. Sometimes competitors agree to use methods of pricing that do not eliminate price competition but make that competition less profitable and hence less likely -- for example, by agreeing that each seller will adhere to his previously announced prices. Such an agreement does not put a floor under prices but it does prevent a seller from offering secret discounts. A secret discount enables a seller to expand his output, and his profits, by selling at a shade below the cartel price without provoking an immediate reaction from his competitors. The effort of cartel members to "cheat" their fellows in this fashion will, by increasing the output of the product, eventually make the cartel (or conspiracy, or oligopoly) price untenable. See Stigler, The Organization of Industry 42 (1968). So an agreement not **[**10]** to "cheat" in this way is forbidden too. *See* *Sugar Institute, Inc. v. United States, 297 U.S. 553, 582-83, 601-02, 80 L. Ed. 859, 56 S. Ct. 629 (1936)*.

There are two exceptions to the principle that the only horizontal price "tampering" that is illegal per se is the type calculated to raise the market price above the competitive level. First, buyer cartels, the object of which is to force the prices that suppliers charge the members of the cartel below the competitive level, are illegal per se. See, e.g., *Mandeville Island Farms, Inc. v. American Crystal Sugar Co., 334 U.S. 219, 223-24, 92 L. Ed. 1328, 68 S. Ct. 996 (1948)*. Just as a sellers' cartel enables the charging of monopoly prices, a buyers' cartel enables the charing of monopsony prices; and monopoly and monopsony are symmetrical distortions of competition from an economic standpoint. See Stigler, The Theory of Price 205-06 (3d ed. 1966). Second, in *Arizona v. Maricopa County Medical Society, 457 U.S. 332, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*, the Supreme Court, by a 4 to 3 vote, held recently that an agreement among doctors to limit the fees they charged for **[**11]** services performed for insured patients was illegal per se, in part because **[*602]** the agreement might be "a masquerade for an agreement to fix uniform prices, or it may in the future take on that character." *Id. at 348*.

Were it not for *Maricopa*, it would be clear that the Society's prohibition of fixed-percentage appraisals was not illegal per se, as the prohibition seems unrelated or at most very tenuously related to any purpose or probable consequence of raising the price of appraisals. Members of the Society are free despite the prohibition to charge as much or as little as they like. Of course on pricing option is taken away from them, and if it were an option that promoted price competition, its prohibition would be highly suspect. But there is no indication it is. While it is true that, if rigidly adhered to, fixed-percentage fees will yield tiny charges for appraising items of slight value, Vogel's method does not work that way. He charges a minimum fee of $10, which means that he charges one percent only for appraisals of $1,000 or more and charges progressively higher percentages as the value of the item appraised falls off from there (for **[**12]** example, 10 percent for an item worth $100).

The apparent tendency of the pricing system that the Society has outlawed is to raise, not lower, the absolute level of appraisal fees, especially for expensive items. For the system gives the appraiser a stake in the value appraised and therefore makes him likely to err on the high side in estimating that value. It conduces not only to high prices but to high prices unrelated to the costs of the appraiser's work, even when there is no fraud in the appraisal. Although there doubtless is some positive correlation between the value of an item and the amount of time the appraiser puts in on appraising it, a 10-carat diamond worth 100 times as much as a one-carat diamond is not, on that account alone, likely to require or receive 100 times the amount of attention from the appraiser. Fixed-percentage appraisal fees seem more closely geared to differences in the wealth of customers than to differences in appraisers' time costs or skills -- seem in fact to be a method of price discrimination, which is normally anticompetitive. (Not always, though, as we saw in discussing secret discounts from a cartel price, which are discriminatory since they **[**13]** are selective rather than across the board, normally being offered to the biggest customers only. See Stigler, The Organization of Industry, *supra*, at 43-44, 60.)

Of course, if there is vigorous competition among appraisers, it will limit both the percentage charged and the amount of the appraisal, and may even prevent Vogel from adhering to his fixed-percentage method. But his suit is based on the assumption that competition has not had this effect, so maybe there isn't much competition in gem appraising -- we just don't know. Competition to one side, sometimes a customer will want and be quite content to pay for a high appraisal -- if for example he is trying to sell the item being appraised. But the challenged bylaw does not limit the fee or the appraisal; it merely outlaws a method of fee setting that seems to invite the appraiser to practice a fraud on his customer, by first announcing that his fee is a fixed percentage and then over appraising the item; or, at the very least, that invites discrimination against wealthier, or less sophisticated, customers. Another strike against the fixed-percentage fee system is that (according to a letter attached to one of Vogel's **[**14]** briefs in the district court) the one percent fee that Vogel charges is (or was) the industry norm; so by abolishing the system the Society may, for whatever reason, have been breaking up a collusive arrangement.

Ethical concerns have often, and unavailingly, been offered as reasons for limiting price competition. See, e.g., *National Society of Professional Engineers v. United States, 435 U.S. 679, 693-96, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978)*; but cf. *United States v. United States Gypsum Co., supra, 438 U.S. at 448*, citing *Cement Mfrs. Protective Ass'n v. United States, 268 U.S. 588, 603-04, 69 L. Ed. 1104, 45 S. Ct. 586 (1925)*. But there is no suggestion that the **[*603]** Society's aversion to fixed-percentage appraisal fees actually covers an aversion to price competition; nor, as we have said, is it apparent how such fees promote price competition. Moreover, there is no evidence that the Society has any power in the market for appraising gems, or any other market, and an absence of market power is a reason against inferring that a business practice is monopolistic.

The challenged bylaw is more likely a praiseworthy **[**15]** effort at self-regulation than a device for facilitating supracompetitive pricing. This is not to say that the Society's members are altruists. Presumably they are profit-maximizers. They may merely think that a practice likely to bring the appraisal business into disrepute will depress profits in the long run. They may even be concerned with potential antitrust liability from adhering to a one percent fee system -- a type of "ethical" concern to which ***antitrust law*** ought to give some weight.

The strongest objection to banning fixed-percentage fees is that by putting pricing on the Society's agenda the ban could foster price fixing. The letter mentioned earlier indicates that when the Society outlawed the fixed-percentage fee its members had "difficulty in abiding by" the new rule, prompting the Society's vice-president (whose last name, Gadd, has powerful associations for students of anti-trust law, see *American Column & Lumber Co. v. United States, 257 U.S. 377, 401-02, 66 L. Ed. 284, 42 S. Ct. 114 (1921))* to suggest an illustrative fee schedule complete with specific fees (one, for example, being $750 to appraise items worth between $40,000 and $100,000) arrayed **[**16]** much as in a percentage-fee schedule. If in the trial on the merits Vogel can show that abolishing fixed-percentage fees encouraged the members of the Society to adopt a collusive fee schedule as a substitute, he will be well on his way to proving a violation of the statute. But the danger that abolishing an anticompetitive fee system will lead to adoption of an equally or more anticompetitive one in its place is (on this record at least) too speculative to bring the per se rule into play.

The Supreme Court has told us that ***HN7***[] before we leap to the conclusion that an agreement among competitors is price fixing we should take a quick look to see whether it has clear anticompetitive consequences and lacks any redeeming competitive virtues. See *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 19-20, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*; see also *National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. 85, 104 S. Ct. 2948, 2960, 82 L. Ed. 2d 70 (1984)*. Having done so we conclude that there is insufficient basis in the present **[**17]** record for characterizing the Society's prohibition of fixed-percentage appraisal fees as price fixing. Two additional considerations conform us in this conclusion. First, contrary to our earlier assumption, Vogel has not quite shown that the agreement of which he is complaining is an agreement among competitors, as most of the members of the American Society of Appraisers are not gem appraisers, and of the few who are only four have their places of business in Illinois. We do not know how many of these are in Chicago, where Vogel has his place of business, and we do not know the radius within which Vogel competes for customers. Maybe the bylaw affects competition among other appraisers belonging to the Society, and maybe Vogel would have standing to complain about it even if competition in the market in which he operates were not affected by it. But his failure to make a clear-cut showing that the bylaw is an agreement among competitors weakens his case. Second, **HN8**[] the novelty of the challenged practice (novel to the courts, that is) is a reason against per se classification. See *White Motor Co. v. United States, 372 U.S. 253, 263, 9 L. Ed. 2d 738, 83 S. Ct. 696 (1963)*; **[**18]** but see *Arizona v. Maricopa County Medical Society, supra, 457 U.S. at 349-51*. The attempt to get rid of the fixed-percentage appraisal fee may be perniciously anticompetitive in ways that we cannot perceive from the scanty record before us, but to **[*604]** condemn it before any evidence on its competitive effects has been produced would prevent the courts from acquiring any information about it. It is difficult enough for judges to inform themselves about business practices without shutting off the information flow before it begins, by prematurely adopting a rule of blanket illegality.

All this leaves out of account, however, the possibility that the *Maricopa* decision signals an expansion of the traditional per se rule against price fixing beyond agreements likely to reduce competition. Commentators have wondered how an agreement by sellers to limit the amount they will charge their customers -- the agreement in *Maricopa* -- can reduce competition. See Easterbrook, *Maximum Price Fixing*, 48 U. Chi. L. Rev. 886 (1981); Harrison, *Price Fixing, the Professions, and Ancillary Restraints: Coping with Maricopa County*, *1982 U. Ill. L. Rev. 925, 936-44*; **[**19]** Liebeler, *1983 Economic Review of Antitrust Developments: The Distinction Between Price and Nonprice Distribution Restrictions*, *31 UCLA L. Rev. 384, 397-98 (1983)*. But the price ceiling in *Maricopa* may have been intended as a target or even a floor -- a concern heightened by the fact that 85 to 95 percent of the county's doctors were charging at or above the ceiling. See *457 U.S. at 341 n. 10*. A group of sellers is unlikely to fix a maximum price that will not return them a comfortable profit; and having done so they may be disinclined to charge a lower price even if it would cover their costs plus a reasonable profit, if not as comfortable a one. Furthermore, sellers who exchange the kind of price and cost information that is necessary to fix a ceiling may find they have done all that is necessary to fix a floor as well; that is, the *process* of agreeing on the ceiling may foster supracompetitive pricing, whether tacit or explicit. Maybe therefore *Maricopa* is to be explained as a case where a cartel-facilitating practice, analogous to banning secret price cutting, was condemned. In any event, it is distinguishable from this case.

Now **[**20]** Vogel may be able to prove at trial that the bylaw is an unreasonable restraint of trade and is therefore unlawful under *section 1* even though not illegal per se. But this will require him to establish a relevant market (by adding up the sales of all the gem appraisers to whom customers in the various areas served by the Society's gem-appraiser members could turn if those members charged supracompetitive prices for appraising, see *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 331, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961))*; to show that the Society's members as a group have a substantial share of that market; and to prove that the anti-competitive effects of the bylaw in that market exceed any procompetitive effects that the Society may be able to point to. See *National Collegiate Athletic Ass'n v. Board of Regents, supra, 104 S. Ct. at 2961-62*; *Lektro-Vend Corp. v. Vendo Co., 660 F.2d 255, 268-69 (7th Cir. 1981)*; *Graphic Products Distributors, Inc. v. Itek Corp., 717 F.2d 1560, 1569, 1571, 1573 (11th Cir. 1983)*. Vogel may be able at trial to show all this -- or to show that the bylaw really is so dangerous **[**21]** that it should be deemed illegal per se. We do not mean to prejudge the trial. But as he has shown none of these things as yet, we have no basis for thinking him likely to succeed in doing so at trial.

AFFIRMED.

JACK R. BATTIPAGLIA and BACCHUS SELECTIONS INC., Plaintiff-Appellants, v. NEW YORK STATE LIQUOR AUTHORITY, Defendant-Appellee, PEERLESS IMPORTERS INC., Defendant-Intervenor

Prior History: **[**1]** Appeal from an order of the District Court for the Southern District of New York, Richard Owen, Judge, granting motions for summary judgment by the defendant New York State Liquor Authority and a wholesaler who had intervened as a defendant in an action by a wholesaler and a retailer which sought a declaration that certain provisions of *§ 101-b of New York's Alcoholic Beverage Control Law* are in violation of *§ 1* of the Sherman Act and therefore unconstitutional and an injunction against their enforcement.

Disposition: Affirmed.

WINTER, Circuit Judge, filed a dissenting opinion.

Core Terms

prices, wholesalers, wine, liquor, Sherman Act, anti trust law, retailers, resale price, posting, regulation, brand, fair trade contract, anticompetitive, adherence, discounts, invalid, price information, importation, price schedule, consumers, licensed, facial, alcoholic beverage, per se violation, provisions, authorize, distilled, immunity, prevail, cases

Constitutional Law > Supremacy Clause > General Overview

Governments > Police Powers

HN8[] Public Enforcement, State Civil Actions

As in the typical preemption case, the inquiry is whether there exists an irreconcilable conflict between the federal and state regulatory schemes. The existence of a hypothetical or potential conflict is insufficient to warrant the pre-emption of the state statute. A state regulatory scheme is not preempted by the federal antitrust laws simply because in a hypothetical situation a private party's compliance with the statute might cause him to violate the antitrust laws. A state statute is not preempted by the federal antitrust laws simply because the state scheme might have an anticompetitive effect.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Constitutional Law > Supremacy Clause > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN9[] Per Se Rule & Rule of Reason, Per Se Violations

A state statute, when considered in the abstract, may be condemned under the antitrust laws only if it mandates or authorizes conduct that necessarily constitutes a violation of the antitrust laws in all cases, or if it places irresistible pressure on a private party to violate the antitrust laws in order to comply with the statute. Such condemnation will follow under the Sherman Act, 15 U.S.C.S. § 1, when the conduct contemplated by the statute is in all cases a per se violation. If the activity addressed by the statute does not fall into that category, and therefore must be analyzed under the rule of reason, the statute cannot be condemned in the abstract.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Constitutional Law > Supremacy Clause > General Overview

HN10[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Analysis under the rule of reason requires an examination of the circumstances underlying a particular economic practice, and therefore does not lend itself to a conclusion that a statute is facially inconsistent with federal antitrust laws.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Nonprice Restraints

HN11[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

A manufacturer's use of vertical non-price restraints was not per se illegal but rather should be scrutinized under the rule of reason since restraints on intrabrand competition may promote interbrand competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN12[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

A program to exchange price information is illegal only if, in addition to the agreement to exchange information, the defendants agree to fix prices.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN13[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Whether or not there is an agreement to fix prices depends on the nature of the information and on the presence of conscious parallelism, i.e., identical or nearly identical pricing accompanied by plus factors.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN14[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The dissemination of price information is not itself a per se violation of the Sherman Act, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN15[] **Public Enforcement, State Civil Actions**

N.Y. Alco. Bev. Cont. Law § 101-b does not mandate or authorize conduct that necessarily constitutes a violation of the anti-trust laws in all cases.

Counsel: Martin P. Mehler, New York, New York, (Mehler & Buscemi, New York, New York), for Plaintiffs-Appellants.

August L. Fietkau, Assistant Attorney General of the State of New York, New York, New York, (Robert Abrams, Attorney General of the State of New York, Melvyn R. Leventhal, Deputy First Assistant Attorney General, Richard G. Liskov, Assistant Attorney General, New York, New York), for Defendant-Appellee.

Lawrence Kill, New York, New York, (Anderson, Russell, Kill & Olick, Steven M. Pesner, and Daniel N. Sang, New York, New York), for Defendant-Intervenor.

Judges: Friendly, Van Graafeiland **[**2]** and Winter, Circuit Judges. Winter, Circuit Judge, dissenting.

Opinion by: FRIENDLY

Opinion

[*167] FRIENDLY, Circuit Judge:

Plaintiff Jack R. Battipaglia is the owner of a licensed liquor store in Long Island City, New York. Plaintiff Bacchus Selections, Inc. is a licensed wholesaler of wines. In this action in the District Court for the Southern District of New York against the New York State Liquor Authority (SLA), they sought a declaration that certain provisions of *§ 101-b of New York's Alcoholic Beverage Control Law* requiring wholesalers to post and maintain schedules of prices and discounts violate *§ 1* of the Sherman Act and are therefore invalid under the *Supremacy Clause*. The complaint alleged that the effect of those provisions was "to restrain commerce in the product market of wine in the State of New York by prohibiting wholesalers and retailers from competitive pricing which could benefit the consuming public . . ., that the provisions of the Alcoholic Beverage Control Law . . . and the conduct of Defendant Authority constitute a combination and conspiracy in restraint of trade and commerce in wine among the states", and that "by reason of the above-mentioned illegal **[**3]** acts and practices, Defendant Authority has proximately caused injury to plaintiffs in the form of higher prices to them and to members of the general consuming public who purchase wine in the State of New York."

[*168] After answer and limited discovery, plaintiffs moved for summary judgment. Judge Owen denied the plaintiffs' motion in an opinion which held that the New York statute did not contravene *§ 1* of the Sherman Act but that, if it did, conduct thereunder was insulated from attack under the antitrust laws by the "state action" doctrine of *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*. [1] *583 F. Supp. 8*. After the motion was decided, Peerless Importers Inc. (Peerless), another wholesaler of wines, was granted leave to intervene as a defendant in opposition to plaintiff's motion. Thereafter the Authority and Peerless moved for summary judgment in their favor. The judge granted the motions on the basis of his opinion denying plaintiffs' motion, and this appeal followed.

[4]** DISCUSSION

Section 101-b is entitled "Unlawful discriminations prohibited; filing of schedules; schedule listing fund". We quote *§ 1* in the margin. [2] Section 2 makes it unlawful for any person who sells liquor or wine to discriminate in price,

---

[1] Judge Owen added that, "Given the foregoing, I need not consider the applicability of the *21st Amendment* to these facts."

[2]

> It is the declared policy of the state that it is necessary to regulate and control the manufacture, sale, and distribution within the state of alcoholic beverages for the purpose of fostering and promoting temperance in their consumption and respect for and obedience to the law. In order to eliminate the undue stimulation of sales of alcoholic beverages and the practice of manufacturers and wholesalers in granting discounts, rebates, allowances, free goods, and other inducements to selected licensees, which contribute to a disorderly distribution of alcoholic beverages, and which are detrimental to the proper

discounts for time of payment, or on quantity of merchandise sold between one wholesaler and another wholesaler or between one retailer and another retailer purchasing liquor or wine having the same brand or trade name and of like age and quality, or to grant any discount, rebate, free goods, allowance or other inducement of any kind except certain maximum discounts therein specified. Section 3(b), which is the object of plaintiffs' attack, provides that

> ***HN1***[] no brand of liquor or wine shall be sold to or purchased by a retailer unless a schedule . . . is filed with the liquor authority, and is then in effect[,]

unless "prior written permission of the authority is granted for good cause shown and for reasons not inconsistent with the purpose of this chapter." *N.Y. Alco Bev. Cont. Law § 101-b(3)(b)*. **[**5]** ***HN2***[] Section 4 provides that the schedule required by paragraph 3(b) must be filed before the fifth day of each month and that the prices and discounts would become effective on the first day of the following calendar month and should remain effective for such month. Within ten days after the filing the Authority must make the schedules or a composite available for inspection by licensees. Within three days after the date provided for such inspection, a wholesaler may amend his filed schedule for sales to retailers in order to meet lower competing prices and discounts "provided such amended prices are not lower and discounts are not greater than those to be met." *N.Y. Alco. Bev. Cont. Law § 101-b(4)*.

[6]** I

For some of us who were "present at the creation" of the *Twenty-First Amendment*, there is an aura of unreality in plaintiffs' assumption that we must examine the validity of New York's Alcoholic Beverage Control Law (ABC Law) just as we would examine the constitutionality of a state statute governing the sale of gasoline. The *Twenty-First Amendment* was designed to end the "noble experiment" by which the Federal government endeavored to control the drinking habits **[*169]** of all citizens and to place control of alcoholic beverages in the states. Fulfillment of the latter purpose required that, in addition to repealing the *Eighteenth Amendment*, which was accomplished by *§ 1*, the Amendment should give the states full authority to deal with the subject of intoxicating liquor free from limitations imposed by the *Commerce Clause*, which had hampered such regulation before the *Eighteenth Amendment* was adopted. This was accomplished by § 2 of the Twenty-First Amendment which provides:

HN3[] The transportation or importation into any State, Territory, or possession of the United States for **[**7]** delivery or use therein of intoxicating liquors, in violation of the laws thereof, is hereby prohibited.

In its first encounter with the Amendment, only three years after ratification, the Supreme Court, without dissent, ruled that a state could impose a license fee on the importation of beer that would have been forbidden by the *Commerce Clause* itself. *State Board of Equalization v. Young's Market Co., 299 U.S. 59, 64, 81 L. Ed. 38, 57 S. Ct. 77 (1936)*. The Court also posed, as a rhetorical question, "Can it be doubted that a state might establish a state monopoly of the manufacture and sale of beer . . .," *id. at 63*, something as antithetical to the Sherman Act as could be imagined. [3] **[**10]** Discussion continued in this vein until *Hostetter v. Idlewild Bon Voyage Liquor Corp., 377 U.S. 324, 12 L. Ed. 2d 350, 84 S. Ct. 1293 (1964)*. Although Justice Stewart there made the frequently cited declaration quoted in the margin, [4] *id. at 332*, and also said that a contention that the *Twenty-First Amendment* had somehow operated to "repeal" the *Commerce Clause* "would be patently bizarre and is demonstrably incorrect", *id. at 331-32*, **[**8]** the actual decision was the unsurprising one -- although it did surprise two Justices -- that the

---

> regulation of the liquor industry and contrary to the interests of temperance, it is hereby further declared as the policy of the state that the sale of alcoholic beverages should be subjected to certain restrictions, prohibitions and regulations. The necessity for the enactment of the provisions of this section is, therefore, declared as a matter of legislative determination.

See also the preamble quoted in Part IV *infra*.

[3] While such action by a state would now be immune from antitrust attack under *Parker v. Brown*, there is nothing to indicate that the *Young's Market* Court was peering that far into the future or thought that any such justification was required.

[4] Both the *Twenty-first Amendment* and the *Commerce Clause* are parts of the same Constitution. Like other provisions of the Constitution, each must be considered in the light of the other, and in the context of the issues and interests at stake in any concrete case.

Amendment did not empower New York to prohibit the sale at John F. Kennedy International Airport of tax-free liquor for "ultimate delivery and use . . . in a foreign country", *id. at 333*. Justice Stewart's remarks in *Idlewild* must also be read along with his observation, only two terms later, that in a case concerning liquor destined for use, distribution or consumption exclusively in New York -- indeed another section of the very statute here at issue -- "the ***HN4***[] *Twenty-First Amendment* demands wide latitude for regulation by the state." *Joseph E. Seagram & Sons v. Hostetter, 384 U.S. 35, 42, 16 L. Ed. 2d 336, 86 S. Ct. 1254 (1966)*. However, in *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, 445 U.S. 97, 106-10, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*, the Court gave further attention to the relation of state powers under the *Twenty-First Amendment* and the commerce power and, after noting that the Amendment gave the states "virtually **[**9]** complete control over whether to permit importation or sale of liquor and how to structure the liquor distribution system", *id. at 110*, concluded that:

> ***HN5***[] Although States retain substantial discretion to establish other liquor regulations, those controls may be subject to the federal commerce power in appropriate situations. The competing state and federal interests can be reconciled only after careful scrutiny of those concerns in a "concrete case". *Hostetter v. Idlewild Liquor Corp., 377 U.S., at 332*.

Id. Since this appeal was argued, the Court has again stated that "it is by now clear that ***HN6***[] the Amendment did not entirely remove state regulation of alcoholic beverages from the ambit of the *Commerce Clause*," *Bacchus Imports, Ltd. v. Dias, **[*170]** 468 U.S. 263, ____, 52 U.S.L.W. 4979, 4982-83, 82 L. Ed. 2d 200, 104 S. Ct. 3049 (1984)*. [5]

Still this is not at all to say, as plaintiffs assume, that attacks on state regulation of the liquor business as conflicting with the antitrust laws are to be decided as if § 2 of the Twenty-First Amendment did not exist. In *Bacchus Imports*, the Court referred to the language in *Midcal* that a "pragmatic effort [must be made] to harmonize state and federal powers," *445 U.S. at 109*, and also to the statement in *Capital Cities Cable, Inc. v. Crisp, 467 U.S. 691, ___, 52 U.S.L.W. 4803, 4809, 81 L. Ed. 2d 580, 104 S. Ct. 2694 (1984)*, **[**11]** that "whether the interests implicated by a state regulation are so closely related to the powers reserved by the *Twenty-first Amendment* that the regulation may prevail, notwithstanding that its requirements directly conflict with express federal policies." We hold that the challenged sections of New York's Alcoholic Beverage Control Law are not in direct conflict with *§ 1* of the Sherman Act but that if they were, the interests of New York are entitled to prevail. We leave undecided the question whether Judge Owen was correct in relying, as an alternative ground for decision, on the proposition that New York's activity is protected by the state action doctrine.

II

Since *§ 1* of the Sherman Act is directed only to ***HN7***[] "contract[s], combination[s] in the form of trust or otherwise, or conspirac[ies] in restraint of trade or commerce", *15 U.S.C. § 1*, plaintiffs have been faced from the outset with the difficulty that the challenged provisions of the Alcoholic Beverage Control Law do not compel any agreement. The schedules required to be filed by the wholesalers are **[**12]** their individual acts. Indeed the complaint does not allege any agreement among the wholesalers; it complains only of the acts of the Authority. In a case that had been wending its way through the New York courts while this one has been pending in the district court and this court, the New York Court of Appeals considered a few sentences sufficient to dispose upon this ground of a challenge to subdivision 3 of *section 101-b* apparently identical to that made here. *Admiral Wine & Liquor Co. v. State Liquor Authority, 61 N.Y.2d 858, 473 N.Y.S.2d 969, 462 N.E.2d 146 (1984)*, *modifying 89 A.D.2d 522, 452 N.Y.S.2d 213 (1st Dept. 1982)*.

---

[5] Three Justices believed that the decision, with the facts of which we need not here concern ourselves, was inconsistent with § 2 of the Twenty-First Amendment. *Bacchus Imports, 52 U.S.L.W. at 4983* (Stevens, J., dissenting).

Plaintiffs continue to insist, however, as they did unsuccessfully in the district court and in the New York courts, that the case is ruled in their favor by Midcal, supra. Analysis of *Midcal* demonstrates that the contention is fallacious.

The California statutory scheme challenged in *Midcal* required that every "wine grower, wholesaler licensed to sell wine, wine rectifier, and rectifier . . . [who] own[ed] or control[led] a brand of wine resold to retailers or consumers . . . make and file a fair **[**13]** trade contract *and* a schedule of resale prices. . . ." *See* Calif. Bus. & Prof. Code § 24866(b) (emphasis supplied). Another section of the code imposed similar obligations on all wine brand owners who were based outside the state. *See* Calif. Bus. & Prof. Code § 24867. Price posting was required only in those rare instances where there was no fair trade contract, *see* Calif. Bus. & Prof. Code § 24866(a), and, as will be seen, such posting was altogether different in its nature and effect from that required by New York. Finally, it was made unlawful for any licensee to purchase, sell or resell any wine at a price other than the one established by either the governing fair trade contract or by a posted price schedule. *See* Calif. Bus. & Prof. Code § 24862. In short, California had created a resale price maintenance system for wine. [6]

[14]** **[*171]** In Midcal Aluminum, Inc. v. Rice, 90 Cal. App. 3d 979, 153 Cal. Rptr. 757 (1979), the petitioner, a licensed wholesaler, which had been accused of selling wine at prices below those contained in a price schedule and of selling wine which was not covered by a "fair trade" contract, sought a determination that the California statute was unconstitutional. The California Court of Appeal for the Third Appellate District held that the statute violated the Sherman Act. The court also found that the California law was not protected by either "state action" immunity or § 2 of the Twenty-First Amendment. The court considered that these holdings were required by the decision of the Supreme Court of California in Rice v. Alcoholic Beverage Control Appeals Board, 21 Cal. 3d 431, 146 Cal. Rptr. 585, 579 P.2d 476 (1978), where that court struck down similar restrictions on the sale of distilled liquors, there being nothing to show that the provisions with respect to wine had been enacted out of special solicitude for the California wine industry. When the respondent Director of Alcoholic Beverage Control argued that if the fair trade contract provision **[**15]** of the statute were to be held invalid, the wholesale price posting provision "should be severed from the invalid portions of the statutes," Midcal, 153 Cal. Rptr. at 761, the Court of Appeal declined to do this. It pointed out that the price posting provision was an incident of a legislative scheme to fix prices; that price posting was required only when there was no fair trade contract in effect; that price posting was intended to have the same effect as a fair trade contract, namely, to fix the price at which sales might be made by retailers; and that the Department had ruled that only one distributor could file a price schedule for any trading area and that this would bind all other distributors -- indeed one of the charges against Midcal was that it sold wine for less than the prices contained in a schedule filed by a competing wholesaler. Hence the California court concluded that the price posting provision was an integral part of the price fixing scheme and was not severable.

The California Retail Liquor Dealers Association intervened as a defendant when the Alcoholic Beverage Control Department refused to appeal. The California Supreme Court declined to **[**16]** hear the case, doubtless because it regarded the decision of the Court of Appeal as following inevitably from its own previous decision in *Rice*, and the Dealers Association sought and obtained certiorari from the Supreme Court of the United States.

The Supreme Court was obliged to take the case as it found it. The California Court of Appeal had construed both parts of the statute, the fair trade contract provision and the alternative price posting provision, which was ruled to be nonseverable therefrom, to be part of a plan whereby all persons at various levels in the chain of distribution were forced to establish identical prices fixed by the brand owner for each brand of wine. Justice Powell was thus able to decide quite summarily that the scheme compelled by the California statute violated § 1 of the Sherman Act. He said that "the wine producer holds the power to prevent price competition by dictating the prices charged by wholesalers", and quoted Justice Hughes' remark in Dr. Miles Medical Co. v. John D. Park & Sons Co., 220 U.S. 373, 408, 55 L. Ed. 502, 31 S. Ct. 376 (1911), that such vertical control destroys horizontal competition as

---

[6] When originally enacted, California's "fair trade" system was protected from Sherman Act preemption by the Miller-Tydings Resale Price Maintenance Act of 1937, 50 Stat. 693, which exempted from federal anti-trust laws state statutes sanctioning resale price maintenance. The Miller-Tydings Act was repealed by the Consumer Goods Pricing Act of 1975. *See* 89 Stat. 801 (1975).

effectively as **[**17]** if wholesalers "formed a combination and endeavored to establish the same restrictions . . . by agreement with each other", and then passed on to the more difficult issues in the case, namely, whether the state's involvement was sufficient to establish antitrust immunity under *Parker v. Brown, supra, 317 U.S. 341*, and whether the California statute was within the protection of the *Twenty-First Amendment*, which we shall discuss below.

[*172] The challenged sections of the ABC Law plainly are not a resale price maintenance scheme of the sort condemned in *Midcal*. In contrast to *Midcal*, each wholesaler is completely free to file whatever price schedules he desires, and his schedule now has no controlling effect on retail prices since § 101-bbb, which prohibited retail sales at a price less than that established in a retail price schedule, has been declared to be unconstitutional by the New York Court of Appeals. *See Mezzetti Associates, Inc. v. State Liquor Authority, 51 N.Y.2d 761, 432 N.Y.S.2d 372, 411 N.E.2d 791 (1980)*. *Midcal* simply did not deal with a statute like New York's which merely requires wholesalers to post and adhere **[**18]** to their own unilaterally determined prices and nothing more.

However, the inappositeness of *Midcal* is not the end of the matter. It can be argued that *§ 101-b* is nevertheless inconsistent with *§ 1* of the Sherman Act since it forces each wholesaler to inform other wholesaler of its prices and then to adhere for a month to them (or a lowered price meeting that of a competitor filed within three days), unless prior written permission of the SLA is obtained, [7] and that if this had been done pursuant to an agreement, the agreement would have constituted a violation of *§ 1* under such cases as *American Column & Lumber Co. v. United States, 257 U.S. 377, 66 L. Ed. 284, 42 S. Ct. 114 (1921)*; *Sugar Institute v. United States, 297 U.S. 553, 80 L. Ed. 859, 56 S. Ct. 629 (1936)*, and *United States v. Container Corp., 393 U.S. 333, 21 L. Ed. 2d 526, 89 S. Ct. 510 (1969)*. [8]

[19]** An identical argument was rejected by Judge Blumenfeld in *United States Brewers Ass'n, Inc. v. Healy, 532 F. Supp. 1312, 1329-30* (D. Conn.), *rev'd on other grounds*, *692 F.2d 275* (2 Cir. 1982), *aff'd*, *464 U.S. 909, 104 S. Ct. 265, 78 L. Ed. 2d 248 (1983)*, on a challenge to a Connecticut posting statute similar to New York's except for the absence of the three day provision. He correctly distinguished *Midcal* as involving an implicit agreement for resale price maintenance and cited *Serlin Wine & Spirit Merchants, Inc. v. Healy, 512 F. Supp. 936, 938 (D. Conn. 1981)*, *aff'd sub nom. Morgan v. Division of Liquor Control, 664 F.2d 353, 355* (2 Cir. 1981). [9] He then applied our holding in *Modern Home Inst. v. Hartford Accident & Indemnity Co., 513 F.2d 102, 108-09* (2 Cir. 1975), that *§ 1* of the Sherman Act "is directed only at joint action" and "does not prohibit independent business actions and decisions," and ruled that the Connecticut statute did not violate *§ 1* simply because it compelled individual actions which, if taken pursuant to an agreement, might have constituted **[**20]** a violation. *Brewers Ass'n, 532 F. Supp. at 1330*. This holding was adopted in *Enrico's Inc. v. Rice, 551 F. Supp. 511 (N.D. Calif. 1982)*, *vacated as moot*, *730 F.2d 1250* (9 Cir. 1984), in rejecting an attack on a California administrative rule similar to the New York statute, which granted wholesalers the opportunity to match lower posted prices. The judge refused to follow a decision by the California Court of Appeal for the First District, in *Lewis-Westco & Co. v. Alcoholic Beverage Control Appeals Board, 136 Cal. App. 3d 829, 186 Cal. Rptr. 552, 557 (1982)*, *cert. denied*, *464 U.S. 863, 104 S. Ct. 193, 78 L. Ed. 2d 170 (1983)*, which held, on a record showing price posting to have had an anticompetitive effect, [10] that the

---

[7] The record contains no information as to what use has been made of this provision.

[8] A partial answer might be that, except for action taken under the three day provision, no wholesaler, when he establishes his own prices, knows what the other wholesalers' prices will be, although he knows what their previous prices were.

[9] The district court decision in *Serlin* rested both on the lack of any element of agreement and on *Parker v. Brown*. Although this court affirmed "essentially on the grounds stated in Judge Daly's well-reasoned opinion" and noted that "the Connecticut statutes do not authorize or compel private parties to enter contracts or combinations to fix prices in violation of *§ 1* of the Sherman Act," our discussion focused on the availability of *Parker v. Brown* immunity. *Morgan, 664 F.2d at 355, 356*.

[10] The Court summarized the evidence in a footnote:

> 8. For *inter* brand competition, in 1955, per case prices of the leading gins varied $2.71 per case or approximately 7 percent. In 1975, the difference per case between the highest and lowest leading gin was a single cent. During that same period the case price of bourbons, excluding Ten High, narrowed from $13.47 (14%) variance to $.47 (1%). The leading scotch whiskeys went from $.50 per case variance equal to 9/10 percent to $.29 per case variance or 3/10 percent.

posting **[*173]** requirement "suffer[ed] from the same infirmity as the wholesale price posting requirements examined in *Midcal*." Finally, *Miller v. Hedlund, 579 F. Supp. 116 (D. Ore. 1984)*, held that Oregon price posting and adherence provisions substantially similar to New York's, except for the absence of the three day meeting price provision, **[**21]** did not violate *§ 1* of the Sherman Act because they did not "require inter-wholesaler agreement or concerted action," *id. at 121*, but that regulations requiring wholesale prices to be constant without regard to transportation conditions and forbidding quantity discounts would be preempted but were saved by *Parker v. Brown*.

[22]** We must confess to some doubt how the difference of opinion between the federal district courts and the New York Court of Appeals, on the one hand, and the California Court of Appeal, on the other, with respect to the "agreement" issue should be resolved. The position of the former is appealing. *Section 1* requires an agreement, state compulsion of individual action is the very antithesis of an agreement, and the argument that an agreement could have been inferred if the wholesalers had voluntarily done what they have been compelled to do is simply too "iffy". Against this, there is some force in the argument that a statute compelling conduct which, in its absence, would permit the inference of an agreement unlawful under *§ 1* is inconsistent with that section unless saved by *Parker v. Brown*.

We do not need to resolve that difficult question on this appeal in light of *Rice v. Norman Williams Co., 458 U.S. 654, 73 L. Ed. 2d 1042, 102 S. Ct. 3294 (1982)*. That case, also originating in California, involved a statute which provided that a licensed importer, through whom alone alcoholic beverages could be brought into California, "shall not purchase or accept **[**23]** delivery of any brand of distilled spirits unless he is designated as an authorized importer of such brand by the brand owner or his authorized agent." *Calif. Bus. & Prof. Code § 23672* (Supp. 1984). The California Court of Appeal for the Third District held that the statute was *per se* illegal under the Sherman Act and thus was invalid on its face. This time the Supreme Court reversed.

Justice Rehnquist began his opinion for the Court by laying down the governing standards, *458 U.S. at 659*:

> ***HN8***[] As in the typical pre-emption case, the inquiry is whether there exists an irreconcilable conflict between the federal and state regulatory schemes. The existence of a hypothetical or potential conflict is insufficient to warrant the pre-emption **[*174]** of the state statute. A state regulatory scheme is not pre-empted by the federal antitrust laws simply because in a hypothetical situation a private party's compliance with the statute might cause him to violate the antitrust laws. A state statute is not pre-empted by the federal antitrust laws simply because the state **[**24]** scheme might have an anticompetitive effect.

> For intrabrand competition, with one exception, every wholesaler who sold one of the leading brands of gin, scotch whiskey or straight whiskey charged the same per case price as his competitors.
>
> Additionally, during the 15-month period prior to the hearing, there were only two instances where the price of one of the analyzed brands was reduced. In November and December 1979, John Walker Red and Gordon's Gin were reduced in price; during those two months every wholesaler in Northern California who handled that brand made the exact same price reduction. The following January, each increased his price to the same amount charged by their competitors.

Lewis-Westco, 186 Cal. Rptr. at 557 n.8.

The only evidence approaching this in the present record is a portion of Battipaglia's affidavit in support of plaintiffs' motion for summary judgment which states that for five of the largest selling brands of wine, which were distributed by six or more wholesalers, there were several months in which there was wholesale price uniformity and other months in which there were price disparities, ranging in the case of one wine from 10% to 13%. Peerless endeavors to explain the uniformity on the basis that each wholesaler pays the same price to the supplier, that most of the wholesalers are parties to the same collective bargaining agreement, and that the costs of goods, wages and fringe benefits amount to 95% of a wholesaler's total costs. Peerless argues further that there is vigorous inter-brand competition among wines.

He then characterized *Midcal* as involving a statute that required members of the California wine industry "to file fair trade contracts or price schedules with the State, and provided that if a wine producer had not set prices through a fair trade contract, wholesalers *must* post a resale price schedule for that producer's brands." *Id.* (emphasis in original). The *Midcal* Court had held that "the statute facially conflicted with the Sherman Act because it *mandated* resale price maintenance, an activity that has long been regarded as a *per se* violation of the Sherman Act." *Id. at 659-60* (emphasis in original). After referring to *Joseph E. Seagram & Sons, Inc. v. Hostetter, supra, 384 U.S. 35*, he elaborated as follows, *458 U.S. at 661*:

> Our decisions in this area instruct us, therefore, that ***HN9***[] a state statute, when considered in the abstract, may be condemned under the antitrust laws only if it mandates or authorizes conduct that necessarily constitutes a violation **[**25]** of the antitrust laws in all cases, or if it places irresistible pressure on a private party to violate the antitrust laws in order to comply with the statute. Such condemnation will follow under *§ 1* of the Sherman Act when the conduct contemplated by the statute is in all cases a per se violation. If the activity addressed by the statute does not fall into that category, and therefore must be analyzed under the rule of reason, the statute cannot be condemned in the abstract. ***HN10***[] Analysis under the rule of reason requires an examination of the circumstances underlying a particular economic practice, and therefore does not lend itself to a conclusion that a statute is facially inconsistent with federal antitrust laws.

Addressing the statute there challenged, he referred to the holding in *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*, that ***HN11***[] a manufacturer's use of vertical non-price restraints was not *per se* illegal **[**26]** but rather should be scrutinized under the rule of reason since "restraints on intrabrand competition may promote interbrand competition." *Norman Williams, supra, 458 U.S. at 661*. He regarded the California statute as merely enforcing "the distiller's decision to restrain intraband competition", leaving him free to designate as few or as many licensed importers as he pleased. *Id.* The statute thus was not facially invalid, although "the manner in which a distiller utilizes the designation statute and the arrangements a distiller makes with its wholesalers will be subject to Sherman Act analysis under the rule of reason", *id. at 662-63 n.9*, that because of the Court's resolution of the preemption issue, it was not necessary "to consider whether the statute may be saved from invalidation under the doctrine of *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*, or under the *Twenty-first Amendment*."

Application of the *Norman Williams* standard calls for affirmance here even if we were to accept *arguendo* the contention that an exchange of price information and price adherence compelled by a state are to be **[**27]** treated, for the purpose of antitrust preemption analysis, as if they were voluntary. The Supreme Court has never held that the exchange of price information, in the language of *Norman Williams*, "necessarily constitutes a violation of the antitrust laws in all cases." Until *United States v. Container Corp., 393 U.S. 333, 21 L. Ed. 2d 526, 89 S. Ct. 510 (1969)*, "[***HN12***[] a] program to exchange price information was illegal only if, in addition to the agreement to exchange information, the defendants **[*175]** agreed to fix prices." Note, *Antitrust Liability for an Exchange of Price Information -- What Happened to* Container Corporation, 63 Va. L. Rev. 639, 649 (1977) (footnote omitted). ***HN13***[] Whether or not there was such an agreement would depend on the nature of the information exchanged -- broadly speaking, whether it was of the sort in *American Column & Lumber Co. v. United States, supra, 257 U.S. 377*, or of that in *Maple Flooring Manufacturers Ass'n v. United States, 268 U.S. 563, 69 L. Ed. 1093, 45 S. Ct. 578 (1925)* **[**28]** -- and on the presence of "conscious parallelism", i.e., identical or nearly identical pricing accompanied by "plus factors". See, *e.g.* *Interstate Circuit, Inc. v. United States, 306 U.S. 208, 83 L. Ed. 610, 59 S. Ct. 467 (1939)*; *United States v. General Motors Corp., 384 U.S. 127, 16 L. Ed. 2d 415, 86 S. Ct. 1321 (1966)*. But see, *e.g., Theatre Enterprises, Inc. v. Paramount Film Distributing Corp., 346 U.S. 537, 541, 98 L. Ed. 273, 74 S. Ct. 257 (1954)*; *Levitch v. Columbia Broadcasting System, Inc., 495 F. Supp. 649, 674-75 (S.D.N.Y. 1980)*, *aff'd* *697 F.2d 495* (2 Cir. 1983). Although *Container Corp., supra, 393 U.S. at 334*, upheld the sufficiency of a complaint charging "an exchange of price information but no agreement to adhere to a price schedule as in *Sugar Institute v. United States, 297 U.S. 553, 80 L. Ed. 859, 56 S. Ct. 629*, or *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 84 L. Ed. 1129, 60 S. Ct. 811*", the decision was fact bound, the Court observing, *e.g.*, that the industry was "dominated by relatively few sellers", **[**29]** that "the product is fungible and the competition for sales is price", and that "the demand is inelastic, as buyers place orders only for immediate, short term needs." Justice Fortas, concurring, made clear his understanding that the Court's opinion did not "hold that the exchange of specific information among sellers as to prices charged to individual customers, pursuant to mutual arrangement, is a *per se* violation of the Sherman Act," *393 U.S. at 338-39*, and the Court has subsequently cited the Fortas opinion as support for saying that ***HN14***[] "the dissemination of price information is not itself a *per se* violation of the Sherman Act." *United States v. Citizens & Southern National Bank, 422 U.S. 86, 113, 45 L. Ed. 2d 41, 95 S. Ct. 2099 (1975)*. ***HN15***[] *Section 101-b* thus does not mandate or authorize conduct "that necessarily constitutes a violation of the anti-trust laws in all cases." New York wholesalers can fulfill all of their obligations under the statute without **[**30]** either conspiring to fix prices or engaging in "conscious parallel" pricing. So, even more clearly, the New York law does not place "irresistible pressure on a private party to violate the antitrust laws in order to comply" with it. It requires only that, having announced a price independently chosen by him, the wholesaler should stay with it for a month.

In placing our decision upon *Norman Williams* and declining to decide between the two lines of authority with respect to the issue of agreement, we are, of course, acting on the premise that this case is a facial attack on the statute and are leaving open the possibility of a challenge based upon its actual operation. We entertain no doubt that despite the factual material summarized in note 10 *supra*, itself scanty and inconclusive, the attack here was on the ground of facial unconstitutionality. The complaint was addressed to the face of the statute and claimed, erroneously as we have shown, that *§ 101-b* was similar to the California statute invalidated in *Midcal*. Plaintiffs themselves moved for summary judgment, asserting that there was no genuine issue as to any material fact and that they were entitled to judgment **[**31]** as a matter of law. When the judge ruled against them and the defendants moved for summary judgment on the basis of the judge's opinion, plaintiffs did not controvert their own assertions that there were no genuine factual issues. Indeed they made no claim of the existence of such issues on this appeal. We hold, on the authority of *Norman Williams*, that they failed to make out a case of facial invalidity.

[*176] III

The district judge held that if he had been wrong in concluding that *§ 101-b* is not preempted by *§ 1* of the Sherman Act, the statute was nevertheless shielded from the antitrust laws by *Parker v. Brown, supra, 317 U.S. 341 (1943)*. Although our conclusion that he was right in his holding in regard to preemption makes it unnecessary to go further so far as this court is concerned, we think it desirable to discuss the application of *Parker v. Brown* and also the balancing of federal and state interests required by the *Twenty-First Amendment* if *§ 101-b* was preempted and not saved by the state action exception.

Midcal established that in order for state activity in the control of the sale of alcoholic beverages to enjoy the benefit **[**32]** of immunity for state regulation of private conduct, two tests must be met: "First, the challenged restraint must be 'one clearly articulated and affirmatively expressed as state policy '; second, the policy must be 'actively supervised' by the state itself." *Midcal, 445 U.S. at 105* (quoting *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 410, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978)*(opinion of Brennan, J.).

There can be no fair question that *§ 101-b* meets the first test, as demonstrated by the first subparagraph of the statute which we have quoted in note 2 *supra*, and the preamble quoted in part IV of this opinion. There is grave question, however, whether the second test is satisfied. *Midcal* held that it was not on the facts there presented, since California, having "authorize[d] price-setting and enforce[d] the prices established by private parties", neither established prices nor reviewed the reasonableness of the price schedules nor regulated the terms of the fair trade contracts, *445 U.S. at 105-06*.

It can be argued with some force that the case with respect to *§ 101-b* is distinguishable. California **[**33]** sought to achieve a system of minimum resale prices, a goal clearly forbidden by the antitrust laws. Under such a system, the prevailing price level should have been of primary importance to the state. It was thus appropriate to require active state involvement in price setting as a condition to immunity. New York, in contrast, has sought only to produce orderly market conditions, specifically by preventing price discrimination. Under such a program there is nothing that the state can "actively supervise" except to see that the statutory requirements are obeyed -- and there is no claim that the state has neglected this.

However, the most influential treatise on the subject, Areeda & Turner, 1 ***Antitrust Law*** para. 213d, at 75 (1978), comes to a contrary conclusion. Posing a hypothetical quite similar to the instant case and assuming that unless exempt the practices would violate the antitrust laws, the authors would deny immunity since "although the state legislature has decided that these practices would be desirable, it has created a continuing, unsupervised private power to act anticompetitively." [11] In *Miller v. Oregon Liquor Control Comm'n, 688 F.2d 1222, 1225* (9 Cir. 1982), **[**34]** the court, quoting from the Areeda & Turner treatise, refused to apply *Parker v. Brown* so as to uphold self-executing State Liquor Commission regulations requiring wholesalers of beer and wine to post prices ten days prior to their effective dates and, in the case of price decreases, to maintain them for 180 days for malt beverages and 30 days for wine. Our own decision in *Morgan v. Division of Liquor Control, supra*, 644 F.2d 353, which held *Parker v. Brown* to be applicable, rested on the ground that Connecticut had there engaged in active supervision by requiring that a wholesaler's posted prices must not be less than his statutorily defined costs. [12] We must confess **[*177]** that there seems to us to be some anomaly in according immunity where a state's program is highly offensive to the antitrust laws, as was true in *Parker v. Brown* itself, provided only that the state involves itself to a certain degree in the iniquity, but in refusing to do so when the state's objective is less at variance with the antitrust laws and is accomplished by a method which requires nothing but policing. Since reliance on *Parker v. Brown* is unnecessary in this case, **[**35]** we think it best to say that we neither approve nor disapprove the alternative holding of the district court and leave the issue for another day.

IV

On the other hand, if we are wrong in thinking that *§ 101-b* is not in conflict with the antitrust laws in the sense required by *Norman Williams* for a declaration of facial invalidity, here, in contrast to *Midcal*, the state's interest should prevail under the balancing process there prescribed for cases where the procompetition policy of the federal antitrust laws comes in conflict with a state's exercise of the authority reserved to it by § 2 of the Twenty-First **[**36]** Amendment.

We begin by observing that the California statute's confrontation with federal policy in *Midcal* was as sharp as could be imagined. Contracts for resale price maintenance had long been held to be *per se* violations of *§ 1* of the Sherman Act. *See, e.g., Dr. Miles Medical Co. v. John D. Park & Sons, supra, 220 U.S. 373*; *Albrecht v. Herald Co., 390 U.S. 145, 19 L. Ed. 2d 998, 88 S. Ct. 869 (1968)*. Although states had been permitted to sanction these by the Miller-Tydings Act of 1937, see note 6 *supra*, in order to "protect small retail establishments that Congress thought might otherwise be driven from the market place by large-volume discounters", *Midcal, supra, 445 U.S. at 102*, Congress rescinded that permission by the Consumer Goods Pricing Act of 1975. California was thus attempting to continue, with respect to alcoholic beverages, exactly what Congress had condemned.

As against this strong federal interest, the Court found that California's interest was extremely weak. This finding was made rather easy by the attitude taken by California itself. Justice Powell remarked that, "As the unusual posture **[**37]** of this case reflects, the State of California has shown less than an enthusiastic interest in its wine pricing system," *445 U.S. at 111 n.12*, adding that "the state agency responsible for administering the program did not appeal the decision of the California Court of Appeal" which struck down the law. *Id.* Beyond this the Supreme Court of California in the *Rice* case, *supra*, *21 Cal. 3d 431, 579 P.2d 476, 146 Cal. Rptr. 585* (dealing with distilled liquors), which the Court of Appeal for the Third District found decisive in *Midcal, 90 Cal. App. 3d 979, 153 Cal. Rptr. 757, 760* (dealing with wine), had engaged in the balancing process and found the state's interest in resale price maintenance to be small. After saying that the Supreme Court accords "respectful consideration and great

[11] Query whether the necessary supervision would be furnished if the SLA were required to monitor the filings and report any evidence of agreement on prices to the legislature.

[12] These included a minimum mark-up of 11% on spirits and cordials, 20% on wine bottled outside Connecticut and beer, and 36% on wine bottled within Connecticut. *Conn. Gen. Stat. §§ 30-68*, 30-68e, *30-68j* (1975).

weight to the views of the state's highest court" on such a matter, quoting *Indiana ex rel. Anderson v. Brand, 303 U.S. 95, 100, 82 L. Ed. 685, 58 S. Ct. 443 (1938)*, Justice Powell went on to summarize the findings of the California Supreme Court in *Rice*. That court had identified two purposes behind the California legislature's **[**38]** decision to prescribe resale price maintenance: "to promote temperance and orderly market conditions", the latter being primarily aimed at "protect[ing] small licensees from predatory pricing policies of large retailers." *Midcal, 445 U.S. at 112* (quoting *Rice v. Alcoholic Beverage Control Appeals Board, 579 P.2d at 490, 493)*. The state Supreme Court cited a study made by a state agency which showed that per capita liquor consumption in California had risen by 42% while resale price maintenance was in effect and a congressional study showing that states with fair trade acts had a higher rate of firm failures and a lesser rate of growth in **[*178]** small retail stores than free trade states. The state Supreme Court thus found no persuasive justification to continue "fair trade laws which eliminate price competition among retailers", *579 P.2d at 494*, and the Court of Appeal came to the same conclusion with respect to the wine trade. With the state courts thus having in effect given up the ghost, the state liquor agency making no attempt to defend the statute it was administering and only the state attorney general as *amicus* having **[**39]** a good word to say for the law, the Court had an easy time in concluding that nothing in the record suggested that the wine pricing system helped sustain small retail establishments or inhibited the consumption of alcohol by Californians, and that "the unsubstantiated state concerns put forward in [the] caser simply [were] not of the same stature as the goals of the Sherman Act." [13]

The situation here is quite different. As shown in Part II of this opinion, there is no such direct conflict between the antitrust laws and the state enactment as there was in *Midcal*. Moreover, the state interest is strong. In the 1964 repeal of the former system of resale price maintenance, the New York Legislature declared:

> § 8. In enacting section eleven of this act **[**40]** [repealing the resale price maintenance law], it is the firm intention of the legislature (a) that fundamental principles of price competition should prevail in the manufacture, sale and distribution of liquor in this state, (b) that consumers of alcoholic beverages in this state should not be discriminated against or disadvantaged by paying unjustifiably higher prices for brands of liquor than are paid by consumers in other states, and that price discrimination and favoritism are contrary to the best interests and welfare of the people of this state, and (c) that enactment of section eleven of this act will provide a basis for eliminating such discrimination against and disadvantage of consumers in this state. In order to forestall possible monopolistic and anti-competitive practices designed to frustrate the elimination of such discrimination and disadvantage, it is hereby further declared that the sale of liquor should be subjected to certain further restrictions, prohibitions and regulations, and the necessity for the enactment of the provisions of section nine of this act [requiring that liquor price affirmations be filed] is, therefore, declared as a matter of legislative **[**41]** determination.

Act of April 16, 1964, ch. 531, 1964 N.Y. Laws. Promotion of temperance is not the only interest reserved to the states by § 2 of the Twenty-First Amendment. The Legislature thus at least thought it was promoting price competition. Furthermore it expressly found that "price discrimination and favoritism are contrary to the best interests and welfare of the people of this state" -- a policy which is reflected in the federal antitrust laws, *15 U.S.C. § 13*. There can be no doubt that requiring wholesalers to post their prices and to observe them for a month is an effective way, perhaps the only really effective way, of enabling the SLA to prevent price discrimination. The provision in *§ 101-b(4)* allowing a wholesaler, within three days after disclosure of the price schedules, to meet any lower price, while not strictly necessary to enforcement of the policy against discrimination, was a reasonable effort by the legislature to prevent the one month adherence provision from severely damaging the competitive position of a wholesaler who had posted prices even slightly above the lowest ones. Although it can be argued that this operates **[**42]** as a disincentive to reducing prices in the original filings, plaintiffs have not alleged this in their complaint, produced evidence that it has occurred, or shown that it has had deleterious effects. Since most brands are sold to all wholesalers at nearly the same price, as the Robinson-Patman Act generally requires, there is not much **[*179]** possibility of price competition at the wholesale level, see note 10 *supra*. On the other hand, as was

---

[13] The Court reserved the question "whether the legitimate state interests in temperance and the protection of small retailers ever could prevail against the undoubted federal interest in a competitive economy." *445 U.S. at 113-14*.

conceded at argument, the ABC Law has not prevented vigorous competition -- both intrabrand and interbrand -- among wine retailers. Here also, in contrast to *Midcal*, those charged with administering the statute and the highest court of New York have identified it as embodying an important state policy. The "weighing" process prescribed by *Midcal* cannot mean that whenever a state statute has some anticompetitive effect, the federal interest prevails; unless there is some anticompetitive effect, there is no occasion to weigh. At least upon a record such as this, § 2 of the Twenty-First Amendment dictates deference to the state.

Affirmed.

Dissent by: WINTER

Dissent

WINTER, Circuit Judge, dissenting:

I respectfully dissent. I **[**43]** disagree with the majority's conclusion that the arrangements mandated by the New York legislation in question would not be *per se* violations of *Section 1* of the Sherman Act if solely the result of an agreement among private firms. I therefore also take a different view of the application of *California Retail Liquor Dealers Assn. v. Midcal Aluminum, 445 U.S. 97, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)* and of the *twenty-first amendment* to this case.

It is true that arrangements that merely call for the exchange of price information are subject to rule of reason, rather than *per se*, analysis. *United States v. Container Corp., 393 U.S. 333, 21 L. Ed. 2d 526, 89 S. Ct. 510 (1969)*; *Maple Flooring Manufacturers Assn. v. United States, 268 U.S. 563, 69 L. Ed. 1093, 45 S. Ct. 578 (1925)*; *American Column & Lumber Co. v. United States, 257 U.S. 377, 66 L. Ed. 284, 42 S. Ct. 114 (1921)*. However, the challenged legislation not only mandates the exchange of price information but also requires adherence to publicly announced prices until thirty days after notice is given of a new price. A requirement of adherence **[**44]** to announced prices has been uniformly held illegal without regard to its reasonableness. *Sugar Institute v. United States, 297 U.S. 553, 601, 80 L. Ed. 859, 56 S. Ct. 629 (1936)* ("steps . . . to secure adherence, without deviation, to prices and terms . . . announced" are illegal). The Supreme Court emphasized as recently as 1980 the "plain distinction between the lawful right to publish prices . . . on the one hand, and an agreement among competitors limiting action with respect to the published prices, on the other." *Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 649-50, 64 L. Ed. 2d 580, 100 S. Ct. 1925 (1980)* (per curiam). *See also* *United States v. Trans-Missouri Freight Association, 166 U.S. 290, 41 L. Ed. 1007, 17 S. Ct. 540 (1897)*. The arrangement in question thus would be *per se* illegal if accomplished solely through private agreement, and our decision, therefore, is governed by *Midcal* rather than by *Rice v. Norman Williams Co., 458 U.S. 654, 73 L. Ed. 2d 1042, 102 S. Ct. 3294 (1982)*. Indeed, to hold otherwise is to forbid states from authorizing resale price maintenance, the anticompetitive **[**45]** effect of which is the subject of great controversy, *see* R. Bork, *The Antitrust Paradox* 288-91 (1978), but to allow them to authorize horizontal price fixing, about which all agree.

I also do not share the majority's concern that the arrangement here is compelled by law rather than achieved through private arrangement. The relevant issue under the *supremacy clause* has to do with the degree to which a state may bring about the very anti-competitive arrangements the Sherman Act was designed to avoid. Whether a state merely authorizes private parties to fix prices or compels them to do so may of course be relevant to the first part of the two-part *Midcal* test, namely whether the challenged restraint is "clearly articulated and affirmatively expressed as state policy." *445 U.S. at 105* (quoting *City of Lafayette v. Louisiana Power and Light Co., 435 U.S. 389, 410, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978))*. Nevertheless, the fact that the state compels a private cartel offers no reason to exempt the legislation from scrutiny under the *supremacy clause*.

[*180] I also conclude that the legislation in question fails the *Midcal* test. **[**46]** Although the policy of creating the cartel in question is surely " one clearly articulated and affirmatively expressed" by the state, the legislation fails to meet the second part of the *Midcal* test, namely that "the policy must be 'actively supervised' by the State itself."

445 U.S. at 105 (quoting City of Lafayette v. Louisiana Power and Light Co., 435 U.S. at 410). As was the case with the California legislation at issue in *Midcal*, New York does nothing whatsoever to establish the actual prices charged, review their reasonableness, monitor market conditions, or engage in reexamination of the program. As in *Midcal*, "the national policy in favor of competition [is] thwarted by casting . . . a gauzy cloak of state involvement over what is essentially a private pricefixing arrangement." 445 U.S. at 106.

Our decision in Morgan v. Division of Liquor Control, 664 F.2d 353 (2d Cir. 1981) is not to the contrary. In that case, we held that Connecticut legislation met the second part of the *Midcal* test because it set a floor for prices established by an express statutory formula and allowed free competition **[**47]** above that floor. In the present case, the only "monitoring" of the state program lies in the provision that responsive price changes cannot be lower than those announced by competitors. That provision, which heightens rather than monitors the anti-competitive impact of the legislation, hardly satisfies the second part of the *Midcal* test.

While I quite agree with Judge Friendly's observations that we should not treat the twenty-first amendment as though it had no application at all to the present case, I do not perceive it to be of any great importance given my view of the New York legislation. Although the statute expresses a concern over the perils of cheap (competitively priced) liquor, the notion that this legislation was even remotely the result of political pressure exerted by aroused temperance groups is a quaint fiction. The self-evident purpose of the statute is to create a cartel of liquor wholesalers for their benefit. Although I believe that the twenty-first amendment allows a state to limit consumption of alcohol by causing its price to be high, I also believe that in such an instance a state must do something more than authorize a cartel of dealers to seek out **[**48]** their profit maximizing price/output level. The issue need not be elaborated in dissent beyond stating my view that where state legislation merely legislates a cartel of liquor dealers and plays no further role in determining prices and output, its self-evident purpose is not to protect the public from the evils of the demon rum, but to preserve the high standard of living of those who sell it. Since the twenty-first amendment was plainly designed only to allow the states to legislate against the evils of intoxicating liquors rather than to reward its purveyors, I see no room for its application in the present case.

I therefore dissent.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN1[] **Private Actions, Standing**

The United States Supreme Court articulates the legal principles applicable to the recovery of damages resulting from ongoing conduct violative of the antitrust laws. The court first states that each time a plaintiff is injured by an act of the defendants a cause of action accrues to him to recover damages caused by that act.

Opinion by: PELL

Opinion

[*442] PELL Circuit Judge.

This case which, for purposes of clarity, we shall label *Ohio II*, is the second of six civil suits brought by the Ohio-Sealy Mattress Manufacturing Company (Ohio) against its licensor, Sealy, Incorporated (Sealy), and other defendants. The first civil suit, which we shall label *Ohio I*, was filed in 1971, and, following two appeals to this court, ultimately resulted in Ohio's obtaining a substantial damages award as well as an order of equitable relief. [1] The present appeal in *Ohio II* is taken from two orders of the district court entered on August 1, 1980, and June 16, 1983. The appeal, involving two challenging questions **[**2]** regarding the doctrine of res judicata, requires us to determine the preclusive effects of the *Ohio I* litigation on the *Ohio II* case.

I. FACTS

Both *Ohio I* and *Ohio II* are antitrust suits brought by Ohio, one of the most successful and aggressive licensees of appellee Sealy, which owns numerous trademarks to a popular brand of mattresses **[*443]** and other bedding products. The resolution of this appeal makes necessary our examination of the procedural history of each suit.

A. The *Ohio I* litigation [2]

[3]** *Ohio I*, a marathon case which, from the filing of the complaint to its final disposition on appeal, lasted over one decade, had its origins in a 1967 Supreme Court case *United States v. Sealy, Inc., 388 U.S. 350, 356, 87 S. Ct. 1847, 18 L. Ed. 2d 1238 (1967)*. In *United States v. Sealy, Inc.*, the Supreme Court invalidated Sealy's system of allocating mutually exclusive manufacturing and sales territories to its manufacturer-licensees. The Court found that Sealy was a joint venture of its stockholder-licensees and that the licensees were "themselves directly, without even the semblance of insulation, in charge of Sealy's operations." *Id. at 353*. Sealy's system of assigning each manufacturer an enclave free of intrabrand competition, the Court held, was therefore a *horizontal* market allocation per se violative of *Section 1* of the Sherman Act. [3] Approximately four weeks after the Court handed down its decision, the licensee-directors of Sealy met to discuss the ramifications of the Court's ruling. Concern was expressed over the competition that could be expected from "renegade," "out of control," and "predatory" licensees no longer constrained **[**4]** by the exclusive territory system. Sealy thereafter developed a new Uniform License Agreement that all its licensees signed in 1968, save one whose license was reacquired by Sealy some years later. The new agreement preserved the same territories (designated Areas of Primary Responsibility or "APRs") as had been used before, and Sealy agreed not to permit any other manufacturer to produce Sealy products in a licensee's territory. The Agreement was thus exclusive as to manufacture, but it was not on its face exclusive as to sales. A licensee was permitted to sell Sealy products in another licensee's APR. Any licensee who would be inclined to sell outside his own APR, however, faced several disincentives. First, each licensee was held accountable for adequate sales in his APR. As an incentive to sell only within his APR, each licensee, once he achieved a quota of sales in his APR, had to pay only one-half the standard royalty to Sealy for all subsequent sales of Sealy products

---

[1] When we use the terms "Ohio I," "Ohio II," and "Ohio III" in this opinion, we refer to entire lawsuits, not to the successive occasions a particular cause of action has been before this court.

[2] Much of this discussion is derived from this court's opinion in *Ohio-Sealy Mattress Manufacturing Co. v. Sealy, Inc., 585 F.2d 821 (7th Cir. 1978)*, *cert. denied*, ***440 U.S. 930, 59 L. Ed. 2d 486, 99 S. Ct. 1267, 201 U.S.P.Q. (BNA) 256 (1979)***.

[3] The *Sealy* Court dealt with an aggregate of trade restraints, including horizontal market allocation as well as minimum retail price fixing. In *United States v. Topco Associates, Inc., 405 U.S. 596, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972)*, the Supreme Court removed the ambiguity created by *Sealy*; the *Topco* Court held that horizontal territorial restraints even if unaccompanied by price fixing are considered per se illegal. *405 U.S. at 609* & n.9.

made that year inside or outside his APR. Second, there was a surcharge placed on sales outside a licensee's APR. The surcharge was termed a "passover payment," and the seller had to remit it to Sealy, **[**5]** which in turn paid it over to the licensee in whose territory the seller had successfully marketed his product. Although Sealy characterized the payment as one designed to prevent an out-of-APR licensee from taking a "free ride" on a fellow licensee's advertising efforts, Sealy itself conducted the great bulk of the advertising for the Sealy brand. The passover charge could run as high as eleven percent. Third, a licensee making an out-of-APR sale had to pay a one percent "product service repair" charge to Sealy. As originally conceived, Sealy was to hold these payments in a fund from which it would reimburse licensees who actually made repairs on products they had not sold, but in practice Sealy paid the charges over to "invaded licensees" whether or not they in fact made any repairs. Fourth and finally, the 1968 Uniform License Agreement limited a licensee to manufacture Sealy products at specified plant locations and prohibited the adding of plant locations without Sealy's written approval. A licensee contemplating an out-of-APR **[*444]** sale faced high transportation costs because of the bulk and weight of the product, and the plant location clause exacerbated this impediment **[**6]** to competition. A licensee who wanted to locate a plant at the periphery of his APR in order to compete more effectively against his neighboring licensees was prevented from so doing. Ohio twice sought permission to construct a plant in Toledo, Ohio, in order to compete more effectively against the Detroit licensee. On both occasions, Sealy denied Ohio's request.

Sealy also inserted into the Uniform License Agreement a clause giving Sealy the "right of first refusal" should a licensee desire to sell his business. Sealy **[**7]** exercised this clause against Ohio on three occasions between 1970 and 1972, thereby blocking Ohio's efforts to obtain the Philadelphia, Florida, and Pittsburgh licensees. In 1970, Ohio contracted to buy the Philadelphia licensee, but upon a complaint from the neighboring Baltimore licensee, Sealy exercised the right of first refusal and the Philadelphia licensee retracted its offer to sell. In 1972, the same sequence of events took place, but this time Sealy acquired the Philadelphia licensee. In 1970, the principal of the Florida licensee reached an agreement to transfer his business to Ohio, but he withdrew his business from sale after Sealy exercised its right of first refusal. In 1972, Ohio for a second time contracted to buy the Florida licensee but Sealy exercised its right of first refusal and acquired the Florida concern. A similar scenario was played out with respect to the Pittsburgh licensee in 1972 and 1973.

In 1971, Ohio and four wholly owned subsidiaries brought suit against Sealy and other defendants seeking both damages and injunctive relief. The claims in the complaint fell largely into two categories. First, there were claims related to the post-1967 market allocation **[**8]** we have just described. Second, there were claims based upon Sealy's use of tying arrangements with respect to bedding components. The latter category of claims need not concern us further. With respect to the former category of claims, Ohio sought the following: First, it requested recovery of the passover payments and product service repair charges it had remitted to Sealy, plus an injunction against future imposition of those charges. Second, Ohio sought damages based upon Sealy's refusal to allow it to locate a plant in Toledo, plus an injunction against future enforcement of the plant location clause. Third, it requested lost profits and preparatory expenses with respect to the failed acquisitions of the Philadelphia, Florida, and Pittsburgh licensees, plus divestiture by Sealy of those licensees. Finally, Ohio sought an injunction against future enforcement of the exclusive manufacturing territories provision. Following extensive pre-trial discovery, the damages claim was tried to a jury, and in April 1975 the jury returned a general verdict in excess of six million dollars in favor of Ohio.

Approximately one year after the general verdict of April 1975, district court **[**9]** Judge Parsons denied Sealy's motion for a new trial upon the condition that Ohio accept a fifty percent remittitur. Ohio acceded to the remittitur and thus, after trebling, received damages in excess of ten million dollars. Eight months later, Judge Parsons denied Ohio equitable relief.

Ohio I came to this Court for the first time on appeal in 1978. *See* [Ohio-Sealy Manufacturing Co. v. Sealy, Inc., 585 F.2d 821 (7th Cir. 1978)](), *cert. denied*, *440 U.S. 930, 59 L. Ed. 2d 486, 99 S. Ct. 1267, 201 U.S.P.Q. (BNA) 256 (1979)*. Sealy argued on appeal that there was insufficient evidence upon which the jury could have found a system of market allocation. We agreed with Sealy that the enormity of the damages award necessarily implied the jury had found that Sealy had allocated the market and had thereby perpetuated the horizontal constraints the Supreme Court in 1967 found per se violative of the Sherman Act. We disagreed, however, with Sealy's assertion that the evidence adduced at trial was insufficient to support such a finding. Although any one of the license provisions Sealy used may not have effected a horizontal market allocation, the evidence **[**10]** of all of the provisions **[*445]** taken together, combined with the fact that most directors of Sealy were licensees, entitled the district court to let the jury decide whether Sealy had illegally divided the market. We reversed the district court, however, with respect to the denial of injunctive relief. We reasoned that the district court had failed to apprehend the jury's necessary finding that Sealy had effected a market allocation: "We think the court erred, thus, in premising its equitable relief decision on the assumption that the only fact established by the jury verdict was that at least one acquisition somehow violated the antitrust laws. Under the evidence and the instructions, and as the case was argued, the jury verdict must also be read to include a finding that Sealy was engaged in the scheme of market allocation in which one or more acquisitions were at least a part." *Id. at 844*. We thus remanded the case to Judge Parsons with instructions to reconsider the denial of equitable relief. We directed Judge Parsons to consider what "total mix of equitable relief, if any, might be just in the circumstances." *Id. at 845* & n. 34. We also **[**11]** directed Judge Parsons to "consider the evidence adduced both at the jury trial and at the equitable relief hearing," and we permitted him to "take any additional evidence . . . [he] might find helpful." *Id. at 845*.

On remand, the district court took additional evidence from the parties and concluded those evidentiary proceedings in 1979. In March of 1981, Judge Parsons entered a final decree, in which he stated at the outset that Sealy had voluntarily agreed to cease collecting passover payments, enforcing the plant location clause, or collecting product service repair charges. Judge Parsons then stated that he had decided not to enjoin Sealy from future enforcement of the exclusive manufacturing territories provision. Judge Parsons reasoned that permitting any licensee to open a plant anywhere in the nation would amount to appropriation of the licensor's property. He also stated that his enjoining enforcement of the plant location clause and collection of the surcharges on out-of-APR sales was a measure sufficient to end market allocation. Judge Parsons declined to enjoin the exercise of the right of first refusal unless Sealy's exercise were linked to **[**12]** an anti-competitive purpose. Judge Parsons reasoned that Sealy had a protectible interest in maintaining the quality of products bearing the Sealy label, and that the right of first refusal, if not used for anti-competitive purposes, effected legitimate control over the identity of those who manufacture under the Sealy name. Next, Judge Parsons concluded that divestiture of the Pittsburgh, Florida, and Philadelphia licensees was not required. Finally, Judge Parsons denied Ohio's supplemental motion to recover damages that had accrued since the jury verdict. Judge Parsons reasoned that Ohio had pending at that time two lawsuits in which it sought to recover those supplemental damages.

Ohio appealed from the final decree, arguing that Judge Parsons erred when he failed to (1) enjoin the exercise of the exclusive manufacturing clause, (2) order divestiture, and (3) award supplemental damages. *Ohio-Sealy Manufacturing Co. v. Sealy, Inc., 669 F.2d 490 (7th Cir. 1982)*, *cert. denied*, *459 U.S. 943, 103 S. Ct. 257, 74 L. Ed. 2d 201 (1982)*. This court affirmed Judge Parsons on each point. We began our opinion by noting that an equitable decree in a **[**13]** private antitrust suit should fashion "injunctive relief only to the extent necessary to protect [the plaintiff] from future damages likely to occur if the defendant continues the unlawful antitrust conduct." *Id. at 495*. We then considered the denial of injunctive relief with respect to the exclusive manufacturing territories provision and concluded that the district court's other injunctive relief was sufficient to restore "significant intrabrand competition among neighboring licensees." *Id. at 496*. Although the exclusive manufacturing territories provision might prevent Ohio from competing effectively in every APR, we stated that Ohio was not entitled to secure by injunctive relief every conceivable competitive goal. *Id.* On the issue of divestiture, we noted that Ohio had **[*446]** acquired two licensees near the APRs of the Philadelphia and Florida licensees. We also stated that Ohio's Medina, Ohio, plant was near the Pittsburgh licensee's APR. We therefore concluded that Ohio Sealy could engage in significant intrabrand competition at those locations and that divestiture was accordingly unnecessary. Finally, we agreed with the district **[**14]** court that Ohio was not entitled to supplemental damages. With respect to supplemental damages resulting from Sealy's pre-verdict conduct, we divided the damages into two types, namely those that were provable at trial and those that were not. We stated that the doctrine of res judicata barred Ohio from recovering damages of the first type in any further *Ohio I* proceeding or in any subsequent law suit. We concluded that Ohio was, however, entitled to bring a fresh cause of action in a separate lawsuit to recover damages of the second type. Finally, with respect to any damages issuing from Sealy's post-verdict conduct. Ohio again had an independent cause of action that it could pursue in a separate suit.

B. The *Ohio II* Litigation

In March 1976, Ohio and five wholly owned manufacturing subsidiaries filed a new suit naming as defendants, *inter alia*, Sealy, certain Sealy subsidiaries, Sealy's president, and several former members of Sealy's Board of Directors. The complaint was in six counts. Count I was brought under Sections 4 and 16 of the Clayton Act, *15 U.S.C. §§ 15*, *26*, and sought damages and injunctive relief for violations of *Section* **[**15]** *1* of the Sherman Act, *15 U.S.C. § 1*. Distilled to its simplest elements, Count I alleged that all the practices upon which the jury based its 1975 verdict continued without change after 1975. In particular, the complaint alleged that Sealy had reenacted the Uniform License Agreement, reelected the licensee directors to Sealy's board, collected passover and product service repair charges, and "excluded Ohio from competing effectively in the Florida, Philadelphia, and Pittsburgh markets." Paragraph 92 of Count I contained the damages prayer, and it read in pertinent part:

> 92. Ohio-Sealy's injury by reason of all said unlawful restraints and activities has manifested itself in damages, including the following:
>
> (a) Lost profits in connection with the loss of the acquisition of the Florida, Philadelphia, and Pittsburgh licensees.
>
> (b) Loss of profits and increased costs of doing business in connection with refusals of a Toledo plant location in 1971 and 1973.
>
> (c) Royalties paid on bedding not bearing Sealy trademarks and trade names.
>
> (d) Net passover payments and warranty repair charges made by Ohio-Sealy.

Count II sought damages **[**16]** and injunctive relief under Section 8 of the Clayton Act, *15 U.S.C. § 19*, and alleged that certain individuals were at the same time directors of licensees and directors of Sealy, Inc. Paragraph 104 of the complaint, the damages prayer for Count II, stated that as a direct result of the interlocking directorate, Ohio had been injured and would continue to be injured "as set forth in Count I." Counts III through VI alleged numerous additional violations of federal law as well as state law, but these matters have now been settled or adjudicated, and none is relevant to this appeal.

In July 1979, Ohio filed a third suit, *Ohio III*, against Sealy and certain new directors. Sealy and the other defendants in *Ohio III* filed a motion to abate the action as duplicative of *Ohio II*. In response to that motion, Ohio amended its complaint in *Ohio II*, limiting the temporal scope of that complaint to the period before April 24, 1978. *See Ohio-Sealy Mattress Manufacturing Co. v. Kaplan, 90 F.R.D. 40 (N.D. Ill. 1980)*. Sealy and the district court agreed to that time limitation.

Only three matters are presently before this court on appeal, **[**17]** namely the damages prayers of subparagraphs 92(a) and 92(b) **[*447]** and a request under Count II to enjoin enforcement of the exclusive manufacturing territories provision. The prayer under subparagraph 92(c) was adjudicated below and this court affirmed the district court's decision on interlocutory appeal. *See Ohio-Sealy Mattress Manufacturing Co. v. Kaplan, 712 F.2d 270 (7th Cir. 1983)*, *cert. denied*, *464 U.S. 1002, 78 L. Ed. 2d 698, 104 S. Ct. 509*. With respect to the prayer under subparagraph 92(d), Ohio agreed below that it was foreclosed by the judgment in *Ohio I* from seeking recovery of payments made before the 1975 jury verdict. *See Ohio-Sealy Mattress Manufacturing Co. v. Kaplan, 90 F.R.D. 11, 14 & n.6 (N.D. Ill. 1980)*. As to payments made after the 1975 verdict and before April 24, 1978, the defendants in *Ohio II* tendered treble the amount of the payments and the district court dismissed the prayer. With respect to injunctive relief under Count II, Sealy acceded to an injunction against the interlocking directorate, which left only the request for an injunction against enforcement of the exclusive manufacturing **[**18]** territories provision.

By order dated August 1, 1980, district court Judge Aspen granted Sealy summary judgment with respect to the damages Ohio sought under subparagraphs 92(a) and 92(b). Judge Aspen reasoned that Ohio sought post-verdict damages resulting from pre-verdict acts, and that Ohio could have establishes those damages at trial in 1975 by projecting them into the future and discounting them to present value. *See Ohio-Sealy Mattress Manufacturing Co. v. Kaplan, 90 F.R.D. 11, 17 (N.D. Ill. 1980)*. Hence, principles of res judicata barred Ohio from recovering post-verdict damages from Sealy, Inc. Judge Aspen also stated that principles of satisfaction of judgment barred Ohio from recovering post-verdict damages from the other defendants in *Ohio II*.

In May 1982, *Ohio II* was reassigned to District Judge William Hart. On June 16, 1983, Judge Hart ruled in an unpublished order that principles of res judicata also barred Ohio from obtaining an injunction in *Ohio II* against enforcement of the exclusive manufacturing territories provision. Judge Hart reasoned that in our opinion in the second appeal from *Ohio I*, this court had directed Judge **[**19]** Parsons to take all the additional evidence he needed to fashion equitable relief. In 1979, Judge Parsons in fact held an evidentiary hearing and invited the parties to submit to him evidence concerning post-verdict events that might bear on Ohio's prayer for equitable relief. In March 1981, Judge Parsons entered his final decree. Since Ohio had limited the time period of *Ohio II* to acts occurring before April 24, 1978, all facts relevant to the prayer for equitable relief in *Ohio II* were or could have been litigated before Judge Parsons. This court affirmed Judge Parsons' decree in 1982, and hence, Judge Hart maintained, the matter of enjoining enforcement of the exclusive manufacturing territories provision had been fully and finally adjudicated in *Ohio I*.

With the entry of Judge Hart's June 16, 1983, order, all claims in *Ohio II* had been dismissed, rendered moot, or settled. Final judgment was entered on June 30, 1983. Ohio now appeals from Judge Aspen's order of August 1, 1980, and Judge Hart's order of June 16, 1983.

II. DISCUSSION

A. Judge Aspen's August 1, 1980, Order

By order of August 1, 1980, Judge Aspen decided that Ohio's damages claim for **[**20]** the post-verdict consequences of the defendants' pre-verdict acts was barred by res judicata. Ohio assigns error to this point. Our resolution of Ohio's appeal requires us to examine the law of res judicata in the context of a continuing conspiracy to violate the antitrust laws.

In *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 28 L. Ed. 2d 77, 91 S. Ct. 795 (1971)*, ***HN1***[] the Supreme Court articulated the legal principles applicable to the recovery of damages resulting from ongoing conduct violative of the antitrust laws. The Court first stated that "each time a plaintiff is injured by an act of the defendants a cause of action accrues to him to **[*448]** recover damages caused by that act." *Id. at 338*. Under this rule, Ohio had the right to seek post-verdict damages from Sealy's post-verdict acts. For example, when Sealy continued after the 1975 verdict to collect passover and product service repair charges, a new cause of action to recover those payments accrued to Ohio. *See Lawlor v. National Screen Service Corp., 349 U.S. 322, 327-28, 99 L. Ed. 1122, 75 S. Ct. 865 (1955)*; *Poster Exchange, Inc. v. National Screen Service Corp., 517 F.2d 117, 126-29 (5th Cir. 1975)*. **[**21]** Sealy does not contest that Ohio had such a right, and the claim for Ohio's post-verdict payments has in any event been resolved by settlement. The Court next stated that "each separate cause of action that so accrues entitles a plaintiff to recover not only those damages which he has suffered at the date of accrual, but also those which he will suffer in the future from the particular invasion, including what he has suffered during and will predictably suffer after trial." *Id. at 338-39*. It is under this rule, Sealy contends, that Ohio is not entitled to recover in *Ohio II* the damages described in subparagraphs 92(a) and 92(b). The acquisitions of the Philadelphia, Florida, and Pittsburgh licensees as well as the denial of the Toledo, Ohio, plant location all occurred prior to the jury's verdict in 1975. Ohio was required to argue to the jurors sitting in *Ohio I* that it would incur damages into the future from the acts described in subparagraphs 92(a) and 92(b). Ohio's failure to make such an argument to the jurors sitting in *Ohio I* bars it forever from recovering the post-verdict damages it has suffered because of the acquisitions and denial of a new plant location. **[**22]** The Court placed a proviso on its second rule but Sealy maintains that even considering the proviso, Ohio is still barred. The proviso stated, "It is hornbook law, in antitrust actions as in others, that even if injury and a cause of action have accrued as of a certain date, future damages that might arise from the conduct sued on are unrecoverable if the fact of their accrual is speculative or their amount and nature unprovable." *Id. at 339*. In his August 1, 1980 decision, Judge Aspen considered whether the post-verdict damages Ohio sought in *Ohio II* might indeed be recoverable because the fact of their accrual was "speculative" or their amount "unprovable" at trial in 1975. In a carefully crafted opinion, Judge Aspen ruled that neither standard articulated in the *Zenith* proviso could save Ohio's claim for damages. The possibility of future damages was not so speculative as to preclude presentation to the jury. Ohio knew that Sealy would not simply yield up the Philadelphia, Florida, and Pittsburgh licensees in the event of an unfavorable jury verdict. Sealy would continue to retain those licensees and hence recovery of future damages was an issue ripe for presentation **[**23]** to the jury in

1975. Although Ohio had chosen to seek equitable relief, including divestiture, in a later proceeding, the prospect of equitable relief did not render speculative the accrual of future damages under the *Zenith* proviso. ***HN2***[] Plaintiff, by his own actions, could not "create speculativeness, and then use that uncertainty as to future damages to avoid the policies underlying res judicata." *Ohio-Sealy Mattress Manufacturing Co. v. Kaplan, 90 F.R.D. 11, 17 (N.D. Ill. 1980)*. Moreover, the future damages that Ohio sought in *Ohio I* were capable of proof at trial in 1975 under well established methods of projecting lost profits. ***HN3***[] There is "broad latitude" in establishing antitrust damages in private suits, and although Ohio could not establish damages with "mathematical certainty," it had at its disposal the tools lawyers generally employ to make a just and reasonable estimate of future losses. *Id., citing Bailey v. Meister Brau, Inc., 535 F.2d 982, 991 (7th Cir. 1976)*.

We are unable to agree with Judge Aspen's conclusion that Ohio is barred in *Ohio II* from recovering post-verdict damages resulting from Sealy's pre-verdict conduct. **[**24]** The accrual of future damages resulting from the acquisitions of the Philadelphia, Florida, and Pittsburgh licensees and the denial of a Toledo plant was speculative **[*449]** at the time of the 1975 jury verdict. In order to explain our position, it is necessary to elaborate on that part of our 1978 affirmance of *Ohio I* that discusses the Supreme Court's then recently announced decision in *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. *See Ohio-Sealy Mattress Manufacturing Co. v. Sealy, Inc., 585 F.2d 821, 831-33 (7th Cir. 1978)*.

In *Brunswick*, the Court addressed the requirements for recovery of treble damages under Section IV of the Clayton Act, *15 U.S.C. § 15*. Petitioner was a large national manufacturer of pinsetting equipment that had acquired several bowling centers after those centers defaulted on the obligations they had issued to purchase the manufacturer's pinsetting products. Respondents were bowling centers that competed with the centers petitioner acquired. At trial, respondents tried to establish damages compensable under Section IV solely by showing **[**25]** that their profits would have increased had petitioner not kept the defaulting centers in business. The Court assumed for purposes of the case that petitioner's entry into a market of small concerns violated Section VII, which proscribes acquisitions whose effect "may be substantially to lessen competition, or to tend to create a monopoly." *15 U.S.C. § 18*. The Court held that respondents were not entitled to damages under Section IV because the acquisitions had not caused any "*antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent." *Id. at 489* (emphasis in original). Respondents would have suffered the same "loss" regardless of the identity of the concern acquiring the defaulting centers. *Id.* If a small concern as opposed to Brunswick had acquired the centers, respondents would have incurred the "loss" without a Section VII violation. The Court also noted that if the centers Brunswick acquired had been thriving businesses, the Section VII violation would have been at least as plain, yet respondents could not have identified any revenue they would have received but for the acquisitions. *Id. at 487* n. **[**26]** 12. In essence, respondents were seeking damages on the theory that they faced non-predatory competition from centers that otherwise would have closed, but the antitrust laws are meant to promote competition. It would contradict the purposes underlying ***antitrust law*** to award respondents profits they would have realized if fair competition had been reduced. *See generally* Areeda, Antitrust Violations Without Damage Recoveries, 89 Harv. L. Rev. 1127 (1976).

On the first appeal in *Ohio I*, Sealy argued to this court that under *Brunswick* Ohio had suffered no damages compensable under Section IV. We dealt with Sealy's argument as follows:

> The thrust of Sealy's argument is that the competitive situation would have been the same regardless of whether the prior licensee, Ohio, or Sealy had primary responsibility for the territories in question. It insists that Ohio is merely a disappointed desirous purchaser of the licensees, and to award damages for the disappointment is a perversion of the antitrust laws. If Ohio had claimed damages here on the theory that, *e.g.*, Sealy's acquisitions in themselves violated Section VII of the Clayton Act, Sealy's **[**27]** argument might have some plausibility. Sealy ignores, however, the theory Ohio argued to the jury and on which the district court gave instructions, that Sealy's exercise of its right of first refusal was a part of a scheme of market allocation, done to keep Ohio from establishing new bases from which it might effectively compete with neighboring licensees.

Ohio-Sealy Mattress Manufacturing Co. v. Sealy, Inc., 585 F.2d at 832.

Thus, the critical point we made in response to Sealy's argument was that acquisitions *could not be viewed in isolation* for purposes of determining the recoverability of damages under Section IV. This is entirely logical as a matter of first principles. Had Sealy not enforced the plant location clause and not collected passover and product service repair charges, Ohio could have located plants on the periphery **[*450]** of its Georgia territory and shipped bedding products into the Florida market unfettered by external constraints. The result would have been vigorous competition between Ohio and the Florida licensee for a share of the Florida market in Sealy products. The acquisition of the Florida licensee by Sealy **[**28]** was compensable in *Ohio I* only because Sealy employed *additional tactics* to maintain Florida as an enclave free of intrabrand competition. Had Sealy not used other tactics to erect barriers around the Florida territory, Sealy's acquisition of the Florida licensee would have been no more compensable under Section IV than was Brunswick's acquisition of defaulting bowling alleys. Under the same reasoning, Sealy's acquisition of the Pittsburgh and Philadelphia licensees became compensable under Section IV only because Sealy enforced the other contract provisions that prevented Ohio from competing in those territories from its bases in Ohio and Massachusetts. Finally, Sealy's denying a Toledo plant location was compensable because Sealy erected other barriers, such as the exclusive manufacturing territories provision, that kept elevated Ohio's cost of doing business beyond its territories.

At the time Ohio asked the jury to assess damages in *Ohio I*, Ohio was entitled to believe that Sealy would in the future obey the nation's antitrust laws. That is, Ohio could proceed under the assumption that, in the event of a verdict in Ohio's favor, Sealy would open its territories **[**29]** to reasonable intrabrand competition from neighboring licensees. Judge Aspen was correct when he stated that at the time of trial Ohio could not have expected Sealy to hand the Philadelphia, Florida, and Pittsburgh licensees over to Ohio in the event the jury returned a verdict against Sealy. Judge Aspen, however, erred when he ignored all the other tricks, gambits, and ploys Sealy allegedly continued to use after April 1975 to seal off its territories from reasonable intrabrand competition. Ohio was perfectly correct to proceed under the assumption that Sealy would discontinue those tactics following an award in Ohio's favor that indicated the jury necessarily found a horizontal division of markets. It would have been absurd for Ohio to argue to the jury in 1975 that it would continue to feel antitrust injury from Sealy's acquisitions and denial of a Toledo plant location well into the future. That Sealy would not dismantle its barriers to reasonable intrabrand competition following a verdict for Ohio was highly speculative, and Ohio accordingly cannot be barred from bringing its current damages action.

This is an unusual case in that Sealy's liability in 1975 for its wrongful **[**30]** acquisitions of the Philadelphia, Florida, and Pittsburgh licensees and denial of a new plant location in Toledo depended directly upon Sealy's enforcement of other contract provisions that effectively sealed off Philadelphia, Florida, Pittsburgh, and the out-of-APR territory around Toledo from intrabrand competition. The post-verdict damages that Ohio now seeks are thus not, as Sealy would have us believe, "continuing damages for *old* and *now insulated*, illegal conduct." *Exhibitor's Poster Exchange, Inc. v. National Screen Service Corp., 421 F.2d 1313, 1319 (5th Cir. 1970)* (emphasis added). The post-verdict damages sought in *Ohio II* necessarily required for their accrual Sealy's alleged maintenance of the host of other devices that insured the APR's in question would remain enclaves untroubled by competition from Ohio. Ohio was not required to predict that these devices would remain in place following the 1975 verdict. A contrary conclusion on our part would in effect confer on defendants immunity from civil liability for their post-verdict maintenance of barriers around Philadelphia, Florida, Pittsburgh, and the out-of-APR territories surrounding **[**31]** Toledo. *See* *Lawlor, supra, at 329*. We accordingly hold, with regard to the pre-verdict acquisitions of the Philadelphia, Florida, and Pittsburgh licensees and pre-verdict denial of a Toledo plant, that Ohio may proceed with its legal claim in *Ohio II* to recover such post-verdict damages, if any, as it is able to prove for the period between April 1975 and April **[*451]** 1978 as a direct result of unlawful restraint, if any, continued by Sealy after April 1975 and to April 1978.

B. Judge Hart's June 16, 1983, Order

In its first appeal of *Ohio I* to this court, Ohio argued that Judge Parsons erred when he denied all equitable relief. We agreed with Ohio that Judge Parsons' denial was erroneous, and we remanded the cause to Judge Parsons with instructions to "take any additional evidence . . . [he] might find helpful in fashioning equitable relief." *Ohio-*

Sealy Mattress Manufacturing Co. v. Sealy, Inc., 585 F.2d 821, 845 (7th Cir. 1978). In 1979, when Judge Parsons convened the equitable relief hearing we had sanctioned, he advised the parties to submit to him additional evidence concerning post-verdict conduct:

> I have **[**32]** decided that I will need to hear additional evidence concerning three provisions of the license agreement which remained in dispute [the exclusive manufacturing territories provision, the right of first refusal clause, and the no-competitive interests provision]. Of concern with respect to all these provisions is the fact that the financial positions of the parties, their corporate structures and the economic conditions in the relevant market *may have today changed significantly over the course of this litigation*. The complaint in this case was filed eight years ago. The jury verdict was handed down over four years ago. I heard post-trial evidence on equitable relief almost three years ago. *Whatever changes have occurred during this time should bear substantially on plaintiffs' prayer for equitable relief*.

(Emphasis added.) The relief proceeding focused largely on Ohio's challenge to the exclusive manufacturing territories provision and the issue of divestiture. Shortly before the conclusion of the hearing, Judge Parsons once again invited the parties to offer additional evidence. Finally, in a post-hearing order dated April 15, 1980, Judge Parsons advised **[**33]** the parties: "I should welcome any factual and explanatory assistance to me in fashioning an injunctive type order, even though it means considering transactions which post date the formal hearings [in August 1979] on equitable relief."

It is thus plain that Judge Parsons gave the parties ample opportunity to apprise the court of all post-verdict conduct that might have a bearing on Ohio's prayer for an injunction against enforcement of the exclusive manufacturing territories provision. Judge Parsons' practice of taking evidence on post-verdict conduct was clearly warranted by our 1978 instructions and as a matter of original principles. ***HN4***[] It would make little sense for a district judge to enjoin an evil no longer present or to ignore an evil that had turned acute since the time of the verdict. *Cf. Champion Spark Plug Co. v. Reich, 121 F.2d 769, 772 (8th Cir. 1941)*, *cert. denied*, *314 U.S. 669, 86 L. Ed. 535, 62 S. Ct. 130, 51 U.S.P.Q. (BNA) 547*; *Continental Securities Co. v. Interborough Rapid Transit Co., 207 F. 467, 471 (S.D.N.Y. 1913)* ("Equity acts in the present tense. . . . [It] mold[s] the decree to actualities not **[**34]** history.").

Judge Parsons ultimately granted most of the equitable relief Ohio sought, but he concluded that an injunction against enforcement of the exclusive manufacturing territories provision was unnecessary to effect reasonable intrabrand competition. We affirmed Judge Parsons' decree in the second appeal of *Ohio I* to this court. *See Ohio-Sealy Mattress Manufacturing Co. v. Sealy, Inc., 669 F.2d 490, 496 (7th Cir. 1982)*. Ohio filed *Ohio II* in 1976 and requested, *inter alia*, an injunction against enforcement of the exclusive manufacturing territories provision. Judge Aspen thereafter limited the temporal scope of *Ohio II* to the period between April 1975 and April 1978. Judge Hart was thus correct when he held in his August 1, 1983, order that principles of res judicata barred Ohio from seeking an injunction in *Ohio II* against enforcement of the exclusive manufacturing territories provision. Every fact relevant to the injunction sought in *Ohio II* had occurred when, in March 1981, the **[*452]** district court entered the equitable decree in *Ohio I*. Ohio had a full and fair opportunity to present Judge Parsons with evidence of **[**35]** post-verdict occurrences that could militate in favor of enjoining exercise of the exclusive manufacturing territories provision. The fact that Ohio may not have availed itself of this opportunity is immaterial. Res judicata makes a final judgment conclusive as to the parties on all issues of fact and law that were litigated or could have been litigated. *See* J. Moore, J. Lucas and T. Currier, Moore's Federal Practice para. 0.405[1] (2d ed. 1983). Ohio now seeks a second chance in which to convince the district court that events occurring up to April 1978 require a result different from the one rendered by Judge Parsons in 1981 and perfected through appeal to this court in 1982. Res judicata is appropriately applied to prevent this needless relitigation of issues fairly and conclusively decided in prior proceedings.

Ohio raises two supplemental arguments in support of its position that it is entitled to litigate in *Ohio II* the issue of enjoining enforcement of the exclusive manufacturing territories provision. First, Ohio maintains that Judge Parsons expressly reserved Ohio's right to litigate in *Ohio II* the propriety of an injunction in light of post-verdict conditions. **[**36]** We reject this argument for three independent reasons. First and foremost, the passage of Judge Parsons' decree that Ohio quotes in support of its position plainly refers to independent matters, namely Sealy's acquisition of its Portland licensee and Sealy's threat to revoke Ohio's license. Judge Parsons reserved addressing these issues because they were the subject of *Ohio III*. The reservation when read in context, however, cannot be said to refer to the exclusive manufacturing territories provision. Second, it takes an irrational stretch of the imagination to suppose that Judge Parsons would on three occasions invite the parties to submit evidence to him concerning post-verdict conditions and then base his decree solely upon conditions as they existed in 1975. Third, in his decree in *Ohio I*, Judge Parsons in fact referred to post-verdict conditions. For example, he expressly addressed himself to the "1975 Sealy Uniform License Contract," an agreement executed subsequent to the verdict in *Ohio I*. It is thus plain that Judge Parsons did not defer until *Ohio II* consideration of an injunction against enforcement of the exclusive manufacturing territories provision **[**37]** based upon post-verdict conditions. He expressly asked the parties to inform him about post-verdict conditions and formulated his decree in light of those conditions the parties chose to bring to his attention.

Ohio also argues that it is entitled to litigate the issue of enjoining the exclusive manufacturing territories provision because Judge Parsons' opinion is not "coherent." This make weight argument need not delay us long. Judge Parsons' opinion painstakingly analyzes the propriety of several equitable measures. On the issue of the exclusive manufacturing territories provision, Judge Parsons determined that permitting a licensee to manufacture anywhere in the nation would be tantamount to permitting a licensee to appropriate the licensor's property; no licensee would ever again seek multiple licenses, for his single license would enable him to manufacture wherever he desired. We approved of Judge Parsons' reasoning when we affirmed the decree of equitable relief in 1982. Ohio may have preferred a different outcome on this aspect of the *Ohio I* litigation, but it cannot now legitimately argue that its claim received less than a coherent disposition in prior proceedings.

[38]** For the sake of completeness, we raise one argument concerning res judicata that Ohio failed to make in its present appeal to this court. In *Beacon Theatres, Inc. v. Westover, 359 U.S. 500, 79 S. Ct. 948, 3 L. Ed. 2d 988 (1959)*, the Supreme Court held that ***HN5***[] when legal and equitable claims are joined in one action, absent exceptional circumstances, a litigant has a right to have the issues common to the legal and equitable claims tried first to a jury. By virtue of our disposition of the first issue in this appeal, Ohio will now be entitled to proceed with its damages action. If we in addition **[*453]** hold that Judge Parsons' equitable relief proceeding in 1979 functioned as the equitable relief proceeding for *Ohio I* and *Ohio II*, it could be argued that Ohio is being forced in *Ohio II* to reverse the order of proceedings dictated by *Beacon Theaters*. Upon closer examination, however, this argument fails. *Beacon Theaters* requires a judge, absent exceptional circumstances, to hear equitable claims after legal claims have been tried to a jury because a reverse order might infringe upon a litigant's right to a jury trial. If the equitable proceeding **[**39]** were held first, principles of former adjudication would preclude the jury's consideration of issues necessarily and actually decided by the judge. In the instant case, the rationale articulated in *Beacon Theaters* behind having the legal proceeding come first, however, is inapplicable. The preclusive effects, if any, that follow from the proceeding before Judge Parsons will follow whether we label that proceeding "the equitable proceeding for *Ohio I*" or "the equitable proceeding for *Ohio I* and *Ohio II*." There accordingly would be nothing gained by postponing the equitable relief proceeding in *Ohio II* until after jury trial on the damages claim. The parties to the damages action in *Ohio II* will have no greater opportunity to try issues to the jury if we were to consider the equitable proceeding in *Ohio II* not to have yet taken place.

CONCLUSION

Having considered all the arguments urged by the parties to this appeal, we conclude that Ohio may proceed with its damages action against defendants to recover such post-verdict damages as it is able to prove for the period between April 1975 and April 1978 as a result of Sealy's pre-verdict acquisitions of **[**40]** the Philadelphia, Florida, and Pittsburgh licensees and pre-verdict refusal of a Toledo plant location, all as specified hereinbefore in this opinion. Ohio may not, however, proceed with its prayer for an injunction against enforcement of the exclusive manufacturing territories provision. The parties shall bear their own costs. The final judgment entered in the district court accordingly is AFFIRMED IN PART, REVERSED IN PART, and the cause is REMANDED to the district court for proceedings consistent with this opinion.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN1[] **Class Actions, Prerequisites for Class Action**

See Fed. R. Civ. P. 23(a).

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN2[] **Class Actions, Prerequisites for Class Action**

If the initial prerequisites of Fed. R. Civ. P. 23(a) are met, plaintiffs must additionally meet the requirements of at least one of the three subsections of Rule 23(b).

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN3[] **Prerequisites for Class Action, Maintainability**

Fed. R. Civ. P. 23(b)(3) provides that an action may proceed as a class action if the court finds that the questions of law or fact common to the members of the class predominate over any questions affecting only individual members, and that a class action is superior to other available methods for the fair and efficient adjudication of the controversy. To support certification, common issues need only predominate; they need not be dispositive of the entire litigation.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

HN4[] Class Actions, Certification of Classes

The burden of demonstrating fulfillment of the conditions outlined in Fed. R. Civ. P. 23 for maintenance of a class action lies with the moving party. The strength of a plaintiff's case on the merits is not to be considered in determining whether a class should be certified. There is no requirement of a prima facie showing of merit in a class action to support certification. However, some analysis of the substantive claims and the essential elements needed to establish those claims is necessary for thorough evaluation of whether the requirements of Rule 23 have been met. A preliminary hearing addressed not to the merit's of plaintiff's individual claim but to whether she is asserting a claim which, assuming its merit, will satisfy the requirements of Rule 23 has never been regarded as violative of Rule 23.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN5[] Class Actions, Certification of Classes

In order to determine whether common or individual issues predominate for the purpose of deciding whether a class should be certified under Fed. R. Civ. P. 23(b)(3), a court must first identify the legal and factual issues in the case.

Antitrust & Trade Law > Sherman Act > Claims

HN6[] Sherman Act, Claims

To prevail on the merits of a claim under section 1 of the Sherman Act, 15 U.S.C.S. § 1, a private plaintiff must prove three distinctive elements: (1) a violation--a contract, combination or conspiracy which unreasonably restrains trade; (2) causation--that the plaintiff suffered antitrust impact or fact of injury as a result of the violation; and (3) amount of damages.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN7[] Cartels & Horizontal Restraints, Price Fixing

An indirect purchaser from a supplier has no legal right to sue the supplier directly for establishing an illegal restraint. In order to establish liability for an alleged horizontal conspiracy, plaintiffs must prove that the distributors, with whom the plaintiffs did deal directly, were involved in the conspiracy with the manufacturers. Proof of the existence of a horizontal conspiracy among the manufacturers cannot prove the existence of a vertical conspiracy between the manufacturers and the distributors, although it may constitute some evidence of such a vertical conspiracy.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN8[] **Price Fixing & Restraints of Trade, Vertical Restraints**

Vertical restrictions on intra-brand competition are no longer per se violations of *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, and must instead be analyzed under the rule of reason. Under rule of reason analysis, to prove a *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, violation, a plaintiff must both establish a contract, combination or conspiracy in restraint of trade and also demonstrate that the restrictive practice should be prohibited as imposing an unreasonable restraint on competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN9[] **Tying Arrangements, Per Se Rule**

A per se *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, tying violation is established when a plaintiff proves (1) the existence of a tie; (2) that the seller has sufficient economic power with respect to the tying product to appreciably restrain free competition in the tied product; and (3) that a not insubstantial amount of interstate commerce is affected.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN10[] **Tying Arrangements, Sherman Act Violations**

An illegal tying arrangement is made out under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, when the seller of a product over which he has market power conditions its sale upon the purchase of one or more additional items. If such a condition is expressly spelled out in contract or can fairly be inferred from the operation of contractual terms, a plaintiff need prove no more in order to make out the first element of his tying claim. If, however, a class action tie-in claim is made, without basis in an express agreement, proof of salesmanship coupled with inequality of bargaining power does not prove the existence of a tie, but rather proof of actual coercion on an individual basis is necessary to prove the existence of a tie.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN11[] Sherman Act, Claims

In order to establish *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, violation, a plaintiff must prove the existence of a contract, conspiracy or combination in restraint of trade and prove either an unlawful purpose or an anticompetitive effect. A plaintiff need only demonstrate unlawful purpose or anticompetitve effect, not both. Purpose and effect are linked disjunctively in antitrust analysis.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Evidence > Burdens of Proof > Allocation

HN12[] Per Se Rule & Rule of Reason, Per Se Violations

The question of whether a plaintiff must show purpose or effect turns on whether the violation alleged falls into the per se or rule of reason category. In a per se case, a plaintiff often need only establish an anticompetitive purpose. Because of the nature of the violation, actual anticompetitive effect need not be shown because such effect is presumed. In contrast, to establish a violation in a rule of reason case, a plaintiff usually need only show anticompetitive effect.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN13[] Conspiracy to Monopolize, Elements

To prove that a conspiracy or other form of agreement violates *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, a plaintiff must show either that it falls in one of the categories of per se illegality or that it has an actual or at least probable anticompetitive effect.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Evidence > Admissibility > Circumstantial & Direct Evidence

HN14[] Sherman Act, Claims

In a distributor termination in furtherance of a price-fixing conspiracy, intent to agree may not be inferred simply from the fact that other distributors complained to the manufacturer prior to termination. Rather, there must be evidence that tends to exclude the possibility that the manufacturer and non-terminated distributor were acting independently. An antitrust plaintiff should present direct or circumstantial evidence that reasonably tends to prove that the manufacturer and others had a conscious commitment to a common scheme designed to achieve an unlawful objective. The concept of a common scheme or agreement includes more than a showing that the distributor conformed to the suggested price. It means as well that evidence must be presented both that the distributor communicated its acquiescence or agreement, and that this was sought by the manufacturer.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN15[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

A finding of a combination, contract or conspiracy can be made in a rule of reason case absent any express proof of intent. In a rule of reason case, intent to restrain trade may be inferred from circumstance surrounding the challenged contracts or acts. Plaintiffs in a per se case are put to a stricter test in establishing an agreement since they need show nothing further to prove an antitrust violation.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN16[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

In a rule of reason antitrust claim such as a vertical distribution claim, the unreasonableness of the restraint as well as the existence of the restraint must be established. Plaintiffs must show that the restraint has an unreasonable anticompetitive effect on competition.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN17[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

In the context of a restricted distribution case, establishing the unreasonableness of a restraint entails demonstrating that the restrictions' anticompetitive effects on intra-brand competition are not outweighed by its pro-competitive effects on interbrand competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN18[] **Per Se Rule & Rule of Reason, Sherman Act**

In a rule of reason case, the factfinder weighs all the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN19[] **Per Se Rule & Rule of Reason, Sherman Act**

Mere factual complexity in a rule of reason case is no reason to deny class certification.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN20[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

To establish an antitrust violation on a claim of parallel business behavior, there must be (1) a showing of acts by defendants in contradiction of their own economic interests, and (2) satisfactory demonstration of a motivation to enter an agreement.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN21[] **Regulated Practices, Price Fixing & Restraints of Trade**

Generally a manufacturer has an interest in maintaining intra-brand competition so as to keep retail prices low and sales high.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN22[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Merely invoking the incantation "conspiracy" does not insure that common questions will predominate.

Antitrust & Trade Law > Sherman Act > Claims

HN23[] **Sherman Act, Claims**

Proof of impact is an essential element of any antitrust action.

Antitrust & Trade Law > Sherman Act > Claims

HN24[] **Sherman Act, Claims**

To prove antitrust impact, a plaintiff must show that he suffered some loss in his business or property and that there is a causal relationship between the antitrust violation and the loss. Impact or causation is a distinct element of liability, independent of proof of a violation. It is also distinct from the matter of individual damages.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN25[] **Sherman Act, Claims**

There is absolutely no requirement that an antitrust loss be personal or unique to a plaintiff, so long as the plaintiff has suffered loss in his business or property. When an antitrust violation impacts upon a class of persons who do have standing, there is no reason why proof of the impact cannot be made on a common basis so long as the common proof adequately demonstrates some damage to each individual. Whether or not fact of damage can be proven on a common basis depends upon the circumstances of each case.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN26[] **Vertical Restraints, Price Fixing**

In order to establish that vertical restraints constitute an unreasonable restraint on trade, it must be determined whether restrictions' anticompetitive effects on intra-brand competition are not outweighed by their pro-competitive effects on interbrand competition. In order to establish fact of damage, plaintiffs must show that the anticompetitive effects outweigh the pro-competitive effects of the restraint as to each member of a proposed class, since at least some damage to each individual plaintiff must be shown. Unless this fact of damage to each class member can be established by common proof, class certification should be denied.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN27[] **Robinson-Patman Act, Claims**

Because of the requirement that disfavored customers show functional competition between themselves and favored customers, impact in class action claims brought under § 2(a) of the Robinson-Patman Act, *15 U.S.C.S. § 13(a)*, has been held not provable by common evidence.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN28[] **Prerequisites for Class Action, Maintainability**

The necessity for calculation of damages on an individual basis should not preclude class determination when the common issues which determine liability predominate.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN29[] Prerequisites for Class Action, Maintainability

In addition to finding that common questions predominate, *Fed. R. Civ. P. 23(b)(3)* requires that a court determine whether a class action is superior to other available methods for the fair and efficient adjudication of the controversy.

Antitrust & Trade Law > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN30[] Antitrust & Trade Law

Efficiency suggests that the antitrust claims of all retailers affected by a practice be disposed of in a single lawsuit.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN31[] Prerequisites for Class Action, Maintainability

One important factor in determining whether a class action is superior is the difficulty likely to be encountered in the management of the case.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN32[] Prerequisites for Class Action, Adequacy of Representation

Antagonisms within a class justifying denial of certification must relate to the subject matter of the suit.

Civil Procedure > ... > Justiciability > Standing > Third Party Standing

Constitutional Law > ... > Case or Controversy > Standing > Third Party Standing

HN33[] Standing, Third Party Standing

An association has standing to sue on behalf of its members if: (a) its members would otherwise have standing to sue in their own right; (b) the interests it seeks to protect are germane to the organization's purpose; and (c) neither the claim asserted, nor the relief requested, requires the participation of individual members in the lawsuit.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > Third Party Standing

Constitutional Law > ... > Case or Controversy > Standing > Third Party Standing

HN34[] Private Actions, Standing

The Hunt standards apply to the question of associational standing in antitrust actions.

Civil Procedure > ... > Justiciability > Standing > Third Party Standing

Constitutional Law > ... > Case or Controversy > Standing > Third Party Standing

HN35[] Standing, Third Party Standing

Hunt does not require that each of an association's members have independent standing. It is sufficient for associational standing purposes that a significant portion of an association's members would have had individual standing.

Civil Procedure > ... > Justiciability > Standing > Third Party Standing

Constitutional Law > ... > Case or Controversy > Standing > Third Party Standing

HN36[] Standing, Third Party Standing

The third criterion of the Hunt associational standing test requires consideration of two questions: (a) whether the nature of the claims involves individualized proof, and (b) whether the association is competent to speak for its members.

Judges: DICKINSON R. DEBEVOISE, United States District Judge.

Opinion by: DICKINSON R. DEBEVOISE

Opinion

DEBEVOISE, District Judge.

This action, brought under section 1 of the Sherman Act, *15 U.S.C. §1*, and the New Jersey Antitrust Act, *N.J.S.A. 56:9-1, et seq.*, alleges horizontal and vertical conspiracies to create and maintain a system of exclusive territorial distributorships for the distribution of beer products in New Jersey. Plaintiffs are two small retail liquor stores in Elizabeth, New Jersey, which derive a significant portion of their revenues from the sale of beer, and the Wine & Spirits Retailers of New Jersey, Inc. Wine & Spirits holds itself out as a trade association comprised of over 600 New Jersey liquor and beer retailers. The two retailer plaintiffs seek treble damages. All three plaintiffs seek injunctive relief. Jurisdiction is based on §§4 and 16 of the Clayton Act, *15 U.S.C. §§15*, *26*. Plaintiffs invoke the pendent jurisdiction of the court to raise claims under the New Jersey Antitrust Act. *N.J.S.A. 56:9-1, et seq.*

Following amendment of the complaint, the remaining defendants are five **[*4]** brewers of beer - Anheuser-Busch, Inc., Miller Brewing Co., Pabst Brewing Co., Christian Schmidt Brewing Co., and the Schaefer and Schlitz divisions of Stroh Brewing Co. - and 22 distributors of the defendant brewers' beer (including Anheuser-Busch which serves as its own distributor in one territory). Based on the defendant brewers' answers to interrogatories, plaintiffs ascertained that at least 84.5% of all beer sold in New Jersey in 1982 was brewed by the brewer defendants. Through discovery, plaintiffs also learned that the 22 distributor defendants distributed approximately 90% of the beer distributed in the state in 1982.

The essence of plaintiffs' case is that the defendants have maintained a system under which each brewer authorizes only one distributor to distribute its beer within a defined geographic territory. This system of exclusive territories has had the purpose and effect of eliminating intrabrand and interbrand competition among the defendant brewers and distributors of each brand of beer within each specific territory. According to plaintiffs, this system is carried out by means of three types of conspiracies:

1) A horizontal conspiracy among the brewers, created **[*5]** by their allegedly consciously parallel behavior in entering exclusive territorial distributorship agreements;

2) A series of vertical conspiracies between each brewer and each of its distributors; and

3) Horizontal conspiracies among the distributors, including a) a uniform conspiracy among all the distributors to maintain and respect each other's exclusive territories for all brands of beer and b) conspiracies among the distributors of each brand to respect each other's exclusive territories.

Plaintiffs have moved for certification of a plaintiff class consisting of all retailers licensed under *N.J.S.A. 33:1-12* to sell alcoholic beverages which have purchased defendant brewers' beer from one or more of the defendant distributors. The class which plaintiffs seek to represent numbers approximately 12,000. Defendants have moved to dismiss plaintiff Wine & Spirits Retailers of New Jersey, Inc.

1. *The Territorial Agreements.*

Class certification discovery revealed that all of the defendant brewers, except Schmidt's, utilized form agreements authorizing the defendant distributors to sell their beer. The vast majority of these agreement specified territorial "areas of primary responsibility" **[*6]** or "area[s] of primary marketing responsibility" for the distributor's sale of beer. Many of these agreements also either specifically denied that they defined exclusive territories or were silent on the issue. Several more recently executed agreements explicitly do establish exclusive territorial distributorships.

The plaintiffs allege that the agreements establishing "areas of primary responsibility" and the like in fact establish exclusive territories. They assert that these alternate terms are merely euphemisms designed to hide the true nature of the agreements. The parties submitted the relevant portions of the brewer-distributor agreements applicable during the four year period for which defendants may be liable under the antitrust statutes.

a. Anheuser-Busch

The agreements between Anheuser-Busch and its distributors prior to December, 1982 contained the following language:

> Wholesaler agrees to exercise its best efforts to promote, sell and service Anheuser-Busch's Products in the geographic area designated on Exhibit 1 as Wholesaler's primary market area. Wholesaler shall be primarily responsible for servicing retail accounts in its primary market area with Anheuser-Busch Products **[*7]** and will be expected to concentrate its efforts in that area. It is understood, however, that, unless required by state law, Anheuser-Busch does not assign exclusive areas and does not grant exclusivity to Wholesaler in its primary market area. (Plaintiffs' Exhibit 8; Brewer Defendants' Exhibit 4).

However, in December, 1982, two months before the filing of this suit (and the end of the liability period), Anheuser-Busch entered its current "Wholesaler Equity Agreements" which state:

> Anheuser-Busch hereby appoints Wholesaler as the wholesale distributor of, and grants to Wholesaler the right to sell, the Products in the territory described in Exhibit 2 ("Territory") and agrees that it will not appoint another wholesaler for the Products sold by Wholesaler in the Territory . . . . Wholesaler hereby accepts said appointment and agrees to exercise its best efforts to promote, sell and service the Products in the Territory. Wholesaler agrees that it will not sell Products directly or indirectly to customers located outside the Territory. (Plaintiffs' Exhibit 8).

b. Miller

Prior to May, 1983, Miller's agreements with its distributors contained no references to exclusive territories. According **[*8]** to the brewer defendants, during the four-year period prior to the filing of this action, Miller used several different agreements with its different distributors. But each agreement designated an area in which the distributor was primarily responsible for distributing Miller products. (Brewer Defendants' Brief pp. 14-15).

Both the plaintiffs and brewers submitted the following excerpt of a January, 1968, letter from Miller to each of its New Jersey distributors as evidence of the true meaning of its agreements during the liability period:

> We would also like at this time to call your attention to the fact that a number of states have adopted or are considering adoption of laws or regulations establishing specific territorial limitations for distributors. Naturally

> all of our current agreements with our distributors must be considered to incorporate the territorial requirements of such laws and regulations. Doing so is one of the purposes of the territorial description contained in our existing agreement. Otherwise, the purpose of the territorial description is to assure service and a source of supply of Miller beer to beer retailers, and ultimately to consumers in such area. It is not **[*9]** our purpose to impose territorial limitations upon our distributors and our agreement is to be so interpreted. (Plaintiffs' Exhibit 12).

Miller's current wholesaler agreements, which became effective on May, 1, 1983, explicitly provide for exclusive territories:

> Miller hereby appoints Distributor as its sole distributor within the geographic area described in the Distributor Data Sheet ("Distributor's Area") for the Miller products listed in the Distributor Data Sheet ("Miller products"). Unless Miller has granted its prior written approval, Distributor shall not sell or supply Miller products to any retail location within another authorized Miller distributor's area nor to any person Distributor has reason to believe will sell or supply all or part of such products to any retail location within another authorized Miller distributor's area. (Plaintiffs' Exhibit 13).

c. Pabst

The distribution agreements between Pabst Brewing Company and its New Jersey wholesalers in effect on February 15, 1979 set forth an "area of primary marketing responsibility," and explicitly distinguish such areas from exclusive territories:

> Any provisions in the distributorship agreements with the distributor which **[*10]** limit or restrict the sale and distribution of any Pabst beer products by the distributor to a particular geographical area or territory or to any type or class of customer are hereby modified to provide that such geographical area or territory shall hereafter constitute the distributor's area of primary marketing responsibility, and hereafter Pabst and the distributor shall have the right to sell and distribute Pabst beer products in any place or area that, and to any person to whom, Pabst or the distributor may be lawfully authorized so to do. (Defendant Brewers' Ex. 6, P4).

Beginning about 1980, Pabst and its wholesalers modified their agreements. These newer agreements retain language specifically refuting plaintiffs' claims of territorial exclusivity:

> Anything herein to the contrary notwithstanding, no provision hereof shall be construed to limit or restrict the sale and distribution of any said beer by the distributor to a particular geographical area or territory or to any type or class of customer, and Pabst and the distributor shall have the right to sell and distribute said beer in any place or area that, and to any person to whom, Pabst or the distributor may be lawfully authorized **[*11]** so to do. (Plaintiffs' Exhibit 14).

Despite this disclaiming language, the Pabst agreements, like those of Anheuser-Busch and Miller, contain very specific descriptions of the territory for which the distributor was being given "primary marketing responsibility." For example, Pabst's agreement with High Grade Distributor defines its territory in extremely precise terms:

> In the State of New Jersey:
>
> FOR PABST BLUE RIBBON BEER, ANDEKER BEER, PABST EXTRA LIGHT BEER, HAMM'S BEER and HAMM'S SPECIAL LIGHT BEER:
>
> All of SOMERSET and UNION COUNTIES.
>
> All of MIDDLESEX COUNTY except that portion lying south of a line drawn as follows, to-wit: Commencing at the point where State Highway 18 crosses the Raritan River; thence easterly and southerly along State Highway 18 to the intersection of State Highway 18 with State Highway 516; then easterly along State Highway 516 to the eastern boundary of MIDDLESEX COUNTY; including the City of Brunswick and excluding the Town of Old Bridge. (Plaintiffs' Exhibit 14).

d. Stroh (Schaefer and Schlitz)

Since the time this action commenced, Schlitz and Schaefer, whose distribution arrangements are at issue here, have merged into Stroh. Defendants assert that during the **[*12]** liability period, Schlitz and Schaefer each maintained a variety of "differently worded contracts, letters and understandings".

According to defendants there were two types of Schaefer agreements with its distributors. One type was "in the form of a barebones appointment of a primary distributor for geographical areas" designated in the agreement. An example of this type of agreement is Schaefer's agreement with Peerless Beverage Co., which appointed Peerless as the "primary distributor for Schaefer brand beer products manufactured by Schaefer in the geographic areas designated as follows…" (Plaintiffs' Exhibit 15). However, in a March 11, 1982, letter to Peerless, Schaefer stated, "since we do not expect that Schaefer brand beer products handled by you will be sold by others in the territory assigned to you we are dependent on you alone for the sales in that area." (Plaintiffs' Exhibit 15).

According to defendants, the other type of Schaefer agreement states that the distributor "shall have the primary responsibility for the sale of Schaefer Beer" in a defined area and that "as long as Distributor works and develops the territory" to Schaefer's "reasonable satisfaction", Schaefer "does **[*13]** not intend to distribute or to appoint another distributor within "the defined area." (Brewer Defendants' Exhibit 7, PP 1,3).

Defendants state that Schlitz's contracts generally designated a territory described as the distributor's "area of prime interest and responsibility." For example, plaintiffs submitted one such agreement stating "Schlitz and Wholesaler desire that Wholesaler serve as a Wholesaler within the geographic area described below: which is defined as Wholesaler's area of prime interest and responsibility." (Plaintiffs' Exhibit 17).

e. Schmidt's

Schmidt's contends that during the liability period it "did not enter into, nor was it a party to, any agreement, oral or written, with any New Jersey wholesalers," and more specifically, that it had no agreements oral or written, with its New Jersey wholesalers with respect to either exclusive territories or areas of primary responsibility. (Affidavit of Robert L. Welty, Schmidt's Vice-President, PP 3 and 6).

The interrogatory answers of Schmidt's distributors each describes oral agreements or arrangements with Schmidt's. One Schmidt's distributor, Ritchie and Page, states that its oral agreement provides for "an **[*14]** area of responsibility". The other distributors' answers either deny the existence of territorial restrictions or are silent on the question. (Defendant Schmidt's Brief, Exhibit A).

In a letter to Holly Distributors, Inc., dated April 15, 1977, Schmidt's stated that Holly was "appointed as the distributor of the specified brands of our products for the designated territory set forth on Schedule "A", attached hereto." (Plaintiffs' Exhibit 19). By way of explanation of this letter, Schmidt Vice-President Welty stated in his affidavit that prior to April 15, 1977, Schmidt's distributed beer in New Jersey through a wholly-owned subsidiary. On March 17, 1977, the subsidiary agreed to sell its wholesale beer distribution business to Holly. Schmidt's and the subsidiary sought to make certain that Holly would continue to service customers of the subsidiary, and Welty claims that the April 15 letter "merely identifies the location of [the subsidiary] trading area formerly serviced by [it]." Welty states that no other New Jersey wholesaler has any such letter appointment. (Welty Affidavit, PP 7-10, 12). The April 15 letter itself states that Schmidt's "does not enter into contractual or franchise **[*15]** agreements with any distributors or wholesalers. Our business is conducted on an order to order basis." (Plaintiffs' Exhibit 19).

The defendants contend that there are at least 54 individual arrangements for the distribution of beer between the five brewers and the 21 distributors at issue in this case. Defendants emphasize that some of the brewers changed their agreements during the four year period and some of the brewers maintained different agreements with their various distributors at the same time. Even so, it is clear that the 54 agreements would fall into categories of a far smaller number. For example, it appears that Anheuser-Busch maintained five agreements with its distributors prior to December, 1982 which were identical except for the name of the distributor and its territory. Anheuser-Busch maintained another five starting agreements in December, 1982, which also conformed to one another.

Anheuser-Busch attaches to its current agreements a portion of a map of New Jersey reflecting the distributor's exclusive territory (Plaintiffs' Exhibit 8). When pieced together, all of Anheuser-Busch's exclusive distributorships form a complete map of the state. The brewer defendants **[*16]** submitted a map of New Jersey outlining the territories and areas of the primary responsibility which the brewers, except Schmidt's, assigned to distributors. Each brewer's division of the state is somewhat different, and defendants emphasize that each wholesaler of each brand of beer faces a unique array of competitors. However, despite the differences, the overriding impression given by this map is that the brewers have each divided the state into very similar territories (Brewer Defendants' Brief, p. 21).

Pursuant to a pre-trial order, all discovery on the merits of this litigation was stayed pending class certification, discovery and resolution of the class certification question. Plaintiffs attribute their general lack of evidence of the alleged horizontal conspiracies to the fact that discovery on the merits has not yet begun, and that the means of proof of these conspiracies are uniquely in the defendants' possession. But plaintiffs have submitted copies of a final judgment entered by B & B Beverage Co. and High Grade Beverage Co., two defendant distributors here, with the New Jersey Attorney General in 1981. According to plaintiffs, pursuant to the judgment, the two distributors **[*17]** were fined for entering into a written contract expressly allocating between themselves distribution territories for several brands of beer in several New Jersey counties. (Plaintiffs' Reply Brief, Exhibits B and C).

The brewer-distributor written agreements aside, plaintiffs claim that the defendants do in fact operate exclusive territories for the distribution of beer. Maurice Bierman, owner of plaintiff the Package Shop, testified in deposition that when he attempted to buy Anheuser-Busch beer from defendant High Grade his regular distributor for other brewers' beers, he was told that High Grade would not sell to him because his store is located in an exclusive territory in which Anheuser-Busch distributes for itself. (Plaintiffs' Brief, at 40-41). Allen Borsky, the owner of plaintiff Shalbor (*Id.* at 53), Arthur Reckler, a trustee of plaintiff Wine & Spirits and a liquor store owner in Colonia, New Jersey, (*Id.* at 63), and others all similarly testified that their orders for beer were rejected by wholesalers on the ground that the retailer was located in another wholesaler's territory. At least in Bierman's case, the wholesaler who refused to sell him Anheuser-Busch beer, did so **[*18]** at Bierman's store while delivering another brand of beer and with Anheuser-Busch beer in its truck.

For their part, the defendants appear to emphasize that exclusive distributorships are not established in most of their brewer-distributor written agreements. With the exception of Schmidt's, their briefs do not seriously argue that they did not maintain exclusive distributorships.

2. *The Plaintiffs and Proposed Class.*

Two of the named plaintiffs, The Package Shop, Inc. and Shalbor, Inc., are small retail package stores located in Elizabeth, New Jersey. Both hold Class C Plenary Retail Distribution consumption licenses, pursuant to *N.J.S.A. 33:1-12*. This statutory section, which includes a number of subdivisions, covers a wide variety of retailers. Included in the proposed class are retailers of all sizes and both those who sell beer for on-premise and those who sell beer for off-premise consumption.

The Package Shop's average yearly gross income is approximately $ 160,000, of which sales of beer represent 25%. It buys beer brewed by each of the five defendant brewers from five of the defendant distributors, but does not obtain any brand brewed by the defendant brewers from more than one **[*19]** distributor. Plaintiff Shalbor's 1982 gross receipts were approximately $ 280,000, of which beer sales comprised 40 to 45%. It belongs to a purchasing cooperative, and buys beer brewed by each of the defendant brewers from five of the defendant distributors. In 1982, Shalbor did not obtain any of defendant brewers' brands from more than one distributor, except that it obtained Schaefer from both Peerless Beverage Co. and from the Schaefer Brewing Co.

Plaintiff Wine & Spirits Retailer of New Jersey ("Wine & Spirits") is self-described as a trade association comprised of over 600 New Jersey liquor and beer retailers, including stores which sell for off-premise consumption, restaurants and taverns. It is a not-for-profit corporation whose purposes include the promotion of the welfare and education of retailers. Membership is open to all holders of liquor retail licenses in New Jersey.

Wine & Spirits was formed in 1979 as a vehicle for retailers to oppose state plans to deregulate the liquor industry. Maurice Bierman, owner of the Package Shop, was instrumental in organizing the association. At a meeting of over

1,200 New Jersey retailers, which he chaired, the organization was formed and **[*20]** he was, in plaintiffs' words, "elected president of the organization by acclamation."

Wine & Spirits became involved in litigation challenging the authority of state officials to promulgate the deregulation plans. This litigation was finally resolved in *Heir v. Degnan, 82 N.J. 109, 411 A.2d 194 (1980)*.

In late 1979, Wine & Spirits and three New Jersey liquor retailers including The Package Shop commenced an antitrust class action against 26 New Jersey liquor wholesalers and their trade association, alleging price-fixing and other antitrust violations. The parties reached a settlement and submitted a stipulation of settlement to Chief Judge Clarkson S. Fisher of this District in September, 1981. The parties stipulated to a provisional certification of a class of all retailers licensed under N.J.S.A. 33-1-12 who had purchased wine or liquor from one or more of the defendants. Pursuant to the agreement, the defendants agreed to pay $ 900,000 in damages. $ 600,000 was placed in an escrow account for distribution to class members who filed proofs of claim. Payment of any undistributed proceeds was to be made to Wine & Spirits. The stipulation provided that:

> Wine and Spirits Retailers of New Jersey Inc. **[*21]** shall use the funds distributed to it, consistent with the antitrust laws of the United States and the State of New Jersey, to take any and all actions which it deems appropriate, beneficial and consistent with the law and the general welfare with respect to the retail alcoholic beverage industry in New Jersey, including, but not limited to, the following: (i) to enhance and foster the ongoing vitality of the retail alcoholic beverage industry throughout the State; (ii) to lobby and bring about the passage and enforcement of laws and regulations which are lawful, appropriate and beneficial and consistent with the general welfare of the public and to otherwise represent the interests of the retail alcoholic beverage industry before appropriate governmental agencies and parties.

On December 4, 1981, Chief Judge Fisher entered judgment approving the settlement and certifying the plaintiff class. Of the potential class members to whom notice was mailed, only one opted out, and there was not one objection (Defendants' joint Memorandum at 8,12; Transcript, December 14, 1981, proceeding before Chief Judge Fisher, at 4). A total of 691 class-members filed claims with the court, which ordered **[*22]** distribution of payments from the escrow fund to each of these class members.

Wine & Spirits currently has four officers, three of whom are New Jersey retailers licensed under *N.J.S.A. 33:1-12*. Its Board of Trustees is composed of the three retailer officers and four other New Jersey retailers. Each of the trustees testified on deposition to being unable to buy defendant brewers' beers from more than one distributor. One of the Wine & Spirits trustees, Anthony Calvino, is also currently president of the North Jersey Liquor Stores Association ("NJLSA"). Another trustee, Joseph Villani, is also a member of NJLSA, which, he stated is for retail package shops only, while "[t]he Wine & Spirits Retailers is for everybody." (Villani Dep. at 79). Villani was also vice-president of the Union County Package Store Association in 1981. Another trustee served as president of the South Jersey Package Stores Association for two years.

Wine & Spirits' Statement of Assets and Fund Balance as of December 31, 1982 reflects funds totaling $ 350,655. It has authorized the expenditure of an unlimited amount of its funds for this suit and is prepared to pay for all expenses of the litigation.

Defendants challenge **[*23]** Wine & Spirits'status as a membership organization. They point out that its only membership list consists of several pages of handwritten entries on accounting paper listing the names of 575 contributors to the 1979 opposition to deregulation. There has not been a membership meeting since incorporation. (Villani Dep. at 30-31). The last meeting of any kind was in 1980 or 1981. Defendants point out that Wine & Spirits' membership is not limited to retailers.

Defendants also contend that Wine & Spirits has failed to comply with many requirements of *N.J.S.A. 15A:1-7*, which governs not-for-profit corporations. In contradiction of the law, few or none of the trustees or officers has ever been elected. Rather, they are self-appointed. The membership of Wine & Spirits never voted to bring this suit and was not consulted prior to the filing of the suit. (Bierman Dep. at 263; Freedman Dep. at 111).

In support of its motion to dismiss Wine & Spirits for lack of standing, defendants submitted an affidavit of Leo. L. Bromley, past president of NJLSA, which is composed of several hundred dues paying independent retail liquor store licensees. Bromley claims that NJLSA determined that Wine & Spirits' **[*24]** earlier antitrust litigation against the New Jersey liquor wholesalers was "not in the best interests of the New Jersey liquor retailers". Bromley also stated that NJLSA "has no interest in joining or approving the plaintiffs' pursuit of the present action." *Id.* at P6. He stated that NJLSA retained a law firm to examine the merits of the case and the need, if any, for intervention by NJLSA, and that the firm "rendered an opinion to the effect that they [sic] saw little justification for the suit itself and therefore recommended that the Association take no action in that connection." *Id.*

In fact, the Bromley's affidavit is rife with inaccuracies and misrepresentations. On plaintiffs' motion, the law firm's opinion letter was produced. The memorandum of law attached to the letter, while acknowledging the need for extensive discovery and likelihood of vigorous opposition by defendants, stated, "[T]here is a fair chance of establishing the cause of action." (Certification of Anthony Calvino, Exhibit C, Memorandum of Law, at 4). The firm's letter itself stated, "Our firm would be happy to handle this litigation." (*Id.* Opinion Letter at 2). According to Anthony Calvino, Wine & Spirits trustee **[*25]** and current president of NJLSA, NJLSA did not join the case because of the expense involved. (Calvino Affidavit, P12). Plaintiff Calvino also stated that, in fact, NJLSA had never indicated in any way that it was opposed to Wine & Spirits' prior liquor antitrust litigation. Bromley actually filed a proof of claim in that case on behalf of his liquor store and received payment from the settlement fund. (Calvino Affidavit PP6-8 and Exhibits A and B). Bromley's action suggests support rather than opposition to the litigation.

3. *Expert Economic Opinions.*

Both plaintiffs and defendants have submitted affidavits of economists, who have presented their opinions on the economic issues bearing on the question of whether a class should be certified.

Plaintiffs' economist, W. John Jordan, states that the establishment and maintenence of exclusive territories has the effects of reducing or eliminating intrabrand competition, reducing interbrand competition, and artificially raising the price of beer for all the 12,000 proposed class member retailers. He claims that the elimination of the exclusive territories will enhance price and service competition statewide. Jordan contends that the use of exclusive **[*26]** territories in a market as concentrated as the New Jersey beer market (*see supra*) significantly increases prices in that market. (Jordan Reply Affidavit, P10).

Jordan makes two points of particular relevance to the certification issue. First, he claims, in contrast to defendants' economist, that the market for wholesaler-to-retailer distribution of beer in New Jersey is inherently statewide. Jordan cites as evidence that the market is statewide an alleged fact that in the summer of 1982, an independent beer distributor located in northern New Jersey, sold Anheuser-Busch beer in southern New Jersey at prices below that of the franchised Anheuser-Busch distributor. Since this was an independent firm, it was not confined to a territory and sold beer wherever potential profits were greatest. Jordan claims this event is evidence that the market is statewide: there was sufficient profit to be made because of price differentials to make it economically viable for the distributor to transport beer the length of the state. (Jordan Reply Affidavit, P16).

Jordan rejected the defendants' expert's claim that the existence of price differentials around the state for the same brands of beer prove that **[*27]** local markets exist. Jordan claims these differentials would disappear if the exclusive territories were ended. *Id.* at P17.

Jordan also notes that the license under which the class members are authorized to distribute beer grants them the right to do so anywhere within the state.

The second significant assertion Jordan makes is that the amount of anticompetitive overcharge directly attributable to exclusive territories can be calculated by generally acceptable methods:

> (a) A simple and yet reasonable method of calculating damages would have as its foundation the price structure charged to retailers by a representative group of competitive distributors of each brand product line in a more competitive market such as New York or Indiana. Since in a competitive marketplace the price structure of competing distributors will tend toward uniformity except for differences in transportation costs, calculation of

> this "yardstick" price structure will be straightforward. Differences in state taxes, any transportation cost differences and brewer-to-wholesaler prices can be accounted for without any significant data collection or calculation problem (all of this information is either available from **[*28]** the defendants, public information, or easily estimated). The amount of overcharge by the defendants relative to the competitive price structure could be in dollars per delivery unit, or in percentage terms.
> (b) A second method would compare the price structure charged by price-competitive independent beer distributors in New Jersey relative to those of franchised distributors. Since the independent beer distributors are subject to the same price posting regulation as franchised distributors, publically available data exists at the New Jersey ABC that can serve as a basis for calculation of damages.
>
> (c) These are only two of several ways of determining the magnitude of damages in this case. Additional avenues available for damage calculation include comparing the gross percentage markup over the invoice cost of beer for beer distributors in New Jersey with that in a more competitive market. A comparison of the adjusted percentage difference between the two would provide the basis for a damage estimate. Each distributor's sales would be multiplied by the percentage overcharge to determine his share of total damages. (*Id.* at P13).

The analysis of defendant's economist, William C. Myslinski, **[*29]** is premised on the fact that the territorial restraints at issue must be considered under the rule of reason. Rule of reason analysis, he says, "is fact specific and must be done on a case-by-case basis." (Myslinski Affidavit, P7). Myslinski contends that there are significant differences among the competitors within each of the three levels of the beer distribution system in New Jersey - brewers, distributors and retailers. He also contends that local geographic markets exist in the state and that competition in beer distribution differs from one local market to another. For these reasons, "rule of reason analysis cannot be appropriately applied to a single class of all New Jersey retailers."

The better part of Myslinski's affidavit is devoted to cataloguing the differences among the competitors and competition in the beer distribution business in New Jersey. Competitive factors differ across wholesaler territories because in each wholesaler's territory: 1) the number of competitors differs; 2) the lineup of brands differs; 3) the strengths of different brands differ; 4) the pricing differs; 5) the impact of advertising differs; and 6) demand differs.

Regarding pricing, significant **[*30]** difference exists in pricing of the same brand of beer across wholesaler territories. Myslinski states, "These data seriously undermine a claim that all retailers have been similarly affected by exclusive territories, or that wholesale prices have been inflated by a uniform increment throughout the state." (*Id.* at P30).

Myslinski concludes:

> Separate local markets exist within New Jersey and, as a result, separate analyses must be made of the competitive effects of exclusive territories for each of those markets. As a matter of economic principle, it cannot be expected that the same business practice would have identical effects in separate markets. (*Id.* at P41).

Myslinski also states that significant differences may exist among brewers and their reasons for maintaining exclusive territories. For example, a smaller brewer may use them to facilitate entering a new market, while a large brewer may use them to induce the exclusive distributor to maintain high quality or promote the brewer's brand. (*Id.* at P18).

Differences also exist among retailers which, Myslinski says, must be taken into account in rule of reason analysis. Beer products for on-premise consumption are priced differently **[*31]** than those for off-premise consumption. Therefore, on-premise retailers, such as taverns and restaurants, may have different interests than off-premise retailers, such as the named plaintiff retailers. (*Id.* at PP43-46). Small retailers differ from large retailers, because the small ones cannot utilize the "quantity discounts" which the large ones receive. (*Id.* at PP47-48). Myslinski also distinguishes between retailers who prefer "higher service/higher quality wholesalers even at higher prices" and those who do not. (*Id.* at P49). His inference is that exclusive distributors may provide better services and quality at higher prices, and that retailers who are willing to pay more for additional services and quality are not injured by exclusive distributorships. Plaintiffs' economist Jordan specifically claims that elimination of the exclusive territories will both lower prices and improve services. (Jordan Reply Affidavit, P1(b)).

Myslinski states that a price rise due to exclusive territories does not constitute injury if there have been off-setting non-price benefits or other cost reductions to the retailer. Since different benefits may vary among different territories, brewers and retailers, **[*32]** "it is not at all clear" that a statewide measure of injury common to all proposed class member retailers could be made (*Id.* at P50).

Finally, Myslinski claims there are complexities in calculating damages for which plaintiffs have not provided satisfactory solutions. He claims that wholesale beer prices in New Jersey cannot properly be averaged and compared to prices in a different state because beer wholesalers in New Jersey charge differing prices and the calculating of an average New Jersey price will not be a solution because it will not accurately reflect damages to individual retailers. (*Id.* at PP53-54). He also claims it would be too complicated to account for factors other than exclusive territories which would cause wholesale prices to vary between New Jersey and a "yardstick" state. Myslinski also sees complexities in calculating the non-price factors - the benefits derived from the use of exclusive territories - in calculating damages. (*Id.* at PP 55-58).

Class Action Certification

In order to maintain a class action, plaintiffs must demonstrate compliance with the mandatory requirements of *Rule 23(a)*, which provides that:

> ***HN1***[] One or more members of a class may sue or be sued as **[*33]** representative parties on behalf of all only if (1) the class is so numerous that joinder of all members is impracticable, (2) there are questions of law or fact common to the class, (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class, and (4) the representative parties will fairly and adequately protect the interests of the class.

HN2[] If the initial prerequisites of *Rule 23(a)* are met, plaintiffs must additionally meet the requirements of at least one of the three subsections of Rule(b). Primarily plaintiffs here seek certification of the proposed class under ***HN3***[] *Rule 23(b)(3)*, which provides that an action may proceed as a class action if:

> the court finds that the questions of law or fact common to the members of the class predominate over any questions affecting only individual members, and that a class action is superior to other available methods for the fair and efficient adjudication of the controversy. . . .

Katz v. Carte Blanche Corp., 496 F.2d 747 (3d Cir.), *cert. denied, 419 U.S. 885, 95 S. Ct. 152, 42 L. Ed. 2d 125 (1974)*; *Young v. Jo-Ann's Nut House, Inc., 1980-81 Trade Cas. (CCH) P 63,746 at 77,790 (D.N.J. 1980)*. To support certification, common issues need **[*34]** only predominate; they need not be dispositive of the entire litigation. *State of Illinois v. Harper & Row, 301 F.Supp. 484, 489 (N.D.Ill. 1969)*.

HN4[] The burden of demonstrating fulfillment of the conditions outlined in Rule 23 for maintenance of a class action lies with the moving party. *Katz v. Carte Blanche Corp., supra.* The strength of a plaintiff's case on the merits is not to be considered in determining whether a class should be certified. *Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 176, 94 S. Ct. 2140, 40 L. Ed. 2d 732 (1974)*. There is no requirement of a prima facie showing of merit in a class action to support certification. *City of Philadelphia v. American Oil Co., 53 F.R.D. 45, 61 (D.N.J. 1971)*; *accord Kahan v. Rosenstiel, 424 F.2d 161, 169 (3d Cir. 1970)*. However, some analysis of the substantive claims and the essential elements needed to establish those claims is necessary for thorough evaluation of whether the requirements of Rule 23 have been met. *Chmieleski v. City Products Corp., 71 F.R.D. 118, 127 (W.D.Mo. 1976)*. Therefore, "a preliminary hearing addressed not to the merit's of plaintiff's individual claim but to whether she is asserting a claim which, assuming its merit, will satisfy the requirements **[*35]** of Rule 23 has never been regarded as violative of the Rule stated in *Eisen* . . ." *Cobb v. Avon Products, Inc., 71 F.R.D. 652, 654 (W.D.Pa. 1976)*.

Having chosen to seek certification under Rule 23(b)(3), [1] plaintiffs must satisfy the requirements of that rule and the requirements of Rule 23(a)(1)-(4). Since the (b)(3) requirement that common questions predominate presents the most difficult issues in this certification motion, I will turn to it now.

Predominance of Common or Individual Questions

HN5[] In order to determine whether common or individual issues predominate for the purpose of deciding whether a class should be certified under Rule 23(b)(3), the court must first identify the legal and factual issues in the case. *Katz v. Carte Blanche Corp., supra at 756*. **[*36]** **HN6**[] To prevail on the merits of a claim under section 1 of the Sherman Act, a private plaintiff must prove three distinctive elements: 1) a violation (a contract, combination or conspiracy which unreasonably restrains trade); 2) causation (that plaintiff suffered antitrust impact or "fact of injury" as a result of the violation); and 3) amount of damages. *See American Bearing Co., Inc. v. Litton Industries, 729 F.2d 943, 948 (3d Cir. 1984)*.

As noted earlier, plaintiffs have alleged three types of conspiracies: a horizontal conspiracy among the brewer defendants; vertical conspiracies among the brewer and distributor defendants; and horizontal conspiracies among the distributor defendants. In *Illinois Brick v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, the Supreme Court ruled that **HN7**[] an "indirect purchaser" from a supplier - such as the retailers here in relation to the brewers - has no legal right to sue the supplier directly for establishing an illegal restraint. In order to establish the liability of the brewers here for their alleged horizontal conspiracy, plaintiffs must prove that the distributors, with whom plaintiff did deal directly, were involved in the conspiracy with the brewers. [2] Proof of **[*37]** the existence of a horizontal conspiracy among the brewers cannot prove the existence of a vertical conspiracy between the brewers and distributors, *Smith v. Toyota Motor Sales U.S.A., Inc., 1977-1 Trade Cas. (CCH) P61, 252 at 70,764, 1977 U.S. Dist. LEXIS 17968 (N.D.Cal. 1977)*, although it may constitute some evidence of such a vertical conspiracy. *In re Fine Paper Antitrust Litigation, 82 F.R.D. 143, (E.D.Pa. 1979)*, *aff'd*, *685 F.2d 810 (3d Cir. 1982)*, *cert. denied, 459 U.S. 1156 , 103 S. Ct. 801, 74 L. Ed. 2d 1003 (1983)*.

Because of the Supreme Court's ruling in *Illinois Brick v. Illinois, supra*, proof of the alleged vertical agreements between the brewers and distributors is crucial to the claim of horizontal conspiracy among the brewers as well as to the claims of vertical conspiracy between the brewers and distributors. Therefore, the commonality or individuality of issues relating to the vertical restraints is of central importance.

I. Antitrust Violation

A. The Vertical Conspiracies

In *Continental T.V. Inc. v. GTE Sylvania, Inc. 433 U.S. 36, 59, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*, **[*38]** the Supreme court held that **HN8**[] vertical restrictions on intrabrand competition would no longer be considered per se violations of section 1 of the Sherman Act and must instead be analyzed under the rule of reason. Under rule of reason analysis, to prove a section 1 violation, a plaintiff must both establish a contract, combination or conspiracy in restraint of trade and also demonstrate that the restrictive practice should be prohibited as imposing an unreasonable restraint on competition. *Continental T.V. Inc. v. GTE Sylvania, Inc., supra, 433 U.S. at 49*.

1. Existence of Restraint.

---

[1] Certification under Rule 23(b)(1) or (2), argued for briefly by the plaintiffs without case support, is clearly inappropriate. The discussion which follows should make clear that the risks contemplated by (b)(1) are not implicated by this case and that defendants have not acted or refused to act on grounds generally applicable to the class within the contemplation of (b)(2) (see in particular discussion of rule of reason inquiry, *infra*).

[2] The brewers' liability may also be established by proof that they were responsible for the illegal conduct of the distributors. *See Mekani v. Miller Brewing Co., 93 F.R.D. 506, 509 n.3 (E.D.Mich. 1982)*.

In this case, the first part of plaintiffs' burden of proving an antitrust violation would be to establish the existence of brewer-distributor agreements requiring that the distributors only distribute the brewers' products within exclusive geographic territories. Plaintiffs contend that the existence of the exclusive territorial agreements can be proved on a class-wide basis. Defendants assert that individual issues predominate over common ones whenever a supplier-imposed restraint on wholesalers must be proved by evidence other than an express, written agreement.

The leading case in the Third Circuit regarding **[*39]** the Rule 23 requirement of commonality is *Bogosian v. Gulf Oil Co., 561 F.2d 434 (3d Cir. 1977)*. In *Bogosian,* two independent gasoline service station dealers sued their respective station lessors, two major oil companies, alleging that the lease contracts imposed tie-in arrangements in violation of § 1. They joined as defendants 13 other major oil companies who, they alleged, together with their lessor companies, engaged in concerted action to unlawfully tie the leasing of gas stations, to the purchase of gas supplied by each dealer's lessor. Specifically, plaintiffs alleged that the defendants, "through a course of interdependent, consciously parallel action," required lessees, *inter alia,* to sell only lessors' gas.

The court began its analysis of whether common questions predominated by identifing the elements of a section 1 tying violation. Citing the opinion in *Ungar v. Dunkin' Donuts of America, Inc., 531 F.2d 1211, 1223-24 (3d Cir. 1976)*, the court stated that ***HN9***[] a per se violation is established when a plaintiff proves 1) the existence of a tie, 2) that the seller has sufficient economic power with respect to the tying product to appreciably restrain free competition in the tied **[*40]** product, and 3) that a not insubstantial amount of interstate commerce is affected. The defendants, also relying on *Ungar,* claimed that proof of coercion of the dealer to accept the tie-in is always required to prove a tie-in violation.

However, the *Bogosian* court read *Ungar* to require proof of coercion only when the conditioning of the sale of one product upon purchase of another is not reflected in a written agreement or the express operation of its terms. *Bogosian v. Gulf Oil Co., supra, 561 F.2d at 449-50*.

In *Bogosian,* no single provision of the gas station leases required that the lessees purchase from their lessor all the gas they sold. However, the leases ran for six to 12 months and contained clauses prohibiting lessees from making alterations to the leasehold without the lessor's approval and prohibiting lessees from selling gas other than that provided by the lessor from pumps bearing the lessor's trademark. *Id. at 452*. In addition, there were were over 400 various contractual forms used by the 15 defendants in the leases to the class proposed by plaintiffs of all present and former lessee-dealers of the defendants-lessors.

The district court had denied class certification on **[*41]** the ground that the lack of a single lease provision expressly establishing the tie-in meant that individual factual determinations would have to be made regarding whether: 1) there was economic coercion to agree to the tie-in and 2) each of the 400 contractual forms had the effect of precluding the purchase of gas from others than the lessor.

The court held that under the facts of the case, coercion did not need to be proved. The plaintiffs' claim was not that the defendants pressured them into refraining from selling competing products, but that the leases themselves precluded them from doing so. The court concluded that the "practical economic effect" of the combination of clauses in the leases was to create a tie-in, and render it unnecessary for plaintiffs to establish individual coercion to agree. (No lessee with a lease for only 6 or 12 months was likely to seek or receive permission to construct new pumps so as to be able to sell gas other than the lessor's).

The court acknowledged that plaintiffs would probably have to introduce evidence of the various contractual forms to prove the conspiracy among the lessors. But it held that common issues predominated despite this need for **[*42]** evidence of the over 400 contractual forms. The court's rationale for this conclusion was that the claims advanced by the plaintiffs alleged a conspiracy by all the defendants to create a system of leases tying in gasoline purchases. Therefore, proof of all the various contracts was common to the claim alleged, and certification of a class to pursue that claim would not introduce additional, individual claims not already present. The court stated in reference to the various contractual forms:

> If the action were not sought to be maintained on a class basis, a single plaintiff, in order to prove a conspiracy on this basis, would have to prove this much. When the action is brought by the class, the nature of the proof is no different, however. Plaintiffs' claim is not that each defendant imposed a tie-in on every dealer, but that all defendants conspired to impose tie-in arrangements on each dealer and that without the agreement of all, none could do so successfully. Thus, the district court incorrectly identified the legal issue. While the nature of the claim is such that proof will be detailed and lengthy, the factual and legal questions presented in this phase will be precisely the **[*43]** same in a class action as they would be in an individual suit.

Id. at 453.

This conclusion is consistent with the court's explanation of why each plaintiff-lessee had standing to sue lessors other than the one with which it had a contract:

> The gravamen of the complaint is that defendants jointly imposed a system of lease arrangements which eliminated wholesale price competition among defendants on sales to independent dealer lessees. The fact that each plaintiff and class member had direct business dealings with only one defendant is not dispositive, for plaintiffs allege that it was the joint participation of all defendants in the unlawful scheme which made possible the charging of supracompetitive prices to each dealer by his supplier.

Id. at 447.

As the leading Third Circuit case on the commonality requirement, *Bogosian* is the key reference point for analyzing this case. However, because it is a tie-in case, which at the time was a per se violation, it cannot be wholely determinative here.

Defendants contend that in the Third Circuit, individual issues are held to predominate over common ones whenever a vertical restraint cannot be proved by reference to an express written agreement uniform **[*44]** to all the wholesalers. Defendants largely ignore *Bogosion,* which clearly contradicts their assertion that uniform contracts are required to establish commonality. But they do cite several other tie-in case which hold that where the tie-in cannot be proved by reference to a written agreement, and must be proved by evidence of coercion, class certification is inappropriate. *Ungar v. Dunkin Donuts of America, Inc., supra*; *Young v. Jo-Ann's Nut House, Inc., 1980-81 Trade Cas. (CCH) P63, 746,1980 U.S. Dist. LEXIS 16141 (D.N.J. 1980)*.

In *Nut House,* the defendant was a franchisor and distributor for retail sales of candies, nuts and related products. Plaintiffs were two former franchisees, who alleged that under dealer-management franchise agreements, the defendant engaged in unlawful tying arrangements for equipment and supplies. Prior to the four-year period of antitrust liability, these agreements contained explicit tying provisions for supplies. But during the four years prior to the filing of suit, no such explicit written provisions existed for equipment or supplies.

Having found these facts, this court summarized the principles of *Ungar* and *Bogosian* as follows:

> ***HN10***[] An illegal tying arrangement is made out under *Section 1* **[*45]** of the Sherman Act when the seller of a product over which he has market power conditions its sale upon the purchase of one or more additional items. If such a condition is expressly spelled out in contract or can fairly be inferred from the operation of contractual terms, a plaintiff need prove no more in order to make out the first element of his tying claim. If, however, "a class action tie-in claim is made, without basis in an express agreement, proof of salesmanship coupled with inequality of bargaining power does not prove the existence of a tie, but rather proof of actual coercion on an individual basis is necessary to prove the existance of a tie." *Bogosian, supra, 561 F.2d at 451*. In the former case, the suit may proceed as a class action; in the latter, however, class certification must be denied.

Id. at 77,792. Since plaintiffs' claims could only be established by proof of coercive action by the franchisor and not by any express contractual provisions, I denied class certification.

Defendants also rely on cases denying class certification where vertical price-fixing was alleged. *In re Fine Paper Antitrust Litigation, 82 F.R.D. 143 (E.D.Pa. 1979)*, *aff'd, 685 F.2d 810 (3d Cir. 1982)*, **[*46]** *cert. denied, 459 U.S. 1156, 103 S. Ct. 801, 74 L. Ed. 2d 1003 (1983)*; *In re Coordinated Pretrial Proceedings in Petroleum Products Antitrust Litigation, 691 F.2d 1335 (9th cir. 1982)*.

Fine Paper involved two distinct claims. Private parties and five states (the "minority states") alleged that 15 fine paper manufacturers (mills) and co-conspirators including the mills' subsidiaries combined and conspired to raise and fix prices of fine papers. The court certified a class of nationwide direct purchasers regarding this claim because it was susceptible to "generalized proof." The court found that the private plaintiffs and minority states had alleged a course of conduct including exchanges of pricing information, nationwide publication of price announcements and lists, and allocation of markets among defendants. Therefore, the court held that common questions predominated as to whether the defendants had acted in concert.

In contrast, the court refused to certify a class for claims brought by 15 states (the "majority states") alleging a conspiracy involving not only the paper manufacturers but also many of the wholesalers to whom the mills distributed paper. The majority states sought to establish the existence of a conspiracy **[*47]** at two levels of the fine paper distribution systems, through a horizontal combination among the mills and a vertical combination among the mills and wholesalers.

The court noted that proof of the horizontal conspiracy among the mills, while possibly probative of the wholesalers' involvement, was insufficient to establish their participation in a vertical arm of the conspiracy. *Id. at 156*.

The court continued:

> In addition, the defendants must have an opportunity to rebut any inference such proof of a mill level conspiracy establishes with their own evidence that individual merchant houses from whom class members purchased were not involved in the price fixing scheme. *Smith v. Toyota Motor Sales U.S.A., Inc., 1977-1 Trade Cases §61, 252, pp. 70, 763-64, 1977 U.S. Dist. LEXIS 17968 (N.D.Cal. 1977)*. For this reason, common questions do not predominate.

Id.

However, it was significant that the majority states had "not delineated any other method besides proof of a conspiracy among the mills by which the [wholesalers] will be shown to have participated in the conspiracy." *Id.* Therefore the court concluded that no one common set of facts would be sufficent to prove the illegal conduct of the wholesalers and "the majority **[*48]** states [would] have to prove the existence of an implicit agreement to fix prices or 'coercion'" to establish each wholesaler's liability. *Id.*

Finally, defendants rely on *Mekani v. Miller Brewing Co., 93 F.R.D. 506 (E.D.Mich. 1982)*, in which class certification was denied. There two beer retailer sued six major brewers and at least 180 beer distributors who purchased from the brewers. Count I of the plaintiffs' complaint alleged that the distributors engaged in a conspiracy to fix prices and assign territories. Count III alleged that the brewers and distributors engaged in a conspiracy to fix prices and maintain non-competitive territories. The plaintiffs proposed to certify a class of approximately 16,000 retailers, who sold beer in packages in a group of lower Michigan counties.

Although the claims included allegations of territorial restrictions, the court's class certification analysis only addresses the price-fixing allegations. Regarding the Count III claims of brewer-distribution conspiracy, the court refers to affidavits submitted by distributors stating that they would deny that their prices were controlled by agreement with the brewers. There is no indication that there were **[*49]** written agreements of any kind between the brewers and distributors.

The court noted that the "complaint specifically alleged that the brewers, by agreement or coercion, imposed their plan on the distributors." It concluded that in order to prove the existence of the vertical arm of the conspiracy, plaintiffs would "necessarily have to show some sort of agreement or coercion between the brewers and *each* of the

180 distributors." *Id. at 510*. For this reason, the court held that individual issues predominated. Important to the court's decision was the analysis in *Fine Paper* of the vertical conspiracy claims alleged there.

The *Mekani* court stated that the plaintiffs had failed to satisfactorily demonstrate any method by which the distributors' participant could be proved by common set of facts. It also rejected as not addressing the "real issue" the plaintiffs' contention that there were common issues since a single conspiracy was being alleged. *Id. But see Bogosian, supra.*

Relying on these cases, defendants contend that individual issues prevail on the question of the existence of exclusive territorial agreements, the alleged antitrust restraints. There were 54 separate agreements between **[*50]** the five brewers and the 21 distributors during the four-year liability period. These agreements varied from brewer to brewer. They sometimes varied over time within the same single brewer-distributor pair and sometimes varied at a single time between various distributors and a single, common brewer.

Bogosian makes clear that the variations among contractual forms does not necessarily present an insurmountable obstacle to class certification. In that case a class was certified despite the existence of over 400 varying contractual forms. To the extent any prior Third Circuit case required that a uniform agreement applicable to all the parties was necessary, [*see Ungar v. Dunkin' Donuts, supra, 531 F.2d at 1224-26*] it was effectively overruled in *Bogosian.*

Defendants also suggest that a class cannot be certified where the agreement to restrain trade cannot be proved from the express terms of the contract. This contention is also refuted by *Bogosian.* There the court inferred the restraint from the "practical economic effects" of the contract terms, even though it was not expressly stated in those terms.

More significantly, defendants argue that a class should not be certified here because **[*51]** in order to prove the existence of the restraint, plaintiffs must resort to evidence outside the written brewer-distributor agreements. It is admitted by plaintiffs that they must resort to such extrinsic evidence. They state that they will prove the existence of the restraint by introducing the agreements themselves and statistical evidence, derived from the distributors' own records, that no distributor sold beer outside of its assigned territory.

Plaintiffs suggest that in offering the statistical evidence they are merely showing the "practical economic effects" of the agreements, as did the plaintiffs in *Bogosian,* and that they therefore can prove the existence of an agreement by common means. The two situations are not parallel. In *Bogosian,* the court held that the existence of the restraint was clear from the practical economic effects of the operation of the contract terms themselves. By reading the contract terms alone, it was apparant that the gas station lessees would be economically prevented from selling gas other than that of the lessors. In contrast, in this case it is not possible to infer the existence of the restraint from the contract terms themselves. Many of the **[*52]** agreements explicitly deny that they establish exclusive territories. The restraint can only be established by reading the contracts in conjunction with extrinsic evidence.

The crucial questions, then, are whether a restraint can ever be commonly proved when resort must be had to evidence outside the contract and, if so, whether plaintiffs in this case can establish the restraint by extrinsic evidence which is common to the class. Relying chiefly on *Unger, Jo-Ann's Nut House, Mekani* and *Fine Paper,* defendants contend that class certification may never be granted where a plaintiff must resort to evidence outside the contract terms. However, plaintiffs have cited several cases involving claims of vertical restraints in which classes have been certified despite the absence of written agreements establishing the restraint. *City of Philadelphia v. Emhart Corp., 50 F.R.D. 232 (E.D. Pa. 1970)*, involved two suits alleging that the four defendant lock manufacturers 1) entered into unlawful vertical agreements with their distributors providing that the distributors would not sell outside of their allocated territories and 2) entered into a horizontal conspiracy by which they agreed among themselves **[*53]** to carry out the terms of their vertical conspiracy.

In one of the suits, the City of Philadelphia sought to represent a class of all state, county and local governmental authorities and agencies in the United States which had purchased locks with systems made by the defendants. The class numbered over 21,000. In the other case, 46 builder-owners of apartment buildings sought to represent a class, numbering at least in the tens of thousands, of owners and builder-owners who had purchased locks with systems made by the defendants.

The court's opinion contains no reference to the existence of any lock manufacturer-distributor written agreements, but the fact that the plaintiffs alleged that the defendants fraudulently concealed their conspiracies, *id. at 233*, suggests that there were no written agreements or at least that any written agreements did not contain the vertical restriction. However, the defendants had already been sued by the Justice Department for allegedly entering into unlawful vertical agreements and three of them had "elected to terminate their litigation with the Government by entering into consent degrees." *Id.*

The court granted class certification without discussion **[*54]** of the presence or absence of written agreements. The cases were later consolidated in the District of Connecticut with similar claims against the four defendants. There the defendants' motion to decertify the class was denied. *In re Master Key Antitrust Litigation, 70 F.R.D. 23, 28 (D. Conn. 1975)*, app. dismissed, *528 F.2d 5 (2d Cir. 1975)*. Both *Emhart* and *Master Key* upheld class certification of claims alleging vertical restraints on distribution not provable by reference to written agreements.

In *State of Illinois v. Harper & Row Publishers, Inc., 301 F. Supp. 484 (N.D. Ill. 1969)*, plaintiffs, mostly state and local governments, alleged a statewide and a nationwide conspiracy to raise the price of certain library books. They claimed to have been overcharged as a result of "either (1) a horizontal agreement among the industry's book publishers, or (2) a series of vertical conspiracies between each publisher and its wholesalers." *Id. at 486*. In this case as in *Emhart,* one of the allegations was that the defendants had concealed the conspiracies. In the absence of any discussion of written agreements, it again seems fair to conclude that there were no written agreements specifically **[*55]** embodying the alleged restraints. Nevertheless, the court certified both the statewide and nationwide classes.

In *Harper & Row,* as in *Emhart,* the Justice Department had previously brought civil actions alleging the same vertical conspiracies. It obtained consent judgments against 18 publishers, each of which agreed not to fix prices for the following five years. *Id. at 488*. It could be argued that the *Harper & Row* and *Emhart* courts determined that proving the vertical agreements did not present individual issues because these agreements had already been established in the related Justice Department cases. However, there is no indication that the existence of such agreements had been established in the prior cases, since both were terminated by consent judgments. Nor is there a suggestion by either court that it was relying on any such finding.

These cases demonstrate that a class can be certified in a vertical restraint case even when the existence of the restraint must be proved by evidence outside of a written agreement. Plaintiffs have offered such extrinsic evidence of the restraint - the statistical data - by which they say they can commonly prove the existence of exclusive distribution **[*56]** territories. But defendants contend that plaintiffs must prove still more to establish the restraint.

According to defendants, *Emhart, Master Key* and *Harper & Row* are irrelevant to this case because they were decided at a time when vertical distribution restraints were still considered per se violations of *Section 1 of the Sherman Act*. They note that because the Supreme Court in *Continental T.V. v. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*, overturned the old per se rule established in *United States v. Arnold, Schwinn & Co., 388 U.S. 365, 87 S. Ct. 1856, 18 L. Ed. 2d 1249 (1967)*, this case must be analyzed under the rule of reason.

Despite some tentative suggestions of plaintiffs to the contrary, [3] defendants are clearly correct that this is essentially a rule of reason case. The vertical distribution restraints are crucial not only to the vertical conspiracy

---

[3] Plaintiffs rely centrally on a law review article which argues that exclusive territories should be per se illegal. *The Sylvania Case: Antitrust Analysis of Non-Price Vertical Restrictions,* 78 Col. L. Rev. 1 (1978). While the *Sylvania* Court did expressly leave open the possibility that some vertical restraints might justify application of the per se rule, *Continental T.V. v. GTE Sylvania, Inc., supra, 433 U.S. at 58-59*, no court since has treated vertical distribution restraints as per se illegal.

claims, but also to the brewer horizontal conspiracy claim. As will be discussed later, because this is a rule of reason case, analysis of the reasonableness of the restraint, not required in the *pre-GTE Sylvania* cases, is necessary. But the fact that this additional requirement must be satisfied does not render the *pre-GTE Sylvania* cases irrelevant regarding the question **[*57]** of whether the existence of a restraint may be commonly established when resort must be had to evidence outside of explicit agreements. Those cases show that such common proof is possible.

However, the fact that this is a rule of reason case affects the proofs plaintiffs must make to establish the restraint in another way, apparently overlooked by defendants. ***HN11***[] In order to establish a Section 1 violation, a plaintiff must prove the existence of a contract, conspiracy or combination in restraint of trade and prove either an unlawful purpose or an anticompetitive effect. *McLain v. Real Estate Bd. of New Orleans, 444 U.S. 232, 243, 100 S. Ct. 502, 62 L. Ed. 2d 441 (1980)*; *United States v. United States Gypsum Co., 438 U.S. 422, 436 n. 13, 98 S. Ct. 2864, 57 L. Ed. 2d 854 (1978)*. A plaintiff need only demonstrate unlawful purpose or anticompetitve effect, not both. *Fleer Corp. v. Topps, 658 F.2d 139, 147 (3d Cir. 1981)*, *cert. denied, 455 U.S. 1019, 102 S. Ct. 1715, 72 L. Ed. 2d 137 (1982)* (characterizing *United States v. United States Gypsum Co., supra,* as holding that "purpose and effect are linked disjunctively in antitrust analysis.")

As a general rule, ***HN12***[] the question of whether a plaintiff must show purpose or effect turns on whether the violation alleged falls into the per se or rule of reason category. In a **[*59]** per se case, the plaintiff often need only establish an anticompetitive purpose. Because of the nature of the violation, actual anticompetitive effect need not be shown because such effect is presumed. *Cascade Cabinet Co. v. Western Cabinet & Millwork, 710 F.2d 1366, 1372 (9th Cir. 1983)*, citing *Northern Pacific Railway Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*; *Cernuto, Inc. v. United Cabinet Corp., 595 F.2d 164, 166 (3d Cir. 1979)*. In contrast, to establish a violation in a rule of reason case, a plaintiff usually need only show anticompetitive effect. *Malley-Duff & Associates, Inc. v. Crown Life Insurance Co., 734 F.2d 133 at 139 (1984)*.

This distinction between per se and rule of reason analyses was recently confirmed by the Third Circuit in *Malley-Duff, supra, 734 F.2d at 141*, where the court relied on the reasoning of Judge Posner in *Products Liability Insurance Agency, Inc. v. Crum & Foster Insurance Co., 682 F.2d 660, 663 (7th Cir. 1982)*. The Third Circuit stated:

> In determining whether a §1 violation had been made out, the Seventh Circuit, speaking through Judge Posner, noted that ***HN13***[] "[t]o prove that a conspiracy or other form of agreement violates *section 1* of the **[*60]** Sherman Act, the plaintiff must show *either* that it falls in one of the categories of 'per se' illegality *or* that it has an actual or at least probable anticompetitive effect." [*Products Liability, supra, 682 F.2d] at 663*. (Emphasis added). We have no quarrel with this.

The difference in the elements of proof needed in per se and rule of reason cases is significant for purposes of the *Rule 23(b)(3)* analysis here. As the defendants acknowledge, the antitrust violation at issue in *Bogosian* was a per se offense. At the time that case was decided, tie-in arrangements were analyzed under the per se rule. *Cf. Jefferson Parish Hospital District No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 80 L. Ed. 2d 2, 52 U.S.L.W. 4385 (U.S. March 27, 1984)* (certain tying arrangments now must be judged on basis of anticompetitive effects and per se rule is inapplicable).

Because *Bogosian* involved a per se violation, the court rightly focused primarily on the question of anticompetitive purpose. It determined that such purpose could be inferred from the operation of the terms of the contracts, and therefore the intent element of the cause of action could be proved by common means. *Ungar* and *Jo-Ann's Nut*

Plaintiffs also contend that because Anheuser-Busch has allocated itself an exclusive distribution territory and thereby maintained a "dual capacity", the conspiracy becomes horizontal and constitutes a per se illegal market allocation. According to defendants, no dual capacity case in the *post-Sylvania* period has applied per se analysis. The Ninth Circuit, in reviewing the only case on which plaintiffs rely, employed rule of reason analysis. *Krehl v. Baskin-Robbins Ice Cream Co., 664 F.2d 1348 (9th Cir. 1982)*. **[*58]** Furthermore, even if Anheuser-Busch's conduct were judged under per se standards, the conduct of the rest of the brewers would still require rule of reason analysis.

House similarly dealt with tie-in arrangments judged **[*61]** by per se standards. In these cases, however, no anticompetitive purpose could be inferred from the agreements themselves. Such a purpose had to be proved by evidence outside the agreements - evidence of coercion of the franchisees by the franchisors. Since this proof would have been individualized, the plaintiffs could not satisfy the *Rule 23(b)(3)* commonality requirement. *Fine Paper* also involved allegations of a per se antitrust violation - vertical price-fixing. *See* *Continental T.V. Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 51 n. 18, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)* ("The per se illegality of [vertical] price restrictions has been established firmly for many years…"). [4] Therefore proof of illegal purpose was necessary, and the court denied class certification because proof of an agreement or coercion to fix prices would have to have been made individually for each paper distributor. *In re Fine Paper Antitrust Litigation, supra, 82 F.R.D. at 156*.

At oral argument, defendants asserted **[*62]** that in order to prove a contract, combination or conspiracy as required by *Section 1*, plaintiffs must establish that there was an intent or a meeting of minds between each brewer-distributor pair to establish exclusive territorial distributorships. Defendants contend that proof of such intent would require individual evidence beyond the common statistical data proffered by plaintiffs, and that therefore plaintiffs cannot meet the *Rule 23(b)(3)* commonality requirement.

In support of their contention that plaintiffs must prove intent, defendants cite the Supreme Court's recent opinion in *Monsanto Co. v. Spray-Rite Corp., 465 U.S. 752, 104 S. Ct. 1464, 79 L. Ed. 2d 775, 52 U.S.L.W. 4341 (U.S. March 20, 1984)*. In that case, Monsanto, a manufacturer of herbicides, terminated Spray-Rite, one of its distributors, after receiving complaints from other distributors about Spray-Rite's practice of selling at reduced prices. Approximately a year before Spray-Rite's termination, Monsanto had adopted a practice of authorizing one-year distributorships to be renewed only if certain criteria - such as the hiring of trained salespeople - were met.

Spray-Rite filed suit under *Section 1* of the Sherman Act alleging that Monsanto and some of its other **[*63]** distributors had conspired to fix the resale prices of Monsanto herbicides and that Monsanto had terminated Spray-Rite in furtherance of the conspiracy. Monsanto denied the allegations of conspiracy and argued that Spray-Rite was terminated for failure to meet the distributor criteria.

In affirming a jury verdict for Spray-Rite, the Seventh Circuit stated that "proof of termination following competitor complaints is sufficient to support an inference of concerted action." *Monsanto Co. v. Spray-Rite Service Corp., 684 F.2d 1226, 1228 (7th Cir. 1982)*. The Supreme Court rejected the Seventh Circuit's standard.

The Court first emphasized that independent action does not violate *Section 1*, and that a contract, combination or conspiracy is required. The Court then stressed the distinction in distributor-termination cases between concerted action to fix prices and concerted action on non-price restrictions. Since the former are per se illegal, *Monsanto, supra, 52 U.S.L.W. at 4343*, citing *Dr. Miles Medical Co. v. John D. Park & Sons Co., 220 U.S. 373, 404, 409, 31 S. Ct. 376, 55 L. Ed. 502 (1911)*, the Court saw "considerable danger" if such an agreement to fix prices could be inferred from "highly ambiguous evidence." *Monsanto, supra, 52 U.S.L.W. at 4343-44*.

For **[*64]** this reason, the Court held that ***HN14***[] in a distributor termination in furtherance of a price-fixing conspiracy, intent to agree may not be inferred simply from the fact that other distributors complained to the manufacturer prior to termination. Rather:

> There must be evidence that tends to exclude the possibility that the manufacturer and nonterminated distributor were acting independently. [T]he antitrust plaintiff should present direct or circumstantial evidence that reasonably tends to prove that the manufacturer and others "had a conscious commitment to a common scheme designed to achieve an unlawful objective." *Edward J. Sweeny & Sons [,Inc. v. Texaco, Inc., 637 F.2d 105, 111 (3d Cir. 1980)*, *cert. denied, 451 U.S. 911, 101 S. Ct. 1981, 68 L. Ed. 2d 300 (1981)]*.

[4] There are some indications now that the Supreme Court may adopt rule of reason analysis for resale price maintenance cases in the future. *See* *Jefferson Parrish Hospital District No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 80 L. Ed. 2d 2, 52 U.S.L.W. 4385 (U.S. March 27, 1984)*.

Id. at 4344. In a footnote, the Court elaborated on the concept of a "common scheme" or agreement. The concept:

> …includes more than a showing that the distributor conformed to the suggested price. It means as well that evidence must be presented both that the distributor communicated its acquiescence or agreement, and that this was sought by the manufacturer.

Id. at 4344 n. 9.

Defendants analogize from *Monsanto* to this case. They argue that just as no inference of **[*65]** agreement can be drawn from a manufacturer's suggestion of a price and a distributor's conformance to that price, so no inference of agreement to observe exclusive territories can be drawn from the brewers' establishment of areas of primary responsibility and the distributors' selling only within those areas.

Though attractive, the analogy is misplaced. As defendants persuasively argue elsewhere, this case primarily involves allegations of vertical restraints which must be analyzed under the rule of reason. For that reason, plaintiffs need only show anticompetitive effect, not anticompetitive intent. The *Monsanto* Court required proof of intent only because that was a per se case. *Monsanto* fell into the per se category because it involved allegations of distributor termination in aid of price-fixing. In fact, the Court stated:

> This case was tried on per se instructions to the jury. Neither party argued in District Court that the rule of reason should apply to a vertical price-fixing conspiracy, nor raised the point on appeal…. We therefore … decide the case in the context in which it was decided below and argued here.

Id. at 4343-44 n. 7.

As is done in other per se cases, the *Monsanto* Court **[*66]** merged its analysis of the Section 1 requirements of proving a combination in restraint of trade and proving intent. The Court in essence held that there could be no combination unless the plaintiffs could prove intent to agree. The defendants in this case would slip an intent requirement into a rule of reason case by arguing that the combination requirement is not satisfied without proof of intent.

HN15[] A finding of a combination, contract or conspiracy can be made in a rule of reason case absent any express proof of intent. *See National Society of Professional Engineers v. United States, 435 U.S. 679, 690, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)* (In a rule of reason case, intent to restrain trade may be inferred from circumstance surrounding the challenged contracts or acts). Plaintiffs can successfully show a combination in restraint of trade by offering evidence of the brewer-distributor agreements and evidence that the distributors, in fact, sold only within their territories. Intent may be inferred from this evidence. The reason plaintiffs may satisfy the combination requirement in this way is that in order to establish liability they must still prove that the restraint is unreasonable. Plaintiffs in a per se case **[*67]** are put to a stricter test in establishing an agreement since they need show nothing further to prove an antitrust violation.

Defendants contend that in this case, as in *Mekani v. Miller Brewing Co., supra*, plaintiffs must prove that the defendant distributors agreed or were coerced to accept the restraint. Despite the allegations of exclusive territorial distributorships, *Mekani* was a price-fixing case, and the court's analysis treats it as such. According to plaintiffs, Michigan law actually required distributor territories to be allocated by agreement between brewers and distributors. *Mich. Comp. Laws Ann. § 436.30a*. As the defendants themselves argued in their opposition to class certification in that case, liability cannot be based on compliance with a state law. (*See* Defendant Brewers' Brief in Opposition to Plaintiffs' Motion for Class Certification, p. 8 n. 11). It appears that the *Mekani* court did not consider the territorial restriction allegations at all.

The *Mekani* plaintiffs alleged that the brewers had engaged in a price-fixing conspiracy among themselves and then either conspired with or coerced the distributors to follow the price-fixing scheme. *Mekani, supra, 93 F.R.D. at 509*. **[*68]** Like the distributor termination in *Monsanto,* the territorial restriction in *Mekani* was alleged not as an independent antitrust violation, but as a mechanism through which a price-fixing conspiracy was carried out. The *Mekani* plaintiffs also alleged a horizontal price-fixing conspiracy among the distributors. Since both vertical and horizontal price-fixing are per se violations, *see, e.g., Cernuto, Inc. v. United Cabinet Corp., 595 F.2d 164, 166 (3d Cir. 1979)*, the *Mekani* court held that plaintiffs had to prove intent to agree or coercion.

In contrast to *Mekani*, this case involves allegations of nonprice vertical restraints, and therefore must be analyzed under the rule of reason. *Monsanto, supra, 52 U.S.L.W. at 4343*. The territorial restraints are alleged as independent antitrust violations, not simply as aids to a price-fixing scheme. Proof of agreement or coercion is not necessary here.

I conclude that as to all the brewers except Schmidt, plaintiffs should be able to present common evidence in trying to establish the existence of exclusive distributor territories. The brewer-distributor agreements in conjunction with the statistical data locating distributor sales would commonly **[*69]** tend to establish the first element of the cause of action and would not require individualized evidence. *Bogosian v. Gulf Oil Co., supra.* Evidence of an express intent to create exclusive territories is not required.

However, I do not believe that plaintiffs can prove an antitrust restraint against Schmidt by common evidence. Generally, Schmidt had no written agreements with its distributors, and dealt with them on an order by order basis. In addition, as the interrogatory answers of its distributors show, the terms of its distribution agreements varied significantly. Only one of Schmidt's distributors believed that its agreement established an area of primary responsibility. None believed they had exclusive territories. Proving that each of Schmidt's agreements set up an exclusive territory would require individualized evidence.

2. Rule of Reason Analysis.

HN16[] In a rule of reason claim such as plaintiffs' vertical distribution claim, the unreasonableness of the restraint as well as the existence of the restraint must be established. Plaintiffs must show that the restraint has an unreasonable anticompetitive effect on competition.

Defendants contend that there is no way that plaintiffs can **[*70]** prove on a common basis that the territorial restraints alleged here are unreasonable. They assert that no class has been certified in any territorial restraint case where the rule of reason applied. The emphasize that the territorial cases relied on by plaintiffs where certification was granted all pre-dated *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*, and so were judged under the per se standard. Defendants conclude that this fact renders *Emhart, Master Key* and *Harper & Row* irrelevant to this case.

Defendants overstate the significance of the change from per se to rule of reason analysis. There is no reason in theory why the reasonableness or unreasonableness of a restraint cannot be established by common evidence. However, defendants are correct that *Sylvania* requires that a question be addressed here that was unnecessary in the cases cited by plaintiffs: can proof that the territorial restraints are unreasonable be made on a common basis?

HN17[] In the context of a restricted disbribution case, establishing the unreasonableness of the restraint entails demonstrating that the restrictions' anticompetitive effects on intrabrand competition are not outweighed by its procompetitive **[*71]** effects on interbrand competition. *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 54-57, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*; *Graphic Products Distributors v. Itek Corp., 717 F.2d 1560, 1572-73 (11th Cir. 1983)*.

Plaintiffs contend that while they must prove unreasonable effects, they need not "conjure up every possible pro-competititve rationale for a vertical restraint, and prove their inapplicability to the restraint in question…." *Graphic Products Distributors v. Itek Corp., supra, 717 F.2d at 1573*; *see also Eiberger v. Sony Corp., 622 F.2d 1068, 1076 (2d Cir. 1980)*. They contend that alleged procompetitive redeeming benefits of the restraint must be raised by the defendants as affirmative defenses and do not have to be taken into consideration in assessing whether unreasonableness can be proved on a common basis. Plaintiffs conclude that the analysis of unreasonableness can be made by common evidence for the purpose of the *Rule 23(b)(3)* inquiry because "a vertical restraint, almost by definition involves some reduction in intrabrand competition." *Graphic Products Distributors v. Itek Corp., supra, 717 F.2d at 1571*.

In opposition to plaintiffs' position, defendants argue that the plaintiffs bear the **[*72]** burden of proving that any countervailing benefits do not render the restraint reasonable. "The plaintiff in a restricted distribution case must show that the restriction he is complaining of was unreasonable because, weighing effects on both intrabrand and interbrand competition, it made consumers worse off." *Valley Liquors, Inc. v. Renfield Importers, Ltd., supra, 678 F.2d at 745*; *Red Diamond Supply, Inc. v. Liquid Carbonic Corp., 637 F.2d 1001, 1005 (5th Cir.)*, *cert. denied, 454 U.S. 827, 102 S. Ct. 119, 70 L. Ed. 2d 102 (1981)*.

Whether proof of the absence of countervailing benefits is an element of plaintiffs' prima facie case or whether defendants must raise countervailing benefits as an affirmative defense may be in dispute. But, as defendants argue, wherever the burden of proof lies, the question whether there are countervailing benefits to interbrand competition rendering the restraints reasonable is crucial to the rule of reason analysis which must be applied in this case and which therefore must be considered in determining commonality. Even if proof of procompetitive effects must be raised as an affirmative defense, this court must consider whether the benefits can be proved (or disproved) on a common basis. **[*73]** No matter where the burden lies, the issue of countervailing benefits presents "questions of law or fact" whose commonality or individuality must be assessed in the class certification determination. *Fed.R.Civ.P. 23(b)(3)*. Even if, as plaintiffs claim, an anticompetitive effect on intrabrand competition could be commonly presumed from the vertical restraint, proofs necessary under the rule of reason would still be missing.

HN18[] In a rule of reason case, "the factfinder weighs all the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition." *Continental T.V., Inc. v. GTE Sylvania, Inc., supra, 433 U.S. at 49*. Defendants contend that the factual complexity of rule of reason analysis renders this case unsuitable for class treatment. ***HN19***[] Mere factual complexity in a rule of reason case is no reason to deny class certification. *In re Alcoholic Beverages Litigation, 95 F.R.D. 321, 326-27 (E.D.N.Y. 1982)*; *see also In re Folding Carton Antitrust Litigation, 75 F.R.D. 727, 734 (N.D. Ill. 1977)*. But defendants' argument is that because of the different relationships between the various brewers and distributors and because **[*74]** of differences among the retailers and among localities, separate, individualized rule of reason analyses must be undertaken for each brewer-distributor agreement.

Defendants cite three major reasons why numerous, individualized rule of reason analyses would be required: (1) there are numerous distinct local markets for defendant-brewers' products in which competitive conditions differ; (2) the vertical restraints' effect on the various types of retailers differ; and (3) the different brewers' reasons for imposing the restraints must be analyzed separately. Defendants conclude that establishing plaintiffs' case will entail separate analysis of each of the challenged 54 brewer-distributor relationships in the context of its allegedly unique competitive environment.

Both plaintiffs' and defendants' economic experts address the question of the relevant geographic market. Plaintiffs assert it is a statewide market; defendants claim that there are numerous local markets. This issue has not been developed to the extent necessary to make an informed ruling. However, defendants have supplied data which bears on the question whether anticompetitive effects can be commonly ascertained for all **[*75]** localities in the state. In his affidavit, Dr. Myslinski states that the competitive effect of the territorial restrictions varies because of differences in competitive conditions from locality to locality. The factors accounting for the allegedly different competitive effects among the localities include: (1) the differing number and strength of competitors; (2) differing prices for the same brands; (3) differing demand; and (4) differing costs and impact of advertising. Defendants persuasively argue that the reasonableness of the vertical restraint may turn on the strength of each brewer's or distributor's competitive position within a particular area.

Differences among types of retailers also may determine whether a territorial restraint has an anticompetitive effect. The two major distinctions among retailers on which defendants focus are those between on-premise and off-premise sellers and between large and small retailers. According to defendants, on-premise retailers such as taverns or restaurants require distributor services, such as the servicing of draught beer equipment, which off-premise retailers do not need. Defendants claim that exclusive distributorships provide needed **[*76]** incentive for distributors to provide these and other services. Defendants also contend that the pricing of products sold to on- and off-premise retailers may vary. Whether the procompetitive effect of such allegedly superior service outweighs the anticompetitive effect of the territorial restraints may turn on the on-premise/off-premise composition of the group of retailers within different areas. (*See* Myslinski Affidavit, P 46).

According to defendants, the territorial restrictions make possible quantity discounts to large retailers. Small retailers, who lack space for large inventories, cannot make use of these discounts. Therefore, defendants argue the competitive effect of the restraints differs between these types of retailers. Somewhat inconsistently, defendants also argue that in the absence of territorial restraints, transshippers, distributors who sell in the exclusive territory of another distributor, would sell only to larger, high-volume retailers. (*See* Brewer Defendants' Appendix to Brief in Opposition to Class Certification, Ex. 1 at 22-23). Under this analysis, exclusive territories might have a greater anticompetitive effect on large retailers than on small ones. Under **[*77]** either theory, the anticompetitive effect of the restraints would allegedly vary depending on the mix of large and small retailers within a territory.

Defendants correctly state that the competitive effect of the restraints will differ for different types of retailers. But contrary to defendants' contentions, the mere fact that there are different types of retailers does not mean that there is no common competitive effect of the restraints, at least within any particular locality. For example, one could ascertain the competitive effect on an area, which would balance the procompetitive effect on on-premise retailers and the anticompetitive effect on off-premise retailers. Assessing competitive effect necessarily entails such balancing. However, if the composition of retailers varies significantly from area to area, separate rule of reason analyses would be necessary.

Finally, defendants argue that the five brewer defendants have different market positions and therefore different reasons for imposing territorial restraints. For example, a small brewer may use the restraint to gain entry into a new market or expand its market share in an existing market. A larger brewer's reason may be **[*78]** to maintain quality or encourage the distributor to pay for advertising or otherwise promote the brewer's products. (Myslinski Affidavit, P 18). The reasons of each brewer must be considered individually to determine if they outweigh the anticompetitive effect of the restraint.

Not only may the reasons for imposing territorial restrictions vary from brewer to brewer, they may vary for a particular brewer among the various localities. A brewer possessing a dominant market position in one area of the state may hold only a small market share in another.

Plaintiffs asserted at oral argument that there are only two arguments defendants can make in defense of exclusive territorial distributorships. One is that the brewers need the incentive of an exclusive distributorship to encourage distributors to maintain quality and freshness of their stock. The other is that the territories are a needed incentive to induce distributors to share advertising costs with the brewers. (In the absence of the restraint unauthorized distributors could get a "free ride" on advertising paid for by the brewer and the authorized distributor.) Plaintiffs contend that the reasonableness of these justifications for **[*79]** the restraints applies uniformly to all distributors and brewers, and therefore can be established by common evidence.

There is no basis to assume that all of the brewers in this case are motivated by these two concerns. But even if they are, it is clear that there are numerous other reasons which have been put forward in justification of the restraints which do not apply to all brewers or to all localities. Taken together, the differences among the brewers and the competitive conditions in the various localities convincingly show that the question of whether procompetitive effects outweigh the anticompetitive effects of the restraints cannot be proved by common evidence. The proofs on this issue of retailers in one geographical area will be likely to differ from the proofs of retailers in other geographical areas. The proofs of certain kinds of retailers in the same geographical area are likely to differ from the proofs of dissimilarly situated retailers in that area.

B. Brewers' Horizontal Conspiracy

Plaintiffs claim that the defendant-brewers "engaged in consciously parallel behavior, resulting in a horizontal conspiracy to increase their prices by elimination of intrabrand competition, **[*80]** and an effective reduction of interbrand competition, by granting exclusive territories." (Plaintiffs' Brief in Support of Class Certification, pp. 77-78).

The Third Circuit has held that*HN20*[] to establish an antitrust violation on a claim of parallel business behavior, there must be "(1) a showing of acts by defendants in contradiction of their own economic interests, [and] (2) satisfactory demonstration of a motivation to enter an agreement." *Venzie Corp. v. United States Mineral Products Co., 521 F.2d 1309, 1314 (3d Cir. 1975)*.

Defendants contend that plaintiffs have failed to allege the acts or motivation necessary to satisfy these requirements, and, further, that plaintiffs have failed to demonstrate that these requirements can be established by common evidence.

Contrary to defendants' suggestion, plaintiffs have articulated a very plausible rationale for brewers' alleged conspiracy. They assert that if any one brewer permitted intrabrand competition for its products, the resulting drop in retail prices for that brewer's products would compel reduction of the prices of products of other brewers. Defendants are correct that *HN21*[] generally a manufacturer has an interest in maintaining intrabrand **[*81]** competition so as to keep retail prices low and sales high. *See Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 56 n. 24, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*. But plaintiffs' allegation is that each brewer's efforts to reduce or eliminate intrabrand competition have made it unnecessary for any of them to keep prices low in order to maintain sales.

Defendants also argue that there is no economic benefit to the brewers from a price increase at the wholesaler level, which they claim is where a distributional restraint creates an increase. Defendants ignore the possibility that distributors may be more willing to pay higher prices to brewers if they can in turn sell to retailers at artifically high prices.

Defendants also point out that in discovery plaintiffs admitted having no facts at that time as to whether the brewers had conspired among themselves. This is merely an assertion that plaintiffs will be unable to prove what they propose to prove and it cannot constitute a basis for denying class certification. *Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 176, 94 S. Ct. 2140, 40 L. Ed. 2d 732 (1974)*. Plaintiffs have not yet had the opportunity to obtain discovery on the merits of their case, since such discovery was stayed pending determination **[*82]** of the class certification motion.

Defendants' more serious argument is that plaintiffs will be unable to offer generalized evidence to prove the brewers' motivation on a common basis. Plaintiffs' counter-argument is that proving the motivation of each brewer is essential to the statewide conspiracy they are alleging. The problem with the argument that even the most individualized evidence is common because a conspiracy is charged is that it often proves too much. *See, e.g., Kendler v. Federated Department Stores, Inc., 88 F.R.D. 688, 693 (S.D.N.Y. 1981)* (*HN22*[] "Merely invoking the incantation 'conspiracy' does not insure that common question will predominate...."); *see also In re Hotel Telephone Charges, 500 F.2d 86, 89 (9th Cir. 1974)*. However, at least in certain contexts, the Third Circuit has accepted the argument. *See Bogosian v. Gulf Oil Co., 561 F.2d 434, 447, 453 (3d Cir. 1977)*; *City of Philadelphia v. Emhart, 50 F.R.D. 232, 233 (E.D. Pa. 1970)*. Here, where the proof that the brewers established exclusive territories is common (the agreements and the statistical data) and where plaintiffs allege a common motivation to enter an agreement to establish the territories, I believe the brewers' **[*83]** motivation can be proved on a common basis.

Defendants also claim that plaintiffs have failed to allege acts by the brewers contrary to their economic interest. They assert that any such proof would necessarily be individualized. Defendants themselves argue that manufacturers have an interest in keeping retail prices as low as possible. Yet by establishing exclusive distributorships, they would reduce the intrabrand competition that keeps those prices low. The establishment of exclusive territories therefore constitutes an act in contradiction of the brewers' own economic interests.

Plaintiffs should be able to establish those acts by common evidence. As is discussed above, the proofs needed to establish the territorial agreements can be commonly proved. *Bogosian v. Gulf Oil Co., supra.*

However, as is also discussed earlier, an essential element of retailer-plaintiffs' proof of a horizontal conspiracy at the brewer level is proof of an illegal vertical restraint between the brewers and distributors. *Illinois Brick, supra.*

Since proof of the unreasonableness of the vertical restraint cannot be made by common evidence, the claims based on horizontal brewer conspiracy cannot be established **[*84]** by common evidence either.

C. Distributors' Horizontal Conspiracies

Plaintiffs allege two sets of horizontal conspiracies among the distributor defendants. One is a uniform conspiracy among all the distributors to respect each other's territories. The second is a series of conspiracies among the distributors for each brewer to respect each other's territories for that brewer's products.

Both allegations state claims of horizontal market allocation which constitute per se violations whether or not they are accompanied by price-fixing. *United States v. Topco, 405 U.S. 596, 608-09, 92 S. Ct. 1126, 31 L. Ed. 2d 515 & n. 9 (1972)*. Therefore, to establish a violation, plaintiffs would have to prove that each of the distributors entered an agreement with other distributors to allocate territories. Although it has been held that establishing each distributor's intent to divide the market would entail individualized proof, *see* *Mekani v. Miller Brewing Co., 93 F.R.D. 506, 512 (E.D. Mich. 1982)* (class certification denied on claim of conspiracy among distributors where plaintiffs' obligation to show each distributor's agreement to fix prices and assign territories raised "inherently individual questions"), it appears to me that **[*85]** these are facts which each retailer would have to prove and thus are common to the class members.

II. Antitrust Impact

Even if the plaintiffs could prove the existence of an unreasonable restraint on their various claims, they would still have to prove antitrust impact or injury. ***HN23***[] Proof of impact is an essential element of any antitrust action. *Shumate & Co. v. National Association of Securities Dealers, 1973-1 Trade Cas. (CCH) P 74,512, 1973 U.S. Dist. LEXIS 13876 (N.D. Tex. 1973)*, *aff'd,* *509 F.2d 147 (5th Cir. 1975)*, *cert. denied, 423 U.S. 868, 96 S. Ct. 131, 46 L. Ed. 2d 97 (1975)*. This impact must be provable on a common basis in order for the class to be certified.

HN24[] To prove impact, a plaintiff must show that he suffered some loss in his business or property and that there is a causal relationship between the antitrust violation and the loss. *Bogosian, supra, 561 F.2d at 454*. Impact or causation is a distinct element of liability, independent of proof of a violation. It is also distinct from the matter of individual damages. *Shumate & Co. v. National Association of Securities Dealers, supra,* P 74,512 at 94,298.

In arguing that they can prove impact by common evidence plaintiffs rely heavily on *Bogosian.* At the conclusion of its definition of **[*86]** antitrust impact, the court there stated:

> ***HN25***[] There is absolutely no requirement that the loss be personal or unique to plaintiff, so long as the plaintiff has suffered loss in his business or property… Thus, when an antitrust violation impacts upon a class of persons who do have standing, there is no reason why proof of the impact cannot be made on a common basis so long as the common proof adequately demonstrates some damage to each individual. Whether or not fact of damage can be proven on a common basis depends upon the circumstances of each case.

Bogosian v. Gulf Oil Co., supra, 561 F.2d at 454. The court hypothesized that a plaintiff whose business had been destroyed by an anticompetitive practice would likely have to show individualized impact to recover on the basis of lost profits or going concern. But if a plaintiff charged that defendants have sold an article at supracompetitive prices, the nature of the proof could be common. *Id. at 455*. Regarding the tie-in case before it, the court stated:

> If, in this case, a nationwide conspiracy is proven, the result of which was to increase prices to a class of plaintiffs beyond the prices which would obtain in a competitive regime, an individual **[*87]** plaintiff could prove fact of damage simply by proving that the free market prices would be lower than the prices paid and that he made some purchases at the higher price. If the price structure in the industry is such that nationwide the conspiratorially affected prices at the wholesale level fluctuated within a range which, though different in different regions, was higher in all regions than the range which would have existed in all regions under competitive conditions, it would be clear that all members of the class suffered some damage, notwithstanding that there would be variations among all dealers as to the extent of their damage. "[The] burden of proving the fact of damage under *§ 4 of the Clayton Act* is satisfied by . . . proof of some damage flowing from the unlawful

> conspiracy . . .." *Zenith Radio, supra, 395 U.S. at 114, 89 S.Ct. at 1571 n. 9*. Under these circumstances, proof on a common basis would be appropriate. Even if the variation in price dynamics among regions or marketing areas were such that in certain areas the free market price would be no lower than the conspiratorially affected price, it might be possible to designate subclasses to conform with these variations. **[*88]** *See In Re Antibiotic Antitrust Actions, supra, 333 F.Supp. at 281*.

Id. at 455. The court remanded the case for consideration of whether impact could be proved on a common basis.

Plaintiffs here claim they can prove impact on a common basis by "showing that wholesale prices reached supracompetitive levels through the relevant market (the State of New Jersey)." Plaintiffs' economist suggests several methods for commonly establishing the supracompetitive pricing for the New Jersey market. One is to calculate a "yardstick" price structure based on the prices in a state without territorial restraints, taking account of differences in state taxes and transportation costs, and comparing that competitive pricing structure to New Jersey's. Another suggested method is to compare the price structure charged by independent, price-competitive distributors to those charged by the exclusive distributors. By these or other methods, plaintiffs expect to show that while prices may fluctuate within a range and may differ region to region, they are in a higher range in all regions of New Jersey than they would have been under competitive conditions.

Defendants launch a number of attacks on plaintiffs' argument. **[*89]** First, they assert that plaintiffs must show a uniform impact on prices statewide and that plaintiffs will be unable to do so. *Bogosian* makes clear that proof of uniform prices is unnecessary. Second, they claim that Professor Jordan's "yardstick" approach is unworkable. According to Dr. Myslinski, "New Jersey prices cannot be reasonably compared to prices in any other state without considering factors other than exclusive territories which would cause differences in beer prices across states." (Myslinski Affidavit, P 55). In fact, Jordan specifically proposes to work other factors such as state taxes and transportation costs into his model. I have no basis to conclude at this point that plaintiffs cannot construct a workable pricing structure taking account of the important factors causing price differentials.

Defendants also contend that to prove impact from supracompetitive prices plaintiffs must show that "but for" the alleged restraint they could and would have purchased an equivalent product elsewhere at a lower price. *Plekowski v. Ralston Purina Co., 68 F.R.D. 443, 449-50 (M.D. Ga. 1975)*, *appeal dismissed,* *557 F.2d 1218 (5th Cir. 1977)*; *Wagner v. Central Louisiana Electric Co., 1983-2 Trade Cas. (CCH) P 65,705 at 69,603-05, 1983 U.S. Dist. LEXIS 14299 (E.D. La. 1983)*.

This **[*90]** "but for" requirement has been discarded where common proof of impact can be shown. *See* *Bogosian v. Gulf Oil Co., supra, 561 F.2d at 455*. *Bogosian* held that where plaintiffs can show that prices were higher in all regions than they would have been absent the restraints, impact could be commonly proved. Implicit in this ruling is that if plaintiffs could prove this general rise in prices, they would not have to individually prove that they could have obtained the same product elsewhere at a lower cost. The *post-Bogosian* case of *Wagner, supra,* is distinguishable because it dealt with the heavily regulated electrical power industry in which government regulations may have made it impossible for plaintiffs to obtain the same product elsewhere.

Defendants respond that plaintiffs will be unable to prove that prices were higher in all regions than they would have been absent the restraint. For example, defendants contend that many small or rural retailers may be unable to show that they could have purchased beer at a lower price absent the restraint since transportation costs and low profit margins might make it unprofitable for other distributors to seek their business. Defendants also contend **[*91]** that large retailers who can make use of the quantity discounts offered by the exclusive distributors are not paying higher prices than they would absent the restraint.

Plaintiffs respond that while some retailers may have been hurt more than others, all retailers paid higher prices than they would have absent the restraint.

In *In re South Central States Bakery Products Antitrust Litigation, 86 F.R.D. 407 (M.D. La. 1980)*, plaintiffs alleged that defendant baking companies had conspired to restrain trade in and fix prices of bakery products and had implemented the conspiracy by fixing prices, rigging bids, eliminating or reducing discounts, and by allocating customers and territories.

Defendants in *Bakery Products* argued that impact (as well as conspiracy itself) had to be established on individual grounds because of the complexity of the price structure, trade areas, and types of purchasing arrangements which characterized the baking industry. *Id. at 419*. "Despite the complexity or variety of products, purchasers, pricing methods, and trade areas," the court believed that there was no "reason in doctrine" why impact could not be shown "'on a common basis as long as the common proof adequately **[*92]** demonstrates *some* damage to each individual.'" *Id. at 421*, *quoting* *Bogosian v. Gulf Oil Co., supra, 561 F.2d at 454*; *see also* *In re Fine Paper, supra, 82 F.R.D. at 153-54*. The court then found that plaintiffs' proposed evidence, which was to include the defendant-companies' pricing records and testimony from plaintiffs' economic expert, could establish impact on a common basis. *Id. at 422-23*. The court rejected the defendants' objection to plaintiffs' proposed proof - that the plaintiffs could not prove what they intended to prove - as inconsistent with the rule that a court shall not prejudge the merits of a case in determining class certification. *Eisen, supra.*

As in *Bakery Products,* defendants' contention here that plaintiffs will be unable to prove higher prices in all regions is simply an assertion that plaintiffs will be unable to prove what they propose to prove, and cannot serve as a basis for denying class certification. *Eisen v. Carlisle & Jacquelin, supra.*

However, plaintiffs' case differs from *Bakery Products* in an important respect. That case presented price-fixing allegations which required analysis under the per se standard. The territorial restrictions there were alleged **[*93]** merely as a mechanism by which the price-fixing conspiracy was carried out, not as independent antitrust violations as they are in this case. *Bakery Products, supra, 86 F.R.D. at 411, 421-22*; *see also* *Mekani v. Miller Brewing Co., supra, 93 F.R.D. at 509*.

The distinction between the two cases supports a serious challenge made by defendants to plaintiffs' anaylsis: that plaintiffs have improperly addressed the fact of injury analysis in this case as if this were a per se case instead of as a rule of reason case. As discussed earlier, ***HN26***[] in order to establish that vertical restraints constitute an unreasonable restraint on trade, it must be determined whether the restrictions' anticompetitive effects on intrabrand competition are not outweighed by their procompetitive effects on interbrand competition. *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 54-57, 97 S. Ct. 2549, 53 L. Ed. 2d 568*. In order to establish fact of damage, plaintiffs must show that the anticompetitive effects outweighed the procompetitive effects of the restraint as to each member of the proposed class, since at least some damage to each individual plaintiff must be shown. *Bogosian v. Gulf Oil Co., 561 F.2d 434, 454 (3d Cir. 1977)*. Unless **[*94]** this fact of damage to each class member can be established by common proof, class certification should be denied. *Id.* Therefore, even if plaintiffs can prove supracompetitive prices on a common basis, they cannot prove fact of damage by common means unless they have some common method for proving that procompetitive effects do not outweigh anticompetitive effects for any of the proposed class members.

Defendants suggest that fact of injury can never be proved by common evidence in a rule of reason case. To the contrary, there appears no reason in theory why common proof of impact cannot be proved in a rule of reason case. The crucial question is whether the presence or absence of procompetitive effects can be proved by common means. If, for example, the alleged justification for a restraint was a single countervailing benefit applicable to every member of the industry, the rule of reason aspect of impact would clearly be susceptible to common proof.

However, defendants here argue that for various types of retailers the added cost of beer due to the territorial restraint is outweighed by a number of different benefits from the territorial system which do not apply uniformly to all retailers, **[*95]** For example, for taverns and other draught beer retailers, the benefits of better or more reliable service may outweigh the burden of higher prices. Similarly, benefits may outweigh higher prices for an outlying rural retailer whom an exclusive distributor is now obliged by its brewer to service. In the absence of the exclusive distributorhsip, perhaps no distributor would find it profitable to deliver to such a retailer.

Defendants imply that the exclusive distributorships make possible quantity discounts which only large distributors have the inventory space to use. They argue that large retailers are therefore benefited by the territorial restraints while small retailers are not. This argument is somewhat suspect. Defendants themselves offered evidence that transshippers violating other distributors' exclusive territories are most interested in selling large quantitites to large retailers. (Defendant Brewers' Appendix to Brief in Opposition to Class Certification, Ex. 1 at 22-23). Despite the clear incentive to do so, defendants have not submitted testimony of any distributor who benefits from quantity discounts in support of the exclusive territories. There is no reason to assume **[*96]** at this point that there is a connection between the availability of quantity discounts and the existence of exclusive distributorships.

It might be argued on plaintiffs' behalf that even if some retailers derive some benefits from the restraints, the procompetitive effects of the restraints do not outweigh the anticompetitive effects for any retailer. However, there is no basis on which to draw this conclusion.

Plaintiffs' main response to defendants is to reiterate their contention that proof of the absence of procompetitive effects of a restraint is not a necessary element of their affirmative case and therefore need not be considered in fact of injury analysis. But even if defendants must raise procompetitive effects as a defense, *see* *Graphic Products Distributors v. Itek Corp., 717 F.2d 1560, 1571 (11th Cir. 1983)*; *but see* *Valley Liquors, Inc. v. Renfield Importers, Ltd., 678 F.2d 742, 745 (7th Cir. 1982)*, plaintiffs cannot prevail unless they can demonstrate that the anticompetitive effect is not offset by procompetitive justifications. *Itek, supra, 717 F.2d at 1573, n. 24*. An individual retailer cannot show fact of injury unless, as applied to it, anticompetitive effects outweigh **[*97]** procompetitive ones. In determining whether this case is certifiable under *Rule 23(b)(3)*, the question of whether impact can be commonly proved is unavoidable. Plaintiffs are wrong in asserting that fact of injury can be determined without ascertaining whether individual retailers are benefited more than they are hurt.

In support of their arguments, both plaintiffs and defendants analogize to per se cases discussing the propriety of class certification where the charging of supracompetitive prices is the sole element of proof of antitrust violation. *Nichols v. Mobile Board of Realtors, 675 F.2d 671 (5th Cir. 1982)*; *Klein v. Henry S. Miller Residential Services, 94 F.R.D. 651 (N.D. Tex. 1982)*; *Davis v. Northside Realty Associates, Inc., 95 F.R.D. 39 (N.D. Ga. 1982)*. These cases, which all involve allegations of conspiracy among real estate brokers to fix prices of commissions, are of very limited value in analyzing the question of whether plaintiffs can establish fact of injury by common evidence in a rule of reason case. Similary, *In re South Central States Bakery Products Antitrust Litigation, 86 F.R.D. 407 (M.D. La. 1980)*, which is essentially a price-fixing case, provides no guidance **[*98]** in a case where one must determine whether at least some class members suffered no injury because of redeeming, competitive effects of the challenged restraints.

As defendants suggest, the cases most analogous to this one may be those brought under the Robinson-Patman Act. ***HN27***[] Because of the requirement that disfavored customers show functional competition between themselves and favored customers, impact in class action claims brought under *§ 2(a) of the Robinson-Patman Act* has been held not provable by common evidence. *See* *Abernathy v. Bausch & Lomb, Inc., 97 F.R.D. 470, 473-75 (N.D. Tex. 1983)*, and cases cited therein. In this case, as in the Robinson-Patman cases, each plaintiff must show from its own competitive circumstances that it suffered at least some injury. This cannot be done on a common basis.

III. Calculation of Damages

HN28[] "[T]he necessity for calculation of damages on an individual basis should not preclude class determination when the common issues which determine liability predominate." *Bogosian v. Gulf Oil Co., supra, 561 F.2d at 456*; *accord* *In re Folding Carton Antitrust Litigation, 75 F.R.D. 727, 734 (N.D. Ill. 1977)*; *In re Corrugated Container Antitrust Litigation, 80 F.R.D. 244, 249 (S.D. Tex. 1978)*.

Plaintiffs **[*99]** and defendants dispute whether plaintiffs can prove damages on a classwide basis. However, since it is unnecessary for plaintiffs to do so, I need not address this issue.

IV. Superiority

HN29[] In addition to finding that common questions predominate, *Fed.R.Civ.P. 23(b)(3)* requires that the court determine whether "a class action is superior to other available methods for the fair and efficient adjudication of the controversy."

Several factors suggest that class treatment is superior here. Plaintiffs challenge what they allege to be an industrywide system of territorial restraints; according to their figures over 85% of the beer sold in New Jersey is distributed under this system. ***HN30***[] Efficiency suggests that the claims of all retailers affected by the practice be disposed of in a single lawsuit. *State of Illinois v. Harper & Row, 301 F. Supp. 484, 489-90 (N.D. Ill. 1969)*. "[B]ecause of the trememdous costs of discovery and trial that are presented in any alleged conspiracy among large business coporations, [plaintiffs] might not otherwise be able to pursue their claims." *In re Fine Paper Antitrust Litigation, 82 F.R.D. 143, 155 (E.D. Pa. 1979)*; *accord* *Weeks v. Bareco Oil Co., 125 F.2d 84, 90 (7th Cir. 1941)*. **[*100]** "[T]he purposes of the antitrust laws are best served by insuring that the private action will be an ever-present threat to deter anyone contemplating business behavior in violation of the ***antitrust law***." *Perma Life Mufflers, Inc. v. International Parts Corp., 392 U.S. 134, 139, 88 S. Ct. 1981, 20 L. Ed. 2d 982 (1968)*.

However,***HN31***[] one important factor in determining whether a class action is superior is the difficulty likely to be encountered in the management of the case. In *Arth Main Street Drugs v. Beer Distributors of Indiana, 1978 Trade Cas. (CCH) P 62,113, 1978 U.S. Dist. LEXIS 17312 (N.D. Ind. 1978)*, plaintiff beer retailers alleged that defendant beer distributors had conspired among themselves to allocate the wholesale beer market in Indiana. Plaintiffs sought to join as defendants all members of an Indiana beer distributors association, and the total number of defendants was estimated as 370 and the number of individual interests as over 150. The court found that the requirement of superiority was not met and so did not address any of the other requirements for certification. The court's concern focused mainly on the manageablity of the trial. It anticipated that a jury might not "be able or willing to apply to each individual defendant **[*101]** only the evidence applicable to him." *Id. at 74,930*. Second, the court noted that certification of a plaintiff class would significantly increase the interest of each defendant in obtaining separate counsel and that it could become impossible to conduct a manageable and fair trial with so "many, many lawyers working the same trial in the same courtroom." *Id. at 74,931*.

Contrary to defendants' argument, the problems encountered in *Arth* are not similar to those which may arise here. There are far fewer parties in this case. But while the number of defendants is manageable here, problems are presented by the need to undertake numerous, individualized rule of reason analyses. Because of a lack of common questions and the need to conduct individualized inquiries, the class action is not superior here.

V. *Rule 23(a)* Requirements

1. Numerosity

It is clear and defendants do not attempt to refute that it would be entirely impracticable to join the approximately 12,000 members of the proposed plaintiff class. Plaintiffs have satisfied the numerosity requirement. *See* *State of Illinois v. Harper & Row Publishers, Inc., 301 F. Supp. 484, 486 (N.D. Ill. 1969)*.

2. Common Question of Law or Fact

Plaintiffs **[*102]** have alleged a system of territorial agreements covering the entire state and having a statewide impact on the beer distributor market. There is no doubt that many common questions are presented.

Only the brief submitted by defendant Beer Wholesalers' Association of New Jersey and seven defendant distributors contends that plaintiffs have failed to satisfy the *Rule 23(a)* commonality requirement. The argument made is that plaintiffs' claim of a statewide conspiracy among the distributors is frivolous, and that denial of certification is appropriate where a preliminary inquiry shows that a movant has no case on the merits. Defendants' suggestion that plaintiffs will fail on the merits is not a valid factor in a class certification determination. *City of Philadelphia v. American Oil Co., 53 F.R.D. 45, 61 (D.N.J. 1971)*. Furthermore, even in the light of the evidence now before the court, it is clear that plaintiffs' claims are not frivolous.

3. Typicality

Courts have generally held that the typicality requirement adds little to the class certification analysis not provided for elsewhere in Rule 23. *E.g., In re Master Key Antitrust LItigation, 70 F.R.D. 23, 26 n. 4 (D. Conn. 1975)*. In addressing **[*103]** the typicality requirement the court in *Bogosian v. Gulf Oil Co., supra, 561 F.2d at 449*, stated:

> The claims pressed by the representatives are identical to those which they press on behalf of the class generally. Beyond this general observation there appears to be nothing which would fall under this rubric which is not also covered by one of the other subsections.

In this case, plaintiffs do press the same claims for themselves as they do for the class. Each member of the plaintiff class is precluded from buying defendant brewers' beer from any distributor but the one in whose territory the class member is located. The differences among the retailers do not affect the typicality of the claim. *In re Alcoholic Beverages Litigation, 95 F.R.D. 321, 324 (E.D.N.Y. 1982)*; *City of Philadelphia v. American Oil Co., 53 F.R.D. 45, 52 (D.N.J. 1971)*.

Defendants contend that because Wine & Spirits seeks only injunctive relief, which must be established by different proof than a damage claim, its claims are not typical of those of the class. Wine & Spirits seeks to represent the class only as to the claims for injunctive relief. For this limited purpose, its claims are identical to those which it presses **[*104]** on behalf of the class. The two retailer plaintiffs seek to represent the class on the damage claims (as well as on the injunctive claims).

4. Fair and Adequate Representation

Defendants contend that conflicts within the plaintiff class make it impossible for the named plaintiffs to adequately represent the class.

First, defendants cite an alleged conflict between small retailers like the named plaintiffs who cannot take advantage of quantity discounts and larger retailers who can. Defendants contend that one of the purposes of both named plaintiffs in this suit is to eliminate quantity discounts. In a case challenging a state alcoholic beverage commission regulation prohibiting quantity discounts, class certification was denied because of the possibility of conflicts among class members on the subject. *Miller v. Hedlund, 1983-2 Trade Cas. (CCH) P 65,754 at 69,841, 1983 U.S. Dist. LEXIS 13705 (D. Ore. 1983)*.

On deposition the named plaintiffs did state their views regarding quantity discounts. Package Shop owner Maurice Bierman recited his personal opposition to them. (Bierman Dep. at 86-90). However, Shalbor owner Allen Borsky specifically stated that he did not want to eliminate quantity discounts, but rather wanted **[*105]** to "take advantage of quantity discounts like anybody else." (A. Borsky Dep. at 69).

But whatever the named plaintiffs' personal views, this case challenges the system of exclusive territories, not the system of quantity discounts. No evidence has been submitted establishing that the use of quantity discounts is dependent on the existence of exclusive territories. Defendants have not offered the testimony of any users of quantity discounts that they support exclusive territories. At this point, there is no reason to believe that those who can and cannot make use of the discounts will have adverse interests on the question of exclusive territories. ***HN32***[] Antagonisms within a class justifying denial of certification must relate to the subject matter of the suit. *Sperry Rand Corp. v. Larson, 554 F.2d 868 (8th Cir. 1977)*. If at a later time conflicts appeared between retailers who use the discounts and those who do not, subclasses could be created. *Fed.R.Civ.P. 23(c)(4)(B)*.

Defendants similarly argue that conflicts exist between retailers which prefer higher product quality and reliable service, even at a higher price, and those which would prefer lower prices. Defendants contend that the exclusive **[*106]** distributor system makes possible the higher quality and service and that, consequently, some of the plaintiff class support the exclusive territories. Plaintiffs contend that elimination of the exclusive territories would improve service competition as well as price competition. While such conflicts may well exist, there is no reason to assume at this early stage that price-oriented and service-oriented retailers necessarily have adverse interests with regard to the exclusive territories. Similarly, none of the other distinctions among retailers raised by defendants (cooperative/non-cooperative; rural/urban) have been proved to create adverse interests with regard to exclusive territories. Conflicts which might arise later could be handled through the creation of subclasses.

Defendants also claim that plaintiffs cannot be adequate representatives since their suit is opposed by the "most prominent and credible retail liquor store association in the state," the N.J.L.S.A. This argument is without merit since it is factually inaccurate. Prior to oral argument in this case the N.J.L.S.A. did not take a position against this suit, and, in fact, sought a law firm's opinion regarding whether **[*107]** to enter it. That firm stated there was merit to the case and expressed interest in representing the N.J.L.S.A. in the litigation.

It is apparently true that Leo Bromley, past president of the N.J.L.S.A., opposes this suit. But he has undercut his own credibility by the seriously misleading statements made in his affidavit. Furthermore, the current president of the N.J.L.S.A., Anthony Calvino, fully supports this lawsuit.

Defendants suggest that plaintiffs are not adequate representatives because they lack the financial commitment to see the litigation through. The retailer plaintiffs freely admit that they cannot pay for this litigation. But Wine & Spirits has over $ 350,000 at its disposal and claims to have authorized an unlimited amount of these funds for this case. Plaintiffs' attorneys stated that they are handling the case on a contingency basis; plaintiffs have adequate funds to carry out their obligation to pay the costs of the litigation.

Defendants assert that Wine & Spirits' commitment is not "real". They note that Wine & Spirits' trustees, who apparently authorized this expenditure, have acted in contravention of applicable New Jersey corporation law.

While there are irregularities **[*108]** in how Wine & Spirits is run, the organization has authority to make a financial commitment to this case. The settlement of the liquor distribution suit, in which the organization obtained the funds it plans to use here, clearly provided that the funds could be used for a purpose such as pursuing this case. There seems little doubt that this case would be adequately funded.

Defendants also contend that if Wine & Spirits is dismissed for lack of standing, the remaining named plaintiffs will not be able to make the necessary financial commitment. But if Wine & Spirits authorizes funding of the other named plaintiffs' suit, its dismissal would not alter the adequacy of representation.

VI. Standing

Wine & Spirits Retailers of New Jersey, Inc. does not have standing on its own behalf to seek injunctive relief under *Section 16* of the Clayton Act, *15 U.S.C. § 26*. Wine & Spirits itself cannot show the injury resulting from an antitrust violation which is necessary to have standing. *See* *Hawaii v. Standard Oil Co., 405 U.S. 251, 260-62, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972)*. Therefore, to remain a plaintiff in this case Wine & Spirits must show that it has standing to sue for injunctive relief in a representative capacity on **[*109]** behalf of its members.

In *Hunt v. Washington Apple Advertising Comm'n, 432 U.S. 333, 343, 97 S. Ct. 2434, 53 L. Ed. 2d 383 (1977)*, the Supreme Court ruled that ***HN33***[] an association has standing to sue on behalf of its members if:

> (a) its members would otherwise have standing to sue in their own right; (b) the interests it seeks to protect are germane to the organization's purpose; and (c) neither the claim asserted, nor the relief requested, requires the participation of individual members in the lawsuit.

HN34[] The *Hunt* standards apply to the question of associational standing in antitrust actions. *E.g.,* *Associated General Contractors of North Dakota v. Otter Tail Power Co., 611 F.2d 684, 690 (8th Cir. 1979)*; *De Gregorio v. Segal, 443 F.Supp. 1257, 1264 (E.D. Pa. 1978)*.

Wine & Spirits clearly meets the first two requirements. Regarding the first criterion, Wine & Spirits' beer retailer members certainly would have standing to sue as long as they bought defendant brewers' beer from any of the defendant distributors. Wine & Spirits contends it has no non-retailer members. But even if it has some non-retailer members or if some of its members do not purchase the defendant brewers' beer from the defendant distributors, Wine & Spirits could **[*110]** still have standing to sue on its members' behalf. In *National Constructors Ass'n v.*

National Electrical Contractors Ass'n, Inc., 498 F.Supp. 510, 520 (D. Md. 1980), *modified on other grounds and aff'd, 678 F.2d 492 (4th Cir. 1982), cert. denied, 463 U.S. 1234 , ___ L. Ed. ___ , 104 S. Ct. 26, 77 L. Ed. 2d 1449 (1983)*, the court did "not read ***HN35***[] *Hunt* to require that each of an association's members have independent standing." It held as sufficient for associational standing purposes that "a significant portion of the association's members" would have had individual standing.

The interests which Wine & Spirits seeks to protect are germane to its purpose. The organization's bylaws provide that its purposes are, inter alia, "(2) [t]o protect and defend the Members from harm or damage … [and] (9) [t]o engage in activities of mutual benefit to the Members." As defined in the stipulation of settlement in the liquor price-fixing litigation, the uses to which Wine & Spirits could put the funds it recovered were fostering the retail alcoholic beverage industry in New Jersey, enforcing laws and otherwise representing the interests of the retail alcoholic beverage industry.

Defendants contend that the interests Wine & Spirits **[*111]** seeks to protect are adverse to the organization's purpose of protecting its members from damage or harm. They allege that members of Wine & Spirits which are large and make use of quantity discounts will be harmed by this lawsuit. This view assumes both a conflict within the membership of Wine & Spirits as to quantity discounts and that the system of exclusive territories affects quantity discounts. At least Maurice Bierman, president of Wine & Spirits, does believe that the small retailers pay for the discounts that the large quantity buyers get. (Bierman Dep. at 86). But defendants have not demonstrated that the system of exclusive distributorship is responsible for the manner in which discounts are handled, and so there is no evidence that this lawsuit raises the potentially divisive issue of quantity discounts. No recipient of quantity discounts, whether a member of Wine & Spirits or not, has submitted evidence that it benefits from the territories because of quantity discounts. Therefore, defendants have failed to show that the purpose of the organization of protecting its members is not served by this lawsuit. *National Constructors Ass'n, supra, 498 F.Supp. at 521*. The fact **[*112]** that Wine & Spirits' primary method of serving the interests of its membership is through litigation does not detract from its argument in support of its standing to sue on the members' behalf. *Consumers Union of the United States v. Miller, 84 F.R.D. 240, 244 (D.D.C. 1979)*.

HN36[] The third criterion of the *Hunt* test requires consideration of two questions: (a) whether the nature of the claims involves individualized proof, and (b) whether the association is competent to speak for its members. *National Constructors Ass'n, supra, 498 F.Supp. at 521*.

Plaintiffs emphasize that Wine & Spirits, unlike the retailer plaintiffs, seeks only injunctive relief. For this reason, they claim the participation of individual members will not be necessary. However, the rule of reason analyses required in this case do necessitate individualized proofs. There is no way that Wine & Spirits can prove the unreasonableness of the vertical restraints without presenting individualized evidence of the various retailers' competitive circumstances showing that the anticompetitive effects of the restraints outweigh the procompetitive effects. Proof of violation and of fact of injury, which would be necessary to obtain **[*113]** even injunctive relief, cannot be made by generalized proof which Wine & Spirits alone could provide.

The question of whether Wine & Spirits can legitimately speak for its members turns on whether the organization, in fact, does have a true membership. In *Health Research Group v. Kennedy, 82 F.R.D. 21 (D.D.C. 1979)*, two public interest organizations brought suit to challenge certain drug regulations of the Food and Drug Administration. The court held that the organization lacked standing to sue because the "contributors" and "supporters" on whose behalf they purported to sue did not have "indicia of membership". *Id. at 26*. In the court's view there was "a material difference of both degree and substance between the control exercised" by contributors or supporters and by members. One key facet of this difference was that members "regularly elect their governing body." *Id. at 27-28*. Another was that the members have "an opportunity to influence their representatives or positions related to the particular injury at issue." *Id.*

The court interpreted *Hunt* to require "some very substantial nexus between the organization and the parties it purports to represent." *Id. at 26*. In *Hunt,* the court **[*114]** was concerned with whether the plaintiff state Apple Advertising Commission actually operated like a "traditional, i.e., a voluntary membership trade organization." In holding that it was like a trade organization, and therefore had standing, the *Hunt* Court relied on three characteristics of the organization. The most relevant of these characteristics was that the apple growers and dealers had "indicia of membership" in the Commission, which therefore "in a real sense … represent[ed] the State's growers and dealers and provid[ed] the means by which they express[ed] their collective views and protect their collective interests." *Hunt v. Washington Apple Advertising Comm'n, supra, 432 U.S. at 345*. The indicia of membership were that (a) the growers and dealers elected the Commission's members, (b) they alone served on the Commission and (c) they financed its activities, including the cost of the particular lawsuit. *Id. at 344-45*.

Wine & Spirits is clearly more of a membership organization than were the two organizations in *Health Research Group v. Kennedy, supra.* In that case, the Public Citizen, the umbrella organization, had no formal continuing relationship with its contributors and **[*115]** supporters, who did not elect its board of directors and who had no direct control over it. In fact, Public Citizen was expressly structured as a non-membership organization to promote efficiency. *Id. at 27*.

In contrast, the president and vice-president of Wine & Spirits were elected at a public meeting when the organization was formed. For its 1979 battle over "deregulation", Wine & Spirits received contributors from 575 retailers, whom it now considers members. Wine & Spirits apparently issues newsletters to members, has represented the retailers' interests at A.B.C. hearings, and has pursued three major pieces of litigation, including this one, on behalf of retailers. As a result of its liquor antitrust settlement 691 retailers recovered damages from the state liquor wholesalers.

However, there is serious question about Wine & Spirits' status as a membership organization. The membership consists exclusively of a group of contributors to the 1979 anti-deregulation effort. No dues have ever been assessed or paid. The members do not finance the organization, except indirectly, through their one-time contribution. But the members have never given money for anything other than the anti-deregulation **[*116]** effort, and I conclude that they do not finance the organization. *Hunt v. Washington Apple Avertising Comm'n, supra, 432 U.S. at 344-45*.

Under New Jersey law, an organization such as Wine & Spirits must govern itself in accordance with its bylaws. *See* N.J.S.A. 15A generally. The Wine & Spirits bylaws call for annual membership meetings. Since the organization's founding in 1979, there have been only three meetings, the last one being in 1980 or 1981. Under the bylaws, officers and the board of trustees are to be elected annually. Aside from an informal election of a few officers at the first meeting in 1979, there have been no elections of either officers or trustees. The organization essentially is run by people who are self-appointed, a fact which weighs heavily against its being considered a membership organization. *Hunt v. Washington Apple Advertising Comm'n, supra, 432 U.S. at 344-45*.

Several Wine & Spirits trustees are not beer retailers. The organization therefore does not possess the third *Hunt* indication of membership: that members alone serve in the organization. *Id.*

Significantly, the alleged members of the organization did not vote to bring this lawsuit. Plaintiffs contend **[*117]** that the organization keeps a regular correspondence with its members, and therefore is in touch with the membership's opinions. It is true that Wine & Spirits sends regular newsletters to members and its officers and trustees receive back letters and telephone calls from them.

Despite this contact there is no evidence that a majority of the membership would have approved this lawsuit. It is admitted that membership approval was not sought before suit was filed. More importantly, it does not appear that the membership can control the actions of the officers and trustees, most of whom they did not elect. There is an important difference between having the opportunity to express opinions through letters or telephone calls and the power to control the activities of an organization. *Health Research Group v. Kennedy, supra, 82 F.R.D. at 27-28*. The alleged members of Wine & Spirits do not have the control over the organization which would give it standing to sue on their behalf.

Conclusion

For the reasons set forth above I conclude that although plaintiffs meet a number of the Rule 23 class action criteria, the necessity to make a reasonableness determination with respect to the most critical **[*118]** conspiracies alleged in this case requires a finding that questions of fact common to the members of the class do not predominate over questions affecting only individual members and that a class action is not superior to other available methods for the fair and efficient adjudication of the controversy. Therefore plaintiffs' motion for class certification will be denied.

Further, for the reasons set forth above defendants' motion to dismiss from the case plaintiff Wine & Spirits Retailers of New Jersey, Inc. will be granted.

Defendants' counsel are requrested to submit an appropriate form of order.

Antitrust & Trade Law > Clayton Act > General Overview

HN3[] **Antitrust & Trade Law, Clayton Act**

In an antitrust action, federal case law requires a plaintiff to prove three essential elements: 1) a violation of the statute, 2) injury to a person's business or property proximately caused by the violation, and 3) actual damages.

Civil Procedure > Pretrial Matters > Motions in Limine > General Overview

HN4[] Pretrial Matters, Motions in Limine

A motion in limine may be used by a trial court to exclude prejudicial matter from a jury.

Counsel: Attorneys for Appellants: Kevin P. Wallace, Auburn, Indiana P. Michael Miller, Miller & Stewart, Fort Wayne, Indiana.

Attorneys for Appellee: David A. Kruse, Kruse, Kruse & Cherry, Auburn, Indiana Mark Paul Smith, Krueckeberg and Smith, P.C., Fort Wayne, Indiana.

Judges: Garrard, J. Staton, P.J., concurs; Hoffman, J., concurs and files separate opinion.

Opinion by: GARRARD

Opinion

[*584] Gene Mavis (Mavis) was a losing bidder for a contract to provide radio communications equipment to the Auburn Fire Department in June 1973. Mavis brought a private action for treble damages pursuant to *IC 24-1-2-3* and *IC 24-1-2-7* against the City of Auburn (city) and D & L Communications, Inc. (D & L). Mavis alleged that prior to open and competitive bidding the city and D & L contrived to develop specifications favoring equipment sold by D & L such that they violated the antitrust statute. Mavis claimed as damages the time spent in preparing his bid. In the second jury trial [1] on this matter, Mavis obtained a **[*585]** verdict of $1,458.00 (three times his actual damages) **[**2]** and $17,092.00 in attorney fees.

Restated, the issues on appeal are:

1) What are the essential elements of a private antitrust action under *IC 24-1-2-3* and -7 and has the plaintiff proven them by a preponderance of the evidence?
2) Did the trial court err in excluding evidence at trial which it had determined to be prejudicial when it granted plaintiff's motion in limine prior to trial?

Issue 1

HN1[] *IC 24-1-2-3* [2] **[**4]** makes unlawful acts which operate to restrain open and free competition in bidding to **[**3]** obtain contracts for private or public work. **HN2[]** Under *IC 24-1-2-7* [3] a person injured in his business or property by a violation of this statute may bring a civil action seeking treble damages, costs and attorney fees.

---

[1] Mavis had originally brought suit in 1974 in DeKalb Circuit Court which had entered summary judgment for the city. The Court of Appeals reversed the grant of summary judgment in a memorandum decision, *Mavis v. City of Auburn* (1980), No. 3-*178 A 24*. After a jury verdict for Mavis in Steuben Circuit Court in October 1981, the trial court granted the city's motion to correct errors and ordered a new trial. In March 1983 Mavis received a second verdict which forms the basis for this appeal.

[2] "Restricting competition -- Penalty. -- Any and all schemes, designs, understandings, plans, arrangements, contracts, agreements or combinations to limit, restrain, retard, impede or restrict bidding for the letting of any contract for private or public work, directly or indirectly, or to in any manner combine or conspire to stifle or restrict free competition for the letting of any

Due to the dearth of decisions under *IC 24-1-2-3* & -7, Indiana courts use decisional law under the similar federal ***antitrust law***, Section 4 of the Clayton Anti-Trust Act, ***HN3***[] *15 USC Section 15*. *Sandidge v. Rogers (S.D. Ind. 1958), 167 F. Supp. 553*. Federal case law requires a plaintiff to prove three essential elements: 1) a violation of the statute, 2) injury to a person's business or property proximately caused by the violation, and 3) actual damages. **[**5]** *M.C. Manufacturing Co., Inc. v. Texas Foundries, Inc. (5th Cir. 1975), 517 F.2d 1059*; *Citizens National Bank of Grant County v. First National Bank in Marion (1975), 165 Ind. App. 116, 331 N.E.2d 471*.

The city maintains that Mavis failed to prove an essential element of his claim, i.e. a violation which caused his damages. In addition, they claim that damage claims for lost time in preparing bids are not cognizable under ***antitrust law*** without proof that the plaintiff would have received the contract but for the violation, citing *M.C. Manufacturing Co., Inc., supra; Ovitron Corporation v. General Motors Corporation (2d Cir. 1975), 512 F.2d 442*; *Urban Products International, Ltd. v. National Disposal Service (1975), 32 Ill. App. 3d 299, 336 N.E.2d 138*; and *A.J. Goodman & Son, Inc. v. United States Lacquer Mfg. Corp. (D. Mass. 1949), 81 F. Supp. 890*.

All four of the city's cases cited above are distinguishable on the same ground. In each case the court held that the plaintiff failed to prove it would have received the contract but for the violation. However, **[*586]** each case involves a damage claim for lost profits. Thus, it would be necessary to establish **[**6]** that the claimant would have received the contract except for the violation in order to establish that the sought-for damages were the natural and probable consequence of the violation. Mavis' damage claim is not for lost profits but is premised on a violation of the statute *prior* to the submission of bids and the award of the contract. His damages resulted not from the award of the contract but from the collusion between the city and D & L in establishing specifications favoring D & L's equipment. But for the violation, i.e. the collusion prior to competitive bidding, Mavis' time spent in preparing a bid would not have been wasted.

The purpose of the antitrust act is to:

> ". . . . prevent fraud and collusion in the letting of contracts and to protect trade and commerce against unlawful restraints and monopolies. To accomplish these ends the legislature has seen fit to incorporate into the statute different remedies and drastic measures for the punishment of those who violate its provisions, and for the relief of those who suffer on account thereof."

Royer v. State ex rel. Brown (1916), 63 Ind. App. 123, 112 N.E. 122. As the United States Supreme Court held **[**7]** in *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc. (1977), 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690*, plaintiffs must prove an:

> ". . . . injury of the type there antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anti-competitive effect either of the violation or of anti-competitive acts made possible by the violation. It should, in short, be 'the type of loss that the claimed violations . . . . would be likely to cause.' *Zenith Radio Corp. v. Hazeltine Research,* 395 U.S. at 125."

---

contract for private or public work, are hereby declared illegal, and any person who shall directly or indirectly engage in any scheme, design, understanding, plan, arrangement, contract, agreement or combination to limit, restrain, retard, impede or restrict bidding for the letting of any contract for private or public work, or in any manner combine or conspire to stifle or restrict free competition for the letting of any contract for private or public work, shall be deemed guilty of a misdemeanor, and upon conviction shall be fined in any sum not exceeding five thousand dollars [$5,000], to which may be added imprisonment in the county jail or workhouse for a term of not more than one [1] year, in the discretion of the court or jury trying the cause. [Acts 1907, ch. 243, Sec. 3, p. 490.]" (amended by Acts 1978, P.L. 2, Sec. 2404.)

[3] "Private action -- Damages -- Penalty. -- Any person who shall be injured in his business or property by any person or corporation by reason of the doing by any person or persons, of anything forbidden or declared to be unlawful by this act [Secs. 23-116 -- 23-127], may sue therefor in the circuit or superior court of any county in which the defendant or defendants, or any of them, reside or are found without respect to the amount in controversy, and shall recover a penalty of three-fold the damages which may be sustained, together with the costs of suit, including a reasonable attorney's fee. [Acts 1907, ch. 243, Sec. 7, p. 490.]"

The city and D & L do not dispute the trial court's judgment that a violation of the statute occurred. The city maintains that Mavis' expenses of preparing a bid are the type inherent in any competitive bidding. However, this position ignores the fact that the bidding was no longer competitive after the violation. When the bidding was no longer open and competitive due to collusion between the government and a favored bidder, injury in the form of lost time in preparing a useless bid was a direct result of the antitrust violation. It is the type of injury which the antitrust laws intend to prevent **[**8]** and the type of injury which naturally flows from what makes the defendant's acts unlawful. *Brunswick, supra.*

Issue 2

The city maintains that the trial court erred in granting Mavis' motion in limine and in excluding evidence at trial that the city properly considered various factors which led them to award the contract to D & L.

HN4[] A motion in limine may be used by a trial court to exclude prejudicial matter from a jury. *Beta Alpha Shelter of Delta Tau Delta Fraternity, Inc. v. Strain* (1983), *Ind. App., 446 N.E.2d 626* (transfer denied); *Burrus v. Silhavy (1973), 155 Ind. App. 558, 293 N.E.2d 794*. Mavis sought, *inter alia,* a court instruction to the defendants that they might not interrogate witnesses or refer to the following in the jury's presence. Whether or not:

> "General Electric or D & L Communications, Inc. was the best bid or that plaintiff Mavis' bid was not the best bid. *IC 24-1-2-3* permits no defense based on this fact. The end does not justify the means. The issue is whether the defendants violated the prohibitions in *IC 24-1-2-3* not whether they chose the best bid. Neither is it relevant to show that Mavis was not the best bid by evidence **[**9]** of service dissatisfaction, etc."

Transcript at 31.

The city asserts that Mavis' allegation in his complaint that the city "had a predetermined and fixed disposition to award the **[*587]** bid to D & L" allowed them to defend with evidence that they considered various factors between the date the bids were submitted and the date the contract was awarded. Mavis counters that this would have resulted in prejudice to him by allowing the city to maintain that regardless of any violation they would have given D & L the contract.

Mavis' complaint alleged that the city arranged prior to the bidding to have D & L prepare the equipment specifications with details favoring D & L's equipment. The issues for the jury centered on whether or not there was: 1) a violation of the statute, 2) injury to Mavis' business or property proximately caused by such violation, and 3) damage sustained by Mavis. Thus, the violation, the injury caused thereby and the damages resulting therefrom are all alleged to have occurred prior to the bidding. Therefore, evidence of the factors the city subsequently considered are irrelevant to the issues before the jury and therefore would be prejudicial **[**10]** to Mavis. *Burrus, supra.* Therefore, we affirm the trial court's grant of the motion in limine and its subsequent ruling thereon and affirm the entry of judgment for Mavis.

Affirmed.

Concur

HOFFMAN, J., CONCURRING OPINION

I concur in the majority opinion on Issue 1 but concur only in the result on Issue 2.

A ruling on a motion in limine raises no issue on appeal. The issue on appeal is the ruling by the court when the evidence is offered at the trial. In this case an offer to prove was made during the trial and refused by the trial court. The ruling was proper and thus the court committed no error.

Opinion by: BRIGHT

Opinion

[*1340] BRIGHT, Circuit Judge.

Dr. Virgil L. Hayden brought this action in federal district court against the Jefferson Regional Medical Center (Medical Center), its administrator, and eight doctors on the hospital medical staff. He alleged that in taking disciplinary action against him, defendants 1) denied him equal protection and due process in violation of the *fourteenth amendment* and *42 U.S.C. § 1983*; 2) conspired to form a group boycott against him and combined to assert monopoly power in violation of *sections 1* and *2* of the **[**2]** Sherman Antitrust Act; 3) made defamatory statements about him; and 4) interfered with and conspired to interfere with his business relationships. The district court granted defendants' motion for summary judgment on the *section 1983* and Sherman Act claims and, after a bench trial, entered judgment for defendants on the other claims.

Hayden appeals, contending that the district court erred in 1) denying his motion to discover certain medical records; 2) dismissing his *section 1983* claim for failure to show state action; 3) dismissing his Sherman Act claims for lack of subject matter jurisdiction; 4) finding that defendants' statements were not defamatory; 5) finding that defendants did not interfere with his prospective business relationships; and 6) finding that defendants followed the Medical Center's bylaws in conducting disciplinary proceedings against him. We reject these contentions and affirm the district court.

I. BACKGROUND.

Hayden practiced obstetrical-gynecological medicine at the Medical Center from July 1973 until his resignation on January 15, 1982. The events leading to his resignation began on December 4, 1979 when Dr. Mary Ellen Jenkins, an anesthesiologist, **[**3]** wrote to the Obstetrics-Gynecology (OB/GYN) Department questioning whether a cesarean section Hayden performed had been necessary. Defendant Calvin Bracy, M.D., the chairperson of

* The HONORABLE STEPHEN N. LIMBAUGH, United States District Judge for the Eastern and Western Districts of Missouri, sitting by designation.

OB/GYN Department, appointed a committee consisting of several doctors in the department to review Dr. Jenkins' complaint. The committee concluded that Hayden's performance of two cesarean section operations [1] was inappropriate and, after a meeting of the entire department at which Hayden was present, forwarded their conclusions to the Executive Committee of the Medical Staff.

At the direction of the Executive Committee, an OB/GYN departmental ad hoc committee investigated further to determine whether corrective action should be taken against Hayden. The ad hoc committee notified Hayden of its proceedings and afforded him an opportunity to respond to the charges. **[**4]** On March 11, 1980, the Executive Committee agreed to the ad hoc committee's recommendation of corrective action and required Hayden to obtain mandatory consultations on all cesarean sections **[*1341]** for six months. At Hayden's request, another committee conducted a hearing to consider the propriety of the corrective action and agreed with the Executive Committee's decision.

In September 1980, the members of the OB/GYN Department reviewed the charts for Hayden's cesarean operations for the previous six months. They recommended to the Executive Committee that his probation continue until February 1, 1981 and that he attend two weeks of continuing education in obstetrics. At Hayden's request, the Executive Committee appointed a disinterested expert to review his charts. The expert, Dr. Ralph Wynn, chairperson of the OB/GYN Department at the University of Arkansas Medical School, reported that Hayden's failure to document the need for the cesarean sections that led to the original complaint justified the requirement that he obtain mandatory consultations, but noted that Hayden acted appropriately in performing cesareans during his probation. Dr. Wynn recommended that the compulsory **[**5]** consultations be discontinued so as not to expose the consulting physicians to liability, and suggested that the department monitor Hayden's cesarean patients for six more months. On October 28, 1980, the Executive Committee adopted these recommendations, adding its directive that Hayden obtain voluntary consultations for the next six months and that he voluntarily obtain two weeks of continuing education.

In April 1981, the Executive Committee inquired whether Hayden had complied with its mandates and recommendations. Hayden informed the committee that he did not obtain post-graduate education because he could not find other physicians to cover his patients for him, and that he was no longer seeking consultations on his cesarean cases because only two physicians would provide consultations. At the direction of the Executive Committee, a control committee of the OB/GYN Department reviewed Hayden's cesarean charts for the previous six months. The committee concluded that Hayden had exercised poor medical judgment in six of the thirty cases they examined. On May 18, 1981, after reviewing Hayden's medical charts, the entire OB/GYN Department unanimously agreed with this conclusion. **[**6]** The department members reported that Hayden had met efforts to assist him with hostility and they disassociated themselves from him. On the basis of these reports, the Executive Committee revoked Hayden's privileges, but noted that its decision would not be effective until he exhausted his appeals.

In accordance with the Medical Center's bylaws, the Executive Committee asked Dr. Bracy to form an ad hoc committee to investigate the revocation of Hayden's privileges. The ad hoc committee discussed with Hayden the charts indicating that he had exercised poor medical judgment and recommended that his privileges be revoked. On June 30, 1981, the Executive Committee examined members of the ad hoc committee and Hayden, and agreed once again to revoke Hayden's privileges.

Hayden appealed this decision to another ad hoc committee. The ad hoc committee concluded that the evidence did not support the decision to revoke Hayden's privileges, but recommended that he participate in a post-graduate obstetrics program of not less than thirty days. Based on this report, the Executive Committee recommended that Hayden's privileges not be revoked, but recommended that he obtain ninety days of **[**7]** post-graduate education within the next six months. After the doctors in the OB/GYN Department agreed to provide coverage for Hayden,

---

[1] Although Dr. Jenkins' December 1979 letter questioned Hayden's performance of only one cesarean section, she also had questioned his performance in another case.

the Governing Board of the Medical Center affirmed the decision of the Executive Committee on December 17, 1981.

Hayden closed his Pine Bluff practice on January 15, 1982, and relocated in Sidney, Montana. On November 17, 1982, he brought this action in federal district court.

II. DISCUSSION.

A. Discovery Ruling.

Hayden contends that the district court erred in denying his motion to discover **[*1342]** medical records pertaining to cesarean sections performed by other doctors in the OB/GYN Department. He argues that insofar as the medical records show that he performed as well or better than his colleagues, they are relevant to his claim that defendants acted maliciously in disciplining him for exercising poor medical judgment. In denying the motion, the district court ruled that evidence of other doctors' poor judgment is not relevant to Hayden's allegation that defendants misrepresented their conclusions about his performance.

HN1[] **[**8]** Determinations of relevance in discovery rulings are left to the sound discretion of the trial court and will not be reversed absent an abuse of discretion. *See* *Admiral Theatre Corp. v. Douglas Theatre Co., 585 F.2d 877, 898 (8th Cir. 1978)*; *Liew v. Breen, 640 F.2d 1046, 1049 (9th Cir. 1981)*. Although the medical records Hayden sought to discover may have had tangential relevance to his claim, we cannot say the district court abused its discretion in denying the motion. In any event, given the strong evidence supporting the district court's finding that defendants acted without malice, the court's refusal to order discovery of the medical records does not amount to reversible error. *See* *Data Disc., Inc. v. Systems Tech. Associates, Inc., 557 F.2d 1280, 1285 n. 1 (9th Cir. 1977)* ***HN2***[] (district court's discovery rulings "will not be reversed except upon clearest showing that denial of discovery results in actual and substantial prejudice to the complaining litigant").

B. *Section 1983* Claim.

Hayden next challenges the district court's **[**9]** dismissal of his *section 1983* claim. In his complaint, Hayden alleged that the peer review proceedings leading to the disciplinary action against him deprived him of his right to due process and equal protection. The district court held that defendants did not act under color of state law and dismissed the claim for lack of subject matter jurisdiction.

Hayden contends that although the Medical Center is a private hospital, its close relationship with the state is sufficient for state action to arise. We disagree. In *Lubin v. Crittenden Hospital Associates, Ltd., 713 F.2d 414 (8th Cir. 1983)*, *cert. denied*, *465 U.S. 1025, 104 S. Ct. 1282, 79 L. Ed. 2d 685 (1982)*, we held that ***HN3***[] a private hospital's disciplinary action against one of its doctors did not constitute state action, notwithstanding the state's extensive regulation and support of the hospital. *Id. at 416*. Hayden concedes that his position is contrary to our holding in *Lubin*, but nevertheless asks us to reconsider that decision. We decline to do so. *Lubin* is controlling **[**10]** law in this circuit and, unless overruled by a higher authority, it binds our decision in this case.

C. Sherman Act Antitrust Claims.

Hayden also challenges the summary dismissal of his Sherman Act Claims. He alleged that by requiring him to complete the post-graduate education, defendants conspired to form a group boycott against him in violation of *section 1* of the Sherman Act, and illegally combined to assert monopoly power in violation of *section 2* of the Act. Defendants moved for summary judgment on the ground that Hayden failed to allege that their actions occurred in or affected interstate commerce. After considering the pleadings and affidavits relating to business activities of Hayden and the Medical Center, the district court entered summary judgment against Hayden on these claims.

HN4[] Jurisdiction under the Sherman Act arises only when the anticompetitive activity prohibited by the Act occurs in the flow of interstate commerce, or, though wholly local in nature, substantially affects interstate commerce. *See* *McLain v. Real Estate Board, 444 U.S. 232, 241, 62 L. Ed. 2d 441, 100 S. Ct. 502 (1980)*; **[**11]** *Cardio-Medical Association v. Crozer-Chester Medical Center, 721 F.2d 68, 71 (3d Cir. 1983)*. Hayden claims only that defendants' conduct *affects* interstate commerce. He alleged in his amended complaint that defendants' actions 1) substantially raise prices for out-of-state patients obtaining **[*1343]** obstetrical-gynecological services in Jefferson County and 2) substantially increase the costs of out-of-state third parties, such as the federal government and private insurance companies, that pay for patients' medical care. Hayden supported these allegations with an affidavit in which he stated that he annually purchased $6,000 worth of office supplies from out-of-state vendors, and that he annually received over $100,000 (75% of his billings) from out-of-state insurance companies. Further, Hayden refers to the interrogatory answers of the hospital administrator indicating that the bills of 88% of the hospital patients were paid by third-party payors, 33% of which were Medicare payments.

Hayden contends that these allegations, together with other supporting evidence, were sufficient to withstand defendants' motion for summary dismissal. We disagree. **[**12]** ***HN5***[] The jurisdictional reach of the Sherman Act, although expansive, is not without limit. For federal jurisdiction to arise, the antitrust plaintiff must show that the alleged restraint [2] would tend, "'as a matter of practical economics' to have a not insubstantial effect on the interstate commerce involved." *McLain v. Real Estate Board, supra, 444 U.S. at 246*. *See also* Hospital Building Co. v. Trustees, 425 U.S. 738, 745 and n.3, *48 L. Ed. 2d 338, 96 S. Ct. 1848 (1976)*; *Crane v. Intermountain Health Care, Inc., 637 F.2d 715, 723 (10th Cir. 1980)*; P. Areeda, ***Antitrust Law*** para. 232.1 at 94 (Supp. 1982). The uncontroverted evidence in this case simply shows that defendants required Hayden to attend ninety days of post-graduate education, and that they agreed to provide coverage so that he would be able to do so. As a matter of practical economics, this requirement does not substantially affect interstate commerce. Hayden's attendance at post-graduate courses would not substantially disrupt his practice because his colleagues agreed to cover for his patients. Consequently, medical **[**13]** services provided to Hayden's patients, the purchases of out-of-state office supplies, and the reimbursements from third party payors would not be altered in any substantial amount. Defendants neither excluded Hayden from practice nor permanently denied him a chance to compete effectively. They simply required him to obtain additional training and improve his medical skills. Such a requirement cannot meaningfully be characterized as substantially affecting interstate commerce.

[14] D. Defamation Claims.**

Hayden next challenges the district court's finding that defendants' statements about him were not defamatory. He alleged that in the course of the peer review proceedings, defendants made numerous untrue and adverse statements about his integrity, his mental stability, and his ability to practice medicine. Hayden recognizes that defendants are entitled to qualified immunity for their statements made in the course of hospital peer review proceedings, [3] **[*1344]** but contends that they acted with malice and made no attempt to establish the truth of the charges against him.

---

[2] ***HN6***[] We recognize that some courts have held that antitrust plaintiffs may establish federal jurisdiction merely upon a showing that the defendants' *general activities*, taken as a whole, occur in or affect interstate commerce. *See* Western Waste Service Systems v. Universal Waste Control, 616 F.2d 1094, 1097 (9th Cir.), *cert. denied*, *449 U.S. 869, 66 L. Ed. 2d 88, 101 S. Ct. 205 (1980)*; *Hahn v. Oregon Physicians Service, 689 F.2d 840, 844 (9th Cir. 1982)*, *cert. denied*, *462 U.S. 1133, 103 S. Ct. 3115, 77 L. Ed. 2d 1369 (1983)*; *McElhinney v. Medical Protective Co., 549 F. Supp. 121, 127 (E.D. Ky. 1982)*. Nevertheless, we believe that the better rule is to require plaintiffs to show that the *challenged conduct* occurs in or affects interstate commerce. *See* *McLain v. Real Estate Board, supra, 444 U.S. at 246* (defendants' activities infected by alleged price-fixing conspiracy must affect interstate commerce for federal jurisdiction to arise); *Crane v. Intermountain Health Care, Inc., 637 F.2d 715, 723 (10th Cir. 1980)*. For an excellent discussion supporting this position, see P. Areeda, ***Antitrust Law*** para. 232.1 at 94-95 (Supp. 1982).

Although the defendant hospital's general activities may have occurred in interstate commerce, that is insufficient to establish federal jurisdiction. Instead, Hayden must show that the challenged conduct affects interstate commerce.

[3] ***HN7***[] Under Arkansas law, the law governing this diversity claim, defendants are entitled to qualified immunity for statements made in the course of hospital peer review proceedings. A member of a peer review committee is protected from monetary liability so long as he

[15]** After hearing the evidence, the district court found that defendants did not act with malice or bad faith in reviewing Hayden's actions. Indeed, the evidence overwhelmingly shows that defendants made every attempt to give Hayden a fair hearing to determine whether he exercised proper judgment in performing cesarean sections. For nearly two years, they conducted a labyrinthine series of investigations, *de novo* hearings, and appellate hearings. At Hayden's request, his charts were reviewed by a disinterested expert, who, for the most part, agreed with the actions defendants had taken. Throughout the review proceedings Hayden received notice of and an opportunity to respond to the charges against him. The district court found that the peer review committees were fair and impartial, and that they required Hayden to obtain consultations and continuing education in the reasonable good faith belief that his performance was inadequate. Although defendants made several untoward remarks about Hayden in the course of the proceedings, the district court found that, considered in the context of the entire proceedings, the remarks were insignificant and did not affect the outcome. Based **[**16]** on our review of the record, we conclude that substantial evidence supports the district court's finding that defendants acted reasonably and in good faith in conducting the review proceedings. Thus, we reject the defamation claim made in this appeal. [4]

[**17] E. Conspiracy Claims.

Hayden next contends that the district court erred in finding that defendants did not conspire to interfere with his practice. Hayden alleged that defendants had conspired against him by deliberately and maliciously stating that his practice was below medical standards; by preventing him from obtaining adequate coverage for his patients so he could attend continuing education classes; by disciplining him with the knowledge that the charges against him were false; by denying him the real opportunity to be heard; and by singling him out for review. In sum, he contends that the unfairness of the review proceedings leads inescapably to the conclusion that defendants joined together to interfere with his livelihood.

The district court found that Hayden failed to prove that defendants conspired to interfere with his practice. Specifically, the court rejected his contentions that he was singled out for review and denied a fair opportunity to be heard. It also discredited Hayden's excuses for failing to obtain adequate coverage. Finally, the court found that throughout the review **[*1345]** proceedings defendants acted reasonably and in good faith. **[**18]** Again, these findings receive overwhelming support from the record, and we conclude that Hayden failed to establish any unlawful conspiracy. [5]

III. CONCLUSION.

> acts without malice, has made a reasonable effort to obtain the facts of the matter as to which he acts, and acts in reasonable belief that the action taken by him is warranted by the facts known to him after such reasonable effort to obtain facts.

Ark. Stat. Ann. § 71-5101 (1979).

[4] Hayden also contends that defendants made defamatory statements about him outside of the peer review proceedings. He claimed that defendant Ross, a member of the Executive Committee, falsely told a Wyoming hospital recruiter that Hayden was not a good doctor. Hayden also alleged that an unidentified hospital administrator's statement that Hayden might soon lose his privileges was also defamatory.

The district court concluded that neither statement was defamatory. It determined that because the Wyoming hospital administrator recalled only that Dr. Ross had made a negative comment about Hayden, Hayden had failed to prove the statement was defamatory. In concluding that the statement by the hospital administrator was not defamatory, the court found that the administrator had merely acknowledged Hayden's difficulties in response to a question from one of Hayden's patients, and had told the patient to discuss the matter with Hayden. The record amply supports these district court findings also.

[5] Hayden also contends that the district court erred in finding that defendants followed the Medical Center bylaws in the disciplinary proceedings against him. Defendants' alleged failure to comply with the Medical Center bylaws states no independent cause of action, but is relevant only insofar as it bears on Hayden's due process claim under *42 U.S.C. § 1983* and his defamation and conspiracy claims under state law. As we have noted, the district court properly dismissed the *section 1983* claim for lack of jurisdiction, and ample evidence supports its finding that defendants did not defame Hayden or unlawfully interfere with his practice. Thus, we reject Hayden's contention that defendants failed to follow the Medical Center bylaws.

In reviewing the defamation and conspiracy claims, we need not consider whether **[**19]** or not Hayden exercises good medical judgment in performing cesarean sections. That task is best left to the peer review committee members whose training and experience better qualifies them to make such judgments. Our role is simply to ensure that the committee members act within their area of expertise, that their proceedings are fair, and that they act reasonably in imposing sanctions. As Judge Goldberg aptly remarked, "courts must not attempt to take on the escutcheon of Caduceus." *Sosa v. Board of Managers, 437 F.2d 173, 177 (5th Cir. 1971)*.

As noted, the evidence in this case overwhelmingly demonstrates that defendants acted fairly, reasonably, and within their area of expertise in evaluating Hayden. Hayden had many opportunities to explain his conduct to impartial peer review committees that were qualified to judge his performance. The committees made every effort to assess the adequacy of his performance and, upon finding it lacking, imposed consultation and education requirements reasonably related to improving his medical skill and judgment. Under these circumstances, the district court properly entered judgment in defendants' favor in the defamation **[**20]** and conspiracy claims.

Accordingly, for the reasons set forth in this opinion, the judgment of the district court is affirmed.

Kalmanovitz v. G. Heileman Brewing Co.

United States District Court for the District of Delaware

September 28, 1984

Civil Action No. 82-797 (Formerly California Action No. C83 0196); Civil Action No. 82-797 (formerly California Action No. C83 0704

HN5[] Federal & State Interrelationships, Federal Common Law

Section 14(e) of the Securities and Exchange Act, *15 U.S.C.S. § 78n(e)*, does not create a private right of action for money damages by an unsuccessful competitor for control.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Federal & State Interrelationships > Federal Common Law > General Overview

Mergers & Acquisitions Law > Takeovers & Tender Offers

HN6[] Private Actions, Standing

The four factors relevant in determining whether a private remedy is implicit in a federal statute not explicitly providing one are (1) whether plaintiff is one of the class for whose special benefit the statute was enacted, (2) whether the legislature intended to create a private remedy, (3) whether a private right of action would be consistent with the underlying purposes of the legislative scheme, and (4) whether the cause of action is one traditionally relegated to state law.

Mergers & Acquisitions Law > Takeovers & Tender Offers

HN7[] **Mergers & Acquisitions Law, Takeovers & Tender Offers**

Where plaintiff's individual stake in the outcome of the suit as a shareholder is minimal when compared with his interest as a potential offeror, although plaintiff seeks relief as a shareholder, it would be more realistic to characterize him as a competing tender offeror.

Opinion

[*1388] LATCHUM, Senior Judge.

I. BACKGROUND

Plaintiffs, Paul Kalmanovitz [1] ("Kalmanovitz"), individually and as a shareholder of Pabst Brewing **[**2]** Company ("Pabst"), and S&P, a California corporation ("S&P") (collectively "plaintiffs"), brought this action on December 10, 1982, pursuant to (a) Sections 10(b), 13(e), 14(d), and 14(e) of the Exchange Act, *15 U.S.C. §§ 78j(b)*, *78m(e)*, *78n(d)*, and *78n(e)*, and the rules and regulations promulgated by the SEC thereunder; (b) *Section 1* of the Sherman Act, Section 7 of the Clayton Act, *15 U.S.C. §§ 1*, *18*; and *(c)* the laws of the State of Delaware. (Docket Item ["D.I."] 1 at 3.)

Originally, three separate lawsuits were filed, however, the cases have subsequently been consolidated into this present case. This lawsuit began in 1982, the result of the fierce battle for control of Pabst between Kalmanovitz, the Jacobs Group which included Irwin L. Jacobs ("Jacobs"), Dennis Mathisen ("Mathisen"), Gerald A. Schwalbach ("Schwalbach") and Daniel I. Lindsay ("Lindsay"), and G. Heileman Brewing Company, **[**3]** Inc. ("Heileman"). Presently pending before this Court are two motions: (a) defendants' motion to dismiss Counts I through X of the Complaint [2] (D.I. 166); and (b) plaintiffs' motion to certify the antitrust and tortious interference claims for appeal pursuant to *Fed.R.Civ.P. 54(b)*. (D.I. 160.)

[*1389] II. FACTS

Because this Court has already recounted the details of the battle for control of Pabst, [3] this discussion therefore will be limited to a thumbnail sketch of the operative facts.

---

[1] Kalmanovitz is a citizen of California and the beneficial owner of twenty shares of common stock of Pabst. (D.I. 1 at 1.)

[2] This Court in *Kalmanovitz v. G. Heileman Brewing Co., Inc., 576 F. Supp. 922 (D.Del. 1983)*, dismissed Counts XI and XII of Kalmanovitz's original, twelve-count complaint in C.A. No. 82-797.

[3] The Court has six prior published opinions concerning this litigation: *Kalmanovitz v. G. Heileman Brewing Co., 576 F. Supp. 922 (D.Del. 1983)*; *United States v. G. Heileman Brewing Co., 563 F. Supp. 642 (D.Del. 1983)*; *Pabst Brewing Co. v. Kalmanovitz, 551 F. Supp. 882 (D.Del. 1982)*; *Jacobs v. G. Heileman Brewing Co., 551 F. Supp. 639 (D.Del. 1982)*; *Pabst Brewing Co. v. Jacobs, 549 F. Supp. 1068* (D.Del.), *aff'd*, ***707 F.2d 1392*** & 1394 (3d Cir. 1982); *Jacobs v. Pabst Brewing Co., 549 F. Supp. 1050 (D.Del. 1982)*.

[4]** On October 26, 1982, Kalmanovitz and Jacobs, along with three of Jacobs' associates (the "Jacobs Group"), entered into a Memorandum of Terms (the "October 26 contract"), by which Kalmanovitz and the Jacobs Group, through JMSL Acquiring Corporation ("JMSL"), [4] agreed to make a tender offer for 3,000,000 Pabst shares at $24 per share. [5] (D.I. 121, Ex. 1 at 2.) Acquisition of these 3,000,000 shares, combined with 1,440,305 Pabst shares the Jacobs Group already owned, would have given the parties to the agreement a majority of outstanding Pabst stock.

[5]** On October 27, 1982, Kalmanovitz and the Jacobs Group made the tender offer for 3,000,000 shares of Pabst stock at $24 per share (the "Jacobs-Kalmanovitz offer"). (*Id*. at Ex. 2.) The Jacobs-Kalmanovitz offer was opposed by the management of Pabst, e.g., William F. Smith, Jr., Pabst's president. As a result of a series of meetings between Smith and the chief executive officer of Heileman, Russell G. Cleary, on November 10, 1982, Heileman commenced a competing tender offer through a wholly-owned subsidiary called "HBC Acquisition, Inc." ("HBC"), a wholly-owned subsidiary of Heileman (the "Heileman offer"). (*Id*. at Ex. 3.) The Heileman offer was for 5,500,000 shares of Pabst stock at $27.50 per share.

On November 18, 1982, the Jacobs-Kalmanovitz offer was amended and increased to $30 per share. This increase in the Jacobs-Kalmanovitz offer was made possible by an amendment to the October 26 contract whereby Kalmanovitz agreed to increase his cash participation in the offer from $26,394,720 to $44,394,720. (*Id*. at Ex. 4.) At the same time, on November 18, 1982, defendant Jacobs promised, on behalf of the Jacobs Group in a letter to Kalmanovitz, that in the event the Jacobs **[**6]** Group decided to sell its 1,140,305 shares of Pabst Stock, rather than continuing to bid higher, it would pay Kalmanovitz 50% of all amounts it received in excess of $24 per share for all the shares in the Group (the "Letter Agreement"). (*Id*. at Ex. 6.)

On November 23, 1982, the Jacobs-Kalmanovitz offer was further amended and increased to $35 per share. This increase in offer was accompanied by the further understanding that Kalmanovitz would increase his cash participation in the offer to $59,394,720. (*Id*. at Exs. 7 & 8.)

On November 24, 1982, this Court denied motions for preliminary injunctions against the Jacobs-Kalmanovitz offer (brought by the Heileman group) and against the Heileman offer (brought by the Jacobs Group and Kalmanovitz). Heileman announced after the hearing that it would reduce the number of shares sought in its offer to 4.25 million and that it had approximately 3.9 million shares already in its depository.

That afternoon, on November 24, 1982, Jacobs telephoned Cleary and expressed concern about his (Jacobs) ability to go ahead financially. Cleary gathered from the conversation that Jacobs felt that he didn't want to go any further from a resources **[**7]** standpoint and he asked for suggestions **[*1390]** to resolve the situation. During this conversation, Jacobs told Cleary that he would withdraw from the bidding for Pabst shares in exchange for $7,500,000.

As a result of the negotiations begun on November 24, 1982, the Jacobs and Heileman groups entered into a contract on November 26, 1982, in which HBC agreed to terminate its old offer and announce a new offer which increased the number of shares to 5,600,000, raised the price to $29, and increased the value of notes to be paid to stockholders in a second-step merger from $20 to $24 per share. (*Id*. at Exs. 9, 10.) The Jacobs Group agreed to tender its shares into the new offer. The parties also agreed to dismiss all outstanding non-derivative litigation and that, upon dismissal, the Jacobs Group would be reimbursed $7.5 million for expenses incurred in its battle for control, this cost to be shared equally by Heileman and Pabst.

Also on November 26, 1982, Jacobs called Kalmanovitz's attorney and stated that "he worked out a deal with Heileman to pay [Kalmanovitz] $5,000,000 if [he] would agree to withdraw from the bidding." This offer to pay

---

4 The tender offer was to be made by JMSL Acquiring Corp. ("JMSL"), a Delaware corporation wholly owned by PST Acquiring Corp. ("PST"), another Delaware corporation which was to be owned 50% by the Jacobs Group and 50% by Kalmanovitz. (D.I. 121, Ex. 1 at 3.) As part of the October 26 contract, Kalmanovitz would become a 50% shareholder in PST for $1,000.

5 At the time the parties entered into the October 26 contract, the price for shares of stock in Pabst trading on the New York Stock Exchange was approximately $20 per share.

Kalmanovitz was accompanied **[**8]** by an offer that he might share with Jacobs "in a bargain purchase of Pabst's Milwaukee office building." Kalmanovitz rejected the offer.

On December 2, 1982, HBC made a new tender offer for Pabst shares (seeking 5,600,000 shares at $29 per share) (the "HBC Offer"). (*Id*. at Ex. 11.) Kalmanovitz made a competing offer on December 6, 1982 for 4,150,000 shares at $32 per share. (*Id*. at Ex. 13.) On December 10, 1982, Kalmanovitz filed this action and moved for a preliminary injunction to stop the HBC Offer.

On December 20, 1982, this Court denied Kalmanovitz's motion. HBC increased its offering price to $32 per share on December 15, 1982. On December 22, 1982 -- the withdrawal date for the HBC Offer -- Kalmanovitz increased his offering price to $40 per share. (*Id*. at Ex. 16.) On December 23, 1982, Heileman accepted for payment 5,600,000 shares of Pabst and the contest for control of Pabst ended.

III. DEFENDANTS' MOTION TO DISMISS

Because ***HN1***[] affidavits have been filed by plaintiffs and defendants in this proceeding, the Court will consider defendants' motion to dismiss as one for summary judgment pursuant to *Rule 56*. *Fed.R.Civ.P. 12(b)*. Under *Rule 56*, a court may enter summary **[**9]** judgment only "if the pleadings, depositions, answers and admissions, together with affidavits, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." Any reasonable inferences from the facts must be resolved in favor of the party against whom the judgment may be entered. *Peterson v. Lehigh Valley Dist. Council, United Bhd. of Carpenters and Joiners, 676 F.2d 81, 84 (3d Cir. 1982)*.

1. *Plaintiffs' Claims for Injunctive Relief*

HN2[] Courts will not consider granting injunctions when "the circumstances are such that the injunction cannot be enforced by the court." 43 C.J.S. *Injunctions* § 34; *Penn Central Co. v. Buckley & Co., 293 F. Supp. 653 (D.N.J. 1963)*, *aff'd*, *415 F.2d 762 (3d Cir. 1969)*.

HN3[] It is presently infeasible to ask this Court to enjoin acts which purportedly will violate the federal securities laws and antitrust laws or Delaware state law when these acts have already occurred. *See Kauffman v. Johnston, 454 F.2d 267 (3d Cir. 1972)* (petition to enjoin deprivation of religious rights in connection with 1969 Passover mooted by passing of the holiday); *Tymiak v. Omodt, 676 F.2d* ***[**10]*** *306 (8th Cir. 1982)* (plaintiff's request for injunction to prevent his ejectment was rendered moot by his ejectment); *Mougios v. W.R. Grace & Co., 52 F.R.D. 576 (S.D.N.Y. 1971)* (request to enjoin stockholders meeting was rendered moot by the holding of the meeting); *see also Friends of the Earth Inc. v. Bergland, 576 F.2d 1377 (9th Cir. 1978)*; *Marchand v. Director, U.S. Probation Office, 421 F.2d 331 (1st Cir. 1970)*.

A review of plaintiffs' request for relief illustrates the complete impracticality **[*1391]** of the request in light of the events of the past two years. Plaintiffs ask that Heileman be enjoined from voting its Pabst shares (D.I. 1 at 34, para. B); that the asset transfer be stopped (para. C); and that the solicitation and purchase of Pabst shares (paras. D, E) and the implementation of the merger be stopped (para. F). Plaintiffs also ask that the defendants be enjoined from violating federal and state law. (*Id*., PP G, H, J, K, O.) The solicitation and purchase of shares, the vote, the merger and the asset transfers have, however, all occurred. This Court, therefore, cannot retroactively prohibit acts which are finished and which this Court refused **[**11]** to primarily enjoin on December 23, 1982.

2. *Standing To Maintain Action For Damages*

Plaintiffs allege in Counts I through IV of the Complaint that defendants, in connection with the HBC Offer, violated Sections 13(e), 14(d) and 14(e) of the Securities and Exchange Act of 1934 (the "Exchange Act"), *15 U.S.C. §§ 78m(e)*, *78n(d)*, and *78n(e)*. (D.I. 1 at 16-20.) The defendants argue that because the purpose of the Williams Act was to protect investors faced with an offer for the purchase of their shares and not to provide a money damages remedy to unsuccessful contestants for control of a corporation, plaintiffs lack standing to maintain any action for money damages based on alleged violations of Sections 14(d), 14(e) or 13(e), of the Exchange Act.

a. *Count I - Fraud In Connection With a Tender Offer: Section 14(e) of the Exchange Act*.

Section 14(e) of the Exchange Act is a general anti-fraud statute in connection with a tender offer which provides in part:

> **HN4**[] (e) It shall be unlawful for any person to make any untrue statement of a material fact or omit to state any material fact necessary in order to make the statements made, in the light of the circumstances under which **[**12]** they are made, not misleading, or to engage in any fraudulent, deceptive, or manipulative acts or practices, in connection with any tender offer or request or invitation for tenders, or any solicitation of security holders in opposition to or in favor of any such offer, request, or invitation.

15 U.S.C. § 78n(e).

Kalmanovitz argues that he has standing to bring this suit because he "brings suit individually and as a shareholder of Pabst, the target corporation." (D.I. 1, para. 16.) Kalmanovitz emphasizes that point in the hope of circumventing the holding of the United States Supreme Court in *Piper v. Chris-Craft Industries, Inc., 430 U.S. 1, 51 L. Ed. 2d 124, 97 S. Ct. 926 (1977)*. In that case, the Court held that a tender offeror, suing in its capacity as a takeover bidder, does not have standing to sue for damages under section 14(e). That case arose out of a contest between Chris-Craft Industries, Inc. ("Chris-Craft") and Bangor Punta Corp. ("Bangor") for control of Piper Aircraft Corp. ("Piper"). In that contest, Bangor, with the support of Piper, was successful, through a tender offer and over-the-counter purchases, in acquiring a majority of Piper's outstanding **[**13]** stock. During the course of the struggle for control, Chris-Craft filed an action against Bangor, Piper, and The First Boston Corp. (Bangor's underwriter in its tender offer), claiming that Bangor's tender offer violated Section 14(e) of the Exchange Act.

After the Court denied the requests for injunctive relief, Bangor acquired a majority interest in Piper and Chris-Craft sought to press its claim for money damages. The Court, in applying the analysis of *Cort v. Ash, 422 U.S. 66, 45 L. Ed. 2d 26, 95 S. Ct. 2080 (1975)*, [6] held that Section 14(e) **HN5**[] does *not* **[*1392]** create a private right of action for money damages by an unsuccessful competitor for control.

[14]** The Court in *Piper v. Chris-Craft* began its analysis by framing the issue before it as:

> whether tender offerors such as Chris-Craft, whose activities are regulated by the Williams Act, have a cause of action for damages against other regulated parties under the statute on a claim that anti-fraud violations by other parties have frustrated the bidder's efforts to obtain control of the target corporation.

430 U.S. at 24.

In holding that there was no such private remedy for money damages, the Court relied in part on the following findings:

> The purpose of the Williams Act is to insure that public shareholders who are confronted by a cash tender offer for their stock will not be required to respond without adequate information. *We find no hint in the Legislative history, on which respondent so heavily relies, that Congress contemplated a private cause of action for damages by one of several contending offerors against a successful bidder or by a losing contender against a target company*.

430 U.S. at 35 (emphasis added).

---

[6] Because the Exchange Act does not expressly provide a private remedy for alleged violations of Section 14 or 13, any private right of action arising from violations of those sections must be implied. In *Cort v. Ash*, the Supreme Court set forth four factors relevant in determining whether a private remedy is implicit in a federal statute not explicitly providing one. **HN6**[] Those four factors are (1) whether plaintiff is one of the class for whose special benefit the statute was enacted, (2) whether the legislature intended to create a private remedy, (3) whether a private right of action would be consistent with the underlying purposes of the legislative scheme, and (4) whether the cause of action is one traditionally relegated to state law. Cort v. Ash, 422 U.S. at 78.

Kalmanovitz attempts to avoid the holding in *Piper* by claiming that he brought this suit individually in his capacity as **[**15]** a stockholder of Pabst and not as a competing tender offeror. The Court finds this argument to be without merit.

A cursory review of the facts will demonstrate why the Court cannot accept Kalmanovitz's argument. First, Kalmanovitz entered into an agreement with the Jacobs Group to purchase 3,000,000 shares of Pabst stock. As part of the October 26 contract, Kalmanovitz was to become a 50% shareholder in PST, the parent company to JMSL, the maker of the tender offer.

On October 27, 1982, the Jacobs-Kalmanovitz tender offer was made for 3,000,000 shares at a total price of $72,000,000. Kalmanovitz, pursuant to the October 26 contract and the subsequent amendments, agreed to a cash participation in the offer up to $59,394,720. (D.I. 121 at Ex. 8.) When Jacobs wished to withdraw from the offer, Kalmanovitz not only refused to withdraw, he subsequently made a competing tender offer for 4,150,000 shares at $32 per share (Kalmanovitz later increased his offering price to $40 per share). Then during his competing tender offer, on December 10, 1982, Kalmanovitz filed this action seeking a preliminary injunction to stop the HBC Offer.

Finally, Kalmanovitz alleged ownership of only 20 shares **[**16]** of Pabst stock. Given this miniscule stake in any possible recovery, his assertion of standing on the basis of a shareholder is without merit. *See also Luptak v. Central Cartage Co.*, [1981 Transfer Binder] Fed.Sec.L.Rep. (CCH) P 98,034 (E.D.Mich. 1979), *aff'd*, *647 F.2d 165 (6th Cir. 1981)*, where the court noted that ***HN7***[] "plaintiff's individual stake in the outcome of the suit as a shareholder is minimal when compared with his interest as a potential offeror. Thus, although plaintiff seeks relief as a DIBC shareholder, it would be more realistic to characterize him as a competing tender offeror. . . ." *Id. at P 91,352*. [7]

[17]** In *Piper v. Chris-Craft*, the Court addressed this exact problem and it specifically rejected the notion that Chris-Craft could sue as a disappointed Piper stockholder. As the Court noted:

> As a tender offeror *actively* engaged in competing for Piper stock, Chris-Craft was not in the posture of a target shareholder **[*1393]** confronted with the decision of whether to tender or retain its stock.

430 U.S. at 35 (emphasis added).

Because Kalmanovitz was actively engaged in competing for control of Pabst, Kalmanovitz has no standing to sue for damages based on a section 14(e) violation.

b. *Count II: Fraudulent, Misleading and Incomplete SEC Filings: Section 14[d] of the Exchange Act*

Kalmanovitz alleges in Count II of his complaint that all of the defendants "have filed and have caused Heileman to file, a Schedule 14D-1 and Offer to Purchase and have caused Pabst to file a Schedule 14D-9, which contain statements which are false and misleading with respect to material facts and which omit to state the material facts necessary in order to make the statements therein not false or misleading, in violation of Rules 14d-6(e)(1) and 14d-9." [8]

[18]** Section 14(d), like Section 14(e), was enacted as a part of the Williams Act, and imposes upon tender offerors various disclosure and reporting requirements. The defendants argue and Kalmanovitz concedes that the same analysis applied by the Supreme Court in *Piper v. Chris-Craft* dictates whether or not Kalmanovitz can

---

[7] *See also* *Pabst Brewing Company v. Kalmanovitz, 551 F. Supp. 882 (D.Del. 1982)* where this Court found that the "facts clearly indicate that Kalmanovitz and Jacobs . . . have personally invested substantial capital in order to capitalize the tender offer by the acquiring corporations. Thus, there is no question that Kalmanovitz and Jacobs are the dominating and motivating principals behind the JMSL tender offer." *551 F. Supp. at 892-93*.

[8] Kalmanovitz argues that he has standing to bring an action for money damages for violations of Section 14(d). However, he fails to cite and the Court has not found any authority to support his claim.

maintain claims predicated on alleged violations of Section 14(d). Like subsection (e), subsection (d) was enacted to provide adequate protection for investors, and not to enrich disappointed competing tender offerors. In *Luptak v. Central Cartage Co*., [1981 Transfer Binder] Fed.Sec.L.Rep. (CCH) P 98,034 (E.D.Mich. 1979), *aff'd*, *647 F.2d 165 (6th Cir. 1981)*, plaintiff was an unsuccessful competitor for control of Detroit International Bridge Company ("DIBC") who brought suit against other bidders who had obtained control over DIBC. In disposing of plaintiff's claims based on Section 14(d) as well as Section 14(e), the Court held:

> Under the Supreme Court's rationale in *Chris-Craft*, emphasizing that section 14 and other provisions of the Williams Act were intended to benefit shareholders rather than competing offerors, Luptak would appear to **[**19]** have no standing to bring a private action for money damages under any subdivision of section 14. *See* *430 U.S. at 35*.
>
> * * * *
>
> Because this Court has found both that plaintiff has no standing to assert his claims under section 14 of the Exchange Act and that Cartage's market purchases of DIBC stock did not constitute a tender offer under section 14, it must determine that defendants Cartage and Centra are entitled to judgment as a matter of law on those portions of plaintiff's complaint alleging violations of section 14(d) and (e) of the Act and the rules promulgated thereunder.

Id., P 98,034 at 91,352-54.

Thus, for the same reasons plaintiffs lack standing to maintain an action under Section 14(e), plaintiffs likewise have no standing to bring an action for damages under Section 14(d) and Count II will be dismissed as well.

c. *Counts III and IV: No Private Right of Action For Damages Under Section 13(e)*

In Counts III and IV of the Complaint, Kalmanovitz alleges violations of Section 13(e) of the Exchange Act, *15 U.S.C. § 78m(e)*. (Count III - Disguised Issuer Tender: Section 13(e) of the Exchange Act and Rule 13e-4; Count IV - Disguised "Going Private" Transaction: **[**20]** Section 13(e) and Rule 13e-3.) (D.I. 1 at 17, 19.) The defendants argue that Kalmanovitz lacks standing to seek money damages for the alleged violations of Section 13 because under Section 13 there is no private right of action for *money damages*. Kalmanovitz disagrees.

Section 13(e) of the Exchange Act provides in pertinent part:

> **[*1394]** ***HN8***[] It shall be unlawful for an issuer . . . to purchase any equity security issued by it if such purchase is in contravention of such rules and regulations as the Commission, in the public interest or *for the protection of investors*, may adopt (A) to define acts and practices which are fraudulent, deceptive, or manipulative, and (B) to prescribe means reasonably designed to prevent such acts and practices. (Emphasis added.)

Section 13(e), like any other section of the Williams Act (*15 U.S.C. § 78m(d)-(e)*, *78n(d)-(f)(1976)*), does not *expressly* afford a private right of action for enforcement of its provisions. Thus, this Court is again faced with the issue: whether or not there is an implied private right of action for *money damages* under Section 13(e) of the Exchange Act. Neither the United States Supreme Court nor the **[**21]** Third Circuit Court of Appeals has determined whether an implied private right of action exists under Section 13(e). As a result, both Kalmanovitz and the defendants look to the case law under Section 13(d) for guidance.

This Court, in *Jacobs v. Pabst Brewing Co., 549 F. Supp. 1050 (D.Del. 1982)*, a case arising out of the same battle for control of Pabst, presented a comprehensive analysis of Section 13(d) which included an exhaustive list of cases from various jurisdictions which stated that parties may and may not pursue a claim under Section 13(d). [9] This Court then reviewed the case history and the legislative history of Section 13(d) before concluding that "Congress intended to preserve a private cause of action which had been judicially created." *549 F. Supp. at 1062*.

[9] *549 F. Supp. 1050, 1054, n.3, 4*.

Having determined that an implied right of action for *injunctive relief* exists under Section 13(d) and 13(g), the Court went on to determine whether the Jacobs Group, as shareholders, has standing to bring an action for injunctive relief against an investment adviser.

[22]** In the present action, however, this Court must decide whether or not an implied private right of action for *money damages* under Section 13(e) exists before it reaches the issue of standing.

When other courts have faced the issue of whether there is an implied private right of action for damages, they have determined that none exists. In *duPont v. Wyly, 61 F.R.D. 615 (D.Del. 1973)*, Judge Stapleton determined that no implied right to recover damages existed when he stated: "By including an express and expressly limited private remedy in *Section 18*, [*15 U.S.C. § 78r*] I think Congress clearly negated the existence of a further implied remedy for violation of Section 13. I agree that 'where Congress has specifically authorized a remedy for violation of an act, the courts should not nullify the congressional scheme by implying a right of action on behalf of those not otherwise entitled to recover. '" *61 F.R.D. at 628* *citing* *In re Penn Central Securities Litigation, 347 F. Supp. 1327, 1340 (E.D.Pa. 1972)*, *modified*, [1973 Transfer Binder] Fed.Sec.L.Rep. (CCH) P 93,980 (E.D.Pa. 1973). *See also* *Schnell v. Schnall, 550 F. Supp. 650* [1981 Transfer Binder]Fed.Sec.L.Rep. **[**23]** (CCH) P 97,927 at 90,715-16 (S.D.N.Y. 1981), and *Berman v. Metzger*, [1981 Transfer Binder]Fed.Sec.L.Rep. (CCH) P 97,857 at 90,293-94 (D.D.C. 1981) (federal courts applied the rationale of *Piper v. Chris-Craft* and held that Section 13 does not provide a private right of action for money damages); *Myers v. American Leisure Time Enterprises, Inc., 402 F.Supp 213 (S.D.N.Y. 1975)*, *aff'd*, *538 F.2d 312 (2d Cir. 1976)*; *Crane v. Harsco, 511 F. Supp. 294 (D.Del. 1981)* (tender offeror possessed no private cause of action for an injunction under 13(e) *as a stockholder* since he was not a stockholder to whom a tender offer had been made and, thus, not an intended beneficiary of the Williams Act).

In recent decisions, the United States Supreme Court has clearly stated that a ***HN9***[] private right of action for money damages will *not* be judicially implied unless there is a clear mandate from Congress concerning the relevant statute which either creates or alters civil liabilities in addition to a legislative history which contains some expression of Congressional **[*1395]** intent to imply a private remedy. If the language of the statute and legislative history is silent, **[**24]** particularly if the statute contains other sections which include express provisions for enforcement and remedies, no right of action for money damages will be implied. *See* *Transamerica Mortgage Advisors, Inc. v. Lewis, 444 U.S. 11, 62 L. Ed. 2d 146, 100 S. Ct. 242 (1979)* (no private right of action for damages under the Investment Advisers Act of 1940, *15 U.S.C. § 80b-1 (1976)*); and *Touche Ross & Co. v. Redington, 442 U.S. 560, 61 L. Ed. 2d 82, 99 S. Ct. 2479 (1979)* (no private right of action under Section 17(a) of the Exchange Act, *15 U.S.C. § 78q(a) (1976)*).

Because the legislative history of the 1934 Exchange Act is silent on the issue of whether a private cause of action for damages should be available under Section 13(e) [10] **[**25]** and in light of the recent Supreme Court decisions which refuse to imply a private right of action for damages, the mandate to this Court is clear. Moreover, because Courts imply equitable remedies under the securities laws more readily than money damage remedies, [11] this Court finds that ***HN10***[] no private right of action for money damages exists under Section 13(e).

d. *Count V: Fraud in Connection with the Purchase and Sale of Securities: Section 10(b) of the Exchange Act*

In Count V of the Complaint, Kalmanovitz alleges that:

> The defendants have knowingly, by instrumentalities of interstate commerce, employed devices, schemes and artifices to defraud; made untrue statements of material facts and omitted to state material facts necessary in order to make the statements made, in light of the circumstances under which they were made, not misleading; engaged in acts, practices and a course of business which operate and will operate as a fraud and deceit upon the Pabst stockholders and others in connection with each and every purchase and sale of securities contemplated by the Heileman Offer and the Agreement in Principle, which purchases and sales will ultimately

[10] *See* *Piper v. Chris-Craft Industries, Inc., 430 U.S. 1, 31-32, 51 L. Ed. 2d 124, 97 S. Ct. 926 (1977)*.

[11] *See* *Transamerica Mortgage Advisors v. Lewis, 444 U.S. 11, 18-19, 62 L. Ed. 2d 146, 100 S. Ct. 242 (1979)*.

be paid for with assets belonging to Pabst stockholders which have been wrongfully and fraudulently misappropriated by the defendants.

(D.I. 1, para. 69.) Section 10 of **[**26]** the Act, *15 U.S.C. § 78j*, provides:

HN11[] It shall be unlawful for any person, directly or indirectly, by the use of any means or instrumentality of interstate commerce or of the mails, or of any facility of any national securities exchange --
* * * *
(b) To use or employ, in connection with the purchase or sale of any security registered on a national securities exchange or any security not so registered, any manipulative or deceptive device or contrivance in contravention of such rules and regulations as the Commission may prescribe as necessary or appropriate in the public interest or for the protection of investors.

Rule 10b-5 of the Commission, *17 C.F.R. § 240.10b-5* provides:

HN12[] It shall be unlawful for any person, directly or indirectly, by the use of any means or instrumentality of interstate commerce, or of the mails or of any facility of any national securities exchange,
(1) to employ any device, scheme, or artifice to defraud,
(2) to make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading, or

(3) to engage in **[**27]** any act, practice, or course of business which operates or would operate as a fraud or deceit upon any person, in connection with the purchase or sale of any security.

[*1396] The defendants argue that because Kalmanovitz did not tender his shares pursuant to the HBC Offer, he is neither a purchaser nor seller of securities and therefore lacks standing to maintain an action for damages under either Section 10(b) or *Rule 10b-5*. In support of its position, defendants rely on *Blue Chip Stamps v. Manor Drug Stores, 421 U.S. 723, 44 L. Ed. 2d 539, 95 S. Ct. 1917 (1975)*, where the United States Supreme Court held that one who does not buy or sell stock in connection with an offer cannot maintain an action under Section 10(b) for alleged misstatements made by the offeror. Conceding that he must comply with the purchaser/seller requirement of *Blue Chip Stamps v. Manor Drug Stores, 421 U.S. 723, 44 L. Ed. 2d 539, 95 S. Ct. 1917 (1975)*, Kalmanovitz contends that the words "in connection with the purchase or sale of any security" in Section 10(b) are to be construed so liberally as to encompass the conversion of his stock in the March, 1983 merger, which occurred more than four **[**28]** months after his complaint was filed. Relying upon the "forced seller" exception established in *Vine v. Beneficial Finance Company, 374 F.2d 627 (2d Cir. 1967)*, Kalmanovitz argues that a merger following a tender offer in which the majority stockholder may eliminate the minority stockholders without their approval relieves a stockholder of the need to plead "purchase or sale" of securities or "reliance." Because *Vine v. Beneficial Finance Company* was decided by the Second Circuit Court of Appeals prior to the 1974 Supreme Court decision of *Blue Chip Stamps v. Manor Drug Stores*, and because *Vine* is not the law in this Circuit, the Court is not persuaded by Kalmanovitz's argument.

In *Blue Chip Stamps*, the complaint alleged that the offeror had intentionally made the prospectus "overly pessimistic in order to discourage [complainant] and other members of the allegedly large class whom it represents from accepting what was intended to be a bargain offer, so that the rejected shares might later be offered to the public at a higher price." *421 U.S. at 726*.

The Supreme Court held that the issue before it was: "whether respondent may base its action on Rule 10(b)-5 **[**29]** of the Securities and Exchange Commission without having either bought or sold the securities described in the allegedly misleading prospectus." *421 U.S. at 727*.

In a comprehensive opinion which traces the purpose of Section 10(b) and Rule 10(b)-5 and the judicially created cause of action to which they give rise, the Supreme Court, adopting the rationale of *Birnbaum v. Newport Steel Corp., 193 F.2d 461* (2d Cir.), *cert. denied*, *343 U.S. 956, 96 L. Ed. 1356, 72 S. Ct. 1051 (1952)*, held that ***HN13***[] *only actual* purchasers or sellers of a security, relying upon an alleged violation of Section 10(b), may bring an action for money damages based upon Section 10(b). (Emphasis added.) *See* Shivers v. Amerco, 670 F.2d 826, 829 (9th Cir. 1982); Sanders v. Thrall Manufacturing Co., 582 F. Supp. 945 [1983 Transfer Binder] Fed.Sec.L.Rep. (CCH) P 99,500 (S.D.N.Y. 1983); *see also* Landy v. Federal Deposit Ins. Corp., 486 F.2d 139, 156-58 (3d Cir. 1973), *cert. denied*, *416 U.S. 960, 40 L. Ed. 2d 312, 94 S. Ct. 1979 (1974)*.

The Court in *Blue Chip Stamps* stated very clearly the guidelines [12] for Section 10(b). **HN14**[] "The wording of § 10(b) directed at fraud 'in connection with the **[**30]** purchase or sale' of securities stands in contrast with the parallel antifraud provision of the 1933 Act, § 17(a), as amended, 68 Stat. 686, 15 U.S.C. § 77q, reaching fraud 'in the offer or sale' of securities. . . . When Congress wished to provide a remedy to those who neither purchase nor sell securities, it had little trouble in doing so expressly." 421 U.S. at 734 (citations omitted).

The Court also stated that underlying policy considerations of the *Birnbaum* **[*1397]** Rule advocate adherence to the rule. The Court then expressed its concern that the failure to follow the rule may result in "vexatious litigation" **[**31]** caused by a "widely expanded class of plaintiffs" bringing "strike" suits under Section 10(b) and Rule 10b-5. 421 U.S. at 737-41. In recent Supreme Court decisions, the Court has refused to ignore the literal, "operative language" of the securities statutes and has denied plaintiffs the statutory construction which they desired but which conflicted with that literal language. *See* Chiarella v. United States, 445 U.S. 222, 63 L. Ed. 2d 348, 100 S. Ct. 1108 (1980); Santa Fe Indus. v. Green, 430 U.S. 462, 97 S. Ct. 1292, 51 L. Ed. 2d 480 (1977); Ernst & Ernst v. Hochfelder, 425 U.S. 185, 47 L. Ed. 2d 668, 96 S. Ct. 1375 (1976). Furthermore, the Court has refused plaintiffs' requests that it supplement the existing securities statutes by providing a private right of action by implication where the statute itself said nothing about such a right. *See, e.g.,* Touche Ross & Co. v. Redington, 442 U.S. 560, 568-78, 61 L. Ed. 2d 82, 99 S. Ct. 2479 (1979) (construing Securities Exchange Act § 17(a)); Transamerica Mortgage Advisors, Inc. v. Lewis, 444 U.S. 11, 19-24, 62 L. Ed. 2d 146, 100 S. Ct. 242 (1979) (construing Investment Advisors Act § 206, 15 U.S.C. § 80b-6 (1976)); **[**32]** Piper v. Chris-Craft Indus., Inc., 430 U.S. 1, 24-42, 97 S. Ct. 926, 51 L. Ed. 2d 124 (1977) (construing Securities Exchange Act § 14(e)). While it is true that in many of these cases the Court supported its decisions with policy arguments and legislative history analyses, in most of them the Court emphasized that the language of the statute was at least the starting place of the Court's inquiry. *See, e.g.,* Chiarella v. United States, 445 U.S. 222, 226, 63 L. Ed. 2d 348, 100 S. Ct. 1108 (1980); Transamerica Mortgage Advisors, Inc. v. Lewis, 444 U.S. 11, 16, 62 L. Ed. 2d 146, 100 S. Ct. 242 (1979); Touche Ross & Co. v. Redington, 442 U.S. 560, 568, 61 L. Ed. 2d 82, 99 S. Ct. 2479 (1979); Piper v. Chris-Craft Indus., Inc., 430 U.S. 1, 24, 97 S. Ct. 926, 51 L. Ed. 2d 124 (1977); Santa Fe Indus v. Green, 430 U.S. 462, 472, 97 S. Ct. 1292, 51 L. Ed. 2d 480 (1977); Ernst & Ernst v. Hochfelder, 425 U.S. 185, 197, 47 L. Ed. 2d 668, 96 S. Ct. 1375 (1976). In a number of these cases, the Court intimated that the statutory language alone could determine the meaning of the statute, at least where the construction sought by the plaintiff conflicted with the precise **[**33]** literal language of the existing statute. Thus, in *Blue Chip Stamps*, Justice Powell, concurring, said:

> The courts already have inferred a private cause of action that was not authorized by the legislation. In doing this, however, it was unnecessary to rewrite the precise language of § 10(b) and Rule 10b-5. This (rewriting of the statutory language, which the Court refused to permit) is exactly what respondent . . . sought in this case.

421 U.S. at 759 (footnote omitted). The majority opinion in *Blue Chip Stamps* also recognized that in some circumstances the statutory language itself could be dispositive: "If Congress had legislated the elements of a private cause of action for damages, the duty of the judicial branch would be to administer the law which Congress enacted." Id. at 748.

When the Third Circuit Court of Appeals was faced with this issue, it refused to expand the rule beyond the exceptions noted by the Supreme Court. *See* Pittsburgh Terminal Corp. v. Baltimore and Ohio Railroad Company,

---

[12] The Court also noted that those who have a contractual right to purchase or sell securities have also been recognized as "purchasers" or "sellers" of securities for purposes of Rule 10b-5, not because of judicial conclusion that they were similarly situated to "purchasers" or "sellers" but because the definitional provisions of the 1934 Act grant them such a status. 421 U.S. at 751.

680 F.2d 933 (3d Cir. 1982) (the Court held that the conversion option in a convertible debenture qualifies as a contract for the purchase or sale of security). **[**34]**

Therefore, in the present case, this Court finds that Kalmanovitz failed to either purchase or sell any shares pursuant to the HBC Offer, and as a result, he lacks standing to maintain an action for money damages under either Section 10(b) or Rule 10b-5. [13]

[*1398] e. *Count VI: Illegal Agreement to Vote Pabst Treasury Stock*

Although the parties did not address the issue, because ***HN15***[] the state and federal claims are derived from "a common nucleus of operative fact," this Court has the power and may exercise its discretion and consider the pendent state claim even though the federal claims are dismissed. *See generally* United Mine Workers v. Gibbs, 383 U.S. 715, 16 L. Ed. 2d 218, **[**35]** 86 S. Ct. 1130 (1965), and Paine, Webber, Jackson & Curtis, Inc. v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 587 F. Supp. 1112 (D.Del. 1984).

In Count VI of his Complaint, Kalmanovitz alleges that: "If the terms contemplated by the Agreement in Principle and the Heileman Offer are consummated, the tendered shares of Pabst common stock will belong to Pabst or will be under the control of Pabst within the meaning of Section 160(c)." (8 *Del.C*. § 160) (D.I. 1, para. 73.)

Defendants argue that the tendered shares belonged to HBC at the time they were voted and because the plaintiff failed to allege that the Pabst shares HBC agreed to vote in the merger did not "belong to" Pabst, directly or indirectly, the plaintiff has failed to allege any basis for a violation of Section 160. (D.I. 166 at 32.)

Section 160(c) states:

> ***HN16***[] (c) Shares of its own capital stock *belonging to the corporation or to another corporation*, if a majority of the shares entitled to vote in the election of directors of such other corporation is held, *directly or indirectly*, by the corporation, shall neither be entitled to vote nor be counted for quorum purposes. Nothing in this section shall be **[**36]** construed as limiting the right of any corporation to vote stock, including but not limited to its own stock, held by it in a fiduciary capacity.

8 *Del.C*. § 160(c) (emphasis added). Although the language of 8 *Del.C* § 160(c) is unambiguous, there is a question as to the exact meaning of "directly or indirectly" and unfortunately the case law provides little guidance. In Italo Petroleum Corp. v. Producers' Oil Corp. of America, 20 Del.Ch. 283, 174 A. 276 (1934), the court was faced with an issue which arose under the predecessor to Section 160. [14] In that case, the court noted:

> The statute prevents the voting either directly or indirectly by a corporation of its own stock belonging to it. What can "indirectly" mean unless it be some such thing as having stock belonging to the corporation held in some third party's name and having that third party vote it? It requires some moments of reflection to discover any other possible device of indirection which the corporation could conjure up. The thought I have given to the matter, which I confess has not been lengthy, has failed to suggest any other. There may be other methods. But the one suggested is so obvious **[**37]** that it is reasonable to suppose that it certainly was dominant in the legislative mind when the section was enacted.
>
> There can be no doubt that if a corporation acquired its own stock and caused it to be held in the name of an individual who would vote it as ordered by the corporation's directors, the vote of the individual would be the vote, indirectly given, of the corporation. Nor can there be any doubt that if a corporation planned to buy its own

---

[13] The defendants also argue that: (a) plaintiff has failed to make his allegations with the requisite specificity and; (b) plaintiff failed to plead reliance. (D.I. 166 at 25-28.) Because the Court found that Kalmanovitz lacks standing to sue as a "purchaser or seller," the Court need not reach defendants' other arguments.

[14] Although *Italo Petroleum Corp*. deals with a statute which was later amended to the current edition of Section 160, subsection (c) existed in the wording of the statute *prior to* the amendment.

> stock and its directors, desiring to vote that stock in violation of the statutory inhibition, organized a wholly owned subsidiary to hold the stock and vote it, the scheme would prove abortive. It would be so crude as to lack even the merit of cleverness. The fiction of the corporate entity would in that case be brushed aside and the device unhesitatingly pronounced but **[*1399]** a mere scheme for the indirect voting by the corporation of its own stock in violation of the statute.

174 A. at 278.

[38]** It is defendants' position that there is nothing in the Complaint to support the allegation that Pabst directly or indirectly owned or controlled the shares purchased by Heileman and subsequently cancelled in the merger. Although there are allegations of an agreement between Pabst and Heileman, the agreement does not rise to the level of control, domination and dictation consistent with a parent-subsidiary relationship noted in *Italo Petroleum Corp*.

As a result, plaintiffs' claim that the defendants have violated 8 *Del.C*. § 160(c) of the Delaware Corporation Law will be dismissed.

f. *Count VII: Smith's Breach of Fiduciary Duty*

In Count VII of the Complaint (D.I. 1, paras. 76-82), plaintiffs allege that defendant Smith, the Chief Executive Officer of Pabst, breached his duty to the Pabst shareholders under Delaware law. Before reaching the merits, the Court must first determine whether the plaintiff has standing to bring this action.

(1) *Derivative Nature of the Action*.

HN17[] Whether a claim is individual or derivative is determined from the body of the complaint, not the label employed by counsel. Crane v. Harsco, 511 F. Supp. at 304. Plaintiffs' claim here is **[**39]** that Smith breached his fiduciary duties to Pabst and its shareholders "through the mismanagement, waste and conversion of assets." (D.I. 1, para. 82.)

Although Kalmanovitz purports to bring these claims both individually and derivatively on behalf of the corporation, it is clear from every claim alleged by Kalmanovitz under Count VII that it constitutes a derivative claim because each alleged injury is one which would be suffered by all the stockholders of Pabst due to their status as stockholders and not as the result of any unique relationship with the corporation. *See* Elster v. American Airlines, 34 Del. Ch. 94, 100 A.2d 219, 222 (1953); *Bokat v. Getty Oil Company, 262 A.2d 246, 249 (Del.Supr. 1970)*.

HN18[] The plaintiffs' standing to pursue derivative claims alleging violations of Delaware common law is also a question of substantive Delaware law. *See* Crane v. Harsco, 511 F. Supp. at 304 (alleged violations of Delaware law in connection with a tender offer were reviewed under Delaware law). It is well established under Delaware law that a plaintiff who brings a derivative suit on behalf of a corporation must be a stockholder of the corporation at the time he commences **[**40]** the suit and must maintain that status throughout the course of the litigation. Lewis v. Anderson, 453 A.2d 474 (Del.Ch. 1982), *aff'd*, 477 A.2d 1040 (Del. 1984); Heit v. Tenneco, 319 F. Supp. 884 (D.Del. 1970).

In *Lewis v. Anderson*, the Delaware Supreme Court held that "a plaintiff who ceases to be a shareholder, whether by reason of a merger or for any other reason, loses standing to continue a derivative suit. . . ." 477 A.2d at 1049. *Lewis v. Anderson*, a suit by a Conoco stockholder alleging derivative claims was dismissed when, subsequent to the filing of the suit, a third party (DuPont Holdings, Inc., a wholly-owned subsidiary of E.I. duPont de Nemours and Company) acquired all of the outstanding stock of Conoco through a tender offer followed by a merger. The court, in its analysis, stated:

> The right to a pending cause of action is an asset of the merged corporation which passes to the corporation surviving the merger. Under the facts of this case, any right to equitable relief possessed by the original Conoco against the individual defendants, its officers and directors, passed to Du Pont Holdings, and thus to the present Conoco, by virtue of the **[**41]** merger. Likewise, by the terms of the same merger, the plaintiff

> Lewis ceased to be a shareholder of Conoco -- either new or old -- and instead became a shareholder of Du Pont. The company of which the plaintiff is now a shareholder, Du Pont, now owns all of the stock of **[*1400]** the present Conoco and, if the original Conoco had a claim for relief against its former officers and directors for the reasons set forth in the Complaint in this action, that claim is now owned by the present Conoco. The shareholder beneficiary of such a claim is now Du Pont, and not the plaintiff Lewis and the other shareholders of the original Conoco as was the situation when the suit was filed.

477 A.2d at 1043.

The court recognized only two exceptions to this rule -- where the merger itself is the subject of a claim of fraud (i.e., a device to eliminate the derivative litigation) or where the merger is a holding company reorganization which does not affect plaintiff's ownership of the business enterprise. *477 A.2d at 1046, n. 10*. Neither exception is applicable in this case. As in *Lewis*, "plaintiff has not asserted that the merger was perpetrated [to deprive Pabst] of its claim **[**42]** against the individual defendant and the merger was clearly not a reorganization resulting in a holding company. . . ." *Id. See also Schreiber v. Carney, 447 A.2d 17, 21-22 (Del.Ch. 1982)*.

The plaintiffs also allege in a conclusory fashion that unlike the plaintiff in *Lewis*, Kalmanovitz attacks the fairness of the merger and wrongdoing by the acquiring corporation. In addition, after stating the two exceptions to the rule regarding standing and mergers, Kalmanovitz concludes:

> These exceptions are both applicable to this case. Plaintiff here possesses the same equitable derivative standing as the plaintiffs in the above cited cases. The plaintiff should have standing to maintain a derivative suit to correct an alleged breach of fiduciary duty.
>
> Plaintiff possesses equitable derivative standing to bring this claim against defendants Smith. Plaintiff falls within the standing exception of both *Bokat* and *Schreiber*. Accordingly, defendants' motion to dismiss must be denied.

(D.I. 168 at 30.) Needless to say, without any factual support, this Court is not persuaded by plaintiffs' "arguments."

However, the Court does find that as a result of the merger, **[**43]** Kalmanovitz has ceased to have any equity interest, direct or indirect, in Pabst. Plaintiffs' claims do not fit within either exception to the broad rule that a plaintiff who, as a result of a merger, loses his stockholder status, loses his standing to pursue derivative claims. As a result, Count VII must be dismissed due to plaintiffs' lack of standing. [15]

g. *Count VIII: Conspiracy*

Count VIII of the Complaint alleges *in toto*:

> 83. Plaintiffs repeat and reallege each and every allegation contained in paragraphs 1 through 82 as if **[**44]** fully set forth herein.
> 84. Each defendant has agreed and conspired with one or more of the other defendants to violate the laws of the United States and the State of Delaware, as set forth above.

(D.I. 1, paras. 83-84.) It is a longstanding rule in the Third Circuit that a mere ***HN19***[] general allegation of conspiracy is insufficient. *Black & Yates, Inc. v. Mahogany Assoc., 129 F.2d 227 (3d Cir. 1942)*; *Leeward Petroleum, Ltd. v. Mene Grande Oil Co., 415 F. Supp. 158 (D.Del. 1976)*. A general averment of conspiracy or collusion without alleging the facts which constituted such conspiracy or collusion is a conclusion of law and is insufficient. As has been noted:

---

[15] Because the Court finds that Kalmanovitz no longer has standing to pursue the claim that defendant Smith had breached his fiduciary duty to the Pabst shareholders, this Court need not reach defendants' other arguments that the derivative claims must be dismissed because: "(a) of plaintiff's unexcused failure to make a demand on the Pabst Board of Directors and; (b) plaintiff could not adequately represent the interest of the other stockholders." (D.I. 166 at 37-41.)

> Generally, fraud, conspiracy and collusion must be charged by allegations of fact; and general allegations of fraud, fraudulent intent, and conspiracy or collusion, without a statement of supporting facts, are conclusions of law and are insufficient.

[*1401] 71 C.J.S. *Pleading* § 21. ***HN20***[] The plaintiffs must plead with particularity the "circumstances" of the alleged wrongdoing in order to place the defendants on notice of the precise misconduct with which they are charged. *See Seville Industrial* **[**45]** *Machinery Corp. v. Southmost Machinery Corp., 742 F.2d 786 (3d Cir. 1984)*. Only allegations of conspiracy which are particularized, such as those addressing the period of the conspiracy, the object of the conspiracy, and certain actions of the alleged conspirators taken to achieve that purpose, will be deemed sufficient. *See, e.g., James Julian, Inc. v. Raytheon, Co., 499 F. Supp. 949, 955 (D. Del. 1980)*. To establish the specificity of their conspiracy allegations, plaintiffs do no more than refer the Court to the eighty-one paragraphs included, by reference, in Count VIII and state that they "give rise to an inference of conspiracy." [16] (D.I. 168 at 34.) Such an inference, even if it could be gleaned from the Complaint, would be no substitute for the requirement that the circumstances of the conspiracy be plead with specificity.

[46]** As a result, Count VIII will be dismissed.

h. *Count IX: Purported Threat to Competition -- Claims Are Moot*

In Count IX of his Complaint, Kalmanovitz contends *inter alia* that "unless enjoined, the effect of the Heileman/Pabst Offer challenged herein will be substantially to lessen competition or tend to create a monopoly" in the malt beverage business due, essentially, to the combined resources of Pabst, Olympia and Heileman and the elimination of Pabst from the market. (D.I. 1, paras. 116-19.) The claim is brought pursuant to Section 7 of the Clayton Act, *15 U.S.C. § 18*, which prohibits corporate mergers or acquisitions the effect of which "may be to substantially lessen competition, or tend to create a monopoly." Plaintiffs unsuccessfully attempted to enjoin the HBC Offer in December of 1982. (D.I. 167, Ex. H.) Subsequently, the Pabst/Heileman transaction was consummated and both Heileman and HBC were removed from any stock ownership position in either Pabst or Olympia.

The sole basis of the plaintiffs' Count IX was plaintiffs' apparent apprehension of the imminent injury that Heileman's control of Pabst would purportedly cause in the market for malt beverages. [17] As **[**47]** this Court noted:

> Movants [Kalmanovitz and two of his brewing companies] have argued . . . that the proposed Final Judgment [i.e., consent decree] would not effectively prevent Heileman from exercising control over all the assets of Pabst and Olympia. This contention, however, has by time gone by the board. With the consummation of the exchange transaction on March 19, 1983, Heileman has transferred all of its Pabst and Olympia stock to Pabst in exchange for the retained assets and Pabst *again has become an independent company beyond Heileman's*

---

[16] In support of the allegations in Count VIII, Kalmanovitz in a conclusory manner and without reference to any specific part of the Complaint states:

> Plaintiff has pleaded conspiracy with great specificity. Plaintiff sets forth 81 paragraphs covering some 21 pages of specific facts before setting forth the conspiracy allegation. Plaintiff has set out the parties to the conspiracy, the period of the conspiracy, the object of the conspiracy and numerous certain actions of the conspirators taken to achieve that purpose. The allegations are precise enough to give rise to an inference of conspiracy and therefore defendants' motion to dismiss must fail.

(D.I. 168 at 34.)

[17] For example, in D.I. 1, para. 104, plaintiffs allege that "a recent proposed Consent Decree between Heileman and the Department of Justice will probably be rejected. . . ." The Consent Decree was not rejected. In para. 109, plaintiffs allege "there is no assurance that the Pabst or Olympia mergers will be consummated on any basis or upon the same terms as described in the HBC/Heileman Offer." These mergers were consummated substantially in accordance with the terms of that offer with Heileman relinquishing all control over the operations of Pabst and Olympia. Again, in paras. 113-16, plaintiffs contend that various regional markets will be seriously altered by "Heileman control of Pabst and Olympia" and offer figures demonstrating how the "combination" of these three impacts on the markets to lessen competition. No such "combination" ever occurred.

> *control.* At that point, any **[*1402]** previous concern about the adequacy of the proposed judgment in precluding Heileman from exercising any control over, or retaining any interest in, the non-retained assets has become moot. (emphasis added)

United States v. G. Heileman Brewing Co., 563 F. Supp. 642, 651 (D.Del. 1983). The consent decree, as suggested, prevented Heileman from retaining any interest in or control over Pabst and Olympia assets except for specific assets acquired without governmental objection. (*Id. at 644*.)

[48]** Plaintiffs also argued that Count IX is not moot on the ground that post-acquisition evidence is "significant in determining the validity of the merger." However, plaintiffs ignore the fact that the post-acquisition evidence here conclusively demonstrates that the very basis for the Section 7 claim -- that Heileman would continue to control all Pabst/Olympia assets -- has evaporated. As this Court found in connection with the government consent decree proceedings, any claim based on that theory is now moot. *United States v. Heileman Brewing Co., 563 F. Supp. 642, 650 (D.Del. 1983)*.

i. *Count X: Lack of Standing to Assert Violation of Section 7 of the Clayton Act*

In Count X, Kalmanovitz again claims the right to sue the defendants under Section 7 of the Clayton Act, i.e., *15 U.S.C. § 18*. Count X is based on a claim that, subsequent to a successful completion of the HBC/Heileman tender offer and the exchange of shares for assets with Pabst, what remains of Pabst/Olympia "will not be viable as a competitor" in the production, distribution and sale of malt beverages in the United States. (D.I. 1 at 31-32.) ***HN21***[] In order to have standing to sue under the antitrust laws, generally **[**49]** a plaintiff must adequately allege (1) a violation of the ***antitrust law***; (2) injury to his business or property; and (3) a causal relationship between the violation of his injury, that is, that the injury complained of was caused by the antitrust violation charged. *See* Von Kalinowski, *Antitrust Laws and Trade Regulation, § 101.02, Standing to Sue* (1983 ed.); *see, e.g., Loeb v. Eastman Kodak Co., 183 F. 704 (3d Cir. 1910)*.

Kalmanovitz's role as a competitor does not give him automatic standing to sue under the antitrust laws. *Bayou Bottling, Inc. v. Dr. Pepper Co., 725 F.2d 300* [1984-1] Trade Cases (CCH) P 65,866 (5th Cir. 1984); *Pennzoil Co. v. Texaco Inc*., [1984-1] Trade Cases P 65,848 (N.D.Okla. 1984). Appropriate injury must be pleaded and the plaintiffs have failed to cogently claim how the alleged non-viability of the post-merger Pabst would in any manner *injure them*. Plaintiffs claim only that, as competitors, the "six separate and distinct injuries" contained in Paragraph 120 of Count IX, and incorporated by reference in Paragraph 120 of Count X, constitute the injury necessary to confer standing. (D.I. 168 at 36.) The alleged injuries set forth **[**50]** in Paragraph 119, however, are all premised on Heileman's continued ownership of Pabst, and are therefore inapposite to the Count X claim that competition will be lessened because the Pabst that remains, after the transactions with Heileman are completed, will not be a viable competitor.

With respect to the remaining effects alleged in paragraph 121 of Count X, there has been *no* attempt to show that *plaintiffs* have suffered any injury at all, let alone to make the required showing that plaintiffs have suffered "*antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. Indeed, there is no way that plaintiffs could make the required showing, since the alleged antitrust violation is Pabst's weakness as a competitor and since such weakness would benefit, not hurt, its competitors such as Kalmanovitz. See *Schoenkopf v. Brown & Williamson Tobacco Corp., 637 F.2d 205 (3d Cir. 1980)*.

Plaintiffs' theory of injury under Count X does not meet the threshold standing **[**51]** **[*1403]** requirements, therefore, Count X will be dismissed. [18]

---

[18] Plaintiffs' answering memorandum cites *Blue Shield of Virginia v. McCready, 457 U.S. 465, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*, for the general proposition that "competitors *may* be able to prove antitrust injury and thus have standing." (D.I. 168 at 36; emphasis added.) The parties do not disagree with this general proposition. However, in some circumstances, such as a

[52]** Accordingly, the Court finding that Counts I through X are without merit, those counts will be dismissed and summary judgment entered thereon in favor of defendants and against plaintiffs.

IV. PLAINTIFFS' *RULE 54(b)* MOTION TO CERTIFY

This consolidated litigation as above captioned originally consisted of three separate law suits. The first was the twelve count complaint filed in this Court as C.A. No. 82-797. The second was the two count complaint brought by plaintiffs in the United States District Court for the Northern District of California (the "California District Court"). (D.I. 41.) The third was brought by the plaintiffs in the Superior Court of California for the County of Marin (the "California State Court action"). Defendants thereafter removed the latter action to the California District Court, consolidated with the second action, and then upon defendants' motion transferred to this Court pursuant to *28 U.S.C. § 1404(a)*. (D.I. 70.) Upon the transfer of California actions here, those actions were consolidated with C.A. No. 82-797.

In *Kalmanovitz v. G. Heileman Brewing Co., Inc., 576 F. Supp. 922 (D.Del. 1983)*, this Court dismissed Counts XI and XII of the complaint **[**53]** in C.A. No. 82-797 and both Counts of the California District Court complaint against all of the named defendants. (D.I. 139.) In accordance with this opinion, the Court will enter an order dismissing all of the remaining counts (Count I through X) of the complaint in C.A. No. 82-797 against all of the named defendants. These dismissals result in leaving only one claim outstanding and unresolved. The unresolved claim is found in the complaint originally filed by the plaintiffs in the California State Court action against only defendants Irwin Jacobs, Dennis Mathisen, Gerald A. Schwalbach and Daniel T. Lindsay (the "Jacobs Group") for breach of contract. (D.I. 71, Ex. A.) In that complaint plaintiffs allege that the individuals of the Jacobs Group by a letter dated November 18, 1982, unconditionally bound themselves to pay plaintiffs fifty percent of all proceeds should the Jacobs Group sell its Pabst shares to others for more than $24 per share. [19]

[54]** Since plaintiffs' breach of contract claim against the Jacobs Group is the only one which remains unresolved in this consolidated litigation, the Court finds no just reason exists for delay in entering a final judgment on all claims which were dismissed on November 21, 1983, or by the order to be entered today. This is so because the major claims involving federal securities violations, antitrust violations and tortious interference with contract claims have already been timely decided. The sole remaining breach of contract claim is subsidiary and unrelated to those issues and it involves fewer than all the multiple parties to this suit. ***HN22***[] It would be unduly harsh and wholly unrealistic to delay an appeal on the major unrelated issues until after trial of the subsidiary breach of contract claim. Accordingly, the Court will enter a *Rule 54(b)* certification on the claims already decided.

[*1404] An order will be entered in accordance with this Opinion.

End of Document

---

boycott directed against a competitor of one of the parties to a conspiracy, the competitor is injured by the violation and has standing. *See, e.g., Klor's, Inc. v. Broadway Hale Stores, Inc., 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*. Such is not the case here. Neither this general proposition nor *McCready* suggests that Kalmanovitz has standing on the facts which he alleges. Indeed, *McCready*, which held that a customer had sustained antitrust injury, did not in any way alter, but rather reaffirmed, the requirement of *Brunswick* that plaintiffs have suffered antitrust injury in the particular case in order to have standing. *See 457 U.S. at 482-84*.

[19] On November 21, 1983, the Court denied plaintiffs' motion for summary judgment on their breach of contract claim because material facts were in dispute. *Kalmanovitz v. G. Heileman Brewing Co., Inc., 576 F. Supp. at 930-31*.

HN3[] Sherman Act, Claims

Section 1 of the Sherman Act, *15 U.S.C.S. § 1*, prohibits every contract, combination, or conspiracy, in restraint of trade or commerce among the several states. To establish a violation of that section, a plaintiff must show evidence of concerted action that unreasonably restrains trade. If an agreement is manifestly anticompetitive, it is conclusively presumed to be unreasonable and therefore deemed illegal per se. Otherwise, the agreement must be analyzed under the rule of reason, which requires the factfinder to determine whether, under all the circumstances of the case, the restrictive practice imposes an unreasonable restraint on competition. Essential to a finding of a violation is concerted action; unilateral action is not proscribed.

HN4[] **Vertical Restraints, Resale Price Maintenance**

Any combination formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity in interstate or foreign commerce is illegal per se under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*. Pursuant to this rule, the United States Supreme Court has condemned horizontal agreements among competitors to fix prices, as well as vertical resale price maintenance agreements.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN5[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The per se rule applies to an agreement to fix the price to be charged in transactions with third parties, not between the contracting parties themselves.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Resale Price Maintenance

HN6[] **Vertical Restraints, Price Fixing**

The United States Supreme Court has not condemned vertical price-fixing outside of the resale price maintenance context.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] **Price Fixing & Restraints of Trade, Vertical Restraints**

Resale price fixing is a per se violation.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN8[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

It is only after considerable experience with certain business relationships that courts classify them as per se violations of the Sherman Act, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing

To establish proof of an illegal boycott under the Sherman Act, *15 U.S.C.S. § 1*, a plaintiff must show concerted action with a purpose either to exclude a person or group from the market, or to accomplish some other anti-competitive objective, or both.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN10[] Practices Governed by Per Se Rule, Boycotts

Some evidence of concerted activity directed at the alleged victims of the boycott must be offered for the case to survive summary judgment.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN11[] Monopolies & Monopolization, Actual Monopolization

See the Sherman Act, *15 U.S.C.S. § 2*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN12[] Monopolies & Monopolization, Actual Monopolization

To establish the offense of monopolization under the Sherman Act, *15 U.S.C.S. § 2*, a plaintiff must show: (1) the possession of monopoly power in the relevant geographic and product markets; and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of superior product, business acumen or historic accident. The relevant geographic market is the area in which a potential buyer may rationally look for the goods or services he or she seeks; boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN13[] **Monopolies & Monopolization, Actual Monopolization**

Monopoly power is generally defined as the power to control prices or to exclude competition, and the size of market share is a primary determinant of whether monopoly power exists.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Criminal Law & Procedure > ... > Inchoate Crimes > Attempt > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Specific Intent

HN14[] **Scope, Monopolization Offenses**

To establish the offense of an attempt to monopolize under the Sherman Act, *15 U.S.C.S. § 2*, a plaintiff must show: (1) a specific intent to monopolize; and (2) the consequent dangerous probability of success within the relevant geographic and product markets. In proving specific intent, a mere intention to prevail over rivals or improve market position is insufficient. Even an intent to perform acts that can be objectively viewed as tending toward the acquisition of monopoly power is insufficient, unless it also appears that the acts were not predominantly motivated by legitimate business aims. Direct evidence of specific intent need not be shown; it may be inferred from predatory or exclusionary conduct.

The factual predicate of an expert's opinion must find some support in the record.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN17[] **Prerequisites for Class Action, Adequacy of Representation**

According to *Fed. R. Civ. P. 23(a)*, a class member cannot serve as a representative party on behalf of the entire class unless, inter alia, he or she will fairly and adequately protect the interests of the class. Adequate representation depends on two factors: (1) the plaintiff's attorney must be qualified, experienced, and generally able to conduct the proposed litigation; and (2) the plaintiff must not have interests antagonistic to those of the class.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN18[] **Standards of Review, Abuse of Discretion**

Where the district court appropriately applies the criteria of *Fed. R. Civ. P. 23(a)*, it has broad discretion in determining whether the action may be maintained as a class action, and it is subject to reversal only for an abuse of that discretion.

Counsel: Barry E. Carter, Esquire, N.W., Washington, District of Columbia, Thomas A. Beckley, Esquire, John G. Milakovic, Esquire, Beckley & Madden, Harrisburg, Pennsylvania, for Appellants.

Opinion by: ALDISERT

Opinion

[*251] OPINION OF THE COURT

ALDISERT, Chief Judge.

This appeal requires us to decide whether Blue Shield's prepaid dental service program in Pennsylvania violates the antitrust laws. Several Pennsylvania dental associations and individual dentists appeal from a summary judgment dismissing their antitrust and state law claims brought against the Medical Service Association of Pennsylvania, doing business **[**2]** as Pennsylvania Blue **[*252]** Shield. [1] Appellants argue that Blue Shield

[*] Honorable Edward D. Re, Chief Judge of the United States Court of International Trade, sitting by designation.

[1] We have jurisdiction under *28 U.S.C. § 1291* because the district court entered a final judgment certified pursuant to *Rule 54(b), F.R. Civ. P.* That rule provides in relevant part:

engaged in a price-fixing conspiracy and a group boycott in violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1*, attempted to monopolize and monopolized in violation of *§ 2* of the Act, *15 U.S.C. § 2*, and that the district court abused its discretion in refusing to certify a subclass of cooperating dentists for treble damages purposes. We conclude that appellants' contentions are without merit, and therefore affirm the judgment of the district court.

[3]** I.

This lawsuit is a vestige of an ill-fated action brought by the Commonwealth of Pennsylvania against nine dental associations in the state charging that they ran afoul of antitrust laws and Pennsylvania law by discouraging dentists from participating in the Blue Shield program. Essentially, the complaint accused the dentists of restraining trade under *§ 1* of the Sherman Act. The associations, however, countered with an antitrust action of their own, filing a third-party complaint against Blue Shield charging violations of *§§ 1* and *2* of the Sherman Act, alleging that the determination of fees paid dentists by Blue Shield constitutes price fixing and a boycott, and further, that with its market power and through anticompetitive acts, Blue Shield is attempting to or is monopolizing certain relevant Pennsylvania markets and submarkets. They also asserted state law claims and requested treble damages, injunctive relief and punitive damages.

After extensive discovery, the state dismissed the Commonwealth's complaint against the associations over the objections of Blue Shield, leaving only the third-party action to survive. Blue Shield then counterclaimed against the original **[**4]** defendants, an additional dental society and five individual dentists, asserting a violation of *§ 1* of Sherman and alleging a conspiracy to boycott Blue Shield's dental programs by causing their members to terminate their participating agreements with Blue Shield, to fix charges for services paid under Blue Shield's dental program, to impede Blue Shield's cost containment efforts and to discourage dental insurance purchasers from enrollment or continued enrollment in Blue Shield's dental programs. This counterclaim also asserted causes of action under state law including tortious interference with contractual relations, civil conspiracy and trade libel. But there was more to come. Four of the five individual dentists then filed a class action in the form of a counterclaim against Blue Shield, and, like the dental associations, alleged Sherman *§§ 1* and *2* violations. Remaining are the litigants presently before us. Arrayed on one side are the Pennsylvania Dental Association, Delaware County Dental Society, Erie County Dental Association, Harrisburg Area Dental Society, Luzerne County Dental Society, Montgomery-Bucks Dental Society, Odontological Society of Western Pennsylvania, **[**5]** Scranton Dental Society, York County Dental Society, Dennis W. King, Charles M. Ludwig, Theodore R. Paladino, and Thomas L. Perkins. On the other side are Blue Shield and Donald S. Mayes, one of its officers, being sued in his own right. [2]

We consider in this appeal, in its *Rule 54(b)* context, only the summary judgment entered in favor of Blue Shield in the third-party complaint and in the class action counterclaim asserted against it. Not before us, and presumably still very much **[*253]** alive in the district court, is Blue Shield's counterclaim against the appellants.

II.

The controversy concerns Blue Shield's prepaid dental service program in Pennsylvania. Under that program, Blue Shield purchases dental services from providers in bulk and sells them to group subscribers only. It does this through a series of provider and subscriber contracts, covered by what is known as its Penn Dental I program. Blue Shield **[**6]** also markets an indemnity dental program known as Penn Dental V. Dentists who choose to participate with Blue Shield enter into provider contracts that obligate them to accept a set fee from Blue Shield as their sole payment for providing services to Blue Shield subscribers. The reimbursement system establishing that

---

(b) **Judgment Upon Multiple Claims or Involving Multiple Parties**. When more than one claim for relief is presented in an action, whether as a claim, counterclaim, cross-claim, or third-party claim, or when multiple parties are involved, the court may direct the entry of a final judgment as to one or more but fewer than all of the claims or parties only upon an express determination that there is no just reason for delay and upon an express direction for the entry of judgment.

[2] For the purpose of this opinion we will refer to both appellees as Blue Shield.

set fee is based on the "usual, customary, and reasonable" (UCR) fees charged by Pennsylvania dentists for specific dental procedures.

Blue Shield enters into subscriber contracts with patients that provide that if covered services are obtained from a participating dentist, the subscriber will not be required to pay any additional or out-of-pocket amounts. Payment is made directly to the participating dentists by Blue Shield because participating dentists have agreed to accept the UCR fee for their services.

The subscriber contracts also cover dental services performed by dentists who do not participate in the Blue Shield program (non-participating dentists). But Blue Shield subscribers are not assured of paid-in-full service benefits if they obtain services from non-participating dentists. Blue Shield will pay only the predetermined UCR fee. Moreover, payment **[**7]** for non-participating dental services is made directly to the subscriber and not to the dentist.

Thus, generally speaking, the essential difference between participating dentists and non-participating dentists in the Blue Shield program is twofold: where the dentist participates, he is paid directly by Blue Shield and he agrees to accept the UCR fee as payment in full for services rendered a subscriber. Dentists who do not participate do not agree to be bound by the UCR fee; subscribers are personally responsible for any amount charged by such dentists in excess of this fee; moreover, the Blue Shield reimbursement is paid directly to the subscriber and not to the dentist. [3]

[8]** The thrust of appellants' price fixing complaint focuses primarily on Blue Shield's method of determining the UCR fee. It therefore becomes necessary to discuss first the relationship of participating dentists to the Blue Shield structure and second the mechanics of determining the UCR charge.

A.

Blue Shield's by-laws provide that its business shall be managed by a board of directors and that lay persons shall constitute one-half of the board. That provision is in accordance with *40 Pa. Cons. Stat. Ann. § 6328(b)(1)*, which requires that at least 50% of Blue Shield's board consist of lay persons. The board consists of 32 members, 16 lay persons and 16 doctors. Only two members of the board are dentists.

Standing committees of various composition exist within the Blue Shield corporate structure to consider matters referred to them by the board or management of Blue Shield. Committee members are appointed by the chairman of the board. Two of these committees, of which dentists constitute a majority, command our interest.

The Dental Policy Committee (now known as the Dental Affairs Committee) considers matters referred to it by the board or by management and forwards its **[**9]** recommendations to the board for approval. The specific functions and responsibilities of the policy committee include: (1) examination and determination of the validity **[*254]** of new dental procedures; (2) review and reappraisal of current payment policies; (3) development of guidelines for maintaining a UCR mechanism; (4) development of guidelines for establishing fee schedule allowances; (5) provision of guidance to enhance provider participation; (6) review and reappraisal of the *Regulations for Participating Doctors*; and (7) review and appraisal of new health delivery systems. Many of these matters may reasonably be considered only by dental practitioners. Although the Blue Shield staff selects the majority of items on the committee's agenda, items are placed on it pursuant to requests from non-participating dentists as well as the public.

The Dental Review Committee is responsible for reviewing and making recommendations on matters affecting the status of dentists who participate in the Blue Shield program. These matters relate to conduct incompatible with participating dentist status, such as failing to verify charges with Blue Shield. The committee also considers **[**10]**

---

[3] Other differences between participating and non-participating dentists include Blue Shield's refusal to grant non-participating dentists "excepted" dentist status, thereby requiring them to get pre-approval for new, expensive treatment, and its refusal to allow non-participating dentists to use the simpler claim forms used by participating dentists.

disputes between Blue Shield and dentists involving questions of professional ethics. The composition of the review committee is established pursuant to Blue Shield's by-laws in accordance with state statute, *40 Pa. Cons. Stat. Ann. § 6324(c)*.

B.

The parties do not dispute the mechanics of determining UCR charges. Under this system, when Blue Shield receives a bill with a dentist's fee, or charge, for a covered service, Blue Shield does not automatically allow payment of the full charge. Rather, the "allowance" may be different from the dentist's fee because of the operation of the three separate "screens" or artificial calculations -- usual, customary, and reasonable.

The "usual charge" screen looks at the fees that an individual dentist most frequently charges patients for the procedure performed (*e.g.*, a particular type of filling or crown) during a specific time period in the past (base period). These usual charges (sometimes referred to as a dentist's profile) range from low to high, and the "usual charge" screen will set the maximum allowance at a specific percentile of the past charges. Since 1979, Blue Shield's usual charge screen has been the 75th percentile.

[11]** The "customary charge" for a particular procedure is measured as a function of all the "usual charges" of all dentists in Pennsylvania in the same speciality classification (of which there are five) during a designated base period. Since at least 1975, Blue Shield limits its allowance for any particular procedure to the 90th percentile of those charges. In recent years it has used the "usual charges" of the preceding calendar year as the base period.

The reasonable charge screen applies only in special circumstances, *e.g.*, when a dental procedure involves unique problems that require more time by the dentist. When special circumstances exist, Blue Shield might pay a larger percentage of the fee than would normally be allowed under the usual and customary charge screens. The extra allowance is determined by referring the claim to one of Blue Shield's dental advisors -- a practicing dentist who works part-time for Blue Shield. The reasonable charge screen apparently is relevant to only a small percentage of claims; the usual and customary charge criteria come into play much more often.

III.

It bears emphasis that the state initiated this action in 1981 by filing a complaint **[**12]** against the dental associations charging the associations with violating the antitrust laws by encouraging dentists to terminate their Blue Shield provider contracts. With the dispute of those particular parties behind us, and limited to a *Rule 54(b)* determination, we must now consider the reverse argument: whether Blue Shield has violated the federal antitrust laws.

Appellants first argue that Blue Shield engaged in a price-fixing conspiracy and an illegal group boycott in violation of *§ 1* of the Sherman Act. They then argue that Blue Shield monopolized and attempted to **[*255]** monopolize certain Pennsylvania dental services markets in violation of *§ 2* of the Sherman Act. Finally, four of the individual dentist appellants argue that the district court erred in refusing to certify a subclass of cooperating dentists for treble damages purposes.

Our standard of review follows settled precepts. Because the district court rejected appellants' Sherman *§§ 1* and *2* arguments on summary judgment, we must affirm if we determine that there are no disputed issues of material fact and that Blue **[**13]** Shield is entitled to judgment as a matter of law. *Coastal States Gas Corp. v. Department of Energy, 644 F.2d 969, 978-79 (3d Cir. 1981)*. ***HN1***[] Although summary judgment should be used sparingly in complex antitrust litigation, *Poller v. Columbia Broadcasting System, 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962)*, its use is not forbidden, *see* *Harold Friedman, Inc. v. Kroger Co., 581 F.2d 1068, 1071 (3d Cir. 1978)*. ***HN2***[] As to the district court's refusal to certify the subclass, we must affirm in the absence of an abuse of discretion. *Wetzel v. Liberty Mutual Insurance Co., 508 F.2d 239, 245* (3d Cir.), *cert. denied*, *421 U.S. 1011, 44 L. Ed. 2d 679, 95 S. Ct. 2415 (1975)*.

IV.

As can be immediately perceived, appellants' arguments do not follow a narrow compass. They range far and wide through a thicket of ***antitrust law***. We are required to discuss in one opinion such diverse concepts as horizontal and **[**14]** vertical price-fixing agreements, group boycotts, attempts to monopolize and actual monopoly in alternative markets, and, as a separate issue, the question of certifying a class action. All of this demands a discussion much more extensive and prolonged than that which we prefer to set forth in a typical decision of this court.

We turn first to appellants' restraint of trade arguments. ***HN3***[] *Section 1* of the Sherman Act prohibits "every contract, combination . . . or conspiracy, in restraint of trade or commerce among the several States." *15 U.S.C. § 1*. To establish a violation of *§ 1*, plaintiff must show evidence of concerted action that unreasonably restrains trade. *Standard Oil Co. of New Jersey v. United States, 221 U.S. 1, 55 L. Ed. 619, 31 S. Ct. 502 (1911)*. If an agreement is manifestly anticompetitive, it is conclusively presumed to be unreasonable and therefore deemed illegal *per se. Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 49-50, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*; *Northern Pacific Railway Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*. **[**15]** Otherwise, the agreement must be analyzed under the rule of reason, which requires the factfinder to determine whether, under all the circumstances of the case, the restrictive practice imposes an unreasonable restraint on competition. *Chicago Board of Trade v. United States, 246 U.S. 231, 238, 62 L. Ed. 683, 38 S. Ct. 242 (1918)*. Essential to a finding of a *§ 1* violation is concerted action; unilateral action is not proscribed. *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 79 L. Ed. 2d 775, 104 S. Ct. 1464 52 U.S.L.W. 4341, 4343 (1984)*; *Malley-Duff & Associates, Inc. v. Crown Life Insurance Co., 734 F.2d 133, 141 (3d Cir. 1984)*. Here, appellants argue that Blue Shield's conduct can be condemned as either illegal price-fixing or an illegal boycott, both *per se* violations of Sherman *§ 1*. [4] We proceed to consider first appellant's price-fixing allegations and then their boycott claim.

[16]** **[*256]** V.

To determine whether Blue Shield has engaged in illegal price-fixing, we must decide whether Blue Shield may, consistent with the Sherman Act, establish a "usual, customary, and reasonable" reimbursement system and enter into bilateral provider agreements with individual dentists that obligate them to accept that reimbursement as payment in full for their services. Appellants contend that such an arrangement is illegal *per se* because Blue Shield did not act unilaterally in setting the reimbursement formula. They maintain that those dentists participating in the Blue Shield program and competing with them conspired and acted through Blue Shield, as their agent, to establish and implement the UCR system. This argument appears to be based on a theory of structural horizontal conspiracy with a vertical link. It is dependent upon proof that participating dentists, through their majority membership on the two Blue Shield committees, actually controlled the establishment of the UCR system implemented by Blue Shield.

Appellants also contend that the arrangement with Blue Shield is illegal *per se* because the dentists did not decide independently to participate. **[**17]** They argue that Blue Shield economically coerced them to enter into the provider agreements and accept the UCR reimbursement formula contained therein. This argument advances a theory of vertical restraint. It is dependent upon proof that the provider agreements themselves were the product of coercion or collaboration rather than merely bilateral contracts for the sale and purchase of services at a price unilaterally fixed by the purchaser and individually agreed to by the seller. Under either theory -- structural horizontal conspiracy or vertical restraint -- appellants argue that the UCR reimbursement formula, the subject of concerted action, is the type of pricing restraint condemned by the *per se* rule.

---

[4] Appellants appear to have abandoned the rule of reason in this appeal, contending instead that "The Rule of Reason Does Not Apply Here," "The District Court was wrong in applying the rule of reason at all," and "use of the rule of reason was error as a matter of law." Brief for appellants at 35, 40. Notwithstanding this express disclaimer of application of the rule of reason, appellants made further reference to the rule in their brief, arguing that the district court's rule of reason analysis, even if appropriate, was incorrect. *Id. at 35-36, 40*. Appellants discussion was so cursory, however, that this court is led to believe that appellants are not pursuing the rule of reason on appeal.

The Supreme Court has held that ***HN4***[] any combination formed for the purpose and with the effect of raising, depressing, fixing, pegging or stabilizing the price of a commodity in interstate or foreign commerce is illegal *per se* under *§ 1* of the Sherman Act. *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)*. Pursuant to this **[**18]** rule, it has condemned horizontal agreements among competitors to fix prices, *see id.; Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 64 L. Ed. 2d 580, 100 S. Ct. 1925 (1980)* (holding horizontal agreement among competitors to fix credit terms *per se* violation of *§ 1*), as well as vertical resale price maintenance agreements, *see Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, 340 U.S. 211, 95 L. Ed. 219, 71 S. Ct. 259 (1951)* (holding distillers' agreement on maximum resale price of liquor sold by distributors *per se* violation of *§ 1*) and *Albrecht v. Herald Co., 390 U.S. 145, 19 L. Ed. 2d 998, 88 S. Ct. 869 (1968)* (holding publisher's establishment of maximum resale price of newspaper sold by carriers *per se* violation of *§ 1*). These decisions make clear that ***HN5***[] the *per se* rule applies to "an agreement to fix the price to be charged in transactions with third parties, not between the contracting parties themselves." *See Sitkin Smelting & Refining Co. v. FMC Corp., 575 F.2d 440, 446* (3d Cir.), **[**19]** *cert. denied*, *439 U.S. 866, 58 L. Ed. 2d 176, 99 S. Ct. 191 (1978)*.

If we characterize the provider agreements at issue here as "merely arrangements for the purchase of goods and services by Blue Shield," *Group Health & Life Insurance Co. v. Royal Drug Co., 440 U.S. 205, 214, 59 L. Ed. 2d 261, 99 S. Ct. 1067 (1979)*, Blue Shield can be viewed as a purchaser of dental services. As such, its establishment of the price it will pay the participating dentists with whom it contracts, as distinguished from the price it will charge third parties, is not price-fixing within the scope of the *per se* prohibition of *§ 1*. *See Sitkin, 575 F.2d at 446*. Yet because Blue Shield is a purchaser that only partially reimburses the participating dentists for each sale of services, the participating dentists, in effect, are making one sale to a two-sided buyer composed of the insurer and the subscriber. It **[*257]** is probably more accurate, therefore, to characterize Blue Shield as an indemnitor or third-party payor -- the ultimate payor -- rather than as a purchaser. Thus, we must proceed to analyze Blue Shield's conduct under the traditional **[**20]** notions of horizontal and vertical price-fixing.

A.

Most recently, in *Arizona v. Maricopa County Medical Society, 457 U.S. 332, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*, the Supreme Court found a medical insurance plan to be illegal *per se* as a horizontal price-fixing conspiracy. Defendants there were non-profit foundations composed of medical doctors. The member physicians, by majority vote, set maximum fees limiting the amount that they could recover as payment for services performed for patients insured under the approved insurance plans. These plans obtained foundation approval by agreeing to pay the doctors' charges up to a scheduled amount in return for the physicians' agreement to accept that amount as payment in full. The Court held that an agreement among competing physicians setting the maximum fees that may be claimed in full payment for health services provided to policyholders of specified insurance plans constitutes a *per se* violation of *§ 1*. *Id. at 335-36*.

With respect to the case at bar and appellants' theory of horizontal conspiracy, however, there is no overt agreement among competing health care providers to establish **[**21]** or to fix prices as was the situation in *Maricopa*. That distinction, however, does not necessarily preclude a finding of a horizontal price-fixing agreement. To the extent that Blue Shield's establishment of the UCR reimbursement system might disguise or embody an agreement among competing providers, its actions would come within the purview of *§ 1*. *See United States v. Paramount Pictures, Inc., 334 U.S. 131, 92 L. Ed. 1260, 68 S. Ct. 915 (1948)*; *Virginia Academy of Clinical Psychologists v. Blue Shield of Virginia, 624 F.2d 476 (4th Cir. 1980)*; *see also Maricopa, 457 U.S. at 352 n.26* (reserving question of whether insurer, who may be under control of providers, can lawfully fix the fee schedule and enter into bilateral contracts with individual providers).

Several recent cases have dealt with a concept that seeks to prove a horizontal agreement by a theory of structural conspiracy. In *Virginia Academy*, the Fourth Circuit found that Blue Shield plans were combinations of physicians operating under the direction and control of their physician members. *624 F.2d at 481*. In that case, the plans' by-laws required **[**22]** that a majority of the board of directors be physicians, and there was evidence in Blue Shield documents and statements tending to show physician control. In *Human Resource Institute of Norfolk, Inc. v. Blue*

Cross of Virginia, 498 F. Supp. 63, 66 (E.D. Va. 1980), the court applied the "walking conspiracy" theory of *Virginia Academy* and found no provider control of Blue Cross, noting that Blue Cross's enabling statute required that a majority of a plan's board of directors be subscribers; that the board in fact had a subscriber majority, and that there was no direct evidence of member control of Blue Cross. [5]

[23]** **[*258]** We reject appellant's theory of structural horizontal conspiracy because the uncontroverted facts furnish no support for it. There is no genuine issue of material fact concerning Blue Shield's corporate and operational structure. The board of directors has the ultimate responsibility for Blue Shield's business decisions and only two members of its 32-member board are dentists. Health care providers do not constitute a majority on the board. The district court found that "only one-sixteenth of the persons responsible for making the decisions which [appellants] claim[] to be potentially and in fact anti-competitive are themselves competitors in the relevant market." Mem. op. at 15, *reprinted in* App. at 3386.

Appellants' structural conspiracy argument seems to ignore the construction of Blue Shield's board and focuses instead on the functions and composition of the review and policy committees. These facts are essentially not disputed. Admittedly, dentists constitute a majority on each of these committees. But majority membership on a committee, without more, does not make out a prima facie case of structural horizontal conspiracy. The power and the authority **[**24]** of that committee must be analyzed. As did the district court, we conclude that these committees were advisory only, that they were constituted and utilized as a resource to the board, that they participated in no activities anathematic to antitrust precepts, and rendered advice only when particularly solicited by the board. Appellants appear to concede that the policy committee does not approve policies for the board, but merely makes recommendations to it. We are not impressed by appellants' specific contentions in this respect, including its emphasis on the statement of one Blue Shield official that he could not remember any occasion when the policy committee's recommendation was not accepted by the board. Appellants argue that the committee developed, voted on, and specifically approved Blue Shield's system for calculating the customary charge screen, as well as the switch to the 10% differential (or 90% performance level) and the use of statewide classes for calculating the customary charge. But it is not controverted that the use of statewide charge classes and the goal of seeking to allow at least 90% of aggregate charges were concepts developed and urged by management. **[**25]** Approval of these concepts by the policy committee was simply an approval of a management decision. Nor do appellants deny that the policy committee simply followed the recommendation of another committee in suggesting the allowance of the percentage of aggregate charges reported to the dental program. Action taken to find a market price so that a purchaser-insurer does not overpay does not constitute price-fixing.

Nor do we accept the notion that the review committee participated in price-fixing when it refused to update profiles of dentists who refused to verify their usual charges pursuant to Blue Shield procedures that called for "in-office reviews" of charges. The following factors strongly militate against appellants' argument: Blue Shield's requirement that dentists certify that their fees submitted to Blue Shield have not been inflated because of insurance coverage is consistent with the ethical rules of the dental profession, Blue Shield's in-office review experience showed that about one-half of the dentists who agreed to verify their usual charges had charged inflated fees to Blue Shield and

---

[5] Appellants argue that the decisions in *Glen Eden Hospital, Inc. v. Blue Cross & Blue Shield of Michigan, 740 F.2d 423 (6th Cir. 1984)*, and *Ratino v. Medical Service of the District of Columbia (Blue Shield), 718 F.2d 1260 (4th Cir. 1983)*, which applied the "walking conspiracy" theory of *Virginia Academy*, militate in favor of finding provider control in the case at bar. We find both cases distinguishable. The Sixth Circuit in *Glen Eden* reversed the district court's conclusion that there was no provider control of Blue Cross. In *Glen Eden*, however, appellant-hospital was allowed only severely limited discovery and its requests for information directly related to the theory that participating hospitals either controlled or greatly influenced the reimbursement policy of Blue Cross were denied. For this reason, the *Glen Eden* court concluded that the grant of summary judgment was premature. In the case before us, unlike *Glen Eden*, the parties have completed extensive discovery.

In *Ratino*, the Fourth Circuit reversed a summary judgment in favor of Blue Shield. There, the district court had concluded that the UCR plan fell within the McCarran-Ferguson Act's "business of insurance" exemption, *see* 15 U.S.C. §§ 1011-1015, thereby shielding the plan from antitrust scrutiny. Holding the McCarran-Ferguson Act inapplicable, the *Ratino* court remanded the case for fact findings and a determination as to whether Blue Shield's challenged practices constitute a price-fixing conspiracy or an illegal boycott.

that about one-third of the dentists contacted refused to verify their usual **[**26]** charges, the state health department has approved the concept of Blue Shield conducting in-office reviews to verify dentists' usual charges, and profile updates were not withheld until the board of directors authorized such action.

Distilled to its essence, the question comes to this. Blue Cross, as a purchaser **[*259]** of or ultimate payor for dental services, sought advice on the design and operation of its dental program from committees composed primarily of practicing dentists. To give advice when asked by the decisionmaker is not equivalent to being the decisionmaker itself. We see no dispute of material fact on this issue and we conclude that there was no support for appellants' structural horizontal conspiracy argument. [6]

[27]** B.

Once appellants' horizontal theory of concerted action is eliminated, they are left with trying to prove that the provider agreements themselves evidence an unlawful vertical restraint. ***HN6***[] The Supreme Court has not condemned vertical price-fixing outside of the resale price maintenance context. *See Albrecht v. Herald Co., 390 U.S. 145, 151, 88 S. Ct. 869, 19 L. Ed. 2d 998 (1968)* (***HN7***[] resale price fixing is a *per se* violation); *Kiefer-Stewart Co. v. Joseph Seagram & Sons, 340 U.S. 211, 95 L. Ed. 219, 71 S. Ct. 259 (1951)*. As the Blue Shield provider agreements here differ greatly from the vertical arrangements to restrict resale prices invalidated in *Albrecht* and *Kiefer-Stewart*, we should be hesitant to condemn them under a *per se* rule. *See United States v. Topco Associates, Inc., 405 U.S. 596, 607-08, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972)* ***HN8***[] ("it **[**28]** is only after considerable experience with certain business relationships that courts classify them as *per se* violations of the Sherman Act"); *Medical Arts Pharmacy of Stamford, Inc. v. Blue Cross & Blue Shield of Connecticut, Inc., 675 F.2d 502, 505 (2d Cir. 1982)* (holding similar provider-insurer agreements valid under *per se* rule of vertical price-fixing). Moreover, if we were to extend *Albrecht* and *Kiefer-Stewart* to the facts in this case, there would have to be evidence of some collaboration or coercion to find an unlawful price-fixing agreement. Appellants cannot prove that Blue Shield collaborated with the participating dentists unless it can prevail in its claim that the dentists really control Blue Shield. As we have already shown, this claim fails.

Appellants also advance an economic coercion conspiracy theory, arguing that Blue Shield's UCR system and administrative practices pressure dentists economically to participate. Undisputed facts give no support to this theory as a matter of law. First, Blue Shield also pays for services rendered by non-participating dentists and determines its payment allowance for services uniformly -- regardless **[**29]** of participation status. Moreover, its dental plan covers no more than 35% of the privately insured population and purchases less than 9% of the dental care in Pennsylvania. We conclude that there is no basis for an inference that dentists are coerced to participate with Blue Shield.

VI.

We turn now to appellants' contention that Blue Shield's UCR reimbursement system and related administrative practices, as well as its Dental Plus program, constitute an illegal boycott of non-participating dentists under *§ 1* of the Sherman Act. Dental Plus is a Blue Shield health maintenance organization program available to U.S. Steel employees at a certain plant that involves only participating dentists. Those dentists agree to provide all covered services to certain employee subscribers in return for a fixed fee per subscriber per month.

HN9[] To establish proof of an illegal boycott under *§ 1*, a plaintiff must show "concerted action with 'a purpose either to exclude a person or group from the market, **[*260]** or to accomplish some other anti-competitive objective, or both.'" *Malley-Duff & Associates, Inc. v. Crown Life Insurance Co., 734 F.2d 133, 140 (3d Cir.*

---

[6] Appellants argue that *American Society of Mechanical Engineers, Inc. v. Hydrolevel Corp., 456 U.S. 556, 72 L. Ed. 2d 330, 102 S. Ct. 1935 (1982)*, is controlling. We disagree. In *Hydrolevel*, the Supreme Court held that standard-setting organizations may be liable under the antitrust laws for the actions of their agents committed with apparent authority. In that case, committee members had conspired to restrain trade unreasonably through a misinterpretation of the Boiler and Pressure Vessel Code. As we have concluded here, however, neither the policy nor review committees have engaged in conduct that runs afoul of the antitrust laws. Hence, there is no illegal conduct that may be imputed to Blue Shield.

1984) **[**30]** (quoting DeFilippo v. Ford Motor Co., 516 F.2d 1313, 1318 (3d Cir.), *cert. denied*, *423 U.S. 912, 96 S. Ct. 216, 46 L. Ed. 2d 141 (1975))*. In the context of addressing appellants' *per se* price-fixing contention, we have already demonstrated that Blue Shield's actions in setting the UCR reimbursement fee and entering into the provider agreements were purely unilateral. Accordingly, the concerted action necessary for Blue Shield to succeed with its primary boycott claim is missing, and that claim must fail.

Appellants' Dental Plus claim must also fail for lack of concerted action because there is no evidence that Blue Shield conspired with any dentists to establish Dental Plus criteria that would exclude non-participating dentists. *See* Klamath-Lake Pharmaceutical Ass'n v. Klamath Medical Service Bureau, 701 F.2d 1276, 1291 (9th Cir.) ("**HN10**[] Some evidence of concerted activity directed at the alleged victims of the boycott must be offered for the case to survive summary judgment"), *cert. denied*, *464 U.S. 822, 104 S. Ct. 88, 78 L. Ed. 2d 96 (1983)*. **[**31]** Thus, as with their price-fixing claims, appellants' boycott claims fail to establish a *per se* violation under § 1. We now turn to the monopolization claims asserted under § 2 of the Sherman Act.

VII.

Appellants argue that Blue Shield violated § 2 of the Sherman Act by attempting to monopolize and monopolizing the Pennsylvania market for the sale of prepaid dental care programs to group purchasers (Market I) and the Pennsylvania market for the quantity purchase of dental services (Market II).

Section 2 of the Sherman Act provides in pertinent part:

> **HN11**[] Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States . . . shall be deemed guilty of a felony. . . .

15 U.S.C. § 2. **HN12**[] To establish the offense of monopolization under § 2, plaintiff must show: (1) the possession of monopoly power in the relevant geographic and **[**32]** product markets; and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of superior product, business acumen or historic accident. United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966). The relevant geographic market is the area in which a potential buyer may rationally look for the goods or services he or she seeks, id. at 575-76; boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand, SmithKline Corp. v. Eli Lilly & Co., 575 F.2d 1056, 1063 (3d Cir.), *cert. denied*, *439 U.S. 838, 58 L. Ed. 2d 134, 99 S. Ct. 123 (1978)*; *see also* Larry V. Muko, Inc. v. Southwestern Pennsylvania Building & Construction Trades Council, 670 F.2d 421, 434 (3d Cir.), *cert. denied*, *459 U.S. 916, 74 L. Ed. 2d 182, 103 S. Ct. 229 (1982)*. **HN13**[] Monopoly power is generally defined as the power to control prices or to exclude competition, **[**33]** United States v. E.I. DuPont de Nemours & Co., 351 U.S. 377, 100 L. Ed. 1264, 76 S. Ct. 994 (1956), and the size of market share is a primary determinant of whether monopoly power exists, United States v. Aluminum Co. of America (Alcoa), 148 F.2d 416 (2d Cir. 1945).

HN14[] To establish the offense of an attempt to monopolize under § 2, plaintiff must show: (1) a specific intent to monopolize; and (2) the consequent dangerous probability of success within the relevant geographic and product markets. Lorain Journal Co. v. United States, 342 U.S. 143, 96 L. Ed. 162, 72 S. Ct. 181 (1951); Swift & Co. v. United States, 196 U.S. 375, 49 L. Ed. 518, 25 S. Ct. 276 (1905). In proving specific intent, a mere intention to prevail over rivals or improve market position is insufficient. Even an intent to perform **[*261]** acts that can be objectively viewed as tending toward the acquisition of monopoly power is insufficient, unless it also appears that the acts were not "predominantly motivated by legitimate business aims." Times Picayune Publishing Co. v. United States, 345 U.S. 594, 627, 97 L. Ed. 1277, 73 S. Ct. 872 (1953). **[**34]** Direct evidence of specific intent need not be shown; it may be inferred from predatory or exclusionary conduct. Interstate Circuit, Inc. v. United States, 306 U.S. 208, 83 L. Ed. 610, 59 S. Ct. 467 (1939); United States v. Jerrold Electronics Corp., 187 F. Supp. 545, 567 (E.D. Pa. 1960), *aff'd*, *365 U.S. 567, 5 L. Ed. 2d 806, 81 S. Ct. 755 (1961)*.

A.

The parties agree to define Market I as the market for the statewide sale of prepaid dental services in which Blue Shield competes with a commercial insurer, Delta Dental, and other insurers. They further agree that Blue Shield's share of this market is 32-35%. The district court concluded that Blue Shield's market share was insufficient as a matter of law to establish monopolization of Market I, a conclusion appellants seem not to contest on appeal. We determine that this is entirely consistent with case law. *See Alcoa*, 148 F.2d at 424; *see also* Twin City Sportservice, Inc. v. Charles O. Finley & Co., 512 F.2d 1264, 1274 (9th Cir. 1975). In addition, appellants' claim that Blue Shield attempted to monopolize Market I must fail as there is **[**35]** no evidence of specific intent. They point to the alleged § 1 violations of price-fixing and boycott as proof of this intent, but we have already rejected those claims. Absent evidence of specific intent, we need not reach the question of whether Blue Shield's market share constitutes a "dangerous probability of success."

B.

The parties disagree over the definition of Market II. Appellants define Market II as the statewide market for the purchase of dental services in bulk pursuant to participating dentist agreements in which Blue Shield and Delta Dental are the only purchasers. They argue that in this market Blue Shield has a 91% market share. Blue Shield would define the statewide market more broadly. It contends that this market should include all purchasers of dental services in bulk, and not only Blue Shield and Delta Dental. Affidavits of chief executive officers of Blue Shield's competitors for dental insurance business and affidavits of 12 persons who arrange for the purchases of dental insurance plans for Pennsylvania businesses and companies support Blue Shield's contention that from the perspective of purchasers of dental care coverage, Blue Shield, Delta Dental, **[**36]** other health services corporations, and commercial carriers are all in direct competition with each other. The district court noted that appellants "present[ed] no conflicting evidence to establish a material fact in dispute." Mem. op. at 31, *reprinted in* App. at 3402. But for their part, appellants relied solely on an affidavit by Dr. Comanor, an economist, for their definition of Market II -- an affidavit that expressed an opinion based on factual assumptions for which appellants cited no support in the record and that was discredited by the district court. [7]

---

[7] The district court commented:

> The Comanor affidavit refers to many factual assumptions for which plaintiffs have cited no support in the record: "In the approximately 13 years that prepaid dental care and dental insurance have existed in Pennsylvania, it has become apparent that the commercial insurers are unwilling to supply programs which involve direct provider contact." (No basis for these statements and conclusions is cited.) "Moreover, while Blue Shield offers a dental indemnity program (Penndental V), this product appears to have been relatively unsuccessful in Market I." (The plaintiffs have cited no evidence to permit the characterization of an objective on the part of Penndental V to compete in plaintiffs' Market I and a lack of success in that objective.) "On this basis, there appear to be factors which limit in Market I the degree of substitutability in production between prepaid service benefit dental programs and dental insurance or indemnity programs." (The language, "on this basis, there appears to be factors . . ." is an inadequate foundation for the conclusion which follows.) ". . . Various large employers, as well as governmental bodies and unions themselves, desire only prepaid service benefit dental programs." (No factual basis for this statement is cited.) "For these groups, who are on the buying side of Market I, the degree of substitutability in use between prepaid service benefit dental programs and dental indemnity programs may be quite low." (This statement on its face is surmise.) "Fluctuations in price will not cause them to switch from a prepaid service benefit dental program to a dental indemnity program to the extent that they are committed, whether because of union pressures or some other reason, to provide fully prepaid dental care." (There is no factual basis cited for this statement. Further, it is a conditional statement and can not on its face support the conclusion that follows.) "For other purchasers, however, the degree of substitutability in use between prepaid service benefit dental programs and dental indemnity programs may be relatively high." (This statement on its face is surmise.) "In conclusion, the cross-elasticities of supply and demand in Market I suggest that it can be viewed as a market with two distinct sub-markets." (Considering the lack of a factual basis for the propositions leading to this conclusion and the tentative nature of this statement, the conclusion is not established for purposes of this motion.)
>
> In establishing the existence of two markets of purchasers of dental services in Pennsylvania, Dr. Comanor views the relevant issue as "whether, in response to any possible price cuts by Blue Shield or Delta Dental, dentists will shift their output from the production of pre-paid dental care to individual dental care." If so, Dr. Comanor says, these two markets

[37]** **[*262]** To put Dr. Comanor's affidavit in proper perspective, reference must be made to expert testimony and especially to *Rule 703, F.R.Evid.*, which provides:

> ***HN15***[] The facts or data in the particular case upon which an expert bases an opinion or inference may be those perceived by or made known to him at or before the hearing. If of a type reasonably relied upon by experts in the particular field in forming opinions or inferences upon the subject, the facts or data need not be admissible in evidence.

In *Merit Motors, Inc. v. Chrysler Corp., 187 U.S. App. D.C. 11, 569 F.2d 666 (D.C. Cir. 1977)*, the court, speaking through Judge J. Skelly Wright, emphasized that ***HN16***[] the factual predicate of an expert's opinion must find some support in the record. We agree with that court's decision and its reasoning:

> To hold that *Rule 703* prevents a court from granting summary judgment against a party who relies solely on an expert's opinion that has no more basis in or out **[**38]** of the record than . . . theoretical speculations would seriously undermine the policies of rule 56. We are unwilling to impose the fruitless expenses of litigation that would result from such a limitation on the power of a court to grant summary judgment.

569 F.2d at 673. We therefore agree with the district court's determination of this issue in two important respects: the Comanor affidavit did not raise an issue of material fact and, in discrediting this affidavit for lack of critical factual support, the court did not err in accepting the factual averments in Blue Shield's submissions that defined the boundaries of Market II. We also agree with the district court and conclude that appellants' monopoly argument, which hinged on their definition of Market II, must fail. Moreover, their argument that there was an attempt to monopolize must fail on the same grounds that it failed vis-a-vis Market I.

VIII.

This brings us to the summary judgment entered in behalf of Blue Shield on the class action claim asserted by the individual dentists. ***HN17***[] According to *Rule **[**39]** 23(a), F.R. Civ. P.*, a class member cannot serve as a representative party on behalf of the entire class unless, *inter alia*, he or she will "fairly and adequately protect the interests of the class." Adequate representation depends **[*263]** on two factors: (1) the plaintiff's attorney must be qualified, experienced, and generally able to conduct the proposed litigation; and (2) the plaintiff must not have interests antagonistic to those of the class. *Eisen v. Carlisle & Jacquelin, 391 F.2d 555, 562 (2d Cir. 1968)*. ***HN18***[] Where the district court appropriately applies the criteria of *Rule 23(a)*, it has broad discretion in determining whether the action may be maintained as a class action, and it is subject to reversal only for an abuse of that discretion. *Katz v. Carte Blanche Corp., 496 F.2d 747, 757* (3d Cir.)(in banc), *cert. denied*, *419 U.S. 885, 42 L. Ed. 2d 125, 95 S. Ct. 152 (1974)*.

In their class action counterclaim against Blue Shield, the individual dentists alleged two distinct subclasses of dentists: (1) a subclass of cooperating **[**40]** dentists, consisting of participating and non-participating dentists, who accept Blue Shield's allowances as full payment for their services; and (2) a subclass of non-cooperating dentists, all non-participating dentists, who bill Blue Shield subscribers for the balance between their current fees and Blue Shield's allowances. Of the four class plaintiffs, three are non-cooperating dentists and one, Dr. King, is a cooperating one. The subclass of cooperating dentists seeks damages in the amount of the difference between

---

> would effectively be one, but if not, there are really two separate and distinct markets. Dr. Comanor then concludes that whether "dentists will shift" depends upon whether dentists are at full capacity. If the dentist is not at full capacity, Dr. Comanor says, he is not likely to shift in response to price differences and there are therefore two markets. Dr. Comanor states that, "The fact that substantial excess capacity exists among Pennsylvania dentists suggest the finding of separate markets." The plaintiffs have cited no facts supporting the proposition that substantial excess capacity exists among Pennsylvania dentists.

Mem. op. at 28-30, *reprinted in* App. at 3399-401.

Blue Shield's allowances to them and the competitive price for their services. The district court refused to certify the subclass of cooperating dentists because (1) there are inherent conflicts between the participating and non-participating dentists, and (2) as a non-participating dentist, Dr. King cannot fairly and adequately represent the participating members of the subclass. The district court properly applied *Rule 23(a)* to the undisputed facts of the case and determined that Dr. King's interests, as a non-participating dentist, were antagonistic to those of participating dentists who were also part of the subclass of cooperating dentists. We cannot say that **[**41]** the district court abused its discretion in finding him to be an inadequate class representative and refusing to certify the subclass on that basis.

IX.

We have considered the many contentions raised by appellants. We have concluded that the district court did not err as a matter of law or impermissibly resolve any disputed issue of fact in determining that Blue Shield did not engage in an illegal price-fixing conspiracy or boycott in violation of *§ 1* of the Sherman Act, in determining that Blue Shield did not attempt to monopolize or monopolize in violation of *§ 2* of the Sherman Act, and that the district court did not abuse its discretion in refusing to certify a subclass of cooperating dentists for treble damages purposes.

The judgment of the district court will be affirmed in all respects.

Opinion

[*1390] NORRIS, Circuit Judge:

I. FACTS

* Honorable Samuel P. King, Chief U.S. District Judge for the District of Hawaii, sitting by designation.

Appellants are retail pharmacies located in Oregon and California. Appellees are the related corporations -- including regional health plans, regional medical groups, and non-profit hospitals -- that make up the Kaiser-Permanente Medical Care Program.

Appellees provide health care in a manner substantially different from the traditional fee-for-service method of health care in which a consumer pays a separate charge for each medical service or good provided by the doctor or hospital. The regional Kaiser Health Plans (HP's) contract with consumers who wish to become members and provide **[**2]** them with medical care in return for monthly dues. Each HP provides this care through two related organizations: Kaiser Foundation Hospitals, a California non-profit corporation which operates the Kaiser hospitals, and one of the eight regional Permanente Medical Groups. In addition, the HP's provide interested members with a "drug plan." Under this plan, for an additional monthly charge, members obtain the right to purchase drugs at little or no cost. They can purchase these pharmaceuticals at a Kaiser hospital or at a pharmacy at a non-hospital location operated by an HP. [1]

[3]** In this antitrust action, appellants advance three discrete claims concerning appellees' provision of drugs to HP members. First, they argue that appellees violated the Robinson-Patman Act, *15 U.S.C. § 13*, by buying drugs at discriminatorily low prices from pharmaceutical companies and dispensing these drugs to HP members. Second, appellants maintain that appellees are attempting to monopolize the retail drug market in violation of *section 2* of the Sherman Act, *15 U.S.C. § 2*. Third, they contend that appellants violated section 3 of the Clayton Act, *15 U.S.C. § 14*, by tying the sale of drugs to the sale of other health services.

Appellees moved for summary judgment below, and the district court granted the motion on all three claims. [2] Appellants then brought this timely appeal.

[4]** II. THE ROBINSON-PATMAN ACT CLAIM

The district court ruled that appellees were not liable for violating the Robinson-Patman Act -- even assuming they bought drugs at discriminatorily low prices -- because they fall within an exception to that Act created by the Nonprofit Institutions Act.

[*1391] The Nonprofit Institutions Act ***HN1***[] provides, "Nothing in the [Robinson-Patman Act] shall apply to purchases of supplies for their own use by schools, colleges, universities, public libraries, churches, hospitals, and charitable institutions not operated for profit." *15 U.S.C. § 13c*. Appellees can thus qualify for this exception if they

---

[1] Before 1977, the Kaiser appellees were organized in a slightly different manner. The pharmacies located outside of the hospitals were not operated by the regional HP's but by regional Permanente Service Corporations. These nonprofit corporations were formed because the Internal Revenue Service stated that the regional health plans would not be considered charitable organizations under the Internal Revenue Code if they ran the pharmacies. The Permanente Service Corporations, however, returned all receipts to the HP's less costs and a rate of return on capital. The Service Corporations paid taxes on the amount allocated for rate of return on capital and then paid the amount remaining to the HP's.

In 1977, the Internal Revenue Service declared that its denial of charitable status to health plans which operated pharmacies was erroneous. The Service Corporations were then disbanded and control of their pharmacies transferred directly to the HP's.

Because the Internal Revenue Service stated that the Service Corporations should have been treated as charities for purposes of the Internal Revenue Code and because the Service Corporations engaged only in activities that the HP's currently engage in, we believe the analysis under the Robinson-Patman Act for sales by the Service Corporations is the same as that for sales by the HP's. Consequently, we will treat all sales at pharmacies located outside Kaiser hospitals as being sales made by the HP's even if some of those sales occurred before 1977 and were thus actually made by Service Corporations.

[2] Actually, the summary judgment before us is the second one granted by the district court in this case. We reversed the first one -- granted in 1978 -- on the ground that appellants should have received additional time for discovery before the motion for summary judgment was granted. *Portland Retail Druggists Ass'n v. Kaiser Foundation Health Plan, 662 F.2d 641 (9th Cir. 1981)*. On remand, the district court permitted discovery for as long as appellants requested.

are 1) non-profit institutions; 2) eligible institutions under the Act; and 3) made the purchases in question for their "own use."

A

The HP's and Kaiser Hospitals are organized as non-profit institutions and would thus appear to meet the first of the Act's requirements. Appellants argue, however, that these institutions are not really non-profit because they are controlled by Permanente Medical Groups, which are for-profit corporations **[**5]** consisting of doctors who provide medical care for members. [3]

We disagree. Both the Internal Revenue Service and the district court found that the Medical Groups do not exert control over the HP's, and given the financial arrangements between the Medical Groups and the HP's, we believe that this conclusion is persuasive. The Medical **[**6]** Groups do not set their own fees. The HP's pay the Medical Groups an agreed upon amount per member per month, and this amount does not vary with the volume of service the group provides to the membership. [4] This fact greatly limits the amount of control the Medical Groups can exercise over the HP's. That the HP's and Kaiser Hospitals must fulfill their need for certain medical services by contracting with doctors who seek a profit does not make the HP's and Kaiser Hospitals themselves for-profit organizations.

[7]** B

We next consider whether the HP's and Kaiser Hospitals are eligible institutions under the Nonprofit Institutions Act. With respect to Kaiser Hospitals this question is easily answered. ***HN3***[] The Act explicitly lists hospitals as eligible organizations. In the case of the HP's, however, the answer is not as simple. The Act does not explicitly list HP's. Thus, we must determine whether such organizations are charitable institutions within the meaning of the Act.

There is no case law concerning which institutions are considered charitable for purposes of the Nonprofit Institutions Act. There is, however, a substantial body of precedent defining the term charitable for purposes of the tax code and the law of charitable trusts. Because the drafters of the Nonprofit Institutions Act wished to protect the same eleemosynary institutions that are given special consideration under the tax and charitable trusts laws, *see* S. Rep. No. 1769, 75th Cong. 3rd Sess. 1 (1938); H.R. Rep. No. 2161, 75th Cong., 3rd Sess. 1 (1938), we believe it is appropriate to refer to these precedents here. Thus, we **[**8]** look to this body of case law for guidance in determining whether the HP's are charitable institutions within the meaning of the Nonprofit Institutions Act.

"The definition of the term 'charitable' has never been static and has been broadened in recent years." *Eastern Kentucky Welfare Rights Org. v. Simon, 165 U.S. App. D.C. 239, 506 F.2d 1278, 1286 (D.C. Cir. 1974)*, *modified on other grounds*, **[*1392]** *426 U.S. 26, 48 L. Ed. 2d 450, 96 S. Ct. 1917 (1976)*, *cited with approval*, *Abbott Laboratories v. Portland Retail Druggists Assn., 425 U.S. 1, 11, 47 L. Ed. 2d 537, 96 S. Ct. 1305 (1976)* (concept of the non-profit hospital has expanded over the years). In earlier times, health organizations were recognized as charitable only if they were supported primarily by donations and used those donations to provide health care for the indigent. *Id.* With the emergence of social welfare, insurance, and municipal hospitals, however, the number of poor requiring free or below cost medical services was drastically reduced. This reduction eliminated the rationale

---

[3] As already indicated, appellants assert a Robinson-Patman Act claim against all appellees, including the regional Permanente Medical Groups. The Medical Groups, however, do not sell drugs to members. Rather, they prescribe drugs which members purchase at one of the pharmacies operated by either an HP or Kaiser Hospitals. Because the Robinson-Patman Act ***HN2***[] governs only those who buy and sell at discriminatorily low prices, and not those who indirectly benefit from such purchases, *see* *15 U.S.C. § 13 (a)*, appellants' claim against the Medical Groups must fail.

[4] A small portion of the payment to the Medical Groups -- generally around five percent of the total payment -- does not depend solely upon the number of members in the Medical Group's region. This portion is withheld by the HP and paid to the Medical Groups only if appellees meet their yearly financial goals. This system of payment is designed to give the doctors in the Medical Groups an incentive to keep costs low, and it is required by regulations promulgated pursuant to the Health Maintenance Organizations Act. 42 C.F.R. § 110.104(b)(1)(v).

upon which the traditional, limited definition of charitable was predicated, **[**9]** resulting in a move towards a less restrictive interpretation of the term in recent years. *Id. at 1288-89*. Now ***HN4***[] all non-profit organizations which promote health are considered charitable under the law of charitable trusts. *Restatement (Second) of Trusts § 368*, at 246 (1959); G. Bogert & G. Bogert, *Law of Trusts* § 62 (1973). Further, a number of courts have specifically held that health maintenance organizations, such as the HP's, are charitable institutions for tax purposes. *Sound Health Ass'n v. Commissioner, 71 T.C. 158, 177-81 (1978)*. Indeed, both the HP's and Kaiser Hospitals are exempt from income taxes as charitable institutions. Given this increasingly liberal interpretation of the term, we conclude that the HP's are charitable institutions within the meaning of the Nonprofit Institutions Act.

C

Finally, we must determine whether the purchases here in question were made for the HP's and Kaiser Hospitals' "own use." [5] Appellants contend that the HP's and Kaiser Hospitals purchased drugs not for their own use, but for the use of others, namely **[**10]** their members. Appellees contend, by contrast, that what they purchase for the use of their members is purchased for their "own use" within the meaning of the Act.

[11]** The "own use" issue is conceptually the most challenging aspect of this case because there is so little law in this area; the only relevant case is *Abbott Laboratories v. Portland Retail Druggists Ass'n, 425 U.S. 1, 47 L. Ed. 2d 537, 96 S. Ct. 1305 (1976)*. In *Abbott Labs*, the Court addressed the question whether sales of drugs purchased at discriminatorily low prices by non-profit, fee-for-service hospitals -- hospitals which were not part of a health maintenance organization such as Kaiser -- were exempt under the Nonprofit Institutions Act.

In resolving this questions, the Court was torn between two competing concerns. On the one hand, the Court was interpreting an explicit exemption from the Robinson-Patman Act that reflected Congress' desire to aid non-profit institutions even when those institutions fulfilled needs beyond those traditionally fulfilled by charities. *Id. at 13*. On the other hand, the Court reiterated the maxim that exceptions to the Robinson-Patman Act are to be construed narrowly and emphasized that this exemption in particular was not "to be applied and expanded automatically to whatever new venture the nonprofit hospital **[**12]** finds attractive in these changing days." *Id.*

[*1393] The Court resolved this tension by formulating a test which it found "inherent in the language of the statute." *Id. at 14*. Under this test, ***HN5***[] "'their own use' is what reasonably may be regarded as use *by the hospital* in the sense that such use is a part of and promotes the hospital's intended institutional operation in the care of persons who are its patients." *Id.* (emphasis in the original).

The Court applied this test to ten separate categories of drug sales. The Court exempted sales of drugs to in-patients, emergency room patients, and out-patients for use on hospital premises. The Court also exempted sales to both in-patients and out-patients for take home use, sales to hospital employees and students for their personal use or use by their dependents, and sales to the hospital's medical staff for their personal use or use by their dependents. The Court declined to exempt sales on prescription refills, sales to the hospital's medical staff for resale in private practice, and sales to walk-in customers **[**13]** who were not being treated at the hospital. [6]

---

[5] At this point, we can treat the HP's and Kaiser Hospitals as one organization for analytical purposes because whatever is in the "own use" of one part of a health maintenance organization would be in the "own use" of another. After all, whether a member purchases his drugs from a pharmacy run by a regional HP or one run by Kaiser Hospitals doubtless depends on the fortuity of which location is more convenient for the member.

Appellants argue, in effect, that we cannot consider the interest of Kaiser Hospitals in serving members because membership is a matter between the consumer and his regional HP and because the HP's and Kaiser Hospitals are distinct corporations. Appellant's Opening Brief at 12. But appellants have misapprehended the legal relevance of corporate structure. The cases they cite merely stand for the proposition that the presence of two or more corporations acting together is sufficient to satisfy the "combination, contract, or conspiracy" requirement which triggers the substantive provisions of section 1 of the Sherman Act.

[6] The language of the Nonprofit Institutions Act speaks only to purchases by institutions for their own use. It says nothing about sales by such institutions. *Abbott Labs*, however, implicitly decided that whether an item purchased at a discriminatorily low

Appellants ask us to adopt the categorical rules set forth in *Abbott Labs* wholesale and apply them to this case. This suggestion, however, ignores the manner in which these rules were originally derived and would, if adopted, violate the spirit, if not the letter, of the Supreme Court's decision. In *Abbott Labs*, the Court generated its categorical rules by first determining the basic institutional function of a non-profit, fee-for-service hospital and then deciding which sales fit within this institutional function **[**14]** and which did not. Thus, to follow the true mandate of *Abbott Labs* we should not simply adopt the categorical rules set forth in that decision, but should instead determine the basic institutional function of the Kaiser-Permanente Medical Care Program and then decide which sales are in keeping with this function.

Health maintenance organizations (HMO's), such as Kaiser-Permanente, are designed to provide a complete panoply of health care to their members. *See* S. Rep. No. 129, 93rd Cong., 1st Sess., *reprinted in* 1973 U.S. Code Cong. & Ad. News 3033, 3040. *See generally II Report of the National Advisory Commission on Health Manpower* (1967). Whereas fee-for-service hospitals provide health care on a temporary and usually remedial basis to their patients, HMO's provide continuing and often preventive health care for their members. *See* *42 U.S.C. § 300e(b)(1)-(2)* (describing a HMO's continuing obligations to its members). Given this extraordinary broad institutional function, any sale of drugs by an HMO to one of its members falls within the basic function of the HMO. Consequently, we must conclude that drugs purchased by an HMO, such **[**15]** as Kaiser-Permanente, for resale to its members are purchased for the HMO's "own use" within the meaning of the Nonprofit Institutions Act and thus qualify for protection under the Act. [7]

[16] [*1394]** We believe that this result is in keeping with the intent of the 75th Congress which drafted the Nonprofit Institutions Act. Although the exact intent of Congress is less than crystal clear from a reading of the legislative history, *see* Rosoff & Dunfee, A "Fix" for the Retail Pharmacy: The Supreme Court Redefines Application of the Robinson-Patman Act to Drug Sales by Nonprofit Hospitals, 13 Cal. W. L. Rev. 195, 203 n.35 (1977), at least one Justice has concluded that the Act was passed because " Congress was primarily interested in directly aiding nonprofit institutions by lowering their operating expenses, but not interested in indirectly aiding such institutions by providing them with the means of raising additional money." *Abbott Labs*, 425 U.S. at 23 (Marshall, J., concurring). If that principle is applied to this case, it supports a finding that all drugs purchased by an HMO for resale to its members fall within the Nonprofit Institutions Act. There can be no question that allowing HMO's to purchase drugs that are resold to members at lower prices directly helps the HMO by lowering the operating expense it must incur to provide this aspect **[**17]** of health care to its membership.

We also believe that a finding that drugs purchased by an HMO for resale to its members qualify for protection under the Nonprofit Institutions Act is in keeping with national health care policy. Under *Abbott Labs*, fee-for-service hospitals are exempted from the Robinson-Patman Act when they provide medicine to their patients. If we held that HMO's, such as Kaiser-Permanente, do not qualify for a similar exemption when they provide medicine for their

---

price was purchased for the institution's own use depends on whether and how the item was resold. *See generally* 3 E. Kinter & J. Bauer, *Federal* ***Antitrust Law*** § 25.9 (1983).

[7] HMO's, such as the Kaiser-Permanente, can therefore engage in some sales that would not be allowed if we applied the ten categorical rules formulated in *Abbott Labs* to this case.

For instance, in *Abbott Labs*, the Court held that fee-for-service hospitals cannot purchase drugs at discriminatorily low prices if those drugs are sold to refill a prescription, even if the original prescription was filled as part of an exempt sale. *425 U.S. at 15-16*. It appears that the Court declined to exempt prescription refills because the basic institutional function of a fee-for-service hospital is to provide temporary medical care for its patients. Refilling prescriptions goes beyond that basic institutional function because it extends the relationship between the fee-for-service hospital and the patient into the indefinite future. *Id. at 16* (A prescription is not for the hospital's "'own use' forever just because it originated under hospital auspices. We conclude that the statute's limitation has been exceeded when the connection with the hospital has become as attenuated as it is at the refill stage.").

As we explained in text, however, the relationship between an HMO and its members is ongoing, not temporary. The relationship thus does not attenuate simply because the member stepped out the door of an HMO hospital some time ago. The HMO is consequently acting within its basic institutional function when it refills the prescription of a health plan member.

members, fee-for-service hospitals would enjoy a market advantage over HMO's. Congress passed the Health Maintenance Organization Act in 1976, however, to ensure that consumers have a free choice among various methods of obtaining medical care because Congress believed that this was the best way to lower the medical costs that consumers must bear. S. Rep. No. 129, 93rd Cong., 1st Sess., *reprinted in* 1973 U.S. Code Cong. & Ad. News 3033, 3039-40. Accordingly, we decline to interpret the somewhat open-ended language of the Nonprofit Institutions Act in a way which would impinge upon the free choice of consumers of medical goods and services.

Our conclusion that drugs purchased by HMO's for **[**18]** resale to members are purchased for the HMO's "own use" and thus qualify for protection under the Nonprofit Institutions Act does not dispose of appellants' Robinson-Patman Act claim, however. Appellees make some sales to walk-in customers who are not members of a Kaiser-Permanente HP. Under our analysis, those sales are not protected by the Nonprofit Institutions Act. Indeed, appellees concede that these sales are not for the HP's "own use" and thus are not covered by the Nonprofit Institutions Act. Nevertheless, appellees argue that these sales should not be subject to the strictures of the Robinson-Patman Act because the sales are so minor as to be a de minimis violation of the Act. The district court agreed with the appellees, citing to the fact that appellees' sales of drugs to non-members constituted less than one percent of appellees' total sales of drugs.

We do not believe, however, that a court can determine whether or not certain sales are de minimis solely by reference to the percentage of an organization's total sales they constitute. ***HN6***[] The term de minimis generally refers to **[**19]** the effect of a violation, not to the proportion of a party's conduct which violates the law as compared to that which does not. One percent of appellees' total sales might amount to a substantial dollar volume with a dramatic effect on the ability of the relatively small retail drug stores to compete. We therefore remand **[*1395]** this case to the district court for an evaluation of the impact of appellees' non-exempt sales on competition in the retail drug market. [8]

[20]** III. THE ATTEMPTED MONOPOLIZATION CLAIM

HN7[] To establish a claim for attempted monopolization, a plaintiff must show that the defendant had a specific intent to monopolize the market, that there was a dangerous probability that the attempt might succeed, and that the defendant committed acts designed to achieve the illegal objective of creating a monopoly. *William Inglis & Sons Baking Co. v. ITT Continental Baking Co., 668 F.2d 1014, 1027 (9th Cir. 1981)*, *cert. denied*, *459 U.S. 825, 103 S. Ct. 57, 58, 74 L. Ed. 2d 61 (1982)*.

We find that appellants failed to raise a genuine issue of material fact on the question whether the appellees engaged in acts designed to monopolize the market for retail drugs. The only evidence offered by appellants in opposing appellees' motion for summary judgment shows merely that the appellees drove hard bargains with pharmaceutical companies and obtained the best prices possible. [9] Appellants offered no evidence of predatory intent, such as proof that appellees coerced pharmaceutical companies into selling drugs to them **[**21]** below cost, or that appellees, in turn, sold drugs to their members below the cost of acquiring the drugs. Nor did appellants present any evidence that appellees coerced pharmaceutical companies into harming appellants. Accordingly, summary judgment was properly granted on this claim.

---

[8] Appellees contend that they would cease sales to non-members if they were certain that doing so would not subject them to liability for violation of state licensing law, state tax law, or state rules of tort liability. This record, however, is not nearly sufficient to demonstrate that the operation of these state laws immunizes appellees' conduct under the standard for antitrust immunity set forth in *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, 445 U.S. 97, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*. Nor have appellees made clear why closing the pharmacies to non-members would violate federal tax law, as they assert in their brief.

[9] To bolster their attempted monopolization claim, appellants filled their opening brief with references to an affidavit by Howard Steinbach. The district court ruled, however, that the information in that affidavit was not admissible because the affidavit contained nothing but conclusory statements and hearsay. We agree with the district court's ruling on this point and consequently do not consider the Steinbach affidavit.

IV. THE TIE-IN CLAIM

HN8[] To establish a tying claim, a plaintiff must first demonstrate that the defendant is selling two distinct products as a package. He must then show that the defendant has sufficient power **[**22]** in the market for one product (the tying product) to encourage consumers to buy the other product (the tied product) when they might not ordinarily do so. *See Portland Retail Druggists Ass'n v. Kaiser Foundation Health Plan, 662 F.2d 641, 648 (9th Cir. 1981)*.

Appellants claim that appellees have made three such tying arrangements. All of these arrangements involve the drug plan that appellees sell to members. The first alleged tying arrangement is between the drug plan (the tied product) and the basic health plan (the tying product). The second is the converse arrangement between the health plan (the tied product) and the drug plan (the tying product). The third is between the drugs sold at appellees' facilities (the tied product) and the drug plan (the tying product).

None of these contentions is meritorious. The first alleged arrangement is not an illegal tie-in because appellees do not require that one purchase the drug plan to obtain the health plan. Appellants have no standing to attack the second alleged arrangement because they are not competitors in the market for the tied product, health plans. *See Aurora Enterprises, Inc. v. National Broadcasting Co., Inc., 688 F.2d 689 (9th Cir. 1982)* **[**23]** (only consumers **[*1396]** and competitors in the market for the tied product have standing to bring suit). Nor can appellants succeed on their third contention because we have already rejected the theory that a drug plan and the drugs provided under that plan are separate commodities for purposes of the Clayton Act. *Klamath Lake Pharmaceutical Assn. v. Klamath Med. Serv. Bureau, 701 F.2d 1276, 1288-90* (9th Cir.), *cert. denied*, *464 U.S. 822, 104 S. Ct. 88, 78 L. Ed. 2d 96 (1983)*.

V. CONCLUSION

In sum, we affirm the district court's grant of summary judgment with respect to the claim of attempted monopolization and the tie-in claim. We also affirm the district court's conclusion that drug purchases made by appellees for resale to their members are exempt from the Robinson-Patman Act under the exception created by the Nonprofit Institutions Act. We reverse, however, the district court's determination that appellees' sales of drugs to non-members constituted a de minimis violation of the Robinson-Patman Act, and we remand to the district court for reconsideration of this question.

AFFIRMED IN PART, REVERSED IN PART, AND REMANDED. [10]

[24]**

End of Document

---

[10] Appellants also made an emergency motion to strike portions of appellees' Excerpt of Record. We took this motion under submission with the rest of the case.

The portion of the Excerpt of Record which appellants wish to strike served as an important basis for the district court's factual findings in this case. It was thus proper for appellees to include it in their Excerpt of Record. Consequently, appellants' motion is denied.

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN1[] **Estoppel, Collateral Estoppel**

The doctrine of collateral estoppel provides that once an issue is actually and necessarily determined by a court of competent jurisdiction, that determination is conclusive in subsequent cases based on a different cause of action involving a party to the prior litigation.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN2[] **Estoppel, Collateral Estoppel**

Before application of collateral estoppel can be deemed appropriate, the court must find that: (1) the party to be estopped must have been a party or in privity with a party to the prior action; (2) the issues to be estopped must be the same as the issues determined in the prior action; (3) the issues must have been actually litigated and necessary to the prior judgment; and (4) application of collateral estoppel will not be unfair because: (a) the party to be estopped had little incentive to vigorously litigate the first action; (b) the first judgment is inconsistent with other judgments on the issue to be estopped; (c) the second action affords procedural opportunities unavailable in the first action (or, more generally speaking, that the party to be estopped had a full and fair opportunity to litigate its claims in the first action); or (d) application of collateral estopped would not otherwise be unfair to the defendant.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN3[] **Estoppel, Collateral Estoppel**

The party against whom collateral estopped is asserted must have been a party or in privity with a party to the prior action.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

Civil Procedure > US Supreme Court Review > General Overview

Civil Procedure > ... > Jurisdiction on Certiorari > Considerations Governing Review > Federal Court Decisions

HN4[] **Estoppel, Collateral Estoppel**

One prerequisite to the application of collateral estoppel is that there must have been a final judgment on the merits on the issues to be collaterally estopped.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN5[] **Estoppel, Collateral Estoppel**

To support application of collateral estoppel, the issues as to which a party seeks preclusion must be identical or in substance the same as the issues determined in the prior litigation.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN6[] **Estoppel, Collateral Estoppel**

In order to apply collateral estoppel, the issues to be precluded must have been actually litigated and necessary to the outcome of the first action.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN7[] **Estoppel, Collateral Estoppel**

An alternative ground upon which a decision is based should be regarded as necessary for purposes of determining whether a party is precluded by the principles of res judicata or collateral estoppel from relitigating in a subsequent lawsuit any of those alternative grounds.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN8[] **Estoppel, Collateral Estoppel**

A judgment is conclusive as to all issues that support all independent grounds on which the judgment may be based.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN9[] **Estoppel, Collateral Estoppel**

There are three situations in which it may be unfair to the defendant to apply offensive, non-mutual collateral estoppel: (1) if a defendant in the first action is sued for small or nominal damages, he may have little incentive to defend vigorously, particularly if future suits are not foreseeable; (2) if the judgment relied upon as a basis for the estoppel is itself inconsistent with one or more previous judgments in favor of the defendant; and (3) where the second action affords the defendant procedural opportunities unavailable in the first action that could readily cause a different result.

Administrative Law > Agency Adjudication > Decisions > Collateral Estoppel

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN10[] **Decisions, Collateral Estoppel**

Collateral estoppel is premised on an underlying confidence in the judgment relied on. However, for the purposes of the "inconsistent judgment" consideration, the form of the prior determination is significant.

Administrative Law > Agency Adjudication > Decisions > Collateral Estoppel

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN11[] **Decisions, Collateral Estoppel**

Administrative proceedings may collaterally estop relitigation in court. However, such proceedings have preclusive effect only when an administrative agency is acting in a judicial capacity and resolves disputed issues of fact properly before it which the parties have had an adequate opportunity to litigate.

HN12[] **Exemptions & Immunities, Labor**

The Noerr-Pennington doctrine holds that the Sherman Act, *15 U.S.C.S. § 1 et seq.*, does not apply to activities comprising mere solicitation of governmental action with respect to the passage and enforcement of laws. Noerr shields from the Sherman Act a concerted effort to influence public officials regardless of intent or purpose. Joint efforts to influence public officials do not violate the antitrust laws even though intended to eliminate competition. The Noerr-Pennington doctrine applies to administrative proceedings.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN13[] **Estoppel, Collateral Estoppel**

As a general matter, collateral estoppel may apply to questions of law. However, this rule is subject to broad qualifications. Offensive use of collateral estoppel is inappropriate where the issue is one of law and treating it as conclusively determined would inappropriately foreclose opportunity for obtaining reconsideration of the legal rule on which it was based. This consideration is especially pertinent when there is a difference in the forums in which the two actions are to be determined.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN14[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

Under the "sham" exception to the Noerr-Pennington doctrine, petitioning activities that would normally be protected can be the basis for liability when the defendant's activity was intended to injure the plaintiff directly rather than through a government decision. When the antitrust defendant had not truly sought to influence the governmental decision, his invocation of governmental machinery is a sham. Where he had no reasonable expectation of obtaining the favorable ruling, his effort to do so was a sham.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN15[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

The sham exception to the Noerr-Pennington Doctrine is not satisfied by a mere showing of anticompetitive intent; there must be proof that those being charged subverted the integrity of the governmental process or that the relevant activities were intended not to secure governmental action but to harm others through deliberate abuse of the governmental process.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Summary Judgment > General Overview

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN16[] **Estoppel, Collateral Estoppel**

Courts give collateral estoppel effect to partial grants of motions to dismiss or for summary judgment.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN17[] **Estoppel, Collateral Estoppel**

Whether a judgment should be considered final for the purposes of collateral estoppel turns upon such factors as the nature of the decision (i.e., that it was not avowedly tentative), the adequacy of the hearing, and the opportunity for review.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN18[] **Estoppel, Collateral Estoppel**

Offensive collateral estoppel will not be applied where the second action affords the defendant procedural opportunities unavailable in the first action that could readily cause a different result. Stated generally, collateral estoppel cannot apply against a party who in the earlier case did not have a full and fair opportunity to litigate the issue to be precluded.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN19[] **Estoppel, Collateral Estoppel**

The question of whether a party, without fault of his own, was deprived of crucial evidence or witnesses in the first litigation is relevant to a determination of whether that party had had a full and fair opportunity to litigate. No one set of facts, no one collection of words or phrases will provide an automatic formula for proper rulings on estoppel pleas. In the end, decision will necessarily rest on the trial courts' sense of justice and equity.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN20[] **Estoppel, Collateral Estoppel**

The doctrine of collateral estoppel is premised on an underlying confidence in the correctness of the judgment relied on.

Civil Procedure > Parties > Joinder of Parties > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN21[] **Parties, Joinder of Parties**

In order to maintain a class action, a plaintiff must demonstrate compliance with the mandatory requirements of *Fed. R. Civ. P. 23(a)*. If the initial prerequisites of *Fed. R. Civ. P. 23(a)* are met, plaintiff must additionally meet the requirements of at least one of the three subsections of *Fed. R. Civ. P. 23(b)*.

Civil Procedure > Parties > Joinder of Parties > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN22[] Parties, Joinder of Parties

See *Fed. R. Civ. P. 23(a)*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN23[] Class Actions, Certification of Classes

Under *Fed. R. Civ. P. 23(b)(3)*, an action may proceed as a class action if the court finds that the questions of law or fact common to the members of the class predominate over any questions affecting only individual members, and that a class action is superior to other available methods for the fair and efficient adjudication of the controversy. To support certification, common issues need only predominate; they need not be dispositive of the entire litigation.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN24[] Class Actions, Certification of Classes

The burden of demonstrating fulfillment of the conditions outlined in *Fed. R. Civ. P. 23* for maintenance of a class action lies with the moving party. The strength of a plaintiff's case on the merits is not to be considered in determining whether a class should be certified. There is no requirement of a prima facie showing of merit in a class action to support certification. However, some analysis of the substantive claims and the essential elements needed to establish those claims is necessary for thorough evaluation of whether the requirements of *Fed. R. Civ. P. 23* have been met. Therefore, a preliminary hearing addressed not to the merits of plaintiff's individual claim but to whether she is asserting a claim which, assuming its merit, will satisfy the requirements of *Fed. R. Civ. P. 23* has never been regarded as violative of *Fed. R. Civ. P. 23*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN25[] Prerequisites for Class Action, Adequacy of Representation

The *Fed. R. Civ. P. 23(a)(4)* requirement that a class representative fairly and adequately protect the interests of the class, encompasses two inquiries: (1) whether plaintiff's counsel is competent and (2) whether the named plaintiff has interests antagonistic to those of the class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN26[] Class Actions, Prerequisites for Class Action

Where class members are competitors in a limited market, the named plaintiff's attempts to maximize its damage recovery will conflict with the interests of the other class members, and class certification should be denied.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN27[] Sherman Act, Claims

In order to certify a class under *Fed. R. Civ. P. 23(b)(3)*, the court must find that common issues predominate over individual ones. In an action under Sherman Act *§ 1*, *15 U.S.C.S. § 1*, a plaintiff must establish: (1) an antitrust violation, (2) causation (that plaintiff suffered antitrust "impact" or "injury in fact"), and (3) the amount of damages. In order for a class to be certified in an antitrust action under *Fed. R. Civ. P. 23(b)(3)*, plaintiff must demonstrate that both the violation and fact of injury can be proved for the entire class by common evidence. The amount of damages can be established individually for each class member.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN28[] Sherman Act, Claims

Proof of unreasonableness is not an element of Sherman Act *§ 2*, *15 U.S.C.S. § 2*, monopolization claims.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Clayton Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN29[] Tying Arrangements, Clayton Act

Tying arrangements are normally per se Sherman Act *§ 1*, *15 U.S.C.S. § 1*, violations.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN30[] **Antitrust & Trade Law, Sherman Act**

Proof of impact is an essential element of an antitrust action and must be provable on a common basis in order for a class to be certified. To prove impact, a plaintiff must show that he suffered some loss in his business or property and that there is a causal relationship between the antitrust violation and the loss. Impact is a distinct element of liability, independent of proof of a violation and independent of the matter of individual damages. Fact of damage is susceptible of common proof. There is no reason why proof of the impact cannot be made on a common basis so long as the common proof adequately demonstrates some damage to each individual.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN31[] **Prerequisites for Class Action, Superiority**

Fed. R. Civ. P. 23(b)(3) requires a plaintiff to prove that a class action is superior to other available methods for the fair and efficient adjudication of the controversy. The rule also sets out four criteria relevant to the inquiry regarding superiority: (A) the interest of members of the class in individually controlling the prosecution or defense of separate actions, (B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class, (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum, and (D) the difficulties likely to be encountered in the management of a class action.

Opinion

[*556] DEBEVOISE, District Judge.

Plaintiff Glictronix Corporation filed this action against the American Telephone and Telegraph Company and its other affiliated defendants alleging violations of *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2*.

Now pending are plaintiff's motions (1) for class certification and (2) for partial summary judgment to preclude relitigation of issues decided adversely to AT & T in *Litton Systems, Inc. v. American Tel. & Tel. Co.*, 76 Civ. 2512 (S.D.N.Y.1981), aff'd, *700 F.2d 785 (2d Cir.1983)*, *cert. denied*, *464 U.S. 1073, 104 S. Ct. 984, 79 L. Ed. 2d 220 (1984)*.

Facts

Plaintiff, Glictronix Corporation ("Glictronix") a retailer of telephone terminal equipment, alleges that **[**2]** the defendants (hereinafter collectively referred to as "AT & T") engaged in a course of anticompetitive and predatory conduct with respect to the distribution, sale, rental and/or lease of telephone terminal equipment in the geographic markets serviced by the two defendant operating companies, New Jersey Bell Telephone Company and New York Telephone Company. Glictronix alleges that defendants' acts constitute monopolization, attempt to monopolize and conspiracy to monopolize, all in violation of *Section 2* of the Sherman Act and a conspiracy to restrain trade in violation of *Section 1* of the Sherman Act.

The products at issue in this case are two types of telephone terminal equipment: private branch exchange telephone systems ("PBXs") and key telephone systems ("key systems"). A PBX is used for transmitting and receiving telephone calls and switching such calls to a number of connected individual telephones. A key telephone system is used to connect a single telephone station to telephone trunk lines by manipulation of buttons on the face of the telephone.

Reference to the history of AT & T's control over the telephone terminal equipment market is necessary to an understanding of **[**3]** Glictronix's claims. [1] Until 1968, AT & T held an absolute, governmentally recognized monopoly over terminal equipment. It issued tariffs which were filed with the Federal Communications Commission ("FCC"), prohibiting telephone customers from installing any such equipment not obtained from AT & T. [2]

In 1968, the FCC ruled that these tariffs were unlawful. *In the Matter of Use of the Carterfone Device in Message Toll Telephone Service, 13 F.C.C.2d 420*, *recon. denied*, *14 F.C.C.2d 571 (1968)*. Following this decision, AT & T imposed new tariffs which required that telephone customers **[**4]** who obtained terminal equipment from AT & T's competitors use an "interface device" or "protective connecting arrangement" ("PCA"), to be interposed as a barrier between the AT & T network and the non-AT & T equipment. The PCA had to be leased from and installed by AT & T. The ostensible purpose of the PCA was to protect the network from non-AT & T equipment which might damage it.

The PCA tariff was chosen by AT & T over an alternative method of ensuring protection **[*557]** of the network, namely the development of a system of certification standards. A certification or registration system would regulate the type of equipment which could be connected to the network, and ensure that potentially harmful equipment would not be connected to the network, at least not without protective circuitry.

When AT & T filed the PCA tariff in 1968, the FCC permitted enforcement of the tariff without either approving or disapproving it. *Carterfone, supra*, *14 F.C.C.2d 571 (1968)*.

However, in November, 1975, the FCC generally rejected the PCA tariff in favor of a certification system. *Proposals for New or Revised Classes of Interstate and Foreign Message Toll Telephone Services (MTS) and* ***[**5]*** *Wide Area Telephone Service (WATS), 56 F.C.C.2d 593 (1975)*. Although excluded from this ruling in 1975, the equipment at issue in this case was later included in the certification program. *Interstate and Foreign Toll Telephone Service, 58 F.C.C.2d 736 (1976)*; *Interstate and Foreign MTS and WATS, 67 F.C.C.2d 1255 (1978)*.

The FCC's 1975 ruling stated in unequivocal terms that the PCA tariff provisions "impose[d] an unnecessarily restrictive limitation" and "constitute[d] an unjust and unreasonable discrimination both among users . . . and among suppliers of terminal equipment." After cataloging the extensive reports, recommendations and other material the FCC had considered, the filing also concluded that "there has been no demonstration of network harm resulting from the interconnected operation of some 1600 independent local telephone companies and the Bell System . . . many of whom purchase and connect without benefit of carrier-supplied connecting arrangements the identical independently manufactured terminal equipment for which the individual user must lease carrier-supplied

[1] A detailed discussion of the relevant history may be found in *Litton Systems, Inc. v. American Tel. & Tel. Co., 700 F.2d 785 (2d Cir.1983)*.

[2] AT & T tariffs are imposed by AT & T itself on its customers. Tariffs must be filed with the FCC and can be disapproved by the FCC, but the filing of tariffs constitutes private action by AT & T, not governmental action. See *Litton Systems, supra, 700 F.2d at 807*.

connecting arrangements." *Proposals for New or Revised Classes of Interstate and Foreign* ***[**6]*** *Message Toll Telephone Service (MTS) and Wide Area Telephone Service (WATS), 56 F.C.C.2d 593, 598 (1975)* (first Report & Order). In affirming the FCC's extension of a certification system to PBXs and key systems which had their own protective circuitry, the Fourth Circuit termed the PCA requirement an attempt to preserve "the carriers' private lawmaking authority over independent manufacturers." *North Carolina Utilities Commission v. F.C.C., 552 F.2d 1036, 1051 (4th Cir.)*, *cert. denied*, *434 U.S. 874, 98 S. Ct. 222, 54 L. Ed. 2d 154, 98 S. Ct. 223 (1977)*.

Even after these decisions, PCAs are still required for equipment that does not meet FCC registration standards and for equipment which is not properly installed. *Interstate and Foreign MTS and WATS, supra*, 67 F.C.C.2d at 1256, 1272 n. 21.

Glictronix alleges that AT & T violated *§ 2* of the Sherman Act, by adopting the PCA tariff and opposing the adoption of certification standards. It alleges that AT & T's imposition of the PCA tariff was unlawful in light of the alleged facts that:

1. the PCA was unnecessary to protect the network from harm;

2. the direct cost of the PCA created an artificial economic **[**7]** barrier to competition in the terminal equipment market; and
3. the tariff was adopted and pressed on the FCC as a delaying tactic, designed to suppress competition in the terminal equipment market until AT & T developed products which could compete effectively in that market.

> Glictronix also alleges that AT & T: disparaged the telephone terminal equipment distributed by their competitors (Complaint para. 33(a)); prematurely announced to telephone customers the availability of new terminal equipment in order to persuade such customers not to purchase competitive equipment (*id*. at P 33(b)); delayed installation of and improperly installed and maintained PCAs required to interconnect the equipment distributed by plaintiff and other class members (*id*. at P 33(d)); engaged in the practice of reciprocal trading, whereby defendants would purchase goods and **[*558]** services upon the condition that the supplier of such goods and services would obtain its telephone equipment from defendants (*id*. at P 33(g)); "refuse[d] to sell inside wiring at all, refuse[d] to sell the inside wiring at a reasonable price, refuse[d] to negotiate the sale of inside wiring in good **[**8]** faith, refuse[d] to make timely responses to purchase requests and otherwise sabotage[d] inside wiring obtained by plaintiffs" (Plfs., Brief at 26); and "subjected competitors to unfair and expensive cut-over tactics by failing to acknowledge or claiming non-receipt of customer cut-over instruction letters; by continuously changing cut-over dates; by delivering the wrong Bell trunk line or tie line equipment; by refusing to remove defendants' equipment or lines; by insisting incorrectly that customer difficulties were due to the customer equipment; by installation personnel leaving a job site unfinished; by their destruction of cable on the customer's premises; and by improperly making the cut-over to competitor's equipment" (Plfs. Brief at 27-28).

AT & T contends that the equipment included under the headings of PBXs and key systems is diverse. It claims that the design and functions of PBXs vary greatly, with different variations handling from fewer than 30 to thousands of telephone lines. During the relevant period, PBXs could operate through "radically different technologies." The generic term "key telephone system" also encompasses a wide variety of equipment having varying **[**9]** capacities and using varying technologies. Glictronix marketed only a few of the many PBX and key systems in existence during the relevant period. (Glick Dep. at 91-93). Glictronix concentrated its sales efforts on customers seeking equipment for fewer than 200 lines (*Id*. at 96).

AT & T asserts that these different makes and models of PBXs and key systems possessed different potentials for causing harm to the AT & T network. As noted by AT & T, even when the FCC permitted direct connection of PBXs and key systems to the network in 1978, it ruled that PCAs would continue to be required for equipment that did not conform to registration standards, *67 F.C.C.2d 1255, 1272 n. 21 (1978)*.

One difference among various makes and models of PBXs and key systems found significant by the FCC in its registration orders was the ability of the power supply transformer to prevent power surges from passing through the equipment into the network. According to AT & T, some, but not all manufacturers of terminal equipment, used power supplies listed by Underwriters Laboratories as safe for use with commercial power supplies. AT & T implies that the equipment manufactured by some of the class members **[**10]** would not meet FCC registration requirements, and that, despite the advent of registration standards, these manufacturers would still be required to use a PCA. AT & T asserts that these manufacturers cannot show they were damaged by AT & T's maintenance of the PCA requirement. In addition, the FCC ruled that PBXs and key systems without protective circuitry -- even ones that met registration standards -- could not be considered harmless until the specific installation of the equipment at the customer's premised was inspected and certified, *67 F.C.C.2d 1255*. For example, because telephone lines within a PBX or key system can come into contact with commercial power lines, causing hazardous voltages on the network, the FCC mandated that each non-AT & T installation be certified unless a PCA were used. 67 F.C.C.2d at 1277. AT & T argues that any AT & T competitor whose installation would not pass inspection would require a PCA and cannot maintain that it was injured by AT & T's PCA tariff.

AT & T has offered no evidence that any class member's equipment has actually failed to meet FCC registration standards and has been required to be used with a PCA. Similarly, AT & T has offered no **[**11]** evidence that any class member's installations have failed to pass FCC inspection. Nor has Glictronix offered evidence to the contrary.

[*559] In support of its motion for partial summary judgment, Glictronix relies on the jury findings and the opinion of the Second Circuit in litigation brought by Littons Systems, Inc. against the defendants in this case and other AT & T affiliated companies. *Litton Systems, Inc. v. American Tel. & Tel. Co.*, 76 Civ. 2512 (S.D.N.Y. 1981), *aff'd*, *700 F.2d 785 (2d Cir.1983)*, *cert. denied*, *464 U.S. 1073, 104 S. Ct. 984, 79 L. Ed. 2d 220 (1984)*.

In 1976, Litton, a terminal equipment manufacturer filed suit alleging the same antitrust violations as are alleged here. The litigation dealt with the same product categories as are in issue here. In *Litton*, AT & T stipulated that PBXs and key systems constituted a relevant product market under the antitrust laws. *See* *Litton, supra, 700 F.2d at 791*.

The extensive nature of the *Litton* litigation was aptly summarized in *Jack Faucett Assoc. v. American Tel. & Tel. Co., 566 F. Supp. 296, 298 (D.C.Dist.Col.1983)*, *rev'd*, *240 U.S. App. D.C. 103, 744 F.2d 118 (D.C.Cir.1984)* another **[**12]** case in which a plaintiff interconnect company sought to have the *Litton* findings applied collaterally against AT & T:

> Trial began in 1980, ran for more than five months, generated 18,000 pages of testimony, and 945 exhibits, and concluded with a jury verdict for Litton in January, 1981, for nearly $92 millions as a competitor and $268,000 as a customer of AT & T which the trial count then trebled. . . . On February 3, 1983 the U.S. Court of Appeals for the Second Circuit unanimously affirmed. *700 F.2d 785 (2d Cir.1983)*. Rehearing and rehearing en banc were denied, apparently without a dissenting vote, on March 31, 1983.

After the *Jack Faucett* trial court rendered its decision, the United States Supreme Court denied certiorari in *Litton, 464 U.S. 1073, 104 S. Ct. 984, 79 L. Ed. 2d 220 (1984)*.

Glictronix submits that AT & T should be precluded from relitigating the following issues which were decided in *Litton*:

Relevant Product Market

(1) The relevant product market is the sale and lease of telephone terminal equipment consisting of PBX Telephone Systems and Key Telephone Systems.

(2) Defendants possessed monopoly power in the relevant market.

[13]** (3) Defendants had a specific intent to obtain monopoly power in the relevant market.

(4) There was a dangerous probability that defendants would obtain monopoly power in the relevant market.

Anticompetitive or Predatory Conduct

(5) Defendants attempted to obtain and did wilfully maintain their monopoly power in the relevant market through the following anticompetitive or predatory conduct:

(a) They filed the tariffs requiring a Protective Connecting Arrangement in bad faith;

(b) They opposed certification of telephone terminal equipment in bad faith;

(c) They intentionally delayed the provision and installation of Protective Connecting Arrangements;

(d) They refused, in bad faith, to sell inside wiring at all or on a reasonable basis; and

(e) They delayed, in bad faith, in making cutovers to customer provided telephone terminal equipment.

Standing to Sue

(6) The class plaintiffs in this case have standing to sue for damages as competitors of defendants in the relevant market.

Defenses

(7) The Protective Connecting Arrangement was not necessary to protect the telephone network from harm, and any claim that it was necessary is baseless.

(8) The *Noerr-Pennington* **[**14]** doctrine is inapplicable to the anticompetitive or predatory conduct of defendants at issue in this case.

(9) The "sham" exception to the *Noerr-Pennington* Doctrine is applicable to the **[*560]** anticompetitive or predatory conduct of defendants at issue in this case.

The proposed class of plaintiffs is defined as:

> "all persons who engaged in the business of distributing, selling, renting and/or leasing PBX Systems, both automatic and otherwise, and key telephone systems, of various manufacturers, to subscribers of telephone service in interstate commerce provided by the defendants, New Jersey Bell Telephone Company and New York Bell Telephone Company, and who sustained damages as a result of defendants' violations of the antitrust laws."

(Complaint para. 5). According to Glictronix, there are approximately 600-800 identifiable members of the proposed class. The class members include companies with a wide variety of sizes, structures and marketing philosophies.

Glictronix contends that it can establish many essential elements of its case by evidence common to the class. (See Plaintiff's Class Certification Brief at 3-5). Among the issues Glictronix believes **[**15]** it can establish by common evidence are the relevant product and geographic markets; AT & T's monopoly power in those markets; its claims based on AT & T's promulgation of the PCA requirement and opposition to certification standards; its claims based on alleged anticompetitive practices by AT & T including delay in provision and installation of PCAs, refusal to sell inside wiring at all or on a reasonable basis, delay in interconnection to the AT & T network of competitors' terminal equipment; the fact of injury to each member of the class; and the appropriate measure of damages as to each member of the class.

Glictronix has submitted several reports by experts in support of its motion for class certification. These reports deal exclusively with the effects on the class of the PCA requirement and of the delay in adoption of certification standards.

One of these experts, Thomas R. Pratt, concluded that the imposition of the PCA tariff on all AT & T competitors: (a) resulted in a significant competitive disadvantage and loss of profits to each proposed plaintiff-competitor; (b) impeded development of the terminal equipment market and reduced competitive activity in that market, and; **[**16]** (c) imposed major constraints on the profitability of each competitor.

Mr. Pratt asserts that the members of the plaintiff class incurred damages in two ways. First, the PCA requirement significantly reduced the volume of sales for AT & T's competitors since the device added significant costs to using and installing competitors' equipment. Since the class members could have earned profits on these lost sales, they have all been damaged to the extent of the lost profits. (Pratt Report at 2-3).

Second, Pratt claims the class members lost profits because the added cost of the PCA forced them to lower their prices in order to stay competitive with AT & T. The need to price their equipment lower resulted in lower profits for each unit of equipment they did sell. (*Id*.)

Pratt served as an expert for *Litton* in its case against AT & T and was one of the principal participants in the creation of a damage study presented by *Litton*. That study concluded:

> The plaintiffs were all damaged by the interface device because it stifled the development of the market and thereby reduced the level of sales and profits. The device also damaged the plaintiffs by necessitating an additional **[**17]** reduction in selling prices in order to compete, and by increasing selling, installation, and maintenance costs for each sale. The overall effect of the device was equivalent to the imposition of a discriminatory tariff against each of the plaintiffs which resulted in lost sales and profits for each of the plaintiffs.

(Pratt Report at 4, Appendix to Plaintiff's Brief in Support of Class. Cert.) These findings are generally supported by reports submitted by Dr. Les Seplaki, a professor of economics at Rutgers, and by Samuel M. DeLuca, an independent consultant in the **[*561]** telecommunications industry and a former employee of New Jersey Bell.

According to Glictronix's experts, the PCA requirement gave AT & T an opportunity to affect every sale of terminal equipment attempted by competitors. Since non-AT & T equipment could only be connected through a PCA provided and installed by a defendant operating company (Plaintiff's Ex. 23, A-307), AT & T was involved every time a non-AT & T sale was attempted.

AT & T activities vis-a-vis competitors in the terminal equipment market are recorded in Competitive Activity Reports, which were compiled on an individual basis for each **[**18]** customer when a Bell operating company was faced with competition for a customer's terminal equipment business. The information in the Competitive Activity Reports included the number of the customers' lines, the nature of the terminal equipment, the number of stations, detailed cost comparisons, reasons for the customer's choice between Bell and the competitor, and a general comments section (See para. CC ex. 0, A-1083). In addition, a Computerized Economic Comparison -- comparing the costs of Bell and non-Bell proposals -- was commonly prepared and distributed to customers.

Mr. Pratt's report presents a methodology for calculating damages and allocating damages among the proposed class members. The Competitive Activity Reports provide much of the crucial information on which the method rests. Glictronix contends that calculation of damages is made manageable by the fact that defendants maintained "quite complete records" of every competitive situation. A formal program of competitive activity reporting was commenced on a nationwide basis by AT & T in 1974 (Gear Dep. at 24-16 to 25-5). But monthly competitive analyses for both New York and New Jersey were compiled throughout the **[**19]** entire period of issue here. According to Glictronix, the periodic analyses of the competitive market provide much of the data necessary to determine the size of the market, the extent of competitive efforts and the amount of the market obtained by competitors.

The Pratt damage methodology provides for allocation among the class members on a yearly basis dependent upon their *pro rata* share of the available market. According to the report, the *pro rata* share is readily ascertainable from the monthly reports. AT & T's reports provided information on the most active competitors and a "wins to attempts ratio" allowing comparison of the competitors' relative effectiveness. Although competitive ranking was done only for the top few companies, both the underlying data and software programming is available to rank the competitive effectiveness of every competitor in the market place. (December 12, 1983 2 Weigman Dep. at 129-25 to 131-16).

AT & T officials have admitted that, by and large, "If a vendor made a number of sales, he would appear on the list" (McNamara Dep. at 112-113). The Competitive Activity reports provide the best available source for quantitatively and qualitatively **[**20]** assessing AT & T's competitors in the terminal equipment market.

AT & T also submits expert testimony, in the form of a report by Dr. Almaris Phillips, a professor of public policy and of economics and law at the University of Pennsylvania. Dr. Phillips contends that the conclusion of Mr. Pratt and Dr. Seplaki that each class member lost sales and profits it would have obtained in the absence of the PCA requirement is predicated on two incorrect assumptions. He defines these assumptions:

> "(1) the assumption that, but for the PCA requirement in the Bell System's post-Carterfone tariffs, the particular PBX and key telephone systems marketed by each potential class member would have been directly connected to the network without protective circuit; and
> "(2) the assumption that each potential class member would make more sales and more profit in the increased competitive environment that plaintiff assumes would accompany the earlier advent of registration."

[*562] (Appendix to Defendants' Class Certification Brief, Tab 1, at 3.) Phillips contends that the first assumption is wrong because, even under the present certification standards, some class members' **[**21]** equipment would have to be used with a protective device either because its design did not meet FCC registration standards or its installation did not pass FCC inspection (Phillips Report at 4-7).

Phillips also suggests that for some class members the cost of compliance with FCC design and installation requirements could be more expensive than the use of protective circuitry. He cites an FCC report as evidence of this proposition. *67 F.C.C.2d 1255, 1256, 1275-76 (1978)*.

This suggestion is also made in AT &T's brief, which states that "one interconnect company complained to the FCC that its competitors were choosing to use PCAs rather than comply with the registration requirements. . . . *Customer Provided Equipment and Connecting Arrangement, 85 F.C.C.2d 868, 883 (1981)*." (AT & T's OC brief, p. 45, note.) Glictronix apparently investigated the circumstances of this FCC decision and discovered that the company in question did not deal with PBXs or key systems and therefore was involved in a different product market.

In deposition, Glictronix's expert Pratt did agree that the FCC's 1978 registration program did impose costs on interconnect companies, and admitted that he did not **[**22]** know what all the components of those costs were or whether they were more or less than the PCA requirement for particular types of equipment (Pratt Dep. at 91, 98-99). However, Mr. Pratt points out in his reply affidavit, that even if there were costs associated with the registration program, those costs are imposed on all manufacturers of PBX and key systems equipment. In contrast, the PCA cost was imposed on all manufacturers except the defendants (Pratt Reply Affidavit para. 7, Supplemental Appendix to Brief in Support of Class Certification, Vol. II, Tab 6).

Phillips also takes issue with what he terms Glictronix's second assumption: that each potential class member would have made more sales and/or more profit absent the PCA requirement. Phillips interprets Pratt and Seplaki to have argued that in the absence of the PCA requirement, the AT & T competitors would have been able to raise their prices and thereby obtain higher profits. Phillips attacks this notion under the general economic principle that competition will tend to reduce prices to the marginal cost of the efficient competitor (Phillips Report at 13). He suggests that:

> [some] competitors -- probably those **[**23]** with better financing, better equipment, expandable sources of supply, better management, and adequate service organization -- may have improved their sales, whereas those with higher costs and unattractive products would probably have tendered to suffer reduced sales or complete failure.

(Phillips Report at 17-18). Consistent with Phillips' view was the damage model prepared for the *Litton* case, which Mr. Pratt participated in creating. That model predicted that there would have been a large shake-out of existing interconnect companies that would have been unable to survive if the FCC had adopted registration standards in 1973 (*Id*.)

Pratt and Seplaki respond to Phillips' charge in different ways. Pratt states that he believed that plaintiffs lost profits because of lost sales, not because they could have raised prices in the absence of the PCA requirement. (Pratt Reply Affidavit, para. 11, Appendix to Brief in Support of Class Certification, Supplemental Vol. II, Tab 6). Seplaki states that lost profits were due not to an inability to make more sales, but due to "the necessity of reducing per-unit profit margins as a result of the PCA requirement." (Seplaki Reply **[**24]** Affidavit, *Id*. at Tab 7).

Pratt attacks Phillips' argument for its allegedly erroneous substitution of a "hypothetical world" in which Phillips analyzes what would have happened had registration been adopted in 1973 -- for the "real world" in which according to Pratt, all class members lost at least some sales because **[*563]** of the costs added by the PCA requirement. Dr. Seplaki similarly responds that he, Seplaki, "concentrate[d] on the impact of the PCA as a factual matter in the real world that existed during the relevant period." (Seplaki Reply Affidavit, para. 10). His conclusion is that because of the cost of the PCA, which was imposed on all non-AT & T competitors, all class members were faced with the choice of either lowering their prices to absorb the cost of the PCA for the customer or losing some sales. (Seplaki Reply Affidavit para. 6).

Phillips also assails Pratt's methodology for establishing and allocating damages. He identifies "two serious flaws that render it unworkable and contrary to the interests of many of the potential class members." (Phillips Report at 19). Phillips first criticizes the model because it "allocate[s] damages among class members **[**25]** based on their actual market share for each year from 1970-1978 in the real world." (*Id*.) He contends that strong companies, which might have increased their market share in the absence of the PCA requirement, will be foreclosed from making this showing under Pratt's model. Similarly, AT & T will be foreclosed from arguing that weaker companies' share of the market would have shrunk in a freely competitive environment. Second, Phillips contends that the model fails to account for companies which dropped out of the market. Under Pratt's method these companies would be foreclosed from showing what market share they would have captured if they had not been driven from the market. Similarly, companies which delayed their entry into the market because of AT & T's conduct would not be permitted to show what market share they would have won had they entered sooner. For these reasons, Phillips believes allocating damages in this case will place class members in conflict with one another and would have to be done on an individualized basis.

Nothing in plaintiff's experts' reports addresses how Glictronix's damage claims arising from AT & T's anticompetitive practices (such as delaying **[**26]** the interconnection of competitors' equipment to the network) can be proven by evidence common to the class.

Conclusions of Law

I. Collateral Estoppel

Glictronix seeks to preclude AT & T from relitigating numerous issues determined adversely to AT & T by the *Litton* jury and by the Second Circuit on AT & T's appeal. ***HN1***[🡅] The doctrine of collateral estoppel provides that "once an issue is actually and necessarily determined by a court of competent jurisdiction, that determination is conclusive in subsequent cases based on a different cause of action involving a party to the prior litigation." *Montana v. U.S., 440 U.S. 147, 153, 99 S. Ct. 970, 973, 59 L. Ed. 2d 210 (1979)*.

Although Glictronix was not a party to the *Litton* case, all of the defendants here were. Glictronix moves to preclude relitigation of the *Litton* findings under the non-mutual, offensive application of the collateral estoppel doctrine set forth in *Parklane Hosiery Co. v. Shore, 439 U.S. 322, 99 S. Ct. 645, 58 L. Ed. 2d 552 (1979)*.

HN2[🡅] Before application of collateral estoppel can be deemed appropriate, the court must find that:

1. the party to be estopped must have been a party or in privity with **[**27]** a party to the prior action;

2. the issues to be estopped must be the same as the issues determined in the prior action;

3. the issues must have been actually litigated and necessary to the prior judgment; and

4. application of collateral estoppel will not be unfair because:

(a) the party to be estopped had little incentive to vigorously litigate the first action;

(b) the first judgment is inconsistent with other judgments on the issue to be estopped;

(c) the second action affords procedural opportunities unavailable in the first action **[*564]** (or, more generally speaking, that the party to be estopped had a full and fair opportunity to litigate its claims in the first action); or

(d) application of collateral estopped would not otherwise be unfair to the defendant. *See* *Parklane Hosiery Co. v. Shore, 439 U.S. 322, 99 S. Ct. 645, 58 L. Ed. 2d 552 (1979)*.

AT & T contends that collateral estopped should not be applied because many of these criteria cannot be met.

A. *Conditions Met*.

Defendant do not contest that several of the prerequisites for the application of collateral estopped have been met. ***HN3***[] The party against whom collateral estopped is asserted must have **[**28]** been a party or in privity with a party to the prior action. *Blonder-Tongue Laboratories, Inc. v. University of Illinois Foundation, 402 U.S. 313, 328-29, 91 S. Ct. 1434, 1442-43, 28 L. Ed. 2d 788 (1971)*. The defendants here were all parties to the *Litton* litigation.

Second, ***HN4***[] there must have been a final judgment on the merits on the issues to be collaterally estopped. *Montana v. United States, 440 U.S. 147, 153, 99 S. Ct. 970, 973, 59 L. Ed. 2d 210 (1979)*. A final judgment on the merits was rendered by the *Litton* jury. That judgment was affirmed on appeal and defendants exhausted their right of appeal when the United States Supreme Court denied certiorari. *Litton Systems, Inc. v. America Tel. & Tel. Co*., 76 Civ. 2512 (S.D.N.Y.1981), *aff'd*, *700 F.2d 785 (2d Cir.1983)*, *cert. denied*, *464 U.S. 1073, 104 S. Ct. 984, 79 L. Ed. 2d 220 (1984)*.

Third, there is no question that AT & T vigorously litigated the *Litton* case. Beyond these points, each criterion for application of collateral estopped is contested.

B. *Same or Different Issues*

HN5[] To support application of collateral estoppel, the issues as to which a party seeks preclusion must be "identical" or **[**29]** "in substance the same" as the issues determined in the prior litigation. *Montana v. United States, 440 U.S. 147, 155, 99 S. Ct. 970, 974, 59 L. Ed. 2d 210 (1979)*; *Blonder-Tongue, supra, 402 U.S. at 323, 91 S. Ct. at 1439*.

Defendants contend that the issues here are different from those decided in *Litton* because the equipment at issue is not the same. The terms PBX and key system are generic and encompass a wide variety of equipment. Defendants contend that the *Litton* judgment is inapplicable to models of PBXs and key systems not at issue in *Litton*. The different models should be treated differently, the argument goes, because they have widely differing potentials for harming the network. Since the PCA is still required by the FCC for equipment which does not meet registration standards, defendant assert that it is important to distinguish among types of PBXs and key systems. Arguably, some equipment would have been required to use a PCA even if registration standards had been adopted much earlier than they were.

In support of their position, defendants rely on a recent decision in *Am/Comm Systems, Inc. v. American Tel. & Tel. Co., 101 F.R.D. 317 (E.D.Pa.1984)* **[**30]** (Defendants' CE Appendix, Tab 2), in which a motion to certify a nationwide class of distributors of telephone terminal equipment was denied. Regarding the question of whether class representatives' claims satisfied the Fed.R.Civ.P. 23(a)(3) requirement of typicality, the *Am/Comm* Court held that there had to be a "product-by-product" determination of whether the PCA requirement violated the antitrust laws. Id. at 321. Defendants interpret this holding to mean that a model by model analysis of the PBXs and key systems is required in this case and that application of collateral estoppel is inappropriate regarding any model which was not in issue in *Litton*.

Defendants' use of *Am/Comm* in this context is inappropriate. The *Am/Comm* plaintiffs defined the relevant product market to include many products in addition to PBXs and key systems, such as burglar alarms and automatic answering devices. (See Suppl. Appendix, Tab 8, para. 4(b)). In fact, in its brief opposing class certification **[*565]** in *Am/Comm*, AT & T emphasized this difference between that case and Litton:

> The Litton case was limited to PBXs and Key Telephone Systems (700 F.2d at 801). Thus, **[**31]** *Litton* did not involve any of the types of equipment that are specifically identified in the Complaint in this case.

(See Plaintiff's Supplemental appendix regarding Class Cert., Vol II Tab 9 at 21).

Given these facts, it is evident why the *Am/Comm* court held that product-by-product analysis was required; the products at issue were wholely different from the PBXs and key systems at issue in *Litton*. Here AT & T can only contend that different models of PBXs and key systems are involved.

In *Litton*, PBXs and key systems were treated generically. There was no attempt to limit the case to particular models or manufacturers. The relevant product market was "the sale and lease of PBX's and key systems". *See Phonetele, Inc. v. American Telephone & Telegraph Co*., No. CV-74-3566-MML (C.D.Cal., January 19, 1984).

In this case, unlike in *Am/Comm*, the relevant market is limited to PBXs and key systems. Since the relevant product market in *Litton* covered all such equipment, the PBXs and key systems at issue here must necessarily have been the subject of the findings in *Litton*.

As AT & T points out, the FCC's registration orders recognized that different **[**32]** equipment may have different potential for harm to the system. Despite this theoretical possibility, the Second circuit in *Litton* found as a general matter that "the jury could have reasonably concluded . . . that AT & T's ongoing claim of harm to the system was baseless." Litton, supra, 700 F.2d at 811. Since this determination appears clearly to address the entire product market, there is no basis to require that a new determination be made regarding the specific equipment in this case.

C. *Actually Litigated and Necessary*

HN6[] In order to apply collateral estoppel, the issues to be precluded must have been "actually litigated and necessary to the outcome of the first action." Parklane, supra, 439 U.S. at 326, 99 S. Ct. at 649, n. 5. AT & T contends that the *Litton* jury's "belated" finding that the filing of the interface device tariff was in bad faith was not necessary to outcome of *Litton* and should therefore not be given preclusive effect here.

As was discussed by the Second Circuit in *Litton*, when the *Litton* jury returned its verdict finding AT & T guilty of monopolization, it had failed to reach unanimity on three matters, including special interrogatory **[**33]** 16(a), which asked whether the filing of the interface tariff was in bad faith. Special interrogatory 16 listed nine alleged practices of the defendants and asked the jury on which of the practices it had based its finding of predatory conduct. The jury answered in the affirmative with respect to three of the listed practices: 16-b, "intentional delay in providing and installing interface devices"; 16-c, "opposing certification in bad faith"; and 16-h, "bad faith refusal to sell inside wiring at all or on a reasonable basis." The jury reported it was divided regarding 16-a, "filing of the interface device tariff in bad faith" and 16-i, "bad faith delay in making customers." [3]

After this initial verdict, counsel and the court discussed whether the jury should be asked to deliberate further on the undecided questions. AT & T's counsel argued **[**34]** against further deliberations saying that the absence of unanimity on 16-a and 16-i "doesn't interfere in of itself with the damage award . . . ." (Plaintiff's Appendix to CE

---

[3] The third issue on which the jury failed to reach unanimity was the question of whether AT & T's attempted monopolization was the proximate cause of plaintiffs' injury.

Brief, A6390). The court expressed the opinion that the damage award could be supported by the answer to 16-c. (*Id*. at A6394).

Over defendant's objections, the judge instructed the jury to try to answer the **[*566]** questions "if you can possibly agree after discussing the matter again . . . to see whether or not you can't in good conscience adopt [the views of other jurors] as your own". *Litton, supra, 700 F.2d at 804, n. 24*. (brackets in original). The jury returned after approximately a half hour's deliberation, having found against AT & T on all three issues. The jury did not change the amount of damages it had already assessed. *Id*. at n. 25.

AT & T argues that because the answer to Special Interrogatory 16(a) came after the determination of damages, the jury did not reach its verdict in reliance on its finding that the tariffs were filed in bad faith and therefore that finding was not essential to the judgment. AT & T also notes that the Second Circuit has stated that the verdict on the **[**35]** monopoly charge and the damage award could be sustained without the three belated findings. *Litton, supra, 700 F.2d at 803*.

In *Phonetele, Inc. v. American Tel. & Tel. Co., supra*, the court considered and rejected plaintiffs' motion for application of collateral estoppel based on the *Litton* findings. As Glictronix contends, the holding of the *Phonetele* opinion appears to be that collateral estoppel could not be applied because the product and market at issue were entirely different from the products and market in *Litton*. The product at issue in *Phonetele* was the "Phonemaster", a product against which AT & T did not compete since it had no comparable product. (Slip op. at 7, 8).

However, after pointing out this difference in product markets, the *Phonetele* court considered the significance for collateral estoppel purposes of the belated findings. It stated that:

> Inasmuch as the Court of Appeals then determined that the initial three findings were adequately supported, *700 F.2d at 814-15*, it is clearly arguable that the answer to question 16(a) was not necessary. In view of the potentially broad impact of the issue in this case, the Court concludes **[**36]** that its preclusion here on dubious grounds would not be appropriate. (Slip op. at 9).

In *Selectron, Inc. v. American Tel. & Tel. Co., 587 F. Supp. 856 (D.Ore.1984)*, the court concluded that "it is a well recognized rule that ***HN7***[] an alternative ground upon which a decision is based should be regarded as necessary for purposes of determining whether [a party] is precluded by the principles of *res judicata* or collateral estoppel from relitigating in a subsequent lawsuit any of those alternative grounds. *Winters v. Lavine, 574 F.2d 46, 67 (2d Cir.1978)*." *Id., at 862-863*.

The clear majority view is that ***HN8***[] a judgment is conclusive as to all issues that support all independent grounds on which the judgment may be based. 1B J Moore para. 0.443[5.-2]; *Restatement (Second of Judgments, § 27 comment 0* (1982); *Winters v. Lavine, 574 F.2d 46, 66-69 (2d Cir.1978)*; *Williams v. Ward, 556 F.2d 1143, 154 (2d Cir.1977)*; *but see* *Halpern v. Schwartz, 426 F.2d 102, 105-08 (2d Cir.1970)*; *District of Columbus v. C.F. & B., Inc., 442 F. Supp. 251 (D.D.C.1977)*.

In *Halpern*, a case subsequently limited to its facts by *Winters* and *Williams*, the court identified two **[**37]** considerations against giving collateral estoppel effect to all alternative grounds of a judgment. First, the court was concerned that if the jury or court in the prior case were sure of one ground, it might not give rigorous consideration to the other. Second, it suggested that a losing litigant might not vigorously appeal an erroneous ruling on one alternative ground if it believed the judgment would be affirmed on another ground. *Halpern v. Schwartz, supra, 426 F.2d at 105*.

AT & T implies that because the jury had already found liability, it may not have given rigorous consideration to interrogatory 16-a. The speed with which the jury decided the question and the fact that the damage award remained unchanged allegedly support this conclusion.

In appealing the jury verdict, AT & T argued that the 16-a finding should have **[*567]** been set aside because it had been coerced or was otherwise tainted. The Second Circuit rejected this contention, pointing to evidence that the jury had deliberated conscientiously and had been impartial. *Litton, supra, 700 F.2d at 803*. Specifically, the court believed the jury was not unfairly disposed to make findings favorable to one side **[**38]** or the other since it had found liability on one count, no liability on two others, and reached no agreement on another. The court ruled that "Litton was entitled to a jury determination on all its claims." *Id. at 804*. Apparently the Second Circuit, which had the opportunity to review the entire record, found that there was no reason to believe that the jury had not given fair consideration to interrogatory 16-a. There is no reason to think that the jury's belated findings were coerced or tainted. The fact that the jury added no damages after answering 16-a does not undermine the necessity of the finding or suggest that the jury did not consider it rigorously. The jury had already found AT & T had opposed certification in bad faith. It is entirely plausible that the jury believed that the finding of bad faith in filing the tariff did not cause damages additional to those caused by the bad faith opposition to certification.

Finally, it is mere speculation to conclude that the speed of the jury's decision indicated that it did not give due consideration to the interrogatory. Having observed the lengthy trial and having previously deliberated their verdict, the jury may well have **[**39]** been able take the needed steps to reach its decision in half an hour with due consideration of the issue.

The second *Halpern* consideration is inapplicable to this case. Not only did AT & T have sufficient motive to appeal the jury's belated findings, but it did appeal them. It is obvious from the Second Circuit's opinion that AT & T vigorously challenged the findings and that the court thoroughly considered its arguments. *Litton, supra, 700 F.2d at 802-04, 810-12*.

It is unquestionably true that the jury verdict could have stood absent the interrogatory 16-a findings. But under the prevailing view, the existence of multiple independent grounds for a judgment does not justify the conclusion that any of those grounds are unnecessary for collateral estoppel purposes. This case does not fit into the *Halpern* exception, even if the Third Circuit recognizes that exception. For these reasons, I conclude that the belated jury findings are to be deemed "necessary" for collateral estoppel purposes. *But see Wrede v. AT & T*, Civ. No. 83-283-1, slip op. at 9-10 (M.D.Ga. May 28, 1984); *Phonetele v. AT & T., 1984-1 Trade Cas.(CCH) P65,921*, Civ. No. 74-3566, slip op. at 8-9 (C.D.Cal. **[**40]** January 19, 1984).

D. *Unfairness to AT & T*

In *Parklane Hosiery Co. v. Shore, supra, 439 U.S. at 330-31, 99 S. Ct. at 651-52*, the Supreme Court listed ***HN9***[] three situations in which it may be unfair to the defendant to apply offensive, non-mutual collateral estoppel:

> If a defendant in the first action is sued for small or nominal damages, he may have little incentive to defend vigorously, particularly if future suits are not foreseeable. The *Evergreens v. Nunan, 141 F.2d 927, 929 (CA2)*; *cf.* *Berner v. British Commonwealth Pac. Airlines, 346 F.2d 532* (CA2 [d Cir.1965]) (application of offensive collateral estoppel denied where defendant did not appeal an adverse judgment awarding damages of $35,000 and defendant was later sued for over $7 million). Allowing offensive collateral estoppel may also be unfair to a defendant if the judgment relied upon as a basis for the estoppel is itself inconsistent with one or more previous judgments in favor of the defendant. Still another situation where it might be unfair to apply offensive estoppel is where the second action affords the defendant procedural opportunities unavailable in the first action that could readily cause **[**41]** a different result.

AT & T contends that it should not be estopped from relitigating the *Litton* judgment for the latter two reasons.

[*568] 1. Inconsistent Judgments.

AT & T contends that various portions of the *Litton* judgment are inconsistent with an opinion in *United States v. American Tel & Tel. Co., 524 F. Supp. 1336 (D.D.C.1981)*, rulings of the FCC and state regulatory agencies, and a National Academy of Sciences report. *Parklane Hosiery, supra*, explicitly states that previous, inconsistent judgments may bar application of collateral estoppel; nowhere does the opinion suggest that inconsistent determinations other than final judgments may act as a bar. *See also* *Hardy v. Johns-Manville Sales Corp., 681 F.2d 334, 346 (3d Cir.1982)*; but see a contrary analysis by the Court of Appeals in *Faucett, supra*, at 129-130.

a. Administrative and Other Determinations

However, AT & T contends that the preclusive effect of a final judgment may be blocked by the existence of administrative agency determinations which are inconsistent with that judgment. In support of this contention, AT & T offers two arguments. First, it argues that the fact that these rulings **[**42]** were not final judgments is not controlling because the doctrine of collateral estoppel is premised on an "underlying confidence" in the correctness of the judgment relied on, and therefore the fact that inconsistent determinations exist is more important than their form.

Second, AT & T suggests that since administrative agency findings may themselves have collateral estoppel effect in some circumstances, they must also carry enough weight to bar the preclusive effect of a judgment with which they are inconsistent.

Regarding AT & T's first point, it is true that ***HN10***[] collateral estoppel is premised on an underlying confidence in the judgment relied on. *Standefer v. U.S., 447 U.S. 10, 23 n. 18, 100 S. Ct. 1999, 2007 n. 18, 64 L. Ed. 2d 689 (1980)*. As will be discussed later, the administrative rulings which AT & T cites are not inconsistent with *Litton*. However, for the purposes of the "inconsistent judgment" consideration, the form of the prior determination is significant.

To illustrate the potential unfairness to defendants which the "inconsistent judgment" criterion is designed to prevent, the Supreme Court in *Parklane* cited a hypothetical case presented by *Professor Currie. **[**43]** Parklane, supra, 439 U.S. at 330 n. 14, 99 S. Ct. at 651 n. 14*. In his hypothetical, Currie posited a railroad collision which injures 50 passengers, each of whom brings individual suit against the railroad. Currie argues, and the Court implicitly agreed, that if the railroad won the first 25 suits and lost the 26th, plaintiffs in cases 27 through 50 should not be able to apply case 26 offensively against the railroad.

This example aptly illustrates the purpose of the "inconsistent judgment" consideration, and suggests that the form of the prior determination is important. When courts in earlier cases have fully litigated an issue and reached inconsistent final judgments, there is good reason not to give preclusive effect to either judgment. The mere fact of the inconsistent judgments suggests that even after full consideration of the issue between adversary parties there remains ground on which a reasonable jury or court may differ.

But where a determination is reached by an administrative agency, without the benefit of a full adversary process, there is no reason to bar the preclusive effect of a later final judgment reached in a fully litigated adjudication simply because **[**44]** it is inconsistent with the agency determination.

The cases cited by AT & T in support of its argument that the administrative agency determinations are "inconsistent judgments" are unpersuasive. In *Nasem v. Brown, 193 U.S. App. D.C. 416, 595 F.2d 801, 806 (D.C.Cir.1979)*, the court treated as "well established" the "proposition that ***HN11***[] administrative proceedings may collaterally estop relitigation in the court." However, it went on to say that such proceedings have preclusive effect when "an administrative agency is acting in a judicial capacity and resolves **[*569]** disputed issues of fact properly before it which the parties have had an adequate opportunity to litigate." *Id*. quoting *U.S. v. Utah Construction & Mining Co. 384 U.S. 394, 422, 86 S. Ct. 1545, 1560, 16 L. Ed. 2d 642 (1966)*. [4] In this case, the administrative determinations are not adjudications between parties which can be relied on for collateral estoppel. [5] They are not the product of proceedings in which adverse parties presented conflicting evidence on the issues presented in this case. These administrative determinations did not afford the parties here an adequate opportunity to litigate the questions **[**45]** at issue in this case, and therefore should not be used to block the preclusive effect of *Litton*, in which these issues were fully litigated.

---

[4] *Utah Construction* is the only other case cited by AT & T to support its argument that administrative determinations are inconsistent judgments.

[5] The FCC rulings, for example, were not the result of litigation between adversarial parties after full discovery. The purpose and methods of the proceedings are wholely dissimilar to those of the *Litton* litigation.

For similar reasons, it is obvious that the report of the NAS is not a judgment inconsistent with *Litton*.

b. *United States v. AT & T and the Noerr-Pennington* Doctrine.

AT & T contends that the *Litton* court's determinations (1) that the *Noerr-Pennington* Doctrine does not apply to AT & T's opposition to certification before the FCC, and (2) that the opposition to certification constituted a sham under the "sham exception" to the *Noerr-Pennington* Doctrine both conflict with determinations **[**46]** of Judge Greene in *United States v. American Tel. & Tel. Co., 524 F. Supp. 1336 (D.D.C.1981)*.

One part of the government's case against AT & T involved the claim that AT & T's post-Carterfone policies on interconnection of customer-provided terminal equipment violated the antitrust laws. The government's proof in this area consisted of a series of "episodes", each describing the experience with the PCA requirements of individual companies which marketed terminal equipment. One of these episodes involved Litton's experience marketing PBXs. *United States v. AT & T., supra, 524 F. Supp. at 1349* & n. 40. In an earlier opinion, Judge Greene ordered that the government have access to the document discovery which had been undertaken in *Litton* because he considered the claims and issues in *Litton* to "represent a separate and identifiable segment of the government's case here." *United States v. AT & T, 461 F. Supp. 1314, 1340-41 (D.D.C.1978)*.

Following the presentation of the government's case, AT & T moved to dismiss. Under the heading "Interconnection of Customer-Provided Terminal Equipment," Judge Greene reviewed the government's evidence regarding the PCA requirement: **[**47]**

> The testimony and exhibits presented in support of the government's contentions in these episodes tended to show that the PCA requirement was unnecessary; that the PCAs imposed by Bell were overly engineered and that their cost, when added to that of the terminal equipment itself, either foreclosed non-Bell manufacturers from the particular equipment market or made it difficult for them to compete with Western Electric; that PCAs were often unavailable, that their delivery was sometimes substantially delayed, or that they were incompatible with non-Bell equipment; and that the stated need for the PCA and the defects of some PCAs caused customers to fear that, unlike Western Electric products, non-Bell equipment was unsafe and unreliable.
> The eleventh episode is the "umbrella" package, concerning more generally Bell practices and policies with regard to the interconnection of customer-provided terminal equipment. The evidence presented in conjunction with this episode tended to show the following.
>
> As of 1968, the time of the Carterfone decision, defendants had considered at least two options to protect the network **[*570]** from harm by customer-provided equipment: **[**48]** the PCA requirement and a certification program. A certification program -- that is, a means by which non-Bell equipment would be permitted to be connected to the network after it had been certified to meet certain technical standards -- would have obviated the need for the PCAs, with their costs, problems, and drawbacks, and it would thus have been consistent with the FCC's Carterfone mandate to liberalize interconnection policy. Nevertheless, defendants decided to implement a PCA tariff rather than the certification option.
>
> The government's evidence further tended to show that, during the five-year period after 1968, defendants concluded that the implementation of some kind of certification program was feasible, but they nevertheless decided to oppose any liberalization of their interconnection policy (whether by certification or otherwise) out of concern over the effect on their revenues and market position. Defendants were at that time all aware of (and they encouraged) the barrier to competition created by the unavailability and inadequate maintenance of the PCAs as well as of the additional economic barrier these devices created because of their added cost. The government's **[**49]** proof further indicated that defendants were unable ever to find empirical support for the proposition that the PCA policy was necessary to prevent actual harm to the telecommunications network.
> Finally, the evidence showed that, at approximately the same time that the FCC initiated its own certification docket on June 14, 1972, Bell decided to continue to withhold support from any effort to establish a certification program in order to "buy time" for internal restructuring so as to enable it to prosper in a competitive market.

United States v. AT & T, supra, 524 F. Supp. at 1349-50. The court concluded that "by and large, the evidence addressed sustained the government's charges." *Id. at 1350-51*.

Thus, the factual findings of Judge Greene are not inconsistent with *Litton* on the claims of "anticompetitive or predatory conduct" and many other of the *Litton* findings for which Glictronix seeks collateral estoppel here.

However, Judge Greene went on to consider the legal question of whether AT & T's opposition to certification fell within the protection of ***HN12***[] the *Noerr-Pennington* doctrine. The doctrine holds that "the Sherman Act . . . does not apply to **[**50]** . . . activities comprising mere solicitation of governmental action with respect to the passage and enforcement of laws . . . ." *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 138, 81 S. Ct. 523, 530, 5 L. Ed. 2d 464 (1961)*. "*Noerr* shields from the Sherman Act a concerted effort to influence public officials regardless of intent or purpose . . . Joint efforts to influence public officials do not violate the antitrust laws even though intended to eliminate competition". *United Mine Workers v. Pennington, 381 U.S. 657, 670, 85 S. Ct. 1585, 1593, 14 L. Ed. 2d 626 (1965)*. The *Noerr-Pennington* doctrine applies to administrative proceedings. *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 510-11, 92 S. Ct. 609, 611-12, 30 L. Ed. 2d 642 (1972)*.

Although his factual findings were consistent with the conclusion that AT & T opposed certification in bad faith, Judge Greene held that AT & T's opposition to certification in proceedings before the FCC constituted "petitioning" activities which were entitled to *Noerr-Pennington* protection. *United States v. AT & T, supra, 524 F. Supp. at 1350 n. 54* ("since this proof **[**51]** [of AT & T's opposition to certification] directly concerns the positions taken by defendants before the FCC, the court may not rely on it as a basis for antitrust liability.") and at 1363 and n. 110.

This legal conclusion conflicts with the holding of the *Litton* court that the opposition to certification was not petitioning activity and did not fall within the *Noerr-Pennington* doctrine. *Litton, supra, 700 F.2d at 809*. Both Judge Greene **[*571]** and the *Litton* court agreed that AT & T's filing of the PCA tariff constituted a private commercial action, and not advocacy before the FCC which would warrant *Noerr-Pennington* protection. *Litton, supra, 700 F.2d at 807* and n. 32; *United States v. AT & T, supra, 524 F. Supp. at 1350* & n. 47. [6] However, unlike Judge Greene, the *Litton* court held that opposition to certification, like the filing of the tariff, was not entitled to *Noerr-Pennington* protection. The court rejected AT & T's argument that its opposition "amounted to no more than espousing a position before an administrative body." *Litton, supra, 700 F.2d at 809*. Its reasoning appears to have been that the opposition was merely a bad faith **[**52]** effort to maintain the tariff and was therefore not entitled to any more protection than was the act of filing the tariff. The court stated:

> Much of our analysis relating to the filing of the interface tariff applies to AT & T's opposition to certification. Opposition to certification is simply the other side of the interface tariff coin; AT & T's filing and maintenance of the PCA requirement was the very embodiment of opposition to the only feasible alternative -- certification standards.

Litton, supra, 700 F.2d at 809.

Glictronix seeks a ruling, based on *Litton*, that the defense of the *Noerr-Pennington* doctrine is inapplicable to the anticompetitive or predatory conduct alleged in this case. Regarding the applicability of *Noerr-Pennington* to the opposition **[**53]** to certification, Judge Greene's opinion constitutes a judgment inconsistent with the *Litton* judgment. Collateral estoppel cannot be applied to foreclose the question of whether the opposition to certification may be entitled to *Noerr-Pennington* protection.

A second reason exists for this conclusion. ***HN13***[] As a general matter, collateral estoppel may apply to questions of law. 1B J. Moore para. 0.448 at 840. However, this rule is subject to broad qualifications. *Restatement (second) of Judgments § 29(7)* states that the offensive use of collateral estoppel is inappropriate where "the issue is one of law and treating it as conclusively determined would inappropriately foreclose opportunity for obtaining reconsideration of the legal rule on which it was based." Elaborating on this provision, *Comment i to § 29*(7) states, "this consideration is especially pertinent when there is a difference in the forums in which the two actions are to be determined. . . ."

[6] It is therefore clear that nothing in Judge Greene's opinion is inconsistent with *Litton's* findings that AT & T filed the PCA tariff in bad faith and that the *Noerr-Pennington* doctrine does not protect this conduct.

There is considerable question whether the *Litton* court's ruling that the opposition to certification is not entitled to *Noerr-Pennington* protection is correct. Judge Greene's opinion conflicts directly with the *Litton* **[**54]** court on this point. Numerous other cases also suggest that many courts would consider opposition to certification to be a protected effort to influence government action. *See e.g., Mid-Texas Communications Systems, Inc., v. American Tel & Tel. Co., 615 F.2d 1372, 1384 and n. 10 (5th Cir.), cert. denied, 449 U.S. 912, 101 S. Ct. 286, 66 L. Ed. 2d 140 (1980)*. In *Phonetele, Inc. v. AT & T, supra*, slip op. at 10, on precisely the question at issue here, the court stated:

> Because this Court entertains doubt about the correctness of the *Litton Systems* decision on the applicability of the [*Noerr-Pennington*] doctrine to the opposition to certification, *see, Clipper Exxpress v. Rocky Mountain Motor Tariff Bureau, 674 F.2d 1252, 1262-63 (9th Cir.1982)*, the Court declines to apply issue preclusion with respect to that point.

The effect of applying the Second Circuit's ruling in *Litton* that the opposition to certification is not entitled to *Noerr-Pennington* protection would be to foreclose the Third Circuit from independently considering this legal question. In view of the fact that the *Litton* court's holding appears to be at odds with the positions **[**55]** of other circuits, it would be inappropriate to **[*572]** bind this court to the *Litton* court's holding. Restatement (second) judgments *§ 29(7)* and comments: *Phonetele, Inc. v. AT & T, supra*.

After determining that AT & T's opposition to certification fell within the *Noerr-Pennington* doctrine, Judge Greene addressed the question of whether that conduct might still be a basis of for antitrust liability under the "sham" exception to the *Noerr-Pennington* doctrine. ***HN14***[] Under the "sham" exception, petitioning activities which would normally be protected can be the basis for liability when:

> The defendant's activity was intended to injure the plaintiff directly rather than through a government decision. When the antitrust defendant had not truly sought to influence the governmental decision, his invocation of governmental machinery is a sham . . . . Where he had no reasonable expectation of obtaining the favorable ruling, his effort to do so was a sham.

Litton, supra, 700 F.2d at 810, quoting P. Areeda, ***Antitrust Law*** para. 203.1a (Supp.1982).

As argued by Litton in its opposition to AT & T's petition for certiorari in the Supreme Court, Judge Greene's **[**56]** formulation of the standards for the sham exception are consistent with those of the *Litton* court. As part of his discussion, Judge Greene noted that ***HN15***[] "the sham exception is not satisfied by a mere showing of anticompetitive intent . . .; there must be proof that those being charged subverted the integrity of the governmental process . . ." or that "the relevant activities were intended not to secure governmental action but to harm others through deliberate abuse of the governmental process." *United States v. AT & T, supra, 524 F. Supp. at 1362*.

Having agreed on the standards, Judge Greene and the *Litton* court reached conflicting conclusions as to whether AT & T's opposition to certification fit the sham exception. Viewing the evidence in the light most favorable to Litton, as it was obliged to do in reviewing the jury's verdict, the *Litton* court determined that the sham exception applied to AT & T's conduct, which it said "was not undertaken in the hope of influencing governmental action, but in the hope of delaying it." *Litton, supra, 700 F.2d at 812*. The court based its decision or its belief that:

> AT & T had no realistic hope that the FCC would approve **[**57]** the interface device; its own people thought that the device was a redundant "artificial barrier" to competition. It nevertheless consciously pursued a policy of delaying the time when the FCC would strike down the PCA requirement. It implemented this policy by making baseless claims relative to potential harms to the network while opposing certification standards in every way possible.

Id. at 811.

Judge Greene did not specifically address the application of the sham exception to AT & T's opposition to certification before the FCC. But with only a single exception, irrelevant to this case, he generally determined that "the evidence shows little more than that Bell opposed new cutouts, that it made contentions which were not wholly correct, and that the FCC ultimately ruled against Bell." United States v. AT & T, supra, 524 F. Supp. at 1361-64. He held that such conduct did not fit the sham exception and ordered the government's contentions regarding AT & T's representations to the FCC be stricken. Id. at 1363-64, 1381.

The two opinions appear to be in direct conflict. While both seem to agree that AT & T acted with at least some degree of bad faith, Judge Greene **[**58]** concluded that AT & T's conduct did not amount to a subversion of the administrative process, while the *Litton* court concluded that it did.

Glictronix argues that the two decisions are not inconsistent, but merely reflect rulings based on differing factual records. It is true that the two courts agreed on the applicable legal standard and on many of **[*573]** their factual findings. Glictronix suggests that if Judge Greene had had before him the full body of evidence on which the *Litton* jury relied, he too would have found AT & T's petitioning activities a sham. To this effect, Glictronix cites Litton's opposition to AT & T's petition for certiorari to the Supreme Court, which lists the *Litton* witnesses who did not testify in the government's case. (Plaintiffs' Reply Brief on Partial Summary Judgment, Ex. B p. 27 n. 18)

However, Glictronix offers no explanation of what facts emerged in the *Litton* litigation that were unavailable to Judge Greene. As noted earlier, Judge Greene ordered the discovery in *Litton* be made available to the government. His discussion of the evidence demonstrates that he had much of the same evidence before him as did the *Litton* court. **[**59]** United States v. AT & T, supra, 524 F. Supp. at 1348-50. Glictronix has not shown that Judge Greene had an incomplete record before him. *Compare* Carr v. District of Columbia, 207 U.S. App. D.C. 264, 646 F.2d 599, 606 (D.C.Cir.1980).

In considering the same issue, the *Selectron* court held that Judge Greene's ruling was based on an incomplete record. Selectron v. AT & T, 587 F. Supp. 856, 866 (D.Ore.1984). The sole example of evidence missing from the record before Judge Greene cited by the *Selectron* court was "testimony of the Chairman of the PBX Advisory Committee indicating intentional delay in the development of a certification program." *Id*. at n. 21. The opinion contains no elaboration of what this testimony was. I do not find the absence of this evidence alone to be significant enough to permit a conclusion that the judgments in the government's case and in *Litton* are not inconsistent.

Glictronix has not submitted any concrete explanation for the differing outcomes which would justify the conclusion that the two opinions are not inconsistent. In the absence of an adequate explanation, I cannot apply the *Litton* court's ruling that AT & T's opposition **[**60]** to certification before the FCC is not entitled to *Noerr-Pennington* protection under the sham exception.

Judge Greene and the Litton court agreed on many more questions of fact than they disagreed on. But on the crucial question of whether AT & T's representations to the FCC amounted to a subversion of the administrative process, they differed.

Similarly, I must reject the *Selectron* court's conclusion, urged by Glictronix here, that Judge Greene's opinion does not constitute a "final judgment" for collateral estoppel purposes. In ordering the government's contentions regarding AT & T's petitioning activities be stricken, Judge Greene granted a part of AT & T's motion to dismiss. Numerous ***HN16***[] courts give collateral estoppel effect to such partial grants of motions to dismiss or for summary judgment. See 1B of Moore para. 0.441[4] at 744-47; Restatement (second) of Judgments § 13.

In concluding that Judge Greene's ruling was not a final judgment, the *Selectron* court notes that the filing was made on a mid-trial motion to dismiss under Fed.R.Civ.P. 41(b). Judge Greene stated in his opinion that:

> The decision on the motion to dismiss is a "tentative and inconclusive **[**61]** ruling on the quontium of plaintiff's proof," which does not preclude a court from making finding and conclusions at the close of the case that are inconsistent with its prior tentative ruling.

United States v. AT & T, 524 F. Supp. at 1343. Since Judge Greene himself characterized his decision as tentative, the *Selectron* court reasons, it cannot be considered a final judgment.

HN17[] Whether a judgment should be considered final for the purposes of collateral estoppel "turns upon such factors as the nature of the decision (i.e., that it was not avowedly tentative), the adequacy of the hearing, and the opportunity for review." *Lummus Co. v. Commonwealth Refining Co., 297 F.2d 80, 89 (2d Cir.1961)*, *cert. denied*, *368 U.S. 986, 82 S. Ct. 601, 7 L. Ed. 2d 524 (1962)*; *Aiello v. City of Wilmington, 470 F. Supp. 414, 419 (D.Del.1979)* (*quoting Lummus*).

[*574] Notwithstanding his prefatory comments, Judge Greene's decision clearly appears to dispose of the government's contentions regarding AT & T petitioning activities. There is no doubt that the hearing was adequate, and the judge rendered a lengthy opinion which addressed the issue. More importantly, the judge **[**62]** in fact reached definite rather than tentative conclusions. He did not merely suggest tentatively that the government's contentions regarding AT & T's representations before the FCC would not prevail; he struck those contentions. *United States v. AT & T, supra, 524 F. Supp. at 1381*.

If Judge Greene's opinion was in any sense tentative, it was regarding rulings adverse to AT & T. The government had already put on its case, and Judge Greene was in a position to make a final ruling that the government had failed to make its case on the issue of AT & T's opposition to certification. The *Noerr-Pennington* rulings in *United States v. AT & T* are final judgments for the purpose of collateral estoppel. They therefore constitute cognizable inconsistent judgments preventing the application of collateral estoppel to the *Litton* holdings regarding the *Noerr-Pennington* protection owed to AT & T's petitioning activities.

2. Full and Fair Opportunity to Litigate.

HN18[] Offensive collateral estoppel will not be applied "where the second action affords the defendant procedural opportunities unavailable in the first action that could readily cause a different result." *Parklane Hosiery* ***[**63]*** *Co. v. Shore, 439 U.S. 322, 330-31, 99 S. Ct. 645, 651-52, 58 L. Ed. 2d 552 (1979)*, stated generally, collateral estoppel cannot apply against a party who in the earlier case did not have a full and fair opportunity to litigate the issue to be precluded. *Id. at 332-33, 99 S. Ct. at 652-53*; *Allen v. McCurry, 449 U.S. 90, 95, 101 S. Ct. 411, 415, 66 L. Ed. 2d 308 (1980)*.

AT & T offers several reasons for its contention that it did not have a fair opportunity to litigate the PCA/certification issues in Litton.

First, AT & T contends the trial court in *Litton* excluded critical evidence offered by AT & T concerning the reasonableness of its conduct. Specifically, AT & T alleges that the trial court wrongly excluded a 1969 New York Public Service Commission decision holding that "retention of control by the telephone company of network control signaling . . . is absolutely necessary to insure reliable service to the public." *Re New York Telephone Co*., 79 P.U.R.3d 410, 417 (1969). Although AT & T implies that evidence of a number of state regulatory agencies' policies was excluded, AT & T only attempted to introduce evidence of this one decision. (Plaintiffs' response **[**64]** to and analysis of Defendants' Documentary Submission, p. 15).

The trial judge excluded this decision on the ground that its likelihood of misleading the jury outweighed its probative value (Plaintiff's Response to and Analysis of Defendant's Documentary Submission, Ex. C, Tr. 11397). At issue before the New York Commission was a tariff requiring a $20 installation of a "voice coupler" carrying a 50 cents monthly fee. The judge determined that the tariff was too dissimilar to the PCA tariff, which carried a monthly charge of at least $6.50, to be probative of the issues in the case. In reviewing this evidentiary ruling, the Second Circuit concluded that the New York Commission's decision was "arguably probative of AT & T's position" and found it "difficult to justify the exclusion of this decision in the light of the admission" of the various FCC rulings. *Litton, supra, 700 F.2d at 819*. The court stated that the difference in costs between the two tariffs went more to the question of the weight to be given the evidence, rather than to its admissibility. However, recognizing the complicated and extensive nature of the trial and the trial court's need to limit the evidence at some **[**65]** point, the Court found that the exclusion of the decision did not amount to prejudicial error. *Id*.

[*575] AT & T argues that because this allegedly "crucial" evidence was excluded, the *Litton* judgment should not be given preclusive effect. AT & T implicitly argues that the excluded evidence should be treated as would newly discovered evidence. At least according to one view, "newly discovered evidence, even if insufficient to justify setting aside a judgment, may warrant refusal to give the [prior] judgment preclusive effect in other actions." See *Carr v. District of Columbia, 207 U.S. App. D.C. 264, 646 F.2d 599, 606 n. 35*; *Restatement (second) Judgments § 29 Comment j* (1980). Assuming that this view is correct and that it applies to wrongly excluded evidence, AT & T argues that the Second Circuit's refusal to set aside the judgment despite the trial court's incorrect evidentiary ruling should not prevent this court from refusing to give the *Litton* judgment preclusive effect.

In *Blonder-Tongue Labs. v. University Foundation, 402 U.S. 313, 333, 91 S. Ct. 1434, 1445, 28 L. Ed. 2d 788 (1971)*, the Supreme Court stated that ***HN19***[] the question of whether a party, **[**66]** without fault of his own, "was deprived of crucial evidence or witnesses in the first litigation" was relevant to a determination of whether that party had had a full and fair opportunity to litigate. The Court went on to say that:

> No one set of facts, no one collection of words or phrases will provide an automatic formula for proper rulings on estoppel pleas. In the end, decision will necessarily rest on the trial courts' sense of justice and equity.

Id. at 333-34, 91 S. Ct. at 1445.

Assuming *arguendo* that the showing a party must make to avoid collateral estoppel is less than that required to obtain a new trial because of newly discovered evidence, the district court in *Faucett* held that the party "must nevertheless proffer evidence which is not only relevant to the issues as to which they seek to avoid preclusion, but is also more than conjecturally likely to make a difference in the outcome." *Faucett, supra, 566 F. Supp. at 300*. The Court of Appeals disagreed, holding that:

> We are persuaded by AT & T's argument that the existence of this acknowledged error in the presentation of the case to the *Litton* jury is a serious obstacle to the **[**67]** plaintiff's use of offensive estoppel on the issue of AT & T's liability. While, standing by itself, such error might not tip the scale against such estoppel, when added to the other factors discussed below, the application of offensive estoppel in this case would be unfair.

At 128. The reasoning of the Court of Appeals in *Faucett* is persuasive and I will adopt it on this aspect of the collateral estoppel question.

AT & T's second argument concerning a full and fair opportunity, is that it has newly discovered evidence which will demonstrate that its conduct was reasonable. In support of this proposition, AT & T submitted 11 volumes of documents which it claims establish:

(1) that the post-Carterfone tariffs were filed in 1968 in good faith pursuant to a decision made by H. I. Romnes, then Chairman of the Board of AT & T;

(2) that John deButts' decision in 1973 to oppose certification was not made for the purpose of delay but, instead, was based upon Mr. deButts' good faith belief that certification would result in technical harm to the public switched network, and, even more importantly, would have adverse economic consequences upon ordinary users of the telephone in **[**68]** the form of higher telephone rates, thus threatening the principle of universal service;

(3) that AT & T's opposition to certification did not in fact delay the Commission's proceedings in the Registration docket;

(4) that any delay in that docket resulted from the strong political opposition to certification generated by state regulatory commissioners who took the same position as Mr. deButts with respect to the adverse economic consequences of certification;

(5) that the Commission ultimately adopted a certification program for PBXs and key telephone systems only because it believed, first, that there would be no substantial **[*576]** adverse economic impact from certification, and second, that if some such impact did occur, the feared effect upon the ordinary telephone user could be avoided through changes in the separations formula;

(6) that the decisions of the Commission, which reflected Commission adoption -- virtually without change -- of the recommendations made by its staff under the supervision of the newly-appointed Chief of the Common Carrier Bureau, distorted many of these facts and contained language deliberately inserted to create a basis for antitrust litigation **[**69]** against AT & T; and

(7) that events subsequent to the completion of the *Litton* trial demonstrate that the FCC was wrong and, hence, that the state regulatory commissioners and Mr. deButts were right on the critical economic issues surrounding certification.

Glictronix convincingly argues that most of the documents AT & T has submitted are either not newly discovered, would be inadmissible, refer only to collateral issues or are cumulative of evidence which was admitted. (See Plaintiff's Response to Defendants' Documentary Submission).

In its document-by-document response, Glictronix establishes that most of this "newly discovered evidence" was available to AT & T at the *Litton* trial, but that AT & T simply decided as a matter of trial strategy not to use it. Since the absence of this evidence in *Litton* was AT & T's own fault, it cannot claim unfairness here. *Blonder-Tongue, supra, 402 U.S. at 333, 91 S. Ct. at 1445*.

AT & T has submitted here the testimony of various individual FCC officials. AT & T could have offered their testimony in *Litton* and did not. Moreover, testimony giving a personal interpretation of the meaning of FCC decisions probably would be **[**70]** inadmissible. *United States v. AT & T, 524 F. Supp. 1381, 1387 (D.D.C.1981)*.

Several documents were apparently newly discovered by AT & T. One was a "Report to the Chairman of Critical Projects," which AT & T claims establishes that AT & T caused no delay in the adoption of a registration program. (defendants' Vol. Xc. Tab 9 and Summary of Documentary Submission, p. 68.) Suffice it to say, the documents do not in any way establish that AT & T was not responsible for at least some delay in the changeover from the blanket PCA requirement to certification standards. (See *Id*. at pp 7 and 9 and Plaintiffs' Response to and Analysis of Defendants' Documentary Submission, p. 36-37).

Much of the allegedly new evidence involves Walter Hinchman, who became chief of the FCC's Common Carrier Bureau in 1974. Hinchman testified in *Southern Pacific Comm. Co. v. American Tel. & Tel. Co*., ("SPCC"), *556 F. Supp. 825 (D.D.C.1983)*, on issues other than those involved in this case. In that case, Judge Richey stated:

> The inference is justified that under the direction of Mr. Hinchman, whom the Court found to be lacking in candor and trustworthiness, the staff launched into a program **[**71]** to protect the specialized carriers from competition from AT & T and to create FCC findings that could be utilized as predicates in antitrust actions against the Bell System.

SPCC, supra, 556 F. Supp. at 1056-57.

The FCC rulings that the interface tariff was "unnecessarily restrictive" and an "unjust and unreasonable discrimination" were written by Mr. Hinchman or his staff. (Defendants' Documentary Submission, p. 59-60). The *Litton* court stated unequivocally that these FCC "decisions were central both to Litton's claim that the PCA device was unnecessary and Litton's rebuttal of AT & T's defense that the interface tariff was an attempt to comply with previous FCC rulings." *Litton, supra, 700 F.2d at 818*. AT & T argues that *Litton* should not be collaterally applied because of this newly found evidence that the FCC decisions on which the jury relied may be untrustworthy.

Glictronix responds that Hinchman himself did not testify on the reasonableness of the PCA tariff in *Litton*, and that Hinchman's **[*577]** trustworthiness is irrelevant to whether *Litton* should be collaterally applied. These arguments miss the point. The issue is the trustworthiness **[**72]** of the FCC decisions he and his staff authored. More relevant is Glictronix's argument that Judge Richey's assessment of the trustworthiness of FCC findings in the context of the *SPCC* suit has little bearing on the trustworthiness of the FCC decisions regarding the PCA tariff. Moreover, Glictronix argues that the substantive conclusions of *SPCC* are cast in doubt by the contrary holding in *MCI v. American Tel. & Tel. Co., 708 F.2d 1081 (7th Cir.1983)*.

SPCC involved different but related issues dealing with AT & T's interconnection policies. Although *SPCC* dealt with AT & T's so-called "telpole" tariff, Judge Richey noted that Hinchman testified that his staff wrote all of the FCC decisions relating to telecommunications from 1974 to 1978. Hinchman recalled no changes being made by the Commissioners to staff recommendations, and was himself "totally unfamiliar with the basis for any of the decisions for which he was responsible and did not even understand the concepts involved." *SPCC, supra, 556 F. Supp. at 1055*. It is clear that Judge Richey doubted the trustworthiness of all the decisions rendered under Hinchman, not just those specifically at issue in *SPCC* **[**73]** .

Taking into account the concrete basis for Judge Richey's skepticism -- Hinchman's own testimony -- and the acknowledged importance of the FCC decisions to the *Litton* verdict, I think this new evidence should preclude collateral estoppel effect to the *Litton* findings on the reasonableness of AT & T's PCA/certification policies.

3. Unfairness to AT & T: The Question of Underlying Confidence in the *Litton* Judgment.

AT & T's final argument is that it would be unfair to preclude AT & T from relitigating the *Litton* findings because "underlying confidence" in the *Litton* judgment is lacking. Central to AT & T's opposition to the partial summary judgment motion is its position that the *Litton* judgment was based on a demonstrably false premise. That premise was that after *Carterfone* AT & T knew that the FCC's basic position was that AT & T could not exclude customer-provided terminal equipment absent a showing of actual harm and that "neither filing of the interface tariff nor opposition to certification squared with the FCC's mandate in *Carterfone." Litton, supra, 700 F.2d at 810*. According to AT & T, the *Litton* court's affirmance of the jury finding **[**74]** that AT & T acted in bad faith to monopolize the PBX and key system market by filing the PCA tariff and by opposing certification was based on this allegedly false premise.

The *Litton* court relied on a number of AT & T internal documents to support this premise that AT & T adopted the PCA tariff and opposed certification in bad faith. *Litton, supra, 700 F.2d at 791 n. 2, 798-801, 810-11*. Among these internal documents were statements of AT & T officials to the effect that AT & T had been unable to produce any evidence that interconnection of non-AT & T equipment harmed the network. An in-house report prepared in 1971 by David Beyers, one of AT & T's two representatives to the FCC's PBX Advisory Committee, wrote:

> A Credibility Gap Exists -- Limited interconnection on the message network and greater interconnection on private line facilities has been in existence for a long period of time and the carriers still find it virtually impossible to cite cases of harm . . . result[ing] from . . . interconnect[ion] . . . . This inability to demonstrate cases of harm . . . is causing the manufacturers . . . users and regulatory bodies to . . . challenge the expansive efforts **[**75]** which [AT & T] insists must be taken to avoid the network pollution.

(*quoted in Litton, supra, 700 F.2d at 799*.)

In August, 1972, H. H. Boettinger, director of AT & T's Management Sciences Division reported:

> Here is our weakest position now, because even though everyone concedes **[*578]** that serious breaches of our tariffs by illegal or unauthorized equipment has grown over the years, we have not been able to produce evidence of harm to anyone. (I understand that our people on the PBX Certification Committee have been unable to respond with any forceful data when asked for proof of our allegations of potential harm.)

Plaintiff's Ex. 58, A-455 at 460 to 461. The report recommended that the PCA requirement be rescinded. *See Litton, supra, 700 F.2d at 799*. AT & T's only evidence of potential harm was derived from studies, referred to as the "Hunt Studies", which various AT & T officials conceded did not prove anything. *See Litton, supra, 700 F.2d at 799*.

According to evidence submitted in *Litton*, AT & T knew that the PCA device was unnecessary and duplicative of components in the competitors' equipment, but it enforced the PCA requirement **[**76]** so as to hamper competition and delay the inevitable advent of a certification system until AT & T had developed products which could compete effectively in the terminal equipment market.

In 1967, AT & T organized a group of senior executives of AT & T and Bell subsidiaries and affiliates, called the Tariff Review Group, which was charged with the responsibility of formulating a policy in response to the expected ruling in *Carterfone*. In February, 1968, a Special Task Force to the Review Group issued one of its reports. (Appendix to Plaintiff's Class Certification Brief, Exhibit 55.) The Task Force first summarized its conclusion that:

> Any attempt to propose the use of an interface requirement . . . can be interpreted merely as a shifting of our present-day restrictions on customer-owned devices to similar restrictions through the provision of an arbitrary and redundant Telephone Company device that duplicates the customer's equipment.

Id. at 423. Expanding on this conclusion, the report states:
