> An attempt to design an interface, or a family of interfaces, sufficient to minimize all adverse effects of customer-provided equipment poses an economic **[**77]** and administrative problem . . . . Such an interface device would be priced at a level of at least what our existing equipment offering is now. This would, of course, result in what effectively might be considered to be an unjustified economic restriction in allowing customer to provide his own device. And the provision of an interface does not, in itself, necessarily provide the full protection we desire . . . .

Id. at 423-24. The report explicitly rejected the PCA requirement and endorsed technical certification standards, stating that the PCA requirement "would erect a redundant, artificial and economic barrier to those wishing to purchase their own equipment." *Id*. at 425.

According to the Litton plaintiffs and Glictronix, AT & T persisted in advocating the PCA requirement and opposing certification because it was aware it could not compete effectively in the terminal equipment market and needed to buy time to develop competitive equipment. The First Task Force Report concluded that AT & T would lose a considerable share of the terminal equipment market if the PCA tariff was struck down, and stated, "if we cannot compete with outside manufacturers of terminal equipment, **[**78]** we may be forced to drop out of the market." (Appendix to Plaintiff's Class Certification Brief, Ex. 11, 54-A-388 to A-397).

Despite AT & T's persistence in claiming that the PCA was necessary to protect the telephone network from harm, it has never offered any proof that competitors' equipment was inferior to AT & T provided equipment. *Id*. at Ex. 59, A-464. Indeed, its own records reveal a knowledge and fear that its product offerings lagged significantly behind in terms of quality and features. *Id*. at Ex. 67, A-505.

At the trial of *Litton, supra*, a former AT & T executive testified that the PCA requirement was "predicated upon the assumed **[*579]** inferiority of the competitors' equipment," an assumption "we knew to be false." *Id*. at Ex. 60, A-469. In 1972, an AT & T executive stated that he had recently seen many competitive PBX and key systems "clearly in the same league -- in terms of features, price and quality -- with the best BTL ([Bell Labs] designs." *Id*. at Ex. 61, A-471. In February 1972, Bell Labs Quality Assurance Division found that competitive PBX systems had lower trouble rates than Bell PBX systems. Id. at Ex. 61, A-474 at 480.

It has been **[**79]** admitted by AT & T's own high level executives that in the early 1970's, with the advent of competition, customers began asking AT & T for newer and better equipment with more features and flexibility, equipment that AT & T knew it did not offer. *Id*. at Ex. 63, A-489; Ex. 64, A-492; Ex. 65, A-493; Ex. 66, A-504. AT & T's marketing studies recognized that its weaknesses in furnishing competitive features handicapped its sales efforts. *Id*. at Ex. 67, A-505; Ex. 68, A-511 at 518 and 539. In a 1971 status report to Bell Labs management on product development, J. W. Schaefer, the Bell Labs Executive Director in charge of PBX Development, admitted that Bell had "neglected PBX development" and that its PBX systems were antiquated. Id. at Ex. 69, A-599 at A-600.

The *Litton* plaintiffs contended that this need to delay the allegedly inevitable abolition of the PCA tariff in favor of certification standards was AT & T's motive for its conduct. There was evidence at the *Litton* trial that AT & T

> "did not complete some of its 'homework assignments' on time" in connection with the PBX Advisory Committee's efforts to develop certification standards. AT & T Brief at 20. And, **[**80]** although AT & T had decided in March 1 of 1973 that it would oppose certification standards, it continued to work with the Advisory

> Committee in accordance with an internal "Tactics Memorandum" which concluded that withdrawing from the committee would accelerate "decisions in favor of certification." This evidence is sufficient to support an inference that AT & T did what it could to delay and obfuscate the efforts undertaken by the FCC and other interested parties to develop certification standards.

Litton, supra, 700 F.2d at 811.

AT & T's argument that the premise of the *Litton* judgment was false is based on a number of documents. First, AT & T relies on the opinions of several state regulatory agencies, which, until 1974, shared jurisdiction with the FCC over interconnection matters. *See* *Telerent Leasing Corp., 45 F.C.C.2d 204 (1974)*. According to AT & T, the first such state agency to review the PCA requirement in a formal opinion was the New York Public Service Commission, which found in July, 1969, that a PCA for customer-provided equipment was necessary to protect the network. *New York Tel. Co.*, 79 P.U.R.3d 410, 417 (N.Y.Pub.Serv.Comm'n, 1969) (Defendants' **[**81]** Documentary Submission, Vol. VI, Tab. 1). As is discussed elsewhere, this decision, the only such decision AT & T even offered into evidence in *Litton*, dealt with a PCA for a different type of device at very different costs. While the *Litton* court found that the excluded evidence of this ruling should have been admitted, it found that the exclusion was not prejudicial error.

Second, AT & T argues that the FCC itself considered the PCA requirement and found it reasonable. According to AT & T, the FCC explicitly stated on at least five occasions that the PCA requirement in the post-Carterfone tariffs did not violate the FCC's policy enunciated in *Carterfone*. (See Defendants' Collateral Estoppel Brief, at 57.)

The first of these cited rulings dealt with the contention that the *Carterfone* ruling not only invalidated the complete ban on the use of customer-provided terminal equipment, but also invalidated the barring of "any customer-provided network control signaling units irrespective of whether they were harmful or harmless" to the network. *AT & T "Foreign Attachment"* *Tariff Revisions, 15 F.C.C.2d 605, 609 (1968)*. The **[*580]** F.C.C. stated that this contention **[**82]** was based on a "misconstruction of *Carterfone*, and clarified that *Carterfone* had not addressed equipment providing network control signaling functions. (*Id*. at 609-10). [7] The Commission refused to strike down AT & T tariffs banning such customer-supplied equipment.

However, the ruling also made clear that while *Carterfone* did not invalidate a blanket ban on such equipment, it did not approve such a ban. The FCC stated:

> Although the tariff bar against any customer providing his own network control signaling unit is not in conflict with our Carterfone ruling, the question remains as to whether the telephone companies should make provision in their tariffs by which subscribers may have access to the so-called switched telephone network through the **[**83]** use of their own provided network control signaling equipment. On the basis of the pleadings and comments before us, we are in no position to determine the extent to which any such provision may be consistent with efficient and economic telephone service and otherwise in the public interest. In our opinion, these and other matters warrant further consideration by the Commission before it determines whether and what further action, if any, may be required.

AT & T "Foreign Attachment" *Tariff Provisions, supra, 15 F.C.C.2d at 610*. Consistent with this wholly noncommittal approach, the FCC concluded its ruling by warning, "our action is not to be construed as approval [of the PCA tariff] and these tariffs are subject to such further actions as the Commission may wish to take with respect thereto." (*Id*. at 611).

In *AT & T "Foreign Attachment"* *Tariff Revision, 18 F.C.C.2d 871 (1969)*, the FCC reiterated its conclusion that *Carterfone* had neither disapproved nor approved AT & T's ban on signaling equipment irrespective of the question of harm. The Commission stated that there was nothing in the memorandum opinion of December 29, 1968 (*15*

---

[7] This distinction is apparently the distinction drawn elsewhere between equipment which is connected to the network and equipment which is substituted for part of the network. See *Mebane Home Telephone Co., 53 F.C.C.2d 473, 477 (1975)*.

F.C.C.2d 605) "from which **[**84]** it can reasonably be inferred that a final conclusion has been reached with respect to what portions of an interconnected communication system may be provided by customers". 189 F.C.C.2d at 874.

In *Interstate and Foreign MTS and WATS, 35 F.C.C.2d 539 (1972)*, the FCC gave notice of an inquiry to determine whether and under what conditions the telephone companies should provide new classes of interstate and foreign service "whereby customers would have the option of furnishing 'Network Control Signalling Units' (NCSU) and any needed 'Connecting Arrangements' (CA) (or the functional equivalent thereof) that are presently furnished only by the telephone company." *Id*. at 539. Specifically the FCC stated:

> Our proceeding herein is concerned with the pending and unresolved basic issues now before us as to whether and to what extent, there is public need for us to go beyond what we ordered in *Carterfone* and permit customers to provide in whole or in part the aforementioned NCSUs and CA's in interstate MTS and WATS and, if so, what terms and conditions should apply to protect the telephone system and services of others.

Id. at 542.

The FCC opinions in *Telerent **[**85]** Leasing Corp., 45 F.C.C.2d 204, 206 (1974)* and *Mebane Home Telephone Co., 53 F.C.C.2d 473, 476 (1975)* similarly indicated that the *Carterfone* ruling had not decided the question of whether and under what conditions customers could provide their own NCSUs.

However, in *Mebane*, the FCC took a position on whether AT & T would be permitted to absolutely ban customer-provided equipment, such as the PBX or key systems, which substituted for part of the network. After reviewing previous decisions, the FCC stated:

> **[*581]** The foregoing adequately demonstrates the broad principle underlying *Hush-A-Phone* and *Carterfone*, namely the subscriber's right to make beneficial use of an interconnected device without causing harm to the telephone company's operations. We see no reason why this broad principle should not extend to interconnected devices such as PBX's and key systems which may replace telephone system equipment. Clearly, the customer would obtain the requisite benefit from such interconnection. Thus, the only question remaining regarding the applicability of the broad principle underlying *Hush-A-Phone* and *Carterfone* to interconnected devices such **[**86]** as PBX's and key systems is whether such interconnection would be harmful to the telephone company's operations. Significantly, we have had substantial experience under the AT & T customer interconnection tariffs which do permit interconnection of customer devices such as PBX's and key systems. Indeed, PBX's and key systems constitute the heart of interconnection that now exists. Our experience indicates that not only have customers obtained substantial private benefit from such interconnection, but there has been no technical harm to telephone company operations. Nor has *Mebane* alleged any facts showing that interconnection of PBX's or key systems would be technically harmful. Moreover, as shown below, *Mebane* has made no prima facie showing warranting summary relief or hearing on economic injury grounds, although we have decided to afford it an opportunity to make such a showing in an evidentiary hearing on our own motion. Under the foregoing circumstances, we believe that here as in *Carterfone* it would be unjust, unreasonable to restrict the customer's right to use beneficial, interconnection devices that are not publicly detrimental, through a blanket prohibition against **[**87]** interconnection of devices that may involve some substitution of telephone company equipment. The determining factor should be whether there is harm to the telephone network, irrespective of whether the particular interconnection device is one of the nature involved in *Carterfone* or a PBX or key system. To make a distinction based solely on whether there is a substitution of telephone company equipment, would be an arbitrary and unreasonable infringement of the subscriber's right in the absence of technical harm or other public detriment. A subscriber has a statutory right under Section 201(b) not to be subjected to tariff restrictions which indiscriminately bar interconnection of customer-provided equipment without regard to harm. Moreover, as noted above, the option of the customer to interconnect his PBX or key system is a service that has been generally available to the public under the AT & T tariffs for several years.

AT & T also relies on the statements of various individual FCC officials, who believe that the *Litton* court mischaracterized the *Carterfone* ruling. (See memorandum of former FCC Commissioner Benjamin L. Hooks as Amicus Curiae in Litton, March **[**88]** 1, 1983, Defendants' Collateral Estoppel Brief, Appendix, Tab 4; Deposition of Bernard Strassburg, Chief of the FCC's Common Carrier Bureau from 1963 to 1973, pp. 74, 123, Defendants' Documentary Submission, Volume XA, Tab 1.) The FCC itself has filed an amicus brief in the *Faucett* case contending that the *Litton* conclusions were "demonstrably incorrect."

Glictronix correctly points out that the statements of individual FCC officials merely reflect personal views. Similarly, the FCC amicus brief is not a formal opinion of the FCC, but only an interpretation by current FCC counsel of post FCC rulings. Also the amicus brief contains no analysis supporting its conclusion.

It is clear from review of these rulings that the FCC did not believe that *Carterfone* specifically invalidated the PCA tariff. Nor do these rulings evince FCC approval or support for the tariff.

As in this case, AT & T attempted in *Litton* to counter the evidence of its bad faith by arguing that the FCC supported **[*582]** the imposition of the tariff. AT & T's implicit argument was -- and is -- that if a presumably impartial governmental body believed the requirement necessary, then AT & T could **[**89]** not have been acting in bad faith when it argued that the tariff was necessary. The *Litton* court specifically addressed this contention:

> AT & T claims that certain FCC proceedings occurring prior to the adoption of certification standard regulations had the effect of placing the FCC's imprimatur upon the PCA requirement. See *Telerent Leasing Corp., 4 F.C.C.2d 204 (1974)*, aff'd sub nom. *North Carolina Utilities Comm'n v. FCC, 537 F.2d 787 (4th Cir.)* *cert. denied*, *429 U.S. 1027, 97 S. Ct. 651, 50 L. Ed. 2d 631, 97 S. Ct. 652 (1976)*; *AT & T-Mebane Home Telephone Co., 53 F.C.C.2d 473 (1975)*. It is difficult to see how either of these decisions can be read to qualify the FCC's earlier, explicit statement that it was not approving the proposed tariffs, however. *Telerent* was a declaratory judgment order expressing the Commission's disapproval of a state utility commission's proposed rule that would absolutely prohibit the interconnection of customer-provided equipment on any intrastate portion of the telephone network. The Commission held that the proposed rule was contrary to the thrust of *Carterfone* and recently instituted proceedings considering the **[**90]** possibility of liberalizing the post-Carterfone tariffs. In *Mebane* a local telephone company sought exemption from so much of the post-Carterfone tariffs as allowed interconnection of customer-provided equipment. Although the Commission upon its own motion granted the local carrier an opportunity to demonstrate the need for a waiver from the tariffs on the basis of economic injury, it specifically ruled that, under *Carterfone*, customers must generally be allowed to provide their own equipment.

Litton, supra, 700 F.2d at 792 n. 12.

AT & T correctly argues that ***HN20***[] the doctrine of collateral estoppel is premised on an "underlying confidence in the correctness of the judgment relied on." *Standefer v. United States, 447 U.S. 10, 23 n. 18, 100 S. Ct. 1999, 2007 n. 18, 64 L. Ed. 2d 689 (1980)*; *Restatement (Second) of Judgments § 29, Comment f*. It contends that FCC rulings after *Carterfone* as well as various other evidence undercuts the *Litton* finding that after *Carterfone* AT & T knew that the PCA tariffs were inconsistent with the mandate of *Carterfone*.

In assessing this contention it is important to specify just what *Litton* held. The crucial passage **[**91]** states:

> The clarity of the Commission's language was such that from AT & T's perspective it had to be clear as a bell, so to speak, that at least as of the 1968 *Carterfone* decision, if not before, it was unreasonable, unjust, and discriminatory to prohibit interconnection of terminal equipment without respect to any harm such devices might cause.

Litton, supra, 700 F.2d at 794. The salient point of this passage is its focus on AT & T's state of mind as opposed to what position the FCC had taken. Through most of the relevant period after *Carterfone* and before the adoption of certification standards, the FCC took a hands-off position regarding the PCA tariff. It explicitly stated that it neither approved nor disapproved this tariff, which AT & T was imposing on its customers.

On several occasions, the FCC arguably went further, and suggested that the PCA tariff was consistent with *Carterfone*. But the importance of such statements must be entirely dependent on what information the FCC had at its disposal when making them. If it assumed, as AT & T continually claimed at the time, that uncontrolled interconnection posed grave dangers to the network, then **[**92]** it could have reasonably believed that the PCA requirement was consistent with *Carterfone*.

However, the *Litton* court found -- and no persuasive evidence has been submitted to controvert this finding -- that the jury could reasonably have concluded that the claim of potential harm to the system was baseless. Certainly, there could be no better **[*583]** evidence of the lack of actual harm than AT & T's own admission that despite thousands of unauthorized interconnections AT & T could document no harm to the network.

Had the FCC known what the *Litton* jury apparently believed -- that there was in fact no actual harm to the network from interconnection -- it might have concluded that the PCA tariffs violated *Carterfone*.

The post-Carterfone rulings only attacked the assertion that *Carterfone* prevented all prohibitions against customer-supplied terminal equipment regardless of whether they were harmful or harmless. They did not suggest that interconnection could be absolutely banned where there was no evidence of harm.

In *AT & T "Foreign Attachment"* *Tariff Revisions, 15 F.C.C.2d 605, 609 (1968)*, *recon. denied*, *18 F.C.C.2d 871 (1969)*, the FCC stated "we **[**93]** were concerned in [*Carterfone*] with the lawfulness of tariff provisions that prohibit a customer from making harmless interconnection of his terminals" with the network. Judging from this formulation of the meaning of *Carterfone*, it seems reasonable to assume that if the FCC had known at the time that the allegation of harm from interconnection was baseless, it would have held that the PCA tariff conflicted with *Carterfone*. Meanwhile, AT & T, which knew of the nonexistence of evidence of harm, did know that the PCA tariff was inconsistent with *Carterfone*. It was on AT & T's knowledge that its liability in *Litton* could reasonably have been based.

I would conclude that the *Litton* decision merits confidence for collateral estoppel purposes, but for the possible unreliability of the later FCC rulings promulgated under Walter Hinchman. I do not believe AT & T has shown that the *Litton* decision was based on a "false premise." But the possibility that Hinchman's rulings were written to set a predicate for antitrust liability and the fact that these rulings were relied on by the jury in reaching its verdict strongly suggests that *Litton* should not be given **[**94]** preclusive effect in this case.

E. *Miscellaneous Issues*

It is clear that application of collateral estoppel is inappropriate regarding some of the issues for which Glictronix requests it. These issues include the definition of the relevant product market and the findings that AT & T delayed the provision and installation of PCAs, refused to sell inside wiring at all or on a reasonable basis, and delayed making cutovers.

Litigation of the relevant market cannot be precluded because the parties in *Litton* stipulated to this issue rather than litigated it. See *Restatement (Second) of Judgments § 27 comment e*. In *Litton*, there were no findings as to whether AT & T delayed or refused services to Glictronix. Therefore, the litigation of AT & T's conduct toward Glictronix cannot be precluded.

Conclusion

For the foregoing reasons, Glictronix's motion for partial summary judgment is denied in full.

Class Action Certification

HN21[] In order to maintain a class action, a plaintiff must demonstrate compliance with the mandatory requirements of *rule 23(a)*, which provides that:

> *HN22*[] One or more members of a class may sue or be sued as representative parties on behalf of all **[**95]** only if (1) the class is so numerous that joinder of all members is impracticable, (2) there are questions of law or fact common to the class, (3) the claims or defenses of the representative parties are typical of the claims or defense of the class, and (4) the representative parties will fairly and adequately protect the interests of the class.

If the initial prerequisites of *Rule 23(a)* are met, plaintiff must additionally meet the requirements of at least one of the three subsections of Rule (b). Glictronix here seeks certification of the proposed class *HN23*[] under *Rule 23(b)(3)*, which provides that an action may proceed as a class action if:

> **[*584]** the court finds that the questions of law or fact common to the members of the class predominate over any questions affecting only individual members, and that a class action is superior to other available methods for the fair and efficient adjudication of the controversy. . . .

Katz v. Carte Blanche Corp., 496 F.2d 747 (3d Cir.), *cert. denied*, *419 U.S. 885, 95 S. Ct. 152, 42 L. Ed. 2d 125 (1974)*; *Young v. Jo-Ann's Nut House, Inc., 1980-81 Trade Cas. (CCH) P 63,746 at 77,790 (D.N.J.1980)*. To support certification, **[**96]** common issues need only predominate; they need not be dispositive of the entire litigation. *State of Illinois v. Harper & Row, 301 F. Supp. 484, 489 (N.D.Ill.1969)*.

HN24[] The burden of demonstrating fulfillment of the conditions outlined in *Rule 23* for maintenance of a class action lies with the moving party. *Katz v. Carte Blanche Corp., supra.* The strength of a plaintiff's case on the merits is not to be considered in determining whether a class should be certified. *Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 176, 94 S. Ct. 2140, 2151, 40 L. Ed. 2d 732 (1974)*. There is no requirement of a prima facie showing of merit in a class action to support certification. *City of Philadelphia v. American Oil Co., 53 F.R.D. 45, 61 (D.N.J.1971)*; *accord* *Kahan v. Rosenstiel, 424 F.2d 161, 169 (3d Cir.1970)*. However, some analysis of the substantive claims and the essential elements needed to establish those claims is necessary for thorough evaluation of whether the requirements of *Rule 23* have been met. *Chmieleski v. City Products Corp., 71 F.R.D 118, 127 (W.D.Mo.1976)*. Therefore, "a preliminary hearing addressed not to the merits of plaintiff's individual claim but to whether **[**97]** she is asserting a claim which, assuming its merit, will satisfy the requirements of *Rule 23* has never been regarded as violative of the Rule stated in *Eisen. . . ."* *Cobb v. Avon Products, Inc., 71 F.R.D. 652, 654 (W.D.Pa.1976)*.

Having chosen to seek certification under *Rule 23(b)(3)*, Glictronix must satisfy the requirements of that rule and the requirements of *Rule 23(a)(1)-(4)*. AT & T contends that class certification should be denied for four reasons. First, it claims that Glictronix cannot satisfy the *Rule 23(a)(3)* and *(4)* requirements that it can adequately represent a class of competitors and that its claims are typical of the claims of the members of the proposed class. AT & T also asserts that Glictronix has not met the *Rule 23(b)(3)* requirements that common questions predominate over individual question or that a class action is the superior method of adjudicating this controversy. AT & T concedes that Glictronix has met the *Rule 23(a)(1)* numerosity requirement. It addresses the issue of whether there are common questions only in the context of *Rule 23(b)(3)* analysis, and not under *Rule 23(a)(2)*.

A. *Typicality*

AT & T contends that Glictronix claims cannot be typical **[**98]** of those of the proposed class members because Glictronix markets only a few of the numerous varieties of PBXs and key systems marketed by the class members. AT & T states that under current FCC rulings whether or not a PCA will be required turns on the quality and technical characteristics of the equipment and on the quality of each individual installation. Therefore, AT & T contends, the assessment of whether the PCA requirement was reasonable must be individually made for each different type of equipment and each installation. According to this theory, Glictronix's claims, based on its own equipment, cannot be typical of the claims based on other equipment. Whether the existence of an antitrust violation and proof of antitrust injury can be shown by common evidence for the different equipment marketed by the various class members will be addressed later. The question here is merely whether the named plaintiffs claims are typical.

Despite the diversity of types of PBXs and key systems, this equipment has consistently been viewed as a unit. In the *Litton* litigation the relevant market was defined as all PBXs and key systems. No differentiation was made among the various **[*585]** **[**99]** types of PBXs and key systems. Furthermore, AT & T was unable to produce any concrete evidence of harm to the network from any type or brand of terminal equipment. The contention that Glictronix's claims are atypical because of differences in harm to the system is belied by the general lack of evidence of harm, which is documented in AT & T's own internal papers.

In support of its argument, AT & T relies heavily on *Am/Comm Systems, Inc. v. American Tel. & Tel. Co., 101 F.R.D. 317 (E.D.Pa.1984)*, discussed earlier in connection with Glictronix's motion for partial summary judgment. As Glictronix makes clear, the proposed product market in *Am/Comm* included a wide variety of products besides PBXs and key systems including burglar alarms, automatic dialers, and many others. Not surprisingly, the court found the claims of the class representative, which marketed only some of this diverse array of equipment not typical for *Rule 23* analysis. The *Am/Comm* ruling therefore has little bearing on the question of typicality in this case.

Glictronix's claims are typical of those of the class.

B. *Adequacy of Representation*

HN25[] The *Rule 23(a)(4)* requirement that a class representative **[**100]** "fairly and adequately protect the interests of the class," encompasses two inquiries: (1) whether plaintiff's counsel is competent and (2) whether the named plaintiff has "interests antagonistic to those of the class." *Wetzel v. Liberty Mutual Insurance Co., 508 F.2d 239, 247 (3d Cir.)*, *cert. denied*, *421 U.S. 1011, 95 S. Ct. 2415, 44 L. Ed. 2d 679 (1975)*. Conceding the competence of plaintiff's counsel, AT & T contends that Glictronix has interests antagonistic to those of other class members.

The basis of Glictronix's claim in this case is that it was foreclosed from a share of the terminal equipment market by AT & T's allegedly illegal anticompetitive conduct. Proof of damages for such loss of a share of the market is measured by lost profits or sales. AT & T contends that where the proposed class members are competitors in the relevant market, the need to assess damages by lost sales or profits places class members in conflict with one another and makes it impossible for the representative plaintiff to adequately represent the other class members.

This was the holding in *Am/Comm*, where Judge Bechtle denied plaintiff's motion for class certification against *AT & T.* ***[**101]*** *Am/Comm, supra, 101 F.R.D., at 321-322*. Other cases in the Third Circuit consistently support the view that ***HN26***[] where the class members are competitors in a limited market, the named plaintiff's attempts to maximize its damage recovery will conflict with the interests of the other class members and class certification should be denied. *Franklin Container Corp. v. International Paper Co*., 1983-2 Trade Cas. P 65,727 at 69,722 (E.D.Pa.1982); *Chestnut Fleet Rentals, Inc. v. Hertz Corp., 72 F.R.D. 541, 544-45 (E.D.Pa.1976)*.

Glictronix tries to distinguish *Chestnut* and *Franklin Container* on the ground that these cases involved "fixed" or "limited" markets which created conflicts among the class members which do not exist here. It implies that the market in this case is practically unlimited and that all the class members can show profits and sales lost to AT & T without anyone of the members ever claiming it would have made particular sales which another member also claims for itself.

There is no basis for Glictronix's attempted distinction between a limited and unlimited market here. The market for terminal equipment is limited just as were the markets in *Franklin Container* **[**102]** and *Chestnut Fleet*. See *Am/Comm, supra, at 321-322*.

Glictronix cites a number of cases in which it claims classes composed of competitors were certified. These cases do not support Glictronix contentions. In some, the fact that the class members were competitors was unrelated to the claims raised. *Philadelphia Electric v. Anaconda American* ***[*586]*** *Brass, 43 F.R.D. 452, 463 (E.D.Pa.1968)*; *Sunrise Toyota, Ltd. v. Toyota Motor Co., 55 F.R.D. 519 (S.D.N.Y.1972)*; *Gold Strike Stamp Co. v. Christensen, 436 F.2d 791 (10th Cir.1970)*. In another, the plaintiff requested class certification only as to the allegations regarding which there was no conflict among the class members. *Hawkins v. Holiday Inns Inc*., 1975-1 Trade Cas. P 60,153 at 65,464 (W.D.Tenn.1975).

Finally, Glictronix invokes *Siegel v. Chicken Delight, Inc., 271 F. Supp. 722 (N.D.Cal.1967)*, where the court stated that class members "whose interests are antagonistic to those of their brethren . . . may by order be excluded from the suit." *Id. at 728*. *Siegel* did not involve claims of lost profits from a lost share of the market. It is unclear from the opinion what type of antagonisms the **[**103]** court contemplated, but certainly they were not the pervasive conflicts which arise in the lost share of the market context. The fact that the court suggested that the antagonisms could be dealt with by excluding some class members indicates that relatively few conflicts were contemplated. This is very different from the lost profit context where one may anticipate that there may be conflicts among or between all of the class members.

At least one case in the Third Circuit suggests that a class representative may be adequate under *rule 23(a)(4)* in a case where class members' claims are based on business not done where there are "objective guidelines for apportioning individual damages among the class members." *Al Barnett & Son v. Outboard Marine Corp., 64 F.R.D. 43, 50-51 (D.Del.1974)*, *aff'd*, *611 F.2d 32 (3d Cir.1979)*.

Glictronix claims its expert's methodology, based on the Competitive Activity Reports compiled by AT & T constitutes just such objective guidelines. While Glictronix's methodology may provide a relatively accurate formula for allocating damages, it certainly will not prevent all conflict among the class members.

The methodology only permits recovery based **[**104]** on applications by class member interconnect companies to AT & T for a PCA. Glictronix's theory is that the interconnect company which got far enough with a customer to request a PCA is the company which would have made the sale in the absence of AT & T's anticompetitive practices. But under this approach, as Glictronix admits, class members which dropped out of the market or delayed entering it because of AT & T's practices would be foreclosed from recovery. Certainly, they would dispute the allocation of damages which would result from Glictronix's methodology.

In addition, while it may be true in most cases that the company which requested a PCA would have made the sale, the theory ignores possible competition among rival interconnect companies which may have gone on prior to the request and which may have been affected by AT & T's anticompetitive practices.

Despite the existence of the Competitive Activity Reports, this remains a "lost profits" case in which class members' interests are adverse to one another. Glictronix cannot adequately represent its rivals in the interconnect business.

C. *Predominance of Common Questions*

HN27[] In order to certify a class under *Rule 23(b)(3)*, **[**105]** the court must find that common issues predominate over individual ones. In an action under *Section 1* of the Sherman Act, a plaintiff must establish (1) an antitrust violation; (2) causation (that plaintiff suffered antitrust "impact" or "injury in fact"), and; (3) the amount of damages. *American Bearing Co., Inc. v. Litton Industries, Inc., 729 F.2d 943, 948 (3d Cir.1984)*. In order for a class to be certified in an antitrust action under *Rule 23(b)(3)*, plaintiff must demonstrate that both the violation and fact of injury can be proved for the entire class by common evidence. The amount of damages can be established individually for each class member. *Bogosian v. Gulf Oil Co., 561 F.2d 434, 454-55 **[*587]** (3d Cir.1977)*, *cert. denied*, *434 U.S. 1086, 98 S. Ct. 1280, 55 L. Ed. 2d 791 (1978)*. AT & T contends that Glictronix cannot establish an antitrust violation or fact of injury by common evidence.

1. *Antitrust Violation*

Glictronix's complaint alleges antitrust violations under both *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2*. Under *Section 2*, Glictronix alleges monopolization, attempted monopolization and conspiracy to monopolize. Under both *Sections **[**106]** 1* and *2*, it alleges a combination in restraint of trade among the defendants to institute an illegal tying arrangement. According to Glictronix:

> By enforcing a "tie-in" between the use of telephone terminal equipment provided by Bell and the lack of a need to lease unnecessary and useless PCAs from Bell, defendants violated *15 U.S.C. Sec. 1*.

Plaintiffs Brief in Support of Motion for Class Certification, p. 68.

Defendants allegedly carried out these antitrust violations by requiring the use of PCAs and opposing certification and by undertaking various activities to discourage customers from switching from AT & T to competitors' equipment. These activities allegedly included delaying installation of and improperly installing PCAs, refusing to sell inside wiring or refusing to do so on a reasonable basis, sabotaging inside wiring obtained by plaintiff, subjecting competitors to unfair and expensive cut-over tactics, and disparaging competitors' equipment.

AT & T claims that whether or not its requirement of a PCA constitutes an antitrust violation can only be determined on an individual basis. Under present FCC rulings, a PCA is required for all terminal equipment which **[**107]** either does not meet FCC standards or which was not installed in conformity with FCC standards. Therefore, AT & T reasons, Glictronix would have to establish an antitrust violation as to each class member by individual showing that each member's equipment would not be required under present FCC standards to use a PCA. In effect, AT & T argues that an antitrust violation cannot be established without an assessment of the reasonableness of the PCA requirement as to each class member's equipment.

AT & T's position mischaracterizes Glictronix's claims. To establish an antitrust violation, Glictronix does not need to show that the imposition of a PCA requirement was unreasonable in every case. Rather, Glictronix alleges that by imposing a blanket requirement of a PCA and opposing establishment of a systems of registration standards (under which it would be possible to determine whether or not particular equipment needed a PCA), AT & T sought to monopolize the relevant market and establish an illegal tie-in. ***HN28***[] Proof of unreasonableness is not an element of *Section 2* monopolization claims. *See e.g.* *U.S. v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 1703-04, 16 L. Ed. 2d 778* ***[**108]*** *(1966)*. ***HN29***[] Tying arrangements are normally per se *Section 1* violations. *Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*. There is no reason to believe this case does not fall within the general rule governing tie-ins. [8] Therefore, contrary to AT & T's suggestion, proof of the unreasonableness of the restraint is not necessary to establish the antitrust violations alleged. Whether AT & T's PCA requirement constituted an antitrust violation is susceptible of common proof. The violation would be established, if at all, by evidence of AT & T's conduct, and not by individualized analysis of the various class members' equipment and installations.

[109]** AT & T contends that Glictronix's claims of anticompetitive activities, such as refusal to sell inside wiring and the like, must **[*588]** necessarily be considered individually and are inherently episodic. However, to establish a violation, Glictronix need not individually establish AT & T's conduct vis-a-vis each class member. It can show a violation by establishing that AT & T engaged in an orchestrated attempt to damage and harass competitors in the interconnect business. It can do so by introducing proof of a pattern of conduct.

2. *Fact of Damage*.

HN30[] Proof of impact is an essential element of an antitrust action and must be provable on a common basis in order for a class to be certified. *See* *Bogosian, supra, 561 F.2d at 454-55*.

To prove impact, a plaintiff must show that he suffered some loss in his business or property and that there is a causal relationship between the antitrust violation and the loss. *Bogosian, supra, 561 F.2d at 454*. Impact is a distinct element of liability, independent of proof of a violation and independent of the matter of individual damages.

---

[8] In *Jefferson Parish Hospital District No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*, the Supreme Court reaffirmed the general per se rule in tie-in cases, but found that it did not apply in the particular circumstances of that case, where the tying arrangements did not restrain trade on the merits by forcing purchases that would not otherwise be made. This case bears little resemblance to *Jefferson Parish*, and the per se rule should apply.

Fact of damage is susceptible of common proof. "There is no reason why proof of the impact cannot **[**110]** be made on a common basis so long as the common proof adequately demonstrates some damage to each individual." *Bogosian, supra, 561 F.2d at 454*.

The *Bogosian* court strongly implies that where damages must be shown on the basis of lost profits, the plaintiff will not be able to show fact of damage through common evidence. *Id. at 455*. But at least concerning the PCA requirement, Glictronix makes a plausible argument that fact of damage can be proved on a common basis.

Based on its experts' affidavits, Glictronix contends that each of the members of the class suffered at least some damages from the PCA requirement in two ways. First, the PCA added significantly to the cost of their equipment and thereby reduced the volume of sales. Second, the class members all lost profits because the added cost of the PCA forced them to lower the prices of their equipment in order to stay competitive with AT & T. While the actual extent of damages may require individualized proof, Glictronix contends that the fact of damage in the form of lower profits on sales made and lost sales can be commonly established for all class members from the existence and effects of the PCA tariff.

AT & **[**111]** T's expert finds two flawed assumptions behind Glictronix's fact of damage analysis. The first is the assumption that but for the PCA tariff, all the class members would have been able to market their equipment without PCAs. According to AT & T, this assumption is proved wrong by the fact that even under present FCC rulings, equipment and installations which do not meet FCC certification standards are obligated to use a PCA. The manufacturers or sellers of equipment still needing a PCA cannot show fact of damage, according to AT & T. I find this argument persuasive. [9]

[112]** Glictronix's second false assumption, according to AT & T, is that each class member would have made more sales and more profits had certification standards replaced the PCA tariff sooner. AT & T's expert Phillips contends that had registration occurred sooner some interconnect companies would have improved their market position and some would have suffered diminution or complete loss of their market shares. Glictronix's expert Pratt agreed in the study he helped create in *Litton* with Phillips' conclusion. Phillips argues from the fact that some companies would have suffered from earlier registration that fact of injury cannot be established on a common basis.

[*589] It appears inevitable that an individualized assessment of the market position of each class member would be necessary to determine whether the member would or would not have increased its actual sales and profits absent the PCA tariff. Similarly, individualized analysis would be necessary to determine whether companies which left the marketed or delayed entering it suffered any damage.

The allegation that the plaintiff class was damaged by the delay in adoption of registration standards is only one of Glictronix's **[**113]** claims. With regard to many of the other claims, fact of damage also cannot be commonly proved. These claims include (1) delay in providing and installing PCAs; (2) refusal to sell inside wiring at all or on a reasonable basis, and; (3) delay in interconnecting competitors' terminal equipment. Proof of fact of damage on each of these claims will require individual investigation as to each class member.

For all the reasons given above, fact of damage cannot be established on a common basis.

D. *Superiority of Class Action*

Rule 23(b)(3) ***HN31***[] requires a plaintiff to prove that a "class action is superior to other available methods for the fair and efficient adjudication of the controversy." The rule also sets out four criteria relevant to the inquiry regarding superiority:

[9] It is conceivable that none of the class members' equipment would need a PCA under the present FCC standards. However, as pointed out by AT & T at oral argument, it would be Glictronix's burden to establish this fact. It has made no effort to do so. In addition, AT & T has specifically alleged that certain of the class members' equipment, such as equipment which cannot prevent power surges, would be required to use a PCA under present FCC standards.

> (A) the interest of members of the class in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; (D) the difficulties likely to be encountered in the management **[**114]** of a class action.

In applying these criteria in *Am/Comm*, the court determined that a class action was not the superior method for adjudication. It stated:

> (1) The members of the proposed class would presumably want to litigate on their own due to the conflicting interests among the members regarding damages. (2) There is a need for a determination of the reasonableness of the PCA requirement on a product-by-product basis. (3) it is alleged that a number of individual related cases have already been filed against defendants, a factor which weighs against class certification. *Bogus v. American Speech & Hearing Asso., 582 F.2d 277, 278*, [Sic; see p. 290] n. 17 (3d Cir.1978) (citing *Comments of Advisory Committee on Civil Rules, 39 F.R.D. 69, 104)*. And finally, (4) this case could become entirely unmanageable due to individualized proofs of violation and impact. Accordingly, a class action in this case would not be a superior method of adjudication.

Am/Comm Systems, supra, 101 F.R.D., at 323.

The determination concerning superiority is more difficult in this case. As discussed earlier, there was an extremely wide range of products at issue in *Am/Comm* **[**115]** . It was because products other than PBX's and key systems were involved that the court determined that the reasonableness of the PCA had to be assessed on a product-by-product basis. Here there is no such individualized need. Secondly, I am not convinced that members of the proposed class would prefer to litigate on their own. Although there may be conflicts among the members regarding damages, the costs of individually litigating a major antitrust case would lead many members to prefer class treatment. This is particularly true because the denial of Glictronix's motion for partial summary judgment would put Glictronix or any other similarly situated plaintiff to great expense in trying to establish its claims.

On the other hand, other parties have instituted cases similar to this one against AT & T, a factor weighing against class certification because it suggests an interest in individual litigation. *Bogus v. American Speech & Hearing Ass'n., 582 F.2d 277, 290 n. 17 (3d Cir.1978)*. While it is unclear how many cases deal precisely with **[*590]** the issues raised here (see Plaintiff's Reply Brief in Support of Class Certification at 43-44 n. 13), it seems clear that there is **[**116]** litigation in New York and New Jersey on these issues.

Finally, the individual proofs needed to establish fact of injury on all the plaintiff's claims would render this case unmanageable. On balance, I conclude that class treatment is not the superior method of adjudication of this case.

Conclusion

Because of the need for individual proof of fact of injury and the inherent conflicts among class members, the motion for class certification must be denied.

Defendants' attorneys are requested to present a form of order consistent with this opinion.

Torts > ... > Contracts > Intentional Interference > Elements

HN5[] Intentional Interference, Defenses

An element of a tortious interference with a contractual or business relationship is malice, that is, the intentional doing of a wrongful act without justification or excuse. Malice may be inferred from the absence of just cause or excuse, that competition may be justification and that business loss as a "mere incident" of competition is damnum absque injuria. A tortious interference must be unreasonable.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Torts > Business Torts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN6[] Regulated Practices, Price Fixing & Restraints of Trade

The purchase of a competitor's business premises in order to shut down its business and thereby to reduce competition is not actionable either as a tortious interference with prospective business advantage or as an ***antitrust law*** violation, unless amounting to an unreasonable restraint of trade with a significant tendency to reduce competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Only unreasonable restraints of trade and monopolies within relevant geographic and product markets are ***antitrust law*** violations. The "rule of reason" requires the court to weigh all the circumstances of a given case to determine whether the disputed practice constitutes an unreasonable restraint on competition. The court must subject the challenged restraint's impact on competitive conditions to probing examination.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

HN8[] **Private Actions, State Regulation**

The New Jersey Antitrust Act, *N.J. Stat. Ann. § 56:9-1 et seq.*, specifically *N.J. Stat. Ann. § 56:9-10(b)*, establishes an injunctive remedy to any person threatened with loss or damage to "property or business."

Counsel: *Eugene W. Landy* argued the cause for appellants (*Landy & Spector*, attorneys).

Irwin P. Burzynski argued the cause for respondents Manville Foodland, Inc., Foodarama Supermarkets, Inc., and New Linden Price Rite, Inc. (*Hellring, Lindeman, Goldstein & Siegal*, attorneys; *Robert S. Raymar*, on the brief; *Bernard Hellring, Robert S. Raymar* and *Irwin P. Burzynski*, of counsel).

Paul F. Clausen argued the cause for respondents Mayfair Supermarkets, Inc., Easton & Houston Corp., and Stanley Kaufelt (*Greenbaum, Rowe, Smith, Ravin, Davis & Bergstein*, attorneys; *Victor A. Deutch*, of counsel).

Judges: Matthews, Furman and Cohen. The opinion of the court was delivered by Furman, J.A.D.

Opinion by: FURMAN

Opinion

[*265] **[**187]** Plaintiffs appeal from judgment of dismissal on motion, *R. 4:37-2(b)*, at the close of their proofs in a jury trial on the issue of liability only. Defendants cross-appeal from the denial of costs other than taxed costs.

This litigation arises out of a lease assignment followed by a sublease of a 33,000 square foot building in a shopping center on Route **[***2]** 527 in Franklin Township outside the City of New Brunswick. The building was occupied by a supermarket between **[*266]** 1967 and 1981 and is flanked by a **[**188]** separate 10,000 square foot building, which is partitioned for eight satellite stores.

Plaintiffs are Monmouth Real Estate Investment and D & E Realty Company (Monmouth), owners of the shopping center, and Edward M. Nelson, Jr., a customer of the former supermarket. Defendants are Foodarama Supermarkets, Inc. and its wholly owned subsidiaries Manville Foodland, Inc. and New Linden Price Rite, Inc. (Foodarama), who leased the building from Monmouth and operated the supermarket; and Mayfair Supermarkets, Inc., its subsidiary Easton & Houston Corp. (Mayfair), and its chief executive officer Stanley Kaufelt. Foodarama assigned the lease to Mayfair for $ 140,000 in March 1981. Mayfair in turn subleased the building at the same rent to Unclaimed Salvage & Freight, a corporation, in July 1981. Unclaimed Salvage & Freight, which is not a party to this litigation, has maintained a store for the sale of unclaimed goods.

Foodarama's supermarket business declined by 20 percent or more upon the construction by the State **[***3]** of a concrete median divider on Route 527 in the fall of 1979. Pursuant to the lease Foodarama had paid Monmouth overage rentals totaling slightly over $ 40,000 based upon a percentage of gross receipts in excess of eight million dollars per year during the six preceding years. Gross receipts fell below eight million dollars annually thereafter. Meanwhile approvals were granted by the State and the municipality in January and February 1981 for design and construction of a jughandle to provide access to and from the shopping center across Route 527. The jughandle was completed and open for traffic in the late fall of that year.

Mayfair owns a supermarket about half a mile from the former Foodarama supermarket, on the opposite side of Route 527, and in competition with it for several years preceding 1981. Aware of the precipitous fall-off in Foodarama's business and of Foodarama's interest in assigning its lease, Mayfair negotiated with Foodarama for a sublease to it and with a firm referred **[*267]** to in the record as Drug Fair for a sublease, in turn, from it of half the building. Foodarama ceased retail supermarket operation on March 7, 1981 and assigned its lease to Mayfair **[***4]** on March 17, 1981. Mayfair's negotiations with Drug Fair broke off unsuccessfully. The former supermarket premises were closed for retail business from March 7 until about July 15, 1981, when Unclaimed Salvage & Freight opened its store. Foodarama employees were present in the building on a regular basis detaching and removing fixtures and equipment from March until late June 1981.

Monmouth's complaint sought a declaration of rights and obligations under the lease; compensatory damages for breach of the lease against both Foodarama as lessee and Mayfair as assignee of the lease; and compensatory and punitive damages for the intentional tort of tortious interference with prospective economic advantage, primarily against Mayfair. Nelson as co-plaintiff sought an injunction, *N.J.S.A. 56:9-10(b)*, and treble damages, *N.J.S.A. 56:9-12*, against both Foodarama and Mayfair for violation of the New Jersey Antitrust Act, *N.J.S.A. 56:9-1 et seq.*, specifically *N.J.S.A. 56:9-3* and *56:9-4(a)*. A prior antitrust action brought by Monmouth against Foodarama and Mayfair was dismissed in the United States District Court for lack of standing in October 1981. In the litigation **[***5]** before us, a trial judge dismissed the State antitrust claim brought by Monmouth, also for lack of standing. That pretrial ruling is not challenged.

HN1[] The standard for appellate review of the dismissal of the various causes of action is whether the evidence, together with the legitimate and favorable inferences therefrom, could sustain a judgment in any of the plaintiffs' favor, *Dolson v. Anastasia, 55 N.J. 2, 5 (1969)*. By applying that standard we affirm.

Monmouth claims three breaches of its lease to Foodarama: non-occupancy of the building for over 90 days during Foodarama's detachment and removal of fixtures and equipment; **[*268]** use of the building **[**189]** by Unclaimed Salvage & Freight other than for a supermarket; and bad faith and unfair dealing contrary to what it asserts to be an implied covenant. By a plain reading of the lease all three claims are untenable. ***HN2***[] No covenant can be implied in the lease contrary to its express provisions. Nor does Monmouth argue on appeal that a fact issue as to the intent and understanding of the parties remains unresolved. The lease permits assignment "freely" and without the landlord's approval.

Default is provided **[***6]** for under the lease "if the Tenant leaves the leased premises unoccupied for a continuous period of ninety days or more during the term of the lease." Monmouth would construe "unoccupied" as "closed for business" and impose a default based upon the approximately 90-day period of Foodarama's clean-up and removal of fixtures and equipment after its supermarket shutdown. But that provision of the lease must be construed, contrary to Monmouth's construction, in *pari materia* with Paragraph 15, which authorizes the tenant "at any time during the term of this lease" to remove its property, including fixtures and equipment installed by it on the leased premises. *HN3*[] We construe "unoccupied" as Judge Selikoff did below, in accordance with the accepted meaning in the law of its antonym "occupied," that is, in actual possession and use, irrespective whether in retail business use or not.

Under the lease permissible use of the leased premises is restricted to "the operation of a supermarket and drug store and any and all other lawful purposes." Another provision authorizes the landlord to construct satellite stores in the same shopping center but not to permit use of any of them as a supermarket **[***7]** "or any other establishment selling food for off-premises consumption." In the light of the lease restriction against competition with a supermarket and in the light of the lease provision for overage rentals based upon gross receipts from sales exceeding eight million dollars, Monmouth would **[*269]** construe permissible use of the premises as limited to supermarket use. It argues that "any and all other lawful purposes" in the permissible use provision of the lease means "any and all other lawful purpose," incidental to and combined with supermarket use or supermarket and drug store use and that uses not incidental to and combined with supermarket use are barred.

Like Judge Selikoff below, we read no such limitation into the lease provision governing permissible uses. Rather, we construe it as permitting any other lawful use separate from and in lieu of supermarket use, specifically use as a retail store by Unclaimed Salvage & Freight.

In rejecting Monmouth's construction of "any and all other lawful purposes," we apply the rule of construction of leases set forth in *Carteret Properties v. Variety Donuts, Inc., 49 N.J. 116, 127 (1967)*:

> . . . *HN4*[] [W]here a landlord **[***8]** claims that a limitation on the use of demised premises is imposed by a lease, all doubts with respect thereto arising from the language employed ordinarily are resolved in favor of that construction which least restricts the use.

Ingannamorte v. Kings Super Markets, Inc., 55 N.J. 223 (1970) is clearly distinguishable and does not compel a contrary result because of the restriction in the lease involved there that the leased store was "to be used and occupied only for a supermarket."

Monmouth's remaining cause of action sounds in tort for willful, unjustified and unreasonable interference with its lease and with its prospective economic advantage. In view of our affirmance of the holding below that the proofs failed to establish a *prima facie* breach of the lease by any defendant, we need deal only with Monmouth's claim of tortious interference with prospective economic advantage. The jury trial was limited to the issue of liability. Nevertheless, there was sufficient evidence in the record, in our view, to support **[**190]** an inference that Mayfair intended to terminate retail supermarket operation at the leased premises and that such termination, even if **[***9]** another retail store use ensued, would deprive Monmouth of **[*270]** overage rentals under the lease and of enhanced rental value of the satellite stores, economic advantages to be anticipated from a continuing supermarket operation, upon construction of a jughandle on Route 527 to facilitate access to the shopping center.

Our further determination, accordingly, must be whether on Monmouth's proofs, in the light most favorable to them, a jury could have found liability for a tortious interference against Mayfair, as tortious interference with prospective economic advantage is defined in the case law.

According to *Louis Schlesinger Co. v. Rice, 4 N.J. 169, 179-181 (1950)*, *HN5*[] an element of a tortious interference with a contractual or business relationship is malice, that is, the "intentional doing of a wrongful act without justification or excuse." The opinion of Justice Heher recognizes that malice may be inferred from the absence of just cause or excuse, that competition may be justification and that business loss as a "mere incident" of competition is *damnum absque injuria*. In *Glasofer Motors v. Osterlund, Inc., 180 N.J. Super. 6, 26 (App.Div.1981)*, we held **[***10]** that a tortious interference must be "unreasonable." *See also* *Harris v. Perl, 41 N.J. 455, 461 (1964)*; *Louis Kamm, Inc. v. Flink, 113 N.J.L. 582, 588-590* (E. & A. 1934); *O'Connor v. Harms, 111 N.J. Super. 22, 26 (App.Div.1970)*, certif. den. *57 N.J. 137 (1970)*.

Judge Selikoff concluded below that Monmouth's proofs would not support a finding of malice by Mayfair. We agree that no evidence of a deliberate spiteful intent directed towards Monmouth was before the jury. Nor does Monmouth contend to the contrary on appeal. Rather, Monmouth contends that Mayfair's purchase of the assignment of the Foodarama lease was unreasonable and unjustifiable and, thus, through an inference of malice actionable as a tortious interference.

Under the evidence in the light most favorable to Monmouth, the jury as fact finder, by rejecting Mayfair's claim of a real estate investment, might have inferred that Mayfair acquired the Foodarama leasehold for the sole, or at least predominant, **[*271]** purpose of reducing competition with its own supermarket by eliminating a competitor half a mile away. Judge Selikoff categorized the acquisition as a "legitimate business practice." **[***11]** Monmouth cites no authority, and our research reveals none, that ***HN6***[] the purchase of a competitor's business premises in order to shut down its business and thereby to reduce competition is actionable either as a tortious interference with prospective business advantage or as an ***antitrust law*** violation, unless amounting to an unreasonable restraint of trade with a significant tendency to reduce competition. No market data were introduced at trial; no *prima facie* showing of an unreasonable restraint of trade was before the jury.

HN7[] Only unreasonable restraints of trade and monopolies within relevant geographic and product markets are ***antitrust law*** violations. *See* *Pomanowski v. Monmouth Cty. Bd., 89 N.J. 306, 315 (1982)*; *State v. Lawn King, Inc., 84 N.J. 179, 194 (1980)*; *Glasofer Motors v. Osterlund Inc., supra 180 N.J. Super. at 26*; *Northrop Corp. v. McDonnell Douglas Corp., 705 F.2d 1030, 1050* (9 Cir.1983), *cert.* den. *U.S. , 104 S.Ct. 156, 78 L.Ed.2d 144 (1983)*; *N.J.S.A. 56:9-3* and *56:9-4(a)*. As the Supreme Court stated in *Pomanowski:*

> As first framed in *Standard Oil Co. v. United States, 221 U.S. 1, 31* ***[***12]*** *S.Ct. 502, 55 L.Ed. 619 (1911)*, the "rule of reason" requires the court to weigh all the circumstances of a given case to determine whether the disputed practice constitutes an "unreasonable restraint on competition." *State v. Lawn King, Inc., supra, 84 N.J. at 194*. *See also Continental T.V., Inc. v. G.T.E. Sylvania,* **[**191]** *Inc., supra*, 433 *U.S.* [36] at 49, 97 *S.Ct.* [2549] at 2557, 53 *L.Ed.*2d [568] at 580 [(1977)]. The court must subject the challenged restraint's impact on competitive conditions to probing examination. *United States v. Realty Multi-List, Inc., 629 F.2d 1351, 1362 (5th Cir.1980)*. *See also* *National Society of Professional Engineers v. United States, 435 U.S. 679, 688, 98 S.Ct. 1355, 1363, 55 L.Ed.2d 637, 648 (1978)*. [*89 N.J. at 315*]

We hold that Mayfair's purchase of an assignment of the Foodarama lease, even assuming a predominant purpose to reduce competition by eliminating a competitor, was not *per se* actionable and that Monmouth's proofs fell short of a *prima facie* cause of action for malicious, unreasonable or unjustifiable interference with the prospective benefits of **[***13]** its leasehold interest.

[*272] The surviving count for ***antitrust law*** violations after dismissal of Monmouth's is plaintiff Nelson's as a customer of the former Foodarama supermarket. His sole allegation was inconvenience to him. At the time of trial he shopped at a supermarket two and a half miles away approximately twice a month (without explanation why he did not shop at the Mayfair Supermarket only half a mile from the former Foodarama supermarket).

Judge Selikoff questioned Nelson's standing but went on to rule that his proofs on his antitrust claim for injunctive relief and treble damages were insufficient to withstand defendants' motions for dismissal. We agree with that substantive holding; we would also dismiss Nelson's antitrust cause of action for lack of standing. ***HN8***[] The New Jersey Antitrust Act in *N.J.S.A. 56:9-10(b)* establishes an injunctive remedy to any person threatened with loss or damage to "property or business." Palpably, Nelson suffered or was threatened with no loss or damage to his property or business. He alleged no out-of-pocket loss other than *de minimis* additional travel expenses by automobile.

Nelson's evidential showing of an ***antitrust*** **[***14]** ***law*** violation, without relevant market data, would not have sustained a determination in his favor of an unreasonable restraint of trade with a significant tendency to reduce competition. The proofs failed to meet the rule of reason test recognized and applied in *Northrop, Pomanowski* and other authorities cited *supra*. Further, Nelson failed to specify what injunctive relief he sought and failed to join as a party Unclaimed Salvage & Freight, the sublessee in possession of the premises.

Other issues raised by plaintiffs may be dealt with briefly. Because of our affirmance on other grounds, we need not and do not pass upon the issue of waiver against plaintiff Monmouth, which was decided in favor of defendants below, specifically whether the clause in the lease providing that acceptance of rent would not effect or constitute a waiver should be denied **[*273]** enforcement under *Carteret Properties v. Variety Donuts, Inc., supra 49 N.J. at 129*.

Plaintiffs urge that evaluations of the issues by another trial judge in denying defendants' pretrial motion for summary judgment should be "the law of the case." In our view pronouncements prior to the introduction of **[***15]** any evidence were not binding on the trial judge in the differing procedural context of the motion for dismissal at the close of plaintiffs' proofs.

One other issue raised by plaintiffs, although not as a separate point, is clearly without merit: that reversible error was committed in the exclusion of various documents from evidence, including long outdated and irrelevant market surveys. We sustain Judge Selikoff's exercise of discretion under *Evid.R.* 4.

We reject also defendants' cross-appeals from the discretionary denial of costs other than taxed costs. In our view Judge Selikoff did not abuse his discretion in failing to award costs other than taxed costs to defendants. *See* *Fortugno Realty Co. **[**192]** v. Schiavone-Bonomo Corp., 39 N.J. 382, 396 (1963)*; *Willis v. Dyer, 163 N.J. Super. 152, 165 (App.Div.1978)*.

We affirm on the appeal and cross-appeals.

Haff v. Jewelmont Corp.

HN6[] **Antitrust & Trade Law, Clayton Act**

For a variety of reasons not the least of which is the fear that the lure of treble damages and attorney's fees would inundate the courts with spurious antitrust claims, the judiciary has consistently limited the scope of recovery under § 4 of the Clayton Act, *15 U.S.C.S. § 15*. It is well-established that the "by reason of" language of § 4 imposes a standing requirement on private antitrust plaintiffs which requires proof of legal causation, similar to the concept of proximate cause in the law of torts, as a predicate to recovery.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN7[] **Clayton Act, Claims**

An antitrust violation may be expected to cause ripples of harm to flow through the nation's economy; but despite the broad wording of § 4 of the Clayton Act, *15 U.S.C.S. § 15*, there is a point beyond which the wrongdoer should not be held liable. It is reasonable to assume that Congress does not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury to his business or property.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN8[] Clayton Act, Claims

For plaintiffs to recover treble damages under § 4 of the Clayton Act, *15 U.S.C.S. § 15*, on account of § 7 violations, they must prove more than injury causally linked to an illegal presence in the market. Plaintiffs must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN9[] Private Actions, Remedies

Where an alleged injury is not of the type that the statute is intended to forestall, recovery under § 4 of the Clayton Act, *15 U.S.C.S. § 15*, is unauthorized.

Antitrust & Trade Law > Clayton Act > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Governments > Federal Government > US Congress

HN10[] Antitrust & Trade Law, Clayton Act

In evaluating whether an alleged injury is "too remote" to confer standing, the court is to look at two factors: (1) the physical and economic nexus between the alleged violation and the harm to the plaintiff; and (2), the relationship of the injury alleged with those forms of injury about which Congress was likely to have been concerned in making defendants' conduct unlawful.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN11[] **Remedies, Damages**

The issue of whether a private antitrust plaintiff may recover treble damages under § 4 of the Clayton Act, *15 U.S.C.S. § 15*, requires the court to evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN12[] **Private Actions, Remedies**

There are three factors to be used in exploring the relationship between the plaintiff's harm and the defendants' alleged wrongdoing. First, it must be determined whether the alleged injury is of a type that Congress sought to redress in providing a private remedy for violations of the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN13[] **Private Actions, Remedies**

A second factor to be examined in each case is the directness or indirectness of the asserted injury.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN14[] **Private Actions, Remedies**

A final, somewhat related factor is whether the damages sought would create the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN15[] **Private Actions, Remedies**

Duplicative recovery is contrary to public policy.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN16[] **Private Actions, Standing**

Where a plaintiff is neither a consumer nor a competitor in the market in which trade is restrained, and does not allege whether he or she is a participant in either the seller's or the buyer's market, and the plaintiff fails to allege any marketwide restraint of trade, the plaintiff must be denied standing to sue for the alleged antitrust violation. Though he is injured by reason of defendants' actions, he is not injured by reason of that which makes defendants' actions unlawful.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN17[] **Private Actions, Remedies**

A second reason why a plaintiff can be denied standing is because an award of damages to a plaintiff would implicate the important public policy concern of avoiding the risk of duplicative recoveries.

Antitrust & Trade Law > Robinson-Patman Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Robinson-Patman Act

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Robinson-Patman Act > Remedies > General Overview

HN18[] **Remedies, Damages**

An eliminated middleman does not suffer the requisite competitive injury to maintain a private action for treble damages under § 4 of the Clayton Act, *15 U.S.C.S. § 15*, for an alleged violation of § 2(c) of the Robinson-Patman Act, *15 U.S.C.S. § 13*(c)(1970).

Antitrust & Trade Law > ... > Price Discrimination > Types of Price Discrimination > Brokerage, Commissions & Compensation

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

Antitrust & Trade Law > Robinson-Patman Act > Claims

HN19[] **Types of Price Discrimination, Brokerage, Commissions & Compensation**

The reduction or elimination of a commission or brokerage fee payable by the seller to its own agent to enable the seller to sell at a lower price is not forbidden by § 2(c) of the Robinson-Patman Act, *15 U.S.C.S. § 13(c)*.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

Antitrust & Trade Law > Robinson-Patman Act > Remedies > Damages

HN20[] **Robinson-Patman Act, Claims**

Even if a defendant's conduct does constitute a violation of § 2(c) of the Robinson-Patman Act, *15 U.S.C.S. § 13*(c), a plaintiff nonetheless cannot recover under § 4 of the Clayton Act, *15 U.S.C.S. § 15*. Where the only specific injury plaintiff sets forth is that he has not been paid commissions due to him, failure to pay these commissions has no conceivable connection with any subsequent violation of the antitrust laws. Only one who is directly injured by a violation of the antitrust laws is entitled to recover damages under *15 U.S.C.S. § 15*. Persons whose only loss is from the interruption or diminution of a profitable relationship with a party directly affected by the violation are held to have been injured only remotely and indirectly.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN21[] **Private Actions, Purchasers**

The granting of a price reduction following a seller's conversion to a direct selling arrangement does not, without more, constitute a violation of § 2(c) of the Robinson-Patman Act, *15 U.S.C.S. § 13*(c).

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN22[] **Private Actions, Remedies**

Congress does not intend the antitrust laws to provide a remedy in damages for all injuries which might be conceivably traced to an antitrust violation.

Antitrust & Trade Law > Robinson-Patman Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Robinson-Patman Act

HN23[] **Antitrust & Trade Law, Robinson-Patman Act**

Some anti-competitive effect is necessary to maintain an action under *15 U.S.C.S. § 13(c)*. While a plaintiff may suffer an economic loss as a result of a defendant's actions, the non-competitive nature of that loss, however, is fatal to a plaintiff's attempt to maintain an action under *15 U.S.C.S. § 13(c)*.

Judges: Patel, District Judge.

Opinion by: PATEL

Opinion

[*1469] Patel, District Judge.

This matter is before the court on a motion to dismiss. The issue addressed by the motion is whether plaintiff has standing to sue for alleged violations of § 2(c) of the Clayton Act, as amended by the Robinson-Patman Act, *15 U.S.C. § 13(c) (1970)*, the so-called "brokerage" provision of the Robinson-Patman Act.

I. FACTS

Plaintiff, Charles E. Haff ("Haff"), is engaged in the business of selling jewelry from wholesale manufacturers to retailers on a commission basis. Prior to August 1, 1981 Haff was employed by defendant Jewelmont Corporation ("Jewelmont") as a manufacturer's representative, at a 12% commission rate, to sell Jewelmont's Golden Mist line of jewelry. Haff was given an exclusive territory to sell the Golden Mist line to department **[**2]** stores and retail chain jewelry stores in the western United States. As Jewelmont's manufacturer's representative, Haff developed an account with defendant Mervyn's, Inc. ("Mervyn's"), a large California-based chain department store. Haff earns substantial commissions from Jewelmont's sales to Mervyn's prior to August 1, 1981.

On August 1, 1981, Jewelmont converted the Mervyn's account into a "house account." Under this arrangement, Jewelmont sold directly to Mervyn's, with no commissions payable to Haff. This action breached an alleged oral agreement between Haff and Jewelmont that Jewelmont would not convert any accounts developed by Haff into house accounts. Mervyn's was granted an 18% discount on these direct sales, or 6% more than Haff had been receiving in commissions prior to August 1, 1981. This 18% discount was not made available to other Jewelmont buyers.

Count I of the complaint alleges violations of § 2(c) of the Clayton Act, as amended by the Robinson-Patman Act, *15 **[*1470]** U.S.C. § 13(c) (1970)*, in that the discount to Mervyn's was "in lieu of" brokerage previously paid to Haff. Counts II through V are pendent state claims for conspiracy, intentional interference **[**3]** with business advantage, fraudulent misrepresentation, and negligent misrepresentation.

Jewelmont and Mervyn's have both moved to dismiss the antitrust claim on the ground that Haff does not allege the requisite competitive injury to confer standing under the antitrust laws. [1] In addition, Jewelmont argues that even if Haff does have standing, a manufacturer's conversion from the use of a broker to a direct selling arrangement, at a discount reflecting the elimination of commissions, does not without more constitute a violation of § 2(c).

[4]** Because the court concludes plaintiff lacks antitrust standing, the merits of this § 2(c) argument are not reached except to the extent necessary to resolve the standing issue.

II. DISCUSSION

A. *The Legislative Intent Behind § 2(c)*

Haff claims that the defendants' actions violated the "brokerage" provision of the Robinson-Patman Act, § 2(c) of the Clayton Act, as amended by the Robinson-Patman Act, *15 U.S.C. § 13(c) (1970)*. ***HN1***[] Section 2(c) provides:

> It shall be unlawful for any person engaged in commerce, in the course of such commerce, to pay or grant, or to receive or accept, anything of value as a commission, brokerage, or other compensation, or any allowance or discount in lieu thereof, except for services rendered in connection with the sale or purchase of goods, wares, or merchandise, either to the other party to such transaction or to an agent, representative, or other intermediary therein where such intermediary is acting in fact for or in behalf, or is subject to the direct or indirect control, of any party to such transaction other than the person by whom such compensation is so granted or paid.

The legislative history of § 2(c) establishes that **[**5]** the section was primarily designed to prohibit "dummy brokerage" arrangements by which large, institutional buyers would exercise their leverage to demand discounts under the guise of "brokerage." *See* H.R. Rep. No. 2287, 74th Cong., 2d Sess. 15 (1936). As the Supreme Court noted in its most comprehensive analysis of § 2(c):

> ***HN2***[] The Robinson-Patman Act was enacted in 1936 to curb and prohibit all devices by which large buyers gained discriminatory preferences over smaller ones by virtue of their greater purchasing power. A lengthy investigation revealed that large chain buyers were obtaining competitive advantages in several ways other than direct price concessions and were thus avoiding the impact of the Clayton Act. One of the favorite means of obtaining an indirect price concession was by setting up "dummy" brokers who are employed by the buyer and who, in many cases, rendered no services. The large buyers demanded that the seller pay "brokerage" to these fictitious brokers who then turned it over to their employer. This practice was one of the chief targets of § 2(c) of the Act.
>
> . . . .
>
> Congress enacted the Robinson-Patman Act to prevent sellers and sellers' brokers **[**6]** from yielding to the economic pressures of a large buying organization by granting unfair preferences in connection with the sale of goods.

FTC v. Henry Broch & Co., 363 U.S. 166, 168-69, 174, 4 L. Ed. 2d 1124, 80 S. Ct. 1158 (1960). By outlawing such indirect price concessions, Congress hoped "to force price discriminations [achieved by manipulation of brokerage fees and discounts] out into the open where they would be subject **[*1471]** to the scrutiny of those interested, particularly competing buyers." *Biddle Purchasing Co. v. FTC, 96 F.2d 687, 692 (2d Cir. 1938)*; *see also* *Allen Pen Co. v. Springfield Photo Mount Co., 653 F.2d 17, 25 (1st Cir. 1981)*.

---

[1] Both Jewelmont and Mervyn's also urge dismissal of the pendent state claims, since dismissal of the antitrust claim would leave this court without federal question jurisdiction. Because this court's jurisdiction obviously depends upon resolution of the antitrust standing issue, today's holding, that Haff lacks standing to sue under the antitrust laws, mandates dismissal of the entire complaint. The court does not thereby express any opinion as to the state causes of action.

B. *Antitrust Standing, Antitrust Injury, and § 4 of the Clayton Act*

Sec. 2(c) of the Clayton Act is the *substantive* provision which plaintiff claims establishes his entitlement to relief for an abuse of the brokerage function. Plaintiff confuses this section, which defines the anticompetitive conduct, with ***HN3***[] the procedural or remedial requirements of § 4 of the Clayton Act, *15 U.S.C. § 15* which gives the right to sue to a person injured "by reason of" an antitrust violation. *Cf. Brunswick Corp.* ***[**7]*** *v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 486, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)* ("Intermeshing a statutory prohibition against acts that have a potential to cause certain harms with a damage action intended to remedy those harms is not without difficulty.") Whether a party's interests are protected by the antitrust laws is analytically distinct from whether that party has standing to sue under the antitrust laws. As one antitrust scholar has remarked, "Even where there is a violation and an injury to competition, the plaintiff may still not be the 'right' person to complain of these acts." E. Kintner & J. Bauer, *Federal* ***Antitrust Law***, § 30.11, at 663 (1983).

HN4[] Whether one has standing to sue under the antitrust laws is determined by reference to § 4. This inquiry is not conducted solely in the vacuum of § 4. As the Supreme Court has pointed out in its recent efforts to lay down some specific guidelines for determining antitrust standing, "the question requires us to evaluate the plaintiff's harm, the alleged wrongdoing by the defendants and the relationship between them." *Associated General Contractors of California, Inc. v. California State Council of Carpenters* ***[**8]*** *, 459 U.S. 519, 103 S. Ct. 897, 907, 74 L. Ed. 2d 723 (1983)*. *See also Blue Shield of Virginia v. McCready, 457 U.S. 465, 482, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)* ("the injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation") (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. at 489*). Nevertheless, the inquiry begins with § 4, a provision wholly overlooked by plaintiffs.

The class of persons who may maintain a private action for treble damages under the antitrust laws is broadly defined in ***HN5***[] § 4 of the Clayton Act, *15 U.S.C. § 15*:

> Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

On its face, § 4 seems broad enough "to encompass every harm that can be attributed directly or indirectly to the consequences of an antitrust **[**9]** violation." *Associated General, 459 U.S. at 529, 103 S. Ct. at 904*. However, ***HN6***[] for a variety of reasons not the least of which is the fear that the lure of treble damages and attorney's fees would inundate the courts with spurious antitrust claims, the judiciary has consistently limited the scope of recovery under § 4. *Id. at 912* (citing *Illinois Brick Co. v. Illinois, 431 U.S. 720, 745, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977))*. *See also Calderone Enterprises Corp. v. United Artists Theatre Circuit, Inc., 454 F.2d 1292, 1295 (2d Cir. 1971)*. It is by now well-established that the "by reason of" language of § 4 imposes a standing requirement on private antitrust plaintiffs which requires proof of legal causation, similar to the concept of proximate cause in the law of torts, as a predicate to recovery. [2] Berger & **[*1472]** Bernstein, *An Analytical Framework for Antitrust Standing*, 86

---

[2] There has been a tremendous amount of confusion among courts and commentators as to the difference, if any, between the terms "antitrust standing" and "antitrust injury." *See, e.g., Ostrofe v. H.S. Crocker Co., Inc*., ("*Ostrofe I*"), *670 F.2d 1378, 1386 & n.23 (9th Cir. 1982)* (noting that the distinction between antitrust standing and antitrust injury is "unclear"), *vacated and remanded*, *460 U.S. 1007, 103 S. Ct. 1244, 75 L. Ed. 2d 475 (1983)* (remanding for reconsideration in light of *Associated General), 740 F.2d 739 (9th Cir. 1984)* ("*Ostrofe II*") (on remand). Many courts, including the Ninth Circuit, have regarded the two as opposite sides of the same coin, and have merged standing analysis with antitrust injury analysis. *See, e.g., Lupia v. Stella D'Oro Biscuit Co., Inc., 586 F.2d 1163, 1167-69* (7th Cir.), *cert. denied*, *440 U.S. 982, 60 L. Ed. 2d 242, 99 S. Ct. 1791 (1979)*; *John Lenore & Co. v. Olympia Brewing Co., 550 F.2d 495, 499-500 (9th Cir. 1977)*; *GAF Corp. v. Circle Floor Co., 463 F.2d 752 (2d Cir. 1972)*, *cert. denied*, *413 U.S. 901, 37 L. Ed. 2d 1045, 93 S. Ct. 3058 (1973)*; *but see* Handler, *Changing Trends in Antitrust Doctrines: An Unprecedented Supreme Court Term* -- 1977, 77 Colum. L. Rev. 979, 996-97 (1977) (arguing that antitrust injury and antitrust standing are "related, but, nonetheless, disparate doctrines"). The Supreme Court, in *Associated General*, has recently noted that "the focus of the doctrine of 'antitrust standing ' is somewhat different from that of standing as a constitutional doctrine," since "harm to the antitrust plaintiff is sufficient to satisfy the constitutional standing requirement of injury

Yale L.J. 809, 810-11 (1977); *see also* Associated General, 103 S. Ct. at 906-08. As the Supreme Court recently noted:

> ***HN7***[] An antitrust violation may be expected to cause ripples of harm to flow through the Nation's economy; but "despite the broad wording of § 4 there is **[**10]** a point beyond which the wrongdoer should not be held liable." [Citation omitted]. It is reasonable to assume that Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury to his business or property.

McCready, 457 U.S. at 476-77.

[11]** C. *The Evolution of Antitrust Standing*

Although there has been substantial agreement that § 4 imposes a standing requirement on private antitrust plaintiffs, the lower courts have not agreed as to the precise contours of antitrust standing analysis. Absent guidance from the Supreme Court, which has been provided only very recently, the lower courts have developed several different tests for determining antitrust standing. The Ninth Circuit, for example, has for many years applied the so-called "target area" test, under which the plaintiff "must show that he is within that area of the economy which is endangered by a breakdown of competitive conditions in a particular industry." *Conference of Studio Unions v. Loew's, Inc., 193 F.2d 51, 54-55 (9th Cir. 1951)*, *cert. denied*, *342 U.S. 919, 96 L. Ed. 687, 72 S. Ct. 367 (1952)*; *accord, Pan-Islamic Trade Corp. v. Exxon Corp., 632 F.2d 539, 546-47 (5th Cir. 1980)*; *Engine Specialties, Inc. v. Bombardier Ltd., 605 F.2d 1, 17-18 (1st Cir. 1979)*; *Calderone Enterprises Corp. v. United Artists Theatre Circuit, Inc., 454 F.2d at 1295*. This approach focuses on both the directness of the plaintiff's injury and the intention **[**12]** of the antitrust violator to injure the plaintiff: "The rule is that one who is **[*1473]** only *incidentally* injured by a violation of the antitrust laws -- the bystander who was hit but not aimed at -- cannot recover against the violator." *Karseal Corp. v. Richfield Oil Corp., 221 F.2d 358, 363 (9th Cir. 1955)*.

Both parties to the instant case implicitly assumed in their briefs that the "target area" approach to standing is still the test to be applied by courts in the Ninth Circuit. As discussed *infra*, however, the Supreme Court's recent decisions in *Associated General, 103 S. Ct. at 907-08 n.31* and *McCready, 457 U.S. at 476-79 n.12, 13, 14* and 15, demonstrate that there is little vitality left to the "target area" approach to antitrust standing. The lesson of these most recent cases is that formalistic tests are disfavored and the totality of the circumstances must be considered in light of the principles in these cases. Even this Circuit now disagrees as to its commitment to the "target area" test.

---

in fact, but the court must make a further determination whether the plaintiff is a proper party to bring a private antitrust action." *103 S. Ct. at 907 n.31*.

The indiscriminate merging of the two doctrines may sometimes generate analytical confusion; however, the distinction seldom, if ever, makes a practical difference. The primary difference between "antitrust standing" and "antitrust injury" is the point in the proceedings where the plaintiff's right to recover under the antitrust laws is challenged. To say that a plaintiff lacks "standing" is to say that there is no set of facts which could be adduced at trial to show the requisite competitive injury; this decision can be made on a motion to dismiss. To say that a plaintiff has not proved "antitrust injury," on the other hand, is to say that plaintiff has not satisfied the burden of showing that he or she has been injured "by reason of" the antitrust laws. In most cases, this decision cannot be made until after trial. Hence one may have "standing" sufficient to survive a motion to dismiss, yet be unable to prove "antitrust injury" at trial. This may be why the Supreme Court spoke of "antitrust injury" in *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*, a case which went to trial, while it spoke of "antitrust standing" in *Blue Shield of Virginia v. McCready, 457 U.S. 465, 477, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*, a case decided on the basis of a motion to dismiss. There is no indication in *Associated General*, that the Court regards the difference between the two concepts as having any practical significance, and therefore this court refers to "antitrust standing" in this case in its present posture. As discussed above, *McCready* and *Associated General* make it clear that antitrust injury must be looked at in order to evaluate antitrust standing.

Compare Parks v. Watson, 716 F.2d 646, 658 (9th Cir. 1983) ("We have used the 'target area ' approach . . . .") with *Ostrofe v. H.S. Crocker Co., Inc*., **[**13]** ("*Ostrofe I*"), 670 F.2d 1378, 1382-83, n.7 (9th Cir. 1982), vacated and remanded, *460 U.S. 1007, 103 S. Ct. 1244, 75 L. Ed. 2d 475 (1983)* (remanding for reconsideration in light of *Associated General*), *Ostrofe v. H.S. Crocker Co., Inc*., ("*Ostrofe II*"), 740 F.2d 739 (9th Cir. 1984) (on remand). [3]

[14]** Other circuits have focused exclusively on the directness of the injury, *see, e.g.,* Reibert v. Atlantic Richfield Co., 471 F.2d 727, 731 (10th Cir. 1973), while still others have looked to see whether the injury is "arguably within the zone of interests protected by the antitrust laws." Malamud v. Sinclair Oil Corp., 521 F.2d 1142, 1151-52 (6th Cir. 1975). More recently, the Third Circuit adopted a "balance of factors" test which combines the direct injury test with a policy analysis. Bravman v. Bassett Furniture Industries, Inc., 552 F.2d 90, 99-100 (3d Cir. 1977).

Only recently has the Supreme Court attempted to provide some guidance to the lower courts as to the factors to be examined in determining whether a given plaintiff's injury is sufficiently related to an antitrust violation to confer a private cause of action under the antitrust laws. Beginning with Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977), which clearly imposed a competitive injury requirement on all private antitrust suits, and continuing with McCready, 457 U.S. at 465 (1982) and Associated General, 459 U.S. 519, 103 S. Ct. at 897 (1983), **[**15]** the Supreme Court has refined the various tests employed by the lower courts and adopted a unitary, more flexible approach to antitrust standing.

Brunswick involved a claim by certain operators of bowling alleys that Brunswick **[*1474]** Corp.'s acquisition of competing bowling centers violated § 7 of the Clayton Act, since "because of its size, [Brunswick] had the capacity to lessen competition in the markets it had entered by driving smaller competitors out of business." 429 U.S. at 481. Plaintiffs alleged lost profits on the theory that if Brunswick had not merged with the local bowling centers, these centers would have gone out of business and plaintiffs' profits would therefore have been greater. *Id*.

In holding that § 4 did not allow private damage suits for such injury, the Court clearly related recovery under § 4 to proof of competitive injury:

> While respondents' loss occurred "by reason of" the unlawful acquisitions, it did not occur "by reason of" that which made the acquisitions unlawful. . . . ***HN8***[] For plaintiffs to recover treble damages [under § 4] on account of § 7 violations, they must prove more than injury causally linked to an illegal presence **[**16]** in the market. Plaintiffs must prove *antitrust* injury, which is to say injury of the type the antitrust laws were intended

[3] Despite the clear disfavor shown by the Supreme Court for these formalistic tests and the adoption of a multifactor test, despite the application of such a test just eight days earlier in Chelson v. Oregonian Publishing Co., 715 F.2d 1368 (9th Cir. 1983) and despite its acceptance by the Circuit once again in Solinger v. A. & M. Records, Inc., 718 F.2d 298 (9th Cir. 1983), another panel of this Circuit proceeded to use the "target area" test saying that:

> If no clear answer emerges [from this analysis] we must determine standing by balancing competing policy interests, principally those of effective enforcement of the antitrust laws on the one hand and avoiding vexatious litigation and excessive liability on the other. Parks v. Watson, 716 F.2d 646, 659 (9th Cir. 1983) citing *Ostrofe I* and *Associated General*.

Now apparently in *Ostrofe II* some form of the *Associated General* analysis has been adopted. *Ostrofe II* placed particular emphasis on McCready, 457 U.S. 465, 73 L. Ed. 2d 149, 102 S. Ct. 2540. Curiously, under the "target area" approach it is difficult to see how plaintiff McCready could have survived a standing challenge. She was not a direct target; the targets were the psychologists. Unless the "target area" was defined without perimeters, *McCready* would find herself out of court in "target area" jurisdictions.

In any event, it makes no difference to the outcome of this case whether we employ the "target area" approach or the multifactor approach of *Associated General*, since even under the "target area" test it is clear that Haff, being a competitor of neither Jewelmont nor Mervyn's, is not within "that area of the economy which is endangered by a breakdown of competitive conditions." Conference of Studio Unions v. Loew's, Inc., 193 F.2d at 54-55. Moreover, though Haff has certainly been "hit," there is no allegation that he has been "aimed at." *See* Karseal Corp. v. Richfield Oil Corp., 221 F.2d at 363-64.

> to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the *anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation*.

429 U.S. at 488-89 (emphasis added). The Court pointed out that plaintiffs' injury -- the loss of income which would have accrued had the acquired centers gone bankrupt -- was completely unrelated to the potential anti-competitive effects which made the merger unlawful under § 7:

> Respondents would have suffered the identical "loss" -- but no compensable injury -- had the acquired centers instead obtained refinancing or been purchased by "shallow pocket" parents . . . Conversely, had petitioner acquired thriving centers -- acquisitions at least as violative of § 7 as the instant acquisitions -- respondents would not have lost any income that they otherwise would have received.

429 U.S. at 487 & n.12. ***HN9***[] Since the alleged injury was not of "the type that the statute was intended to forestall," 429 U.S. at 487-88 (quoting **[**17]** *Wyandotte Co. v. United States, 389 U.S. 191, 202, 19 L. Ed. 2d 407, 88 S. Ct. 379 (1967))*, recovery under § 4 was unauthorized.

The Court expanded on this theme in *McCready, 457 U.S. 465, 73 L. Ed. 2d 149, 102 S. Ct. 2540*, and in so doing took an important step in clarifying antitrust standing analysis. *McCready* involved a claim by a group health plan subscriber that she had been injured by a conspiracy between Blue Shield and an organization of Virginia psychiatrists to restrain competition in the psychotherapy market. The health plan allowed reimbursement for services performed by psychiatrists, but denied reimbursement for comparable work performed by psychologists unless such claims were billed to a physician. Plaintiff was thus faced with a "Hobson's choice" in that she was compelled to choose between visiting a psychologist and forfeiting reimbursement under the plan, or receiving reimbursement by foregoing treatment by the practitioner of her choice. 457 U.S. at 483.

The Court, examining the record on a motion to dismiss, held that the plaintiff had standing to sue under § 4 for the alleged violation. ***HN10***[] In evaluating whether the alleged injury was "too remote" **[**18]** to confer standing, quoting *Illinois Brick Co. v. Illinois, 431 U.S. 720, 728 n.7, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*, the Court looked at two factors: "(1) the physical and economic nexus between the alleged violation and the harm to the plaintiff; and (2), the relationship of the injury alleged with those forms of injury about which Congress was likely to have been concerned in making defendants' conduct unlawful. . . ." *McCready, 457 U.S. at 477-78*. [4]

[*1475] With regard to the first factor, the Court **[**19]** found that plaintiff's alleged injury was an integral aspect of the conspiracy, since the denial of reimbursement to consumers was the "very means by which it is alleged that Blue Shield sought to achieve its illegal ends." 457 U.S. at 479. The Court rejected defendants' argument that only participants in the group health care market -- in other words, competitors of the defendants -- had standing to sue.

With regard to the second factor, the Court concluded that McCready's alleged injury was "inextricably intertwined" with the injury the alleged conspirators sought to inflict on psychologists and the psychotherapy market. Quoting from *Brunswick*, the Court found that McCready's alleged injury fell squarely within the area of congressional concern in passing § 1 of the Sherman Act, and therefore "flowed from that which [made] defendants' acts unlawful." 457 U.S. at 484, quoting *Brunswick, 429 U.S. at 489*.

The Court's most recent explication of antitrust standing principles is found in *Associated General. Associated General* does not represent a departure from *McCready*. It merely amplifies upon the considerations spelled out in *McCready* and gives further direction **[**20]** to the lower courts. Once again the Supreme Court discouraged the use of a formalistic test and emphasized the need for a case-by-case analysis. The court denied standing to plaintiff unions (the "Union") which alleged that an employer's association had coerced certain third parties to enter into

---

[4] The Court specifically refused to consider the propriety of any of the various tests employed by the lower courts to determine antitrust standing: "We have no occasion here to evaluate the relative utility of any of these possibly conflicting approaches toward the problem of remote antitrust injury." 457 U.S. at 476 n.12. As discussed infra, however, the Court in *Associated General* resolved the "conflicting approaches" of the circuits by adopting its own unitary, multifactor analysis.

business relations with nonunion firms, in violation of § 1 of the Sherman Act. The Union alleged that this coercion adversely affected the trade of certain unionized firms, and thus restrained the Union's business activities.

In discussing § 4 of the Clayton Act, the Court stated that ***HN11***[] the issue of whether a private antitrust plaintiff may recover treble damages under § 4 "requires us to evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them." *103 S. Ct. at 907*. Observing that the various tests employed by the lower courts for determining standing "may lead to contradictory and inconsistent results," *id. at 907-08 n.33*, the Court substituted a flexible, multifactor analysis in an attempt to bring some coherence to the complicated area of antitrust standing.

HN12[] The Court discussed three factors to be used in exploring the relationship **[**21]** between the plaintiff's harm and the defendants' alleged wrongdoing. First, it must be determined whether the alleged injury "was of a type that Congress sought to redress in providing a private remedy for violations of the antitrust laws." *Id. at 909*, *citing McCready, 102 S. Ct. at 2550*, and *Brunswick, 429 U.S. at 488-89*. In applying this factor to the case at hand, the Court noted that the antitrust laws were enacted for the protection of competition, and, in contrast to the health plan subscriber in *McCready*, "the Union was neither a consumer nor a competitor in the market in which trade was restrained . . . Moreover, it has not even alleged any marketwide restraint of trade." *103 S. Ct. at 909* & n.40. The Court further distinguished *McCready* on the ground that the Union's alleged injury was not "inextricably intertwined" with the competitive restraint giving rise to the antitrust violation, since "it [was] not clear whether the Union's interests would be served or disserved by enhanced competition in the market." *Id*. [5]

[22]** ***HN13***[]

[*1476] A second factor to be examined in each case is the "directness or indirectness of the asserted injury." *Id. at 910*. In contrast to the consumer's injury in *McCready*, which was a direct result of the alleged conspiracy between Blue Shield and the psychiatric organization, the Union's alleged injuries "were only an indirect result of whatever harm may have been suffered by 'certain' contractors and subcontractors." *Id*. Moreover, because of the absence of specific allegations in the complaint demonstrating the causal connection between the Union's injuries and the alleged group boycott, the Court found that the Union's damages claim was "highly speculative." *Id. at 911*.

HN14[] A final, somewhat related factor is whether the damages sought would create "the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other." *Id. at 912*, citing *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968)* and *Illinois Brick Co. v. Illinois, 431 U.S. 720, 737-38, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*. The Court found that the

---

[5] The Ninth Circuit, in the recent case of *Chelson v. Oregonian Publishing Co., 715 F.2d at 1371*, suggested in dicta that whether an antitrust plaintiff's interests "would be served or disserved by enhanced competition in the market" is a factor to be examined in each case under the analysis set forth in *Associated General. Chelson* involved an antitrust action brought by certain news dealers who alleged that defendant newspaper publisher had violated the Sherman Act by selling newspapers to dealers on the condition that they refuse to deal with the publisher's competitor. Although the Ninth Circuit remanded for determination of further facts, and hence did not directly decide the issue, some of the court's language could be construed to mean that a private antitrust plaintiff who is neither a consumer nor a competitor in the relevant market would have standing under *Associated General* provided his or her interests "would be served by enhanced competition in that market." *Id*.

This court does not attach much significance to this language. Many individuals benefit from increased competition in a given market, but this has never been enough to confer standing. Neither *Associated General* nor *Chelson* stands for a rule that any person, no matter how tangentially he or she might benefit from increased competition in a given market, has standing to complain of an antitrust violation. Rather, if any rule emerges from *Associated General*, it is that only consumers or competitors in a relevant market who are injured "by reason of" an antitrust violation have standing to sue under § 4.

Actually this language appears to come from *Associated General's* analysis of the plaintiff union which, it noted, was neither a competitor nor a consumer. The Court noted in passing that it was not clear how the interest of the union would be served by increased competition. This made it all the more clear that the union's injury, if any, was not the result of any anti-competitive conduct contemplated by the antitrust laws, but rather was the result of its labor interest protected by the labor laws.

Union's complaint, if allowed to stand, **[**23]** would burden the district court with the task "of identifying damages and apportioning them among directly victimized contractors and subcontractors and indirectly affected employees and union entities." *103 S. Ct. at 912*. The difficulty of such apportionment created a risk of ***HN15***[] duplicative recovery, which is contrary to public policy. *Id. at 911-12*.

D. *The Application of Current Antitrust Standing Analysis to the Facts of the Present Case*

When the facts of the present case are examined in light of the principles developed in *Brunswick, McCready* and *Associated General*, there can be no doubt that the complaint must be dismissed for failure to state a claim upon which relief may be granted. Although Haff's injury is certainly a direct consequence of defendants' alleged anti-competitive conduct, thus satisfying one of the criteria set forth in *Associated General* and earlier antitrust standing cases, [6] the nature of Haff's injury is completely independent of any antitrust violation. Hence his injury is not of the type Congress sought to prevent in allowing private actions under the antitrust laws. Moreover, because Haff's alleged damages overlap whatever damages **[**24]** might be claimed by injured competitors of Mervyn's, there is a risk of duplicative recovery which counsels against allowing this action to proceed.

[*1477] 1. *The Nature of Haff's Alleged Injury*

Haff claims that he has lost substantial commissions as a result of Jewelmont's conversion of the Mervyn's account into a "house account." The complaint alleges that not only did this action breach an oral agreement **[**25]** between Haff and Jewelmont, but the subsequent 18% discount to Mervyn's is said to violate § 2(c) since it constitutes a discount "in lieu of" brokerage previously paid to Haff.

The fact of the matter, however, is that Haff's injury -- lost commissions -- has nothing whatsoever to do with the alleged antitrust violation, and hence is not "of a type that Congress sought to redress in providing a private remedy for violations of the antitrust laws." *Associated General, 103 S. Ct. at 909*, citing *McCready, 457 U.S. at 483*, and *Brunswick, 429 U.S. at 488-89*. To illustrate this point, the injury to Haff would have been precisely the same if Jewelmont had converted *all* of its accounts to "in-house" accounts and had not granted preferential treatment to Mervyn's. Haff would still have lost his commissions, but there would have been no violation of § 2(c). *See FTC v. Henry Broch & Co., 363 U.S. 166, 176, 4 L. Ed. 2d 1124, 80 S. Ct. 1158 (1960)* (stating in dicta that a price reduction based upon savings in brokerage expenses does not violate § 2(c) if given to all customers). To further illustrate the independence of Haff's injury and the injury to competition which is **[**26]** the gravamen of § 2(c) violation (or of *any* antitrust violation, for that matter), if Jewelmont had *not* converted the Mervyn's account but had instead paid Mervyn's a disguised rebate, Haff would not have been injured at all, yet there would still be a violation of § 2(c). This analysis is precisely the same as in *Brunswick*, where the Court noted that plaintiffs' alleged injury -- the loss of profits which would have been earned had the acquired bowling centers gone bankrupt -- was completely unrelated to the potential anticompetitive effects which made the "deep-pocket" merger unlawful under § 7 of the Clayton Act. This is reinforced by the reasoning in *Lupia v. Stella D'Oro Biscuit Co., Inc., 586 F.2d 1163, 1169* (7th Cir.), *cert. denied*, *440 U.S. 982, 60 L. Ed. 2d 242, 99 S. Ct. 1791 (1979)*, where the Seventh Circuit held that an exclusive distributor did not have standing to sue regarding a 5% discount paid directly to favored buyers and charged back to the distributor, since "the defendant's anticompetitive action, the 5 percent rebate to chain stores, would have been equally anticompetitive if plaintiff had not been required to absorb it."

HN16[] Haff, like the **[**27]** Union in *Associated General* "was neither a consumer nor a competitor in the market in which trade was restrained." *Associated General, 103 S. Ct. at 909*. Haff has not alleged, nor could he allege, that he is a participant in either the seller's (Jewelmont) or the buyer's (Mervyn's) market. Moreover, Haff "has not even alleged any marketwide restraint of trade." *Id. at 909 n.40*. [7] For this reason alone, Haff must be denied

---

[6] In discussing the factors to be examined in determining whether a given plaintiff has standing to sue under § 4, the Court in *Associated General* did not attempt to rank these factors in terms of their relative importance. However, this court is of the opinion that the directness of a plaintiff's injury is a far less salient variable than the relationship between the injury and the antitrust violation. Not only is this suggested by the manner in which these factors were discussed in *Associated General*, but it is also suggested by the Court's reasoning in *Brunswick* and *McCready*.

standing to sue for the alleged antitrust violation. Though he may have been injured "by reason of" defendants' actions, he was not injured "by reason of" that which made defendants' actions unlawful. **[*1478]** *See Brunswick, 429 U.S. at 489*.

[28]** 2. *Risk of Duplicative Recovery*

HN17[] A second reason why Haff must be denied standing in this case is because an award of damages to Haff would implicate the important public policy concern of avoiding the risk of duplicative recoveries. *Associated General, 103 S. Ct. at 912*; *see also Illinois Brick Co. v. Illinois, 431 U.S. 720, 737, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*; *Hawaii v. Standard Oil Co., 405 U.S. 251, 31 L. Ed. 2d 184, 92 S. Ct. 885 (1972)*. This is due to the fact that any recovery by Haff would significantly, if not completely, duplicate actual damages claimed in future actions by direct competitors of Mervyn's under § 2(a) of the Robinson-Patman Act, [8] since Haff's lost commissions (12%) constitute a substantial portion of the price determination (18%) allegedly allowed to Mervyn's. Were we to allow Haff to maintain this action, Jewelmont would be exposed to the "risk of multiple liability" from future § 2(a) lawsuits. *Illinois Brick, 431 U.S. at 737 n.18*.

[29]** E. *Prior § 2(c) Standing Cases*

Today's holding, that Haff lacks standing to sue under the antitrust laws for the alleged violation of § 2(c), is consistent with every single case which has previously addressed this issue. *See, Larry R. George Sales Co. v. Cool Attic Corp., 587 F.2d 266, 270-72 (5th Cir. 1979)*; *J.F. Reed Co., Inc., et al. v. K-Mart Corp.*, 1982-1 Trade Cases PP 64,499-500 (E.D. Mich. 1981); *Green Bay Packaging, Inc. v. Hoganson & Associates, Inc., 362 F. Supp. 78, 82 (N.D. Ill. 1973)*; *Robinson v. Stanley Home Products, Inc., 178 F. Supp. 230 (D. Mass. 1959)*, *aff'd*, *272 F.2d 601, 603-04 (1st Cir. 1959)*. These cases all stand for the proposition that ***HN18***[] an eliminated middleman has not suffered the requisite competitive injury to maintain a private action for treble damages under § 4 for an alleged violation of § 2(c) of the Robinson-Patman Act.

Robinson v. Stanley Home Products, Inc., is squarely on point. Plaintiff was a manufacturer's representative with an exclusive territory in the New England area to sell defendant's products. After the representative had secured two orders from a large buyer, the seller terminated him and dealt **[**30]** directly with the buyer. As in the present case, the plaintiff alleged that the price paid by the buyer for the direct sales was discriminatory. The district court held that plaintiff had failed to state a claim under § 2(c): ***HN19***[] "The reduction or elimination of a commission or brokerage fee payable by the seller to its own agent to enable the seller to sell at a lower price is not forbidden by [§

---

[7] Like the Union's in *Associated General*, it is also unclear whether Haff's interests would be served or disserved by increased competition in either the seller's (Jewelmont) or the buyer's (Mervyn's) market. If, for example, Jewelmont were the sole seller of jewelry, it could presumably charge a higher price for its products reflecting its monopoly power. Whether this would benefit Haff, as manufacturer's representative earning a 12% commission on all sales, would clearly depend upon the elasticity of demand for jewelry in the applicable price range. If a 10% price increase generated a decrease in jewelry sales of more than 10%, Jewelmont's total revenues, and hence Haff's commissions, would decline. Conversely, if the same 10% price increase caused *less* than a 10% decline in volume, Haff's commissions would increase. A similar result would obtain were Mervyn's the sole buyer of jewelry, and it attempted to exercise its monopsony power to lower the market price of jewelry. Unlike the health plan subscriber in *McCready, 457 U.S. at 484*, Haff's alleged injury is not "inextricably intertwined" with the competitive restraint giving rise to the § 2(c) violation, since the extent to which Haff would benefit or suffer from increased competition is unclear.

[8] Section 2(a) of the Clayton Act, as amended by the Robinson-Patman Act, *15 U.S.C. § 13(a) (1970)*, provides, in pertinent part:

> It shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality, where either or any of the purchases involved in such discrimination are in commerce . . . and where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them. . . .

2(c)]." 178 F. Supp. at 232. The court went on to note that HN20[] even if defendants' conduct did constitute a violation of § 2(c), plaintiff nonetheless could not recover under § 4. The court's reasoning is persuasive:

> The only specific injury [plaintiff] sets forth is that he has not been paid commissions due to him . . . Failure to pay these commissions would have no conceivable connection with any subsequent violation of the antitrust laws. . . .
>
> Only one who has been directly injured by a violation of the antitrust laws is entitled to recover damages under § 15. Persons whose only loss is from the interruption or diminution of a profitable relationship with a party directly affected by the violation have been held to have been injured only remotely and indirectly. [Citations **[**31]** and footnote omitted].
>
> It is difficult to see how in this case the claimed injury could be considered **[*1479]** the direct result of the alleged violation. Assuming that Plura sold cups to Stanley at a lower price than it charged competitors of Stanley, this price differential was not the cause of plaintiff's loss of his commission . . . If under his agreement with Plura plaintiff was entitled to the exclusive right to sell to Stanley or was entitled to commissions on all sales to Stanley even though he played no part in them, then his injury was caused by Plura's breach of contract, or possibly by wrongful interference by Stanley with his contractual relationship with Plura. The lower price allowed to Stanley by Plura may have been a source of injury to some competitor of Stanley. It did not cause plaintiff's injury. The fact that elimination of plaintiff's commission may have been economically a condition precedent to the granting of a lower price by Plura does not make the failure to pay that commission a result of the lower price.

Id. at 233.

The First Circuit affirmed, agreeing that HN21[] the granting of a price reduction following a seller's conversion to a direct **[**32]** selling arrangement does not, without more, constitute a violation of § 2(c). 272 F.2d at 603-04. *Robinson* was cited with approval by the Supreme Court in FTC v. Henry Broch & Co., Inc., 363 U.S. at 176 n.18 (1960).

Similarly, in *Larry R. George Sales Co. v. Cool Attic Corp*., plaintiff, a manufacturer's representative for a producer of attic fans, alleged that defendant had violated § 2(c) by paying a commission to a broker under the buyer's control instead of to plaintiff. Relying upon *Robinson* and the Ninth Circuit's "target area" standing test, the Fifth Circuit held that the eliminated manufacturer's representative lacked standing to sue under the antitrust laws since his alleged injury was not competitive in nature:

> The alleged anti-competitive conduct of Defendants was "targeted" at the attic fan and ventilator industry. The alleged illegality on the part of Defendant Cool Attic, even if proved, would have anti-competitive effect only upon that industry. The Plaintiff George would be damaged, if at all, by the ripple effects of the antitrust violation alleged. HN22[] Congress did not intend the antitrust laws to provide a remedy in damages for all injuries **[**33]** which might be conceivably traced to an antitrust violation.
> . . . .
>
> This Court is in agreement with Judge Singleton's holding in Computer Statistics, Inc. v. Blair, 418 F. Supp. 1339 (S.D. Tex. 1976), that HN23[] some anti-competitive effect is necessary to maintain an action under 15 U.S.C. § 13(c) . . . Only if Plaintiff was in the same business and in competition with S.S. Kresge Co. or the Defendants would he have standing under 15 U.S.C. § 15 . . . Like the Plaintiff in *Robinson v. Stanley Home Products*, Plaintiff George may well have suffered an economic loss as a result of Defendant's actions. The non-competitive nature of that loss, however, is fatal to George's attempt to maintain an action under 15 U.S.C. § 13(c).

587 F.2d at 272.

These cases, though decided before *Brunswick, McCready* and *Associated General*, are consistent with them. This court finds no case holding that a broker or manufacturer's representative eliminated by conversion to direct selling has standing to sue for an alleged violation of § 2(c). Accordingly, under both the general standards announced by the Supreme Court and the specific cases discussed above, Haff lacks standing **[**34]** to bring this action. Accordingly,

IT IS HEREBY ORDERED that the complaint be DISMISSED with prejudice in its entirety.

Antitrust & Trade Law > Sherman Act > General Overview

HN1[] Antitrust & Trade Law, Sherman Act

15 U.S.C.S. § 2 reads every person who shall monopolize any part of the trade or commerce among the several states shall be deemed guilty of a misdemeanor.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > State Regulation

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

HN2[] Monopolies & Monopolization, Actual Monopolization

See Hawaii Rev. Stat. § 480-9.

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] Antitrust & Trade Law, Sherman Act

So far as the Sherman Act is concerned, the words "trade or commerce between the several States" would seem to exclude land because land obviously cannot be a part of the trade or commerce between the "several States."

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN4[] Public Enforcement, State Civil Actions

The Hawaii antitrust statute forbids the monopolization of trade or commerce in any "commodity." In common parlance the word "commodity" is not used to describe real estate, and the dictionaries, both general and legal, defining "commodity" use the words "personal" and "movable" and do not use the term "real estate".

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN5[] Public Enforcement, State Civil Actions

The Hawaii Legislature defines the word "commodity" to include "any other business." *Hawaii Rev. Stat. § 480-1(1)*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Real Property Law > Ownership & Transfer > Public Entities

HN6[] Monopolies & Monopolization, Actual Monopolization

An owner of land has monopoly power over his land. He may charge for it what he will or withhold it from the market if he so desires. He is under no compulsion to use the land for the public benefit or sell it at a price that someone can afford to pay. It is obvious that the ownership of land is not in itself illegal despite the monopoly power that goes with it.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > Professional Associations

HN7[] Monopolies & Monopolization, Actual Monopolization

Mere size does not make a monopoly illegal.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Real Property Law > Ownership & Transfer > Public Entities

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > General Overview

HN8[] Monopolies & Monopolization, Attempts to Monopolize

Monopoly power, whether lawfully or unlawfully acquired, may itself constitute an evil and stand condemned under 15 U.S.C.S. § 2 even though it remains unexercised. For § 2 of the Act is aimed, inter alia, at the acquisition or retention of effective market control.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN9[] Monopolies & Monopolization, Actual Monopolization

For an antitrust violation, size does not determine guilt; that there must be some "exclusion" of competitors; that the growth must be something else than "natural" or "normal"; that there must be a "wrongful intent," or some other specific intent; or that some "unduly" coercive means must be used.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN10[] Actual Monopolization, Anticompetitive & Predatory Practices

The use of monopoly power to foreclose competition, to gain a competitive advantage, or to destroy a competitor, is unlawful.

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] Antitrust & Trade Law, Sherman Act

The Sherman Act does not make mere size nor continued exercise of its lawful power an offense when that size and power have been obtained by lawful means and developed by natural growth, absent the manifest purpose or intent to exclude competition.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Contracts Law > Types of Contracts > Lease Agreements > General Overview

Real Property Law > Landlord & Tenant > Lease Agreements > Residential Leases

HN12[] Summary Judgment, Burdens of Proof

On a motion for summary judgment after there has been extensive discovery, the plaintiffs must be able to support their theories by showing some evidence on which a fact finding might be based.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN13[] Monopolies & Monopolization, Conspiracy to Monopolize

The plaintiff need not show explicit contractual agreements in order to prove a conspiracy, but it must demonstrate more than that the alleged co-conspirators engaged in a course of conduct, even if conscious of each other's parallel behavior, in which they would have engaged regardless of the others' conduct.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN14[] Tying Arrangements, Sherman Act Violations

A court, in considering a tying case, should regard the injury to competition in the tied product as a factor.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Antitrust & Trade Law > Federal Trade Commission Act > Scope

HN15[] Regulated Practices, Trade Practices & Unfair Competition

Hawaii Rev. Stat. § 480-2 provides that unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are unlawful.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN16[] Public Enforcement, State Civil Actions

In construing *Hawaii Rev. Stat. § 480-2* the courts will be guided by the interpretations given by the Federal Trade Commission and the federal courts to section 5(a)(1) of the Federal Trade Commission Act.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN17[] Private Actions, Standing

Hawaii Rev. Stat. § 480-13 provides a private remedy for violations of the *Hawaii Rev. Stat. § 480-9*.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN18[] Supplemental Jurisdiction, Pendent Claims

Unless there is pendent jurisdiction over the claim made under state law, the court is without jurisdiction, since the court has disposed of the claims made under federal law.

Counsel: [1]** Albin H. Goldstein, Charles J. Wisch, San Francisco, California, for Plaintiff.

Martin Anderson, Mark B. Desmarais, Goodsill, Anderson, Quinn & Stifel, Honolulu, Hawaii, for Castle Defendants.

Michael C. Webb, Lawrence S. Okinaga, Honolulu, Hawaii, for indispensable parties, State Savings & Loan Association and Oahu Education Employees Federal Credit Union.

Harold W. Nickelsen, G. Richard Morry, J. Stephen Street, Honolulu, Hawaii, for Bishop Estate.

Judges: Smith, District Judge.

Opinion by: SMITH

Opinion

[*1481] Smith, District Judge.

BACKGROUND

This case, in which motions and cross-motions for summary judgment have been filed, presents difficult problems relating to land usage in Hawaii. The Hawaii Legislature has been considering these problems for over two decades and in 1967 enacted the Hawaiian Land Reform Act (Act), Hawaii Rev. Stat., ch. 516, which permits the State under some circumstances to condemn the fee of leased lands and transfer the fee to the lessees of the land. The Supreme Court of the United States in *Hawaii Housing Authority v. Midkiff, 467 U.S. 229, 104 S. Ct. 2321, 81 L. Ed. 2d 186 (1984)*, held that the State land oligopoly, traceable to the monarch, **[**2]** could be regulated and that the Act was constitutional.

In this case the plaintiffs Chun and Merseberg seek relief from the defendants under the Sherman and Clayton Acts, and their Hawaii equivalents and the Hawaii Fair Trade Statutes, because of dealings with the Bishop Estate. [1] In 1966 Chun and Merseberg leased separate residential sites **[*1482]** in the Halawa Valley Estates on Oahu. The Bishop Estate owned the land and leased it to American Factors, which in turn subleased it. Ultimately one Ujimori built houses on the land, and it was he who dealt with the plaintiffs here. The plaintiffs entered into two separate agreements -- one for the purchase from Ujimori of the house and the off-site improvements and the other for the lease of the land. Except for the names and dates, the plaintiffs' leases are identical. Parties to the leases are the Bishop Estate and a joint venture consisting of Central Oahu Land Company and Hawaiian Pacific Industries, lessors, and the plaintiffs, lessees. The terms of the leases are 55 years. The lease rents are $165 per year for forty years; the rents for the remaining fifteen years are to be determined by agreement or by arbitration. There **[**3]** are options to extend the leases, and the rents during the periods of extension are to be similarly determined by agreement or by arbitration. The arbitrations are to some extent controlled by specific formulae. The plaintiffs are to pay all taxes and levies for special improvements, and at the end of the term are privileged to remove all buildings. The effect of all of this is that upon the termination of the leases the lands together with all off-site improvements will revert to the Bishop Estate.

The plaintiffs' transactions were typical of the manner in which the Bishop Estate lands were subdivided and sold, and while the Bishop Estate played no active role in the subdivision of the lands, the construction of off-site improvements, and the construction of the houses, **[**4]** it is clear that the Bishop Estate orchestrated all that was done.

A jury might find that most people desiring to buy homesites on Oahu could not readily find fee land which they could acquire or lease land upon which they themselves could build. A jury might likewise find that the Bishop Estate developed its land as it did because it believed that, for tax and other reasons, it was economically

[1] While the third amended complaint charges the Castle defendants with monopoly, there is no evidence of such, and the plaintiffs do not argue that there is. The fourth amended complaint omits the monopoly charges against the Castle defendants.

advantageous to lease the land rather than to sell it. A jury might also find that these practices resulted in excessive prices and that the Bishop Estate was motivated by profit.

Assuming that the Bishop Estate plan is antisocial, results in excessive prices, and that on the expiration of the leases many leaseholders will suffer some hardship, still the question remains: Were the antitrust laws violated?

THE MONOPOLIZATION CLAIM

HN1[] In 1966 *Section 2* of the Sherman Act, *15 U.S.C. § 2*, read: "Every person who shall monopolize . . . any part of the trade or commerce among the several States . . . shall be deemed guilty of a misdemeanor. . . ."

HN2[] *Hawaii Rev. Stat. § 480-9* reads: "No person shall monopolize, or attempt to monopolize, or combine or conspire with any other person to monopolize **[**5]** any part of the trade or commerce in any commodity in any section of the State."

Assuming for purposes of this opinion that the sections of the federal and Hawaii statutes dealing with monopolization apply to land, [2] still the rationale of the monopoly cases is difficult to apply when the subject of the monopoly is land. The ordinary antitrust case involves dealings for goods. The market in cameras, for example, is the **[*1483]** combined willingness of all people to buy cameras. That combined willingness to buy may vary as the quality and price vary. The theory is that competition is healthy and results in lower prices. Each competitor's share of the market depends upon his price and quality. As a competitor's share of the market increases, the share of some of his competitors decreases. One competitor with market power may create impediments which prevent other competitors from entering the market. Not so when the subject matter is land. The quantity of land is finite. That quantity does not increase or decrease as the price fluctuates. Landowners may compete in price, and one may sell more land than another at a given time; but normally what one landowner does with his own land **[**6]** does not prevent any other landowner from doing what he will with his own land.

[7]** An owner of land has monopoly power over his land. He may charge for it what he will or withhold it from the market if he so desires. He is under no compulsion to use the land for the public benefit or sell it at a price that someone can afford to pay. I think it obvious that the ownership of land is not in itself illegal despite the monopoly power that goes with it.

Historically the Bishop Estate has been the largest landowner in Oahu. ***HN7***[] Mere size, however, does not make a monopoly illegal. *United States v. International Harvester Co., 274 U.S. 693, 708, 47 S. Ct. 748, 71 L. Ed. 1302 (1927)*; *United States v. United States Steel Corp., 251 U.S. 417, 451, 64 L. Ed. 343, 40 S. Ct. 293 (1920)*; *Deesen v. Professional Golfers' Association, 358 F.2d 165, 171* (9th Cir.), *cert. denied*, *385 U.S. 846, 17 L. Ed. 2d 76, 87 S. Ct. 72 (1966)*; *United States v. Aluminum Co., 148 F.2d 416, 430 n. 2 (2d Cir. 1945)*; *Bailey's Bakery, Ltd. v. Continental Baking Co., 235 F. Supp. 705, 718 (D. Hawaii 1964)*, *aff'd*, *401 F.2d 182 (9th Cir. 1968)*, *cert. denied*, *393 U.S. 1086, 21 L. Ed. 2d 779, 89 S. Ct. 874 (1969)*.

I conclude, therefore, that the monopoly power enjoyed by the **[**8]** Bishop Estate over its own vast lands was not in itself illegal, notwithstanding the language in *United States v. Griffith, 334 U.S. 100, 92 L. Ed. 1236, 68 S. Ct. 941*

[2] This assumption is correct only if there is considerable judicial stretching of the words used in the statutes. ***HN3***[] So far as the Sherman Act is concerned, the words "trade or commerce between the several States" would seem to exclude land because land obviously cannot be a part of the trade or commerce between the "several States." ***HN4***[] The Hawaii statute forbids the monopolization of trade or commerce in any "commodity." In common parlance the word "commodity" is not used to describe real estate, and the dictionaries, both general and legal, defining "commodity" use the words "personal" and "movable" and do not use the term "real estate." In *Moore v. Jas. H. Matthews & Co., 550 F.2d 1207 (9th Cir. 1977)*, the word "commodity" was held not to include land (cemetery lots). But ***HN5***[] the Hawaii Legislature defines the word "commodity" to include "any other business." *Hawaii Rev. Stat. § 480-1(1)*. Perhaps leasing land is a business, and while there was no dealing for the business of leasing land, perhaps the definition includes land with which the business dealt.

HN6[] -

(1948). There the Court said that "monopoly HN8[] power, whether lawfully or unlawfully acquired, may itself constitute an evil and stand condemned under § 2 even though it remains unexercised. For § 2 of the Act is aimed, *inter alia*, at the acquisition or retention of effective market control." Id. at 107. (Footnote and citation omitted.) [3] If the quoted language is taken literally, then the monopoly power which the Bishop Estate had over its own land was illegal. But the Court in *Griffith* was obviously using the word "monopoly" in the context of competitors and was talking about the effect of a monopoly on competitors. The Court cited United States v. Aluminum Co., 148 F.2d 416 (2d Cir. 1945), for its authority. In that case Judge Learned Hand said:

> Nevertheless, it is unquestionably true that from the very outset the courts have at least kept in reserve the possibility that the origin of a monopoly may be critical in determining its legality; and for this they had warrant in some of the congressional **[**9]** debates which accompanied the passage of the Act. This notion has usually been expressed by saying that HN9[] size does not determine guilt; that there must be some "exclusion" of competitors; that the growth must be something else than "natural" or "normal"; that there must be a "wrongful intent," or some other specific intent; or that some "unduly" coercive means must be used. At times there has been emphasis upon the use of the active verb, "monopolize," as the judge noted in the case at bar. What engendered these compunctions is reasonably plain; persons may unwittingly find themselves in possession of a monopoly, automatically so to say: that is, without having intended either **[*1484]** to put an end to existing competition, or to prevent competition from arising when none had existed; they may become monopolists by force of accident. Since the Act makes "monopolizing" a crime, as well as a civil wrong, it would be not only unfair, but presumably contrary to the intent of Congress, to include such instances.

Id. at 429-30. (Citations omitted.)

[10]** During the oral arguments, the court asked counsel for plaintiffs at what time the Bishop Estate's ownership became illegal. Counsel answered that the Sherman Act restraints applied when the Bishop Estate chose to put the land in commerce. The Sherman Act, however, does not regulate the price between an owner and a buyer. The Sherman Act comes into play when an owner uses the power of his ownership to affect competition. HN10[] As stated in *Griffith*, "the use of monopoly power . . . to foreclose competition, to gain a competitive advantage, or to destroy a competitor, is unlawful." Id. at 107.

The District Court of Hawaii reached the same conclusion in Bailey's Bakery, 235 F. Supp. at 718, where it was said that "the HN11[] Sherman Act does not make mere size nor continued exercise of its lawful power an offense when that size and power have been obtained by lawful means and developed by natural growth -- absent the *manifest* purpose or intent to exclude competition." (Footnote omitted.)

The courts have frequently condemned leasing. In the cases where leasing has been condemned, however, it is clear that the leasing was employed as an anticompetitive device. *See Hanover Shoe,* **[**11]** Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968); Greyhound Computer Corp. v. International Business Machines Corp., 559 F.2d 488 (9th Cir. 1977); United States v. Aluminum Co., 148 F.2d 416 (2d Cir. 1945); United States v. United Shoe Machinery Corp., 110 F. Supp. 295 (D. Mass. 1953), *aff'd*, 347 U.S. 521, 98 L. Ed. 910, 74 S. Ct. 699 (1954).

In this case there is no evidence from which a jury might find that what the Bishop Estate did was anticompetitive. The plaintiffs contend that people want to buy land for homesites in fee and that leases are less desirable. If the Bishop Estate leased only, then if leases were less desirable, the landowners who wished to sell in fee would have been benefited. If other landowners wished to lease, they were free to do so. In any event, the actions of the Bishop Estate did not in any way infringe on the capacity of other landowners to do as they wished with their own land.

The plaintiffs contend that the following clause [4] in Bishop Estate development contract injured competitors:

---

[3] *But see* footnote 10 in *Griffith*, where it is said that "mere size is not outlawed by § 2." 334 U.S. at 107, *quoting* United States v. United States Steel Corp, 251 U.S. 417, 451, 64 L. Ed. 343, 40 S. Ct. 293 (1920).

> DEVELOPER and any organizations controlled by it or any assignees of development rights hereunder **[**12]** shall not directly or indirectly during the term of this agreement without the prior written approval of BISHOP undertake the development of any other land in Central Oahu comprising the ahupuaas from Halawa to Waipio inclusive (except land of the Trustees of the Bernice P. Bishop Museum, land of The Queen's Hospital at South Halawa and land now owned in fee simple by Oahu) *which may interfere with the speedy and orderly subleasing of said land*, provided that nothing herein shall prevent DEVELOPER or any organizations controlled by it in the normal course of their business from supplying materials or credit to other persons undertaking the development of such land.

(Emphasis supplied.) There is no evidence, however, that there was any shortage of developers. Apart from that, the contract itself requires no more than that the developer diligently perform his contract and not engage in other development activity which would prevent him from doing so.

[13]** Plaintiffs also contend that the Bishop Estate by reason of its power was able to deal with its developers in such a way that the developers made no profits **[*1485]** out of the initial sale of a residence but recovered their profit over a period of time out of the rents to be paid. The net result was a low initial cost to the home buyer. Plaintiffs theorize that other landowners had no capacity to make development contracts which would result in such low initial costs, and for that reason other developers could not enter the residential lease market. It is not shown that there were landowners who wanted to but did not enter the residential lease market because of the Bishop Estate's low initial cost. ***HN12***[] On a motion for summary judgment after there has been extensive discovery, the plaintiffs must be able to support their theories by showing some evidence on which a fact finding might be based. There is no such evidence here. [5]

[14]** A jury might find that the prices charged by the Bishop Estate, bearing in mind the value of the reversion, were exorbitant and that only because of its monopoly was it able to charge such prices. But the ownership of the land carried with it the right to fix the price and as I see it the right to fix the method in which it should be paid, *i.e*., in cash or in the reversionary value of the land, improved as it would be. [6]

On the facts presented here, a jury could not find the Bishop Estate to be in violation of *Section 2* of the Sherman Act nor of *Section 480-9 of the Hawaii Revised Statutes.*

THE STANDARDIZED LEASE

Plaintiffs urge that the defendants' actions in connection with the standardization of the **[**15]** lease form was equivalent to price-fixing and was a violation of Section 1 of the Sherman Act and *Section 480-4 of the Hawaii Revised Statutes.* As previously indicated, the development patterns of the Bishop Estate and the Castle defendants were similar in the general results reached. There was no uniformity in the prices paid or in the terms of the leases, and the details of the leases differed. All leases had to be approved by the FHA for FHA financing. Both defendants had been leasing for about a decade when in 1960 the FHA contacted all of the large landowners in Hawaii relative to the standardization of a lease form. The leases to the plaintiffs here were on forms approved by the FHA in 1963. The correspondence between the FHA and the landowners indicates that it was the FHA which

---

[4] This clause differs from the clause in the Castle development contract.

[5] For the purposes of this theory, the plaintiffs ignore the fact that the Castle defendants' dealings with developers were very similar to those of the Bishop Estate. In another context, the plaintiffs argue that the similarity of the development contracts was evidence of parallel conduct.

In Tax Zones 4-2 to 4-6, where both the Castle defendants and the Bishop Estate owned land in the years between 1946 and 1977, the Castle defendants sold 5,376 leaseholds, and the Bishop Estate sold 3,069. Castle was one of the smaller large landowners, having 2.45% of the land on Oahu, while Castle & Cook, Inc. had 11.13% and the James Campbell Estate had 13.20%.

[6] Consider a tract of land that has been leased for growing crops and either of necessity or by contract the lessee would have to cut brush, level the land, and perhaps dig ditches. Would the lease be invalid merely because, at the end of the lease, the lessor would get back land which had been improved?

was urging the standardization. The landowners did meet with each other and discuss the clauses in the standardized form of lease. There is no suggestion in any of the evidence that the FHA was seeking to improve the landowners' position. Rather, it appears that the FHA was on the homeowners' side and wanted clauses in the standardized form which would favor them. For instance, FHA insisted on the **[**16]** elimination of the consent to assignment clause and was successful. The lease forms used here provide for assignment without the consent of the lessor. It does not appear that the landowners agreed and presented a package to the FHA. Rather the landowners agreed reluctantly to some FHA demands. The evidence does not prove a contract between the Bishop Estate and the Castle defendants; rather it proves an acquiescence in some demands made by the FHA.

However, if it can be said that there was some sort of a contract between the landowners to standardize the lease form and **[*1486]** that such was in violation of the antitrust laws, still the problem of damages remains. The standardization of the lease form did not bring about the lease-only policy; rather leasing had been the policy for many years. If the plaintiffs were injured by the standardization, it does not appear here just how. It is true that the plaintiffs' theoretical power to negotiate was diminished, but, assuming (contrary to all of plaintiffs' arguments on the monopolization issue) that they had a power to negotiate, they do not point to any clause in the standardized lease that was more onerous than the equivalent **[**17]** clause in previous leases; they do not single out any particular clause in the standard form that was onerous and as to which they would have negotiated; and they do not show how any damages flowed from their lack of power to negotiate.

On the facts presented here, a jury could not find that the plaintiffs suffered any damage because of the defendants' consents to the standardized lease form.

THE CONSPIRACY CLAIM

The plaintiffs assert that the Bishop Estate and the Castle defendants violated Section 1 of the Sherman Act and *Hawaii Rev. Stat. § 480-4* by agreeing that they would engage in a lease-only policy, thus restricting the sale of residential lots in fee. The defendants deny any combination or conspiracy. The plaintiffs, conceding that there is no direct evidence of the conspiracy, claim that it may be inferred from a conscious parallel behavior of the defendants.

The acts of the defendants were parallel in that they employed the same general scheme in leasing their land. The defendants made master leases to developers. The effects of the leases were that the developers subdivided the lands and built the on- and off-site improvements and sold those improvements to the homeowners. **[**18]** The land was then sublet to the homeowners for a fixed period, with rights of renewal. The defendants required the developers to sell the houses at no profit and to take their compensation over a period of time by sharing the rentals. The details of the development contracts made by the Bishop Estate differed among developers and also differed from those of the Castle defendants. Except as to rent and term, the lease forms used by the defendants for the homeowner lessees were identical after the standardization.

By reason of the business, political, and social relationships of the principals and the trustees, the defendants had an opportunity to discuss their mutual problems; they exchanged information and lease forms; and they presented at times a common front in the political arena in matters affecting land ownership and land usage, such as federal income taxes and the efforts of the Hawaii Legislature to impose restrictions on the leasing of land.

The crucial question is whether the defendants' conduct toward the plaintiffs stemmed from independent decision or from an agreement, tacit or express. *Theatre Enterprises v. Paramount Film Distributing Corp., 346 U.S. 537, 540,* ***[**19]*** *98 L. Ed. 273, 74 S. Ct. 257 (1954)*. The Court of Appeals for the Ninth Circuit has stated that "[***HN13***[] the plaintiff] need not show explicit contractual agreements in order to prove a conspiracy, but it must demonstrate more than that the alleged co-conspirators engaged in a course of conduct, even if conscious of each other's parallel behavior, in which they would have engaged regardless of the others' conduct." *Dahl, Inc. v. Roy Cooper Co., 448 F.2d 17, 19 (9th Cir. 1971)*. In *Blair Foods, Inc. v. Ranchers Cotton Oil, 610 F.2d 665 (9th Cir. 1980)*, the court stated:

> Summary judgment may properly be granted in an antitrust action on an allegation of conspiracy where there are understandable and legitimate business reasons for a defendant's conduct. We believe that appellees have

> supplied an entirely plausible and justifiable explanation of their conduct, one consistent with proper business practices. Absent any evidence of an agreement with Glen-Webb, Ranchers' refusal to deal with **[*1487]** Blair does not constitute an ***antitrust law*** violation.

Id. at 672. (Citations omitted.)

The defendants' conduct in leasing rather than selling residential lots was based **[**20]** on business judgment. It was the business judgment of the Bishop Estate that its investment in its own land was the best investment that it could make. The philosophy was expressed in 1963 by Trustee Midkiff in this language:

> The value of the Bishop Estate in 1884 was $300,000. The assessed value of 1962 are over 209 million. Holding Mrs. Bishop's lands since the Trust's inception 75 years ago has resulted in increasing its value 696 times since 1884. No other type of corpus, securities, etc. can show any such gain.

The record confirms that the judgment of the defendants was in fact sound. The plaintiffs do not deny that the defendants were motivated by profit; rather, in their argument as to monopolization, they vehemently argue that profit was defendants' motive. The cooperation of the large landowners in agreeing on a lease form is evidence of parallel conduct, but again the landowners wanted to facilitate the financing of their purchase, 90% of which was done through FHA and VA. This constitutes a legitimate business purpose.

It does not appear "that the allegedly parallel acts were against each conspirator's self interest, that is, that the decision to act was not **[**21]** based on a good faith business judgment." *Zoslaw v. MCA Distributing Corp., 693 F.2d 870, 884 (9th Cir. 1982)*, *cert. denied*, *460 U.S. 1085, 103 S. Ct. 1777, 76 L. Ed. 2d 349 (1983)*.

On the facts presented here, a jury could not find that the defendants violated Section 1 of the Sherman Act or *Section 480-4 of the Hawaii Revised Statutes.*

THE TYING ARRANGEMENT

The plaintiffs assert that the Bishop Estate requirement that the house be built and bought before a sublease was made was in effect a tying arrangement (in violation of Section 1 of the Sherman Act and *Hawaii Rev. Stat. §§ 480-4(a)* and *480-5*) in which the houses were the tying product and the leases were the tied product. The argument is that the homeowner in taking the tied product was required to accept the less desirable lease instead of the more desirable fee.

The concepts underlying the rule against tying do not fit this case. A principal difficulty lies in considering the lease of land and the purchase of a house for a residential dwelling as separate products. The Ninth Circuit, in *Hirsh v. Martindale-Hubbell, Inc., 674 F.2d 1343, 1347* (9th Cir.), *cert. denied*, *459 U.S. 973, 74 L. Ed. 2d 285, 103 S.* ***[**22]*** *Ct. 305 (1982)*, quoting *Fortner Enterprises, Inc. v. United States Steel Corp., 394 U.S. 495, 507, 22 L. Ed. 2d 495, 89 S. Ct. 1252 (1969)*, said: "'There is, at the outset of every tie-in case, . . . the problem of determining whether two separate products are in fact involved. '" It may be that there is some kind of a market for houses apart from the land, just as there may be a market for automobile engines apart from the whole motor car, but certainly the adjudicated cases are not based on such unusual divisions of a market. We do not visualize residences apart from the land on which they are located. It is the house and the land on which it is located which constitute the package which the ordinary homeowner considers. In this case the plaintiffs bought the package because they wanted to live in the area, and the houses suited their needs. I think that there was a market for residential houses located on a definite lot and that there were neither separate markets nor separate products.

Assuming that there were separate markets, there is no proof in this case that the Bishop Estate had any dominance in the market for the tying product, *i.e.*, houses. As previously stated, **[**23]** the Bishop Estate did have a monopoly power over its own land. But, as to the tying product, while the Bishop Estate in its development contracts directed that the houses be built and reserved the right to approve the plans, and in effect required the homeowner to take the package, there is nothing to show that the houses were unique, that any builder **[*1488]** could not duplicate them, or that there was a lack of builders.

Assuming that the Bishop Estate had some economic power over houses, still it is not shown just how the exercise of that power could affect competitors in the tied product market, *i.e.*, leases of land. Most of the cases in which there has been a finding of an illegal tying arrangement relate the arrangement to a restraint of competition in the market for the tied product. Thus, in *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968)*, a consumer suit, the policy of the defendant was condemned because of the effect that it had on competing manufacturers of shoe machinery. In *International Salt Co. v. United States, 332 U.S. 392, 92 L. Ed. 20, 68 S. Ct. 12 (1947)*, an action by the United States, the **[**24]** focus was on the injury to competitors in the tied product -- salt. In *Northern Pacific Railway Co. v. United States, 356 U.S. 1, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*, an action by the United States, the tying product was land, and the injury was the restriction of trade in the transportation market. In *Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 97 L. Ed. 1277, 73 S. Ct. 872 (1953)*, where no Sherman Act violation was found, the Court said:

> Tying arrangements, we may readily agree, flout the Sherman Act's policy that competition rule the marts of trade. Basic to the faith that a free economy best promotes the public weal is that goods must stand the cold test of competition; that the public, acting through the market's impersonal judgment, shall allocate the Nation's resources and thus direct the course its economic development will take. Yet "tying agreements serve hardly any purpose beyond the suppression of competition." *Standard Oil Co. of California v. United States, 337 U.S. 293, 305 [93 L. Ed. 1371, 69 S. Ct. 1051]* (1949).

Id. at 605. (Footnote omitted.)

In *Jefferson Parish Hospital v. Hyde, 466 U.S. 2, 104 S. Ct. 1551,* ***[**25]*** *80 L. Ed. 2d 2 (1984)* the court said:

> It is far too late in the history of our antitrust jurisprudence to question the proposition that certain tying arrangements pose an unacceptable risk of stifling competition and therefore are unreasonable "per se." The rule was first enunciated in *International Salt Co. v. United States, 332 U.S. 392, 396, 68 S. Ct. 12, 15, 92 L. Ed. 20 (1947)*, and has been endorsed by this Court many times since. The rule also reflects congressional policies underlying the antitrust laws. In enacting § 3 of the Clayton Act, *15 U.S.C. § 14*, Congress expressed great concern about the anticompetitive character of tying arrangements.

Id. at 1556-57. (Footnotes omitted.)

I am aware that in *United States v. Loew's Inc., 371 U.S. 38, 9 L. Ed. 2d 11, 83 S. Ct. 97 (1962)*, the Court struck down a tying arrangement that resulted in block-booking. The Supreme Court agreed with the district court finding "that since each defendant by reason of its copyright had a 'monopolistic' position as to each tying product, 'sufficient economic power ' to impose an appreciable restraint on free competition in the tied product was present as demanded by **[**26]** the *Northern Pacific* decision." *Id. at 48*. Notwithstanding this language, it is not clear to me whether the Court condemned block-booking because of its effect on competition, or whether it considered that the use of monopoly power based on a copyright to require block-booking was an evil in and of itself. Nonetheless I believe that ***HN14***[] a court, in considering a tying case, should regard the injury to competition in the tied product as a factor. In this case no such injury is proved. As stated in the section of this opinion dealing with the monopolization claim, the fact that one landowner deals with his own land does not prevent any other landowner from dealing with his own land.

On the facts presented here, a jury could not find that there was an unlawful tying arrangement in this case.

[*1489] UNFAIR TRADE PRACTICES AND UNFAIR METHODS OF COMPETITION

HN15[] *Hawaii Rev. Stat. § 480-2* provides that "unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are unlawful." In enacting this statute, the Hawaii Legislature used language similar to that of Section 5(a)(1) of the Federal Trade Commission Act (*15 U.S.C. § 45(a)(1)*). **[**27]** ***HN16***[] *Hawaii Rev. Stat. § 480-3* provides: "It is the intent of the legislature that in construing *section 480-2* the courts will be guided by the interpretations given by the Federal Trade Commission and the federal courts to section 5(a)(1) of the Federal Trade Commission Act." ***HN17***[] *Section 480-13* provides a private remedy for violations of the Act. The plaintiffs make claims under these statutes.

HN18[] Unless there is pendent jurisdiction over the claim made under *Hawaii Rev. Stat. § 480-2*, the court is without jurisdiction. It may well be that, since the court has disposed of the claims made under federal law, there can be no pendent jurisdiction. Thus, in *United Mine Workers v. Gibbs, 383 U.S. 715, 726, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966)*, the Court said: "Certainly, if the federal claims are dismissed before trial, even though not insubstantial in a jurisdictional sense, the state claims should be dismissed as well." (Footnote omitted.) The Court cited *Wham-O-Manufacturing Co. v. Paradise Manufacturing Co., 327 F.2d 748, 752-754 (9th Cir. 1964)*, [7] but later decisions of the Court of Appeals for the Ninth Circuit, while approving the dismissal of state claims when the federal claims **[**28]** have been denied prior to trial, seem to make the exercise of pendent jurisdiction discretionary. *Schmidt v. Oakland Unified School District, 662 F.2d 550 (9th Cir. 1981)*; *Sunbeam Lighting Co. v. Pacific Associated Lighting Inc., 328 F.2d 300 (9th Cir. 1964)*. In any event, I decline to exercise pendent jurisdiction.

There is no judicial economy to be served in view of the court's disposal of the federal claims.

All of the considerations which persuaded the Supreme Court to abstain in *Railroad Commission v. Pullman Co., 312 U.S. 496, 85 L. Ed. 971, 61 S. Ct. 643 (1941)*, are present here. The claims touch a sensitive area of social policy in Hawaii. *See* *Hawaii Housing Authority v. Midkiff, 467 U.S. 229, 104 S. Ct. 2321, 81 L. Ed. 2d 186 (1984)*. They also present difficult problems in the interpretation of the law of Hawaii. The path to be followed is not clear. While *Hawaii Rev. Stat. § 480-3* states that decisions of the courts and the Fair Trade **[**29]** Commission shall be the guidelines, those decisions are fashioned for a regulatory scheme in which the Federal Trade Commission has both legislative and judicial power. *Humphrey's Executor v. United States, 295 U.S. 602, 79 L. Ed. 1611, 55 S. Ct. 869 (1935)*. A problem may arise as to the extent that the provisions of *Section 480-2* do incorporate, or should be interpreted by, the provisions of the Hawaii Unfair Practices Act (Hawaii Rev. Stat., ch. 481) and/or the Hawaii Deceptive Trade Practices Act (Hawaii Rev. Stat., ch. 481A). It is necessary to interpret the broad words "unfair methods of competition" and "unfair or deceptive acts or practices." This task is complicated by the fact that most of the concepts involved in the fair trade world grew out of the market dealings in the trade and commerce of movable property and services, and not out of dealings in land.

To paraphrase the Supreme Court in *Railroad Commission v. Pullman Co., 312 U.S. at 501*, I should refrain from exercising pendent jurisdiction out of regard for the independence of the government of Hawaii.

CONTRACTS OF ADHESION

For the reasons previously stated, I refuse to take pendent jurisdiction of the claims **[**30]** made in plaintiffs' eighth cause of action.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN2[] **Regulated Industries, Higher Education & Professional Associations**

There are two categories of antitrust analysis: in the first category are agreements whose nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality--they are "illegal per se". In the second category are agreements whose competitive effect can only be evaluated by analyzing the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN3[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The common attribute of per se illegal group boycotts is a concerted attempt by a group of competitors at one level to protect itself from competition from non-group members who seek to compete at that level. The court has stated that group boycotts are illegal per se only if they are used to enforce agreements that are themselves illegal per se.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN4[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Once per se illegality is established, there is a conclusive presumption that the conduct is unreasonable in violation of the Federal antitrust laws. If, however, the defendants' concerted conduct is not designed to drive out competitors, but to achieve some other goal, the court must engage in a rule of reason analysis. In this circuit, it is necessary under the rule of reason to show anticompetitive effects, or actual harm to competition, to establish an antitrust violation.

Administrative Law > Judicial Review > Reviewability > Factual Determinations

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Remedial Powers > Federal Trade Commission Act

Administrative Law > Judicial Review > Standards of Review > Substantial Evidence

Antitrust & Trade Law > Public Enforcement > US Federal Trade Commission Actions > General Overview

Antitrust & Trade Law > Public Enforcement > US Federal Trade Commission Actions > Judicial Review

Business & Corporate Compliance > ... > Transportation Law > Water Transportation > US Federal Maritime Commission

HN5[] **Reviewability, Factual Determinations**

Under *15 U.S.C.S. § 45(c)*, the findings of the Federal Trade Commission (FTC) as to the facts, if supported by evidence, shall be conclusive. According to the settled law in the United States Court of Appeals for the Seventh Circuit, the FTC may draw reasonable inferences from the record. The FTC's findings of fact are to be accorded great deference and are to be upheld if supported by substantial evidence. Thus, the court's review is limited to a determination of whether the FTC applied incorrect legal standards which prejudiced its findings against petitioners and whether the administrative decision is supported by substantial evidence in the hearing record before the examiner.

Business & Corporate Compliance > ... > Transportation Law > Water Transportation > US Federal Maritime Commission

Civil Procedure > ... > Standards of Review > Substantial Evidence > General Overview

HN6[] **Water Transportation, US Federal Maritime Commission**

The United States Supreme Court defines substantial evidence as such relevant evidence as a reasonable mind might accept as adequate to support a conclusion.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Labor & Employment Law > Collective Bargaining & Labor Relations > Strikes & Work Stoppages

HN7[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

The classic "group boycott" is a concerted attempt by a group of competitors at one level to protect themselves from competition from non-group members who seek to compete at that level. Typically, the boycotting group combines to deprive would-be competitors of a trade relationship which they need in order to enter (or survive in) the level wherein the group operates.

Admiralty & Maritime Law > Maritime Contracts > General Overview

Healthcare Law > Healthcare Litigation > Actions Against Healthcare Workers > General Overview

Torts > Malpractice & Professional Liability > Healthcare Providers

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Labor & Employment Law > Collective Bargaining & Labor Relations > Strikes & Work Stoppages

Military & Veterans Law > Servicemembers > Enlisted Personnel

HN8[] **Admiralty & Maritime Law, Maritime Contracts**

The term "boycott" is not limited to concerted activity against competitors of members of the boycotting group.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Healthcare Law > Healthcare Litigation > Antitrust Actions > Insurers

HN9[] Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

The broad label of "group boycott" generally applies to conduct involving a concerted refusal to deal, commonly defined as an agreement by two or more persons not to do business with other individuals, or to do business with them only on specified terms.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Public Enforcement > US Federal Trade Commission Actions > Judicial Review

HN10[] Sherman Act, Claims

The rule of reason is the established standard of analysis for determining whether a Federal antitrust violation has occurred. The rule of reason requires the factfinder to decide whether under all the circumstances of the case the restrictive practice imposes an unreasonable restraint on competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN11[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Per se rules of illegality are appropriate only when they relate to conduct that is manifestly anticompetitive. Additionally, the per se rule is not employed until after considerable experience with the type of challenged restraint. In accord with these legal principles, the law in the United States Court of Appeals for the Seventh Circuit is that a per se analysis should not be applied, and has never been applied by the United States Supreme Court, to concerted refusals that are not designed to drive out competitors but to achieve some other goal.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN12[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The inquiry mandated by the rule of reason is whether the challenged agreement is one that promotes competition or one that suppresses competition. According to the United States Supreme Court, under a rule of reason analysis, a court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts. This is not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent may help the court to interpret facts and to predict consequences.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN13[] **Regulated Practices, Market Definition**

Under the rule of reason, a showing of anticompetitive effect in the relevant market is an essential predicate of antitrust liability.

Counsel: Bruce W. Graham, Trueblood, Fountain, Graham & O'Reilly, Lafayette, Indiana, for Petitioner.

Howard Shapiro, Federal Trade Commission, Washington, District of Columbia, for Respondent.

Judges: Pell and Coffey, Circuit Judges, and Fairchild, Senior Circuit Judge. Fairchild, Senior Circuit Judge, concurring in result.

Opinion by: COFFEY

Opinion

[*1126] COFFEY, Circuit Judge

The Indiana Federation of Dentists ("IFD") petitions this court to review an order of the Federal Trade Commission ("Commission") requiring the IFD and its member dentists to "cease and desist from engaging" in a collective refusal to comply with the group dental health care insurers' directive to submit copies of a patient's dental radiographs along with the patient's insurance claim form. We conclude that under a rule of reason analysis, the evidence presented at the administrative hearing failed to establish that the conduct of the IFD and its member dentists had an anticompetitive effect in a relevant market. Accordingly, we vacate the Commission's "cease and desist" order.

I

The parties admit that the controversy in **[**2]** this case arises from two alleged cost-containment provisions that insurance companies include within their group dental health care plans. [1] These provisions are entitled " predetermination of claims" and "least expensive adequate course of treatment." According to the former plan, the dentist and patient may, at their discretion, submit a proposed course of dental treatment to the insurer for review.

---

[1] The record reveals that group dental health care plans originated in Indiana in the early 1970's. These plans were, at the time of this lawsuit, included in collective bargaining agreements for the benefit of union-member employees. Neither the ALJ nor the Commission found that the alleged cost-containment provisions included within these plans actually lowered the insurers' dental costs.

The insurer, in turn, will provide the dentist and patient with an estimate of the insurance benefits to be paid for the proposed treatment. The "least expensive adequate course of treatment" plan provides that for **[*1127]** all courses of dental treatment, whether proposed or completed, the group dental health care insurer will pay benefits only for the least expensive treatment that is "commonly accepted as providing good dental care." *Indiana Federation of Dentists, 101 F.T.C. 57, 159 n.4 (1983)*.

[3]** In an effort to enforce these alleged cost-containment provisions, the group dental health care insurers direct dentists to submit copies of a patient's dental radiographs ("x-rays") along with the patient's insurance claim form. The claim form and x-rays, if submitted, are initially reviewed by lay personnel employed by the insurance company. [2] These lay employees have the authority to approve the proposed or completed course of dental treatment. If an insurer's lay employee questions a particular course of treatment, the claim form and x-rays are transmitted to a licensed dentist, selected and hired by the insurer to review dental claims. Based upon an analysis of the claim form and x-rays alone, without a patient case history much less a complete dental examination, the insurer's employed dentist determines the least expensive type of treatment that will, from the insurer's standpoint, provide "good dental care."

[4]** The instant case concerns the practice of the 84 current and 8 former IFD member dentists who collectively refused to comply with the group dental health care insurers' directive to submit copies of a patient's dental x-rays along with the patient's insurance claim form. The IFD maintains that "[p]roper diagnosis and treatment planning predicates the doctor correlating *all* diagnostic aids, with a history and with all clinical findings." *Id. at 119, 129* (emphasis added). In accord with this policy of quality and proper dental care, the IFD member dentists "provide all diagnostic aids [including x-rays] to third parties on an in-office basis and with the consent of the patient." *Id. at 121-22*. [3] Furthermore, it is the IFD policy that the insurers' employed dentists conduct this examination and review of all diagnostic and clinical aids used in formulating a proper course of dental treatment. Pursuant to Indiana law, "[a]ny person . . . who . . . offers to diagnose or professes to diagnose . . . any of the lesions or diseases of the human oral cavity, teeth, gums, maxillary or mandibular structures" is practicing dentistry and must be **[**5]** licensed. *Ind. Code §§ 25-14-1-1*, *25-14-1-23* (1982). The IFD asserts that the unlicensed lay personnel employed by group dental health care insurers to review claims engage in the unlawful practice of dentistry when they examine and "diagnose" dental x-rays for purposes of benefit determination. Thus, the IFD concludes that the submission of dental x-rays to unlicensed lay personnel for diagnostic procedures is aiding and abetting the unlicensed practice of dentistry in violation of Indiana state law. [4]

[6] [*1128]** According to the findings of fact of the Administrative Law Judge ("ALJ"), as adopted by the Commission, there were 3,100 licensed dentists practicing within the State of Indiana in 1974 and 85-88 percent of

---

[2] The lay personnel employed by the group dental health insurers to review a patient's claim form and dental x-rays are not licensed to practice dentistry within the State of Indiana, and thus have no formal dental or radiological training.

[3] The group dental health care insurers are commonly referred to as "third parties" or "third party payers." *See* *Indiana Federation of Dentists, 101 F.T.C. at 57, 61*.

[4] The Indiana state legislature created the Board of Dental Examiners to administer and enforce the "laws pertaining to the practice of dentistry and of dental hygiene." *Ind. Code § 25-14-1-13(a)* (1982). In furtherance of this duty, the Board is required to "adopt a code of professional conduct and . . . adopt rules and regulations establishing standards for the competent practice of dentistry or dental hygiene." *Id.* In April 1982, some three and one-half years after the Commission filed its complaint in the instant case, the Board enacted new regulations governing the competent practice of dentistry within the State. According to the Board, "[a]ny person using dental diagnostic materials [including dental radiographs, *see* 828 Ind. Adm. Code 1-4-1(3)] for the purpose of recommending changes in the treatment plan upon which benefits are based is practicing dentistry and must be a dentist." 828 Ind. Adm. Code 1-4-2 (1984). Furthermore, the Board provides that "Indiana dentists shall not knowingly submit dental diagnostic materials to any party involved in the Unauthorized Practice of Dentistry." 828 Ind. Adm. Code 1-4-3. The IFD contends that unlicensed lay personnel do, in fact, examine dental x-rays and recommend changes in dental treatment when they question a course of dental treatment. Accordingly, the IFD claims that submission of a patient's dental x-rays to unlicensed lay personnel for diagnostic procedures is in violation of the Indiana state law as established in 828 Ind. Adm. Code 1-4-3.

those dentists belonged to the Indiana Dental Association ("IDA"). The IDA had an official "Manual on Group Funded Dental Care Programs" ("Manual") recommending the procedures that member dentists follow when treating patients covered by a group dental health care insurance plan. The Manual included a section entitled "I.D.A. Policy Regarding Group Dental Care," providing in pertinent part:

> "The method of authorization of dental health care under pre-payment plans should be limited to determining the eligibility of the patient and extent of liability of the plan and should prevent any interference with the dentist-patient relationship or with the judgment and decision of the dentist. The plan must not *require* the dentist to submit radiographs (x-rays) to a third party."

Indiana Federation of Dentists, 101 F.T.C. at 83 (emphasis original) (footnote omitted). The Manual also contained a form letter, entitled "To All My Patients, **[**7]** " that provided in pertinent part:

> "Dental radiographs (x-rays) are a part of the dentist's legal health records. They are available for valid review by a qualified (representatives) of your insurance company in this office. Radiographs (x-rays) will not be submitted to third parties for their use in determination of benefits (e.g., least expensive adequate procedure, or optional course of treatment) because a determination of an adequate treatment plan can only be made after a knowledge of the following:
>
> A. Complete patient evaluation.
>
> B. Radiographs.
>
> C. Additional diagnostic procedures as required."

Id. at 83, 162-63. In addition to formulating these guidelines for member dentists, the IDA undertook a pledge project in 1973 to obtain written pledges from their members that they would not participate in group funded dental health care plans unless such plans were previously approved by the IDA. It was the IDA's position that "proper dental treatment is predicated on a diagnosis from many types of examination and not radiographs alone." *Id. at 90*. According to the IDA statistics, approximately 85 percent of the member **[**8]** dentists agreed to support the IDA policy.

The ALJ found that the "smaller insurers had generally gone along with the Indiana dentists' demands" to not *require* the submission of dental x-rays alone, but to review all diagnostic aids in determining a proper course of dental treatment. The ALJ further found that in July 1971, Aetna Life and Casualty Insurance Co. ("Aetna") insisted that Indiana dentists submit copies of dental x-rays for patients covered under Aetna's group dental plan with International Harvester and the United Auto Workers. Only a "small percentage of dentists" in the Allen County-Fort Wayne, Indiana area complied with Aetna's directive. By mid-1972, some 600 unpaid dental claims had accumulated and "[i]t was the consensus of Harvester, U.A.W. and Aetna that many of these 600 claims were probably meritorious and that they had to be taken care of in some way." *Id. at 98, 172*. Accordingly, Aetna selected and retained a dentist and "arranged for him to go to the office of each dentist concerned and work with the relevant x-rays and any other diagnostic aids in the dentist's files." *Id.* The ALJ found that "[t]his *modus operandi*, of **[**9]** course, came quite close to meeting IDA's unrealistic terms for insurer access to x-rays: 'qualified' personnel to come to the treating dentist's office." *Id.* Similarly, in October 1974, Connecticut General Life Insurance Company, ("Connecticut General") required that Indiana dentists submit copies of dental x-rays for patients covered under Connecticut General's group dental plan with General Motors and the United Auto Workers. The IDA member dentists objected to Connecticut General's policy and eventually the parties entered into a **[*1129]** "gentlemen's agreement" whereby the IDA member dentists were merely asked to submit copies of a patient's dental x-rays but were not required to do so. Nonetheless, the ALJ found that by the spring of 1976 Connecticut General was receiving about 70 percent of its needed x-rays except in the Madison County-Anderson, Indiana area where only "about 2 to 4 out of 40 dentists -- would ever submit x-rays when requested" by Connecticut General. *Id.* at 109, 172.

In August 1976, the petitioner, IFD, was formed as a separate and distinct association of Indiana dentists. [5] The IFD's constitution and by-laws provided that: **[**10]**

> "The Indiana Federation shall represent, protect, maintain, and advance, through activities accomplished by relevant techniques which may lawfully be engaged in by a labor organization, the interests of the dentists within its jurisdiction. The objectives of this Federation shall include, but not be limited to the following:
>
> > a.) To represent dentists in all socio-economic matters, negotiations and grievances with employers, third, and fourth parties or any group that is involved in financing or delivery of dental care. The ultimate purpose being to promote better patient care and to prevent abuses and correct inequities in the delivery of dental care to the public."

Id. at 74-75, 118, 171. As of February 1979, the IFD had 84 current and 8 former members concentrated within the localities of its three chapters: Anderson, Indiana and surrounding Madison County (46 members); Ft. Wayne, Indiana and surrounding Allen County (19 members); and Lafayette, Indiana and the surrounding counties of Carrol, Clinton, Tippecanoe, and White (27 members). Two of the dentists largely responsible for organizing the IFD, Dr. David McClure of Anderson, Indiana **[**11]** and Dr. Dan Rohn of Anderson, Indiana, had served on the Council of Dental Care Programs for the IDA formulating "policies, standards and principles for evaluating group-funded dental care programs," and in that capacity had co-chaired the IDA's pledge project.

In April 1977, the IFD member dentists adopted a "work rule" setting forth the IFD's policy that a proper dental diagnosis and treatment planning requires a review of all diagnostic and clinical aids, not simply a review of the patient's x-rays and insurance claim form. According to the IFD:

> "Proper diagnosis and treatment planning predicates the doctor correlating all diagnostic aids, with a history and with all clinical findings. *No one facet of this process is now, or ever has been recognized* **[**12]** *by the profession as a substitute for the complete process*. To represent otherwise would subject the patient to substandard care.
>
> The patient's dentist, therefore, has a moral and legal responsibility to not allow a determination of his patient's condition to be made for any purpose, without the benefit of a complete examination which takes into account all of the elements described."

Id. at 119, 129, 176 (emphasis added). Additionally, the IFD drafted a form letter for its members use when replying to a group dental health care insurer's request to submit copies of a patient's dental x-rays along with the patient's insurance claim form. The letter provided:

> "Reference your request for x-rays for the above named patient. It is the policy of this office to provide all diagnostic aids to third parties on an in-office basis and with the consent of the patient. It is my belief that proper diagnosis and treatment planning predicates the doctor correlating all diagnostic aids with a history and all clinical findings. *No one facet of this process is now, or ever has been recognized by the profession as a* ***[*1130]*** *substitute for the complete* **[**13]** *process*. To represent otherwise would subject the patient to substandard care.
>
> If you will have your consultant contact my office to set up an appointment, I will furnish records and ask the patient to be present for an examination. If you do not feel that this is possible, the Indiana Federation of Dentists, of which I am a member, will help you, if possible, to provide a local consultant."

Id. at 122 (emphasis added).

The ALJ found that in January 1977, Connecticut General breached its "gentlemen's agreement" with the IDA and instituted a practice of insisting that Indiana dentists submit copies of a patient's dental x-rays along with the patient's insurance claim form. Dr. Rohn and other officers of the IFD immediately confronted the Connecticut General management to voice their disapproval over this change in policy. Following this meeting, Connecticut

---

[5] According to the ALJ's findings of fact, as adopted by the Commission, the IFD was organized as a labor union in an attempt to qualify for exemption from the Federal antitrust laws under the Clayton Act § 6, *15 U.S.C. § 17*.

General "refrained from making any further requests for x-rays from Madison County (the Anderson area) for fear of a confrontation which would end all existing cooperation and snarl the payment of GM worker's claims." *Id. at 123, 172*. The ALJ further found that between April **[**14]** 1976 and January 1978, Metropolitan Life Insurance Co. of New York ("Metropolitan"), the group dental health insurer for the 450-500 employees of Brockway Glass in Madison County, directed Indiana dentists to submit copies of their patient's dental x-rays for benefit determination. The IFD member dentists refused to comply with this directive, and according to the ALJ, "Metropolitan simply declined to pay on claims when x-ray requests were refused." *Id. at 123*. In response, the personnel manager of Brockway Glass and the local union president "made efforts to talk IFD's Dr. McClure into submitting x-rays but were unsuccessful." *Id. at 123-24, 172-73*.

In October 1978, the Commission issued a complaint against the IFD, charging it with a violation of the Federal Trade Commission Act § 5, *15 U.S.C. § 45(a)(1)*, which provides that ***HN1***[] "[u]nfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce, are declared unlawful." [6] The complaint alleged that the IFD and its members **[**15]** had "engaged in acts, practices, and methods of competition to eliminate, prevent, or hinder competition among dentists with respect to cooperation by dentists with dental health care benefits programs containing predetermination and least expensive adequate course of treatment provisions." *Id. at 59, 165-66*. Specifically, the Commission alleged that the IFD was:

> "Promulgating, adopting, publishing, and distributing to its members a purported 'work rule' that details certain uniform courses of conduct for dentists in their dealings with third party payers; and Urging payers, purchasers and beneficiaries of dental health care benefits plans to eliminate provisions of such plans that [the IFD] finds unacceptable."

Id. at 61. The complaint further alleged that the IFD's practice had the following effects:

> "A. Competition among dentists in Indiana has been hindered, restrained, foreclosed, and frustrated; **[*1131]**
> B. The cost of dental health care services in Indiana has been or may be stabilized, fixed, or otherwise tampered with;
>
> C. Consumers have been or may be deprived of the benefit of third-party payers' cost-containing **[**16]** measures, including lower or potentially lower costs for dental health care services and dental health care benefits insurance;
> D. Consumers have been or may be denied the benefits of a second dentist's opinion as to the adequacy of proposed dental treatment; and
> E. Consumers have been limited in their opportunity to select dentists who cooperate with dental health care benefits programs."

Id. at 62.

---

[6] The record reveals that the IDA was named as a coconspirator in the Commission's complaint but not as a respondent because in November 1978, the Commission and the IDA entered into a consent decree that provides in pertinent part:

> "*It is further ordered*, That respondents . . . shall cease and desist from engaging in any activity, course of conduct, practice, or policy that in whole or in part:
>
> A. Requests, urges, recommends or suggests that dentists, or has the purpose or effect of requiring or organizing dentists to, (1) refuse to submit radiographs or such other pre-treatment and post-treatment reports, analyses and materials (except where post-treatment radiographs are not taken in the course of treatment and would expose the patient to unnecessary radiation) as third-party payers request for use in benefit determination or (2) refuse to deal in any particular way with any one or more third-party payers."

Indiana Dental Association, 93 F.T.C. 392, 398 (1979); *43 Fed. Reg. 53,768 (1978)*. *Accord* *Texas Dental Association, 100 F.T.C. 536, 540 (1982)*.

[17]** Following an administrative hearing in October 1979, the ALJ issued a 132 page "Initial Decision" in March 1980. The ALJ found that "the members of IFD stand committed to a concerted refusal to furnish their patients' x-rays to dental health insurers. . . . There is abundant evidence that IFD has actually carried out the IDA/IFD boycott scheme as planned." *Id. at 121, 153*. [7] **[**19]** According to the ALJ, this group boycott began with the IDA and "it was primarily consciousness of the antitrust risk inherent in IDA's organized boycott of Indiana's dental health care insurers -- much magnified by the Supreme Court's 1975 ruling in *Goldfarb [v. Virginia State Bar, 421 U.S. 773, 44 L. Ed. 2d 572, 95 S. Ct. 2004 (1975)]* -- which led to the organization . . . of IFD. . . ." *Indiana Federation of Dentists, 101 F.T.C. at 115*. The ALJ ruled that the IFD "was formed in 1976 to join and continue a concerted refusal by many dentists in Indiana to submit radiographs (x-rays) to dental health insurers either automatically or on request." *Id. at 153, 160*. The ALJ concluded that the IFD's participation in this concerted refusal constituted a **[**18]** group boycott and was a *per se* violation of the Federal antitrust laws. [8] The ALJ added, in the **[*1132]** alternative, that if

---

[7] The ALJ made the following preliminary rulings:

> (1) The IFD's alleged anticompetitive activity had a "substantial effect upon interstate commerce" and thus the commission had jurisdiction over the complaint pursuant to *15 U.S.C. § 45(a)(1)*, *Indiana Federation of Dentists, 101 F.T.C. at 77-78, 153* (on appeal the Commission affirmed this decision, *see* *101 F.T.C. at 161-64*);
>
> (2) The IFD was organized to "carry on business in substantial part for the profit of its members" and thus was a corporation for purposes of the Federal Trade Commission Act § 4, *15 U.S.C. § 44*, subject to the Commission's jurisdiction, *Id. at 75-76, 153, 160*;
>
> (3) The "IFD is not and never has been a labor union within the meaning of section 6 and 20 of the Clayton Act," *15 U.S.C. § 17*, and thus did not satisfy the labor union exemption from the Federal antitrust laws, *Id. at 76, 153, 160*; and
>
> (4) The McCarran-Ferguson Act, *15 U.S.C. §§ 1012*, *1013(b)*, which exempts the practice of insurance from Federal antitrust laws did not apply in the instant case because the IFD did not engage in the business of insurance and even though the illegality concerned the insurance industry, the McCarran-Ferguson exemption does not apply to boycotts, *Id.*

The IFD does not appeal any of these decisions.

[8] According to the Supreme Court in *National Soc. of Professional Engineers v. United States, 435 U.S. 679, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978)*, ***HN2***[] there are two categories of antitrust analysis:

> "In the first category are agreements whose nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality -- they are 'illegal *per se*.' In the second category are agreements whose competitive effect can only be evaluated by analyzing the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed."

435 U.S. at 692. The *per se* analysis in Federal ***antitrust law*** applies to certain types of group boycotts. *See, e.g., Klor's v. Broadway-Hale Stores, 359 U.S. 207, 3 L. Ed. 2d 741, 79 S. Ct. 705 (1959)* (retailers combined with appliance manufacturers and distributors to boycott competing retailer); *Fashion Originators' Guild v. F.T.C., 312 U.S. 457, 85 L. Ed. 949, 61 S. Ct. 703 (1941)* (organization of dress manufacturers and fabric designers boycotted retailers and manufacturers who dealt in copies of originals or refused to promise not to deal in such copies). According to the settled law in this circuit, "the ***HN3***[] common attribute of *per se* illegal group boycotts is 'a concerted attempt by a group of competitors at one level to protect itself from competition from non-group members who seek to compete at that level.'" *U.S. Trotting Ass'n v. Chicago Downs Ass'n, Inc., 665 F.2d 781, 788 (7th Cir. 1981)* (en banc) (quoting *Smith v. Pro Football, Inc., 193 U.S. App. D.C. 19, 593 F.2d 1173, 1178 (D.C. Cir. 1978))*. More recently, this court has stated that group boycotts are illegal *per se* only if they are used to enforce agreements that are themselves illegal *per se. See* *Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, slip op. at 11 (7th Cir. 1984)*; *Vogel v. American Society of Appraisers, 744 F.2d 598, slip op. at 3 (7th Cir. 1984)*. We note, however, that the foundation for this statement initially appeared in *Marrese v. Am. Academy of Orthopaedic Surgeons, 706 F.2d 1488, 1493 (7th Cir. 1983)*, a case that was subsequently vacated by this court, and later appeared in *Wilk v. American Medical Ass'n, 719 F.2d 207, 221 (7th Cir. 1983)*, a case that relied solely upon the vacated *Marrese* opinion.***HN4***[]

such activity was not a *per se* violation, the record did not establish that the "effect on health safety . . . outweigh[ed] the plainly anticompetitive and anti-consumer effects of the IDA/IFD group boycott of dental health care insurers," and thus the activity was also violative of the Federal antitrust laws under a rule of reason analysis. *Id. at 153, 166*.

[20]** Additionally, the IFD argued at the administrative hearing that its practice was "clearly articulated and affirmatively expressed as [Indiana] state policy," "actively supervised" by the state, and thus exempt from the Federal antitrust laws under the doctrine of state action. *See, e.g., California Liquor Dealers v. Midcal Aluminum, 445 U.S. 97, 105, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*. According to the IFD, its refusal to submit copies of a patient's dental x-rays to lay personnel employed by the group dental health care insurers was in compliance with Indiana state law which prohibits aiding and abetting the unlicensed practice of dentistry. [9] The ALJ equivocated on this issue, initially ruling that "there is probably no violation of the law against unlicensed practice of dentistry" when unlicensed lay personnel simply review claims for approval and have no authority to deny such claims in full or in part. *Indiana Federation of Dentists, 101 F.T.C. at 137*. The ALJ further ruled that even if the unlicensed lay personnel are engaged in the unlawful practice of dentistry, the Indiana law does not permit dentists "to organize a group boycott **[**21]** to help enforce the law." *Id.* [10]

[22]** The IFD appealed the ALJ's "Initial Decision" and in February 1983, the Commission **[*1133]** issued a "Final Order." The Commission adopted the ALJ's findings of fact, agreed with the ALJ's determination that the IFD member dentists had engaged in a "group boycott," but rejected the ALJ's conclusion that such conduct was a *per se* violation of the Federal antitrust laws. The Commission reasoned that a *per se* analysis of this case was improper because the IFD member dentists' refusal to comply with the insurers' x-ray directive was not "wholly

---

Once *per se* illegality is established, there is a conclusive presumption that the conduct is unreasonable in violation of the Federal antitrust laws. *Arizona v. Maricopa County Medical Society, 457 U.S. 332, 344, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*; *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 50, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*; *Northern Pac. R. Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*. If, however, the defendants' concerted conduct is "not designed to drive out competitors, but to achieve some other goal," *U.S. Trotting Ass'n v. Chicago Downs Ass'n Inc., 665 F.2d at 788*, the court must engage in a rule of reason analysis. In this circuit "[i]t is necessary under the rule of reason to show anticompetitive effects, or actual harm to competition, to establish an antitrust violation. . . ." *Bunker Ramo Corp. v. United Business Forms, Inc., 713 F.2d 1272, 1283 (7th Cir. 1983)*; *Havoco of America, Ltd. v. Shell Oil Co., 626 F.2d 549, 556 (7th Cir. 1980)*.

[9] Pursuant to *Ind. Code § 25-14-1-23*, the practice of dentistry includes:

> "Any person . . . who . . . offers to diagnose or professes to diagnose or treats or professes to treat any of the lesions or diseases of the human oral cavity, teeth, gums, maxillary or mandibular structures. . . ."

[10] The record reveals that the State of Indiana was granted leave to intervene in this lawsuit in July 1979 by the United States District Court for the Southern District of Indiana. The district court found that:

> "The State of Indiana has and is, actively regulating both dentists and the practice of dentistry within the State. . . . Under the mandate of Indiana law, Indiana dentists are prohibited from submitting their dental x-rays to third party insurers who employ 'dental consultants,' who are not licensed to practice dentistry, to read or diagnois [sic] the x-rays."

Indiana Federation of Dentists, 101 F.T.C. at 184. Thus, the district court ruled that "[t]he order proposed by the Secretary of the F.T.C. would infringe on the State's right to regulate the practice of dentistry within the State as reserved to the State under its police powers by the *Tenth Amendment to the Constitution of the United States*." *Id. at 148, 184*. At the administrative hearing, the IFD argued that under the doctrine of collateral estoppel, the district court's ruling precluded any ruling by the ALJ on the issue of state action. The ALJ rejected this argument, determining that the district court's findings of fact and conclusions of law on the merits of this case were not necessary for the judgment of leave to intervene, and thus the doctrine of collateral estoppel was inapplicable. *Id. at 143-52*.

motivated by an anticompetitive purpose" nor was it "aimed principally at excluding competitors." *Id. at 168*. [11] Thus, the Commission analyzed the IFD member dentists' conduct under a rule of reason, finding that:

> "the practical implementation of the [IFD] Work Rule was to refuse to cooperate with claims review programs which relied upon submission of x-rays. The effect of [the IFD member dentists'] conduct was to reduce competition among dentists to cooperate with dental reimbursement plans and, by doing so, to thwart the efforts of individual insurance companies to contain costs by offering coverage for only the **[**23]** least expensive adequate course of treatment."

Id. at 171-72. According to the Commission, the IFD member dentists' concerted refusal to comply with the insurers' directive to submit copies of a patient's dental x-rays along with the patient's claim form "*resulted in reducing or eliminating competition among dentists as to their policy of dealing with third-party payers." Id. at 173* (emphasis added). The Commission further found that:

> "In the absence of such concerted behavior, individual dentists would have been subject to the market forces of competition, creating incentives for them to treat patients and comply with the requests of patients' third-party insurers. By colluding, competitor dentists were freed to some extent from these market forces because they knew other participants in the boycott would also refuse to cooperate."

Id.

In response to the IFD's argument that its conduct did not harm competition because "there was not an **[**24]** absolute 'shut off' of x-rays to insurance companies," the Commission found that the IFD's policy of allowing insurers' to attend the dentist's office and view all diagnostic aids, including the patient's x-rays, was prohibitively expensive. The Commission surmised, without substantial evidentiary support in the record, that "even if the procedure were feasible at a higher cost, coercing parties into adopting such a procedure through collusion of competitors still distorts the competitive process." *Id.* The IFD further asserted that adherence to the IFD policy and accepted dental practice of examining all diagnostic aids before determining the proper course of dental treatment ensures patients of quality dental care and, in effect, promotes competition. According to the IFD:

> "Competition is naturally promoted among dentists who treat only after total diagnosis, in that their total treatment plan will be more successful from both a preventative viewpoint and long term maintenance of oral health. Error is less likely, thus reducing needed corrective work. Proper diagnosis will promote proper services, and satisfied patients will patronize those dentists."

[25]** *Id. at 176*. The Commission found, however, that this procompetitive justification was not supported by the evidence adduced at the administrative hearing. The Commission further found that "Indiana law does not affirmatively express any policy in favor of collusion among dentists in order to prevent or influence the use of x-rays by insurance companies" and thus the doctrine of state action did not exempt the concerted conduct of IFD member dentists from the Federal antitrust laws. [12] Accordingly, **[*1134]** the Commission ruled that the "IFD's conduct constituted an unfair method of competition in violation of Section 5 of the FTC Act." *Id. at 179*. On appeal, the IFD contends that under a rule of reason analysis, the evidence presented at the administrative hearing failed to establish that the conduct of the IFD and its member dentists had an anticompetitive effect in a relevant market. In the alternative, the IFD contends that the state action doctrine exempts the IFD member dentists' conduct from the Federal antitrust laws.

[26] II**

---

[11] *See supra* note 8.

[12] The Commission ruled that its consideration of the IFD's state action defense was not barred by the doctrine of collateral estoppel. According to the Commission, when the United States District Court for the Southern District of Indiana granted the State of Indiana leave to intervene in this lawsuit, the court's findings of fact and conclusions of law concerning the State of Indiana's regulation of the dental profession, "were not essential to the judgment ordered" and thus the doctrine of collateral estoppel did not apply.

The issue squarely before this court is whether the collective refusal of the IFD member dentists to comply with the group dental health care insurers' directive to submit copies of a patient's dental x-rays along with the patient's insurance claim form violates the Federal Trade Commission Act § 5. In our review of the Commission's order we are guided by the Congressional language ***HN5***[] of *15 U.S.C. § 45(c) (1982)*, that "[t]he findings of the Commission as to the facts, if supported by evidence, shall be conclusive." According to the settled law in this circuit, the Commission "may draw reasonable inferences from the record." *Spiegel, Inc. v. F.T.C., 540 F.2d 287, 293 (7th Cir. 1976)* (citing *Consolo v. Federal Maritime Commission, 383 U.S. 607, 620, 16 L. Ed. 2d 131, 86 S. Ct. 1018 (1966))*. The Commission's findings of fact "are to be accorded great deference and are to be upheld if supported by substantial evidence." [13] *Kaiser Aluminum & Chemical Corp. v. F.T.C., 652 F.2d 1324, 1329 (7th Cir. 1981).* **[**27]** *See also American Home Products Corp. v. F.T.C., 695 F.2d 681, 686 (3rd Cir. 1982)*; *RSR Corp. v. F.T.C., 602 F.2d 1317, 1320 (9th Cir. 1979)*, *cert. denied* , *445 U.S. 927, 100 S. Ct. 1313, 63 L. Ed. 2d 760 (1980)*. Thus, our review is limited to a determination of whether "the Commission applied incorrect legal standards which prejudiced its findings against petitioners . . . [and] whether the administrative decision is supported by substantial evidence in the hearing record before the examiner." *L.G. Balfour Company v. F.T.C., 442 F.2d 1, 7 (7th Cir. 1971)*.

[28]** In the instant case, the evidence reveals that the members of the IFD collectively agreed upon and drafted a dental policy statement, entitled IFD "work rule," setting forth the IFD position that "[p]roper diagnosis and treatment planning predicates the doctor correlating all diagnostic aids, with a history and with all clinical findings." *Indiana Federation of Dentists, 101 F.T.C. at 119, 129*. This policy of quality and proper dental care comports with the Indiana dentists' code of professional conduct, as drafted by the Indiana Board of Dental Examiners, that the competent practice of dentistry requires "minimum standards of performance in diagnosis or treatment as measured against generally prevailing peer performance." 828 Ind. Adm. Code 1-1-15(b) (1984). The IFD policy also complies with the American Dental Association's position that "[t]he dentist's primary obligation of service to the public shall include the delivery of quality care, competently and timely, within the bounds of the clinical circumstances presented by the patient. Quality of care shall be a primary consideration of the dental practitioner." ADA Principles of Ethics and Code of Professional **[**29]** Conduct at 2 (1983). Moreover, the IFD policy of quality and proper dental care provides that the dentist "has a moral and legal responsibility to not allow a determination of his patient's condition to be made for any purpose, without the benefit of a complete **[*1135]** examination which takes into account" all diagnostic aids, with a complete patient history and all clinical findings. *Indiana Federation of Dentists, 101 F.T.C. at 119, 129, 176*. Implicit within this IFD policy of quality and proper dental care is a determination that the review of x-rays *alone* is ineffective and insufficient when formulating a proper course of dental treatment.

According to the ALJ's findings of fact, as adopted by the Commission, an x-ray establishes *only*:

> "tooth decay, an abscess, bone loss around the teeth or pathology in the bone itself.
>
> * * *
>
> *Even a trained dentist can not determine the choice of restorative material just by looking at an x-ray, because that choice varies with how well the patient takes care of his teeth, which, in turn, affects how long the restorative material will last. . . . [Moreover] x-rays will not show the patient's mental* **[**30]** *condition, which is said to have considerable bearing on the treatment*."

Id. at 129-30 (emphasis added). For these reasons, the ALJ found that "*the experts -- on all sides -- seemed to agree that an x-ray or other diagnostic aid alone is not enough for an accurate diagnosis." Id. at 131* (emphasis added). Similarly, the American Dental Association provides that a proper "diagnosis and treatment plan cannot be made from radiographs alone. Benefits shall not be determined solely on the basis of radiographic evidence. . . . *Proper dental treatment is predicated on a diagnosis from many types of examination and not radiographs alone*." ADA Policies on Dental Care Programs 1974:653 at 34-35 (1984) (emphasis added). Thus, the IFD policy of

---

[13] ***HN6***[] The Supreme Court defines substantial evidence as "such relevant evidence as a reasonable mind might accept as adequate to support a conclusion." ***Consolo v. Federal Maritime Commission, 383 U.S. at 619-20*** (quoting *Edison Co. v. Labor Board, 305 U.S. 197, 229, 83 L. Ed. 126, 59 S. Ct. 206 (1938))*. *See also Steadman v. SEC, 450 U.S. 91, 99-100, 67 L. Ed. 2d 69, 101 S. Ct. 999 (1981)*.

quality dental care comports not only with the Indiana dental code and the American Dental Association code of professional conduct, but also with the American Dental Association's policy statement that a proper dental diagnosis involves many types of examinations and the ALJ's finding that an x-ray alone is not enough for an accurate dental diagnosis.

Indeed, just as a competent and qualified **[**31]** physician performs numerous tests for a recurring headache, to rule out a possible brain tumor, blood clot, migraine condition, dysfunction of the eyes, ears, or mouth, ruptured blood vessel, or drug reaction; a competent and qualified dentist, when prescribing a proper course of dental treatment, must examine and review the entire oral cavity, including the teeth, gum and mouth tissue, tongue, maxillary and mandibular bone structure, and loss of bone structure, along with a case history, x-rays, and all clinical findings. A thorough examination of this nature assures the patient of quality dental care and protects the dentist from future claims of negligence and possible dental malpractice. The evidence in this case establishes that the IFD member dentists collectively adhered to their policy of quality and proper dental care, refusing to comply with the group dental health care insurers' directive to submit copies of a patient's x-rays without the benefit of examining and reviewing all diagnostic aids, a case history, and all clinical findings. Instead, the dentists uniformly responded to the insurers' x-ray directive with a form letter, prepared by the IFD, that provided in pertinent **[**32]** part:

> "It is the policy of this office to provide all diagnostic aids to third parties on an in-office basis and with the consent of the patient. . . . If you will have your consultant contact my office to set up an appointment, I will furnish records and ask the patient to be present for an examination."

Indiana Federation of Dentists, 101 F.T.C. at 122. In light of the evidence presented at the administrative hearing, it is clear that the collective refusal of the IFD member dentists to comply with the insurers' x-ray directive resulted from the dentists' adherence to a legal, moral, and ethical policy of quality dental care that requires a complete examination of all diagnostic aids before formulating a proper course of dental treatment. Accordingly, the focus of our review is whether the conduct of the IFD member dentists in **[*1136]** adopting and collectively adhering to a policy that complies with the established, accepted, and approved standards of quality dental care constitutes a group boycott in violation of the Federal Trade Commission Act § 5.

A. GROUP BOYCOTT

In *Phil Tolkan Datsun v. Greater Milwaukee, Etc., 672 F.2d 1280 (7th Cir. 1982),* **[**33]** this court set forth the general rule that:

> "'**HN7**[↑] *The classic "group boycott" is a concerted attempt by a group of competitors at one level to protect themselves from competition from non-group members who seek to compete at that level*. Typically, the boycotting group combines to deprive would-be competitors of a trade relationship which they need in order to enter (or survive in) the level wherein the group operates.'"

672 F.2d at 1284 (emphasis added) (quoting *Smith v. Pro Football, Inc., 193 U.S. App. D.C. 19, 593 F.2d 1173, 1178 (D.C. Cir. 1978))*. *See also* *Kreuzer v. Am. Academy of Periodontology, 237 U.S. App. D.C. 43, 735 F.2d 1479, 1493 (D.C. Cir. 1984)*; L. Sullivan, *Handbook of the Law of Antitrust* 230, 232 (1977). Contrary to the classic group boycott, the instant case does not involve a group of competitors banning together to protect themselves from non-group competitors. The record reveals that the IFD member dentists simply provide patients with quality dental care and pursuant to the terms of a **[**34]** collective bargaining agreement, the group dental health care insurers pay for the dentists' services. The record contains no evidence that the dentists compete with the insurers to attract patients, provide dental services, or prescribe dental treatment. Indeed, the ALJ found that "neither IFD nor any dentist member stands in the relation of competitor to any insurer. . . ." *Indiana Federation of Dentists, 101 F.T.C. at 124-25*. In light of the non-competitive market structure, we agree with the Commission that the "conduct by the Indiana dentists involved a group decision to withhold [the submission of] x-rays from [insurance companies] *which were neither customers nor competitors*" and thus, the IFD's conduct was "not aimed principally at excluding competitors." *Id. at 168* (emphasis added). The refusal to comply with the insurers' x-ray directive is not an attempt by the IFD member dentists to protect themselves from competitors; it is an adherence to a legal, moral, and ethical policy of quality and proper dental care. Thus, due to the fact that the group dental health care insurers are not competitors of the IFD member dentists, we hold that the **[**35]** dentists' refusal to comply with the insurers' x-ray directive does not constitute a classic group boycott.

Despite an absence of competition between the IFD member dentists and the group dental health care insurers within the State of Indiana, the Supreme Court has concluded that "the ***HN8***[] term 'boycott' is not limited to concerted activity against . . . competitors of members of the boycotting group." *St. Paul Fire & Marine Ins. Co. v. Barry, 438 U.S. 531, 552, 57 L. Ed. 2d 932, 98 S. Ct. 2923 (1978)* ("*St. Paul Fire & Marine"). In St. Paul Fire & Marine*, four medical malpractice insurers in the State of Rhode Island allegedly entered into an agreement whereby three insurers refused to deal with physicians and hospitals within the state, thereby compelling the physicians and hospitals to accept curtailed medical malpractice insurance from the fourth insurer, in alleged violation of the Sherman Act *§ 1*. The insurers argued that their activities were immune from Sherman Act scrutiny under the McCarran-Ferguson Act, *15 U.S.C. §§ 1011-1015*, which excepts **[**36]** the practice of insurance from the Federal antitrust laws. The physicians and hospitals argued that the insurers' activity constituted a boycott and pursuant to the express language of the McCarren-Ferguson Act § 3, *15 U.S.C. § 1013(b)*, the Sherman Act remains applicable "to any agreement to boycott, coerce, or intimidate. . . ." According to the Supreme Court, "*[t]he generic concept of boycott refers to a method of pressuring a party with whom one has a dispute by withholding, or enlisting others to withhold,* ***[*1137]*** *patronage or services from the target*." *438 U.S. at 541* (emphasis added). Based upon this broad definition of the term "boycott," the Court held that "[w]hatever other characterizations are possible, [the insurers'] conduct fairly may be viewed as 'an organized boycott' . . . ." *Id. at 544* (quoting *Fashion Guild v. F.T.C., 312 U.S. 457, 465, 85 L. Ed. 949, 61 S. Ct. 703 (1941))*.

This court has recognized that "'[t]he term "group boycott" . . . is in reality a very broad label for divergent types of concerted activity.'" *Phil Tolkan Datsun v. Greater Milwaukee, etc., 672 F.2d at 1285* **[**37]** (quoting *Mackey v. National Football League, 543 F.2d 606, 619 (8th Cir. 1976)*, *cert. dismissed*, *434 U.S. 801, 54 L. Ed. 2d 59, 98 S. Ct. 28 (1977))*; *U.S. Trotting Ass'n v. Chicago Downs Ass'n, Inc., 665 F.2d at 788*. ***HN9***[] The broad label of "group boycott" generally applies to conduct involving a concerted refusal to deal, commonly defined as "an agreement by two or more persons not to do business with other individuals, or to do business with them only on specified terms." II E. Kintner, *Federal* ***Antitrust Law*** § 10.27 at 155 (1980). The instant case concerns an agreement among the IFD member dentists to adhere to established, accepted, and approved standards of quality dental care by requiring that the group dental health care insurers examine and review all diagnostic and clinical aids before formulating a proper course of dental treatment. In furtherance of a legal, moral, and ethical policy that x-rays alone are ineffective and insufficient in formulating a proper course of dental treatment, the dentists refuse to submit copies of a **[**38]** patient's dental x-rays without the benefit of a complete diagnostic and clinical examination. Instead, the dentists expressly invite the insurers to visit their respective dental offices to review the patient's complete file, including reports compiled by dental specialists, the patient's case history, x-rays, all clinical findings, and examinations of the oral cavity, gum and mouth tissue, teeth, and bone structure.

The ALJ found that "most dentists have typically expressed their willingness to let insurers' 'qualified' experts come to their (the dentists') offices to look at x-rays and other diagnostic aids." *Indiana Federation of Dentists, 101 F.T.C. at 125 n.337*. The ALJ further found that "smaller insurers had generally gone along with the Indiana dentists' demands" to not require the submission of dental x-rays alone, but to review and examine all diagnostic and clinical aids in determining a proper course of dental treatment. Moreover, the evidence reveals that in 1972, dentists in the Allen County-Fort Wayne, Indiana area continually refused to comply with a request by the Aetna Insurance Co. to submit copies of a patient's x-rays along with the patient's **[**39]** dental claim form. Aetna responded by hiring a licensed dentist and "arranged for him to go to the office of each dentist concerned and work with the relevant x-rays and any other diagnostic aids in the dentist's files." *Id. at 98*. In January 1974, Aetna settled upon a plan whereby a licensed dentist would travel from Aetna's Indianapolis office to Anderson, Indiana once a week to review x-rays and conduct in-mouth examinations at an estimated cost of $10 per patient.

In light of the fact that insurers have accepted the dentists' invitation to visit the dental office to examine and review all diagnostic and clinical aids, it is clear that the IFD member dentists did not engage in a *complete* refusal to deal with the group dental health care insurers. The dentists continued to treat all patients, including those covered by group dental health care plans, and thus continued to deal with the insurers on a regular basis. According to the record, the IFD member dentists simply agreed to require that group dental health care insurers do business on the dentists' terms, in compliance with established, accepted, and approved standards of quality dental care. Thus, **[**40]** the group boycott label in the instant case refers to the dentists' concerted effort to ensure quality dental care by requiring insurers to examine and review all diagnostic and clinical **[*1138]** aids before formulating a course of dental treatment for purposes of a benefit determination. The dentists' conduct was neither a classic "group boycott" intended to protect dentists from competitors nor a complete refusal to deal with insurers in their efforts to control spiraling dental costs. In effect, the IFD member dentists adopted and implemented a policy that comports with legal, ethical, and moral standards of quality dental care but conflicts with the practice of group dental health care insurers to formulate a course of dental treatment and to determine insurance benefits based solely upon an insurance claim form and copies of a patient's dental x-rays.

B. RULE OF REASON

In reviewing the anticompetitive nature of the IFD member dentists' conduct, we initially note the commission's observation that the "allegation of unfair methods of competition [against the IFD] is based on Sherman Act principles." *Id. at 180 n.24*. Indeed, the respondent, FTC, admits **[**41]** in its brief that the Commission analyzed this case under the Sherman Act *§ 1*, *15 U.S.C. § 1*, and the Federal Trade Commission Act § 5, *15 U.S.C. § 45*. *See also Id. at 124, 153*. [14] Accordingly, our review of the Commission's order is guided by the legal principles of Federal ***antitrust law*** established under both the Sherman Act and the Federal Trade Commission Act. Foremost among these legal principles is that ***HN10***[] "[t]he 'rule of reason' is the established standard of analysis for determining whether [a Federal] antitrust violation" has occurred. *Bunker Ramo Corp. v. United Business Forms, Inc., 713 F.2d 1272, 1283 (7th Cir. 1983)*. *See also Arizona v. Maricopa County Medical Society, 457 U.S. 332, 343, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*; *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 49, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*. The rule of reason "requires the factfinder to decide whether under all the circumstances of the case the restrictive practice imposes an unreasonable **[**42]** restraint on competition." *Arizona v. Maricopa County Medical Society, 457 U.S. at 343*. *See also Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 104 S. Ct. 1464, 1469, 79 L. Ed. 2d 775 (1984)*. According to the Supreme Court, "[o]nce experience with a particular kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it, it has applied a conclusive presumption that the restraint is unreasonable." *Arizona v. Maricopa County Medical Society, 457 U.S. at 344*. *See also N.C.A.A. v. Bd. of Regents of Univ. of Okl., 468 U.S. 85, 104 S. Ct. 2948, 2960, 82 L. Ed. 2d 70 (1984)*; *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 1560 n.25, 80 L. Ed. 2d 2 (1984)*; *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. at 50 n.16*. This principle of *per se* unreasonableness "avoids the necessity for an incredibly complicated and prolonged economic investigation into the entire history of the industry involved, as well as related industries. . . ." *Northern Pac. R. Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*; **[**43]** *Broadcast Music, Inc. v. CBS, 441 U.S. 1, 8 n.11, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*; *Arizona v. Maricopa County Medical Society, 457 U.S. at 344*.

The Supreme Court further provides that ***HN11***[] "*[p]er se* rules of illegality are appropriate only when they relate to conduct that is manifestly anticompetitive." *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. at 49-50*. *See* **[**44]** *also Northern Pac. R. Co. v. United States, 356 U.S. at 5* (certain agreements or practices because of their pernicious effect on competition and lack of any redeeming virtue, are conclusively presumed **[*1139]** to be *per se* unreasonable). Additionally, "the *per se* rule is not employed until after considerable experience with the type of challenged restraint." *Broadcast Music, Inc. v. CBS, 441 U.S. at 19 n.33*. *See also Lekto-Vend Corp. v. Vendo Co., 660 F.2d 255, 265 n.11 (7th Cir. 1981)*, *cert. denied*, *455 U.S. 921, 71 L. Ed. 2d 461, 102 S. Ct. 1277 (1982)*; *Havoco of America, Ltd. v. Shell Oil Co., 626 F.2d 549, 555 (7th Cir. 1980)*. In accord with these legal principles the law in this circuit is well-settled that a *per se* analysis "should not be applied, and has never been applied by the

[14] According to the Supreme Court in *F.T.C. v. Cement Institute, 333 U.S. 683, 691-92, 92 L. Ed. 1010, 68 S. Ct. 793 (1948)*, "soon after its creation the commission began to interpret the prohibitions of § 5 as including those restraints of trade which also were outlawed by the Sherman Act, and . . . this Court has consistently approved that interpretation of the Act." *See also* 11 von Kalinowski, *Antitrust Laws and Trade Regulation* § 121.01 at 121-22 (1983).

Supreme Court, to concerted refusals that are not designed to drive out competitors but to achieve some other goal." U.S. Trotting Ass'n v. Chicago Downs Ass'n, Inc., 665 F.2d at 788 (quoting Smith v. Pro Football, Inc., 593 F.2d at 1180). *See also* Kreuzer v. Am. Academy of Periodonotology , 735 F.2d at 1491; **[**45]** P. Kissam, ***Antitrust Law*** *and Professional Behavior*, 62 Texas L.R. 1, 35-36 (1983). Based upon the Commission's finding that the conduct of the IFD member dentists is "not wholly motivated by an anticompetitive purpose, . . . is not aimed principally at excluding competitors," Indiana Federation of Dentists, 101 F.T.C. at 168, and our previous analysis of the market structure between dentists and insurers within the State of Indiana, it is clear that the IFD member dentists are not attempting "to drive out competitors." Rather, the dentists are adhering to a legal, moral, and ethical policy of quality and proper dental care, requiring that the insurers examine and review all diagnostic aids before denying or approving a proper course of dental treatment. The record clearly reveals that the IFD member dentists' conduct is not manifestly anticompetitive, nor has it been the subject of prior Federal antitrust analysis, thus we agree with the Commission that the IFD member dentists' conduct in adhering to their policy of quality dental care must be analyzed under a rule of reason. *Cf.* Kreuzer v. Am. Academy of Periodonotology, 735 F.2d at 1492 **[**46]** (if the boycott amounts to a public service, sufficient questions of competitive effect are raised to allow release from *per se* treatment); Wilk v. American Medical Ass'n, 719 F.2d 207, 221 (7th Cir. 1983), *cert. denied*, *467 U.S. 1210, 104 S. Ct. 2398, 81 L. Ed. 2d 355 (1984)* (the anticompetitive effect of a boycott in the medical profession is too uncertain to be amenable to *per se* treatment). [15]

[47]** The Supreme Court precedent clearly provides that ***HN12***[] "the inquiry mandated by the Rule of Reason is whether the challenged agreement is one that promotes competition or one that suppresses competition." National Soc. of Professional Engineers v. United States, 435 U.S. at 691. According to the Court, under a rule of reason analysis:

> "the court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts. This is not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent **[*1140]** may help the court to interpret facts and to predict consequences."

Chicago Board of Trade v. United States, 246 U.S. 231, 238, 62 L. Ed. 683, 38 S. Ct. 242 (1918). The **[**48]** rule of reason analysis "does not open the field of antitrust inquiry to any argument in favor of a challenged restraint that may fall within the realm of reason. Instead, it focuses directly on the challenged restraint's impact on competitive conditions." National Soc. of Professional Engineers v. United States, 435 U.S. at 688. Thus, ***HN13***[] "[u]nder the rule of reason, a showing of anticompetitive effect in the relevant market is an essential predicate of antitrust liability." Phil Tolkan Datsun v. Greater Milwaukee, etc., 672 F.2d at 1287. *See also Jefferson Parish Hosp.* Dist. No. 2 v. Hyde, 104 S. Ct. at 1567. In this circuit "it is . . . well established that any rule of reason analysis requires a showing of anticompetitive market effect. To hold otherwise would ignore the very purpose of the [Federal] antitrust laws which were enacted for the protection of competition, not competitors." U.S. Trotting Ass'n v. Chicago Downs Ass'n, Inc., 665 F.2d at 790 (quoting Lektro-Vend Corp. v. Vendo Co., 660 F.2d at 268). **[**49]** *See also* Wilk v. American Medical Ass'n, 719 F.2d at 227 (under rule of reason analysis plaintiff must show that effect of conduct is to restrict competition rather than promote it); Dos Santos v. Columbus-Cuneo-Cabrini Med. Center, 684 F.2d 1346,

---

[15] In *National Soc. of Professional Engineers v. United States*, the Supreme Court reasoned that professional services, including the medical profession, "by their nature . . . may differ significantly from other business services, and, accordingly, the nature of the competition in such services may vary. Ethical norms may serve to regulate and promote this competition, and thus fall within the Rule of Reason." 435 U.S. at 696. We note, however, that the Court has applied a *per se* analysis in cases involving the medical profession; refusing "to tolerate manifestly anticompetitive conduct simply because the health care industry is involved." *Jefferson Parish Hosp.* Dist. No. 2 v. Hyde, 104 S. Ct. at 1565-66 n.42. In the instant case, the conduct of the IFD member dentists is not manifestly anticompetitive. Moreover, our rule of reason analysis stems from the fact that the conduct of the IFD member dentists is not designed to drive out competitors but to promote a legal, moral, and ethical policy of quality and proper dental care. *See* U.S. Trotting Ass'n v. Chicago Downs Ass'n, Inc., 665 F.2d at 787.

1352 (7th Cir. 1982) (under rule of reason analysis plaintiff must show the challenged restraint has an adverse impact on competition in a relevant market). [16] Moreover, by requiring a showing of an anticompetitive effect in a relevant market we assure the consumer that the challenged activity actually harms competition, and thus we uphold the intended purpose of the Federal antitrust laws as a "consumer welfare prescription." *N.C.A.A. v. Bd. of Regents of Univ. of Okl., 104 S. Ct. at 2964* (quoting *Reiter v. Sonotone Corp., 442 U.S. 330, 343, 60 L. Ed. 2d 931, 99 S. Ct. 2326 (1979))*. *See also* *Products Liability Ins. v. Crum & Forster Ins., 682 F.2d 660, 663-64 (7th Cir. 1982)*; R. Bork, *The Antitrust Paradox* 66 (1978); 21 Cong. Rec. 2455, 2456-63 (March 21, 1890) (statement of Sen. Sherman).

[50] C. ANTICOMPETITIVE EFFECT**

In light of the pertinent case law, we review the Commission's findings of a relevant market and the anticompetitive effect that the IFD member dentists' conduct had therein. We initially note that the Commission's analysis of the relevant market consisted of a single paragraph placed within a footnote of the "Final Order":

> "As in any rule of reason case, attention must be paid to market definition in order to assess competitive effects. No elaborate analysis is required here, since the record shows that under IDA's leadership, the conspiracy spanned many, if not most, localities in Indiana. *Under the leadership of IFD, it continued to be strong in the local areas covered by that organization's three chapters*."

Indiana Federation of Dentists, 101 F.T.C. at 173 n.12 (emphasis added). Within this ambiguous relevant market (apparently including the IFD's chapters in Anderson, Ft. Wayne, and Lafayette, Indiana) the Commission found that the "IFD's concerted refusal to furnish x-rays to third-party payers substantially harmed competition among dentists by eliminating incentives for individual dentists to **[**51]** cooperate with cost-containment programs of third-party payers." *Id. at 179*. According to the Commission, this "concerted activity by **[*1141]** competitors resulted in reducing or eliminating competition among dentists as to their policy of dealing with third-party payers." *Id. at 173*. The Commission further found that "[i]n the absence of such concerted behavior, individual dentists would have been subject to market forces of competition, creating incentives for them to treat patients and comply with the requests of patients' third-party insurers." *Id.* Thus, under a rule of reason analysis, the Commission found that within the area of the IFD's three separate chapters, the conduct of the 84 current and 8 former IFD member dentists had an anticompetitive effect *among dentists as to their policy of dealing with third party payers*.

It is important to note that the focus of the FTC's complaint and the basis of the Commission's finding was that the IFD member dentists' conduct harmed competition *among dentists in their policy of dealing with group dental health care insurers*. Neither the ALJ nor the Commission found that the dentists' **[**52]** conduct harmed competition among insurers, in their efforts to provide group dental health care coverage, nor among dentists, in their efforts to attract and treat patients covered by group dental health plans. Indeed, the Commission found that the "complaint did not clearly allege harm to competition in the dental insurance market, and conclusions about competitive harm to this market are unnecessary to our decision." *Id. 101 F.T.C. at 174*. Accordingly, the limited scope of our review is whether substantial evidence supports the commission's finding that the dentists' adherence to a legal, moral, and ethical policy of quality and proper dental care and their refusal to comply with the insurers' x-ray directive, had an anticompetitive effect *among dentists in their policy of dealing with group dental health care insurers*.

The ALJ's "Initial Decision" and the Commission's "Final Order" are replete with references to the *clearly* and/or *plainly anticompetitive* conduct of the IFD member dentists in their policy of dealing with group dental health

---

[16] According to the Commission, "[t]o assess the legality of the IFD restrictions under a rule of reason analysis, we must examine their nature, purpose and effect on competition, including an assessment of any possible procompetitive impact." *Indiana Federation of Dentists, 101 F.T.C. at 168-69*. The Commission's statement is not a complete and accurate statement of the rule of reason analysis. An *examination* of the effect on competition is not sufficient, there must be an actual *showing* that the alleged proscribed conduct has an anticompetitive effect in a relevant market. *Phil Tolkan Datsun v. Greater Milwaukee, etc., 672 F.2d at 1287*; *U.S. Trotting Ass'n v. Chicago Downs Ass'n, Inc., 665 F.2d at 790*; *Lektro-Vend Corp. v. Vendo Co., 660 F.2d at 268*.

insurers. Implicit in this unsupported conclusory statement is a factual assumption that dentists in Anderson, **[**53]** Fort Wayne, and Lafayette, Indiana actually competed against one another in dealing with such insurers, and in complying with the insurers' directive to submit copies of a patient's dental x-rays along with the patient's claim form. The record is void of any finding that dentists within these three areas did, in fact, engage in any form of competition in their policy of dealing with insurers or in complying with the insurers' x-ray directive. The record contains no substantial evidence nor thorough analysis of the total number of dental patients within the relevant market; the percentage of dental patients covered by group dental health care plans within the relevant market; the availability and proximity of dentists from surrounding areas of Indiana; the fees charged those patients covered by group dental health care plans, as compared to the fees charged patients without such coverage, within the relevant market; the policy of non-IFD member dentists in dealing with group dental health care insurers within the relevant market; or the general policy of dental insurers throughout the State of Indiana in examining a proposed or completed course of dental treatment for purposes of benefit **[**54]** determination. Indeed, the ALJ found that " *the record here is substantially deficient in evidence* as to just what supplementation of x-rays for diagnoses is the usual practice of the dental health care insurers serving Indiana." *Id. at 132* (emphasis added). Upon examination of the record, the parties' briefs, the ALJ's "Initial Decision," and the Commission's "Final Order" we discern no analysis of the factors which are necessary and essential to a finding that dentists in Anderson, Fort Wayne, and Lafayette, Indiana do, in fact, compete with one another in their policy of dealing with group dental health care insurers. The Commission apparently assumed, without substantial evidentiary support in the record, that because the IFD member dentists acted in concert rather than individually, competition had to exist among and between dentists **[*1142]** in their policy of dealing with the insurers. An equally tenable argument, however, is that the IFD member dentists acted in concert because of their conviction to the legal, moral, and ethical policy of quality and proper dental care that requires a review of all diagnostic and clinical aids in formulating a proper course of **[**55]** dental treatment. *See, e.g., Kreuzer v. Am. Academy of Periodonotology, 735 F.2d at 1494*. Though the Commission's assumption of competition may be valid in the abstract, it is not supported by substantial evidence in the record.

Even if "reasonable inferences" could be drawn from the record to show that dentists in the relevant market did, in fact, compete in their policy of dealing with group dental health care insurers, the record is void of any substantial evidence to support the Commission's finding that the conduct of the IFD member dentists harmed this competition or had an anticompetitive effect. The Commission apparently reasoned that because the IFD member dentists had substantial market power within the Madison County-Anderson, Indiana area and the Allen County-Ft. Wayne, Indiana area, the dentists' collective adherence to their policy of quality and proper dental care altered these areas of the relevant market, allowing the dentists to refuse to comply with the insurers' x-ray directive without having to fear the potential loss of group dental health care patients. In support of this position, the Commission relied upon a letter written by the **[**56]** secretary of the Anderson IFD chapter, claiming that in September 1976, 95 percent of all practicing dentists in Madison County had joined the IFD. The Commission further relied upon a newsletter released by members of the Lafayette IFD chapter alleging that by September 1977, "all but a few dentists" in the four county Lafayette chapter were members of the IFD. Based upon these two separate letters, the Commission concluded that the IFD had substantial market power in two areas of the relevant market and that:

> "in the absence of . . . concerted behavior, individual dentists would have been subject to market forces of competition, creating incentives for them to treat patients and comply with the requests of patients' third-party insurers. By colluding, competitor dentists were freed to some extent from these market forces because they knew other participants in the boycott would also refuse to cooperate."

Indiana Federation of Dentists, 101 F.T.C. at 173. Though the documentary evidence relied upon by the Commission to find market power may be sufficient to warrant an investigation into the practices of the IFD and its member dentists, the **[**57]** evidence falls far short of establishing that the dentists' conduct altered the relevant market to harm competition among dentists in their policy of dealing with group dental health care insurers.

According to the Commission, the harmful effect of the IFD member dentists' conduct in adhering to their legal, moral, and ethical policy of quality and proper dental care was to eliminate "incentives for individual dentists to cooperate with [the insurers'] cost-containment programs" and thus to "thwart the efforts of individual insurance companies to contain costs by offering coverage for only the least expensive adequate course of treatment." *Id. at 171-72, 179*. We note that neither the ALJ nor the Commission delineated the alleged incentives available to dentists for complying with the insurers' x-ray directive. Contrary to a finding of such incentives, the record clearly reveals that even when dentists refused to submit copies of a patient's x-rays along with the patient's claim form, group dental health care insurers continued to examine and process the patients' dental claim. We further note that neither the ALJ nor the Commission found that the submission of **[**58]** a patient's dental x-rays actually lowered the insurers' dental costs, or that the refusal to submit copies of a patient's x-rays actually increased dental costs. Indeed, the Commission expressly declined to consider these issues, claiming that "it is not for . . . the Commission to judge the efficiency of the arrangements **[*1143]** selected by insurance companies to control costs." *Id. at 175*. *See also* D. Clanton, *FTC and the Professions*, 52 Antitrust L.J. 209, 218 n.33 (1983). In light of this evidence, it is clear that the Commission applied a "limited rule of reason analysis . . . but did not require elaborate proof of anticompetitive effect." D. Clanton, *FTC and the Professions*, 52 Antitrust L.J. at 218. As a result, the Commission's finding that the IFD member dentists' conduct had an *anticompetitive effect* among dentists in their policy of dealing with group dental health insurers is not supported by substantial evidence in the record.

A review of the evidence presented at the administrative hearing reveals that the IFD member dentists did not refuse to allow insurers access to a patient's dental x-rays. In **[**59]** furtherance of the established, accepted, and approved IFD policy of quality and proper dental care, the IFD member dentists allowed insurers to visit the dental office to review and examine the patient's x-rays along with all of the other diagnostic and clinical aids used in formulating a proper course of dental treatment. The evidence reveals that the IFD member dentists continued to treat patients, including those covered by group dental health care plans, and continued to make dental diagnoses that were subject to review and approval by group dental health care insurers. Thus, the IFD member dentists, did, in fact, compete among themselves and with non-IFD dentists in their billing of patients covered by group dental health care plans and in their policy of dealing with the insurers.

According to the Commission, the IFD member dentists offer to insurers to visit the dental office to review and examine all diagnostic and clinical aids did not reduce the harm to competition.

> "While it is true that respondent was willing to allow *some* arrangements whereby x-rays could be examined by insurers -- in particular, allowing insurers' consultants to make visits to the dentists' **[**60]** offices -- the record is clear that this was prohibitively expensive. . . . Moreover, even if the procedure were feasible at a higher cost, coercing parties into adopting such a procedure through collusion of competitors still distorts the competitive process."

Indiana Federation of Dentists, 101 F.T.C. at 174-75, 125 n.337. [17] The Commission's finding is tempered by evidence in the record that "smaller insurers had generally gone along with the Indiana dentists' demands" and that group dental health care insurers did, in fact, visit dental offices to examine and review all diagnostic and clinical aids, including x-rays. Moreover, as long as the IFD member dentists continued to treat patients covered by group dental health care plans and invite their insurers to the dental office to review and examine all diagnostic and clinical aids, the IFD member dentists continued to compete among themselves and with non-IFD dentists in their policy of dealing with group dental health insurers. Any expenses resulting from the adherence to the IFD policy of quality and proper dental care affected the insurers in their review of dental claims, not the dentists in their **[**61]** competition for patients covered by group dental health care plans or in their competition to deal with the patients' insurers. The record clearly reveals that the IFD member dentists continued to compete in their policy of dealing with group dental health insurers; the dentists simply required that the insurers abide by established, accepted, and

---

[17] The ALJ found that:

> "There is unchallenged testimony in this record to the effect that it is not economically feasible and in any event it would be a terrible waste of time to have insurers' professional dental consultants constantly travelling from office to office to talk to dentists (when available) and look at their x-rays."

Indiana Federation of Dentists, 101 F.T.C. at 84.

approved standards of quality and proper dental care, examining and reviewing all diagnostic aids before formulating a proper course of dental treatment.

The record is void of any substantial evidence to support the Commission's finding that the IFD **[**62]** member dentists' refusal **[*1144]** to comply with the insurers' x-ray directive, had an anticompetitive effect among dentists as to their policy of dealing with group dental health care insurers. *Accord Boddicker v. Arizona State Dental Ass'n, 680 F.2d 66, 68 (9th Cir.)*, *cert. denied*, *459 U.S. 837, 74 L. Ed. 2d 79, 103 S. Ct. 83 (1982)* (no arguments presented to demonstrate an adverse effect on competition between dentists). In effect, the Commission's finding of a Federal antitrust violation, based upon the insufficient evidence presented in this case, is a rubber-stamp approval of the group dental health care insurers' practice to formulate a course of dental treatment based solely upon dental x-rays and an insurance claim form, in violation of established, accepted and approved standards of quality dental care. There is no doubt that judicial sanction of such a practice, under the guise of the Federal Trade Commission Act, runs contrary to public policy and the very purpose of the Federal antitrust laws as a consumer welfare prescription. Indeed, by preventing dentists from joining together to promote standards of quality dental care that **[**63]** comport with the American Dental Association's code of professional conduct and the Indiana dental code, the Commission, with absolutely no expertise or training in the highly advanced field of dentistry, unwisely regulates the dental profession and all of its specialties, including endodontia, exodontia, oral surgery, orthodontia, pedodontia, periodontia, and prosthodontia, to the detriment of consumers. The group dental health care insurers cannot be permitted to forsake standards of quality and proper dental care in an attempt to lower their dental costs, particularly in the instant case where there has been no finding that the review of dental x-rays alone, actually reduces dental costs. According to the evidence presented at the administrative hearing, the IFD member dentists adhered to the legal, moral, and ethical policy of quality dental care, requiring that insurers examine and review all diagnostic and clinical aids before formulating a proper course of dental treatment. The record contains no substantial evidence to support a finding that adherence to the IFD policy had an anticompetitive effect among dentists in their policy of dealing with group dental health care insurers. **[**64]** Thus, we hold that, under a rule of reason analysis, the evidence presented at the administrative hearing failed to establish that the conduct of the IFD and its member dentists had an anticompetitive effect in a relevant market, in violation of the Federal Trade Commission Act § 5. [18]

III

Based upon the foregoing analysis, we vacate the Commission's "cease and desist" order.

Concur by: Fairchild

Concur

FAIRCHILD, Senior Circuit Judge, concurring in result.

This case deals with a significant problem in the operation of group dental insurance in Indiana. The insurance companies have contracted with employers to pay dental bills incurred by employees. The insurer's obligation is limited, however, by the standard **[**65]** of "least expensive adequate course of treatment." An opportunity to examine an x-ray in connection with a claim for services already rendered or pre-authorization of a course of treatment aids the insurer in determining the amount of its obligation to pay, and serves the interests of both insurer and employer in keeping costs under control. Employee patients have an interest in prompt and full payment of their dental bills, as well as in the quality of care. Dentists have an interest in being paid for their service, as well as in freedom to exercise professional judgment in prescribing treatment.

---

[18] In light of this court's holding that under a rule of reason analysis the evidence presented at the administrative hearing failed to establish that the conduct of the IFD and its member dentists had an anticompetitive effect in a relevant market, we need not address the issue of state action.

There is little question that the Indiana Dental Association organized boycott of insurers' requests for x-rays had a significant economic impact on the functioning of **[*1145]** group dental plans within Indiana. In 1974 IDA's membership included 85 to 88 percent of licensed dentists in Indiana. IDA's recommendation to its members to refuse to submit x-rays began as early as 1972 and achieved widespread compliance particularly in those counties where IFD would later form chapters. IDA's boycott forced group insurers to withdraw requests for the mailing of x-rays or face growing backlogs **[**66]** in patient claims. The experience of Aetna Insurance Company, provides an example. Aetna contracted to provide dental coverage to International Harvester employees in 23 states and several foreign countries. The Commission found that:

> Only in Indiana did Aetna experience any difficulty in obtaining x-rays for review of dental treatments. Within one year, there was a backlog of approximately 600 unpaid claims, because of Aetna's inability to verify the maximum allowable benefits. In a one-time effort to eliminate this backlog, the company's dental consultant visited the offices of all the dentists who had refused to submit x-rays and reviewed the claims with them, also urging them to submit x-rays in the future. There were two general reactions to his plea: "one, dentists who said despite the fact that you seem fair, I will not send x-rays to you; and others who said I would like to, but I don't dare to." In January, 1974, Aetna's consultants began doing in-mouth examinations of claimants in its Ft. Wayne office; they continued this practice until the end of November, 1978. In that period, the company conducted 4,700 exams at an estimated cost of ten dollars each. (Transcript **[**67]** references omitted.)

By 1976 some leaders of the IDA inspired boycott became concerned that antitrust entanglements would begin to hinder IDA's already prolonged efforts to force group dental insurers to cease requesting submission of x-rays. These individuals decided to form a "dentist union" that they hoped would give dentists "more muscle" in negotiations with insurance carriers and be immune from antitrust liability. In August 1976 IFD was formed with members in at least six Indiana counties.

After formation, IFD actively encouraged its members to continue the IDA boycott. The record shows that companies operating dental insurance plans in counties with high IFD membership continued to face substantial resistance to requests for x-rays as late as January 1977.

Even viewing the IFD group independently of the IDA background, the size of IFD membership in a number of Indiana counties gave IFD the power to frustrate to a significant extent the insurers' need to review x-rays in those counties without going to exorbitant expense.

The substantial problem posed to the insurers by the concerted refusal to supply x-rays is clear. The difficult questions arise from the **[**68]** application of antitrust doctrine.

The underlying issue is the fairness of the practice of refusal, principally as it impacts insurers, but also as it affects employers and employee-patients. The complaint alleged that the concerted refusals were unfair acts or practices. The FTC acknowledged that the record contained some evidence of consumer injury, but noted that neither the parties nor the ALJ had analyzed the issue of unfairness liability and declined to decide it. The FTC also concluded under the unfair methods of competition allegation a per se analysis is inappropriate, and that it must, under the rule of reason, examine the nature, purpose, and effect on competition of the concerted refusals.

Also acknowledging an argument by complaint counsel that the dentists' concerted action may have caused reduced competition among insurers, the FTC declined to make that finding. The FTC did find that the concerted refusals substantially limited competition among dentists. Thus the inquiry must be focused on competition among dentists, and whether concerted refusal to furnish x-rays to insurers curtails such competition.

[*1146] I join in the result reached by the court, **[**69]** vacating the FTC order, because I conclude that the FTC analysis of the effect of the concerted refusal on competition among dentists is deficient.

Conceivably a dentist's willingness or unwillingness to supply x-rays to an insurer may be significant to an employee in choosing his dentist. Assuming that a prospective patient is aware of the practice of particular dentists in refusing or supplying x-rays, and the significance that refusal or cooperation may have to the patient's interest, he may choose one dentist over another. Presumably a patient would consider cooperation desirable because the bill would be paid more promptly. The IFD, however, might argue that refusal is an advantage to a patient because a dentist who decides to refuse puts a value on preserving his independent judgment of the patient's needs.

Pretty clearly, no evidence was developed on the validity of an assumption that a dentist's policy of refusal or cooperation has any significance in competition among dentists, and the FTC decision fails to analyze the proposition. It may well be that evidence could be produced to support a finding that this policy is really an element of competition among dentists **[**70]** and that a concerted policy of refusal does work a real injury to competition. But this analysis has not been made.

This deficiency is the reason I join in the court's result. There is much in the opinion in which I do not join, particularly in the repeated assertion that the concerted refusal resulted from a legal, moral and ethical policy of quality dental care and complied with established, accepted, and approved standards of such care. The relevance of these assertions is not clear. Insofar as they imply a finding that legal, moral and ethical considerations and approved standards were the sole cause of the concerted policy, they are in conflict with a clearly and adequately supported finding of the FTC of an economic motive.

The FTC said;

> Moreover, it is clear that the concern of IDA's members over possible interference in the doctor-patient relationship was not limited to the effect such interference might have on patient welfare. It also extended to issues of professional pride and the economic well-being of Indiana dentists. Dr. McClure, who later became the first president of IFD, said in a speech to the association's Council on Dental Care Programs in 1974. **[**71]** "We are fighting an economic war where the very survival of our profession is at stake. * * * The name of the game is money. The government and labor are determined to reduce the cost of the dental health dollar at the expense of the dentist. There is no way a dental service can be rendered cheaper when the third party has to have its share of the dollar." * * *
> With the formation of IFD, the economic motive became more explicit.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN4[] Monopolies & Monopolization, Attempts to Monopolize

To establish illegal monopolization under *15 U.S.C.S. § 2*, two elements must be shown: the possession of monopoly power in the relevant market, and the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. Monopoly power is the power to control price or exclude competition. If these two elements are shown, the offense of actual monopolization is complete; it is well established that there is no additional requirement that the power actually be exercised.

Criminal Law & Procedure > ... > Inchoate Crimes > Attempt > General Overview

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Specific Intent

HN5[] Monopolies & Monopolization, Attempts to Monopolize

The offense of attempted monopolization has two elements: specific intent to accomplish the illegal result; and a dangerous probability that the attempt to monopolize will be successful. When evaluating the element of dangerous probability of success, a court does not rely on hindsight but examines the probability of success at the time the acts occur.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] Monopolies & Monopolization, Attempts to Monopolize

The requirement that an accused's conduct have a dangerous probability of success expresses a significant antitrust principle that the antitrust laws protect competition, not competitors, and its related principle that the Sherman Act does not reach practices only unfair, impolite, or unethical.

Opinion by: DAVIS

Opinion

[*1115] W. EUGENE DAVIS, Circuit Judge:

The question presented in this antitrust case is whether the government's complaint states a claim of attempted monopolization under *section 2* of the Sherman Act against the defendants, American Airlines, and its president Robert **[**2]** L. Crandall, for Crandall's proposal to the president of Braniff Airlines that the two airlines control the market and set prices. The district court dismissed the complaint for failure to state a claim under *Federal Rule of Civil Procedure 12(b)(6)* on the ground that the failure to allege an agreement to monopolize was a fatal defect in the complaint and that more than an allegation of solicitation to monopolize was required to state a claim for attempted monopolization. We disagree and reverse.

I.

In February 1982, American Airlines (American) and Braniff Airlines (Braniff) each had a major passenger airline complex, or "hub" at the Dallas-Fort Worth International Airport (DFW). [1] These hubs enabled American and Braniff to gather passengers from many cities, concentrate them at DFW, and then arrange connections for them on American and Braniff flights to other cities. The hub systems gave American and Braniff a marked competitive advantage over other airlines that served or might wish to serve DFW. In addition, the limitations on arrivals imposed by the Federal Aviation Administration (FAA) after the 1981 air traffic controllers' strike impeded any significant expansion or **[**3]** new entry by airlines into service at DFW. These limitations helped enable American and Braniff to maintain their high market shares in relation to other competitors.

In February 1982, American and Braniff together enjoyed a market share of more than ninety percent of the passengers on non-stop flights between DFW and eight **[*1116]** major cities, and more than sixty percent of the passengers on flights between DFW and seven other cities. The two airlines had more than ninety percent of the passengers on many flights connecting at DFW, when no non-stop service was available between the cities in question. Over all, American and Braniff accounted for seventy-six percent of monthly **[**4]** enplanements at DFW.

For some time before February 1982, American and Braniff were competing fiercely for passengers flying to, from and through DFW, by offering lower fares and better service. During a telephone conversation between Robert Crandall, American's president, and Howard Putnam, Braniff's president, the following exchange occurred:

> Crandall: I think it's dumb as hell for Christ's sake, all right, to sit here and pound the * * * out of each other and neither one of us making a * * dime.
> Putnam: Well --
> Crandall: I mean, you know, goddamn, what the * * * is the point of it?
> Putnam: Nobody asked American to serve Harlingen. Nobody asked American to serve Kansas City, and there were low fares in there, you know, before. So --
> Crandall: You better believe it, Howard. But, you, you, you know, the complex is here -- ain't gonna change a goddamn thing, all right. We can, we can both live here and there ain't no room for Delta. But there's, ah, no reason that I can see, all right, to put both companies out of business.
>
> Putnam: But if you're going to overlay every route of American's on top of over, on top of every route that Braniff has -- I can't just **[**5]** sit here and allow you to bury us without giving our best effort.
> Crandall: Oh sure, but Eastern and Delta do the same thing in Atlanta and have for years.
> Putnam: Do you have a suggestion for me?

---

[1] Many airlines structure their services around major airports in network complexes termed hubs. The term derives from the fact that the routes of an airline maintaining a hub operation resemble the hub and spokes of a wheel, with the major airport, for example, DFW, as the hub and the routes to other cities radiating like spokes.

Crandall: Yes. I have a suggestion for you. Raise your goddamn fares twenty percent. I'll raise mine the next morning.
Putnam: Robert, we --
Crandall: You'll make more money and I will too.
Putnam: We can't talk about pricing.
Crandall: Oh bull * * *, Howard. We can talk about any goddamn thing we want to talk about.

Putnam did not raise Braniff's fares in response to Crandall's proposal; instead he presented the government with a tape recording of the conversation.

The United States subsequently sought an injunction under section 4 of the Sherman Act [2] **[**6]** against American Airlines and Crandall based on an alleged violation of *section 2* of the act which forbids an attempted monopolization. On a motion by the defendants, the district court dismissed the government's complaint for failure to state a claim under *Fed.R.Civ.P. 12(b)(6)*. [3]

The government asserts that the district court erred in holding that (1) an agreement is required for the offense of attempted monopolization; and (2) an attempt must amount to more than a solicitation to commit a crime.

II.

The language of the Sherman Act, its legislative history, the general criminal law relating to attempt and the jurisprudence **[*1117]** relating to attempt specifically under the Sherman Act, lead us to the same conclusion: the government need not allege or prove an agreement to monopolize in order to establish an attempted joint monopolization under *section 2* of the Sherman Act. [4]

[7]** *Section 2* of the Sherman Act, *15 U.S.C. § 2*, provides, ***HN2***[] in pertinent part:

Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony. . . .

HN3[] The Sherman Act "is designed to sweep away all appreciable obstructions so that the statutory policy of free trade might be effectively achieved." *United States v. Yellow Cab Co., 332 U.S. 218, 226, 67 S. Ct. 1560, 1564, 91 L. Ed. 2010, 2017 (1947)*. [5] The role of *section 2* is:

to make the prohibitions of the act all the more complete and perfect by embracing all attempts to reach the end prohibited by *[Section 1]*, that is, restraints of trade, by any attempt to monopolize . . . even although the acts by which such results are attempted to be brought about . . . be not embraced within the general enumeration of *[Section 1]*.

---

[2] Section 4 provides in relevant part:

The several district courts of the United States are invested with jurisdiction to prevent and restrain violations of *sections 1 to 7* of this title; and it shall be the duty of the several United States attorneys, in their respective districts, under the direction of the Attorney General, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition setting forth the case and praying that such violation shall be enjoined or otherwise prohibited.

[3] The district court's opinion and order is reported in *United States v. American Airlines, Inc., 570 F. Supp. 654 (N.D.Tex. 1983)*.

Standard Oil Co. of New Jersey v. United States, 221 U.S. 1, 61, 31 S. Ct. 502, 516, 55 L. Ed. 619, 645 (1911). **[**8]** [6] In creating the Sherman Act, Congress deliberately chose not to define all of the activities which might contravene the Act, in order to avoid creating loopholes. *Appalachian Coals, Inc. v. United States, 288 U.S. 344, 359-60, 53 S. Ct. 471, 474, 77 L. Ed. 825, 829 (1933)*. Instead it gave the Sherman Act "a generality and adaptability comparable to that found to be desirable in constitutional provisions." *Id.*

Our first step in the analysis of the requisites of attempted monopolization **[**9]** is a consideration of the elements of the completed offense of monopolization.

HN4[] To establish illegal monopolization two elements must be shown: (1) the possession of monopoly power in the relevant market, and (2) "the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 1704, 16 L. Ed. 2d 778, 786 (1966)*. [7] Monopoly power is "the power to control price or exclude competition." *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 1004, 100 L. Ed. 1264, 1278 (1956)*. Accord, *United States v. Grinnell Corp., 384 U.S. at 571, 86 S. Ct. at 1704, 16 L. Ed. 2d at 786*. If these two elements are shown, the offense of actual monopolization is complete; it is well established that there is no additional requirement that the power actually be exercised. *United States v. Griffith, 334 U.S. 100, 107, 68 S. Ct. 941, 945, 92 L. Ed. 1236, 1243 (1948)*; **[**10]** *American Tobacco Co. v. United States, 328 U.S. 781, 810-13, 66 S. Ct. 1125, 1139-41, 90 L. Ed. 1575, 1594* ***[*1118]*** *(1946)*; *United States v. Aluminum Co. of America, 148 F.2d 416, 427 (2d Cir. 1945)*. In *American Tobacco*, the Court explained:

> It is undoubtedly true . . . that trade and commerce are "monopolized" within the meaning of the federal statute, when, as a result of efforts to that end, such power is obtained that a few persons acting together can control the prices of a commodity moving in interstate commerce. It is not necessary that the power thus obtained should be exercised. Its existence is sufficient.

328 U.S. at 811, 66 S. Ct. at 1140, 90 L. Ed. at 1595.

[11]** Applying these principles to the case at hand, we conclude that if Putnam had accepted Crandall's offer, the two airlines, at the moment of acceptance, would have acquired monopoly power. At that same moment, the offense of joint monopolization would have been complete.

Since the Act does not list or define the activities which may constitute the offense of attempted monopolization, we must examine the facts of each case, mindful that the determination of what constitutes an attempt, as Justice Holmes explained, "is a question of proximity and degree." *Swift & Company v. United States, 196 U.S. 375, 402, 25 S. Ct. 276, 281, 49 L. Ed. 518, 527 (1904)*. [8] In *Swift*, the Court stated further that "when that intent and the

---

[6] Accordingly, the Act has not been viewed or "interpreted as if it were primarily a criminal statute. . . ." *United States v. United States Gypsum Co., 438 U.S. 422, 439, 98 S. Ct. 2864, 2874, 57 L. Ed. 2d 854, 870 (1978)*.

[7] See also *Domed Stadium Hotel, Inc. v. Holiday Inns, Inc., 732 F.2d 480, 487 (5th Cir. 1984)*, *Mid-Texas Communications Systems, Inc. v. American Telephone & Telegraph Co., 615 F.2d 1372, 1385-86 (5th Cir. 1980)*, *cert. denied*, ***449 U.S. 912, 101 S. Ct. 286, 66 L. Ed. 2d 140 (1980)***, *Almeda Mall, Inc. v. Houston Lighting & Power Co., 615 F.2d 343, 351 (5th Cir. 1980)*, *cert. denied*, ***449 U.S. 870, 101 S. Ct. 208, 66 L. Ed. 2d 90 (1980)***.

[8] Justice Holmes, a leading authority on the law of attempt, had more than one occasion to explain the principles of attempt. In The Common Law (1881), he observed that "eminent judges have been puzzled where to draw the line [between what constitutes attempt and what does not], or even to state the principle on which it should be drawn . . . But the principle is . . . similar to that on which all other lines are drawn by the law. Public policy, that is to say, legislative considerations, are at the

consequent dangerous probability exist, this statute, like many others, and like the common law in some cases, directs itself against that dangerous probability as well as against the completed result." *Swift, 196 U.S. at 396, 25 S. Ct. at 279, 49 L. Ed. at 524*. ***HN5***[] The offense of attempted monopolization thus has two elements: (1) specific **[**12]** intent to accomplish the illegal result; and (2) a dangerous probability that the attempt to monopolize will be successful. *Transource International, Inc. v. Trinity Industries, Inc., 725 F.2d 274, 282 (5th Cir. 1984)*, *Spectrofuge Corp. v. Beckman Instruments, Inc., 575 F.2d 256, 276 (5th Cir. 1978)*, *cert. denied*, *440 U.S. 939, 99 S. Ct. 1289, 59 L. Ed. 2d 499 (1979)*. When evaluating the element of dangerous probability of success, we do not rely on hindsight but examine the probability of success at the time the acts occur. *Multiflex, Inc. v. Samuel Moore & Co., 709 F.2d 980, 992 (5th Cir. 1983)*, *cert. denied*, *465 U.S. 1100, 104 S. Ct. 1594, 80 L. Ed. 2d 126 (1984)*.

[13]** The government unequivocally alleged that Crandall proposed to enlist his chief competitor in a cartel so that American and Braniff, acting together, could control prices and exclude competition at DFW; as Crandall explained to Putnam, "we can both live here and there ain't no room for Delta." As a result of the monopolization, Braniff would "make more money and I will too."

Both Crandall and Putnam were the chief executive officers of their airlines; each arguably had the power to implement Crandall's plan. The airlines jointly had a high market share in a market with high barriers to entry. American and Braniff, at the moment of Putnam's acceptance, would have monopolized the market. Under the facts alleged, it follows that Crandall's proposal was an act that was the **[*1119]** most proximate to the commission of the completed offense that Crandall was capable of committing. Considering the alleged market share of American and Braniff, the barriers to entry by other airlines, and the authority of Crandall and Putnam, the complaint sufficiently alleged that Crandall's proposal had a dangerous probability of success.

HN6[] The requirement that an accused's conduct have a dangerous **[**14]** probability of success expresses a significant antitrust principle that the antitrust laws protect competition, not competitors, and its related principle that the Sherman Act does not reach practices only unfair, impolite, or unethical. *Dimmitt Agri Industries, Inc. v. CPC International, Inc., 679 F.2d 516 (5th Cir. 1982)*, *cert. denied*, *460 U.S. 1082, 103 S. Ct. 1770, 76 L. Ed. 2d 344 (1983)*; *Kearney & Trecker Corp. v. Giddings & Lewis, Inc., 452 F.2d 579 (7th Cir. 1971)* (Stevens, J.).

In *United States v. Mandujano, 499 F.2d 370 (5th Cir. 1974)*, *cert. denied*, *419 U.S. 1114, 95 S. Ct. 792, 42 L. Ed. 2d 812 (1975)*, we set forth the general requirements for criminal attempt. The defendant (1) "must have been acting with the kind of culpability otherwise required for the commission of the crime which he is charged with attempting," and (2) "must have engaged in conduct which constitutes a substantial step toward commission of the crime." *499 F.2d at 376*. While similar, the common law requirement of a substantial step toward commission and dangerous probability of success are not **[**15]** the same. While both exact a relationship between an attempt and the offense, they differ in important ways. The focus of dangerous probability of success is upon the likelihood of the prohibited result, whereas the focus of the substantial step toward commission is upon a defendant's intent. The move along the increasing scale of proximity of attempt to offense carries with it a corresponding shift in focus from intent alone to substantive result. The inquiry is by necessity into the defendant's intent but under the Sherman Act that inquiry also includes a predictive examination of the results if the intent were accomplished. As Justice Stevens, then Judge, put it in *Kearney*: " In an antitrust context we must consider the firm's capacity to commit the offense, the scope of its objective, and the character of its conduct. The ultimate concern is the firm's actual or threatened impact on competition in the relevant market." *452 F.2d at 598*. We acknowledge longstanding debate over the requirement of dangerous probability of success, and that substantial arguments that specific intent alone ought to suffice have been made. See, e.g., *Cooper, Attempts and Monopolization:* **[**16]** *A Mildly*

---

bottom of the matter; the considerations in this case being the nearness of the danger, the greatness of the harm, and the degree of apprehension felt." O. Holmes, Jr., *The Common Law* 68 (1881).

In *Commonwealth v. Peaslee, 177 Mass. 267, 59 N.E. 55 (1901)*, Justice Holmes, writing for the Massachusetts Supreme Judicial Court, held that "if the preparation comes very near to the accomplishment of the act, the intent to complete it renders the crime so probable" that the act will constitute an attempt. *177 Mass. at 272*. "Every question of proximity," Justice Holmes stated, "must be determined by its own circumstances . . . analogy is too imperfect to give much help." *Commonwealth v. Kennedy, 170 Mass. 18, 48 N.E. 770, 771 (1897)*.

Expansionary Answer to the Prophylactic Riddle of Section Two, 72 Mich.L.Rev. 373 (1974); indeed, one circuit does not require proof of dangerous probability. See *Lessig v. Tidewater Oil Co., 327 F.2d 459* (9th Cir.), *cert. denied*, *377 U.S. 993, 84 S. Ct. 1920, 12 L. Ed. 2d 1046 (1964)*. We note, however, both that dangerous probability remains an element of attempted monopolization in this circuit and that in concluding that the government here stated a claim we do not retreat from its proof requirements. We see Crandall's alleged conduct as uniquely unequivocal and its potential, given the alleged market conditions, as being uniquely consequential. In sum, our decision that the government has stated a claim does not add attempt to violations of *Section 1* of the Sherman Act or lower the incipiency gate of *Section 2*.

Finally, we note one final consequence of our reasoning. ***HN7***[] If a defendant had the requisite intent and capacity, and his plan if executed would have had the prohibited market result, it is no defense that the plan proved **[**17]** to be impossible to execute. As applied here, if Putnam from the beginning never intended to agree such fact would be of no aid to Crandall and American.

The district court, relying on *American Tobacco Co. v. United States, 328 U.S. 781, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)* and *Zenith Radio Corp. v. Matsushita Electric Industrial Co., 513 F. Supp. 1100 (E.D.Pa. 1981)*, concluded that an agreement was a necessary element of an attempt to monopolize. We disagree with the district court's interpretation of these cases.

[*1120] In *American Tobacco*, the government alleged that the tobacco company defendants had conspired in restraint of trade, attempted to monopolize, conspired to monopolize, and had succeeded in monopolizing the relevant markets. The trial court's jury charge stated that "an essential element of the illegal monopoly or monopolization charged in this case is the existence of a combination or conspiracy to acquire . . . the power to exclude competitors to a substantial extent," and that a completed agreement was an "indispensable ingredient of each of the offenses charged. . . . " *328 U.S. at 785-86, 66 S. Ct. at 1127, 90 L. Ed. at 1581*. **[**18]** The Supreme Court's grant of certiorari, however, was "limited to the question whether actual exclusion of competitors is necessary to the crime of monopolization under *§ 2* of the Sherman Act." *328 U.S. at 784, 66 S. Ct. at 1126, 90 L. Ed. at 1580*. The Supreme Court neither discussed nor decided whether an agreement was required to establish attempted monopolization.

The private plaintiffs in *Zenith Radio* alleged that numerous electronics products manufacturers had engaged in a massive, worldwide conspiracy in violation of both *sections 1* [9] and *2*. Plaintiffs bottomed their *section 2* case on the existence of the conspiracy. The district court granted summary judgment in favor of defendants on the attempted monopolization claim because of lack of proof of a conspiracy. 513 F. Supp. at 1318-1321. On appeal, the Third Circuit reversed the district court in most respects after concluding that there was sufficient evidence to raise a material issue of fact regarding the participation of all except three of the twenty-four defendants in the alleged conspiracy. *In Re Japanese Electronic Products Antitrust Litigation, 723 F.2d 238 (3d Cir. 1983)*. **[**19]** The attempted monopolization charge accordingly was reinstated. Because plaintiffs' attempt case was predicated on a conspiracy theory, the Third Circuit did not discuss specifically whether the offense of attempted monopolization requires an agreement. The court did state, however, that "only the *section 1* Sherman Act and the Wilson Tariff Act charges require proof of a combination or conspiracy". *723 F.2d at 252*. A fair reading of these cases will not support appellees' contention that an agreement, which is required for a conspiracy, is also an element of attempted monopolization.

In an alternate ground for its dismissal of the complaint, the district court concluded that Crandall's proposal was a solicitation and that the common **[**20]** law, at the time of the enactment of the Sherman Act, required proof of more than a solicitation to establish an attempt.

---

[9] *15 U.S.C. § 1* ***HN8***[] provides, inter alia:

> Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several State, or with foreign nations, is declared to be illegal. . . .

Appellees argue that in 1890 the common law so clearly held that an attempt required more than a mere solicitation, that Congress intended to incorporate that well-accepted principle into section 2 of the Sherman Act. Our study of the authorities, however, leads us to the conclusion that there was no clear consensus among the pre-1890 cases on the issue. Less than half of the forty-two state jurisdictions had addressed the issue, even peripherally, by 1890. The jurisdictions which had confronted the question were evenly split. [10] These cases demonstrate that the answer to the question of whether a solicitation could be an attempt at common law was neither old nor well-recognized; to the contrary it was unsettled and still evolving. It **[*1121]** follows that in enacting the Sherman Act, Congress could not have supposed that a solicitation could never be an attempt. See *Associated Gen. Contractors v. Carpenters, 459 U.S. 519, at 533 n. 28, 103 S. Ct. 897, at 906 n. 28, 74 L. Ed. 2d 723, at 735 n. 28 (1983)*.

[21]** The district court also cited a number of modern cases in support of its conclusion that an attempt can never encompass a solicitation, [11] and appellees refer us to others. [12] These cases involving murder, sodomy, and other crimes, however, are not instructive in determining the requirements for attempted monopolization. In the cited cases, an agreement to the solicitation would not result in the completion of the substantive offense at the moment of agreement; other physical acts were required for the completed offense.

[22]** The federal courts have generally rejected a rigid or formalistic approach to the attempt offense. Instead they commonly recognize that "the determination whether particular conduct constitutes . . . [an attempt] is so dependent on the particular facts of each case that, of necessity, there can be no litmus test to guide the reviewing courts." *United States v. Ivic, 700 F.2d 51, 66 (2d Cir. 1983)*. Following this analysis, which we consider the better reasoned approach, several federal courts have concluded that a solicitation accompanied by the requisite intent may constitute an attempt.

In *United States v. May, 625 F.2d 186 (8th Cir. 1980)*, a defendant challenged his conviction for "unlawfully attempt[ing] to cause to have concealed, obliterated, or destroyed" government records in violation of *18 U.S.C § 2071*, on the grounds that his telephone call to the person who controlled certain relevant records constituted only a solicitation and was not an attempt. The Eighth Circuit affirmed his attempt conviction.

> May also argues that his . . . conviction must fall because his conduct constituted only a solicitation, **[**23]** not an attempt to commit a crime. Specifically, he contends that the evidence showed only preparation and that no overt act constituting a substantial step in the attempt was shown. We disagree. When May called General Miller, he engaged in a course of conduct designed to culminate in the unlawful concealment of government records.

In *United States v. Robles, 185 F. Supp. 82, 85 (N.D.Cal. 1960)*, a solicitation by letter was held to be an attempt to unlawfully import a narcotic. [13]

---

[10] In seven states, a solicitation could constitute an attempt: *State v. Hayes, 78 Mo. 307 (1883)*; *State v. Ames, 64 Me. 386 (1875)*; *Collins v. The State, 50 Tenn. 14 (1870)*; *Mulligan v. The People*, 5 Parker 105 (S. Ct.N.Y.1861); *Griffin v. The State, 26 Ga. 493 (1858)*; *State v. Carpenter, 20 Vt. 9 (1847)*; *State of Connecticut v. Avery, 7 Conn. 266 (1828)*. Other jurisdictions concluded that a solicitation could never be an attempt: *Hicks v. Commonwealth, 86 Va. 223, 9 S.E. 1024 (1889)*, *Lamb v. State, 67 Md. 524*, 10 Atlantic 208 (1887), *State v. Baller, 26 W.Va. 90 (1885)*, *Stabler v. The Commonwealth, 95 Pa. 318 (1880)*, *Cox v. The People, 82 Ill. 191 (1876)*, *McDade v. The People, 29 Mich. 50 (1874)*, *Smith v. The Commonwealth, 54 Pa. 209 (1864)*.

[11] *570 F. Supp. at 661*.

[12] See e.g., *State v. Otto, 102 Idaho 250, 629 P.2d 646 (1981)* (attempted murder); *People v. LaFontaine, 79 Cal. App. 3d 176, 144 Cal. Rptr. 729 (1978)* (attempted lewd or lascivious act upon body of a child under fourteen years old); *Hutchinson v. State, 315 So. 2d 546 (Fla.Dist.Ct.App.1975)* (attempted murder); *Gervin v. State, 212 Tenn. 653, 371 S.W.2d 449 (1963)* (attempted murder); *State v. Bereman, 177 Kan. 141, 276 P.2d 364 (1954)* (attempted sodomy); *Cole v. State, 14 Okla. Crim. 18, 166 P. 1115 (Okla.Crim.App.1917)* (attempted adultery); *State v. Lampe, 131 Minn. 65, 154 N.W. 737 (1915)* (attempted extortion).

[24]** In sum, we reject appellee's contention that the law in 1890 clearly required more than a solicitation to constitute an attempt. We also conclude that the better reasoned authorities support the view that a highly verbal crime such as attempted monopolization may be established by proof of a solicitation along with the requisite intent.

III.

Our decision that the government's complaint states a claim of attempted monopolization **[*1122]** is consistent with the Act's language and purpose. [14] The application of *section 2* principles to defendants' conduct will deter the formation of monopolies at their outset when the unlawful schemes are proposed, and thus, will strengthen the Act.

[25]** Under appellees' construction of the Act, an individual is given a strong incentive to propose the formation of cartels. If the proposal is accepted, monopoly power is achieved; if the proposal is declined, no antitrust liability attaches. If *section 2* liability attaches to conduct such as that alleged against Crandall, naked proposals for the formation of cartels are discouraged and competition is promoted. [15]

[26]** Appellees argue that price fixing is an offense under *section 1* of the Sherman Act and since the government charges that Crandall sought to have American and Braniff fix prices, the government's complaint in reality seeks to have us write an attempt provision into *section 1*. This argument is meritless. Appellees confuse the *section 1* offense of price fixing with the power to control price following acquisition of monopoly power under *section 2*. Under the facts alleged in the complaint, Crandall wanted both to obtain joint monopoly power and to engage in price fixing. That he was not able to price fix and thus, has no liability under *section 1*, has no effect on whether his unsuccessful efforts to monopolize constitute attempted monopolization. See *Multiflex, 709 F.2d at 992*.

Nor do we agree with appellees' suggestion that firms or executives will be subject to liability for ambiguous or "intemperate words". We first note that under the allegations of the complaint Crandall's statements are not ambiguous. Second, a person must specifically intend to monopolize for his conduct to violate *section 2*; without the requisite intent, no liability attaches.

CONCLUSION

---

[13] Other cases also have concluded that a solicitation could be an attempt in certain circumstances. See e.g., *United States v. DeBolt, 253 F. 78, 82-83 (S.D.Ohio 1918)* ("mere solicitation" is sufficient for prosecution for attempt to make defective war material); cited with approval in *United States v. Mandujano, 499 F.2d 370, 374 (5th Cir. 1974)*, *cert. denied*, ***419 U.S. 1114, 95 S. Ct. 792, 42 L. Ed. 2d 812 (1975)***; *United States v. Ford, 34 F. 26, 28 (W.D.N.C. 1888)* ("In some cases words spoken are *acts* sufficient to constitute an attempt to commit a crime, if they are of such a character as to be well calculated and adapted to accomplish the crime intended.") (emphasis in original).

[14] We reject appellees' argument that because the courts previously have not been faced with a factual situation similar to the case at bar, that the conduct cannot violate the antitrust laws. By deliberately choosing not to delineate the myriad activities which would be forbidden by the Act, Congress left to the courts the task of determining whether given conduct constitutes an offense under the Sherman Act. See *United States Gypsum Co., 438 U.S. at 474 n. 14, 98 S. Ct. at 2874 n. 14, 57 L. Ed. 2d at 870 n. 14*; *Appalachian Coals, 288 U.S. at 360, 53 S. Ct. at 474, 77 L. Ed. at 829*, *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 272 (2d Cir. 1979)*, 2 P. Areeda & D. Turner, ***Antitrust Law*** para. 1310 (1978).

[15] We disagree with the appellees' contention that our application of *§ 2* would discourage discussion among potential partners in mergers and joint ventures. Parties who wish to engage in substantial mergers or joint ventures, under the pre-screening procedures of the Hart-Scott-Rodino Antitrust Improvements Act, *15 U.S.C. § 18a*, must notify the Justice Department's Antitrust Division and the Federal Trade Commission before consummating the transaction. The government may have no objection to the transaction, or it may sue to block the transaction pursuant to § 16 of the Clayton Act, *15 U.S.C. § 26*. Chances that such a transaction would raise a dangerous probability of successful monopolization, are extremely remote.

Transactions that are too small to be subject to the Hart-Scott-Rodino Act will rarely pose a dangerous probability of successful monopolization. If there are such cases, however, and if in such cases the firm proposing the transaction acts with a specific intent to monopolize, then we see no reason why *§ 2* liability should not attach.

[27]** We hold that an agreement is not an absolute prerequisite for the offense of attempted joint monopolization and that the government's complaint sufficiently alleged facts that if proved would permit a finding of attempted monopolization by defendants. We therefore vacate the dismissal of the complaint and remand for further proceedings consistent with this opinion.

REVERSED AND REMANDED.

HN2[] **Bids & Formation, Subcontractors & Subcontracts**

Under *15 U.S.C.S. § 637(d)(8)*, a contractor who fails to extend to minority subcontractors the maximum practicable opportunity to participate in the performance of contracts let by any Federal agency may be declared in breach of its contract. And though "maximum practical opportunity" is not defined in the statute, the target generally imposed by federal agencies is approximately 10 percent minority participation.

See 15 U.S.C.S. § 1 (1976).

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] Antitrust & Trade Law, Sherman Act

Although any agreement between businessmen places some restrictions on trade, courts interpret the Sherman Act, 15 U.S.C.S. § 1 (1976) to condemn only those arrangements which are unreasonably restrictive of competitive conditions.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN5[] Antitrust & Trade Law, Sherman Act

There are two complementary categories of antitrust analysis used by the courts for evaluating the legality of commercial conduct: the per se rule and the rule of reason. In the first category are agreements whose nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality -- they are "illegal per se" -- in the second category are agreements whose competitive effect can only be evaluated by analyzing the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed. In either event, the purpose of the analysis is to form a judgment about the competitive significance of the restraint; it is not to decide whether a policy favoring competition is in the public interest, or in the interest of the members of an industry.

Business & Corporate Law > Joint Ventures > Formation

Mergers & Acquisitions Law > Antitrust > Joint Ventures

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

Business & Corporate Law > Joint Ventures > General Overview

HN6[] Types of Contracts, Joint Contracts

A joint venture is defined as a separate enterprise characterized by an integration of operations between and subject to control by its parent firms which results in the creation of significant new enterprise capability in terms of new productive capacity, new technology, a new product, or entry into a new market.

Business & Corporate Law > Joint Ventures > General Overview

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

HN7[] Business & Corporate Law, Joint Ventures

A court must be guided by the facts, rather than the legal characterizations the parties attach to the facts. Individuals who normally compete directly against one another may not hide the collusive nature of mutual concessions by labeling their agreements "joint ventures."

Business & Corporate Law > Joint Ventures > General Overview

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

Mergers & Acquisitions Law > Antitrust > Joint Ventures

HN8[] Business & Corporate Law, Joint Ventures

A central consideration in assessing the competitive character of a joint venture focuses on whether the individual participants are free to increase their own output.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

HN9[] Price Fixing & Restraints of Trade, Horizontal Market Allocation

The horizontal division of markets has long been recognized as a patently anticompetitive arrangement between business competitors and, accordingly, has been subject to per se illegal treatment by courts. Allocation of markets -- whether of territories or customers -- tampers with free market forces by reducing or eliminating competition between business rivals, thereby reducing the incentive to increase productivity, to implement innovative strategy and to devise methods to better serve consumers.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

HN10[] Price Fixing & Restraints of Trade, Horizontal Market Allocation

A horizontal allocation of markets is characterized by three elements: (1) concerted action between two or more persons; (2) actual or potential competition between the participants in the conspiracy; and (3) an elimination of competition in the market serviced by the conspirators.

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] Antitrust & Trade Law, Sherman Act

The court will not grant relief which will further the objectives of an unlawful conspiracy.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > Judgments > Summary Judgment > General Overview

HN12[] Antitrust & Trade Law, Sherman Act

Summary adjudication is used sparingly in antitrust cases. Almost without exception, summary judgment is appropriate only when the conduct at issue falls clearly within those categories of practices traditionally treated as per se unlawful or when the allegations in the complaint clearly fail to establish a material issue of fact for adjudication.

Opinion

[*1568] MEMORANDUM

Wiseman, Chief Judge.

The present case examines **[**2]** the limits of lawful commercial conduct by minority businessmen in seeking meaningful participation in contracts for the construction of large government projects. This Court must decide whether all black architectural firms in a particular geographic area, who claim to have consistently been denied all but token shares on public works, may unite in a "joint venture" to demand participation **[*1569]** as a group, refusing to deal with prime contractors in their individual capacities but only on the terms negotiated exclusively by the coalition. This Court concludes that such concerted action, despite its compelling motive to overcome racial discrimination, violates the antitrust laws of the United States and is unequivocally destructive to competition and consumer welfare in the marketplace. For this reason, the Court grants the defendants' motion for partial summary judgment as to those claims in which the plaintiffs' conspired by doing business as COMPACT.

I. *Facts*

In 1981 the Metropolitan Nashville Airport Authority [MNAA] began construction to expand the airport which services the City of Nashville, Tennessee. Early in 1984 MNAA entered the design development phase for **[**3]** the new terminal facility. During the spring of 1984, Gresham and Smith, a large architectural firm based in Nashville, was awarded the contract as the principal contractor for developing the design of the new terminal. Gresham and Smith was selected from among a group of other architectural firms; a number of minority business enterprise [MBE] firms were represented in the group whose bids were rejected.

In May of 1984 the three minority-owned architectural firms in Middle Tennessee -- McKissack, McKissack & Thompson Architects & Engineers, Inc.; L. Quincy Jackson (doing business as a sole proprietor); and Harris Associates -- entered into an agreement to form the Coalition for Equitable Minority Participation In Architectural Contracts in Tennessee [COMPACT]. [1] COMPACT was formed with the purpose of ameliorating the effects of racial discrimination against black architects in Tennessee. Its members believed each individual firm's failure to win the principal contractor position on the design phase of the airport project was attributable directly to racial discrimination by MNAA. Accordingly, the members of COMPACT agreed to band together in a "joint venture" to present a united **[**4]** front for negotiating contracts on projects seeking minority business participation.

Pursuant to the joint venture agreement, COMPACT retained the right to target construction projects it desired to pursue and, once chosen, its members covenanted not to pursue work on such projects in their individual capacities or to associate themselves in any way with the project except in their role as members of COMPACT. Section 5 of the COMPACT agreement provides:

> 5. COMPACT shall delineate specifically and in writing the areas of marketing for architectural contracts which it wishes to pursue on a joint venture basis for the benefit of its members and shall also designate specifically the areas which members are free to pursue in their own private marketing activities apart from COMPACT. **[**5]** *No member shall pursue or accept as an individual firm without agreement of all members of COMPACT in writing in advance, any project which COMPACT has targeted or is pursuing in any way as a potential project for COMPACT*.

(emphasis added). In similar language, Article V of the COMPACT Bylaws empowers COMPACT to target contracts and restrict competition between its individual members.

Although the COMPACT agreement did not limit the Coalition's scope, the initial targets selected were the Metropolitan Nashville Airport Terminal and the Nashville Convention Center -- both public projects. More than just the large expenditures budgeted, COMPACT's members knew that the probable involvement of federal funds made procurement of minority business enterprise participation a condition precedent to a state agency and/or principal contractor's reimbursement by the federal government for performance on the contract. [2] In the context of the Nashville **[*1570]** airport contract, MNAA had adopted and implemented an affirmative action program creating MBE set-aside guidelines consistent with the standards prescribed by federal law. Deposition of Mr. Thomas L. Mertins and Exhibit **[**6]** 1 (August 23, 1984).

On July 3, 1984, a meeting was held at MNAA's office. In attendance were members of COMPACT, and representatives of MNAA, the Federal Aviation Administration and Gresham and Smith. Among the topics discussed -- and made clear -- was the requirement that there be sufficient MBE participation in the design phase subcontracts let out by Gresham and Smith. Deposition of William D. Schock at 7-10 (August 23, 1984). The situation, therefore, was ripe for COMPACT to test its new marketing strategy.

Prior to commencing the terminal design phase of the project, MNAA had maintained an average of nine (9) percent MBE participation across the other construction contracts. Deposition of Thomas L. Mertins **[**7]** at 52-53, exhibit No. 4 (August 23, 1984). However, by uniting all minority architects in the area under COMPACT, and with the knowledge of MNAA's preference for local contractors, the individual members expected to exert monopolistic leverage on Gresham and Smith to force it to accede to COMPACT's demand for a more substantial participation share of the design contract. Testimony of L. Quincy Jackson, transcript at 117, 131-32. Mr. Jackson testified that he refused to accept any correspondence sent by Gresham and Smith which was addressed to him in his individual capacity; he and the other black architects in Nashville would negotiate on participation only through COMPACT. *Id*. at 87, 97, 146.

---

[1] Plaintiffs assert in their complaint that their three firms represent the only black-owned architectural firms in Middle Tennessee. Together the three firms represent the membership composition of COMPACT. Complaint at para. 2(a).

[2] ***HN1***[] Pursuant to *15 U.S.C.S. § 637(d)*, "small business concerns owned and controlled by socially and economically disadvantaged individuals" are to be afforded "the maximum practicable opportunity to participate in the performance of contracts let by any Federal agency." *15 U.S.C.S. § 637(d) (Supp. 1982)*.

When members of COMPACT finally did meet with Gresham and Smith, COMPACT rejected an offer to "associate" on the project (i.e., to perform a subcontract constituting 10 percent or less of the value of the entire project), and demanded a "joint venture." Although members of COMPACT varied in their interpretation of the meaning of "joint venture," this Court understands the term to contemplate if not a 50 percent interest then one carrying substantial responsibility and decision making authority. **[**8]** *Compare* Testimony of Leatrice McKissack, transcript at 56-57; *with* Testimony of L. Quincy Jackson, transcript at 118; *and* Testimony of Harold Thompson, transcript at 164. Faced with the demand to "split the pie in half," Gresham and Smith simply went elsewhere. [3] It reached an agreement with Williams, Russell, & Johnson, a minority-owned architectural firm based in Atlanta licensed to practice in Tennessee.

MNAA's selection of Gresham and Smith over all of the minority **[**9]** firms, followed by Gresham and Smith's selection of Williams, Russell & Jackson over COMPACT precipitated the instant case. COMPACT and its members filed suit claiming violations of their civil rights under *42 U.S.C. §§ 1981*, *1982*, *1983*, *1985*, *1986*, *1988*, *2000d*; *15 U.S.C. § 1, et seq.*; *T.C.A. § 47-25-101*; and other applicable laws. Following the issuance of a temporary restraining order prohibiting Gresham and Smith from retaining Williams, Russell & Jackson as associate architects, this Court heard testimony on the propriety of a preliminary injunction, at which time the possible antitrust implications of the COMPACT agreement became apparent. The Court dissolved the TRO and refused issuance of a preliminary injunction. On direction by the Court both sides briefed the antitrust issue, the defendants submitting their position in the form of a motion for summary judgment. Following oral argument on the defendants' motion and after consideration of the **[*1571]** already voluminous documents, transcripts, depositions and pleadings in the case, and the testimony of witnesses in open court, the Court concludes that the COMPACT agreement constitutes a *per se* violation of *Section [**10] 1* of the Sherman Act and, accordingly, grants the defendants' motion for partial summary judgment dismissing the plaintiffs' claims regarding construction of the airport.

II. *Minority Business Enterprise Participation as a Discrete Submarket in Public Contracts*

To gain insight on the competitive impact of COMPACT's operation, one must first examine the market in which Tennessee architects do business and the reasons minority architects may have felt compelled to band together to form COMPACT. The majority of architectural services in Middle Tennessee are performed by white-owned firms. A variety of factors may explain why white firms are dominant, but chief among them is the simple fact that of the 341 licensed architects in Davidson County, Tennessee, 311 are white and 30 are black. 1980 Census, Detailed Occupation of the Civilian Labor Force, Davidson County, Tennessee, EOS, Table 1 (1980). [4]

[11]** Testimony before the Court portrayed a system in which public contracts usually were headed by white firms, serving as prime contractors, with subcontracts awarded to minority firms. The plaintiffs claim that the principal reason motivating the white firms to award these contracts to minority firms was to satisfy the affirmative action guidelines promulgated by the public agency in charge of the project. In order to satisfy the minority participation obligation but, at the same time, keep such participation at the threshold minimum, the white-owned prime contracting firm would solicit bids from each of the three Middle Tennessee minority architectural firms (the plaintiffs) and then set each against the other so that one would underbid the other. The plaintiffs claim that the inevitable and consistent result of the practice was that the minority architectural firms in Nashville would never procure more than a token share of the entire project.

The plaintiffs claim that the system has been the *modus operandi* in Middle Tennessee for years and that only after being excluded from the prime contractor position on the airport contract did the three minority firms decide to take matters **[**12]** into their own hands in an attempt to increase their bargaining power so as to obtain larger shares of

---

[3] Prior to entry into this phase of the construction, architectural work on the airport facility was performed by way of a joint venture between Gresham and Smith and Reynolds, Smith and Hill, a Florida firm. MNAA, however, believed that the design phase for the terminal building would be conducted most efficiently if directed by a single architectural firm. Deposition of Thomas L. Mertins, at 27-28. Accordingly, MNAA ended the joint venture upon entry into the design phase and awarded the prime contractor position to Gresham and Smith.

[4] The Court takes judicial notice of the census figures pursuant to *Rule 201 of the Federal Rules of Evidence.*

the contracts. Testimony of L. Quincy Jackson, Transcript at 132 (August 17, 1984). By combining into a "joint venture" under COMPACT, the three minority firms attempted to eliminate competition among themselves. If a prime contractor was required by law to have minority participation and the only qualified minority business enterprise was COMPACT, then it stood to reason that COMPACT would be able to dictate the terms under which it would agree to participate. [5]

This Court finds that as a matter of law minority business enterprise set-aside shares on public contracts represent a discrete submarket for architectural services in which only qualified **[**13]** minority firms may compete. [6] ***HN2***[] Under *15 U.S.C. § 637(d)(8)*, a contractor who fails to extend to minority subcontractors the "maximum practicable opportunity to participate in the performance of contracts let by any Federal agency" **[*1572]** may be declared in breach of its contract. And though "maximum practical opportunity" is not defined in the statute, the target generally imposed by federal agencies is approximately ten (10) percent minority participation.

[14]** The facts in this case support the Court's finding that in the context of public contracts there exists a discrete market for minority architectural services. Gresham and Smith was advised by the MNAA and the FAA as to its duty to procure minority participation. Further, testimony as to custom in the overall architectural market reflects the well established practice by white firms of obtaining minority firm participation when seeking public contracts. In joining together, the member firms of COMPACT did not attempt to increase their market power in the general architectural market for Middle Tennessee, they sought to monopolize the submarket for minority business participation in public contracts. [7] Accordingly, any consideration of the competitive significance of COMPACT's operation must focus on its competitive impact in the submarket and in the general market as a whole.

[15]** III. *The Sherman Antitrust Act*

HN3[] *Section 1* of the Sherman Act provides that "every contract, combination, in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is hereby declared to be illegal . . ." *15 U.S.C. § 1 (1976)*. ***HN4***[] Although any agreement between businessmen places some restrictions on trade, courts have interpreted the Sherman Act to condemn only those arrangements which are "unreasonably restrictive of competitive conditions." *Standard Oil Co. v. United States, 221 U.S. 1, 65, 31 S. Ct. 502, 55 L. Ed. 619 (1910)*. The Sherman Act protects this nation's free enterprise system by mandating that competition between entrepreneurs be the principal motivating force in the marketplace. And while judicial pronouncements during the last fifty years have varied on the central policy intended by Congress in its enactment

---

[5] It is interesting to note that although the COMPACT agreement did not limit COMPACT's jurisdiction to only public contracts, the only two projects targeted at this point are the Nashville Airport Terminal and the Nashville Convention Center -- both public contracts.

[6] The Court finds the concepts of markets and submarkets, though traditionally applied in merger cases, are particularly appropriate to describe the business opportunities for architectural services in this case. The market as a whole is the market for architectural services offered to the entire community. The submarket identified by the Court today constitutes the statutorily mandated set aside share of public contracts reserved exclusively for minority business enterprises, plus any overlapping or additional share mandated by the affirmative action guidelines of a public agency which are not prescribed by statute.

[7] The Court finds that the actions taken by COMPACT and its members raise issues under both *Sections 1* and *2* of the Sherman Act. However, for purposes of this decision, the Court bases its holding on *Section 1* of the Sherman Act, granting the defendants' motion for summary judgment in light of the plaintiffs' *per se* unlawful allocation of markets and price fixing.

The attempt to monopolize the market for MBE set aside shares on public contracts is implicated by today's decision, yet no firm resolution as to that possible *Section 2* claim can be made without a full trial on the merits. *Swift v. United States, 196 U.S. 375, 396, 25 S. Ct. 276, 49 L. Ed. 518 (1905)* (requiring a showing of an attempt to monopolize and a dangerous probability of success); *cf.* *White Motor Co. v. United States, 372 U.S. 253, 264, 83 S. Ct. 696, 9 L. Ed. 2d 738 (1963)* (whether a merger tends to "substantially lessen competition" normally requires a trial rather than the use of summary judgment).

of the Sherman Act, the current concensus among both courts and commentators embraces consumer welfare as the objective served by enforcement of the antitrust laws.

A. *Enforceability of the Sherman Act Against COMPACT and its Members*.

COMPACT and its members contend vigorously **[**16]** that their conduct is insulated from antitrust liability under *first amendment* protections guaranteeing freedom of speech, freedom of association, and the right to petition government for redress of their grievances. COMPACT urges that because its members are protesting racial discrimination the *Noerr-Pennington* doctrine permits collusion among competing architects to jointly obtain and then parcel out minority business enterprise shares on public contracts. COMPACT, however, misinterprets the purpose and scope of *Noerr-Pennington* -- the doctrine does not permit individuals to band together and exercise their new-found leverage directly in the marketplace.

The *Noerr-Pennington* doctrine recognizes that in light of the basic constitutional right of all citizens to petition government, individuals have a right to lobby legislative and administrative bodies to pass or repeal laws and regulations that protect their particular interests. *See, generally*, 1 P. Areeda and D. Turner, *Antitrust* ***[*1573]*** *Analysis* ch. 2A (1978). In *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*, truckers challenged **[**17]** the lobbying efforts of a group of railroads that had resulted in the enactment of Pennsylvania legislation which imposed detrimental regulation on trucks. In ruling for the railroads, the Supreme Court held that in the absence of bad faith or an intent to harass, such activity was privileged and immune from attack under the antitrust laws. *Id. at 140-45*. The doctrine was expanded to protect those who petition administrative bodies performing quasi-legislative duties in *United States v. Pennington, 381 U.S. 657, 669-70, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)* (United Mine Workers permitted to petition the Secretary of Labor to modify regulations governing the sale of coal).

What is germane to these cases is the basic principal that the Constitution protects *political* activity by citizens when addressing government in its *legislative* capacity. There is no such protection of *commercial* activity by businessmen when dealing with government in its *proprietary* capacity. COMPACT's activities fall squarely within the latter of the two categories. "In the absence of legislation or a valid quasi-legislative ruling, a private person dealing with government as buyer, **[**18]** seller, lessor, lessee, or franchisee has no greater antitrust privilege or immunity than in similar dealings with non-governmental parties." 1 P. Areeda and D. Turner, *Antitrust Analysis* at 52. The fact that COMPACT sought to defeat racial discrimination or that they sought to do so in the context of public contracts is immaterial. COMPACT sought to achieve its goal of meaningful minority participation by demanding a joint venture with Gresham and Smith, not through lobbying efforts before the Tennessee legislature or Congress. In sum, COMPACT's actions were taken in the marketplace and are subject to full scrutiny under the Sherman Act.

B. *Proper Standard of Judicial Analysis*

HN5[] There are two complementary categories of antitrust analysis used by the courts for evaluating the legality of commercial conduct: the *per se* rule and the rule of reason. As Justice Stevens has observed:

> In the first category are agreements whose nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality -- they are "illegal per se" -- in the second category are agreements whose competitive effect can only **[**19]** be evaluated by analyzing the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed. *In either event, the purpose of the analysis is to form a judgment about the competitive significance of the restraint*; it is not to decide whether a policy favoring competition is in the public interest, or in the interest of the members of an industry.

National Society of Professional Engineers v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978) (emphasis added). Accordingly, regardless of which standard of analysis this Court chooses to apply, the Court will consider COMPACT's conduct only in light of its *competitive significance*. Just as the Supreme Court in *National Society of Professional Engineers*, refused to consider the social merit of an ethical canon prohibiting competitive bidding between engineers, this Court will not weigh the value of COMPACT's avowed goal to overcome racial discrimination in ascertaining the competitive significance -- and legality -- of the coalition's similar prohibition on competitive bidding and other restrictive covenants. *See also* Organization of Minority Vendors, Inc. **[**20]** v. Illinois Central Gulf Railroad, 579 F. Supp. 574, 604-05 (N.D. Ill. 1983) ("the notion that group conduct is somehow outside the scope of the antitrust laws if it has salutory non-economic purposes even though it has economic impact has found little favor in the courts").

[*1574] 1. *Joint Ventures*

The plaintiffs maintain that COMPACT constitutes a "joint venture" between minority-owned architectural firms and, as such, represents a legitimate combination by which, through increased productive capacity, they may more effectively pursue general contractor positions and/or larger subcontractor opportunities on government construction projects. COMPACT maintains further that since the combination is a joint venture the rule of reason is the proper mode of antitrust inquiry for this Court and, as a consequence, summary judgment is improper without an in-depth review of the coalition's impact on competition.

Joint ventures present a difficult concept for antitrust analysis, defying neat classification and precise definition and, by extension, well established rules for evaluating their competitive impact. *See generally*, Pitofski, *Joint Ventures Under the Antitrust* **[**21]** *Laws: Some Reflections on the Significance of Penn-Olin*, 82 Harv. L. Rev. 1007, 1034-38 (1968). This Court defines a joint venture ***HN6***[] as a separate enterprise characterized by an integration of operations between and subject to control by its parent firms which results in the creation of significant new enterprise capability in terms of new productive capacity, new technology, a new product, or entry into a new market. Brodley, *Joint Ventures and Antitrust Policy*, 95 Harv. L. Rev. 1523, 1526 (1982). On one hand, the joint venture provides a method of organization which enables competitors to join together to produce that which is beyond the productive capacity or inclination of its individual members. Conversely, the joint venture threatens to reduce actual or potential competition between rivals by providing a method of operations which engenders collusion detrimental to competition. In the instant case, the issue turns on whether COMPACT's operations create significant new productive capacity in the architectural product market already served by the coalition's members in their individual capacities, or, stated another way, whether the whole is greater than the sum of its parts. **[**22]** *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 21-22, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*. This Court thinks not.

HN7[] A court must be guided by the facts, rather than the legal characterizations the parties attach to the facts. Individuals who normally compete directly against one another may not hide the collusive nature of mutual concessions by labelling their agreements "joint ventures." ***HN8***[] *Timken Roller Bearing Co. v. United States, 341 U.S. 593, 598, 71 S. Ct. 971, 95 L. Ed. 1199 (1951)*. A central consideration in assessing the competitive character of a joint venture focuses on whether the individual participants are free to increase their own output. *National Collegiate Athletic Association v. Board of Regents of the University of Oklahoma, 468 U.S. 85, n. 54, 104 S. Ct. 2948, 82 L. Ed. 2d 70, 52 U.S.L.W. 4928, 4936 n. 54 (1984)*, *citing* Brodley, *Joint Venture and Antitrust Policy, supra*, at 1523, 1550-52, 1555-60. In *NCAA*, the Supreme Court found that the NCAA's policies for negotiating and awarding television rights to broadcast networks on behalf of its member schools violated the Sherman Act since the joint venture **[**23]** arrangement, though assuring broad-based coverage of all its members, had the effect of limiting the volume of television rights available for purchase by the networks. The guarantee, for example, that a small, unranked college receive television coverage of its football games at least once during a two-year period carried with it the opportunity cost of limiting more frequent broadcasts of, what consumers probably would deem the more interesting, Georgia and Michigan games. Saturday afternoon's televised football agenda was the product of a social policy agreed on by the NCAA rather than a medium responsive to the competitive force of consumer demand.

The *NCAA* case is analogous to the present action to the extent that the COMPACT agreement precludes individual members of the coalition from competing for contracts on projects designated for exploitation by COMPACT. In *NCAA* the NCAA designated the entire televised football **[*1575]** product market, prohibiting any of its members for negotiating in their individual capacities for television rights. Similarly, COMPACT's blanket prohibition on its individual members' right to compete for the airport contract preempts competition **[**24]** between COMPACT and its members and, also, between the individual COMPACT members themselves. Net productive capacity of all members of COMPACT is not increased by COMPACT's operation, it is reduced. Consumer welfare is compromised by COMPACT's operation.

In seeking minority participation on the design phase of the airport, Gresham and Smith solicited each minority architectural firm individually inviting them to submit separate bids. Refusing to bid, each firm staked their participation on Gresham and Smith's acceptance of COMPACT's demand for joint venture (i.e. equal control) status -- which was rejected. Had the minority firms been free to bid individually against each other (admittedly for more modest participation shares) and, at the same time, submit their COMPACT joint venture proposal, the architects would have increased the net productive capacity of the group by offering to Gresham and Smith and MNAA the traditional choice of each firm's respective services plus an option for joint services previously not available. [8] The COMPACT arrangement restricts the supply of qualified minority architects available to participate in the construction of the airport -- where before **[**25]** there were three Middle Tennessee minority-owned enterprises offering architectural services from which to choose, now there is only one. The terms of the joint venture restricts the coalition members opportunity to participate in the construction of the airport to COMPACT's "all or nothing" terms.

While joint ventures traditionally have been subject to the rule of reason, *United States v. Penn-Olin Chemical Co., 378 U.S. 158, 84 S. Ct. 1710, 12 L. Ed. 2d 775 (1964)*, federal courts will not hesitate to apply the *per se* rule to impose *Section 1* liability upon a finding of some intrinsic or ancillary aspect of the joint venture agreement which falls within the well-defined parameters of the *per se* rule. *Timken Roller Bearing Co. v. United States* ***[**26]*** *, 341 U.S. at 598*, ("nor do we find any support in reason or authority for the proposition that agreements between legally separate persons and companies to suppress competition among themselves and others can be justified by labelling the project a 'joint venture. '"); *Engine Specialties, Inc. v. Bombardier, Inc., 605 F.2d 1, 8 (1st Cir. 1979) cert. denied*, *446 U.S. 983, 100 S. Ct. 2964, 64 L. Ed. 2d 839 (1980)* ("the nomenclature 'joint venture ' does not automatically exempt a combination from the per se rule which is found to have elements inherently offensive to the antitrust laws"). The principal task of this Court, then, is to examine the COMPACT agreement to ascertain whether any of its terms may be characterized as *per se* unlawful restraints of trade.

2. *Horizontal Allocation of Territories and Customers*

Plaintiffs argue that the COMPACT agreement does not violate the antitrust laws since it does not specifically limit competition between its members. The plaintiffs point to Paragraph 5 of the COMPACT contract claiming that its language demonstrates that the arrangement between the architects is merely "an agreement to agree." Plaintiff's Brief Opposing Summary **[**27]** Judgment at 3. Although the Court agrees that Paragraph 5 does in fact represent an "agreement to agree," it reaches an opposite conclusion as to the legality of the provision. The Court interprets Paragraph 5 as an agreement between competitors to conspire to allocate territories, customers and contracts and to fix the price of minority architect participation on public contracts.

Paragraph 5 of the COMPACT contract provides:

> **[*1576]** 5. COMPACT shall delineate specifically and in writing the areas of marketing for architectural contracts which it wishes to pursue on a joint venture basis for the benefit of its members and shall also designate specifically the areas which members are free to pursue in their own private marketing activities apart from COMPACT. No member shall pursue or accept as an individual firm without agreement of all members of COMPACT in writing in advance, any project which COMPACT has targeted or is pursuing in any way as a potential project for COMPACT.

Unlike the traditional notion of a joint venture -- a well-defined common undertaking in pursuit of a single transaction or series of transactions -- the COMPACT agreement is open-ended and **[**28]** without parameters defining the scope of the venture. The COMPACT agreement provides for the creation of a common "clearinghouse" through

---

[8] Additionally, the bid specifications of Williams, Russell and Johnson, the firm chosen by Gresham and Smith, would have been subjected to more rigorous scrutiny had it been subject to competition from bids by each of the individual member firms of COMPACT.

which all Middle Tennessee minority-owned architectural firms may come together, discuss any and all potential contracts, and then decide whether joint pursuit or competition among themselves best serves the interests of each member of the group.

The plaintiffs assert that because they are black their actions are tied to the crusade against racial discrimination and are therefore immune from antitrust liability. What they ignore, however, is that Congress has enacted legislation aimed specifically at redressing the effects of racial discrimination: the Civil Rights Act of 1871, 42 U.S.C. §§ 1981-1986, and affirmative action set asides for minority business enterprise participation in public contracts, 15 U.S.C. § 637(b) (1976). [9] Private conspiracies in restraint of trade simply are not an available option. If the individual member firms of COMPACT believed that they were subject to racial discrimination in MNAA's selection of Gresham and Smith as the prime contractor on the design phase of the airport construction, or that they systematically **[**29]** were being excluded from other contracting opportunities, their remedy in the federal courts lay in seeking redress under the Civil Rights Act, not by way of a private self-help remedy that violates the Sherman Act.

HN9[] The horizontal division of markets has long been recognized as a patently anticompetitive arrangement between business competitors and, accordingly, has been subject to *per se* illegal treatment by courts. Allocation of markets -- whether of territories or customers -- tampers with free market forces by reducing or eliminating competition between business rivals, thereby reducing the incentive to increase productivity, to implement innovative strategy and to devise methods to better serve consumers. ***HN10***[]

[30]** A horizontal allocation of markets is characterized by three elements: (1) concerted action between two or more persons; (2) actual or potential competition between the participants in the conspiracy; and (3) an elimination of competition in the market serviced by the conspirators. 2 E. Kitner, *Federal* ***Antitrust law*** § 10.42 (1980). One of the admitted purposes of COMPACT's formation is to eliminate competitive bidding between its members. This Court finds the arrangement falls squarely within the *per se* rule uniformly applied by federal courts condemning a cooperative or coalition's allocation of territorial regions of exclusive jurisdiction to its members. *United States v. Topco Associates, 405 U.S. 596, 607-08, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)* ("it is only after considerable experience with certain business relationships that courts classify them as *per se* violations of the Sherman Act"); *United States v. Sealy, 388 U.S. 350, 357, 87 S. Ct. 1847, 18 L. Ed. 2d 1238 (1967)*; *Timken Roller Bearing Co. v. United States, 341 U.S. at 598-601* (regardless of the justifications presented by problems in international trade, allocation of territories between **[**31]** international **[*1577]** cartel members is *per se* unlawful). In *Topco Associates*, the Supreme Court applied the *per se* rule to strike down a cooperative association's assignment of sales zones to each of approximately twenty-five small to medium-sized supermarkets. The Court observed:

> One of the classic examples of a per se violation of *§ 1* is an agreement between competitors at the same level of the market structure to allocate territories in order to minimize competition. . . . This Court has reiterated time and time again that "horizontal territorial limitations . . . are naked restraints of trade with no purpose except stifling of competition." *White Motor Co. v. United States, 372 U.S. 253, 263, 83 S. Ct. 696, 9 L. Ed. 2d 738 (1963)*.

Id. at 608. Although plaintiffs' counsel argue that no allocation of territories was intended nor occurred, the testimony of the plaintiffs themselves does not support their position. Officers of each of the three minority architectural firms stated that they intended to increase their bargaining power by eliminating competition between themselves.

Alternatively, the plaintiffs contend that the language of Paragraph **[**32]** 5 does not contemplate the division of territories, but rather the delineation of "subject matter areas." Plaintiffs' Brief Opposing Summary Judgment at 3. The plaintiffs cannot avoid the antitrust laws through amorphous definition. Regardless of the semantic

---

[9] As the Court observed above, MNAA seems to have been successful in providing minority business enterprises the maximum practicable opportunity to participate in the construction of the new airport facility. In most cases, MNAA was able to meet the targets specified in its affirmative action program.

characterization, a horizontal allocation of any element of the market for which businessmen or professionals compete represents a *per se* violation of the Sherman Act. *See, e.g., United States v. Cadillac Overall Supply, 568 F.2d 1078, 1088 (5th Cir.)*, *cert. denied*, *437 U.S. 903, 98 S. Ct. 3088, 57 L. Ed. 2d 1133 (1978)* (applying *per se* rule to horizontal allocation of customers); *United States v. Consolidated Laundries Corp., 291 F.2d 563, 574-75 (2d Cir. 1961)*; (territories and customers); *United States v. Pennsylvania Refuse Removal Association, 242 F. Supp. 794, 798-99 (E.D. Pa. 1965)* *aff'd* *357 F.2d 806 (3d Cir. 1966)*, *cert. denied*, *384 U.S. 961, 16 L. Ed. 2d 674, 86 S. Ct. 1588 (1966)* (territories and customers).

3. *Agreements to Refrain from Bidding*

COMPACT's demand for joint venture status with Gresham and Smith on the terminal design phase of the airport construction together with **[**33]** its members' refusal to deal in their individual capacities represents a genre of price fixing. COMPACT's operation stabilizes the price of minority business enterprise participation on government contracts insofar as the COMPACT agreement prevents individual minority-owned firms from bidding on designated projects and requires the firms to come together to exchange price and performance data in setting a joint bid and determining how to split up the work and profits. In *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 221, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*, the Supreme Court stated:

> Any combination which tampers with price structures is engaged in unlawful activity. Even though the members of the price-fixing group were in no position to control the market, to the extent that they raised, lowered, or stabilized prices they would be directly interfering with the free play of market forces.

The concept of "price fixing" has been given broad application to condemn a wide variety of practices, far exceeding the conventional image of the smoke-filled backroom in which competitors wrangle over how much each shall charge the public for their common product. The **[**34]** *per se* rule applies full force to conduct which has only the indirect effect of fixing or, more appropriately to this case, stabilizing prices. *General Cinema Corp. v. Buena Vista Distribution Co., 532 F. Supp. 1244, 1256-57 (C.D. Cal.)*, *aff'd* *681 F.2d 594 (9th Cir. 1982)* (condemning as *per se* illegal price fixing "split of product agreements" under which movie theater operators and agreed to divide "first rights of negotiation" with film distributors for newly-released feature films). In *National Society of Professional Engineers v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d* **[*1578]** *637 (1978)*, the Supreme Court ruled that the elimination of competitive bidding pursuant to the Society's ethical canons, though technically not price fixing, constituted a *per se* unlawful conspiracy "interfering with the setting of price by free market forces." [10] Similarly, in this case, the agreement by each COMPACT member to refrain from bidding COMPACT-designed contracts and to pursue those projects only under the banner of COMPACT represents an attempt to peg the price of minority participation.

[35]** The plaintiffs' impress upon the Court that their three firms employ the great majority of black architects in the Middle Tennessee area. Assuming the position is correct, COMPACT's election to pursue a particular public contract eliminates competitive bidding between the majority of MBEs for the minority business set aside share of the project. [11] If only one entity bids on a contract, the persons who control the entity have the ability to set the terms -- and the price -- of the contract.

While the COMPACT arrangement is not bid rigging nor price fixing as such, there is little difference in terms of the anticompetitive impact. *See* *United States v. Koppers Co., Inc., 652 F.2d 290, 293-96 (2d Cir.)*, *cert. denied*, *454 U.S. 1083, 70 L. Ed. 2d 617, 102 S. Ct. 639 (1981)*. An agreement between competitors **[**36]** that creates a joint

---

[10] Although Justice Stevens' opinion in *National Society of Professional Engineers* appears to rest heavily on the application of the rule of reason, this Court agrees with the reading given by a number of other federal courts that the *per se* rule actually was applied to condemn the Society's prohibition on competitive bidding. *See* *Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 647-48, 100 S. Ct. 1925, 64 L. Ed. 2d 580 (1980)*; *General Cinema Corp. v. Buena Vista Distribution Co., 532 F. Supp. 1244, 1256 and n.7 (C.D. Cal.)*, *aff'd* *681 F.2d 594 (9th Cir. 1982)*.

[11] What the members of COMPACT did not foresee was the Gresham and Smith would look outside the immediate area to procure a qualified minority architect to satisfy MNAA's affirmative action objectives.

venture having the power to direct individual competitors to refrain from bidding on contracts interferes with the free market price structure.

> The reasonableness of prices has no constancy due to the dynamic quality of business facts underlying price structures. Those who fixed reasonable prices today would perpetuate unreasonable prices tomorrow, since those prices would not be subject to continuous administrative supervision and readjustment in light of changed conditions. Those who controlled the prices would control or effectively dominate the market. And those who were in that strategic position would have it in their power to destroy or drastically impair the competitive system.

United States v. Socony-Vacuum Oil Co., 310 U.S. at 221.

An examination of the provisions of settlement decrees entered in cases involving bid rigging supports this Court's position that joint bidding arrangements between competitors on construction projects is impermissible absent a showing that the work specifications contained in the bid cannot be performed without such a combination, *United States v. New England Concrete Pipe Corp*., 1959 Trade Cas. **[**37]** (CCH) para. 69,481 (D. Mass. 1959), or that the joint venture is to be undertaken to produce a product not currently made by any of the joint venturers, or that the product cannot be made competitively by just one of the participants. *United States v. General Electric Co., 1962 Trade Cas. (CCH) P 70,367 (E.D. Pa. 1962)*; *see also* *United States v. Bituminous Concrete Association, Inc., 1960 Trade Cas. (CCH) P 69,878 (D. Mass. 1960)*; *United States v. Lake Asphalt and Petroleum Co. of Massachusetts, 1960 Trade Cas. (CCH) P 69,835 (D. Mass. 1960)*. In the instant case, the combination between minority architects is not necessary to enable the firms to perform the design work sought.

The plaintiffs argue that if their conduct is to be subjected to antitrust scrutiny, then the recent decision in *National Collegiate Athletic Association v. Board of Regents of the University of Oklahoma, 468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70, 52 U.S.L.W. 4928 (1984)*, directs this Court to apply the rule of reason. In *NCAA*, the Supreme Court **[*1579]** carved out an exception to the *per se* rule's applicability to price fixing conspiracies in light of the nature of the industry. **[**38]**

> What is critical is that this case involves an industry [i.e., college football] in which horizontal restraints in competition are essential if the product is to be available at all.
>
> As Judge Bork has noted: "Some activities can only be carried out jointly. Perhaps the leading example is league sports. When a league of professional lacrosse teams is formed, it would be pointless to declare their cooperation illegal on the ground that there are no other professional lacrosse teams." R. Bork, *The Antitrust Paradox* 278 (1978). What the NCAA and its member institutions market in this case is competition itself -- contests between competing institutions. Of course, this would be completely ineffective if there were no rules on which the competitors agreed to create and define the competition to be marketed. A myriad of rules affecting such matters as the size of the field, the number of players on a team, and the extent to which physical violence is to be encouraged or proscribed, all must be agreed upon, and all restrain the manner in which institutions compete. . . . The integrity of the "product" cannot be preserved except by mutual agreement; if an institution adopted **[**39]** such restrictions unilaterally, its effectiveness as a competitor on the playing field might soon be destroyed. Thus, the NCAA plays a vital role in enabling college football to preserve its character, and as a result enables a product to be marketed that otherwise would be unavailable. In performing its role, its actions wide consumer choice . . . and hence can be viewed as pro-competitive.

National Collegiate Athletic Association, 52 U.S.L.W. at 4932. Plaintiffs seek to draw an analogy to their situation, claiming that minority participation is impossible without joint action among all minority architects. This Court disagrees. As the Court has observed throughout the opinion, if participation on public contracts by individual firms has been prohibited by a conspiracy to exclude minority businesses, then the Civil Rights Act affords the individual victims redress by way of a private cause of action. The Court rejects the plaintiffs' position that minority architectural services can be marketed effectively only through a joint venture. There simply is no similarity between the college football industry and the architectural profession. Procompetitive efficiencies are **[**40]** generated, rather than reduced by competition between minority architectural firms. Elimination of such competition compromises consumer welfare and, hence, runs afoul of *Section 1* of the Sherman Act.

IV. *The Propriety of Summary Judgment*

COMPACT's failure to procure joint venture status with Gresham and Smith on the airport contract motivated the joint venture and its individual members to seek alternative redress via a claim of racial discrimination under the Civil Rights Act. ***HN11***[] This Court, however, will not grant relief which will further the objectives of an unlawful conspiracy. *Board of Regents of the University of Oklahoma v. National Collegiate Athletic Association, 546 F. Supp. 1276, 1327 (E.D. Okla. 1982)*, *aff'd in part, remanded in part* *707 F.2d 1147 (10th Cir. 1983)*, *aff'd* *468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70, 52 U.S.L.W. 4928 (1984)* ("it would be unseemly for the Court having found an overt violation of the antitrust laws, to allow the violation to continue for even a single day . . ."). In light of this Court's determination that COMPACT violates the Sherman Act, the Court is compelled to grant the defendant's motion for summary judgment on those **[**41]** claims involving illegal conduct by the individual plaintiffs. *Continental Wall Paper Co. v. Louis Voight & Sons, 212 U.S. 227, 267, 29 S. Ct. 280, 53 L. Ed. 486 (1909)* (affirming summary dismissal of plaintiff's claims in light of the plaintiff's role in a price-fixing conspiracy, stating that the Court would not render "a judgment [which] would, in effect, aid the execution of agreements which constituted [an] illegal combination").

HN12[] Summary adjudication is used sparingly in antitrust cases. *Poller v. Columbia **[*1580]** Broadcasting System, 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962)*; *Ron Tonkin Gran Turismo v. Fiat Distributors, 637 F.2d 1376, 1381 (9th Cir.)* *cert. denied*, *454 U.S. 831, 70 L. Ed. 2d 109, 102 S. Ct. 128 (1981)* ("general reluctance does not preclude the use of summary judgment in antitrust litigation"); *see generally* 2 P. Areeda and D. Turner, *Antitrust Analysis* para. 316 (1980). Usually, the facts presented before the Court are complex and require an extended probe into industry structure, the parties' conduct and the economic nuances raised by the disputed actions. Almost without exception, summary judgment is appropriate **[**42]** only when the conduct at issue falls clearly within those categories of practices traditionally treated as *per se* unlawful or when the allegations in the complaint clearly fail to establish a material issue of fact for adjudication.

As discussed above, the horizontal division of geographic markets, allocation of customers and price fixing are practices which federal courts long have regarded as *per se* illegal. And while the Supreme Court in recent years has carved out exceptions to the *per se* rule and mandated rule of reason analysis be given to certain practices, *see, e.g.,* *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)* (non-price vertical restraints), the Supreme Court consistently has reaffirmed its position that the *per se* rule has continuing vitality particularly in its application to horizontal conspiracies involving price-fixing and division of markets.

Per se treatment of the practices engaged in by COMPACT serve important policies promoting the enforcement of antitrust laws. First, businessmen are given a "bright line" demarcating the division between permissible commercial conduct and that which **[**43]** is proscribed. The "bright line" provides valuable assistance to businessmen in planning their commercial strategies, affording them a measure of predictability as to the risks of antitrust liability for any contemplated scheme. Second, if the history of ***antitrust law*** demonstrates anything it is that "elaborate inquiry into the reasonableness of challenged business practices entails significant costs." *Arizona v. Maricopa County Medical Society, 457 U.S. 332, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*. Application of the *per se* rule results in judicial efficiency by formalizing the legal conclusion that certain business practices are by their very nature anticompetitive, pernicious and without redeeming value. *Northern Pacific Railway v. U.S., 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*. The *per se* rule avoids the situation found in many rule of reason cases characterized by documents running into the millions of pages and litigation occupying years of court time. *Broadcast Music, Inc., 441 U.S. at 8, n. 11, 99 S. Ct. at 1556, n. 11*. (the *per se* rule serves to benefit all concerned by avoiding "the necessity for an incredibly complicated and prolonged **[**44]** economic investigation . . . -- an inquiry so often wholly fruitless when undertaken"). While this Court hesitates to enforce the *per se* rule, it will apply it when the conduct challenged clearly warrants such treatment. It is appropriate in this case.

This Court need not conduct an elaborate inquiry into the structure of the architectural industry or the market power of COMPACT and its members to conclude that the COMPACT agreement is anticompetitive. *National Society of Professional Engineers, 435 U.S. at 697*. Proof of the conspirators' market power is unnecessary upon a finding that an agreement represents a naked restraint on trade. *NCAA*, 52 U.S.L.W. at 4934; *Klor's Inc. v. Broadway Hale Stores, Inc., 359 U.S. 207, 213, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*. In *White Motor Co. v. United States, 372 U.S. 253, 259-60, 83 S. Ct. 696, 9 L. Ed. 2d 738 (1963)*, the Supreme Court stated that once a party establishes the existence of a horizontal conspiracy to divide markets, fix prices, or group boycott "a trial to show their nature, extent, and degree is no longer necessary." In that case, the Supreme Court affirmed in part and reversed in part the district court's **[**45]** entry of summary judgment against a truck manufacturer **[*1581]** shown to have engaged in a conspiracy with its distributors to allocate territories, fix prices, and impose group boycotts. The Court affirmed summary judgment as to the price fixing count but reversed and remanded the case as to the territorial allocation and customer limitation charges. The Court reversed judgment on these latter claims since they involved *vertically* imposed restraints, which the Court has recognized as potentially procompetitive and, therefore, deserving of full consideration at trial. *Id. at 263-64*. In this case, however, the restraints are *horizontally* imposed between actual competitors and, as the *White* Court observed, lack any possible procompetitive efficiencies which would warrant a full trial. *Id. at 263*.

V. *Conclusion*

This Court finds that COMPACT and its members have violated *Section 1* of the Sherman Act by conspiring to divide markets and to interfere with the bidding structure for public contracts. The conspiracy is *per se* illegal. The Court need not inquire further into the plaintiffs' motives, their market power, or other aspects of the industry in which **[**46]** they do business. The Court grants partial summary judgment against the plaintiffs as to those claims against MNAA, Gresham and Smith, Williams, Russell and Johnson and the Metropolitan Government of Nashville and Davidson County, Tennessee, charging those defendants with conspiring to violate the Civil Rights Act and the Sherman Act with respect to the construction of the airport. The other counts in the plaintiffs' complaint challenge actions taken against each of the plaintiffs in the individual and/or firm capacities. The Court finds that these matters continue to present issues for adjudication.

HN4[] Private Actions, Racketeer Influenced & Corrupt Organizations

UnderRICO, *18 U.S.C.S. § 1961(1)*, "racketeering activity" is defined in terms of a long list of state and federal crimes, including mail fraud, pursuant to *18 U.S.C.S. § 1341*. A person commits mail fraud by using the mails for the purpose of executing a scheme or artifice to defraud pursuant to *§ 1341*. Under RICO, *18 U.S.C.S. § 1961(5)*, a "pattern of racketeering activity," as required by RICO *§ 1962(c)*, requires at least two acts of racketeering activity within a ten year period. The individual acts of racketeering activity are usually described as the "predicate offenses."

HN5[] Private Actions, Racketeer Influenced & Corrupt Organizations

RICO, *18 U.S.C.S. § 1961(3)* and *(4)*, define "person" and "enterprise" very broadly. The term "person" includes any individual or entity capable of holding a legal or beneficial interest in property. The term "enterprise" includes any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN6[] **Racketeer Influenced & Corrupt Organizations, Claims**

To state a claim under RICO, a civil plaintiff must allege more than the occurrence of two predicate acts of racketeering from the list inRICO, *18 U.S.C.S. § 1961*. The elements of a civil RICO claim are set forth in *§§ 1964(c)* and *1962*. The plaintiff must allege an injury to "business or property," and that injury must be "by reason of a violation of *§ 1962*, pursuant to *§ 1964(c)*. To allege a violation of *§ 1962(c)*, the plaintiff must allege that the defendant (1) was employed by or associated with (2) an enterprise engaged in, or the activities of which affected, interstate or foreign commerce, and (3) that the person conducted or participated in the conduct of the enterprise's affairs (4) through a pattern of racketeering activity.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN7[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

A civil plaintiff, underRICO, *18 U.S.C.S. §§ 1961 et seq.*, need not allege or prove injury beyond an injury to business or property resulting from the underlying acts of racketeering. Allegations of excessive interest charges resulting from an alleged fraudulent scheme to overstate the prime rate satisfy the requirements ofRICO, *18 U.S.C.S. § 1964(c)*.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN8[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The "by reason of" language, inRICO, *18 U.S.C.S. § 1964(c)*, simply imposes a proximate cause requirement on plaintiffs. The criminal conduct in violation of *§ 1962* must, directly or indirectly, have injured the plaintiff's business or property. A defendant who violates *§ 1962* is not liable for treble damages to everyone he might have injured by other conduct, nor is the defendant liable to those who have not been injured.

HN9[] Private Actions, Racketeer Influenced & Corrupt Organizations

Under RICO, 18 U.S.C.S. § 1962(c), "enterprise" refers to a being different from, not the same as or part of, the "person" whose behavior the act was designed to prohibit, and, failing that, to punish. Section 1962(c), contemplates a separate "person" and "enterprise," because the enterprise may very well be the victim of the racketeering activity.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN10[] Private Actions, Racketeer Influenced & Corrupt Organizations

RICO, 18 U.S.C.S. § 1962(c), requires separate entities as the liable person and the enterprise which has its affairs conducted through a pattern of racketeering activity.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN11[] Private Actions, Racketeer Influenced & Corrupt Organizations

RICO, 18 U.S.C.S. § 1962(c), requires that the liable "person" be "employed by or associated with any enterprise" which affects interstate or foreign commerce. The use of the terms "employed by" and "associated with" contemplates a person distinct from the enterprise.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN12[] Private Actions, Racketeer Influenced & Corrupt Organizations

A corporation and an association in fact can both satisfy the "enterprise" requirement ofRICO, 18 U.S.C.S. § 1962(c). However, a corporation and an association in fact differ substantially with respect to the "person" element. Where persons associate "in fact" for criminal purposes, each person may be held liable RICO for his, her, or its participation in conducting the affairs of the association in fact through a pattern of racketeering activity. But the nebulous association in fact does not itself fall within the RICO definition of "person." By contrast, a corporation obviously qualifies as a "person" under RICO and may be subject to RICO liability.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN13[] Private Actions, Racketeer Influenced & Corrupt Organizations

UnderRICO, *18 U.S.C.S. § 1962(c)*, the "enterprise" and the "person" must be distinct. However, a corporation-enterprise may be held liable under *§ 1962(a)* when the corporation is also a perpetrator. A "person," such as a corporation-enterprise, acts unlawfully if it receives income derived directly or indirectly from a pattern of racketeering activity in which the person has participated as a principal within the meaning of *18 U.S.C.S. § 2*, and if the person uses the income in the establishment or operation of an enterprise affecting commerce.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Business & Corporate Law > ... > Shareholder Actions > Actions Against Corporations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN14[] Private Actions, Racketeer Influenced & Corrupt Organizations

UnderRICO, *18 U.S.C.S. § 1962(a)*, the liable person may be a corporation using the proceeds of a pattern of racketeering activity in its operations. Thus the corporation-enterprise is liable under RICO when the corporation is actually the direct or indirect beneficiary of the pattern of racketeering activity, but not when it is merely the victim, prize, or passive instrument of racketeering. This is in accord with the primary purpose of RICO, which is to reach those who ultimately profit from racketeering, not those who are victimized by it.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN15[] Private Actions, Racketeer Influenced & Corrupt Organizations

HN16[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

RICO, *18 U.S.C.S. § 1962(c)*, requires only some separate and distinct existence for the person and the enterprise, and a subsidiary corporation is certainly a legal entity distinct from its parent. It is virtually self-evident that a subsidiary acts on behalf of, and thus conducts the affairs of, its parent corporation.

Banking Law > Types of Banks & Financial Institutions > National Banks > Affiliates & Subsidiaries

Business & Corporate Law > Agency Relationships > General Overview

HN17[] **National Banks, Affiliates & Subsidiaries**

A parent and its wholly owned subsidiary have a complete unity of interest. Their objectives are common, not disparate; their general corporate actions are guided or determined not by two separate corporate consciousnesses, but one. They are not unlike a multiple team of horses drawing a vehicle under the control of a single driver. With or without a formal "agreement," the subsidiary acts for the benefit of the parent, its sole shareholder.

HN18[] **Claims, Fraud**

Fed. R. Civ. P. 9(b) requires that allegations of fraud specify "with particularity" the circumstances of the alleged fraud, applies to fraud allegations in civil complaints under RICO, *18 U.S.C.S. § 1961 et seq.*

Counsel: Aram A. Hartunian, Futterman & Howard, Chicago, Illinois, for Plaintiff.

Donald E. Egan, Katten, Muchin, Zavis, Pearl & Galler, Chicago, Illinois, for Defendant.

Judges: Bauer and Cudahy, Circuit Judges, and Kellam, Senior District Judge. [**]

[**] Honorable Richard B. Kellam, Senior District Judge for the Eastern District of Virginia, is sitting by designation.

Opinion by: CUDAHY

Opinion

[*385] CUDAHY, Circuit Judge.

This appeal presents several issues involving civil claims under the federal Racketeer Influenced and Corrupt Organizations ("RICO") statute. *18 U.S.C. §§ 1961-1968*. The central issue concerns the type of injury a private civil plaintiff must allege to support a RICO claim under *18 U.S.C. § 1964(c)*. We must also consider several questions involving the RICO provisions requiring that a "person" conduct or participate in the conduct of the affairs of an "enterprise" through a pattern of racketeering activity, **[**2]** as those terms are defined in RICO. *18 U.S.C. § 1962(c)*. We affirm in part and reverse in part.

I

This is an appeal from the district court's dismissal for failure to state a claim. ***HN1***[] We shall therefore treat all allegations in the complaint as true and view them in the light most favorable to plaintiffs. The case arises from loans made by defendant American National Bank & Trust Company of Chicago ("ANB") to plaintiffs. Plaintiffs are several businesses, Haroco, Inc., Roman Ceramics, Inc., California Originals, Inc. and Mike Wayne Distilled Products Co. Haroco independently and together with other plaintiffs borrowed several million dollars from ANB between 1979 and 1981. Each loan agreement provided that the rate of interest would be "one per cent over the bank's prime rate," and the prime rate was defined as the "rate of interest charged by the bank to its largest and most creditworthy commercial borrowers for 90-day unsecured commercial loans." The defendants, in addition to ANB, are Ronald J. Grayheck, who is an officer and director of ANB, and Walter E. Heller **[**3]** International Corporation ("Heller International"), which is the parent company of ANB. [1]

Plaintiffs brought this action in March 1983 alleging that defendants had defrauded them in the calculation of the prime rate which determined their own variable interest payments. The only alleged injuries were excessive interest charges resulting from defendants' calculation of the prime rate. Plaintiffs included in their complaint three state law causes of action and two counts based on alleged violations of the federal Racketeer Influenced and Corrupt Organizations ("RICO") provisions in *18 U.S.C. §§ 1961-1968*. [2] As we shall explain in more detail below, plaintiffs' RICO claims were predicated on defendants' use of the mails in furtherance of the alleged scheme to **[**4]** defraud plaintiffs by overstating the prime interest rate. Count I of the amended complaint alleged that defendant ANB violated *18 U.S.C. § 1962(c)* by conducting ANB's and Heller International's affairs through a pattern of racketeering activity. Count II alleged that defendants Heller International and Grayheck violated *section 1962(c)* by conducting ANB's affairs **[*386]** through a pattern of racketeering activity.

Defendants moved on three principal grounds to dismiss the RICO counts. First, they argued that plaintiffs failed to allege the requisite causal relationship between their injuries and the RICO violations. Second, defendants argued that plaintiffs failed to allege the requisite relationships between "persons" and the "enterprises," the affairs of which were allegedly conducted through patterns of racketeering activity. Third, defendants argued that plaintiffs had **[**5]** not pleaded the predicate acts of mail fraud with the necessary particularity.

The district court concluded that the plaintiffs had failed to state claims under RICO because they did not allege that they had suffered any injury by reason of a RICO violation in addition to the injuries caused by the alleged mail fraud. The district court held "that a plaintiff's injury to be cognizable under RICO must be caused by a RICO violation and not simply by the commission of predicate offenses, such as acts of mail fraud." *Haroco, Inc. v.*

---

[1] According to the complaint, ANB has at all relevant times been either a wholly owned subsidiary of Heller, or a wholly owned subsidiary of American National Corporation, which in turn is a wholly owned subsidiary of Heller.

[2] RICO was enacted as Title IX of the Organized Crime Control Act of 1970, Pub. L. 91-452, 84 Stat. 922.

American National Bank & Trust Co., 577 F. Supp. 111, 114 (N.D. Ill. 1983). The district court therefore dismissed plaintiffs' RICO claims without reaching defendants' other arguments. Because there was no other ground for federal jurisdiction, the district court also dismissed the remaining pendent state law claims.

II

Before proceeding to the specific issues raised on this appeal, we must first sketch RICO's broad civil provisions. This court recently said that the civil RICO provisions are "constructed on the model of a treasure hunt." *Sutliff, Inc. v. Donovan Companies, 727 F.2d 648, 652 (7th Cir. 1984).* **[**6]** We begin the hunt with *18 U.S.C. § 1964(c)*, which provides the private cause of action:

> ***HN2***[] Any person injured in his business or property by reason of a violation of *section 1962* of this chapter may sue therefor in any appropriate United States district court and shall recover threefold the damages he sustains and the cost of the suit, including a reasonable attorney's fee.

The next step is to examine *section 1962*, which describes the prohibited conduct. In this case, the most relevant portion of the section provides:

> ***HN3***[] It shall be unlawful for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt.

18 U.S.C. § 1962(c). We must next turn to *section 1961*, which provides **[**7]** special statutory definitions for the key terms of *section 1962(c)*. ***HN4***[] "Racketeering activity" is defined in *section 1961(1)* in terms of a long list of state and federal crimes, including mail fraud, *18 U.S.C. § 1341*. A person commits mail fraud by using the mails for the purpose of executing a scheme or artifice to defraud. *18 U.S.C. § 1341*; *United States v. Wormick, 709 F.2d 454, 461-62 (7th Cir. 1983)*. A "pattern of racketeering activity," as required by *section 1962(c)*, requires at least two acts of racketeering activity within a ten year period. *18 U.S.C. § 1961(5)*. The individual acts of racketeering activity, such as the alleged mail fraud in this case, are usually described as the "predicate offenses."

HN5[] RICO also defines "person" and "enterprise" very broadly. The term "person" includes "any individual or entity capable of holding a legal or beneficial interest in property." *18 U.S.C. § 1961* **[**8]** *(3)*. The term "enterprise" includes "any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity." *18 U.S.C. § 1961(4)*.

RICO's terms are obviously very broad. Because various fraud offenses are included in the definition of "racketeering activity," RICO claims (with their treble-damage provisions) have recently become attractive to many plaintiffs in commercial disputes **[*387]** that otherwise might involve only breach of contract, or securities or state law fraud claims. In cases involving allegations of commercial fraud, for example, it is often possible for a plaintiff to allege two acts of mail fraud, thus constituting a "pattern of racketeering activity," and to allege further that the defendant conducted the affairs of an "enterprise" through that pattern of racketeering activity in violation of *section 1962(c)*. Whether RICO's broad terms should be read literally to permit RICO claims in instances of such "garden variety" fraud has recently been the subject of extended debates in the federal courts. The central issue in this case concerns the **[**9]** type of injury a plaintiff must allege to sustain a RICO claim.

III

The district court concluded that the plaintiffs were required to allege some injury in addition to injuries resulting from the predicate acts of racketeering. The courts imposing such a requirement have often referred to the additional injury as a "racketeering injury" or " racketeering enterprise injury." We shall use the term "racketeering injury." The district court focused on the requirement in *18 U.S.C. § 1964(c)* that the RICO plaintiff be injured "by reason of a violation of *section 1962*," and interpreted that language to mean that allegations of injuries resulting only from the predicate acts of racketeering would not support a RICO claim. *577 F. Supp. at 113-15*. Because the only alleged injuries in this case were excessive interest payments resulting from the underlying fraud, the district court dismissed the RICO counts. The district court did not suggest what additional injuries might satisfy section 1964(c).

At the outset we should avoid confusion by distinguishing a "racketeering injury" from the elements of a RICO cause of action spelled out explicitly **[**10]** in the statute. There can be no doubt that ***HN6***[] to state a claim under RICO, a civil plaintiff must allege more than the occurrence of two predicate acts of racketeering from the list in section 1961. The elements of a civil RICO claim are set forth in sections 1964(c) and 1962. The plaintiff must allege an injury to "business or property," and that injury must be "by reason of a violation of section 1962**.**" 18 U.S.C. § 1964(c). In this case we are concerned only with the conduct prohibited by subsection (c) in section 1962, and not with the provisions of subsections (a), (b) or (d). To allege a violation of section 1962(c), the plaintiff must allege that the defendant (1) was employed by or associated with (2) an enterprise engaged in, or the activities of which affected, interstate or foreign commerce, and (3) that the person conducted or participated in the conduct of the enterprise's affairs (4) through a pattern of racketeering activity. *Alcorn County v. U.S. Interstate Supplies, Inc., 731 F.2d 1160, 1167-68 (5th Cir. 1984)*; *Moss v. Morgan Stanley, Inc., 719 F.2d 5, 17 (2d Cir. 1983),* **[**11]** *cert. denied*, *465 U.S. 1025, 104 S. Ct. 1280, 79 L. Ed. 2d 684 (1984)*.

The "racketeering injury" requirement imposed by the district court here goes farther than this elementary exposition of RICO. The district court required a special kind of injury for RICO claims. That "racketeering injury" is presumably something peculiar to RICO, although the district court here did not explain what the requirement is.

Whether a claim under section 1964(c) requires a racketeering injury has recently been one of the most hotly disputed RICO issues in the federal courts. The district courts in this circuit have disagreed on the issue, [3] **[**12]** and district courts in other circuits **[*388]** are also divided. [4] Although we have not tried to count cases, there does

---

[3] In addition to the district court's decision in this case, *Haroco, Inc. v. American National Bank & Trust Co., 577 F. Supp. 111, 114-15 (N.D. Ill. 1983)*, the district court concluded that a racketeering injury is required under RICO in *County of Cook v. Midcon Corp., 574 F. Supp. 902, 919-20 (N.D. Ill. 1983)* (Leighton, J.). District court decisions in this circuit refusing to require a racketeering injury include *Kosch v. Parkway Bank & Trust Co.*, No. 83 C 4832, slip op. at 8-9 (N.D. Ill. March 9, 1984) (Getzendanner, J.); *Addis v. Moser*, No. 83 C 6118, slip op. at 12-18 (N.D. Ill. Feb. 15, 1984) (Marshall, J.); *Swanson v. Wabash, Inc., 577 F. Supp. 1308, 1318-20 (N.D. Ill. 1983)* (Aspen, J.).

[4] District court decisions in other circuits holding squarely that a plaintiff must prove "something more" or a racketeering injury include: *Margolis v. Republic National Bank, 585 F. Supp. 595, 597 (S.D.N.Y. 1984)*; *Bruns v. Ledbetter, 583 F. Supp. 1050, 1056 (S.D. Cal. 1984)*; *Furman v. Cirrito, 578 F. Supp. 1535, 1539-41 (S.D.N.Y. 1984)*, *aff'd*, *741 F.2d 524 (2d Cir. 1984)*; *Hudson v. Larouche, 579 F. Supp. 623, 630 (S.D.N.Y. 1983)*; *Dakis v. Chapman, 574 F. Supp. 757, 761 (N.D. Cal, 1983)*; *Richardson v. Shearson/American Express Co., 573 F. Supp. 133, 137 (S.D.N.Y. 1983)*, *disavowed by author*, *Laterza v. American Broadcasting Co., 581 F. Supp. 408, 414 (S.D.N.Y. 1984)*; *In re Action Industries Tender Offer, 572 F. Supp. 846, 852 (E.D. Va. 1983)*; *Guerrero v. Katzen, 571 F. Supp. 714, 718-19 (D.D.C. 1983)*; *Bankers Trust Co. v. Feldesman, 566 F. Supp. 1235, 1240-42 (S.D.N.Y. 1983)*, *aff'd sub nom.* *Bankers Trust Co. v. Rhoades, 741 F.2d 511 (2d Cir. 1984)*; *Barker v. Underwriters at Lloyd's, 564 F. Supp. 352, 358 (E.D. Mich. 1983)*; *Harper v. New Japan Securities Int'l., Inc., 545 F. Supp. 1002, 1006-08 (C.D. Cal. 1982)*; *Landmark Savings & Loan v. Loeb Rhoades, Hornblower & Co., 527 F. Supp. 206, 208-09 (E.D. Mich. 1981)*.

District court decisions from other circuits holding squarely that a RICO plaintiff need not allege a racketeering injury include: *Minpeco S.A. v. Conticommodity Services, Inc.*, No. 81 Civ. 7619, slip op. at 2 (S.D.N.Y. March 28, 1984); *Estee Lauder, Inc. v. Harco Graphics, Inc.*, 621 F. Supp. 689, slip op. at 3 (S.D.N.Y. 1984); *Wilcox v. Ho-Wing Sit, 586 F. Supp. 561, 568-69 (N.D. Cal. 1984)*; *In re Catanella, 583 F. Supp. 1388, 1434-37 (E.D. Pa. 1984)*; *Laterza v. American Broadcasting Co., 581 F. Supp. 408, 414 (S.D.N.Y. 1984)*; *Charing Cross, Inc. v. Riggs Nat'l Bank*, No. 82-2207, slip op. at 10-14 (D.D.C. Oct. 7, 1983); *Slattery v. Costello, 586 F. Supp. 162, 167 (D.D.C. 1983)*; *Yancoski v. E. F. Hutton & Co., 581 F. Supp. 88, 96 & n.19 (E.D. Pa. 1983)*; *Kirschner v. Cable/Tel. Corp., 576 F. Supp. 234, 244 (E.D. Pa. 1983)*; *In re Longhorn Securities Litigation, 573 F. Supp. 255, 269-70 (W.D. Okla. 1983)*; *Ralston v. Capper, 569 F. Supp. 1575, 1580 (E.D. Mich. 1983)*; *Mauriber v. Shearson/American Express, Inc., 567 F. Supp. 1231, 1240-41 (S.D.N.Y. 1983)*; *Seville Industrial Machinery Corp. v. Southmost Machinery Corp., 567 F. Supp. 1146, 1156-57 (D.N.J. 1983)*, *aff'd in part and rev'd in part, both on other grounds*, *742 F.2d 786 (3d Cir. 1984)*;

not appear to be a clear weight of authority at the district court level either for or against the racketeering injury requirement.

[13]** Among the courts of appeals, the situation is more complicated. In *Schacht v. Brown, 711 F.2d 1343 (7th Cir.)*, *cert. denied*, *464 U.S. 1002, __, 104 S. Ct. 508, 509, 78 L. Ed. 2d 698, (1983)*, the leading Seventh Circuit case on civil RICO, we rejected several arguments which are closely related to the racketeering injury question. After oral argument in this case, the Second Circuit issued three decisions which, together, amount to an en banc ruling by the Second Circuit in support of some sort of racketeering injury requirement. *Sedima, S.P.R.L. v. Imrex Co., 741 F.2d 482 (2d Cir. 1984)*; *cert. granted, 469 U.S. 1157, 105 S. Ct. 901, 83 L. Ed. 2d 917 (1985)*; *Bankers Trust Co. v. Rhoades, 741 F.2d 511 (2d Cir. 1984)*; *Furman v. Cirrito, 741 F.2d 524 (2d Cir. 1984)*. [5] In addition, several recent decisions by this and other courts assume that injuries resulting from the predicate acts of racketeering satisfy RICO's requirements. *Sutliff, Inc. v. Donovan Companies, supra, 727 F.2d at 653-54*; *Alcorn County v. U.S. Interstate Supplies, Inc., supra, 731 F.2d at 1169*; **[**14]** *Bunker Ramo Corp. v. United Business Forms, Inc., 713 F.2d 1272, 1288 (7th Cir. 1983)*; *Bennett v. Berg, 685 F.2d 1053, 1058-59 (8th Cir. 1982)*, *aff'd en banc*, *710 F.2d 1361, (8th Cir.)*, *cert. denied*, *464 U.S. 1008, 104 S. Ct. 527, 78 L. Ed. 2d 710 (1983)*. [6]

[15]** **[*389]** Courts on both sides of the racketeering injury dispute have claimed that they are merely following the "plain" meaning of *section 1964(c)*. *Compare Bankers Trust Co. v. Rhoades, supra*, slip op. at 5619 (plain meaning requires a distinct RICO injury), *with Furman v. Cirrito, supra*, slip op. at 11 (language is clear and does not require racketeering injury). We therefore suspect that we shall have to do more than stare at the language of *section 1964(c)* to decide this issue.

The initial hurdle for proponents of the racketeering injury is merely to define it, for "a racketeering enterprise injury is a slippery concept whose definition has eluded even those courts professing to recognize it," *Alexander Grant & Co. v. Tiffany Industries, supra, at 413*. Neither the district court nor the defendants in their brief have made any effort to define the requirement, but they are not alone in this respect. Many district courts have imposed on RICO plaintiffs a racketeering injury requirement without explaining what the requirement is. *See, e.g., Hudson v. Larouche, 579 F. Supp. 623, 630 (S.D.N.Y. 1983)*; *Furman v. Cirrito, 578 F. Supp. 1535, 1539-41 (S.D.N.Y. 1984),* **[**16]** *aff'd*, *741 F.2d 524 (2d Cir. 1984)*; *King v. Lasher, 572 F. Supp. 1377, 1382 (S.D.N.Y. 1983)*; *Guerrero v. Katzen, 571 F. Supp. 714, 718-19 (D.D.C. 1983)*; *Barker v. Underwriters at Lloyd's, 564 F. Supp. 352, 358 (E.D. Mich. 1983)*. Those district courts which have rejected a racketeering injury requirement have often remarked on this lack of explanation and the difficulty of definition as major reasons for rejecting it. *E.g., In re Catanella, 583 F. Supp. 1388, 1436-37 (E.D. Pa. 1984)*.

Instead of defining a racketeering enterprise injury, at least two district courts have refused to do so, insisting only that they would know a racketeering enterprise injury when they saw one. *Williamette Savings & Loan v. Blake & Neal Finance Co., 577 F. Supp. 1415, 1430 (D. Ore. 1984)* (citing *Jacobellis v. Ohio, 378 U.S. 184, 197, 12 L. Ed. 2d 793, 84 S. Ct. 1676 (1964)* (Stewart, J., concurring)); *Waste Recovery Corp. v. Mahler, 566 F. Supp. 1466, 1468-69 (S.D.N.Y. 1983)* (citing *Jacobellis v. Ohio, supra*).

Eisenberg v. Gagnon, 564 F. Supp. 1347, 1352-53 (E.D. Pa. 1983); *Windsor Associates, Inc. v. Greenfeld, 564 F. Supp. 273, 278-79 (D. Md. 1983)*.

[5] The panel in *Furman v. Cirrito* explained that the three panels had tentatively reached conflicting results on the issue, and a request for en banc consideration of the other cases was denied. Slip op. 5639. Although the members of the panel in *Furman* disagreed with the other decisions, they felt compelled in light of the denial of en banc consideration, to follow *Sedima* and *Bankers Trust*.

[6] The Eighth Circuit position has been clouded by *Alexander Grant & Co. v. Tiffany Industries, 742 F.2d 408 (8th Cir. 1984)*, which rejects *Sedima* as inconsistent with *Bennett v. Berg*, but finds the racketeering injury requirement of *Bankers Trust* consistent with its own decision. *Alexander Grant & Co.*, slip op. at 6 n.7, 10-11. It is not entirely clear to us how the *Alexander Grant* court distinguishes between the necessity of pleading a racketeering injury as here defined and the necessity of alleging the existence of an enterprise in order to make out a violation of *section 1962(c)*. *Compare id. with supra* at slip op. at 6.

The Second Circuit's recent trilogy of decisions **[**17]** represents the most comprehensive effort to date to define and justify the racketeering injury requirement, and we shall deal with that definition here. As we shall explain in more detail below, the Second Circuit's new definition of the racketeering injury requirement appears to be essentially an amalgamation of proposed limits on RICO which we rejected in *Schacht v. Brown, supra*, as contrary to the language and purpose of RICO. We therefore view *Schacht* as controlling in this case; we could not follow the Second Circuit without essentially overruling *Schacht*.

We must examine in some detail both the precise holdings and the mode of statutory interpretation adopted in *Schacht*. The plaintiffs there alleged that the defendants had engaged in an elaborate fraudulent scheme involving the reorganization of an insolvent insurance company. According to the complaint, the defendants had defrauded the state director of insurance by concealing the extent of the insolvency and by drawing away the company's more profitable business for their own benefit through a reorganization scheme. The defendants allegedly convinced the state director to permit the insolvent **[**18]** company to continue writing unprofitable insurance, thus leading to the further dissipation of the company's remaining assets. *711 F.2d at 1345-46*. The company's losses from the fraudulent scheme were allegedly substantial enough to have injured the company's policyholders and creditors in addition to its shareholders. *711 F.2d at 1348-49*.

This court upheld the RICO counts in *Schacht* against numerous challenges. The defendants' primary attack was that Congress did not intend to apply RICO to "garden variety" business fraud or securities cases. Our treatment of that challenge in *Schacht* sets the tone for our analysis of RICO statutory issues here. We said there:

> **[*390]** We agree that the civil sanctions provided under RICO are dramatic, and will have a vast impact upon the federal-state division of substantive responsibility for redressing illegal conduct, but, like most courts who have considered this issue, we believe that such dramatic consequences are necessary incidents of the deliberately broad swath Congress chose to cut in order to reach the evil it sought; we are therefore without authority to restrict the application of **[**19]** the statute.

711 F.2d at 1353. Our approach to RICO in *Schacht* was based heavily on the Supreme Court's opinion in *United States v. Turkette, 452 U.S. 576, 69 L. Ed. 2d 246, 101 S. Ct. 2524 (1981)*, where the Court said:

> The language of the statute and its legislative history indicate that Congress was well aware that it was entering a new domain of federal involvement through the enactment of this measure. Indeed, the very purpose of the Organized Crime Control Act of 1970 was to enable the Federal Government to address a large and seemingly neglected problem. The view was that existing law, state and federal, was not adequate to address the problem, which was of national dimensions. That Congress included within the definition of racketeering activities a number of state crimes strongly indicates that RICO criminalized conduct that was also criminal under state law, at least when the requisite elements of a RICO offense are present. As the hearings and legislative debates reveal, Congress was well aware of the fear that RICO would "move large substantive areas formerly totally within the police power of the State into **[**20]** the Federal realm." In the face of these objections, Congress nonetheless proceeded to enact the measure, knowing that it would alter somewhat the role of the Federal Government in the war against organized crime and that the alteration would entail prosecutions involving acts of racketeering that are also crimes under state law. There is no argument that Congress acted beyond its power in so doing. That being the case, the courts are without authority to restrict the application of the statute.

452 U.S. at 586-87 (citations omitted).

It is true that the legislative history includes relatively little material on RICO's private civil remedy, *see Sedima, S.P.R.L. v. Imrex Co., supra, at 495* ("clanging silence of the legislative history"), but it is also clear that Congress deliberately chose the very broad language of RICO's provisions. Both the proponents and the opponents of RICO recognized the extraordinary breadth of its terms. [7] The opponents argued that the breadth of the statute might chill civil liberties, and the proponents of RICO defended the broad terms on the grounds that narrower terms would provide loopholes through which **[**21]** the primary targets of RICO might escape. Indeed, the unifying thread of RICO's legislative development was a desire to avoid creating loopholes for clever defendants and their lawyers. "In short, Congress chose to provide civil remedies for an enormous variety of conduct, balancing the need to redress a broad social ill against the virtues of tight, but possibly overly astringent, legislative draftsmanship." *Schacht, 711 F.2d at 1354*. As we said more recently in response to a similar challenge:

> But Congress deliberately cast the net of liability wide, being more concerned to avoid opening loopholes through which the minions of organized crime might crawl to freedom than to avoid making garden-variety frauds actionable in federal treble-damage proceedings -- the price of eliminating all possible loopholes.

Sutliff, Inc. v. Donovan Cos., supra, 727 F.2d at 654. *See* *Moss v. Morgan Stanley, Inc., supra, 719 F.2d at 21* (it is not the **[*391]** judiciary's role to reassess Congress's balance of costs and benefits of RICO).

[22]** In addition, even if Congress had meant to leave the door open to narrower judicial interpretations of the statute, we said in *Schacht* that many of the provisions of RICO are so broad that "there is simply no legitimate principled criterion" for accomplishing that task. *711 F.2d at 1356*. For example, since Congress itself rejected any attempt to employ the concept of "organized crime" in any colloquial sense in the language of RICO, the courts have thoroughly repudiated the contention that the civil provisions of RICO apply only to organized crime. *See* *Schacht, supra, 711 F.2d at 1353-54*; *Alcorn County, supra, 731 F.2d at 1167*; *Moss v. Morgan Stanley, Inc., supra, 719 F.2d at 21* & n.17; *Bennett v. Berg, supra, 685 F.2d at 1063*; *Cenco, Inc. v. Seidman & Seidman, 686 F.2d 449, 457 (7th Cir.)*, *cert. denied*, *459 U.S. 880, 74 L. Ed. 2d 145, 103 S. Ct. 177 (1982)*. And without reviving the discredited "organized crime" approach, the other deliberately broad terms of RICO, such as "person," "enterprise," "conduct" and "participate," offer few toeholds for courts **[**23]** seeking to narrow RICO's application.

The defendants in *Schacht* argued, as do the defendants here, that the plaintiffs had not alleged the proper type of injury for a RICO claim. We considered and rejected several variations on the theme. First, defendants argued, based on a loose analogy to the antitrust laws, that RICO claims are limited to claims for "competitive" injuries. *See* *North Barrington Development, Inc. v. Fanslow, 547 F. Supp. 207, 211 (N.D. Ill. 1980)*; Note, *Reading the "Enterprise" Element Back Into Rico: Sections 1962 and 1964(c)*, 76 Nw. U. L. REV. 100, 126-28 (1981). We rejected that argument. *711 F.2d at 1356-58*. *See also* *Bennett v. Berg, supra, 685 F.2d at 1058-59* (rejecting competitive injury requirement); *Bunker Ramo Corp. v. United Business Forms, Inc., supra, 713 F.2d at 1287-88* (same).

Although there can be little doubt that criminal infiltration of businesses and injury to free competition in the marketplace were major concerns of Congress in enacting RICO, it is also clear that Congress's concerns extended much farther. *United States v. Turkette, supra, 452 U.S. at 590-91.* **[**24]** We agree that a business competitor harmed by infiltration or by other effects of racketeering might well be able to state a claim under RICO by alleging a "competitive" injury. *See Addis v. Moser*, No. 83 C 6118, slip op. at 14 & n.9 (N.D. Ill. Feb. 15, 1984); *Landmark Savings & Loan v. Loeb Rhoades, Hornblower & Co., 527 F. Supp. 206, 208-09 (E.D. Mich. 1981)* (competitive injury could in some cases be cognizable under RICO). While a competitive injury might be *sufficient* to sustain a RICO claim, a competitive injury is, under *Schacht* and *Bennett v. Berg*, not *necessary* to state a RICO claim. For a thorough, recent discussion of the competitive injury requirement and relevant legislative history, see *In re Catanella, 583 F. Supp. 1388, 1431-34 (E.D. Pa. 1984)*. [8]

---

[7] The court in *Sedima* noted the dangers of deriving legislative intent from parades of horrors in opponents' speeches, slip op. at 5549-50 n.22, but RICO's proponents also recognized the broad scope and the potential for unexpected applications.

[8] Some courts have justified their construction of *section 1964(c)*'s "by reason of" language with an analogy to *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*, in which the Supreme Court held that an antitrust plaintiff must prove "*antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." The analogy has limited usefulness. The central factor in *Brunswick*

[25]** *Schacht* also rejected the argument that civil RICO claims should be limited only to **[*392]** those who are *indirect* victims of racketeering activity. *711 F.2d at 1356-58*. The defendants had argued that those parties directly victimized by the alleged fraud could seek other, pre-existing legal remedies, which Congress had not meant to supplant. RICO, they argued, should be limited to parties who were not themselves the victims of racketeering and who suffered consequential or remote injury from the racketeering. This argument, of course, was very closely related to the claim that civil RICO is limited to competitive injuries. We noted in *Schacht, 711 F.2d at 1355-56*, that Congress was well aware of existing criminal and civil provisions for racketeering activity, but that Congress viewed those remedies as inadequate in the face of organized crime. *See* *United States v. Turkette, supra, 452 U.S. at 586-87*. Congress enacted RICO in order to supplement, not supplant, the available remedies since it thought those remedies offered too little protection for the victims. As we said in *Schacht v. Brown*, "RICO was designed to protect *direct*, and not just second-order, victims of organized crime infiltration." *711 F.2d at 1358.* **[**26]**

Limiting civil RICO recoveries to indirect victims would produce odd consequences and, in some cases of RICO violations, would prevent civil recoveries altogether. Consider, for example, a small business subjected to repeated extortionate demands for protection money. [9] The business would surely be the victim of racketeering activity as defined in *section 1961*. And the owner might well be able to show that the extortionists violated *section 1962(c)* by conducting the affairs of an enterprise through a pattern of racketeering activity. Yet, under an indirect injury requirement, the owner could not sue the extortionists under RICO; instead, RICO's provisions would be limited to indirect victims, if there were any, such as the extortionists' competitors. [10] *See also* *Mauriber v. Shearson/American Express, Inc., 567 F. Supp. 1231, 1240 (S.D.N.Y. 1983)* (example describing problems with indirect injury requirement). The Supreme Court recently explained that Congress enacted RICO primarily to attack the sources of organized crime's economic power. *Russello v. United States, 464 U.S. 16, 104 S. Ct. 296, 302-03, 78 L. Ed. 2d 17 (1983)*. Congress, while **[**27]** concerned with infiltration of legitimate business, also had the broader purpose of separating racketeers from their profits. *Id.* An "indirect injury" requirement would contravene the statute and Congress's intent by preventing the direct victims of racketeering activity from suing under RICO to recover their "contributions" to the racketeers' profits.

Thus, in *Schacht* we rejected the argument that civil RICO actions are limited only to situations involving "organized crime," and we rejected several arguments in support of special RICO injury requirements because we found no basis for them in the language, purpose or legislative history of RICO. We recognized that RICO's language extends beyond those concerns which were the immediate focus of the legislation, but we also recognized that Congress was fully aware **[**28]** of the extraordinary breadth of the language. Even though Congress might not have fully contemplated all of the consequences or applications of those very broad terms, Congress nevertheless deliberately chose to use the broad terms to ensure that the criminal and civil provisions would be effective. Further, even if Congress had meant to invite the courts to limit the broad reach of RICO, it provided few if any textual pegs which could permit courts to develop reasoned, consistent and principled limits without simply redrafting the statute. If, for policy reasons, it appears to be the better course to restrict the scope of RICO, then Congress -- not the courts -- is the body to do it. *711 F.2d at 1353-56*.

In a relatively brief section of the opinion in *Schacht* captioned "Injury 'By Reason of' A *§ 1962(c)* Violation," we addressed an **[*393]** argument couched in terms similar to defendants' argument in this case. Without deciding

---

was that the plaintiffs claimed damages suffered by reason of *increased* competition. The Supreme Court recognized that such an award would be "inimical to the purposes" of the antitrust laws, *429 U.S. at 488*, and would "divorce[] antitrust recovery from the purposes of the antitrust laws," *id. at 487*. By contrast, taking RICO's terms at face value might extend RICO *beyond* its expressly contemplated applications, but it in no way *undermines* RICO's purposes. As the Supreme Court has said of RICO, "the aim is to divest the association of the fruits of its ill-gotten gains." *United States v. Turkette, supra, 452 U.S. at 585*. Restrictive standing requirements analogous to those in antitrust laws would too often leave those gains in the hands of the RICO violators. *See* *Schacht, supra, 711 F.2d at 1357-58*; *Bennett v. Berg, supra, 685 F.2d at 1059*; *In re Catanella, supra, 583 F. Supp. at 1433-34*.

[9] This hypothetical is drawn from *In re Catanella, supra, 583 F. Supp. at 1433-34*.

[10] We suspect that competing extortionists would be unlikely to sue under RICO.

whether a racketeering injury requirement should be imposed, and also without defining such a requirement, we concluded that any such requirement had been satisfied by the allegations of injuries resulting from the insurance company's **[**29]** continued operation as procured by the predicate fraud offenses. *711 F.2d at 1358-59*. As noted, defining the racketeering injury requirement has been the primary hurdle for its proponents. The appellants' briefs in *Schacht* offered no useful definition of the asserted requirement other than competitive injury, and they acknowledged the ambiguity of the requirement as developed by the courts up to that time. Since *Schacht* was decided, the debate has continued, and the Second Circuit's recent trilogy offers the most comprehensive effort to date to define the racketeering injury requirement. Our discussion of the requirement in *Schacht, 711 F.2d at 1358-59*, has thus been outdated by courts' further development of the concept. [11] Upon close examination, however, the Second Circuit's proposed definition appears to be only a composite of the various proposed standing or injury limits rejected in *Schacht*. The controlling portions of the *Schacht* opinion are therefore those discussing the proposed competitive and indirect injury requirements and the application of RICO to business frauds.

[30]** We now turn to the Second Circuit's recent cases on the racketeering injury requirement. Although the contours of the Second Circuit's racketeering injury are not yet entirely clear, the Second Circuit's decisions conflict with our decision in *Schacht v. Brown*, and we decline to follow them.

The lead case in the trilogy is *Sedima, S.P.R.L. v. Imrex Co., 741 F.2d 482 (2d Cir. 1984)*, *cert. granted*, *469 U.S. 1157, 105 S. Ct. 901, 83 L. Ed. 2d 917 (1985)*. The plaintiff and defendants in that case had entered into a joint venture for the export of goods to Europe. The plaintiff alleged that the defendants defrauded it by preparing purchase orders, invoices and credit memoranda that they knew falsely overstated purchase prices, attendant costs and shipping and financing charges. Slip op. at 5537. The complaint included three RICO counts based on *18 U.S.C. § 1962(c)* and *(d)*. The district court dismissed the RICO counts on the ground that the plaintiff had failed to allege any injury that was something more than or different from the injuries resulting from the predicate acts of mail and wire fraud. In a lengthy opinion **[**31]** by Judge Oakes, with Judge Cardamone dissenting, the Second Circuit affirmed the dismissal of the RICO counts because the plaintiff had not alleged a "racketeering injury." Slip op. at 5560-62. [12]

The majority in *Sedima* noted that organized crime was the primary target of RICO and expressed its dismay at the application of RICO to many "respected and legitimate" businesses. The majority concluded that the application of RICO beyond its original stated purposes showed that the statute was "ambiguous," slip op. at 5544, and then undertook a thorough examination of RICO's legislative history. **[**32]** [13] The majority's review of the history shows convincingly that the private civil RICO provisions of *section 1964(c)* received relatively little attention from Congress in the enactment of the omnibus Organized Crime Control Act. The issue is what conclusions **[*394]** should be drawn from that fact. The *Sedima* court said:

> The most important and evident conclusion to be drawn from the legislative history is that the Congress was not aware of the possible implications of *section 1964(c)*. If Congress had intended to provide a federal forum for plaintiffs for so many common law wrongs, it would at least have discussed it. If Congress had intended to provide an alternate and more attractive scheme for private parties to remedy violations of the securities laws -- involving decades of statutes, regulations, commentaries, and jurisprudence -- it would at least have mentioned it. The House Judiciary Committee, which authored the provision, would at least have mentioned the

---

[11] That portion of the *Schacht* opinion has been the subject of widely varying interpretations. *See* *In re Catanella, supra, 583 F. Supp. at 1435 n.68*, and cases cited therein.

[12] In *Sedima* the Second Circuit also held that before a civil RICO action may be brought, "there must be a 'violation,' that is, criminal convictions on the underlying predicate offenses." *741 F.2d at 503*. That holding conflicts with our decision in *Bunker Ramo Corp. v. United Business Forms, Inc., 713 F.2d 1272, 1286-87 (7th Cir. 1983)*. The issue is not presented in this appeal.

[13] In *Schacht, supra*, we concluded that while RICO's terms are very broad, the terms in dispute there were not ambiguous. *711 F.2d at 1353-56*. We discuss below the appropriate role for courts when dealing with deliberately broad, as opposed to ambiguous, statutory terms.

> amendment to the full House as a major change in its report had there been any inkling of its possible implications.

Supra at 492. The court then discussed the various "standing" barriers that **[**33]** courts have sought to erect against civil RICO claims and acknowledged the complete lack of consensus on civil RICO's requirements. The *Sedima* majority focused its consideration on the "by reason of a violation of *section 1962*" language in *section 1964(c)* and endorsed some form of racketeering injury requirement. The majority discussed the antitrust analogy relied on by some courts in imposing a competitive injury requirement. The court concluded that Congress did not intend to import all of the concepts of antitrust standing into civil RICO actions, but it said "there is nothing in the legislative history which suggests that Congress did not intend to create *analogous* standing barriers to RICO by using the 'by reason of' language." 741 at 495.

[34]** The majority then attempted to define a racketeering injury. In doing so, it focused on the importance of organized crime in congressional consideration of RICO. In the key passage defining a racketeering injury, the court said:

> RICO was not enacted merely because criminals break laws, but because mobsters, either through the infiltration of legitimate enterprises or through the activities of illegitimate enterprises, cause systemic harm to competition and the market, and thereby injure investors and competitors. It was to help solve this problem that Congress added RICO to the arsenal of weapons used to fight organized crime. It is only when injury caused by this kind of harm can be shown, therefore, that we believe that Congress intended that standing to sue civilly should be granted.

741 F.2d at 496. Finally, the court also said that the plaintiff must "show injury different in kind from that occurring as a result of the predicate acts themselves, or not simply caused by the predicate acts, but also caused by an activity which RICO was designed to deter." *741 F.2d at 496*.

On the basis of these statements, it appears that **[**35]** *Sedima* has revived the discredited "organized crime nexus" requirement without quite saying so. *Cf. Alexander Grant & Co. v. Tiffany Industries*, 742 F.2d 408, slip op. at 11 (8th Cir. 1984) (*Sedima* holds that "*section 1964(c)* requires that the injury result from mobster activity or the efforts of organized crime"). The passage defining racketeering injury refers to mobsters and organized crime, slip. op. at 5561, and the rest of the opinion repeatedly emphasizes the references in the legislative history to mobsters, racketeers and particular organized criminal groups. In addition, the *Sedima* panel professed its shock and dismay at the fact that RICO allegations have labeled as racketeers "such respected and legitimate 'enterprises' as the American Express Company, E.F. Hutton & Co., Lloyd's of London, Bear Stearns & Co., and Merrill Lynch." *741 F.2d at 487*.

Of course, the criminal application of RICO has never been limited to "mobsters" or "organized crime." And on the civil side, every circuit that has considered the issue, including the Second, has expressly rejected the notion that "organized crime," in any colloquial sense of the **[**36]** phrase, must **[*395]** be involved in order for RICO to be violated. *See supra* at slip op. at 13. [14]

---

[14] Moreover, the white-collar crime alleged in some RICO complaints against "legitimate" businesses is in some ways at least as disturbing as the bringing of RICO claims against "legitimate and respected" defendants. For example, the facts alleged in *Bennett v. Berg, supra, 685 F.2d at 1056-57*, decided by the Eighth Circuit, illustrate concerted white-collar criminal conduct of a type at the core of Congress' concern in enacting RICO. There the defendants included various businessmen, respected lawyers and accountants, and a well-known insurance company. The defendants were alleged to have concocted an elaborate fraudulent scheme which had induced elderly people to invest most of their assets in a retirement village which the defendants, through fraudulent self-dealing and mismanagement, then took to the brink of bankruptcy, leaving the elderly people with neither their assets nor the "life care" they had bargained for. As Judge Pratt said in *Furman v. Cirrito, supra*, Congress

> provided no exception for businessmen, for white collar workers, for bankers, or for stockbrokers. If the conduct of such people can sometimes fairly be characterized as "garden variety fraud," we can only conclude that by the RICO statute Congress has provided an additional means to weed that "garden" of its fraud. It seems almost too obvious to require

[37]** In *Schacht*, after we rejected the contention that RICO was meant to apply only to "organized crime," we disapproved the competitive and indirect injury arguments in part because there seemed to be no way to impose them without reviving the "organized crime" requirement. *711 F.2d at 1356*. We said that we did not "wish that limitation to be revived under the guise of determining the kinds of activity covered by RICO." In view of the *Sedima* court's repeated discussion of organized crime and "mobsters," and the phrasing of the racketeering injury requirement, that seems to be precisely what the Second Circuit has done in *Sedima. See Sedima*, slip op. at 5590-91 (Cardamone, J., dissenting) (racketeering injury requirement is only a euphemism for an organized crime nexus requirement); *Alexander Grant & Co., supra*, slip op. at 11 (finding *Sedima* imposes a requirement of mobster activity or organized crime involvement for racketeering injury). *Cf. Moss v. Morgan Stanley, Inc., supra, 719 F.2d at 21 (2d Cir.)* (rejecting organized crime nexus requirement). *Sedima* accurately describes Congress's central purposes in passing **[**38]** RICO, but the application of RICO has never been limited to those purposes.

Sedima also blended elements of competitive injury and indirect injury into its racketeering injury requirement. The opinion talks not only about mobsters but also about "systemic harm to competition and the market," which thereby injures "investors and competitors." *741 F.2d at 496*. The *Sedima* court said it was not importing every detail of the standing requirements from ***antitrust law***; for example, it said that an actual anti-competitive effect need not be proved if the injury were of the type which would ordinarily threaten competition. *Id.* at slip op. pp. 5561-62 & n.41. However, to the extent that *Sedima* limits civil RICO recoveries to even a general type of competitive injuries rather than strictly to injuries compensable under ***antitrust law***, *Schacht* still rejected that argument in this circuit. *711 F.2d at 1356-58*.

Further, to the extent that *Sedima* closes the civil RICO door except to investors injured by mobsters' infiltration of legitimate business or by systemic harm to competition or to the market, that limitation again seems indistinguishable **[**39]** from the indirect injury requirement rejected in *Schacht. 711 F.2d at 1356-58*. As we said there, "RICO was designed to protect *direct*, and not just second-order, victims of organized crime infiltration." *711 F.2d at 1358*. Where racketeers violate *section 1962* and indirectly injure investors, we do not doubt that RICO may offer investors a civil remedy. But we rejected in *Schacht* any effort to limit RICO to such indirect victims.

Sedima must be read together with the Second Circuit's decision in *Bankers Trust Co. v. Rhoades, supra*, decided the day after *Sedima*. We must consider whether *Bankers Trust* might offer an additional **[*396]** approach to a racketeering injury requirement not already foreclosed in this circuit by *Schacht* and other decisions. We conclude that while *Bankers Trust* differs from *Sedima* in significant ways, the *Bankers Trust* approach to racketeering injury also conflicts with the law of this circuit. *But cf. Alexander Grant & Co., supra*, slip op. at 11 (rejecting *Sedima* for imposing organized crime requirement in conflict with *Bennett v. Berg, supra* **[**40]** , but finding its own decision consistent with *Bankers Trust*).

In *Bankers Trust*, the plaintiff was a creditor who alleged that the defendants had, over a nine year period, engaged in a pattern of bankruptcy fraud by shuffling assets from one owner to another in order to prevent collection of a debt. The plaintiff also alleged that the defendants had, as part of the same effort to prevent collection, instituted numerous frivolous lawsuits against plaintiff and had gone so far as to bribe a state judge in one action. Plaintiff alleged as injuries resulting from defendants' fraudulent conduct its inability to collect its debt and its legal fees incurred in the frivolous and corrupt lawsuits against it.

The Second Circuit held in *Bankers Trust* that the plaintiff had not stated a claim under RICO because it had not alleged an injury "by reason of a violation of *section 1962*." The court held that a violation of *section 1962* occurs "only if there are present both (1) the pattern of racketeering activity, and (2) the use of that pattern to invest in, control, or conduct, a RICO enterprise. It is this confluence that constitutes the violation and, therefore, the

---

statement, but fraud is fraud, whether it is committed by a hit man for organized crime or by the president of a Wall Street brokerage firm.

741 F.2d at 529.

confluence **[**41]** that must cause the proprietary injury." *741 F.2d at 516* (footnote omitted). The court said that it agreed with the panel in *Sedima* that a civil RICO plaintiff "must allege a proprietary injury caused by a RICO violation, not just one caused by some of the essential elements of a RICO violation." *Id.* (footnote omitted).

Applying this standard to the complaint in the case, the court concluded that the plaintiff had alleged only injuries caused by the predicate acts. The plaintiff's loss on the debt was caused by the defendants' bankruptcy fraud:

> The fact that later actions by the defendants may have prevented Bankers from remedying the injury caused it in 1976 does not mean that Bankers was injured by the "pattern" of the bankruptcy fraud and the later acts. Similarly, Bankers's forced expenditures of legal fees in connection with frivolous and corruptly conducted lawsuits occurred as a result of the defendants' distinct conduct in pursuing those lawsuits; Bankers's expenses would have been incurred regardless of any other predicate acts performed by the defendants.

741 F.2d at 518. The plaintiff in *Bankers Trust* had **[**42]** argued that there is no meaningful distinction between injury from the predicate acts and injury from the pattern of racketeering activity because a person injured by the predicate acts is *ipso facto* injured by the pattern. The court rejected that argument: "If a plaintiff's injury is that caused by the predicate acts themselves, he is injured regardless of whether or not there is a pattern; hence he cannot be said to be injured *by* the pattern, and the pattern cannot be said to be the but-for cause of the injury." *741 F.2d 517*.

Bankers Trust thus requires that each element of the *section 1962* violation -- including the pattern of racketeering activity *and* the role of the racketeering activity in the investment in, control of, or participation in an enterprise -- contribute to cause the plaintiff's injury. *See* slip op. at 5618-20. A plaintiff's injury is compensable under RICO if and only if each element of the *section 1962* violation is a but-for cause of the injury. *See* slip op. at 5620.

In *Bankers Trust* the court sought to illustrate its racketeering injury requirement with two examples which, the court suggested, would satisfy the **[**43]** requirement:

> Further, we can envision a number of circumstances in which injury could be attributable to a pattern but not to the individual predicate acts. For example, a **[*397]** plaintiff who is victimized by a defendant enterprise's multiple acts of arson may thereafter be denied fire insurance as a result of his fire history; such a plaintiff whose property subsequently suffers innocent fire damage would be unable to obtain reimbursement for the damage, and his monetary loss would be the result of the pattern of predicate acts of the enterprise, rather than any of the individual acts. Or, a plaintiff might be forced to incur an unwanted debt or to take on an unwanted business partner because an enterprise has placed his business in jeopardy by using felonious means to cause a number of his customers to withhold their custom. In each instance, the plaintiff would have suffered an injury to his business or property by reason of the defendants' use of a RICO enterprise and a pattern of racketeering acts; the individual racketeering acts, however, could not be said to have caused the same injury.

741 F.2d at 517.

The court's illustrative **[**44]** examples are inconsistent with the rest of the opinion. In both examples the "racketeering injuries" would depend on the *pattern* of racketeering acts. But earlier in the opinion, the court insisted that all elements of a *section 1962* violation, including the use of the pattern of racketeering activity to invest in, control or conduct an "enterprise," must be but-for causes of the injury. Slip op. at 5618. The injuries in both examples would be entirely independent of the relationship between the racketeering acts and the enterprise which the defendant may have invested in, controlled or conducted. According to the rest of the opinion, therefore, the injuries in the examples would not, without more, be compensable under RICO.

Bankers Trust also appears to conflict with even the narrow view of racketeering injury adopted in *Sedima. See* *Alexander Grant & Co., supra.* As we have said, *Sedima* appears to be primarily concerned with the activities of mobsters infiltrating legitimate businesses. To take another hypothetical example, suppose that "mobsters" threatened a number of shareholders in a small business and forced some of the shareholders to sell **[**45]** their interests in the business for a fraction of their true value. The "mobsters" might thereby acquire control of the business and operate it to the detriment of the remaining shareholders. Such conduct would appear to be at the core of the *Sedima* court's view of RICO. *See* slip op. at 5561-62. Yet according to the opinion in *Bankers Trust*, those shareholders who were threatened and forced to sell out would have no RICO claims because each would have been injured only by one predicate offense and not by the pattern of racketeering activity. Although it is not entirely clear, *Sedima* would appear to permit the selling shareholders to sue under RICO while *Bankers Trust* would not.

The *Bankers Trust* but-for test, applied to each element of the section 1962 violation, is contrary to the law of this circuit. In *Schacht* the plaintiffs' injuries resulted directly or indirectly from the defendants' alleged predicate fraud offenses. The primary victims of the defendants' scheme were the insurance company's creditors and policyholders. The alleged injuries resulted from the continued operation of the insolvent company, permission for which was procured by fraud. **[**46]** The plaintiffs clearly alleged a pattern of racketeering activity, but the pattern itself, apart from the individual acts, was not a but-for cause of the injuries. That is, the alleged injuries were no more than the sum of the injuries resulting from each fraud in the pattern or series. Under *Bankers Trust*, RICO provides no remedy for such injuries resulting from only the individual acts of racketeering or the sum of the acts, and the Second Circuit would find no RICO claim in the *Schacht* situation.

In addition, in several other cases we have upheld RICO claims where the only apparent injuries were those directly resulting from the predicate offenses. *Sutliff, Inc. v. Donovan Companies, supra, 727 F.2d at 653-54*; *Bunker Ramo Corp. v. United Business Forms, Inc., supra,* ***[*398]*** *713 F.2d at 1287-88*. Other circuits have done the same. *Alcorn County v. U.S. Interstate Supplies, Inc., supra, 731 F.2d at 1169 (5th Cir.)*; *Bennett v. Berg, supra, 685 F.2d at 1058-59 (8th Cir.)*. We adhere to our previous views and those of other circuits in rejecting the *Bankers Trust* but-for test as applied to each **[**47]** element of the RICO violation.

In addition, we note that by restricting civil RICO to such indirect injuries as those discussed in the opinion's examples, and by denying RICO claims for the injuries resulting from the extended pattern of racketeering activity in that case itself, *Bankers Trust* reduces RICO's civil provisions to a trivial remedy, available in only a tiny fraction of RICO violations and dependent upon entirely fortuitous facts. As Judge Cardamone stated in his dissent in *Bankers Trust*, "If civil RICO does not provide a remedy on the facts of this totally outrageous case, it never will." *741 F.2d at 518*. [15] The injuries for which RICO recovery was denied in *Bankers Trust* are not distinguishable in any meaningful way from those alleged in *Schacht, Sutliff Inc. v. Donovan Companies, Bunker Ramo, Bennett v. Berg*, or *Alcorn County*. We adhere to our prior decisions and those of other circuits, and we reject the Second Circuit's imposition of a racketeering injury requirement. We conclude that ***HN7***[] a civil RICO plaintiff need not allege or prove injury **[**48]** beyond an injury to business or property resulting from the underlying acts of racketeering. Plaintiffs' allegations of injury in this case -- excessive interest charges resulting from defendants' alleged fraudulent scheme to overstate the prime rate -- satisfy the requirements of *18 U.S.C. § 1964(c)*.

This holding by no means renders superfluous the requirement in *section 1964(c)* that the plaintiff be injured "by reason of" a violation of *section 1962*. As we read this ***HN8***[] "by reason of" language, it simply imposes a proximate cause requirement on plaintiffs. The criminal conduct in violation of *section 1962* must, directly or indirectly, have injured the plaintiff's business or property. A defendant who violates *section 1962* is not liable for treble **[**49]** damages to everyone he might have injured by other conduct, nor is the defendant liable to those who have not been injured. This causation requirement might not be subtle, elegant or imaginative, but we believe it is based on a straightforward reading of the statute as Congress intended it to be read.

Finally, it may be useful to other courts if we focus briefly on what we perceive to be the underlying conflict between *Schacht* and *Sedima*. The root of the conflict seems to lie in the fact that, in RICO, we confront a statute which is not ambiguous but which is, above all, deliberately and extraordinarily broad. There are some ambiguities, to be

[15] It should be noted that the plaintiff in *Bankers Trust* had already proven a substantial portion of its allegations in other court proceedings.

sure, but the fact that RICO has been applied in situations not expressly anticipated by Congress does not demonstrate ambiguity. It demonstrates breadth. *Cf. Sedima, supra*, slip op. at 5543-44.

In defining the key terms of the statute, such as "person," "enterprise," and "racketeering activity," and in leaving undefined such broad terms as "conduct" and "participate," Congress deliberately chose to employ broad terms which would defy judicial confinement. Judge Oakes argues persuasively in *Sedima* that **[**50]** Congress might not have recognized all of the applications of the statute's broad language, particularly with respect to its civil provisions. Nevertheless, Congress still chose to employ that extraordinarily broad language in order to achieve its desired goals. In response to suggestions that the statute be more narrowly tailored to prevent unexpected applications, Congress clearly preferred breadth to precision. *Schacht, supra, 711 F.2d at 1354-55*; *Sutliff Inc., supra, 727 F.2d at 654*.

Even if Congress did not anticipate all of the consequences of RICO, the breadth of the statute, including the civil provisions, was the result of deliberate policy choices **[*399]** on the part of Congress. In these circumstances, to impose special standing and injury requirements cannot in our view be defended as efforts to improve or polish a statute which was carelessly or inartfully drafted. RICO may be very broad, but there was nothing careless about its drafting. When Congress deliberately chooses to unleash such a broad statute on the nation, in the absence of constitutional prohibitions, complaints must be directed to Congress rather than to the **[**51]** courts. *See Schacht, supra, 711 F.2d at 1356*.

With respect to the case before us, it does not seem at all likely that Congress anticipated the application of civil RICO to improperly calculated interest charges by a commercial bank. And this may or may not be an appropriate subject for this federal statute. Nevertheless, it does not seem fitting for us to attempt to narrow the statute in ways which are nearly impossible to rationalize merely to exclude subjects of this kind. For to say that Congress did not anticipate this subject is not to say that Congress would have excluded it if the subject had been brought explicitly to its attention. Congress appears to have preferred a broad statute, even if overinclusion might result.

We do not believe we could limit RICO in the ways argued by the defendants or approved by the Second Circuit without disturbing the policy choices Congress has made. If the safety or stability of the Republic demanded, we might be justified in pursuing such an aggressive jurisprudence. But, particularly at the pleading stage, we seem to be dealing with much smaller stakes -- legal fees and the sensibilities of prominent defendants **[**52]** alleged to be "racketeers." [16] Those stakes do not appear high enough to justify our rejecting Congress' choice of a statute that sweeps broadly.

[53] IV**

Although the district court's dismissal of the complaint cannot be affirmed based on the elusive racketeering injury requirement, the defendants also contend that the dismissal is supported by other arguments not reached by the district court. These issues involve the necessary relationship between a person and an enterprise under *18 U.S.C. § 1962(c)*. The defendants correctly observe that we may reach these issues on appeal, at least where the arguments were presented to the district court and where the present record permits resolution of the issues.

---

[16] A number of courts dismayed by civil RICO have commented on the *in terrorem* settlement value that the threat of treble damages may add to spurious claims. After all, the line between fraud and mistake or misunderstanding can be a very fine one. It is, therefore, important that, in the further development of civil RICO, criminal fraud be clearly distinguished from less egregious conduct. On the other side of the scales, however, is another phenomenon with which lawyers and courts are also familiar. The delays, expense and uncertainties of litigation often compel plaintiffs to settle completely valid claims for a mere fraction of their value. By adding to the settlement value of such valid claims in certain cases clearly involving criminal conduct, RICO may arguably promote more complete satisfaction of plaintiffs' claims without facilitating indefensible windfalls. And, in any event, the choice between simple compensatory damages and treble damages, with whatever effect such a choice might have on the caseload of the federal courts, is for Congress to make.

Defendant ANB: ANB argues that it cannot be held liable under section 1962(c) in Count I because the requisite relationship between a person and an enterprise is not alleged. Plaintiffs offer two theories to support their RICO claims against ANB. First, they argue that ANB was both the "person" and the "enterprise" under section 1962(c) so that it conducted its own affairs through a pattern of racketeering activity. Second, they argue that ANB was the "person" conducting the affairs of its parent corporation, Heller International.

We turn first to the plaintiffs' contention that the same **[**54]** corporation may be both the liable "person" and the "enterprise" under section 1962(c). There is now a split in the circuits on this question. In *United States v. Hartley, 678 F.2d 961, 987-90 (11th Cir. 1982)*, *cert. denied*, *459 U.S. 1170, 1183, 74 L. Ed. 2d 1014, 103 S. Ct. 815 (1983),* **[*400]** the Eleventh Circuit held that the corporation at the center of a fraudulent scheme could be both the person and the enterprise under section 1962(c). The Fourth Circuit held precisely the opposite in *United States v. Computer Sciences Corp., 689 F.2d 1181, 1190-91 (4th Cir. 1982)*, *cert. denied*, *459 U.S. 1105, 74 L. Ed. 2d 953, 103 S. Ct. 729 (1983)*. [17] Both cases were criminal RICO prosecutions, but the interpretations of 18 U.S.C. § 1962(c) are equally applicable to civil cases.

[55]** Discussion of whether the same corporation may be both the liable "person" and the "enterprise" under section 1962(c) has proceeded at two levels -- the statutory language and the policies of RICO, and we shall consider both.

In terms of the language, it is clear that a corporation can satisfy the definitions of both "person" and "enterprise" under section 1961. The court in *Hartley* found that there was nothing in the statutory language to prevent the same corporation from being both the liable person and the enterprise. *678 F.2d at 988*. By contrast, the Fourth Circuit in *Computer Sciences* concluded that ***HN9***[] "'enterprise' was meant to refer to a being different from, not the same as or part of, the person whose behavior the act was designed to prohibit, and, failing that, to punish." *689 F.2d at 1190*. Similarly, Judge Shadur concluded in *Parnes v. Heinold Commodities, Inc., 548 F. Supp. 20, 23-24 (N.D. Ill. 1982)*, that section 1962(c) contemplates a separate "person" and "enterprise" because the enterprise may very well be the victim of **[**56]** the racketeering activity.

We are persuaded by the Fourth Circuit in *Computer Sciences* and by Judge Shadur in *Parnes* that section 1962(c) ***HN10***[] requires separate entities as the liable person and the enterprise which has its affairs conducted through a pattern of racketeering activity. *See also Addis v. Moser*, No. 83 C 6118, slip op. at 9-11 (N.D. Ill. Feb. 15, 1984) (following *Parnes*). We do not doubt that a corporation may satisfy the section 1961 definitions of both "persons" and "enterprise," as the court observed in *Hartley. 678 F.2d at 988*. But we focus our attention on the language in ***HN11***[] section 1962(c) requiring that the liable person be "employed by or associated with any enterprise" which affects interstate or foreign commerce. The use of the terms "employed by" and "associated with" appears to contemplate a person distinct from the enterprise. If Congress had meant to permit the same entity to be the liable person and the enterprise under section 1962(c), it would have required only a simple change in language to make that intention crystal clear. **[**57]** Also, we do not think the general principle of liberal interpretation of RICO can be used to stretch section 1962(c) to reach this situation in the face of the subsection's own limits. *See* Pub. L. 91-452, section 904, 84 Stat. 947. *Cf.* Blakey, *The Rico Civil Fraud Action in Context*, 58 NOTRE DAME LAW. 237, 324 n. 181 (1982) (approving of *Hartley* and disapproving of *Computer Sciences*, relying in part on liberal construction clause).

The court in *Hartley* supported its reading of section 1962(c) by also arguing that there is, for RICO purposes, no significant difference between a corporation and an "association in fact," *see* 18 U.S.C. § 1961(4). The court said there should be no practical difference between a complaint or indictment naming a corporation as the enterprise

---

[17] The Eighth Circuit appears to agree with the Fourth Circuit's conclusion that section 1962(c) requires an enterprise distinct from the person. *Bennett v. Berg, supra, 685 F.2d at 1061-62* (affirming dismissal of count naming identical defendant and enterprise, but permitting amendment on remand); *Bennett v. Berg, supra*, 710 F.2d at 1364 & n.4 (en banc); *id, at 1365* (McMillian, J., dissenting in part); *Alexander Grant & Co. v. Tiffany Industries, supra*, slip op. at 6 n.6 (*Bennett v. Berg* held count insufficient precisely because of possibility of identity of enterprise and person). The Ninth Circuit also recently followed *Computer Sciences* on the point. *Rae v. Union Bank, 725 F.2d 478, 481 (9th Cir. 1984)*.

one naming an association in fact as the enterprise, with the corporation as a member of the association. *678 F.2d at 989-90*. We agree that ***HN12***[] a corporation and an association in fact can both satisfy **[*401]** the "enterprise" requirement **[**58]** of *section 1962(c)*. *See* *United States v. Turkette, supra, 452 U.S. at 583*. However, a corporation and an association in fact differ substantially with respect to the "person" element. Where persons associate "in fact" for criminal purposes, *see id.*, each person may be held liable under RICO for his, her or its participation in conducting the affairs of the association in fact through a pattern of racketeering activity. But the nebulous association in fact does not itself fall within the RICO definition of "person." We doubt that an "association in fact" can, as such, hold any interest in property or even be brought into court. In the association in fact situation, each participant in the enterprise may be a "person" liable under RICO, but the association itself cannot be. By contrast, a corporation obviously qualifies as a "person" under RICO and may be subject to RICO liability. And it is not obvious that the problem can be resolved by merely alleging that the corporation and its employees constitute an association in fact. For these reasons, we are unpersuaded by the comparison to an association in fact. [18]

[59]** Discussion of this person/enterprise problem under RICO can easily slip into a metaphysical or ontological style of discourse -- after all, when is the person truly an entity "distinct" or "separate" from the enterprise? We are therefore reluctant to base our conclusion on the statutory language without also examining the relevant policies and potential consequences of our conclusion.

At the policy level of the dispute, there are several significant competing arguments. The Eleventh Circuit argued in *Hartley* that where the defendant corporation is the central figure in a criminal scheme, as it was in that case, Congress could not have meant to let the central perpetrator escape RICO liability while subjecting only the sidekicks to RICO's severe penalties. *678 F.2d at 989*. Similarly, plaintiffs here argue that Congress intended to make a "deep pocket" (in the person of the corporation) liable where corporate agents engage in a pattern of racketeering activity redounding to the benefit of the corporation. In *Parnes*, Judge Shadur argued that it would make little sense to hold a corporation liable under RICO for the misconduct of lower level employees, at **[**60]** least where it appears that the corporation is a passive instrument or even a victim of the racketeering activity. *548 F. Supp. at 23-24*.

In our view, the RICO provisions have already taken into account these competing policies in different situations, and a careful parsing of *section 1962* reveals a sensible balance among these policies. We find helpful here Professor Blakey's discussion in *The Rico Civil Fraud Action in Context, supra*, 58 NOTRE DAME LAW. at 307-25. Blakey points out that under the subsections of *section 1962*, the enterprise may play the various roles of victim, prize, instrument or perpetrator. The RICO liability of the enterprise should depend on the role played. In our view, the plaintiffs here and the court in *Hartley* are correct when they argue that the corporate enterprise should be liable where it is the perpetrator, or the central figure in the criminal scheme. In that situation, the corporate deep pocket should certainly be subject to RICO liability. At the same time, the defendants here and Judge Shadur in *Parnes* are surely correct in saying that the corporation-enterprise should not be liable when the corporation is itself **[**61]** the victim or target, or merely the passive instrument for the wrongdoing of others.

In our view, the tensions between these policies may be resolved sensibly and in accord with the language of *section 1962* by reading subsection (c) together with subsection (a). As we read ***HN13***[] subsection (c), **[*402]** the "enterprise" and the "person" must be distinct. However, a corporation-enterprise may be held liable under subsection (a) when the corporation is also a perpetrator. [19] **[**63]** As we parse subsection (a), a "person" (such as

---

[18] We agree with the statement in *Hartley* concerning a corporation's responsibility for the acts of its agents. *678 F.2d at 988 n. 43*. However, as we discuss below, those concerns are better addressed in terms of subsection (a) of *section 1962*. The court in *Hartley* was apparently dealing only with subsection (c). There are significant differences between the two subsections, and we must analyze closely the terms of these carefully drafted provisions.

[19] *Section 1962(a)* provides:

> ***HN15***[] It shall be unlawful for any person who has received any income derived, directly or indirectly, from a pattern of racketeering activity or through collection of an unlawful debt in which such person has participated as a principal within the

a corporation-enterprise) acts unlawfully if it receives income derived directly or indirectly from a pattern of racketeering activity in which the person has participated as a principal within the meaning of 18 U.S.C. § 2, and if the person uses the income in the establishment or *operation* of an enterprise affecting commerce. Subsection (a) does not contain any of the language in subsection (c) which suggests that the liable person and the enterprise must be separate. ***HN14***[] **[**62]** Under subsection (a), therefore, the liable person may be a corporation using the proceeds of a pattern of racketeering activity in its operations. This approach to subsection (a) thus makes the corporation-enterprise liable under RICO when the corporation is actually the direct or indirect beneficiary of the pattern of racketeering activity, but not when it is merely the victim, prize, or passive instrument of racketeering. This result is in accord with the primary purpose of RICO, which, after all, is to reach those who ultimately profit from racketeering, not those who are victimized by it. [20]

Applying this reading of subsection (c) to the complaint in this case, we conclude that ANB may not be held liable under section 1962(c) for conducting its own affairs through a pattern of racketeering activity. ANB might be held liable under section 1962(a) if it received the proceeds from the alleged racketeering activity and if it also could be held liable as a principal for those acts. However, plaintiffs here have abandoned any claim they might have stated under section 1962(a). [21]

[64]** Count I does not fail completely, however, for Count I also alleges that ANB violated section 1962(c) by conducting through a pattern of racketeering activity the affairs of its parent corporation, Heller International. That is a good allegation under section 1962(c). ***HN16***[] The subsection requires only some separate and distinct existence for the person and the enterprise, and a subsidiary corporation is certainly a legal entity distinct from its parent. Defendants do not challenge this point but argue only that the allegation does not adequately specify either the relationship between ANB and Heller International or the way in which ANB conducted or participated in Heller International's affairs. However, the complaint alleges that ANB is a wholly owned subsidiary of Heller International, and we think it virtually self-evident **[*403]** that a subsidiary acts on behalf of, and thus conducts the affairs of, its parent corporation. [22] We doubt that more detailed allegations on the subject would serve any useful purpose, and we see no reason to require them.

---

meaning of section 2, title 18, United States Code, to use or invest, directly or indirectly, any part of such income, or the proceeds of such income, in acquisition of any interest in, or the establishment or operation of, any enterprise which is engaged in, or the activities of which affect, interstate or foreign commerce. A purchase of securities on the open market for purposes of investment, and without the intention of controlling or participating in the control of the issuer, or of assisting another to do so, shall not be unlawful under this subsection if the securities of the issuer held by the purchaser, the members of his immediate family, and his or their accomplices in any collection of an unlawful debt after such purchase do not amount in the aggregate to one percent of the outstanding securities of any one class, and do not confer, either in law or in fact, the power to elect one or more directors of the issuer.

[20] Blakey argues that where the enterprise is an "instrument," it should be civilly, but not criminally, liable to third parties under RICO. 58 NOTRE DAME LAW. at 323-25. We see no statutory grounds for such a distinction between civil and criminal liability. *Cf.* Bernstein v. Idt Corp., 582 F. Supp. 1079, 1082-84 (D. Del. 1984).

[21] Paragraph 19 of the complaint appears in part to track the language of section 1962(a), alleging that ANB violated section 1962 by using in the operation of ANB's business income from a pattern of racketeering activity. In this court the plaintiffs have argued only section 1962(c). Defendants suggested in their brief that plaintiffs had abandoned the section 1962(a) allegation, and plaintiffs have not responded to the suggestion. Plaintiffs have therefore abandoned the point.

[22] As the Supreme Court said recently:

> ***HN17***[] A parent and its wholly owned subsidiary have a complete unity of interest. Their objectives are common, not disparate; their general corporate actions are guided or determined not by two separate corporate consciousnesses, but one. They are not unlike a multiple team of horses drawing a vehicle under the control of a single driver. With or without a formal "agreement," the subsidiary acts for the benefit of the parent, its sole shareholder.

[65]** *Defendants Grayheck and Heller International*: Defendants also contend that the RICO claims against Grayheck and Heller International do not contain sufficiently specific allegations to withstand a motion to dismiss. In Count II of the amended complaint, plaintiffs seek to hold Grayheck and Heller International liable as persons conducting ANB's affairs through a pattern of racketeering activity. *See* 18 U.S.C. § 1962(c). [23] Defendants argue first that the complaint does not allege that Grayheck or Heller International acted with the requisite fraudulent intent. We reject this argument. The complaint is hardly a model of clarity on the intent issue, and it involves a lengthy trail of cross-references. However, at the end of the trail there are sufficient allegations of Grayheck's intent and Heller International's intent as embodied in its agents.

[66]** Defendants also raise a much broader point. They argue that the allegations in a civil RICO complaint must be as specific as a criminal bill of particulars and must establish probable cause to believe that the defendant committed the predicate racketeering offenses. Defendants rely on Bache Halsey Stuart Shields, Inc. v. Tracy Collins Bank & Trust Co., 558 F. Supp. 1042, 1045-46 (D. Utah 1983), which squarely supports their position. That court stated in relevant part:

> For a private civil action to lie, the plaintiff must have been injured by a "pattern of racketeering activity." Such a pattern is established by a showing that a party has committed at least two "indictable" acts. 18 U.S.C. § 1961(1) (Supp. 1982). A federal grand jury should return an indictment, only where there is probable cause or a reasonable probability that a crime has been committed. Thus, to properly plead an action under the treble damages provision of RICO, a party must allege two acts of "racketeering" with enough specificity to show there is probable cause the crimes were committed. An offense is not "indictable" merely because it is alleged. Rather, **[**67]** to be indictable it must be "well-founded" and based on probable cause.

558 F. Supp. at 1045 (citations omitted). The court also said:

> A private civil action under RICO is grounded upon the premise that a party has twice engaged in "racketeering activity." **[*404]** The Act defines "racketeering activity" as behavior "indictable" under specified provisions of the United States Code. Before a court can assess the merit of a plaintiff's treble damages claim it must determine whether there is probable cause to believe the named defendant committed the alleged predicate crimes. That determination is possible only if the factual basis of those "acts of racketeering" is set out with particularity. Thus, a factual statement similar to a bill of particulars is needed in pleadings that allege a violation of the RICO treble damages provision.

558 F. Supp. at 1045-46. *See also* Taylor v. Bear Stearns & Co., 572 F. Supp. 667-83 (N.D. Ga. 1983) (complaint must show previous convictions or set out probable cause).

Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 2742, 81 L. Ed. 2d 628 (1984). In *Copperweld* the court held that a parent corporation and a wholly owned subsidiary are incapable of conspiring with one another for purposes of section 1 of the Sherman Act, 15 U.S.C. § 1. That holding does not extend to RICO's provisions in 18 U.S.C. § 1962(c) primarily because the Sherman Act is premised, as RICO is not, on the "basic distinction between concerted and independent action." Copperweld, 104 S. Ct. at 2740. The policy considerations discussed in Copperweld, 104 S. Ct. at 2740-44, therefore do not apply to RICO, which is targeted primarily at the profits from patterns of racketeering activity.

[23] The claim against Heller International is premised on the theory that Heller International acted through Grayheck, who is an officer and director of ANB, and perhaps through other unidentified persons. Heller International is alleged to have thereby conducted or participated in the conduct of ANB's affairs through the alleged pattern of racketeering activity. The terms "conduct" and "participate" in section 1962(c) are quite broad, but it is not obvious to us that they extend to a parent corporation's involvement in racketeering activity solely through the actions of an agent of a subsidiary corporation. However, since the defendants have not raised the point and the district court did not pass on it, we shall not consider it in this appeal as a possible basis for affirming a portion of the dismissal.

To establish its case at trial, a civil plaintiff must surely prove the acts of racketeering, but the **[**68]** district courts in *Bache Halsey* and *Taylor* appear to have moved that requirement up to the pleadings stage. For several reasons, we do not agree that such specificity is required *at the pleadings stage*.

First, a determination of probable cause in the criminal context ordinarily involves some evaluation of the reliability of specific evidence. Even the most specific allegations do not establish probable cause unless they are reliable. We are, to say the least, perplexed as to how a court might undertake such evaluations of reliability in deciding a motion to dismiss under Rule 12. *See Sedima, supra*, slip op. at 5573 & n.56 (relationship between "probable cause" in complaint and plaintiff's burden at trial "remains something of a mystery").

With respect to *Bache* Halsey's discussion of grand juries, it should be recalled that a grand jury has significant investigative powers and resources, including a broad subpoena power. Before it decides whether to indict a person, it has extensive opportunities to discover and evaluate relevant facts. It should be obvious that a civil plaintiff has no similar discovery rights until it files its complaint. **[**69]** Yet the approach of the district court in *Bache Halsey* appears to require a plaintiff to establish a case before any discovery is permitted. The *Bache Halsey* court argued that such specificity was needed in order to evaluate the merits of a claim and to distinguish between well-founded and frivolous claims. *558 F. Supp. at 1046*. While the court's motives are admirable, its approach seems to us to be impractical. We see no grounds for demanding that a civil RICO plaintiff essentially plead evidence and prove the case in the complaint. [24]

Finally, we note that in our prior RICO decisions we have applied ordinary civil standards to pleadings in civil RICO **[**70]** cases. *E.g., Schacht v. Brown, supra, 711 F.2d at 1352-53*. We see no reason to depart from that practice.

It is possible that requiring private RICO plaintiffs to prove at trial the elements of a *section 1962* violation beyond a reasonable doubt could address some of the legitimate concerns about unfair stigmatization of defendants as "racketeers" and other abuses of RICO's criminal dimensions through civil proceedings. *See, e.g., Sedima, supra*, slip op. at 5569. RICO liability must be based, after all, on findings of criminal conduct. RICO does not specify a standard of proof for use in civil RICO actions. In the courts, the appropriate standards of proof in the various forms of civil RICO actions are not yet firmly settled, and the relevant considerations are numerous. *See Sedima, supra*, slip op. at 5569-74 & n.49; *id.* at slip op. pp. 5584-86 (Cardamone, J., dissenting); *United States v. Cappetto, 502 F.2d 1351, 1357 (7th Cir. 1974)*, *cert. denied*, *420 U.S. 925, 43 L. Ed. 2d 395, 95 S. Ct. 1121 (1975)*; *Eaby v. Richmond, 561 F. Supp. 131, 133-34 (E.D. Pa. 1983)*; **[**71]** *State Farm Fire & Casualty Co. v. Estate of Caton,* ***[*405]*** *540 F. Supp. 673, 675-77 (N.D. Ind. 1982)*; *Parnes v. Heinold Commodities, Inc., 487 F. Supp. 645, 647 (N.D. Ill. 1980)*; *Farmers Bank v. Bell Mortgage Corp., 452 F. Supp. 1278, 1280 (D. Del. 1978)*; Note, *Enforcing Criminal Laws Through Civil Proceedings: Section 1964 of the Organized Crime Control Act of 1970*, 53 TEX. L. REV. 1055, 1062-64 & n. 52 (1975); Matz, *Determining the Standard of Proof in Lawsuits Brought Under RICO*, National Law Journal, Oct. 10, 1983, at 21, col. 1. *See also United States v. Spilotro, 680 F.2d 612, 617-19 (9th Cir. 1982)* (interlocutory orders under *18 U.S.C. § 1963(b)*). On the appropriate standard of proof in proceedings with both civil and criminal dimensions, *see generally Herman & MacLean v. Huddleston, 459 U.S. 375, 387-91, 74 L. Ed. 2d 548, 103 S. Ct. 683 (1983)*; *Addington v. Texas, 441 U.S. 418, 60 L. Ed. 2d 323, 99 S. Ct. 1804 (1979)*; *United States v. Regan, 232 U.S. 37, 48-49, 58 L. Ed. 494, 34 S. Ct. 213 (1914).* **[**72]**

There can be little doubt that *Fed. R. Civ. P. 9(b)*, which ***HN18***[] requires that allegations of fraud specify "with particularity" the circumstances of the alleged fraud, applies to fraud allegations in civil RICO complaints. *See Moss v. Morgan Stanley, Inc., supra, 719 F.2d at 19*. In this case, the complaint adequately specified the transactions, the content of the allegedly false representations, and the identities of those involved. In addition, the identification of the transactions and the description of the alleged scheme to defraud put defendants on fair notice

[24] Some of the district court's language in *Bache Halsey* suggests that the probable cause standard might apply only in a final decision to grant relief after trial. *See 558 F. Supp. at 1045-47*. However, the court relied on that standard to deny a party leave to amend its answer to include RICO counterclaims.

of the time and place of the alleged false representations. *See* *Thornton v. Evans, 692 F.2d 1064, 1082 & n.41 (7th Cir. 1982)*; *Tomera v. Galt, 511 F.2d 504, 508 (7th Cir. 1975)*. *See also* *McGinty v. Beranger Volkswagen, Inc., 633 F.2d 226, 228-29 (1st Cir. 1980)*; *Miscellaneous Service Workers v. Philco-Ford Corp., 661 F.2d 776, 782 (9th Cir. 1981)*; *Felton v. Walston & Co., 508 F.2d 577, 581-82 (2d Cir. 1974)*. There would have **[**73]** been little point in requiring plaintiffs to expand the complaint by also identifying each notice which included an interest rate. The complaint here therefore satisfies *Rule 9(b)*.

For the foregoing reasons, we affirm the district court's dismissal of the portion of Count I alleging that ANB conducted its own affairs through a pattern of racketeering activity. We reverse the remainder of the district court's dismissal of the complaint and remand for further proceedings not inconsistent with this opinion.

HN1[] **Summary Judgment, Motions for Summary Judgment**

A party is entitled to summary judgment only if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, show that there is no genuine issue as to any material fact and that it is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. The burden is on the moving party to demonstrate the absence of any material factual issue genuinely in dispute. In determining whether a genuine issue of material fact exists, the non-moving party must be given the benefit of all reasonable doubts. The function of the district court on a motion for summary judgment is not to resolve conflicting claims but to determine whether there are issues of fact to be tried. Stated another way, the key is issue finding and not issue resolution.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN2[] Summary Judgment, Entitlement as Matter of Law

In complex antitrust litigation, summary proceedings are disfavored and sparingly utilized when, as is often the case, resolution turns on issues of motive and intent. That is not to say that summary judgment is never appropriate in antitrust litigation, particularly where motive and intent are not involved.

Civil Procedure > Judicial Officers > Judges > General Overview

HN3[] Justiciability, Standing

Standing is an important limitation on the right to maintain a private damage action under § 4 of the Clayton Act, *15 U.S.C.S. § 15*. The statute provides that any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor. Although the language may be read to encompass every harm that can be attributed directly or indirectly to the consequences of an antitrust violation, the courts conclude that Congress did not intend antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to such a violation. The courts instead look to common law principles that limit the availability of damage recoveries. There is a similarity between the struggle of common law judges to articulate a precise definition of the concept of proximate cause, and the struggle of federal judges to articulate a precise test to determine whether a party injured by an antitrust violation may recover treble damages. Plaintiffs must demonstrate a causal connection between an antitrust violation and an injury sufficient for the trier of fact to establish that the violation was a material cause of or a substantial factor in the occurrence of damage. If plaintiffs, at this stage of the litigation, cannot demonstrate a sufficient link between their injury and the defendants' alleged conduct, standing will be denied.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN4[] **Private Actions, Standing**

There are inherent limitations in the substantive protection afforded by the antitrust laws: they exclude claims based on conjectural theories of injury and attenuated economic causality that would mire the courts in intricate efforts to recreate the possible permutations in the causes and effects of a defendant's action.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > General Overview

Civil Procedure > Preliminary Considerations > Justiciability > General Overview

HN5[] **Private Actions, Standing**

In passing upon constitutional standing issues, which are somewhat different from antitrust standing, the United States Supreme Court requires a substantial causal nexus between injury and conduct. The injury must be "fairly" traceable to the challenged action and relief from the injury must be "likely" to follow from a favorable decision.

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

HN6[] **Private Actions, Standing**

The remoteness limitation relates to a court's denial of standing where a plaintiff's injury is too remote from an antitrust violation. In applying the "elusive" concept of remoteness, courts look (1) to the physical and economic nexus between the alleged violation and the harm to the plaintiff, and, (2) more particularly, to the relationship of the injury alleged with those forms of injury about which Congress was likely to have been concerned in making defendant's conduct unlawful and in providing a private remedy under § 4 of the Clayton Act, *15 U.S.C.S. § 15*.

HN7[] **Remedies, Damages**

An allegation of improper motive, although it may support a plaintiff's damages claims under § 4 of the Clayton Act, *15 U.S.C.S. § 15*, is not a panacea that will enable any complaint to withstand a motion to dismiss. The availability of the § 4 of the Clayton Act, *15 U.S.C.S. § 15*, remedy to some person who claims its benefits is not a question of the specific intent of the conspirators.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN8[] **Private Actions, Purchasers**

Absent a demand to purchase that which is the subject of an alleged refusal to deal, there can be no recovery under the antitrust laws.

Opinion

[*486] BARTELS, District Judge

This case involves a dispute between two cable television companies in Huntington, Long Island, in competition for subscribers to sports programs covering the games of the Yankees, the Mets, the Islanders, and the Nets. Huntington is a town of 54,000 homes, presenting an unusual situation in the cable television systems industry in that two "overbuilt" television systems have franchises and are competing head-to-head **[**2]** for subscribers to their respective systems. Plaintiffs, owning one of the systems, invoke the antitrust laws in challenging the conduct of its competitor-defendant in obtaining exclusive rights to cablecast the games of these four well-known New York professional sports teams. In doing so, the complaint joins the teams as well as the competing cable system operator in violating the antitrust laws. Specifically, the plaintiffs seek treble damages, under § 4 of the Clayton Act, *15 U.S.C. § 15*, for violations of *sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2*, allegedly arising from various conspiracies to restrain and monopolize competition for the provision of cable television services in Huntington, New York.

The parties having completed extensive "first wave" discovery, defendants presently move for partial summary judgment, *Fed.R.Civ.P. 56(b)*, dismissing the defendant sports teams from the action on the counts of the complaint predicated upon alleged conspiracies to deny plaintiffs access to "essential" cable television sports programming.

At this stage of the litigation, the court is called upon to decide, in essence, whether the teams belong in this lawsuit. The **[**3]** defendants, in making this motion, argue that there are no genuine issues of material fact to be tried upon this issue and that the uncontradicted evidence shows no team participation in the allegedly anticompetitive conspiracies. In contrast, the plaintiffs vigorously argue that triable issues of material fact do exist and, alternatively, that further discovery is required in order to adequately support their position. *Fed.R.Civ.P. 56(f)*.

I. *The Parties*

The individual plaintiff, James Y. Nishimura, is the alter-ego of the three corporate plaintiffs: Communication Systems Corp. ("CSC"), Huntington TV Cable Corp. ("HTVC"), and Home Entertainment Productions, Inc. ("HEP"). He and members of his family own 100% of CSC's outstanding **[*487]** stock, while CSC in turn is the sole parent company of HTVC and HEP. Nishimura is also president and a director of all three corporate plaintiffs. Since 1967 plaintiff HTVC has had a franchise in Huntington, New York, for the operation of a cable television system. In addition to offering its subscribers "basic" cable television service [1] HTVC offers several packages or tiers of "premium" programming services for an additional monthly fee. **[**4]** Plaintiff HEP was organized by Nishimura to purchase premium programming services from third parties for resale to HTVC and its subscribers.

Defendant Charles F. Dolan can similarly be described as the alter-ego of the ten defendant corporations and partnerships listed in the margin. [2] For the sake of convenience and except where otherwise noted, these ownership-affiliated and commonly managed entities will be collectively referred to as "Cablevision." Its businesses include the operation of numerous **[**5]** cable television systems in the New York metropolitan area and the original production of television programming for cable television distribution to its own systems and non-Cablevision systems. The three remaining individual defendants -- Lawrence Meli, Robert J. Sullivan, and John Tatta -- are officers of one or more of the Cablevision entities.

Two of those entities play the most important roles in this scenario. Defendant Sports Channel Associates is a partnership (of which defendant Dolan is one of three general partners) engaged in the original production of professional and amateur sporting-events programming. Since March, 1979, SportsChannel **[**6]** Associates has produced, marketed and distributed a premium cable television service, known as "SportsChannel," throughout the metropolitan area, which consists of a variety of television programs on a year-round basis featuring principally sports events participated in by New York area teams. SportsChannel Associates sells "SportsChannel" to cable system operators not controlled by Cablevision as well as to those owned by Cablevision. An important exception and the cause of this action, as will be discussed *infra*, is the refusal by SportsChannel Associates to sell "SportsChannel" to plaintiff HTVC.

The second Cablevision entity of immediate importance is Cablevision of Huntington which, since December, 1981, has operated a cable television system in direct competition with HTVC in Huntington. Cablevision of Huntington

---

[1] "All cable systems offer basic service packages available to all subscribers for one monthly fee. These programs include all local broadcast television shows, satellite-delivered cable network programming and community oriented, locally originated cablecasts . . . Subscribers can pay an extra charge over the basic monthly rate to receive 'pay cable' programming channels consisting of feature films, sports events, cultural and family programming." 1 Ferris, Lloyd, Casey, Cable Television Law para. 5.02 (1983).

[2] Cable Vision Systems Development Company, Communications Management Corporation, Cablevision Systems Holding Company, Atlantic Cable Television Service Corporation, Cablevision Systems Huntington Corporation, Cablevision of Huntington, Cablevision Program Services Company, Cablevision Systems Corporation, Cablevision Consolidations Company and SportsChannel Associates.

offers "SportsChannel" to its subscribers as a premium service, having acquired the rights to do so from its sibling entity, defendant SportsChannel Associates.

The remaining group of defendants of greatest significance for purposes of this motion consists of four New York area professional sports teams [3] (collectively referred to as "the teams"): Nassau Sports **[**7]** Ltd., which stages professional ice hockey games with its team, the New York Islanders ("Islanders"); Meadowlands Basketball Associates, which stages professional basketball games with its team, the New Jersey Nets, formerly known as the New York Nets ("Nets"); Doubleday Sports, Inc., and New York Yankees Partnership, both of **[*488]** which stage professional baseball games with their respective teams, the New York Mets and the New York Yankees ("Mets" and "Yankees"). At least since 1979, each of the teams has had an exclusive contractual relationship with Cablevision permitting a certain number of their games to be cablecast on "SportsChannel."

II. *The Complaint*

Plaintiffs' seventeen-count complaint is prolific in its charges and seeks relief under *sections 1* and *2* of the Sherman Act (Counts I to XI) and **[**8]** also sets forth pendent state antitrust (Count XII) and common law tort claims (Counts XIII to XVII). Defendants' summary judgment motion addresses Counts I through IX and Count XII; the remaining counts neither involve the teams nor allege unlawful conduct in connection with the denial of access to sports programming. The claims contained in the subject counts will be collectively referred to as the "sports claims."

The complaint contains a number of predicate allegations which are incorporated by reference into each of the sports claims. Among the most important of these, all found in paragraph 39 of the complaint, are that the "ability to cablecast to subscribers games of the . . . professional New York teams is essential to successfully compete in the cable television industry in Huntington"; that the games staged by each defendant team constitute "a distinct product for which there is strong demand among cable television subscribers in Huntington"; that these games have no adequate programming substitutes; and that "but for" Cablevision's exclusive control of the sublicensing of rights to cablecast the teams' games, Cablevision of Huntington would not have overbuilt HTVC's system.

[9]** Counts I through IV of the complaint charge the defendants with violating *§§ 1* and *2* of the Sherman Act by conspiring to restrain and monopolize horizontal competition in the cable television trade in Huntington. The alleged means employed by the defendants were the teams' grant of exclusive production and distribution rights to Cablevision followed by Cablevision's refusal to sublicense the teams' games to HTVC so that its own cable system could cablecast the games exclusively. Counts V through VIII charge various horizontal and vertical conspiracies among the defendants in violation of *§ 1* of the Sherman Act, the purpose of these conspiracies being the elimination of competition among the teams, and among the teams and Cablevision, in the production and sale of cablecast rights to the teams' games. In furtherance of such conspiracies defendants have allegedly agreed to limit the number of games available for cablecasting; have participated in a tying arrangement comparable to block booking; have agreed to produce and distribute the games through a single entity (Cablevision); and have refused to deal with plaintiffs and others similarly situated. Finally, Count IX alleges that, **[**10]** in violation of *§§ 1* and *2*, Cablevision conspired with the teams to misuse its monopoly power in its noncompetitive franchise areas within the New York metropolitan area to obtain exclusive production and sublicensing rights and especially to secure exclusive cablecasting rights in Huntington in order to establish a monopoly there.

III. *Background*

A. *Cable Television Franchises in Huntington*

In late 1967, HTVC and the Town of Huntington entered into a non-exclusive franchise agreement for the construction and operation of a cable television system. When it commenced operating in 1971, HTVC was capable of serving eighty percent of Huntington's 54,000 homes, the remainder being in areas where utility lines were

---

[3] The complaint originally named a fifth team, Meadowlanders, Inc. ("Devils") as a defendant. Subsequent to the filing of this motion, plaintiffs voluntarily dismissed the Devils without prejudice.

underground and thus more costly to connect than where above-ground utility poles were available. Until 1981, HTVC had a *de facto* monopoly in the provision of cable television to residents in Huntington.

The demise of HTVC's monopoly can be traced back to 1969, when the Town of Huntington awarded a co-franchise to Inter-County Television of Suffolk, Inc. ("Inter-County"). However, the latter took no steps to construct a cable television system, **[*489]** and **[**11]** its franchise remained fallow until Cablevision acquired Inter-County in 1973. Then Inter-County unsuccessfully sought confirmation of its franchise from the New York State Commission on Cable Television ("Cable Commission"), *see N.Y. Exec. Law § 821* (McKinney 1982). Nonetheless, prompted by concern over HTVC's failure to connect homes not accessible by above-ground utility poles, in 1976 the Town of Huntington executed a new franchise agreement with Inter-County requiring it to serve homes in those areas and permitting it to "overbuild" [4] HTVC's existing system. In March, 1978, over the vigorous opposition of HTVC, the Cable Commission approved the new franchise agreement. After two years of construction, during and even after which time HTVC unsuccessfully brought six separate proceedings before the Cable Commission and in the state court to block construction and invalidate the franchise, Cablevision of Huntington began operating in December, 1981. Since that time HTVC and Cablevision of Huntington have been in direct competition for most of Huntington's existing and new subscribers.

[12]** B. *Exclusive Contracts Between Cablevision and the Teams*

Since 1975 Cablevision has entered into a number of contracts with the teams granting it certain exclusive rights in connection with the production and distribution of sports programming for cablecasting the teams' games in the metropolitan area. It is important to note that the contracts covered the entire metropolitan area and not Huntington alone. Because these contracts are of the utmost importance the court believes that the essential features of the contracts shared by all the teams, as well as a summary description of the individual contracts on a team-by-team and chronological basis, should be set forth pointing out those terms governing duration and exclusivity.

1. *Essential Features of the Contracts*

The basic scheme of the several contracts, exceptions to which will be noted on a team-by-team basis, *infra*, was the grant to Cablevision of the exclusive license to produce the game programming and to sublicense cablecasting rights to operators of cable television systems within the teams' "home territory." Such systems would include those owned by Cablevision and those owned by others. Since 1979, when **[**13]** SportsChannel Associates created "SportsChannel," all of the teams' cablecast games have been sublicensed to cable operators as part of the "SportsChannel" premium cable television service. The teams contracts almost invariably gave Cablevision *the right* to sublicense all cable system operators within a given territory (generally the New York metropolitan area and in all cases inclusive of Huntington) but did not *obligate* Cablevision to sublicense all potential sublicensees. The language whereby Cablevision retained sublicensing discretion varied greatly from contract to contract. Some of the contracts specifically provided that Cablevision had no obligation to sublicense non-Cablevision owned systems (such as HTVC) which were competing in the same geographic area against Cablevision systems (such as Cablevision of Huntington). The teams, of course, in granting exclusive sublicensing rights to Cablevision, gave up all rights themselves to deal independently with third-party cable system operators seeking to cablecast the teams' games.

Since the inception of "SportsChannel" in 1979, all of the contracts have provided that Cablevision be solely responsible for the production **[**14]** and origination of the sporting events carried on "SportsChannel" and the costs thereof. For the home games of two of the teams -- the Nets and the Islanders -- Cablevision has generally leased production facilities from an independent sports-programming producer. For the home games of the Mets and Yankees, **[*490]** Cablevision has leased the production facilities of two local broadcast stations which have separate agreements with those teams for the broadcasting of a certain number of the teams' games. [5] **[**15]** The

---

[4] "Overbuild" refers to a situation in which a second cable television operator wires the same streets and competes head-to-head for subscribers with the operator which first served the area.

Mets and Yankees agreements have provided that the teams would use their best efforts to make the broadcasters' facilities available for Cablevision's use. For those away games of the teams cablecast by Cablevision on "SportsChannel," the agreements generally provided that the teams would procure a "split feed" [6] for Cablevision, at the latter's cost, from the producer at the away arena.

The contracts entered into prior to 1982 generally required Cablevision to make fixed payments to the teams, either on a per-season or a per-game basis, which did not depend on the number of Cablevision's sublicensees or ultimate viewers. Since 1982, the contracts between Cablevision and the Islanders, Mets, and Yankees all provide for payment by Cablevision based on a percentage of revenues derived from "SportsChannel." Thus, under the latter agreements those teams' licensing income is presumably related to the number of "SportsChannel" subscribers since sublicensing revenues are based, at least in part, on the number of subscribers that purchase "SportsChannel" from the sublicensee.

[16]** 2. *The Individual Agreements*

The Islanders. In 1975 the Islanders and Cablevision entered into their first agreement granting Cablevision [7] **[**17]** exclusive cablecast rights to Islanders games for five hockey seasons (1975-76 to 1979-80). The agreement also designated the Islanders as Cablevision's agent for the sale of cable television rights to the Islanders games to cable systems not owned by Cablevision, but all such sales were subject to Cablevision's approval. This agency provision led to a dispute between the parties, Cablevision brought suit, discussed *infra*, and in 1978 the agreement was judicially voided. As part of a settlement of the suit a new agreement was entered into that year granting Cablevision an exclusive license to produce and distribute Islanders games for cable television transmission for five hockey seasons (1978-79 to 1982-83). In 1982 the Islanders and Cablevision entered into a new agreement, presently in effect, granting Cablevision exclusive production and distribution rights for thirty seasons. [8]

The Nets. Until 1967 the Nets and Islanders were commonly owned and shared a home arena on Long Island, New York. Thus, in 1975 the Nets first entered into an agreement with Cablevision identical to the 1975 Islanders agreement, and it met the same fate in 1978 as a result of the same litigation. In August, 1978, Cablevision and the Nets (now owned by defendant Meadowlands Basketball Associates and located in New Jersey) entered into a new agreement which differed, however, from the 1978 Islanders agreements in several **[*491]** **[**18]** important respects. The outstanding variation was that the Nets retained production rights and responsibilities and only granted Cablevision the right to distribute Nets games in areas where Cablevision owned a cable television system franchise. In other words, under the 1978 agreement the Nets produced the games and distributed them directly to cable system operators. The Nets became disenchanted with this arrangement by early 1979 and later that year entered into a new agreement with Cablevision amending their 1979 agreement for the 1979-80 through 1983-84

---

[5] The Mets and Yankees have agreements with WOR TV and WPIX TV respectively, granting those stations rights to broadcast some of those teams' games. Those games are also available to HTVC subscribers as part of the basic service. The teams' agreements with Cablevision grant rights to those games not broadcast by WOR or WPIX.

[6] Typically, the production facilities necessary to provide video feed of games at most stadiums are controlled by a local broadcaster with rights to the local team's games. A visiting broadcaster or cablecaster, with rights to the visiting team's games, generally obtains a "split" of the video feed from the local broadcaster and pays him an amount reflecting a fair share of his production and origination costs.

[7] This initial agreement was between the Islanders and Long Island Cable Communications Development Company ("LICCDC"), a predecessor of SportsChannel.

[8] *See* Appendix to Defendants' Cross-Motion for Summary Judgment ("Def. App.") Exh. Y (Nets/Islanders Agreement with LICCDC of 1975); Appendix of Exhibits to Plaintiffs' Memorandum in Opposition to Defendants' Motion for Summary Judgment ("Pl. App.") Exh. 4 (Nets/Islanders Agreement with HEP of 1976); *Long Island Cable Communications Co. v. Nassau Sports*, No. 13533/76 (N.Y. Sup. Ct. 1977) ("*LICCDC*"); Pl. App. Exh. 5 (*LICCDC* trial transcript); Def. App. Exh. U (*LICCDC* decision); Pl. App. Exh. 13 (Islanders/Cablevision Agreements of 1978 and 1982).

basketball seasons. The new agreement, which permitted Cablevision to offer Nets games as part of "SportsChannel," granted Cablevision exclusive production and distribution rights throughout the Nets' home territory rather than only in those areas where Cablevision had its own franchise. The record does not reveal any more recent agreements between Cablevision and the Nets. [9]

[19]** *The Mets*. The Mets first contracted with Cablevision in 1979, granting it exclusive rights to produce and distribute cablecasts of Mets games for the 1979 and 1980 baseball seasons as part of "SportsChannel." Pursuant to an option provision, Cablevision renewed the agreement for the 1981 season. After the 1979 season the Mets were acquired by its present owner, defendant Doubleday Sports, Inc., and in 1980 the Mets entered into an agency agreement with the Islanders appointing the latter as the Mets' exclusive agent for the sale of rights to cablecast Mets games. Pursuant to this agreement the Islanders negotiated with Cablevision on behalf of the Mets and Islanders beginning in 1980, culminating in the 1982 Islanders agreement mentioned above, and an agreement simultaneously entered into between the Mets and Cablevision which virtually duplicated the thirty-year 1982 Islanders agreement. The 1982 Mets agreement remains in effect. [10]

[20]** *The Yankees*. The Yankees and Cablevision entered into their first agreement in April, 1979, granting Cablevision exclusive rights to produce and distribute Yankees games as part of "SportsChannel" for the 1979 and 1980 baseball seasons. In March, 1981, an almost identical agreement was reached with Cablevision covering the 1981 season only. In May, 1982, the Yankees and Cablevision entered into a fifteen-year (1982 to 1996 seasons) agreement, currently in effect, once again granting Cablevision exclusive production and distribution rights. [11]

C. *Plaintiffs' Efforts to Obtain Sports Programming from the Teams and Cablevision*

An important issue raised by defendants' motion involves the extent to which plaintiffs sought sports programming rights -- and the nature of the rights sought -- which they claim in this lawsuit were unlawfully withheld in furtherance of anticompetitive conspiracies.

Plaintiffs' efforts to obtain **[**21]** rights to cablecast the teams' games fall into three categories. The plaintiffs' first efforts began in September, 1975, when Nishimura wrote to Roy Boe, then principal owner of the Islanders and Nets, proposing the carriage of his teams' games as part of a sports programming package to be offered to HTVC subscribers as a separate, premium cable television service. Approximately one month later, however, those teams entered into their first contracts with Cablevision for the 1975-76 through 1979-80 seasons. As noted above, these contracts designated the Islanders and the Nets as agents for the sale of cable exhibition rights for their games to third-party operators, subject to Cablevision's prior approval. Pursuant to their agency power the **[*492]** teams negotiated with several cable system operators, including Nishimura, resulting in a series of offers by Nishimura and three other operators, all of which were rejected by Cablevision. Nevertheless, the Nets and Islanders entered into agreements with all four operators in September, 1976. The agreements with plaintiff HEP (which would "resell" the programming to HTVC) purported to grant it exclusive rights to cablecast in Huntington **[**22]** all of the teams' home games for the 1976-77 through 1979-80 seasons. [12]

Cablevision promptly brought suit in the state court to void the four sets of agreements and ultimately prevailed when the court ruled that Cablevision had not unreasonably rejected the operators' offers and thus those teams had breached their 1975 agreement with Cablevision by entering into the 1976 contracts without Cablevision's prior approval. In June, 1978, the court issued a final judgment awarding Cablevision over $4 million in damages against

[10] *See* Pl App. Exh. 11 (Mets/Cablevision Agreements of 1979 and 1982); Appendix of Exhibits to Memorandum Supporting Plaintiffs' Motion for Additional Discovery Exh. A (Nassau Sports/Mets Agency Agreement of 1980).

[11] *See* Pl. App. Exh. 10 (Yankees/Cablevision Agreements of 1979, 1981 and 1982).

[12] *See* Pl. App. Exh. 2 (Nets/Islanders Agreement with LICCDC of 1975); Pl. App. Exh. 4 (Nets/Islanders Agreement with HEP of 1976). At this time HTVC was the only cable system operating in Huntington.

those teams and terminating the 1976 agreement. The teams filed a notice of appeal, but later withdrew their appeal simultaneously with the execution of the 1978 agreements with Cablevision as part of an overall settlement. As a result of this litigation the 1976 agreement between the two **[**23]** teams and HEP was never implemented.

The second effort by the plaintiffs to obtain sports programming occurred in September, 1979, when Seth Morrison, HTVC's program director, wrote to the principal owners of the Yankees and Mets [13] requesting an opportunity to discuss the availability of their 1980 home games for cablecasting by HTVC. The letters indicated that HTVC had been unable to cablecast the games because of the teams' exclusive contracts with Cablevision. According to Morrison, he followed up the letter with telephone calls to representatives of both teams and further explained that HTVC was interested in obtaining necessary production rights or, alternatively, rights to a "split feed" produced by another. The teams declined to consider HTVC's proposal, citing their exclusive contracts with Cablevision. [14]

Plaintiffs' third effort to **[**24]** secure programming rights occurred in early 1982, which was after Cablevision of Huntington commenced operating with a cable television "menu" that included "SportsChannel." At this time plaintiffs were solely interested in acquiring "SportsChannel" for HTVC in Huntington from Cablevision and made no attempt to purchase any rights directly from the teams. Rather, plaintiffs adopted a strategy of direct negotiation with Cablevision and informal contacts with the teams hoping to enlist their support in pressuring Cablevision to sell "SportsChannel" to plaintiffs. This strategy failed. After months of inconsequential communications with Cablevision, in June, 1982, Nishimura made demand upon Cablevision for it to make available "SportsChannel" to HTVC in Huntington on a comparable basis with other licensees. In a series of letter exchanges, copies of which Nishimura sent to the teams, Cablevision cited HTVC's signal-theft security problems [15] as its reason for not entertaining plaintiffs' request for "SportsChannel." Nishimura labelled this concern baseless and a "red herring" and pressed his demand for "SportsChannel" to no avail. Throughout this period Nishimura contacted, either personally **[**25]** or through others, various representatives of the Yankees, Mets, and Islanders seeking their assistance in acquiring "SportsChannel" for HTVC in Huntington. Citing their teams' exclusive contracts with Cablevision, the **[*493]** teams stated that plaintiffs would have to deal with Cablevision in order to acquire any cablecasting rights to the teams' games. [16] Plaintiffs then commenced the instant suit in January, 1983.

[26]** Defendants' motion essentially seeks dismissal of all claims alleging conspiracies involving the teams to deny plaintiffs access to sports programming, fundamentally on the grounds that plaintiffs never sought the same rights granted to the Cablevision defendants, that plaintiffs lack standing to sue the teams, and that plaintiffs' injuries were not caused by the teams' actions. On the other hand, plaintiffs' position is that they did seek rights "akin to" those granted to Cablevision, that adequate demand was made, and that the alleged injury was caused by the teams' actions.

Specifically, defendants request dismissal of (i) Counts V through IX (which principally allege horizontal conspiracies among the teams) in their entirety, and (ii) Counts I through IV and XII insofar as they challenge the legality of the exclusive contracts or claims that the teams conspired with Cablevision to deny plaintiffs production rights or "SportsChannel" programming. Should defendants prevail, the teams no longer will be parties to this litigation and plaintiffs' antitrust claims against Cablevision involving sports programming will be considerably narrowed.

---

[13] The record contains a copy of Morrison's letter to the Yankees.

[14] *See* Affidavit of Seth Morrison ("Morrison Aff."), dated May 14, 1984, Paragraphs 5-6.

[15] Signal-theft security problems concern the ability of subscribers to receive cable programming without authorization and without paying.

IV. *Discussion*

HN1[] A party is entitled **[**27]** to summary judgment only "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, . . . show that there is no genuine issue as to any material fact and that [it is] entitled to a judgment as a matter of law." *Fed.R.Civ.P. 56(c)*. Also, "it is well established that 'the burden [is] on the moving party to demonstrate the absence of any material factual issue genuinely in dispute . . . .'" *Hayden Publishing Co., Inc. v. Cox Broadcasting Corp., 730 F.2d 64, 68 (2d Cir. 1984)* (quoting *Heyman v. Commerce & Industry Insurance Co., 524 F.2d 1317, 1320 (2d Cir. 1975))*; *see* *Adickes v. S.H. Kress & Co., 398 U.S. 144, 157, 26 L. Ed. 2d 142, 90 S. Ct. 1598 (1970)*. In determining whether a genuine issue of material fact exists, the non-moving party must be given the benefit of all reasonable doubts. *Reading Industries, Inc. v. Kennecott Copper Corp., 631 F.2d 10, 13 n.6 (2d Cir. 1980)*, *cert. denied*, *452 U.S. 916, 69 L. Ed. 2d 420, 101 S. Ct. 3051 (1981)*. The function of the district court on a motion for summary judgment is not to resolve conflicting claims, but to "determine whether there are issues of fact to be tried. **[**28]** . . . Stated another way, the key is issue-finding, not issue-resolution." *United States v. One Tintoretto Painting, 691 F.2d 603, 606 (2d Cir. 1982)*.

It follows that ***HN2***[] in complex antitrust litigation, summary proceedings are disfavored and sparingly utilized when, as is often the case, resolution turns on issues of motive and intent. *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962)*; *George C. Frey Ready-Mixed Concrete, Inc. v. Pine Hill Concrete Mix Corp., 554 F.2d 551, 555 (2d Cir. 1977)*; *see generally* 10A C. Wright, A. Miller & M. Kane, *Federal Practice and Procedure* § 2732.1 (1983). That is not to say that summary judgment is never appropriate in antitrust litigation, particularly where motive and intent are not involved, *see* *First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 289-90, 20 L. Ed. 2d 569, 88 S. Ct. 1575 (1968)*, *reh'g denied*, *393 U.S. 901, 21 L. Ed. 2d 188, 89 S. Ct. 63 (1968)*; *Reading Industries, Inc. v. Kennecott Copper Corp., 631 F.2d at 13 n.6*, but it appears clear that motive and intent are not involved where standing is at issue, **[*494]** *Billy Baxter, Inc.* ***[**29]*** *v. Coca-Cola Co., 431 F.2d 183, 189 (2d Cir. 1970)*, *cert. denied*, *401 U.S. 923, 27 L. Ed. 2d 826, 91 S. Ct. 877 (1971)*, and that "standing is a question of law for the court to determine." *John Lenore & Co. v. Olympia Brewing Co., 550 F.2d 495, 498 (9th Cir. 1977)*. *Cf.* *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)* (complaint dismissed for failure sufficiently to allege antitrust injury).

To have standing to sue there must be an injury resulting from the violation of the statute. Consequently, ***HN3***[] standing is an important limitation on the right to maintain a private damage action under § 4 of the Clayton Act, *15 U.S.C. § 15*. The statute provides:

> . . . any person who shall be *injured* in his business or property by reason of anything forbidden in the antitrust laws may sue therefor . . . (Emphasis added.)

Although the language may be read to encompass every harm that can be attributed directly or indirectly to the consequences of an antitrust violation, the courts have been "virtually unanimous in concluding that Congress did not intend antitrust laws **[**30]** to provide a remedy in damages for all injuries that might conceivably be traced to" such a violation. *Hawaii v. Standard Oil Company of California, 405 U.S. 251, 263 n.14, 31 L. Ed. 2d 184, 92 S. Ct. 885 (1972)*; *see* *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. at 534*; *Blue Shield of Virginia v. McCready, 457 U.S. 465, 476-77, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*. The courts have instead looked to common law principles which limit the availability of damage recoveries. As the Supreme Court has recently noted, "there is a similarity between the struggle of common-law judges to articulate a precise definition of the concept of 'proximate cause', and the struggle of federal judges to articulate a precise test to determine whether a party injured by an antitrust violation may recover treble damages." *Associated General Contractors, 459 U.S. at 535-36*. *See* *Crimpers Promotions, Inc. v. Home Box Office, Inc., 724 F.2d 290, 295 (2d Cir. 1983)*, *cert. denied*, *467 U.S. 1252, 52 USLW 3906, 82 L. Ed. 2d 841, 104 S. Ct. 3536 (1984)*. The plaintiffs must demonstrate "a causal connection between an antitrust violation **[**31]** and an injury sufficient for the trier of fact to establish that the violation was a 'material cause' of or a 'substantial factor' in the occurrence of damage." *Billy Baxter, Inc. v. Coca-Cola Co., 431 F.2d at 187*; 2 P. Areeda & D. Turner, ***Antitrust Law***, § 334 at 163 (there must be "a significant causal connection between the defendant's violation and the plaintiff's injury"). If the plaintiffs, at this stage of the litigation, cannot demonstrate a sufficient link between their injury and the defendants' alleged conduct, standing will be denied. As to plaintiffs' claims made under the New York State antitrust laws, *N.Y.Gen.Bus.Law § 340* (McKinney's 1968), the New York State courts have adopted the same standing constraints as imposed by the federal courts under § 4 of the Clayton Act. *Neeld v. National Hockey League, 439 F. Supp. 446, 454-55 (W.D.N.Y. 1977)*; *Lerner Stores Corp. v. Parklane Hosiery Co., 86 Misc. 2d 215, 218, 381 N.Y.S.2d 968* (Sup. Ct.), *aff'd on other grounds*, *54 A.D.2d 1072, 388 N.Y.S.2d 760* (4th Dep't 1976).

A. *Plaintiffs' Standing*

With this principle in mind the court considers the issues presented by this motion. The sole injury for which **[**32]** plaintiffs seek redress under § 4 of the Clayton Act is HTVC's loss, starting in December, 1981, of potential and existing cable television subscribers to its direct competitor Cablevision of Huntington. There appears to be little doubt that the direct cause of this injury is Cablevision's refusal, and not the teams' refusal, to grant plaintiffs the right to carry the defendant teams' games on "SportsChannel" while granting such a right to plaintiffs' competitor. The actions of the teams, in granting Cablevision the exclusive right to produce and distribute **[*495]** their games and thereby making the games available to plaintiffs only through Cablevision, are at most an indirect cause of the injury. That is to say, plaintiffs' loss of subscribers can only be traced to the teams through Cablevision's independent exercise of the exclusive rights granted it by the teams.

To illustrate, if plaintiffs' immediate competitor, Cablevision of Huntington, did not offer its subscribers "SportsChannel", plaintiffs, under their own theory, would suffer no competitive injury upon which to base a claim, regardless of their inability to acquire cablecasting rights. Similarly, if the teams granted **[**33]** the same exclusive production and distribution rights to Cablevision but Cablevision did not have a cable system franchise in Huntington, HTVC would suffer no competitive loss due to the teams' actions if Cablevision refused to grant it a "SportsChannel" sublicense. In other words, only when Cablevision is competing with HTVC and exercises its rights of refusal does the alleged loss result to HTVC.

The unmistakable fact is that the various contracts between the teams and Cablevision expressly give the latter sole discretion to sublicense or not to sublicense the teams' games to third-party cable system operators. The contracts unambiguously demonstrate that the teams contractually relinquished to Cablevision all control to distribute their games. *See* *Reading Industries, Inc. v. Kennecott Copper Corp., 631 F.2d at 13 n.6* (summary judgment appropriate where the issue of causal relationship between alleged violation and injury turned on documentary evidence).

In addition to its indirectness, the chain of causation between plaintiffs' harm and the teams' alleged wrongdoing otherwise contains no precisely defined links which are sufficient to support standing. *Associated General* **[**34]** *Contractors, 459 U.S. at 540*. As the Court of Appeals for the Second Circuit stated:

> ***HN4***[] . . . there are inherent limitations in the substantive protection afforded by the antitrust laws: they exclude claims based on conjectural theories of injury and attenuated economic causality that would mire the courts in intricate efforts to recreate the possible permutations in the causes and effects of [defendant's action]. *Cf.* *Mid-West Paper Products Co. v. Continental Group, Inc., 596 F.2d 573, 583-85 (3d Cir. 1979)*.

Reading Industries, Inc. v. Kennecott Copper Corp., 631 F.2d at 14. For instance, to the extent that plaintiffs claim that in the absence of the exclusive contracts with Cablevision [17] the plaintiffs could have purchased cablecasting rights directly from the teams, the requisite causal relationship nevertheless rests on speculation that (a) the teams would have produced the programming of the games themselves for distribution, (b) plaintiffs would have reached a

---

[17] In reference to the exclusivity clauses in the teams' contracts, *see* *United States v. Jerrold Electronics Corp., 187 F. Supp. 545*, (E.D.Pa. 1960), *aff'd*, ***365 U.S. 567, 5 L. Ed. 2d 806, 81 S. Ct. 755 (1961)***(per curiam), where the record showed that one product was necessarily tied to another as a single package without violation of the antitrust laws. This principle was affirmed in *Jefferson Parish Hospital District No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 1565, 80 L. Ed. 2d 2 (1984)*.

licensing agreement with the teams not only individually but collectively as a package, and (c) Huntington subscribers would then have chosen to subscribe to plaintiffs' cable service. It is **[**35]** appropriate to cite again *Reading Industries, Inc. v. Kennett Copper Corp., 631 F.2d at 13-14*, where the court said, "to find antitrust damages in this case would engage the court in hopeless speculation concerning the relative effect of an alleged conspiracy concerning the relative effect of an alleged conspiracy in the market for refined copper on the price of copper scrap, where countless other market variables could have intervened to affect those pricing decisions." Added to such variables is the undisputed fact that plaintiffs never were interested in acquiring or offered to acquire exclusive production and distribution rights on a metropolitan-wide basis, the product offered by the teams. At all **[*496]** times plaintiffs' interest was in acquiring rights to cablecast the teams' games on HTVC in Huntington only, an opportunity not offered by the teams but by a third party, Cablevision, in the form of "SportsChannel." The plaintiffs' claims that they could have purchased cablecasting rights from some other third-party "middleman" who *might* have contracted with the teams for production and distribution rights had not the teams granted those rights exclusively to Cablevision **[**36]** are even more speculative. By introducing this hypothetical middleman into this hypothetical scenario, the plaintiffs' link between the teams' alleged wrongdoing and the plaintiffs' injury is based on sheer speculation. [18]

[37]** To support their contention of standing, plaintiffs heavily rely upon *Blue Shield of Virginia v. McCready, supra*, and *Crimpers Promotions, Inc. v. Home Box Office, supra.* This reliance is misplaced. In *McCready* the plaintiff was a health subscriber who sought and was refused reimbursement for the costs of treatment by her psychologist. As a practice the defendant insurer reimbursed subscribers for the costs of psychotherapeutic services provided by psychiatrists but not by psychologists. The psychologists were the obvious target of the anticompetitive practice. McCready sued the insurer and a state-wide organization of psychiatrists, charging that the insurer's failure to reimburse was in furtherance of a conspiracy to restrain competition in the psychotherapy market. The standing analysis employed by the Court in *McCready* focused on two distinct types of limitation which the courts, "drawing on statutory policy," *457 U.S. at 473*, have used to restrict the availability of the § 4 remedy, one of which relates to duplicative recovery and the other to remoteness. Only the latter is relevant to this case.

That limitation ***HN6***[] relates to the court's denial of standing where **[**38]** a plaintiff's injury is too remote from an antitrust violation. *457 U.S. at 476-84*. In applying the "elusive" concept of remoteness, the Court wrote:

> we look (1) to the physical and economic nexus between the alleged violation and the harm to the plaintiff, and, (2) more particularly, to the relationship of the injury alleged with those forms of injury about which Congress was likely to have been concerned in making defendant's conduct unlawful and in providing a private remedy under § 4.

457 U.S. at 478.

Concerning "remoteness" and causation, the Court asserted that plaintiff alleged a sufficient "physical and economic nexus" between the alleged violation and injury; denying reimbursement was the very means by which defendants sought to achieve the alleged illegal ends and McCready's injury was precisely the type of loss that the claimed violations would be likely to cause. *Id. at 479*. It concluded that McCready's alleged injury was of a type that Congress sought to redress in providing a § 4 remedy because it was "inextricably intertwined with the injury the conspirators sought to inflict on psychologists and the psychotherapy market." *Id. at 484*.

---

[18] ***HN5***[] In passing upon constitutional standing issues, which the court recognizes are somewhat different from antitrust standing, the Supreme Court has also required a substantial causal nexus between injury and conduct. In *Allen v. Wright, 468 U.S. 737, 104 S. Ct. 3315, 82 L. Ed. 2d 556 (1984)*, it denied standing to parents of public school students who challenged the IRS's grant of tax exemptions to racially discriminatory schools, writing:

> The injury must be "fairly" traceable to the challenged action, and relief from the injury must be "likely" to follow from a favorable decision . . . Is the line of causation between illegal conduct and injury too attenuated? Is the prospect of obtaining relief from the injury as a result of a favorable ruling too speculative?

In **[**39]** *McCready* there was no question whether the defendants' alleged conduct had *in fact* caused the plaintiff's alleged injury. The denial of reimbursement was both the means by which defendants sought to achieve the alleged illegal ends and the very injury for which plaintiff **[*497]** sought redress. Here, the alleged wrongdoing by the teams -- granting exclusive rights to Cablevision -- did not, as previously discussed, cause plaintiffs to lose subscribers to Cablevision of Huntington. Such action is not inextricably intertwined with the alleged injury sustained by the plaintiffs.

Crimpers is equally unavailing to plaintiffs' position. The plaintiff in that case organized a cable television trade show to facilitate contacts between producers of cable television programming and local cable television systems. The complaint alleged that defendants, two companies, Home Box Office, Inc. and Showtime Entertainment Corporation, allegedly dominant in the business of purchasing and assembling programming from producers and selling it to the cable systems, conspired to cause a boycott of plaintiff's trade show. Applying *McCready* standing analysis to those alleged facts, Judge **[**40]** Friendly, writing for the Second Circuit, held that the plaintiff, although not a direct competitor of the defendants, had standing under § 4 to assert its antitrust claims.

Crimpers is distinguishable from the present case on the same ground as *McCready*. The trade show allegedly was a failure due to the defendants' actions, which were anticompetitive, so that the plaintiff's injury in *Crimpers* had the same direct causal nexus with the alleged antitrust violation as was present in *McCready*. As the court stated in *Crimpers*, "the alleged violations were defendants' conspiring to interpose barriers against direct dealings between the producers and the stations and attempting to monopolize the business of furnishing programs. Crimpers got in the way and defendants allegedly made it suffer for trying to do so." *724 F.2d at 294*.

B. *Cablevision's Refusal to Sublicense "SportsChannel" to HTVC and the Teams' Liability*

The only other respect in which the teams are accused of violating the antitrust laws is their alleged complicity in Cablevision's refusal in 1982 to grant a "SportsChannel" license to HTVC. The allegation reads that the teams "refused to enable" plaintiffs **[**41]** to receive "SportsChannel" from Cablevision. The short answer to this claim is simply that the teams had no legal right to affect Cablevision's sublicensing decision one way or the other. Cablevision did not need the teams' consent "to effectuate [its] determination not to deal" with HTVC. *Reisner v. General Motors Corp., 671 F.2d 91, 99* (2d Cir.), *cert. denied*, *459 U.S. 858, 74 L. Ed. 2d 112, 103 S. Ct. 130 (1982)*.

The mere fact that plaintiffs allege a conspiracy, the specific intent of which was to harm them, does not save their complaint against the teams. As the Court stated in *Associated General Contractors, 459 U.S. at 537*:

> ***HN7***[] . . . an allegation of improper motive, although it may support a plaintiff's damages claims under § 4, is not a panacea that will enable any complaint to withstand a motion to dismiss. Indeed, in *McCready*, we specifically held: "The availability of the § 4 remedy to some person who claims its benefits is not a question of the specific intent of the conspirators." *457 U.S., at 479*. [Footnotes omitted.]

Plaintiffs' standing in this case turns on the relationship between the teams' actions and plaintiffs' alleged injury, **[**42]** not on the particular motive plaintiffs attribute to the teams. To repeat, the plaintiffs have not established a nexus adequate to support standing. In addition, there is no evidence that the teams attempted to influence Cablevision to defeat plaintiffs' efforts in 1982 to obtain "SportsChannel." To the contrary, the evidence shows that it was the plaintiffs who actively solicited the teams' assistance in acquiring "SportsChannel" and that in response to the *plaintiffs*' solicitation various team officials made inquiry of Cablevision. Such conduct hardly raises an inference of causation or conspiracy.

Nor is it enough for plaintiffs to point to similar exclusivity agreements by the **[*498]** teams with Cablevision. Such evidence indicates "nothing more than parallel business behavior" which, "standing alone, is insufficient to give rise to an inference of an agreement among the defendants" nor to an inference of causative conduct by the defendants. *Windy City Circulating Co., Inc. v. Charles Levy Circulating Co., 550 F. Supp. 960, 965 (N.D.Ill. 1982)*.

C. *Failure to Demand Rights from the Teams*

Assuming, *arguendo*, that plaintiffs can establish a causal link between **[**43]** the teams' conduct and the alleged loss of subscribers, plaintiffs' claims against the teams based on the exclusive contracts with Cablevision must fail for an additional reason. The teams stand accused, essentially, of refusing to grant plaintiffs cablecast rights in furtherance of a conspiracy with Cablevision to monopolize cable television trade in Huntington. Paragraph 40 of the complaint alleges, as a predicate to all the sports claims, that "plaintiffs have . . . requested several defendant Teams to grant plaintiff cablecast rights *on the same basis* that Teams have granted such rights to [Cablevision]. Defendant Teams, without business justification and in furtherance of the conspirators' aims, have refused to deal with plaintiffs." (Emphasis added.) The record, however, clearly demonstrates that plaintiffs did not seek rights "on the same basis" that the teams granted Cablevision. In his affidavit in opposition to defendants' motion, plaintiff Nishimura acknowledges that plaintiffs were never interested in, much less sought, rights to produce and distribute the teams' games on an exclusive, metropolitan-wide basis. Yet that is exactly the basis upon which the teams granted **[**44]** rights to Cablevision. Plaintiffs were solely interested in obtaining rights to cablecast the teams' games over HTVC in Huntington. In reality, plaintiffs wished to purchase a product entirely different from the one the teams were offering. ***HN8***[] Absent a demand to purchase that which is the subject of an alleged refusal to deal, there can be no recovery under the antitrust laws. *Lawlor v. National Screen Service Corp., 270 F.2d 146, 154 (3d Cir. 1959)*, *cert. denied*, *362 U.S. 922, 4 L. Ed. 2d 742, 80 S. Ct. 676 (1960)*; *Webster Rosewood Corp. v. Schine Chain Theatres, Inc., 263 F.2d 533, 536* (2d Cir.), *cert. denied*, *360 U.S. 912, 3 L. Ed. 2d 1261, 79 S. Ct. 1296 (1959)*; *J.J. Theatres, Inc. v. Twentieth Century-Fox Film Corp., 212 F.2d 840, 845 (2d Cir. 1954)*; *Milwaukee Towne Corp. v. Loew's, Inc., 190 F.2d 561, 568 (7th Cir. 1951)*, *cert. denied*, *342 U.S. 909, 72 S. Ct. 302, 96 L. Ed. 680 (1952)*; *Gordon v. New York Stock Exchange, Inc., 366 F. Supp. 1261, 1263 (S.D.N.Y. 1973)*, *aff'd*, *498 F.2d 1303 (2d Cir. 1974)*, *aff'd*, *422 U.S. 659, 45 L. Ed. 2d 463, 95 S. Ct. 2598 (1975)*. *See* *Moose Lodge No. 107 v. Irvis, 407 U.S. 163, 168, 32 L. Ed. 2d 627, **[**45]** 92 S. Ct. 1965 (1972)*.

There is another flaw in plaintiffs' demands. They were not only inadequate but were not timely. The record shows that at most plaintiffs' demands for cablecast rights from the teams consist of two letters and a few telephone calls from Seth Morrison, who then served as Program Director for HTVC in 1980. In his affidavit Morrison states that he knew at the time of his contacts that both teams had already granted exclusive rights to Cablevision. No demands which led to refusals were ever made upon the Nets and Islanders. In his deposition, Nishimura unequivocally states that he was seeking rights only "for defendant teams' programs carried on SportsChannel as SportsChannel provides to other cable companies. . . . The rights we were seeking prior to the commencement of the lawsuit was with SportsChannel." Depos. of James Y. Nishimura, at 502-05, 517-18. Other than in 1976 when the Islanders and Nets did grant cablecast rights to plaintiffs (although the contracts were never implemented due to litigation), there is no evidence that plaintiffs ever demanded cablecast rights from the teams at any of the numerous times when the teams were contractually free to consider **[**46]** offers from parties other than Cablevision. In his affidavit, however, filed after the motion for summary judgment was instituted, **[*499]** Nishimura states that he periodically attempted to attain rights to provide games of the individual teams but that from his experience with the teams and lack of information, he was "foreclosed" and "frozen out" from that possibility, and that it would have been futile to make further direct communications with the teams. [19] **[**47]** While this may be true, after the contracts were signed, there is no evidence that such was true before the contracts were executed. [20] In sum, the undisputed evidence demonstrates that plaintiffs failed to demand at any time the same rights which are the subject of the claimed refusal to deal by the teams and, therefore, the teams cannot be held liable under the antitrust laws.

D. *Plaintiffs' Requests for Additional Discovery*

---

[19] To the extent that this ex post facto affidavit contradicts or is inconsistent with the deposition, the court believes it should not be given sufficient weight to raise an issue, particularly in view of the other evidence. *See* *Reisner v. General Motors Corp., 671 F.2d 91, 93 (2d Cir. 1982)*.

[20] It is recognized that demand is not necessary where it is futile, but such was not the case before the contracts were signed. *See Royster Drive-In* *Theatres v. American Broadcasting-Paramount Theatres, Inc., 268 F.2d 246, 251* (2d Cir.), *cert. denied*, ***361 U.S. 885, 4 L. Ed. 2d 121, 80 S. Ct. 156 (1959)***; *accord,* *Cleary v. National Distillers & Chemical Corp., 505 F.2d 695 (9th Cir. 1974)*.

Pursuant to *Rule 56(f) of the Federal Rules of Civil Procedure*, plaintiffs have submitted a dense, 50-page affidavit containing 46 separate discovery requests for additional documents and depositions which they believe must be granted in order to present material issues of fact essential to justify their opposition to defendants' motion. Many of the requests are specific, many are blunderbuss, and many seek discovery previously refused by the court. All of the requests share one element in common: immateriality to the dispositive issues in this case. Throughout this litigation plaintiffs' demand for discovery has been all-encompassing. The discovery **[**48]** to date has been far-reaching and voluminous, consisting of thousands of pages of documents and over two thousand transcript pages of depositions. The numerous contracts between the teams and Cablevision have been disclosed virtually in full text despite defendants' legitimate concerns over the dissemination of sensitive and confidential business information. They now seek additional evidence, such as depositions of the officers of Cablevision, drafts of the original contracts, preliminary negotiations with respect to the key provisions of the contracts, and evidence of conversations with representatives of the various teams before the execution of the contracts. None of the discovery sought, which in some instances is repetitious, cumulative and peripheral, is relevant as far as the teams are concerned. As stated by Mr. Justice Marshall in *First National Bank of Arizona v. Cities Service Co., 391 U.S. at 298*, in affirming a summary judgment:

> But in this case petitioner was attempting, in effect, to obtain discovery of peripheral aspects of Cities' alleged participation in the conspiracy, after having failed, despite already substantial discovery, to obtain any significant **[**49]** evidence of conspiracy for the period during which it was alleged to have directly injured him.

Plaintiffs are unable to show how any additional discovery could supply an inference of "conspiratorial" or causative conduct any stronger than that provided by the contracts themselves and the testimony in the affidavits and depositions already taken.

The court believes nothing new can be obtained by further discovery which will show causative conduct on the part of the teams, permitting recovery against them under § 4 of the Clayton Act.

E. *Nishimura's and CSC's Claims*

Defendants have also moved to dismiss all claims asserted by plaintiffs Nishimura and CSC on the ground that they are only suing in their capacities as, **[*500]** respectively, stockholder/employee and stockholder of the two remaining corporate plaintiffs, HTVC and HEP. It is well settled that ***HN9***[] a stockholder who suffers loss due to injury to his corporation may not recover damages under the antitrust laws because his "injury as a stockholder [is] indirect, remote and consequential." *Associated General Contractors, 459 U.S. at 533-34*; *Vincel v. White Motor Corp., 521 F.2d 1113, 1119 (2d Cir. 1975)*. **[**50]** Any injury to Nishimura as an employee of HTVC and HEP stands on the same footing. *Bichan v. Chemetron Corp., 681 F.2d 514 (7th Cir. 1982)*; *Saxe, Bacon & Bolan, P.C. v. Martindale-Hubbell, Inc., 521 F. Supp. 1046 (S.D.N.Y. 1981)*. The cases cited by plaintiffs, such as *Perkins v. Standard Oil Company of California, 395 U.S. 642, 649-50, 23 L. Ed. 2d 599, 89 S. Ct. 1871 (1969)*, are inapposite because here, unlike in *Perkins*, no injury other than that derived from stockholder or employee status is alleged. The defendants' motion must therefore be granted.

V. *Conclusion*

Plaintiffs have had extensive discovery for eighteen months and have failed to show that its injury, the alleged loss of existing and prospective subscribers in Huntington, was proximately caused by any violation of the antitrust laws by any of the defendant teams. No question of material fact on the issues of the propriety of the demand upon the teams, the causal link between the teams' actions and plaintiffs' injuries, plaintiffs' standing to sue the teams, or the teams' participation in a conspiracy appears from the depositions and affidavits to support the allegations in the pleadings, although **[**51]** participation in a conspiracy would be insufficient in the absence of a causal link.

For the reasons set forth, summary judgment should be granted (i) dismissing Counts V-IX of the complaint in their entirety; (ii) dismissing Counts I-IV and XII of the complaint insofar as they claim that the sports team defendants conspired with Cablevision to deny plaintiffs "SportsChannel" programming, that the teams unlawfully refused to grant television production rights to plaintiffs, or that the teams acted wrongfully in granting such rights to Cablevision; and (iii) dismissing all claims asserted by plaintiffs Communications Systems Corporation and James

Y. Nishimura. Because the sports teams are not defendants in any of plaintiffs' other claims, they should be dismissed from this action.

SO ORDERED.

Innovation Data Processing, Inc. v. International Business Machines Corp.

United States District Court for the District of New Jersey

October 25, 1984

Civil Action No. 83-1452

Reporter
603 F. Supp. 646 *; 1984 U.S. Dist. LEXIS 22472 **

INNOVATION DATA PROCESSING, INC., etc., Plaintiff, v. INTERNATIONAL BUSINESS MACHINES CORPORATION, etc., Defendant

Core Terms

tie-in, rule of reason, anti-competitive, tying arrangement

Counsel: **[**1]** Frederick L. Whitmer, Esq., Pitney, Hardin, Kipp & Szuch, Morristown, New York, for Plaintiff.

Edward A. Zunz, Jr., Esq., Riker, Danzig, Scherer & Hyland, Morristown, New York, Robert F. Mullen, Esq., Cravath, Swaine & Moore, New York, New York, for Defendant.

Judges: Ackerman, District Judge.

Opinion by: ACKERMAN

Opinion

[*647] ACKERMAN, District Judge.

This is an antitrust action which was brought by the plaintiff Innovation Data Processing, Inc. against International Business Machines Corp. (IBM) seeking to enjoin IBM from marketing a new piece of computer software called Installation Productivity Option "J" (IPO-J).

As I pointed out in my previous decision, which was rendered on March 12, 1984, Innovation alleged that IPO"J" constituted a tie-in with an IBM software product known as Data Facilities Data Set Services (DFDSS). On the aforementioned date, I held that plaintiff had failed to demonstrate the existence of a per se unlawful tie-in arrangement, but found that the plaintiff was still entitled to proceed under its claim that defendant IBM's practices violated the general standards of the Sherman and Clayton Acts. *See Innovation Data Processing v. International Business* **[**2]** *Machines, 585 F. Supp. 1470 (D.N.J. 1984)*.

IBM now brings this motion for reconsideration of its motion for summary judgment upon the issue of whether Innovation may proceed under its alternative general standards claim. In the alternative IBM, has moved for certification of this issue to the Court of Appeals for the Third Circuit pursuant to *28 U.S.C. Section 1292(b)*.

Rule 12(I) of the Rules of the United States District Court for the District of New Jersey provides for reconsideration only when counsel has presented new factual matters or controlling decisions which the Court has overlooked.

IBM contends that under this Court's previous holding that IBM did not tie the DFDSS to the IPO"J" system, there is no anti-competitive conduct that remains to be tested under the "rule of reason" standard. In support of its motion, IBM cites a number of cases which support its contention that the failure to establish a tie-in must cause Innovation's claims to fail under a rule of reason theory. Without the key element of a tie-in, the extent of any effect on competition and the reasonableness of any restraint of trade are irrelevant. *See, Electroglas, Inc. v. Dynatex Corp., 497 F. Supp.* ***[**3]*** *97, 106 (N.D. Cal. 1980)*.

In a case decided by the United States Supreme Court only a few weeks after my previous decision, the Court dealt with the problem of tie-ins in connection with a contract that had been signed by a hospital in Louisiana with a group of anesthesiologists. I have read that decision and it is my determination that my denial of summary judgment as to plaintiff's "general standards" claim should be reconsidered. *See Jefferson Parish Hospital v. Hyde, 466 U.S. 2, 52 U.S.L.W. 4385, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)* which is to the best of my knowledge, the Court's most recent pronouncement of the state of tying arrangements in ***antitrust law***. I believe that the rationale employed by the Court requires that I reanalyze plaintiff's alternative theory.

A threshold question which must be resolved is whether by March 12 opinion held only that no *per se* tie-in had been established as a matter of law, or whether it held there was simply no tie-in. A finding of no *per se* tie-in is a conclusion of law predicated upon a finding that three distinct elements exist. The three distinct elements that must be found are:

1. the conduct in question must be a tie-in;

[4]** **[*648]** 2. the seller must have "sufficient economic power with respect to the tying product to appreciably restrain free competition in the market of the tied product," and

3. a "not insubstantial" amount of interstate commerce must be affected.

See Northern Pacific Railway v. United States, 356 U.S. 1, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958), and *Ungar v. Dunkin' Donuts, 531 F.2d 1211, 1223-24 (3d Cir. 1976)*, *cert. denied 429 U.S. 823, 97 S. Ct. 74, 50 L. Ed. 2d 84 (1977)*.

As *Jefferson Hospital* pointed out, "A *per se* rule focuses on the probability of anti-competitive consequences," because "the character of the restraint produced by such an arrangement is considered a sufficient basis for presuming unreasonableness without the necessity of any analysis of the market context in which the arrangement may be found." *Jefferson Hospital 466 U.S. at 9*. "*Per se* condemnation - condemnation without inquiry into actual market conditions - is only appropriate if the existence of forcing is probable." *Id. at 15*.

Where a *per se* claim fails, plaintiff does not necessarily fail altogether in his claim. He simply loses the benefit of the presumption of **[**5]** harm provided by the *per se* rule and must show the actual effect of the alleged anti-competitive practice on the market. *See Fortner Enterprises v. U.S. Steel, (I), 394 U.S. 495, 500, 22 L. Ed. 2d 495, 89 S. Ct. 1252 (1968)*; and *Jefferson Hospital 52 U.S.L.W. at 4392, 466 U.S. 2*.

The standard guiding an inquiry into the purposes and effects of the practices involved in order to establish whether the standards of the Sherman Act have been violated, is known as the "rule of reason." *See U.S. Steel Corp. v. Fortner Enterprises, (II), 429 U.S. 610, 612*, Footnote 1, *51 L. Ed. 2d 80, 97 S. Ct. 861 (1977)*.

Crucial to whether a *per se* or "rule of reason" inquiry is made, however, is a preliminary showing of some practice or behavior by the defendant that could provide the basis for some anticompetitive effect. The practice alleged by the plaintiff here is that defendant tied the sale of one product to the sale of another. No other behavior is pleaded or can even be inferred from either the briefs or affidavits in this matter. Thus, before plaintiff may proceed on a *per se* analysis, or a "rule of reason" analysis, there must first be a finding that a tie-in is present. **[**6]** Thus, I now turn to my March 12 opinion to determine whether my finding that no *per se* illegal tie-in existed was predicated upon a finding that no tie-in existed in the first place.

In my analysis of the *per se* tie-in at issue, I proceeded under the three-prong analysis of *Northern Pacific Railway* described *supra*. (*See also* Innovation v. IBM, at 1475. The first element I examined was, of course, whether a tie-in existed. I found that, "IBM customers are for the purposes of the Sherman and Clayton Acts free to take either the DFDSS program or the IPO"J" by itself and that on this basis alone there is no illegal tying arrangement." *See* Innovation v. IBM at 1475.

The opinion went on, however, to describe three uncontradicted facts that confirmed this conclusion. "First, any IBM customer is free to license the DFDSS program at any time by itself. Second, any IBM customer can order IPO"J" in a segmented version which does not include the DFDSS program. And third, any IBM customer who orders the DFDSS program, whether by itself or together with either a segmented or integrated version of IPO"J", is free to cancel the license for the program at any time, paying **[**7]** the license fee only for the period of usage." *Id*.

On page 1476 I stated: "It is clear that IBM's actual conduct here cannot constitute an unlawful tying arrangement." At no point in my decision did I reach the issues raised by the second and third elements of a *per se* claim -- the economic power of the defendant and the amount of interstate commerce affected.

Thus, my finding of no *per se* tying claim was predicated on the first element **[*649]** of the analysis - the existence of a tie-in itself. The *Jefferson Hospital* opinion in its analysis of the relevant markets to be considered in the economic effects analysis of a tie-in assumes that a finding of a tie-in has already been made before any inquiry into the adverse economic effects can proceed. For example, on page 4389, *466 U.S. at 18* of that opinion the Court said: "any inquiry into the validity of a tying arrangement must focus on the market or markets in which the two products are sold . . ." and Justice O'Connor's concurrence stated: "the Court has never been willing to say of tying arrangements, as it has of price fixing, division of markets and other agreements subject to *per se* analysis, that they **[**8]** are always illegal, without proof of market power or anticompetitive effect." Although, as plaintiff points out, Justice O'Connor states in footnote 2, page 4394, *466 U.S. at 35*, that "arrangements largely indistinguishable from tie-ins are generally analyzed under the rule of reason," the assumption is that some practice has been found to exist that could allegedly be anticompetitive. As there has been no tie-in between IPO"J" and DFDSS, there is no practice to analyze even under a rule of reason.

The *Jefferson Hospital* rationale implicitly affirms the holding in *Electroglas, supra*, where the Court stated at page 106: "Plaintiffs correctly maintain that summary judgment against them on *per se* tying claims does not necessarily invalidate their tying claims under a rule of reason theory. . . . However, the failure to establish the existence of a tie-in must cause the tying claims to fail under either theory. Without this key element, the extent of any effect on competition and reasonableness of any restraint are irrelevant."

In finding the basis for plaintiff's claim under a rule of reason to be nonexistent, I am mindful of the Supreme Court's cautioning that summary judgment **[**9]** procedures should be used sparingly in complex antitrust litigation. I mentioned this on March 12 citing then, and now, to *Poller v. Columbia Broadcasting System, Incorporated, 368 U.S. 464, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962)*. There are, however, circumstances which authorize summary disposition as where plaintiff fails in an antitrust action to show sufficient facts to raise genuine issues for trial. *See* *First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 289, 20 L. Ed. 2d 569, 88 S. Ct. 1575 (1967)*, *see also* *Electroglas, supra.* For the aforementioned reasons, I accordingly grant defendant IBM's motion for summary judgment and deny plaintiff Innovation's claim under a "rule of reason" theory. Because of this finding there is no need to reach the § 1292 certification issue raised in defendant's motion.

Antitrust & Trade Law > Sherman Act > General Overview

HN1[] **Antitrust & Trade Law, Sherman Act**

A parent corporation and its wholly owned subsidiary, though separately incorporated, are incapable of conspiring in violation of *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*. The intra-enterprise conspiracy doctrine affords undue significance to the mere fact of separate incorporation while ignoring the common objectives of parent and subsidiary. It is the very nature of their relationship that a subsidiary acts for the benefit of a parent. If a parent and a wholly owned subsidiary do "agree" to a course of action, there is no sudden joining of economic resources that had previously served different interests. Rather, a parent's control over its subsidiary, whether or not actually manifested, ensures their unity. The mere coordinated activity of a parent and its wholly owned subsidiary is completely unilateral, never susceptible of a "conspiracy" label.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN2[] **Antitrust & Trade Law, Sherman Act**

A conspiracy between two subsidiaries in no way implicates the rejected intra-enterprise conspiracy doctrine, which applies only where a parent is an alleged co-conspirator.

Opinion by: TURK

Opinion

[*204] MEMORANDUM OPINION

TURK, Chief Judge.

On April 7, 1982, Plaintiffs Rayfeal Condread Dobbins and Mary Ellen Dobbins brought their action against Ford Motor Company (Ford Motor) and its wholly owned subsidiaries, Ford Motor Credit Company (Ford Credit) and Ford Leasing Development Company (Ford Leasing), for allegedly conspiring against Plaintiffs in violation of *Va.Code § 18.2-500*. (Dobbins Complaint, para. 17). The object of the alleged conspiracy was, Plaintiffs claim, to prevent them from subleasing the premises occupied by Ray Dobbins Lincoln-Mercury, Inc. By an Amended Complaint of January 31, 1983, Plaintiff Ray Dobbins Lincoln-Mercury, Inc. (the Dealership), sought from Ford Motor and Ford Credit damages resulting from an alleged further conspiracy against the Dealership.

The court's summary judgment order of August 16, 1984, operated as a dismissal of the case as to Ford Motor and disposed altogether of five of the six counts **[**2]** in the Amended Complaint. [1] Surviving that order are only those portions of the Dobbins' Complaint and Count VI of the Amended Complaint asserting the involvement of Ford Leasing and Ford Credit in conspiracies with Ford Motor against Plaintiffs. The two subsidiaries have now moved the court to dismiss these remaining causes of action for failure to state a claim upon which relief can be granted.

Defendants argue, and the court agrees in part, that the Supreme Court's recent decision in *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*, is dispositive of the remaining claims. ***HN1***[] The Court held there that a parent corporation and its wholly owned subsidiary -- though separately incorporated -- are incapable of conspiring in violation of *§ 1* of the Sherman Act. **[**3]** *15 U.S.C. § 1*. The intra-enterprise conspiracy doctrine, the court reasoned, affords undue significance to the mere fact of separate incorporation while ignoring the common objectives of parent and subsidiary. *104 S. Ct. at 2743*. It is the very nature of their relationship that "the subsidiary acts for the benefit of the parent . . . . If a parent and a wholly owned subsidiary do 'agree' to a course of action, there is no sudden joining of economic resources that had previously served different interests." *Id. 104 S. Ct. at 2742*. Rather, the parent's control over its subsidiary, whether or not actually manifested, ensures their unity. *Id. 104 S. Ct. at 2742*. The mere coordinated activity of a parent and its wholly owned subsidiary is completely unilateral, never susceptible of the "conspiracy" label.

While admitting that Ford Credit and Ford Leasing are wholly owned subsidiaries of Ford Motor, (Dobbins Complaint, paras. 2 and 3), Plaintiffs contend that *Copperweld* is inapposite simply because it addressed specifically conspiracy under the **[*205]** Sherman Act; Plaintiffs in the instant case allege, on the other hand, violation of a state conspiracy statute. The court **[**4]** is unpersuaded by this superficial distinction. Contrary to Plaintiffs' assertions, *Copperweld* is not so discretely framed as to preclude its application in all but Sherman Act cases. The Supreme Court's guidance being uncontradicted by any authority regarding the particular Virginia statute, the *Copperweld* logic must control. Consequently, a parent corporation and its wholly owned subsidiary are equally incapable of conspiring under each of the two statutes.

---

[1] In its order accompanying this opinion, the court denies the Dealership's motion for relief from the August 16 order. Grant of that motion would also have preserved Count IV of the Amended Complaint.

Defendants' reliance on *Copperweld* is ill-placed, however, as to any allegation of conspiracy between the two subsidiaries. ***HN2***[] Such a conspiracy in no way implicates the rejected intra-enterprise conspiracy doctrine, which applies only where the parent is an alleged co-conspirator. It is unclear from the Complaint whether the Dobbins allege a conspiracy not only between Ford Motor and each of its wholly owned subsidiaries, but also between the two subsidiaries, Ford Credit and Ford Leasing. To the extent that they allege the latter, *Copperweld* is of no effect.

Because *Copperweld* has made it impossible for Plaintiff Ray Dobbins Lincoln-Mercury, Inc., to prove the existence of a conspiracy between Ford Motor **[**5]** and its wholly owned subsidiary, Ford Credit, Count VI of the Amended Complaint -- now comprising all of the Dealership's claims -- is properly dismissed. This same reasoning supports dismissal of that portion of the Dobbins' claims alleging that Ford Credit and Ford Leasing conspired with their parent, Ford Motor. Insofar as the Dobbins allege a conspiracy between Ford Credit and Ford Leasing, *Copperweld* is inapplicable and the claim should not be dismissed.

The clerk is directed to send a certified copy of this Memorandum Opinion and Order to counsel of record.

LexisNexis® Headnotes

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN1[] **Exemptions & Immunities, Parker State Action Doctrine**

Municipalities, simply by their status as such, do not share the state's antitrust immunity.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Energy & Utilities Law > Antitrust Issues > Antitrust Immunity

Governments > Public Improvements > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN2[] **Exemptions & Immunities, Parker State Action Doctrine**

Municipal conduct is unprotected under the rule that states are immune from federal antitrust laws unless the city acts pursuant to a state policy to displace competition with regulation or monopoly public service.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN3[] Exemptions & Immunities, Parker State Action Doctrine

Cities and other local governmental entities are protected by the state's antitrust immunity so long as their conduct is authorized by a clearly articulated and affirmatively expressed state policy.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Governments > Local Governments > Claims By & Against

HN4[] Exemptions & Immunities, Parker State Action Doctrine

Though neutrality is not enough in determining municipal immunity from antitrust laws, something less than strict compulsion is necessary to extend immunity to local government. Rather, to determine that immunity applies, a court need only find that, from the authority given a governmental entity to operate in a particular given area, that the legislature contemplated the kind of action complained of.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Governments > Local Governments > Claims By & Against

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN5[] Parker State Action Doctrine, Local Governments & Private Parties

The requirement of "active state supervision" applies only to private persons seeking protection under the doctrine that federal antitrust laws do not apply to states. Municipalities, however, need make no showing of supervision by the state in suits challenging traditional municipal functions.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN6[] Exemptions & Immunities, Parker State Action Doctrine

To qualify for federal ***antitrust law*** immunity, a city need only show that it is acting pursuant to a clearly articulated and affirmatively expressed state policy to displace competition, and that the legislature contemplated that that policy might be implemented by the kind of actions challenged as anticompetitive.

Governments > Local Governments > Duties & Powers

HN7[] Local Governments, Duties & Powers

See *Cal. Gov't Code § 66757*.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Governments > Local Governments > Duties & Powers

Governments > State & Territorial Governments > Legislatures

HN8[] **Exemptions & Immunities, Parker State Action Doctrine**

Federal antitrust laws do not require that state legislatures define the options available to municipalities with greater specificity than is displayed by *Cal. Gov't Code § 66757*.

Governments > Local Governments > Duties & Powers

HN9[] **Local Governments, Duties & Powers**

The California Legislature has affirmatively addressed the subject of local trash collection and has specifically authorized municipalities to grant exclusive trash collection franchises, without competitive bidding, pursuant to *Cal. Gov't Code § 66757*.

Opinion by: POOLE

Opinion

[*1371] POOLE, Circuit Judge:

This case presents the issue whether California cities are exempt from federal antitrust scrutiny when granting exclusive trash collection franchises.

I.

Plaintiffs-appellees are two trash removal companies, Hudson & Associates and G. B. Services, and their individual owners. Defendants-appellants are the City of Chula Vista, California, and Chula Vista Sanitary **[**2]** Services (CVSS), a competing private trash collection firm, which since 1971 has held a contract with the city of Chula Vista to provide all commercial and residential trash collection services within the city limits. This exclusive trash-collection franchise is protected by city ordinance. Chula Vista Municipal Code § 8.24060.

Beginning in late 1981, plaintiffs wrote to officials of Chula Vista seeking to compete **[*1372]** for contracts to provide trash collection in that city. They received no answer.

Instead, in July, 1982, Chula Vista renewed its exclusive trash collection contract with CVSS for five years. The renewal was made without competitive bidding. In December, 1982, plaintiffs filed the present action, alleging that the exclusive franchise granted to CVSS violates both federal and state antitrust laws. On cross-motions for summary judgment and partial summary judgment, the district court held that the city's actions did not constitute protected state action under *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*, and granted partial summary judgment to plaintiffs. Because the applicability of the state action exemption to **[**3]** the city is a separable and dispositive issue, this court granted permission for interlocutory appeal. *28 U.S.C. § 1292(b)*. We reverse.

II.

The effect of federal antitrust laws on local and municipal governments has been of growing concern in light of two relatively recent decisions of the U.S. Supreme Court. *Lafayette v. Louisiana Power & Light Company, 435 U.S. 389, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978)*; *Community Communications Co., Inc. v. Boulder, 455 U.S. 40, 70 L. Ed. 2d 810, 102 S. Ct. 835 (1982)*.

In *Parker v. Brown, 317 U.S. 341, 352, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*, the Court held that Congress did not intend federal antitrust laws to apply to the acts of States "as sovereigns." More than thirty years later, however, the *Lafayette* and *Boulder* decisions limited the *Parker* state-action doctrine and declared that ***HN1***[] municipalities, "simply by their status as such," do not share the State's antitrust immunity. In *Lafayette*, the Court held that a city could be sued for alleged antitrust violations committed by its wholly-owned municipal power company. The plurality of the **[**4]** Court in *Lafayette* stated that such ***HN2***[] municipal conduct is unprotected by *Parker v. Brown* unless the city acts "pursuant to [a] state policy to displace competition with regulation or monopoly public service." *435 U.S. at 413*. Adopting language from cases that had applied *Parker v. Brown* to actions of state agencies, *see* Bates v. State Bar of Arizona, 433 U.S. 350, 53 L. Ed. 2d 810, 97 S. Ct. 2691 (1977), the plurality stated that **HN3**[] cities and other local governmental entities would be protected by the state's antitrust immunity so long as their conduct was authorized by a "clearly articulated and affirmatively expressed * * * state policy." 435 U.S. at 410.

In *Boulder*, a majority of the Court adopted the position of the *Lafayette* plurality: that the municipal acts are exempt from federal antitrust standards only when they are done pursuant to a "clearly articulated and affirmatively expressed" state policy. 455 U.S. at 51. The Court rejected the City's contention that, as a home rule city under the Colorado constitution with "full right of self-government in both local and municipal affairs," its own regulation **[**5]** of local cable television suppliers was the equivalent to that of the state. 455 U.S. at 53. Far from demonstrating a clearly articulated and affirmatively expressed state policy, the Court explained, the home rule provision showed only a "position * * * of mere *neutrality* respecting the municipal actions challenged as anticompetitive." 455 U.S. at 55. "Acceptance of such a proposition -- that the general grant of power to enact ordinances necessarily implies state authorization to enact specific anticompetitive ordinances -- would wholly eviscerate the concepts of 'clear articulation and affirmative expression' that our precedents require." 455 U.S. at 56.

The foregoing cases, however, did not hold that the challenged municipal conduct need be inescapably mandated by the State. *See* Turf Paradise Inc. v. Arizona Downs, 670 F.2d 813, 823 n. 8 (9th Cir. 1982). **HN4**[] Though neutrality is not enough, something less than strict compulsion is necessary to extend immunity to local **[*1373]** government. Rather, to determine that *Parker v. Brown* immunity applies, a court need only find that, "from the authority given a governmental **[**6]** entity to operate in a particular given area, that the legislature contemplated the kind of action complained of." Lafayette, 435 U.S. at 415 (opinion of Brennan, J.). *See also* Boulder, 455 U.S. at 55.

Boulder explicitly left open the issue whether a municipality must also show that its actions were "actively supervised by the State," as had been suggested by the plurality opinion in *Lafayette.* Lafayette, 435 U.S. at 410; Boulder, 455 U.S. at 51, n. 14. Though the Supreme Court has not addressed this question, this court and several other circuits have held that **HN5**[] the requirement of "active state supervision" applies only to private persons seeking protection under the *Parker v. Brown* doctrine. *See, e.g.,* California Liquor Dealers v. Midcal Aluminum, 445 U.S. 97, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980). Municipalities, however, need make no showing of supervision by the State in suits challenging "traditional municipal functions." Golden State Transit Corp. v. City of Los Angeles, 726 F.2d 1430, 1434 (9th Cir. 1984); Town of Hallie v. City of Eau Claire, 700 F.2d 376, 383-84 (7th Cir. 1983) **[**7]** *cert. granted*, *467 U.S. 1240, 104 S. Ct. 3508, 82 L. Ed. 2d 818 (1984)*; Gold Cross Ambulance & Tran. v. City of Kansas City, 705 F.2d 1005, 1014 (8th Cir. 1983).

Thus, **HN6**[] to qualify for *Parker v. Brown* immunity, a city need only show that it is acting pursuant to a clearly articulated and affirmatively expressed state policy to displace competition, and that the legislature contemplated that that policy might be implemented by the kind of actions challenged as anticompetitive. Golden State Transit Corp. v. City of Los Angeles, 726 F.2d 1430, 1433 (9th Cir. 1984) (Los Angeles taxicab regulation found to be supported by "clearly articulated and affirmatively expressed state policy").

III.

The present case poses no close questions of legislative intent. The State of California has plainly established a "clearly articulated and affirmatively expressed" policy that supports Chula Vista's grant of an exclusive trash hauling contract to CVSS. In particular, section 66757 of the California Government Code explicitly authorizes the very actions taken by Chula Vista. It states:

> **HN7**[] Notwithstanding any other provisions of law, **[**8]** each * * * city * * * may determine * * * (b) whether [solid waste handling] services are to be provided by means of non-exclusive franchise, contract, license, permit, or otherwise, either with or without competitive bidding, or, if in the opinion of its governing body, the public health, safety, and well-being so require, *by partially or wholly exclusive franchise, contract, license, permit, or otherwise either with or without competitive bidding*. (emphasis added).

The California Legislature unquestionably "contemplated" the measures adopted by Chula Vista.

Despite this statute's specificity, appellants seek to analogize it to the broad home rule provision at issue in *Boulder*. Appellees argue that § 66757 falls short of the standards required by *Lafayette* and *Boulder* because it fails to describe the particular regulatory procedure that municipalities must adopt if they choose to displace competition in the trash removal market. Because of this failure, appellees contend, § 66757 simply abdicates state policy-making responsibility to local governments in the manner forbidden by the *Boulder* decision.

We disagree with appellees' interpretation **[**9]** of *Boulder*. ***HN8***[] Federal antitrust laws do not require that state legislatures define the options available to municipalities with greater specificity than is displayed by § 66757. The Supreme Court's holding in *Boulder* is not so rigid. The "general grant of authority to enact ordinances" in *Boulder* was held insufficient to provide *Parker v. Brown* immunity because it did **[*1374]** not show "an affirmative addressing of the subject [of cable television regulation] by the State." *Boulder, 455 U.S. at 55*. By contrast, ***HN9***[] the California Legislature has affirmatively addressed the subject of local trash collection and has specifically authorized municipalities to grant exclusive trash collection franchises, without competitive bidding, as Chula Vista has done. The legislature undeniably contemplated that municipalities would grant such franchises, and it approved their doing so.

IV.

Appellees further argue that Chula Vista's supervision of CVSS's rates has been inadequate and that the city has, in effect, relegated uncontrolled monopoly power to CVSS, a private company. ***HN10***[] The actions of a private person are not exempt from federal antitrust laws under **[**10]** *Parker v. Brown* unless actively supervised by the State. *California Liquor Dealers v. Midcal Aluminum, 445 U.S. 97, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*. Appellees claim that no such supervision of CVSS was provided. We disagree.

In *Midcal*, the Court held that a resale price maintenance scheme did not constitute protected state action where resale prices were filed with, but not reviewed by, a state agency. The Court stated:

> The State neither establishes prices nor reviews the reasonableness of the price schedules; nor does it regulate the terms of fair trade contracts. The State does not monitor market conditions or engage in "pointed reexamination" of the program.

445 U.S. at 105-106. *See also* *Cantor v. Detroit Edison Co. 428 U.S. 579, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 (1976)* (antitrust immunity not conferred on conduct simply because it was incorporated in tariffs filed with public utilities commission).

Here, by contrast, Chula Vista does not passively accept the rate proposals submitted by CVSS. All rate proposals are reviewed by the city finance department and must be approved by vote of **[**11]** the City Council. Unlike the situation in *Midcal*, the City of Chula Vista does review the reasonableness of CVSS's rates, and the rates in effect are directly attributable to action of the city, not mere "acquiesce[nce] in an anticompetitive policy adopted on a private party's initiative." *Benson v. Arizona State Bd. of Dental Examiners, 673 F.2d 272, 275 n. 5 (9th Cir. 1982)*. *See also* *Turf Paradise, Inc. v. Arizona Downs, 670 F.2d 813, 825 (9th Cir. 1982)* (selection of race dates by private contract is state action if subject to thorough investigation by State Racing Commission).

Appellee contends that the review conducted by the city is less intensive than required in a number of public utility ratemaking cases. *See, e.g.,* *Permian Basin Area Rate Cases, 390 U.S. 747, 20 L. Ed. 2d 312, 88 S. Ct. 1344 (1968)*; *Federal Power Commission v. Hope Natural Gas Co., 320 U.S. 591, 88 L. Ed. 333, 64 S. Ct. 281 (1944)*; *Driscoll v. Edison Light & Power Co., 307 U.S. 104, 83 L. Ed. 1134, 59 S. Ct. 715 (1939)*. We find this analogy to be unhelpful. The particular statutory schemes dealt with **[**12]** in those cases are, of course, not at issue here. Nor do we believe that the Sherman Act requires cities to treat all city contractors as public utilities. ***HN11***[] For purposes of *Parker v. Brown* antitrust immunity, the city need only show that it "pointedly reexamines" the proposals submitted by the private party. That requirement has been met here.

V.

The exclusive franchise system for trash collection and removal in this case was instituted in accordance with a clearly articulated and affirmatively expressed state policy, specifically authorizing the displacement of competition and contemplating the adoption of the conduct challenged here as anticompetitive. To the extent that monopoly powers have been granted to private persons, they are actively supervised by municipal officials. Chula Vista's trash collection franchise is immune from antitrust scrutiny under the doctrine of *Parker* ***[*1375]*** *v. Brown*, and the district court's order denying immunity is therefore REVERSED.

Opinion by: GOODWIN

Opinion

[*1282] GOODWIN, Circuit Judge.

Deak-Perera lost its bid to retain the currency exchange concession at Honolulu International Airport when the Hawaii Department of Transportation awarded a five-year exclusive concession to Citicorp, the highest bidder. Alleging violation of federal and state antitrust laws and state bidding laws, Deak-Perera sued the state agency and two of its officials. We affirm the district court's finding that the defendants were entitled to state action immunity from federal antitrust laws. Deak-Perera Hawaii, Inc. v. Department of Transportation, 553 F. Supp. 976 (D. Haw. 1983). **[**2]**

* The Honorable Jesse W. Curtis, Senior United States District Judge for the Central District of California, sitting by designation.

I. *Antitrust immunity*

HN1[] Actions by "'the State acting as sovereign,'" *Hoover v. Ronwin, 466 U.S. 558, 104 S. Ct. 1989, 1998, 80 L. Ed. 2d 590 (1984)*, *quoting* *Bates v. State Bar of Arizona, 433 U.S. 350, 360, 53 L. Ed. 2d 810, 97 S. Ct. 2691 (1977)*, are immune from the federal antitrust laws. If the State of Hawaii was acting in its sovereign capacity when it granted Citicorp the exclusive lease, it is immune from Deak-Perera's antitrust challenge.

The Department of Transportation, which granted the lease, is part of the executive branch of Hawaii state government. Although *Hoover v. Ronwin* declares that state legislatures and state supreme courts exercising legislative powers have antitrust immunity without further investigation, it expressly leaves open the circumstances under which the activities of a state executive branch are entitled to antitrust immunity. *104 S. Ct. at 1995 n.17*.

We hold that the Department's grant of the lease was an action of the State of Hawaii "acting as sovereign" and thus entitled to immunity from the **[**3]** antitrust laws. As the *Hoover* Court notes, the reasoning of *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*, lays the foundation of the doctrine of state-action antitrust immunity. *Parker* refused to construe the Sherman Act as prohibiting a raisin marketing program carried out by state officials pursuant to a statute enacted by the California legislature:

> We find nothing in the language of the Sherman Act or in its history which suggests that its purpose was to restrain a state or its officers or agents from activities directed by its legislature. In a dual system of government in which, under the Constitution, the states are sovereign, save only as Congress may constitutionally subtract from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress.

317 U.S. at 350-351.

As *Hoover* puts it, the rationale of *Parker* rests on "principles of federalism and state sovereignty." *104 S. Ct. at 1995*. These principles entitle the executive branch of the State of Hawaii to state action immunity. ***HN2***[] The Hawaii Constitution **[**4]** creates the executive as a co-equal branch of the state government and provides for the establishment of departments under the supervision of the governor, *Haw. Const. Art. V § 6*; the Department of Transportation is one such department. *Haw. Rev. Stat. § 26-19*. ***HN3***[] The Hawaii Constitution charges the governor with "the faithful execution of the laws." *Haw. Const. Art. V § 5*. In granting Citicorp the challenged lease, ***HN4***[] the Department of Transportation, as the governor's subordinate, was fulfilling its constitutional duty to execute *Haw. Rev. Stat. § 261-4*, which permits the Department of Transportation to establish and operate airports. *Haw. Rev. Stat. §§ 261-4(a)* and *261-7(a)* provide the Department with implied authority to enter into the challenged exclusive lease. That the legislature contemplated an exclusive lease is emphasized by the noninclusion of foreign exchange concessions in *Haw. Rev. **[*1283]** Stat. § 102-2*. That ***HN5***[] statute exempts certain other businesses from bidding requirements for public concessions because of the "danger that such a system of awarding all concessions or concession spaces by bid could result in a monopoly." Act of May 10, 1960, No. 14, § 1, 1960 **[**5]** Hawaii Sess. Laws 16. Here, the required competitive bidding was invited and Citicorp won the competition and obtained a monopoly.

We see no reason why a state executive branch, when operating within its constitutional and statutory authority, should be deemed any less sovereign than a state legislature, or less entitled to deference under principles of federalism. In *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)*, the Supreme Court emphasized the importance of a "clearly articulated and affirmatively expressed" state policy, *id. at 410*, and specifically rejected the argument that "all governmental entities, whether state agencies or subdivisions of a State, are, simply by reason of their status as such, exempt from antitrust laws." *Id. at 408*. However, *Lafayette* involved a government delegation of authority to private parties. We note that this is not a case of private parties imposing competitive restraints in conjunction with state authorities. In such a case the inquiry would be different. *See* *California Retail Liquor Dealers Association v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 63*

L. Ed. 2d 233, 100 S. Ct. 937 (1980); **[**6]** *Benson v. Arizona State Board of Dental Examiners, 673 F.2d 272, 274-76 (9th Cir. 1982)*. [1]

II. *Dismissal of state claim*

There is no federal jurisdiction over Deak-Perera's claim that the state and its officials violated state law. *Pennhurst State School & Hospital v. Halderman, 465 U.S. 89, 104 S. Ct. 900, 911, 79 L. Ed. 2d 67 (1984)*.

Conclusion

Because of our holding on state action immunity, we do not reach the state's constitutional defenses. The district court's grant of summary judgment for the Department is affirmed.

End of Document

HN3[] Antitrust & Trade Law, Sherman Act

In considering antitrust claims, absent any anticompetitive purpose or design to create a monopoly, a business may unilaterally choose those with whom it will conduct business, as well as the terms and conditions of those business dealings. Federal antitrust laws were enacted to prevent anticompetitive conduct, rather than to enforce popular public utility notions of fair dealing. Even a recognized monopolist is not required to deal non-discriminately with would-be purchasers, whether they are in competition or not. Only refusals to deal as a part of a conspiracy to restrain trade or to maintain a monopoly violate the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN5[] **Clayton Act, Claims**

Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation. Even where an antitrust violation is established by the plaintiff or conceded by a defendant, it does not necessarily follow that any person harmed as a result of such conduct is a person injured by reason of the antitrust laws within the meaning of section 4 of the Clayton Act, *15 U.S.C.S. § 15*. Determining whether a person has standing requires an evaluation of the following factors: (1) the nature of the alleged injury; (2) whether the plaintiff is a consumer or competitor in the market where trade was allegedly restrained; (3) the tenuous and speculative character of the casual relationship between the plaintiff's alleged harm and the alleged restraint; (4) the potential for duplicative recovery or complex apportionment of damages; and (5) the existence of more direct victims of the alleged conspiracy.

Opinion

[*901] MEMORANDUM

YOUNG, United States District Judge

Robin K. A. Ficker, a Maryland attorney, filed this suit against Chesapeake and Potomac Telephone Company ("C&P") and the Reuben Donnelley Corporation ("Donnelley") pursuant to Section 4 of the Clayton Act seeking treble damages, *15 U.S.C. § 15*, and injunctive relief, *15 U.S.C. § 26*, for alleged violations of *Sections 1* and *2* of the Sherman Act, *15 U.S.C. § 1*, *2*. [1] Defendants now seek dismissal of the plaintiff's complaint for failure to state a claim upon which relief may be granted under *Rule 12(b)(6) of the Federal Rules of Civil Procedure*. Plaintiff has failed to respond to the defendants' motion despite having been specifically invited to do so by this Court.

[2]** According to the facts alleged by the plaintiff, defendant C&P is a Maryland corporation engaged in the telecommunications business in Maryland and elsewhere. Defendant Donnelley is a Delaware corporation under contract with C&P to publish and distribute directories containing the names, addresses, and telephone numbers of C&P subscribers ("white pages"); these directories also contain classified advertisements for business subscribers of C&P ("yellow pages").

The complaint specifically alleges that both defendants have performed acts in Maryland in furtherance of an "unlawful attempt and conspiracy to monopolize, and an unlawful contract, combination, or conspiracy to restrain interstate commerce of the United States." Complaint para. 4. These claims are based upon the defendants' refusal

[1] ***HN1***[] *Section 1* of the Sherman Act provides that "every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several States . . . is declared to be illegal . . .," *15 U.S.C. § 1*.

Section 2 of the same act states that "every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States . . . shall be deemed guilty of a misdemeanor . . .," *15 U.S.C. § 2*.

to print the plaintiff's advertisement containing price information for certain legal services offered by the plaintiff. The plaintiff contends that consumers of legal services are deprived of meaningful price comparisons for these services and are unable to locate legal services according to price because of the defendant's refusal to publish this information in the classified advertisements. **[**3]** Plaintiff thus concludes that this and other such omissions deny consumers the "benefit of full, free, and open competition in the provision of [legal] services, and [that] prices for such services will remain at artificial and non-competitive levels as a result." Complaint para. 15.

Finally, the plaintiff asserts that his law practice has been injured to the extent that he has lost fees from potential clients who would have used his services (because of their cost) were it not for defendants' actions which allegedly prevented them from doing so.

I.

HN2[] For the purpose of this motion to dismiss, the plaintiff's complaint will be construed in a light most favorable to the plaintiff, and its allegations are, therefore, taken as true. *See* Wright and Miller, 5 *Federal Practice and Procedure*: Civil § 1357 at 594 (1969) (citations omitted). This Court may dismiss the complaint only if it "appears beyond a doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 44-46, **[*902]** 78 S. Ct. 99, 101-102, 2 L. Ed. 2d. 80 (1957)*. However, the Court is not bound to accept conclusory allegations **[**4]** concerning the legal effect of the events the plaintiff has set out if these allegations do not reasonably follow from his description of what happened. Wright and Miller, *supra*, at 597. A pleader is not able to rely solely on "averments that on their face comprehend activity clearly exempt from liability." *City of Gainesville v. Florida Power and Light Co., 488 F. Supp. 1258, 1264 (D. Fla. 1980)*. It is apparent from the pleadings that the plaintiff has failed to allege any facts which, if true, would establish a violation under the Sherman Act and thereby entitle him to relief. Accordingly, defendants' motion to dismiss under *Rule 12(b)(6), Fed.R.Civ.P.*, will be granted as to both Counts I and II of the complaint.

II.

HN3[] In considering antitrust claims, both the Supreme Court, *see Lorain Journal Co. v. United States, 342 U.S. 143, 96 L. Ed. 162, 72 S. Ct. 181 (1951)*; *United States v. Colgate and Co., 250 U.S. 300, 63 L. Ed. 992, 39 S. Ct. 465 (1919)*, and the Fourth Circuit, *see Virginia Academy of Clinical Psychologists v. Blue Shield, 624 F.2d 476, 483 (4th Cir. 1980)*, have recognized that absent any anticompetitive purpose or design to create a monopoly, "a business **[**5]** may unilaterally choose those with whom it will conduct business," as well as the terms and conditions of those business dealings. *Hester v. Martindale-Hubbell, Inc., 659 F.2d 433, 436 (4th Cir. 1981)*. Federal antitrust laws were enacted to prevent anticompetitive conduct, P. Areeda and D. Turner, III ***Antitrust Law***, para. 736(e) at 274 (1978); *see* Cong. Rec. 2457, 3151-53 (1890), rather than to enforce popular public utility notions of fair dealing. Areeda, *supra*, at 274. Even a recognized monopolist is not required to "deal non-discriminately [2] with would-be purchasers, whether they are in competition or not." *Id. at 271*. Only refusals to deal as a part of a conspiracy to restrain trade or to maintain a monopoly violate the antitrust laws. J. Von Kolinowski, *Antitrust Laws and Trade Regulations*, 2 § 6C.02[2] (1983).

Assuming arguendo **[**6]** that defendant Donnelley has a monopoly on yellow-page publishing in the area served by defendant C&P, the monopoly it enjoys is a natural incident of the monopoly status granted to C&P by Congress and the Federal Communications Commission, *see 47 U.S.C. § 151 et seq.*, because of its public utility character. *Best Advertising v. Illinois Bell Telephone Company and Reuben H. Donnelley Corporation, 229 F. Supp. 275* (S.D. Ill, 1964), *aff'd*, *339 F.2d 1009 (7th Cir. 1965)*. Although the advertising aspect of the business does not partake of this public utility character, the directories (of which the yellow page advertising is a part) are a normal and necessary part of C&P's effective operation as a public utility. *Best, 229 F. Supp. at 277*.

The plaintiff alleges that both defendants are attempting to monopolize all classified advertising in the area served by C&P; however, he has not alleged that either defendant has done anything other than refuse to publish his

---

[2] By "non-discriminately," the Court excludes refusals to deal for such obvious economic reasons as poor credit and the like. Areeda, at 271, note 4.

advertisement *exactly* as he tendered it. Moreover, it is apparent from the face of the complaint that none of the parties is in competition with either of the other parties; thus, it is difficult, if not **[**7]** impossible, to envision any plausible scenario in which the defendants' refusal would tend to stifle competition or maintain any monopoly for the benefit of either defendant. [3] **[**8]** *See id*. Conceding the monopoly status of both defendants does **[*903]** not advance the plaintiff's argument that he has stated a claim upon which relief can be granted. Unlike the plaintiff in *Lorain Journal, supra*, [4] the plaintiff in the instant case does not allege, nor can he allege, that the defendants' conduct restrained trade in *their own* market for *their own* benefit. Absent this anticompetitive animus, plaintiff's claim must fail.

In *Official Airline Guides, Inc. v. FTC, 630 F.2d 920, 928 (2d Cir. 1980)*, the Second Circuit concurred with the contention of the FTC that Official Airline Guides had arbitrarily refused to publish commuter airline schedules to the detriment of competition among air carriers. Nonetheless, the court held that Official Airline Guides' refusal did not violate the Federal Trade Commission Act. [5] It determined that the cases relied upon by the FTC which required monopolists to deal with their competitors were inapplicable because Official Airline Guides did not compete with the airlines. *Official Airline Guides, 630 F.2d at 925-26*. The court also refused to apply the cases requiring monopolies to deal where their refusals furthered their own monopolies because Airline Guides' refusal did nothing to further its monopoly **[**9]** over the printing of airline schedules. *Id*. Similarly, the defendants in the instant case are not in competition with the plaintiff nor does the complaint allege any facts that would tend to support the plaintiff's conclusion that the defendants' conduct facilitated or enhanced any monopoly either defendant may enjoy.

Furthermore, the plaintiff has failed to allege any concerted activity on the part of the defendants that would give rise to an actionable claim under the Sherman Act. Plaintiff's reliance on *Hester v. Martindale-Hubbell, Inc., 659 F.2d 433 (4th Cir. 1981)*, in support of his contention that he has a claim cognizable under the Sherman Act is misplaced. In *Hester*, the defendants' complete refusal to publish *any* advertisement **[**10]** of the plaintiff was found to "[lie] well beyond the pale of even the most liberal extension of the concept of concerted activity." *Id. at 436*.

Like *Hester*, this "is not a case in which those at a lower level of competition have conspired to force a supplier at a higher level of competition to impose some restraint. Nor is it a case in which a supplier at a higher level of competition has coerced those at a lower level of competition to acquiesce in some anticompetitive endeavor." *Id*. (citations omitted). As the court observed in *Dollar-A-Day Rent a Car Systems, Inc. v. Mountain States Telephone Company, 22 Ariz. App. 270, 526 P.2d 1068 (1974)*, regulations restricting price advertising in the yellow pages of telephone directories are not anticompetitive and therefore do not run afoul of federal antitrust laws. Instead, they are "in [full] accord with the public purpose expressed by Congress." *Id. at 1073*, citing Federal Trade Commission Act, *15 U.S.C. § 41 et seq.* Thus, any restraint imposed by the advertising regulations of the defendants was not an "unreasonable restraint," *Best Advertising*, 339 F.2d at 1011, citing *Standard Oil Company of New* **[**11]** *Jersey v. United States, 221 U.S. 1, 55 L. Ed. 619, 31 S. Ct. 502 (1910)*, such as price fixing, elimination of competition or the creation of a monopoly, and, therefore, is not actionable under the federal antitrust laws. Furthermore, the plaintiff's claim here is even weaker than the one rejected by the Fourth Circuit in *Hester*. The plaintiff in *Hester* was completely denied the right to advertise in a medium in which his competitors advertised. [6] The pleadings in the

---

[3] If anything, defendant's refusals to accept certain kinds of advertising would tend to create market opportunities for competing advertising firms thereby decreasing their control over the market. Both the complaint and the defendants' motion to dismiss note that C&P's reason for maintaining price restrictions is based on its concern that price quotations in it's classified adds will change within the useful life of the directories. Complaint para. 12; Defendants' Memorandum in Support of Their Motion to Dismiss at 2, n.2.

[4] In *Lorain Journal*, the Lorain Journal Co. enjoyed a substantial monopoly over local and national news and advertising in its Community and refused to accept advertisements from anyone who advertised over the *competing* radio station. *Lorain Journal, 342 U.S. at 148*.

[5] Although *Official Airline Guides, 630 F.2d at 920*, involved Section 5 of the Federal Trade Commission Act, *15 U.S.C. § 45*, the authorities relied upon the parties and the court included *Colgate, 250 U.S. at 300* and *Lorain Journal, 342 U.S. at 148*.

instant case **[*904]** clearly establish that the plaintiff received the same treatment as his competitors and was not prevented from advertising in the defendants' directory.

[12]** These cases make it abundantly clear that the defendants are under no obligation to accept the plaintiff's advertisement regardless of their monopoly position in the area served by C&P. *Lorain Journal, 342 U.S. at 155*; *Official Airline Guides, 630 F.2d at 928*. Moreover, plaintiff's complaint must fail because he has not alleged nor is he able to allege that he competes with either defendant, *Official Airline Guides, 630 F.2d at 925-26*; *Best, 229 F. Supp. at 277*, or that he has been discriminated against by the defendants in favor of his competitors.

III.

Additional grounds exist for dismissing the plaintiff's claims for damages under Section 4 of the Clayton Act, *15 U.S.C. § 15*. [7] Plaintiff does not allege facts which would confer standing upon him under the federal antitrust laws. [8] This court has held that ***HN4***[] antitrust suits should be dismissed if the plaintiff cannot recover under any set of facts supporting the allegations in the complaint. *Levey v. E. Stewart Mitchell, Inc., 585 F. Supp. 1030 (D. Md. 1984)*, appeal docketed, No. 84-1597 (4th Cir. June 7, 1984). The complaint is also devoid of any facts which support the allegation that the plaintiff has **[**13]** suffered the requisite antitrust injury.

The Supreme Court has made it increasingly clear that ***HN5***[] "Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation." *Hawaii v. Standard Oil Co., 405 U.S. 251, 263 n.14, 31 L. Ed. 2d 184, 92 S. Ct. 885 (1972)*. Even where an antitrust violation is **[**14]** established by the plaintiff or conceded by a defendant, it does not necessarily follow that any person harmed as a result of such conduct is a person injured by reason of the antitrust laws within the meaning of Section 4 of the Clayton Act. *See* *Associated General Contractors v. California State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723, 51 U.S.L.W. 4139, 4142 (1983)*. Determining whether a person has standing under Section 4 requires an evaluation of the following factors:

> (1) the nature of the alleged injury;
>
> (2) whether the plaintiff is a consumer or competitor in the market where trade was allegedly restrained; [9]

---

[6] In *Hester*, the court in its *dicta* concluded that the "restricted access to advertising" was a restraint of trade but not actionable unless accompanied by "concerted activity." *Hester, 659 F.2d at 436*. However, in the present case, defendants have not "restricted access to advertising" either individually or in concert; they have merely established rules for advertising content and have applied them in an even-handed, nondiscriminatory way. Without such "restricted access to advertising" in furtherance of some anticompetitive purpose, *Hester* does not save the plaintiff's claims from being dismissed for failure to state a claim upon which relief may be granted.

[7] Section 4 of the Clayton Act provides that:

> Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor . . . And shall recover thrice fold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

[8] The requirement of "antitrust standing" is different and more restrictive than standing as a constitutional doctrine. While almost any harm will satisfy the standing requirement in the constitutional context, much more is required to acquire standing to pursue a damage action under Section 4 of the Clayton Act.

[9] This frequently dispositive inquiry, *see* *Associated General Contractors, 51 U.S.L.W. at 4144*, has been referred to as the "target area" test. It has also been described as requiring a plaintiff to show that he is "within the area of the economy which is endangered by a breakdown of competitive conditions in a particular industry." *Id. at 4144, n.33*, citing *Pan-Islamic Trade Corp. v. Exxon Corp., 632 F.2d 539, 546-547 (5th Cir. 1980)*; *Engine Specialties, Inc. v. Bombardier Ltd., 605 F.2d 1, 17-18 (1st Cir. 1979)*; *Calderone Enterprises Corp. v. United Artists Theatre Circuit, Inc., 454 F.2d 1292-1295 (2d Cir. 1971)*. The Second Circuit has also stated that for a plaintiff to be within the target area, he must be:

> a person against whom the conspiracy was aimed, such as a competitor of the persons sued. Accordingly, we have drawn a line excluding those who have suffered economic damage by virtue of their relationship with "targets" . . .

[*905] (3) the tenuous and speculative character of the casual relationship between the plaintiff's alleged harm and the alleged restraint;

(4) the potential for duplicative recovery or complex apportionment of damages; and

(5) the existence of more direct victims of the alleged conspiracy.

See *Associated General Contractors, 51 U.S.L.W. at 4146*.

[15]** A review of the plaintiff's allegations in light of these cases reveals that both counts of the complaint should be dismissed with regard to damages for lack of standing. Count I is easily disposed of because the plaintiff is not a competitor of either defendant and the defendants are not competitors of each other. Nor is the plaintiff a consumer in the market in which the alleged restrain of commerce occurred. In sum, the plaintiff does not allege any facts in Count I which would place him within the target area of the alleged restrain of trade, *Associated General Contractors, 51 U.S.L.W. at 4144, n.33, 4146-47*. Count I simply fails to disclose any facts which identify any justiciable interest the plaintiff has with regard to damages in the competition affected by the restrain. *Plumbers and Steamfitters Local 598 v. Morris, 511 F. Supp. 1298, 1306 (D. Wash. 1981)*.

The allegations in Count II also fail to establish plaintiff's standing to pursue damages under Section 4 even though the plaintiff is a consumer in the advertising market (the market presumably affected by anticompetitive conduct in furtherance of defendants' monopoly). He does not allege that he has been charged **[**16]** noncompetitive prices for his advertisements; therefore, the only market in which he conceivably could have suffered harm as a result of the defendants' conduct is the legal services market, a market in which he is not a consumer and in which neither defendant competes. Hence, Count II also fails to allege any facts which place the plaintiff within the target area of the alleged violation of *Section 2* of the Sherman Act. *See* *Associated General Contractors, 51 U.S.L.W. at 4144, n.33, 4146*.

In addition, plaintiff's alleged injury is too indirect and the damages too highly speculative for the plaintiff to recover under Section 4. Plaintiff has not established a "significant causal connection between the defendants' violation and [his] injury," Areeda, II *Antitrust Laws* para. 334a, at 163, or that his injury was "inextricably related to, and caused by, the alleged anticompetitive conduct." *Bichan v. Chemetron Corp., 681 F.2d 514 (7th Cir. 1982)*, *cert. denied*, *460 U.S. 1016, 103 S. Ct. 1261, 75 L. Ed. 2d 487 (1983)*. In *Associated General Contractors, supra*, the Court dismissed a union's complaint against a multi-employer association which allegedly had coerced third **[**17]** parties in to dealing with nonunion firms. The coercive acts were alleged to have adversely affected the trade of certain unionized firms to the detriment of the business activities of the union and its members. The Supreme Court denied the union relief pursuant to Section 4 "partly because [the injury was] indirect, and partly because the alleged effects on the union may have been produced by independent factors . . ." thereby making the union's damage claim too highly speculative. *Associated General Contractors, 51 U.S.L.W. at 4146*. [10]

Calderone, 454 F.2d at 1294.

Another Court of Appeals has asked whether the alleged injury is "arguably within the zone of interests protected by the antitrust laws." *Malamud v. Sinclair Oil, 521 F.2d 1142, 1151-52 (6th Cir. 1975)*.

[10] The Court also pointed out that any attempt to determine the amount of such speculative damages and apportion them among possible conflicting and duplicative claims would embroil the court in complex and potentially unmanageable proceedings. Such indirect causation and speculative harm has caused the dismissal of other actions under Section 4. *See* *Eastern Auto Distributors v. Peugeot Motors of America, 573 F. Supp. 943 (E.D. Va. 1983)* (dismissing a defendant supplier's counterclaim for lost sales based on the plaintiff distributor's alleged tying arrangement which forced its dealers to sell both Peugeot and Renault automobiles).

[18]** **[*906]** Here, as in *Associated General Contractors*, the indirectness of the alleged harm and the presence of independent factors are fatal to the plaintiff's claim for damages. *Compare* *Associated General Contractors, 51 U.S.L.W. at 4146* (presence of independent factors possibly accounting for harm made action for damages inappropriate) *with* *Blue Shield of Virginia v. McCready, 457 U.S. 465 n.11, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)* (plaintiff suffered directly from the alleged conspiracy and also could "ascertain [her damages] to the penny" thereby making antitrust damages appropriate). Customers ability to obtain low priced legal services from attorneys other than the plaintiff make it impossible for the plaintiff to establish the number of potential customers who would have turned to him for legal services (and the resulting fees he would have earned) were it not for the defendants' refusal to publish the price information in his advertisement. In fact, it is entirely possible that the plaintiff may have done less business if price information for legal was published in the defendants' yellow pages. Consequently, plaintiff's claims for damages pursuant to Section **[**19]** 4 of the Clayton Act are too speculative and potentially duplicative for this case to proceed beyond the present motion to dismiss.

Finally, this Court need not decide whether the injury plaintiff alleges was proximately caused by defendants' conduct for the purpose of determining whether there is standing to sue for injunctive relief under Section 16 of the Clayton Act, *15 U.S.C. § 26*, because, as determined above, the conduct alleged in the complaint fails to support an actionable claim for violation of either *Section 1* or *2* of the Sherman Act. [11] Accordingly, plaintiff's claim for injunctive relief must also fail.

[20]** After careful consideration of the pleadings in this case, defendants' motion to dismiss for failure to state a claim, pursuant to *Rule 12(b)(6), Fed.R.Civ.P.*, will be granted and plaintiff's complaint, accordingly, dismissed.

[*none] [EDITOR'S NOTE: The following court-provided text does not appear at this cite in 596 F. Supp.]

ORDER

In accordance with the statements in the Memorandum attached hereto, it is this 29th day of October, 1984, by the United States District Court for the District of Maryland, ORDERED:

1. That defendants' motions to dismiss BE, and the same ARE, hereby GRANTED; and

2. That a copy of this Memorandum and Order be mailed to the plaintiff and counsel for the defendants.

End of Document

---

[11] This Court recognizes that the standing requirements for injunctive relief under Section 16 of the Clayton Act, *15 U.S.C. § 26* are broader than those of Section 4. *State of Hawaii v. Standard Oil Co., 431 F.2d 1282, 1284-85 (9th Cir. 1970)*, *aff'd*, *405 U.S. 251, 261, 31 L. Ed. 2d 184, 92 S. Ct. 885 (1972)*. Broader standing under Section 16 is justified because of the difference between the remedies available under each section. In contrast to Section 4, Section 16 does not involve punitive and potentially disastrous judgments for treble damages and attorney's fees; neither is there the threat of duplicative recoveries. *In re Multidistrict Vehicle Air Pollution, 481 F.2d 122, 130* (9th Cir.), *cert. denied*, ***414 U.S. 1045, 94 S. Ct. 551, 38 L. Ed. 2d 336 (1973)***.

Thus, the target area approach is irrelevant to the question of standing under Section 16. *Parks v. Watson, 716 F.2d 646, 662 (9th Cir. 1983)*, citing ***City of Rohnert Park v. Harris, 601 F.2d 1040, 1044 (9th Cir. 1979)***, *cert. denied*, ***445 U.S. 961, 100 S. Ct. 1647, 64 L. Ed. 2d 236 (1980)***; *In re Multidistrict Vehicle Air Pollution, 481 F.2d at 130-31*. All that is required for standing under Section 16 is that the plaintiff show a threatened loss or injury cognizable in equity proximately resulting from the alleged antitrust violation. *See* *Parks, 716 F.2d at 662*.

49 U.S.C.S. § 10934(d) states that the antitrust laws, as defined in the first section of the Clayton Act (15 U.S.C.S. § 12), do not apply to discussions or agreements between a motor common carrier providing transportation of household goods subject to the jurisdiction of the Interstate Commerce Commission (commission) under subchapter II of chapter 105 of this title and its agents (whether or not an agent is also a carrier) related solely to (1) rates for the transportation of household goods under the authority of the principal carrier, (2) accessorial, terminal, storage, or other charges for services incidental to the transportation of household goods transported under the authority of the principal carrier, (3) allowances relating to transportation of household goods under the authority of the principal carrier, and (4) ownership of a motor common carrier providing transportation of household goods subject to the jurisdiction of the commission under subchapter II of chapter 105 of this title by an agent or membership on the board of directors of any such motor common carrier by an agent.49 U.S.C.S. § 10934(d) (1982).

HN2[] Air & Space Transportation, Charters

Federal law gives special immunity from the antitrust laws to carrier-agent relationships, but only if 1) the van line and its carrier-agents enter into a "pooling agreement" that spells out the division of business, sharing of facilities, and other terms according to which the van line will allow its "agents" to compete with it, and 2) the pooling agreement meets Interstate Commerce Commission approval. Significantly, a pooling agreement may be terminable unilaterally by either a national van line or its carrier-agents, and the exercise of this option eliminates the automatic antitrust immunity that a carrier-agent relationship otherwise enjoys.

HN4[] **Summary Judgment, Entitlement as Matter of Law**

Under *Fed. R. Civ. P. 56(c)*, a motion for summary judgment may be granted only where there is no genuine issue as to any material fact and the moving party is entitled to a judgment as a matter of law. Undisputed facts and inferences to be drawn from those facts must be viewed in the light most favorable to the party opposing the motion. To support summary judgment, the record must demonstrate that the opponent would not be entitled to prevail under any circumstances. Courts have been cautioned to be especially careful about premature termination of a cause of action filed under the federal antitrust laws. Nonetheless, summary judgment may well be appropriate even in an antitrust action where a court has permitted extensive discovery and the requirements of *Rule 56(c)* have been met.

HN5[] Antitrust & Trade Law, Sherman Act

In order to prevail on a claim under *§ 1* of the Sherman Act, a plaintiff must show both 1) the existence of a contract, combination or conspiracy and 2) an unreasonable restraint of trade under either the per se rule or the rule of reason, as appropriate. *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Law > ... > Directors & Officers > Management Duties & Liabilities > General Overview

HN6[] Antitrust & Trade Law, Sherman Act

The actions of a corporation's board of directors do not constitute a conspiracy within the meaning of *§ 1* of the Sherman Act. A corporation, which can only function pursuant to the group decisions of the members of its board of directors, cannot in this fashion be found to have conspired with itself. An exception to this rule may exist, however, where individual members of the board of directors possess an independent personal stake in a particular action of the board, that is, where they act on their own behalf.

Business & Corporate Compliance > ... > Transportation Law > Carrier Duties & Liabilities > Duty to Provide Service

HN8[] **Antitrust & Trade Law, Exemptions & Immunities**

49 U.S.C.S. § 10934(d) expressly allows agents and carrier-agents of a van line to serve on the van line's board of directors, participate in its deliberations and decisions, and exercise responsibility for the affairs of the principal free of the risk of antitrust liability for doing so, despite their obvious status as independent entities with at least these basic independent interests. The statute, moreover, specifically immunizes discussions and agreements regarding the ownership of motor common carriers by a van line's agents. It is intended to immunize carriers and their agents from the antitrust laws with respect to certain dealings between them.

Antitrust & Trade Law > Regulated Industries > Transportation > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Law > ... > Directors & Officers > Management Duties & Liabilities > General Overview

Business & Corporate Compliance > ... > Transportation Law > Carrier Duties & Liabilities > Duty to Provide Service

HN9[] **Regulated Industries, Transportation**

Congress appears to have expressly exempted the participation of agents and carrier-agents in the membership, deliberations, or agreements of a van-line's board of directors from the application of the antitrust laws where the subject matter of the discussions and agreements relate to the van line's policy with respect to the ownership of independent interstate authority by the van line's agents, including policies requiring change because of the business consequences of deregulation.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN10[] **Antitrust & Trade Law, Sherman Act**

The antitrust laws look to substance, not to form.

Antitrust & Trade Law > Sherman Act > General Overview

Evidence > Inferences & Presumptions > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

A finding of conspiracy under the ***antitrust law*** cannot be sustained on the basis of evidence merely "consistent" with illegal coordination between a manufacturer and its independent distributors. Rather, a plaintiff must proffer specific evidence "inconsistent" with the defense of unilaterality.

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

Business & Corporate Law > ... > Directors & Officers > Management Duties & Liabilities > General Overview

Business & Corporate Compliance > ... > Transportation Law > Carrier Duties & Liabilities > Duty to Provide Service

Antitrust & Trade Law > Sherman Act > General Overview

Evidence > Inferences & Presumptions > General Overview

HN12[] **Communications, Sherman Act**

The mere showing of a "personal benefit" traceable to an agent on a board of directors should not suffice to trigger the "independent stake" exception under *49 U.S.C.S. § 10934*, assuming one exists, unless plaintiffs also proffer evidence showing that the personal benefit in question was inconsistent with or divergent from the board's own competitive interests. There is a longstanding presumption that the members of a corporation's board of directors are incapable of conspiring with themselves under the Sherman Act in that there is no other way that a corporation can advance its competitive interests.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN13[] **Antitrust & Trade Law, Sherman Act**

A manufacturer generally has a right to deal, or refuse to deal, with whomever it likes under the antitrust laws, as long as it does so independently.

Antitrust & Trade Law > Sherman Act > General Overview

HN15[] **Practices Governed by Per Se Rule, Boycotts**

Boycotts and price-fixing schemes, when proven, have often been accorded per se treatment under the antitrust laws. Nonetheless, a per se rule is a judicial shortcut; it represents the considered judgment of courts, after considerable experience with a particular type of restraint, that the rule of reason, the normal mode of analysis, can be dispensed with. There are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. A court will not indulge in this conclusive presumption lightly. Invocation of a per se rule always risks sweeping reasonable, pro-competitive activity within a general condemnation, and a court will run this risk only when it can say, on the strength of unambiguous experience, that the challenged action is a naked restraint of trade with no purpose except stifling of competition.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN16[] **Antitrust & Trade Law, Sherman Act**

Per se rules of illegality under the antitrust laws are appropriate only when they relate to conduct that is manifestly anticompetitive.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN17[] **Antitrust & Trade Law, Sherman Act**

"Considerable" and "unambiguous" experience with a practice is a necessary prerequisite for application of per se treatment under the antitrust laws.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN18[] **Antitrust & Trade Law, Sherman Act**

Under the rule of reason, a restraint must be evaluated to determine whether it is significantly anticompetitive in purpose or effect. In making this evaluation, a court generally will be required to analyze the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed. If, on analysis, the restraint is found to have legitimate business purposes whose realization serves to promote competition, the anticompetitive evils of the challenged practice must be carefully balanced against its pro-competitive virtues to ascertain whether the former outweighs the latter. A restraint is unreasonable if it has the net effect of substantially impeding competition.

Business & Corporate Law > Agency Relationships > Termination > Accomplishment of Purpose

Business & Corporate Law > Agency Relationships > General Overview

HN19[] **Termination, Accomplishment of Purpose**

Classic agency law gives a principal the prerogative of withdrawing permission for an agent to do an act if convenient to protect the principal's interests.

Opinion

[*219] MEMORANDUM

This is a private antitrust action brought pursuant to *Section 1* of the Sherman Act, *15 U.S.C. § 1 (1982)*, against Atlas Van Lines, Inc. ("Atlas"), a nationwide van line company. [1] Plaintiffs are ten present and former agents of

[1] In their complaint, filed February 17, 1983, plaintiffs also named the Interstate Commerce Commission ("ICC") as a party-defendant. Plaintiffs requested -- as a predicate to certain further relief against the ICC -- that the Court compel the ICC to reach a decision on a related matter pending before the agency. In light of intervening developments and upon motion by the ICC, the

Atlas. They challenge an Atlas policy -- made effective in August, 1983 -- under which Atlas announced that it would terminate its agency relationship with any agent that maintained independent operations in the interstate moving business unless the agent transferred its independent authority to do so to a separate and distinct (albeit affiliated) company. The case is presently before the Court both on defendant's motion for summary judgment and on plaintiffs' motion for partial summary judgment as to liability. After careful consideration **[**2]** of undisputed facts developed after extensive discovery and set out pursuant to *Fed. R. Civ. P. 56* and Local Rule 1-9(h), as well as the arguments advanced by the parties in their memoranda and at oral argument, the Court concludes that, for the reasons set forth below, plaintiffs' motion for partial summary judgment as to lability must be denied, and defendant's motion for summary judgment must be granted.

I.

This lawsuit involves, in essence, the legality of Atlas's response to the **[**3]** regulatory and commercial changes resulting from the deregulation of the household goods moving industry in 1980. A brief overview of Atlas's methods of operation and of the recent changes in the industry is necessary to an understanding of the nature of the claims at issue.

Defendant Atlas Van Lines holds authority from the Interstate Commerce Commission ("ICC") to transport goods from state to state on a nationwide basis. Statement of Material Undisputed Facts in Support of Plaintiffs' Motion for Partial Summary **[*220]** Judgment As To Liability para. II-A (hereinafter "PSF" ["Plaintiffs' Statement of Facts"]); Defendant's Response to Plaintiffs' Statement of Material Undisputed Facts para. II-A (hereinafter "DRPF" ["Defendant's Response to Plaintiffs' Facts"]); " Defendant's Statement of Material Facts As To Which There Is No Genuine Issue para. 1 (hereinafter "DSF" ["Defendant's Statement of Facts "]); Plaintiffs' Statement of Genuine Issues para. 1 (hereinafter "PSGI"). [2] **[**6]** As has been typical of the operation of other national van lines, Atlas exercises this authority primarily through a group of "agent" moving companies around the country. These "agent" companies are **[**4]** independent entities that have entered into standardized "Agency Agreements" with Atlas to carry out interstate shipments under Atlas's authority, PSF paras. II-C, V-P, DRSF paras. II-C, V-P, Plaintiffs' Appendix I (hereinafter "Plaintiffs' App."), and that agree -- in making Atlas shipments -- to abide by the operating procedures, painting and maintenance standards, and uniform rates, *inter alia*, provided for by the Agency Agreement. *See* PSF paras. V-O - V-X; DRPF paras. V-O - V-X; DSF paras. 2-13; PSGI para. 2-13. In addition, representatives of some of Atlas's agent companies sit on the Atlas board of directors, PSF para. II-K, V-A; DRPF paras. II-K, V-A -- a practice that has been typical in the industry during many years of ICC oversight, *see* S. Rep. No. 497, 96th Cong., 1st Sess. 8 (1979); H. Rep. No. 1372, 96th Cong., 1st Sess. 10 (1979), and that won express legislative immunity from the federal antitrust laws -- as described below -- with the enactment of *49 U.S.C. § 10934(d)* in 1980. [3] Nonetheless, the agent companies **[*221]** in the field remain wholly independent from Atlas

Court on May 26, 1983 dismissed the action against the ICC as moot. *See* Order of May 26, 1983. The ICC is thus no longer a defendant in this suit.

[2] Plaintiffs' "Statement of Genuine Issues" purports to dispute a number of material facts asserted by defendant. Close comparison of plaintiffs' assertions discloses that while many of them challenge the implications or characterizations of defendant's statements, they do not effectively traverse them so as to put material facts into genuine dispute. For example, plaintiffs state that they cannot "accept[] as undisputed" the statement by defendant that "Atlas headquarters directs and coordinates [certain] agent activities." PSGI para. 4, at 10-11. Plaintiffs, thus, object that Atlas does not "direct" the performance of origin or destination services, *in any direct supervisory sense." Id*. (emphasis added). As suggested by the qualification at the end of the quotation, though, plaintiffs fail to dispute that Atlas does indeed have the authority to set the general terms according to which Atlas agents perform these functions for Atlas. And indeed, plaintiffs concede that "Atlas does coordinate the movement of trucks, to a substantial degree." *Id*. at 11. Throughout this memorandum, in citing to corresponding portions of plaintiffs' and defendant's factual pleadings, the Court relies on the assertions therein to the extent that they reveal areas of agreement as described above, while disregarding any specific facts as to which the parties have succeeded in raising a genuine issue.

[3] The validity of the Atlas policy at issue in this case involves consideration of two separate statutory immunity provisions: *49 U.S.C. §§ 11341-11342 (1982)*, and *49 U.S.C. § 10934(d) (1982)*. The first of these provisions, *49 U.S.C. §§ 11341-11342*, has relevance to the van line practice, described *infra* at slip op. pages 5-9, of allowing some agents (referred to as "carrier-agents") to possess and exercise their own independent interstate ICC authority in addition to acting as agents for the van line.

itself and interact with Atlas in accordance with standard contractual arrangements. **[**5]** PSF para. V-P, DRPF para. V-P.

[7]** It has also been common in the industry, in addition, for many agent companies to hold their own, separate interstate authority from the ICC. *E.g.*, PSF paras. I-E, I-G; DRPF paras. I-E, I-G; *see Practices of Motor Common Carriers of Household Goods (Agency Relationships)*, 115 M.C.C. 628, 629 (1972) (hereinafter referred to as "*Practices*"). Agent companies that hold such independent authority in their own right are termed "carrier-agents"; agents that hold no such independent authority are termed "non-carrier" agents. *Practices, supra*, at 629. While a non-carrier agent accepts shipments solely as an agent for the principal van line that it serves, a carrier-agent has more flexibility. It may, like a non-carrier agent, accept shipments for carriage on the account of its principal carrier. But a carrier-agent may also accept certain shipments for carriage on its own account -- rather than that of the principal carrier for which it serves as an agent -- when the distance of the shipment does not exceed the geographic range of its independent authority and when other factors render it profitable for the carrier-agent to do so. *E.g*. PSF paras. V-H - V-J; DRPF paras. **[**8]** V-H - V-J; *see Practices, supra*, at 629. A carrier-agent, in this fashion, simultaneously functions both as an agent of the principal van line that it serves, and, on certain shipments, as one of the van line's competitors, in that it may shift to its independent account certain shipments that might otherwise have been carried on the van line's account. *E.g*. PSF paras. V-G, V-I; DSF para. 22; PSGI para. 22; *see Practices, supra*, at 629. Some carrier-agents, moreover, enjoy the distinct benefit of using van line personnel, van line uniforms and equipment (with van line insignia), and van line origin and destination services even on shipments carried out on their own, independent authority, *e.g.*, DSF paras. 24-29; PSGI paras. 24-29; *see* Plaintiffs' App. G, and thus can avoid the costs of building the business infrastructure necessary to exercising their independent carrier authority effectively. *See* DSF para. 27; PSGI para. 27. Atlas carrier-agents, for example, enjoyed this latter benefit prior to the events at issue in this lawsuit. DSF paras. 24-29; PSGI paras. 24-29.

HN2[] Federal law has long given special immunity from the antitrust laws to carrier-agent relationships, **[**9]** but only if 1) the van line and its carrier-agents enter into a "pooling agreement" that spells out the division of business, sharing of facilities, and other terms according to which the van line will allow its "agents" to compete with it, and 2) the pooling agreement meets ICC approval. *See* *49 U.S.C. §§ 11341-11342 (1982)*; *Practices, supra*, at 633. Significantly, a pooling agreement may be terminable unilaterally by either the national van line or its carrier-agents, and the exercise of this option eliminates the automatic antitrust immunity that a carrier-agent relationship otherwise enjoys. *See* DSF para. 24; PSGI para. 24. Atlas entered into a pooling agreement in 1957, which set the terms according to which, thereafter, it allowed its agents to acquire and operate their own independent ICC

Coordination between a van line and its carrier-agents has, under *49 U.S.C. §§ 11341-11342*, long been immune from the federal antitrust laws provided that the van line and its carrier-agents enter into a "pooling agreement" meeting ICC approval. *See infra* at slip op. at page 7. There is no dispute in this case as to the immunity provided by this provision.

The second provision, *49 U.S.C. § 10934(d)*, was enacted in 1980 as part of Congress's deregulation of the household goods moving industry, *see* Pub. L. 96-454, § 5(a)(1), 94 Stat. 2013 (1980), and it is this provision that addresses, *inter alia*, the membership on a van line's board of directors of the van line's own agents. Plaintiffs' do not dispute that, under the statute, the fact of such membership is immune from antitrust challenge. *See* Plaintiffs' Memorandum in Opposition to Defendant's Motion for Summary Judgment at 18. Yet the further scope of this immunity provision is disputed, and is discussed in detail *infra* at slip op. pages 19-23, 27. ***HN1***[] The provision reads, in its entirety:

> The antitrust laws, as defined in the first section of the Clayton Act (*15 U.S.C. 12*), do not apply to discussions or agreements between a motor common carrier providing transportation of household goods subject to the jurisdiction of the [Interstate Commerce] Commission under subchapter II of chapter 105 of this title and its agents (whether or not an agent is also a carrier) related solely to (1) rates for the transportation of household goods under the authority of the principal carrier, (2) accessorial, terminal, storage, or other charges for services incidental to the transportation of household goods transported under the authority of the principal carrier, (3) allowances relating to transportation of household goods under the authority of the principal carrier, and (4) ownership of a motor common carrier providing transportation of household goods subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title by an agent or membership on the board of directors of any such motor common carrier by an agent.

49 U.S.C. § 10934(d) (1982).

authority. DSF para. 24; PSGI para. 24. Other van lines, by contrast, have declined to enter into pooling agreements at all, and indeed have traditionally chosen to employ only non-carrier agents. *E.g.*, PSF para. III-I; DRSF para. III-I. Representatives of carrier-agents -- where the van line uses them -- may sit on a van line's board of directors just as do representatives **[**10]** of non-carrier agents, both pursuant to prior practice, *e.g.*, PSF para. V-A; DRPF para. V-A, and under the more recently enacted **[*222]** federal antitrust exemption contained in *49 U.S.C. § 10934(d) (1982)*. [4]

Finally, it is a central feature of the van line industry that agents within a van line's infrastructure often must agree to provide their services only to that particular van line and to other agent companies within the van line's network. *See, e.g.*, PSF para. V-Q; DRPF para. V-Q; Plaintiffs' App. G.As in many other industries, "exclusive dealing" is a common method of operation. *See* Plaintiffs' App. G, at 1-3. For van lines that have exclusive dealing arrangements and that utilize only non-carrier agents, thus, only shipments on the van line's own account are carried within the van line's infrastructure. For van lines that have exclusive dealing arrangements and that use carrier-agents as well as non-carrier agents, however, non-van line shipments originating **[**11]** from the carrier-agents' independent operations may be carried within the van line's infrastructure as well. The establishment of such arrangements for the benefit of a van line's carrier-agents is a matter of voluntary accommodation on the part of the van line -- though once established, it may be governed by the van line's ICC-certified pooling agreement. *See, e.g.*, DSF para. 24; PSGI para. 24; *see Practices, supra*, at 633. Nonetheless, almost no van line, apparently, allows the agents within its network regularly to handle the traffic of any company that is not also one of the van lines' agents. *E.g.*, DSF para. 22; PSGI para. 22; *see* Plaintiffs' App. G. [5]

[12]** Prior to the deregulation of the moving industry beginning around 1979, the extent to which agents could and did make use of independent ICC authority -- if their van lines allowed them to do so at all -- was limited. DSF para. 23; PSGI para. 23. First, then-existing ICC regulations made it very difficult for non-carrier agents to obtain, or for existing carrier-agents to augment, their own interstate authority. DSF para. 35; PSGI para. 35. Second, even for agents that did possess such authority, it was usually -- due to ICC regulations -- of limited geographic scope. DSF para. 35; PSGI para. 35. Most important, the ICC required that carrier-agents use the same rates for their "independent carrier" shipments as for their "agency" shipments -- that is, price competition between van lines and the independent operations of their carrier-agents was expressly barred. DSF para. 36; PSGI para. 36.

The advent of deregulation in the moving industry represented a dramatic change in these business circumstances. With deregulation, agents could obtain independent interstate authority or expand existing interstate authority quite easily. DSF para. 35; PSGI para. 35. By the same token, independent **[**13]** carriers and local moving companies wishing to offer interstate service could readily obtain their own interstate authority rather than associating with a national van line in order to do so. Also, the ICC no longer imposed narrow geographic limits on the scope of such new authority. Agents, as well as independent carriers, could obtain authority allowing them to carry goods on their own account not only locally, but regionally or even nationally as well. *See* DSF para. 35; PSGI para. 35. Moreover, and perhaps most significantly, the ICC abandoned the rule that carrier-agents were required to charge identical rates on their agency and non-agency shipments. DSF para. 36; PSGI para. 36.

Thus, as a result of deregulation, Atlas faced the prospect of potential Atlas shipments being shifted to independent carrier-agent accounts 1) by many more agents than before, 2) on long distance hauls as well as local hauls, and 3) with greater frequency due to newly authorized price competition from its carrier-agents in their **[*223]** independent capacities. *See* PSF paras. VI-V - VI-X; DRPF paras. VI-V - VI-X. Atlas carrier-agents, nevertheless, continued to reap a substantial benefit **[**14]** from the use of the Atlas infrastructure -- including Atlas-leased trucks, Atlas-

---

[4] *See supra* note 3.

[5] Agent operations for handling government or military traffic or exercising freight forwarding authority as referred to at PSGI para. 22 constitute separate categories of business carried out under separate ICC authorities. *See Atlas Van Lines, Inc., et al. - Pooling Application*, ICC Docket No. MC-F-15004 at 1-5 (July 15, 1983) (Defendant's Evidentiary and Other Materials 17). While such shipments may also be carried within a van line's infrastructure, operations under these ancillary authorities are not affected by the Atlas policy being challenged in this suit and thus are not at issue.

trained personnel, Atlas uniforms, and the extremely valuable Atlas origin and destination network -- on their own, independent, non-Atlas hauls. *See* DSF paras. 24-29; PSGI paras. 24-29. After deregulation, moreover, this practice threatened to saddle Atlas with significant liability problems: as part of the deregulation of the industry, Congress made ***HN3***[] national van lines expressly liable for actions committed by an agent when the agent is operating "within the actual or *apparent* authority" of its principal van line. *49 U.S.C. § 10934(a) (1982)*. Thus, to the extent that the independent shipments of Atlas's carrier-agents were often carried out with many of the trappings of an official Atlas shipment, the new liability provision placed Atlas at an enhanced, statutory risk of being held legally responsible for those non-Atlas shipments. *See* DSF paras. 31-34; PSGI paras. 31-34.

Atlas initiated several policies in anticipation of and in response to the changes accompanying deregulation, though it aborted each of these initiatives in turn until it finally settled on the policy at issue in this suit. **[**15]** [6] **[**17]** On February 11, 1982, Atlas announced that it planned to exercise its right to cancel its pooling agreement, and that it would terminate its relationship with any agent company [7] that continued to operate an independent, interstate authority for its own account in addition to serving as an Atlas agent. PSF paras. VI-K - VI-P; DRPF paras. VI-K - VI-P. In effect, the policy meant that Atlas would thenceforth deal only with "non-carrier" agents. PSF para. VI-N; DRPF para. VI-N. Atlas indicated that its existing carrier-agents could retain their independent authority without being terminated as Atlas agents only if they transferred that authority to a separate corporation to be operated under a new and distinct name. PSF paras. VI-N - VI-P; DRPF paras. VI-N - VI-P; DSF paras. 52-53; PSGI paras. 52-53. Under the policy, the separate company could remain legally "affiliated" with the agency company -- that is, both companies could remain under common ownership. However, the separate company would be outside the Atlas network: it would generally not have access to Atlas origin and destination services provided by other Atlas agent companies around the country, PSF para. VI-M; DRPF para. **[**16]** VI-M, in that Atlas agent companies were contractually barred from providing such services for the shipments of non-Atlas companies to the extent that doing so would "infringe upon the exclusivity of representation which is a part of the agency agreement." PSF para. VI-N; DRPF para. VI-N.

[*224] Announcement of the new Atlas policy and its imminent implementation predictably triggered a challenge before the Interstate Commerce Commission. On August 16, 1982, in response to this challenge, the ICC *inter alia* affirmed Atlas's right to withdraw from its pooling agreement, holding that "nothing in [the] existing modified pooling agreement precludes withdrawal by any party from the agreement." *Atlas Van Lines, Inc - Pooling*, ICC Docket No. MC-F-14784, Finance Docket No. 29972 at 3 (August 16, 1982) (Appendix A to Second Amended Complaint). On February 17, 1983, moreover, the ICC announced that the new arrangement proposed by Atlas did not require a

---

[6] *See infra* note 22. The successive initiatives were:

a) *January 27, 1979*. Atlas began to require that carrier-agents pay to Atlas one percent of their revenues from the use of their independent authorities, in compensation for the benefits they received from Atlas in aid of their independent operations. This requirement remained in effect until the last quarter of 1979. PSF paras. VI-A - VI-B; DRPF paras. VI-A - VI-B.

b) *January 27, 1979*. Atlas announced a policy -- effective immediately -- prohibiting an agent from acquiring any new interstate authority or applying to add to his present interstate authority. Atlas states that despite its threats, it never enforced this policy, and publicly abandoned the policy by November, 1980. PSF paras. VI-A, VI-C - VI-D; DRPF paras. VI-A, VI-C - VI-D; DSF para. 45; PSGI para. 45.

c) *November 1, 1980*. Atlas approved a tentative plan to purchase the independent authorities of its carrier-agents. The plan was soon abandoned without implementation. PSF paras. VI-F - VI-G; DRPF paras. VI-F - VI-G.

d) *March 20, 1981*. Atlas announced a plan that allowed agents freely to hold, increase, and use independent authority (without necessarily setting up a separate carrier company), but that banned any use of Atlas agents for origin and destination services in connection with shipments under such independent authority. The plan was implemented on May 1, 1981. After ICC objection that the plan required a new pooling agreement, the plan was abandoned on May 21, 1981. PSF paras. VI-H - VI-J; DRPF paras. VI-H - VI-J.

[7] Atlas's Agency Agreements state that they are terminable by either party upon thirty days notice "without cause." PSF para. V-Q; DRPF V-Q; Plaintiffs' App. I.

new pooling agreement: [8] the ICC held that because the independent authority to be retained by the agents would be transferred to an entirely separate competitive entity outside of the Atlas network, no "pooling" between competitive carriers would be taking place **[**18]** and thus no pooling agreement was necessary. *Atlas Van Lines, Inc. - Pooling*, ICC Docket No. MC-F-14784, Finance Docket No. 29972 at 8-11 (February 17, 1983) (Appendix B to Answer to Second Amended Complaint). [9]

Soon after Atlas announced its new policy, it contacted all of its agents by mail and asked them to respond by signing a form indicating whether or not they would comply with the new requirements for Atlas agency. PSF paras. VI-S, VI-U; DRPF paras. VI-S, VI-U. Most if not all of Atlas's agents eventually did respond, and the policy went **[**19]** into effect on August 18, 1983. At the time the policy was announced, Atlas had approximately 490 agents, 91 of whom were carrier-agents. Following implementation of the new policy, 48 of the carrier-agents shifted their independent authority to separate corporations, 20 gave up their authority entirely but remained as Atlas agents, 12 were terminated by Atlas for failure to comply with the policy, and 11 chose to leave Atlas either to operate on their own or to become carrier-agents for one of the other national carriers. DSF para. 82; PSGI para. 82. In February, 1984, Atlas imposed on its reconstituted agents an enhanced system of fines to enforce its prohibition against shipment of non-Atlas hauls on Atlas-leased trucks, given that under the new arrangement, as noted, the use of Atlas's service and equipment infrastructure was intended to become restricted to Atlas shipments alone. *See* PSF para. VI-AA; DRPF para. VI-AA; Plaintiffs' Motion to Further Supplement Summary Judgment Pleadings, Attachment A (February 24, 1984).

Plaintiffs argue that the institution of the new Atlas policy represents a "boycott" of those Atlas agent companies that failed to comply, and that the Atlas **[**20]** policy constitutes price-fixing because it is aimed at preventing price-cutting by carrier agents in their independent capacities. As such, plaintiffs argue that Atlas's policy should be treated as a *per se* violation of the antitrust laws, and that even if the policy does not merit *per se* treatment, it nevertheless should be condemned under the rule of reason. Defendant responds by arguing that undisputed facts establish that 1) the institution of the policy is statutorily immune from the antitrust laws under *49 U.S.C. 10934(d)*, 2) *per se* treatment, as urged by the plaintiffs, is inappropriate, and 3) no violation under the rule of reason can be shown.

II.

It is necessary at the outset to determine whether undisputed material facts make it possible to resolve this matter on the pending cross-motions for summary judgment. ***HN4***[] Under *Fed. R. Civ. P. 56(c)*, a motion for summary judgment may be granted only when "there is no genuine issue as to any material fact and . . . the moving party is entitled **[*225]** to a judgment as a matter of law." It is well established that the undisputed facts and "inferences to be drawn" from those facts "must be viewed in the light most favorable **[**21]** to the party opposing the motion." *United States v. Diebold, Inc., 369 U.S. 654, 655, 8 L. Ed. 2d 176, 82 S. Ct. 993 (1962)* (per curiam). To support summary judgment, the record "must demonstrate that [the] opponent 'would not be entitled to [prevail] under any circumstances. '" *National Ass'n of Governmental Employees v. Campbell, 192 U.S. App. D.C. 369, 593 F.2d 1023, 1027 (D.C. Cir. 1978)* (quoting *Semaan v. Mumford, 118 U.S. App. D.C. 282, 335 F.2d 704, 705 n.2 (D.C. Cir. 1964))*.

Courts have been cautioned to be especially careful about premature termination of a cause of action filed under the federal antitrust laws. *Poller v. C.B.S., Inc., 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962)*. Nonetheless, summary judgment may well be appropriate even in an antitrust action where a court has permitted extensive discovery and the requirements of *Fed. R. Civ. P. 56(c)* have been met. *See First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 289-90, 20 L. Ed. 2d 569, 88 S. Ct. 1575 (1968)*. In this case, both

---

[8] *Compare supra* note 6, paragraph (d), where the ICC required a new pooling agreement.

[9] Plaintiffs sought to have this determination reviewed in the Court of Appeals for this Circuit, but the appeal was dismissed by agreement without the Court of Appeals having ever reached the merits. *See Rothery Storage & Van Co. v. Interstate Commerce Commission*, Agreement That Proceedings Be Dismissed (D.C. Cir. Nos. 83-1210, 83-1361) (filed February 6, 1984).

parties have moved for summary judgment, and their respective statements of undisputed material fact demonstrate that plaintiffs and **[**22]** defendant are in substantial agreement on the essential facts making up the core of this case. [10] On the basis of these facts, the Court concludes that the motions for summary judgment are ripe for disposition.

III.

HN5[] In order to prevail on a claim under Section 1 of the Sherman Act, a plaintiff must show both 1) the existence of a "contract, combination . . . or conspiracy," and 2) an unreasonable restraint of trade under either the *per se* rule or the rule of reason, as appropriate. Title *15 U.S.C. § 1 (1982)*; *see* ABA ***Antitrust Law*** *Developments* at 2 (2d ed. 1984). The undisputed facts demonstrate that plaintiffs in this action cannot meet either of these criteria.

A. Conspiracy.

Plaintiffs argue that a conspiracy to effectuate the Atlas policy in question existed 1) among the members of the Atlas board of directors, who voted to institute the policy, and 2) between Atlas and its agents in the field, who responded to Atlas's request for an indication of whether the agents **[**23]** would comply with Atlas's demands.

As to the alleged conspiracy among the members of the Atlas board of directors, it is firmly established that **HN6**[] the actions of a corporation's board of directors do not constitute a conspiracy within the meaning of Sherman Act § 1. *See* *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 2741 n.15, 81 L. Ed. 2d 628 (1984)*; *Harvey v. Fearless Farris Wholesale, 589 F.2d 451, 455 n.7 (9th Cir. 1979)*. A corporation, which can only function pursuant to the group decisions of the members of its board of directors, cannot in this fashion be found to have conspired with itself. *See* *Nelson Radio & Supply, Co. v. Motorola, Inc., 200 F.2d 911, 914 (5th Cir. 1952)*, *cert. denied*, *345 U.S. 925, 97 L. Ed. 1356, 73 S. Ct. 783 (1953)*. An exception to this rule may exist, however, where individual members of the board of directors possess an independent personal stake in a particular action of the board, that is, where they act "on their own behalf." *Copperweld, supra*, at n.15; *accord* *Smith v. Northern Michigan Hospitals, Inc., 703 F.2d 942, 950 (6th Cir. 1983)*. Plaintiffs attempt to invoke this exception on the ground **[**24]** that Atlas's board of directors included the executives of some of Atlas's own agents and carrier-agents, which are separate corporate entities, independent from Atlas and from each other; plaintiffs argue that the new Atlas policies would necessarily affect both the Atlas and non-Atlas business potential of these separate companies in some fashion and thus give the agent companies on the board an **[*226]** independent stake in whether the policy was adopted.

In an effort to illustrate and substantiate this claim, plaintiffs allege more specifically that one non-carrier agent represented on the board received a 2% royalty from Atlas for every shipment carried on Atlas's account within a certain geographic area, and thus stood to benefit individually from the adoption of the new policy because the new policy would predictably cause tonnage previously carried on the independent accounts of Atlas's carrier-agents to be shifted to Atlas's own account. Plaintiffs' Memorandum in Opposition to Defendant's Motion for Summary Judgment, at 10-12. Plaintiffs also observe that at least one carrier-agent represented on the board subsequently sought to benefit from the policy by competing more **[**25]** vigorously for the business of an agent that was experiencing difficulty complying with the new Atlas policy. *Id*. at 8-10. Thus, plaintiffs argue that in voting for the Atlas policy at issue, the executives of Atlas's agents and carrier-agents who served on Atlas's board had a sufficiently independent stake to render their participation in the decision a conspiracy within the meaning of the Sherman Act.

There exist two, independently sufficient grounds for rejecting plaintiff's claim. The first is that even if the allegedly conflicting interests of some directors sufficed to trigger the "personal stake" exception, Congress has provided a special exemption from the antitrust laws that would preclude liability on account of the alleged agreement in question. Title **HN7**[] *49 U.S.C. § 10934* provides, in pertinent part, that

---

[10] *See supra* note 2.

> d) The antitrust laws . . . do not apply to discussions or agreements between a motor common carrier . . . and its agents (whether or not an agent is also a carrier) related solely to . . . (4) *ownership of a motor common carrier . . . by an agent or membership on the board of directors of any such motor common carrier by an agent*.

(emphasis added). **[**26]** Defendant acknowledges that the agent companies represented on the board are separate entities from each other and from Atlas. Thus, the non-carrier and carrier-agents alike presumably possess at least some degree of interest in the success of their own companies, which on occasion may diverge from those of Atlas in general and other Atlas agents and carrier-agents individually. However, *49 U.S.C. 10934(d)* does not retain any "personal stake" exception. Rather ***HN8***[] it expressly allows agents and carrier-agents of a van line to serve on the van line's board of directors, participate in its deliberations and decisions, and exercise responsibility for the affairs of the principal free of the risk of antitrust lability for doing so, despite their obvious status as independent entities with at least these basic independent interests. *See infra* note 11. The statute, moreover, specifically immunizes "discussions and agreements" regarding the "ownership of motor common carriers" by a van line's agents. The legislative history of this provision clarifies that it was intended to "immunize carriers and their agents from the antitrust laws with respect to certain dealings between them." S. Rep. **[**27]** No. 497, 96th Cong., 1st Sess. 8 (1979). [11] Congress's aim, in particular, was to

> **[*227]** "assure[] that discussions between a principal carrier and its agents related solely to [*inter alia*] . . . pooling or divisions between the principal carrier and its agents . . . and ownership of a principal carrier by an agent . . . are not discussions that would be in violation of the antitrust laws."

S. Rep. No. 497, 96th Cong., 1st Sess. 17 (1979). Discussion, voting, and agreement within the board on a policy announcing the terms that are to govern such ownership as well as the policy's implementation -- as, it is undisputed, occurred in this case -- seem to fall squarely within the language and intent of this statutory exemption. The exemption provision, it must be noted, was enacted into law as an explicit component of Congress's deregulation package. Thus, Congress may fairly be understood as anticipating discussions and agreements after deregulation which addressed adjustments of the pre-existing relationships to the new business environment. The

---

[11] The relevant Senate Report language reads in full:

> There is also a provision in the act that immunizes carriers and their agents from the antitrust laws with respect to certain dealings between them. *This section is needed in order to permit the continued relationships developed and approved over the years of certain van line companies*. In some cases, van line companies are composed and owned by agents who themselves are carriers within limited geographical areas. In some cases, the agents, as carriers themselves, have independent authority to operate in areas in which the principal carrier also may operate. Accordingly, in the absence of immunity, there could be some problems concerning immunity from the antitrust laws. The bill merely permits existing relationships to continue. . . .

S. Rep. 497, 96th Cong., 1st Sess. 8 (1979) (emphasis supplied).

Analogous language in the House Report on this legislation reads:

> New *section 10934* also contains a provision which immunizes from the antitrust laws certain discussions exercise [sic] agreements between carriers and their agents related to rates, charges, and allowances for transportation provided under the authority of the carriers. Further, such discussions and *agreements related to the ownership of a carrier by an agent or membership on the carrier's board of directors by an agent are immune*. The purpose of this provision is to allow the continuation of certain relationships between carriers and agents which have been established over the years. In some cases, the carriers are composed and owned by agents who themselves are carriers within limited geographical areas. In other cases, the agents, as carriers themselves, have independent authority to operate in areas in which the principal carrier operates. These relationships could be jeopardized in the absence of antitrust immunity. It is important to note that these exemptions are narrow ones. Specifically, the immunity provided by subsections (d) (1)-(3) applies only to discussions or agreements related to rates, charges, and allowances offered on traffic carried under the authority of the principal carrier. Similarly, subsection (d)(4) provides only a limited exemption. It does not exempt from the antitrust laws such things as anticompetitive mergers.

H. Rep. 1372, 96th Congress, 1st Sess. at 10 (1979) (emphasis added).

material discussions and agreements at issue in this case related solely to whether "pooling" between Atlas and **[**28]** its agents would continue after deregulation, and, if not, to how the ownership of a principal carrier by an agent could be accomplished. Thus, the claim that the actions of the Atlas board of directors in this matter constitute a conspiracy within the meaning of the Sherman Act must be rejected. ***HN9***[] Congress appears to have expressly exempted the participation of agents and carrier-agents in the membership, deliberations, or agreements of a van-line's board of directors from the application of the antitrust laws where, as here, the subject matter of the discussions and agreements relates to the van line's policy with respect to the ownership of independent interstate authority by the van line's agents, including policies requiring change because of the business consequences of deregulation.

[29]** Plaintiffs argue that the statutory immunity works only in one direction: i.e., that *§ 10934(d)* immunizes decisions *allowing* agents to acquire independent authority and *become* carrier-agents, but that it does not immunize a decision *abolishing* an existing carrier-agent arrangement. Statement of Points and Authorities in Support of Plaintiffs' Motion for Partial Summary Judgment As To Liability at 12-14. The Court is well aware that Congress sought to ensure that carrier-agent arrangements would not be prohibited as a result of deregulation. However, Congress did not command that they be preserved, nor prohibit their abandonment. Under plaintiffs' view of *§ 10934(d)*, national van lines that prior to deregulation had permitted their agents to operate as carrier-agents would essentially be locked into that arrangement, while those that had not allowed their agents to obtain independent authority from the ICC would presumably be free to continue that policy. Yet there is nothing in the legislative history to support such an arbitrary result; indeed, the legislative history appears, if anything, to reaffirm the right of a van line to enforce traditional agency standards **[**30]** of loyalty and **[*228]** fiduciary duty upon its agents, as discussed below, and thus plaintiffs' argument must be rejected. *See infra* at slip op. pages 34-35 & note 17.

Alternatively, plaintiffs' effort to establish that the actions of the Atlas board of directors constituted a conspiracy within the meaning and scope of the Sherman Act must also fail in that -- even apart from the availability of statutory immunity -- plaintiffs do not proffer evidence or demonstrate a reasonable prospect that they could proffer or prove specific facts sufficient to invoke the "personal stake" exception.

HN10[] The antitrust laws look to substance, not to form. As noted, it may be inferred that each agent on the Atlas board of directors may well possess *some* independent interest in its own success apart from that of Atlas or its fellow agents, and that the benefits and detriments of the new policy may well accrue to each of them in a possibly distinct way. Yet other courts have observed that as long as employees or officers of a corporation have acted in accordance with their responsibility and authority to advance the interests of the corporation they serve -- and where plaintiffs have failed **[**31]** to proffer specific facts to the contrary -- no conspiracy within the meaning of the Sherman Act can be found. *See* *Green v. Associated Milk Producers, Inc., 692 F.2d 1153, 1156-57 (8th Cir. 1982)*; *Nelson Radio & Supply Co. v. Motorola, supra, at 914*. In the leading case supporting the existence of a "personal stake" exception, the personal interest in question was divergent from and possibly inconsistent with the corporate officer's responsibilities toward the corporation that the officer served. *See* *Greenville Publishing Co. v. Daily Reflector, Inc., 496 F.2d 391, 399-400 (4th Cir. 1974)* (cited in *Copperweld, supra, at 2741 n.15*). In *Greenville*, the plaintiff alleged the existence of a conspiracy between a newspaper and the newspaper's own president to eliminate the plaintiff from the local newspaper advertising market. The Court held that a sufficient "personal stake" was alleged in that the president held a direct financial interest in yet another local newspaper that would benefit from the increased advertising that *it too* would gain as a result of the plaintiff's elimination. A newspaper president's interest in a completely unrelated paper is, on its face, **[**32]** wholly divergent from and possibly inconsistent with the president's presumed responsibilities toward the newspaper of which he is president. In the instant case, by contrast, the separate agent companies are part and parcel of Atlas's own network. Atlas's success is to a large extent dependent upon -- rather than divergent from or inconsistent with -- the success of its agent companies, either individually or as a group. And after voluminous discovery, plaintiffs have failed to proffer any facts showing that the agent and carrier-agent votes on the Atlas policy were grounded in interests that were inconsistent with or divergent from the overall best interests of Atlas itself. [12] The "personal **[*229]** benefits" alleged -- increased royalties due to increased Atlas traffic, and increased bases for competition with other Atlas agents -- are wholly consistent with the unitary interests of Atlas and its agents to build a strong Atlas system. A stockholder/director of a company, for example, does not hold an impermissible personal benefit or act "on his own behalf" simply because his effort to advance the interests of the corporation would increase the value of his stock interest and **[**33]** the dividends paid to him. Here, similarly, careful evaluation of the facts proffered by plaintiff shows only that any advantage to the stockholder/director/agent was merely incidental to the advantage to the corporation, rather that inconsistent with or divergent from Atlas interests or with the Atlas agent/directors' responsibilities toward Atlas. *See also Card v. National Life Insurance, 603 F.2d 828, 834 (10th Cir. 1979)*. After considerable discovery, plaintiffs have not shown any reasonable possibility of proving otherwise. Plaintiffs, therefore, have failed to demonstrate any likelihood of proving the existence of a conspiracy within the Atlas board of directors or between the board and Atlas itself, for this reason as well as for the statutory immunity ground noted previously.

[34]** As to the alleged conspiracy between Atlas and its agents in the field, plaintiffs rely heavily on the fact that, soon after announcing its new policy, Atlas requested that its agents respond by indicating whether they would comply with the policy's terms. Plaintiffs contend that this communication represents negotiation or agreement, and as such satisfies the "conspiracy" requirement of their Sherman Act *§ 1* claim.

Again, there are two reasons for rejecting plaintiffs' claim. First, even if Atlas's communication with its agents did constitute an "agreement," such activity appears also to be immunized from the antitrust laws under *49 U.S.C. § 10934(d)*. As noted, that provision expressly immunizes "discussions and agreements" between a van line and its agents relating to "ownership of a carrier by an agent." Atlas's effort to determine the intentions of its agent." Atlas's effort to determine the intentions of its agents in response to the announcement of its change in policy regarding the ownership of independent carrier authority by its agents falls squarely within the language and intent of the statutory exemption. *See supra* pages slip op. at 19-23.

Alternatively, even apart **[**35]** from the availability of such statutory immunity, plaintiffs have not proffered facts sufficient to establish a vertical conspiracy. Plaintiffs have not demonstrated, nor does it appear that they can demonstrate, that Atlas's actions amounted to anything other than the unilateral announcement of a policy change and its subsequent implementation. The Supreme Court, in its last term, reaffirmed that ***HN13***[] "[a] manufacturer of course generally has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently." *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 104 S. Ct. 1464, 1469, 79 L. Ed. 2d 775*

---

[12] The insistence on such a showing is further supported by principles recently set forth by the Supreme Court's decisions in *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*, and *Copperweld, supra.* In *Monsanto*, the Court indicated that ***HN11***[] a finding of conspiracy could not be sustained on the basis of evidence merely "consistent" with illegal coordination between a manufacturer and its independent distributors. Rather, a plaintiff must proffer specific evidence "inconsistent" with the defense of unilaterality. *Monsanto, supra, at 1473*. An analogous distinction provided the basis of the decision in *Copperweld*, where the Court rejected the proposition that a corporation can conspire with its separately incorporated but wholly owned subsidiary. *Copperweld, supra, at 2742-45*. The Court observed that "Coordination within a firm is as likely to result from an effort to compete as from an effort to stifle competition," *id. at 2741*, or, in other words, that the challenged behavior was, by itself, just as "consistent" with the "effort to compete," legitimately, as it was with the "effort to stifle competition." The Court thus seems to suggest that in such circumstances, the antitrust laws can only be triggered by proffering evidence of behavior "inconsistent" with otherwise legitimate purposes.

In the instant case, thus, ***HN12***[] the mere showing of a "personal benefit" traceable to an agent on the Atlas board of directors should not suffice to trigger the "independent stake" exception -- assuming one exists -- unless plaintiffs also proffer evidence showing that the personal benefit in question was inconsistent with or divergent from Atlas's own competitive interests. There is a longstanding presumption that the members of a corporation's board of directors are incapable of conspiring with themselves under the Sherman Act in that there is no other way that a corporation can advance its competitive interests, *see Nelson Radio, supra*, and, thus, the Court is reluctant to find that the plaintiffs have demonstrated the existence of "the plurality of actors imperative for a *§ 1* conspiracy," *Copperweld, supra, at 2741*, without a proffer of evidence suggesting that the personal benefits derived from the board's actions were inconsistent with or divergent from the interests of Atlas itself.

(1984). The same principle applies in a case such as this one. [13] As the analysis in **[*230]** *Spray-Rite* makes clear, plaintiffs here can only succeed in showing a conspiracy by offering specific, direct evidence inconsistent with the defense of unilaterally and indicating that Atlas and its agents had a "conscious commitment to a common scheme designed to achieve an unlawful objective." *Id. at 1473*. While plaintiffs demonstrate that Atlas kept in regular touch with its agents -- informing them of the substance of the policy and seeking to **[**36]** elicit responses -- such actions are wholly consistent with good management and planning. *Cf. id. at 1470*. Despite extensive discovery, on the other hand, plaintiffs offer no evidence inconsistent with the proposition that the policy announcement and implementation was a unilateral act on Atlas's behalf.

Plaintiffs, thus, have failed to demonstrate that the actions of the agents on Atlas's board of directors or in the field can in any way **[**37]** be deemed to constitute a conspiracy within the meaning or scope of *Section 1* of the Sherman Act.

B. Unreasonable Restraint of Trade.

Even if plaintiffs were able to satisfy the "conspiracy" requirement necessary to establish a Sherman Act *§ 1* violation, plaintiffs would still have to establish that Atlas's policy constituted an "unreasonable restraint of trade." Plaintiffs stress that the immunity granted by Congress with the enactment of *49 U.S.C. § 10934 (d)* was meant to be a "limited" one and was not intended to protect "such things as anticompetitive mergers," H. Rep. 1372, 96th Cong., 1st Sess. 10 (1979). Plaintiffs argue that the competitive restraint imposed by the Atlas policy must therefore be evaluated in any event to determine whether it might fall outside of the immunity provision's intended scope.

Assuming, *arguendo*, that a conspiracy has been demonstrated and that no statutory immunity applies, the Court would next have to determine whether to apply "per se" treatment to the evaluation of the practice in question, as urged by plaintiffs, or whether to apply the "Rule of Reason," as urged by defendant.

1) *Per se treatment*.

Plaintiffs contend, as indicated **[**38]** above, that the institution of the new Atlas policy represents a "boycott" of those Atlas agents who refused to comply with the policy, and that it also represents a "price-fixing" scheme, in that it is allegedly aimed at preventing price-cutting by carrier-agents in their independent capacities. [14]

HN15[] Boycotts and price-fixing schemes, when proven, have often been accorded *per se* treatment. [15] Nonetheless, the Court of Appeals of this Circuit has warned that

---

[13] In *Spray-Rite, supra*, the Supreme Court confirmed the vitality of *United States v. Colgate & Co., 250 U.S. 300, 63 L. Ed. 992, 39 S. Ct. 465 (1919)*. As the Court explained:

> Under *Colgate*, ***HN14***[] the manufacturer can announce its resale prices in advance and refuse to deal with those who fail to comply. And a distributor is free to acquiesce in the manufacturer's demand in order to avoid termination.

Spray-Rite, supra, at 1469. The *Colgate/Spray-Rite* doctrine applies to non-price terms of dealing -- such as those in this case -- as well.

[14] Plaintiffs theorize that the new policy tended to cause either of two outcomes: 1) agents abandoned or failed to seek independent authority under which they might have charged lower prices for moving services comparable to those that they were providing as Atlas agents, or 2) agents transferred their independent authority to separate corporations, and the additional cost of doing so dampened their ability to charge lower rates on the independent shipments.

[15] As noted, it is typical in the moving industry for the agents of a van line to enter into exclusive dealing agreements with the van line; i.e., they agree not to provide van line services to any company that is not also an agent of the van line that they serve. Plaintiffs argue that this practice should in this case be treated as an antitrust violation because it is an integral part of Atlas's alleged boycott and price maintenance schemes. Though exclusive dealing arrangements are traditionally treated under the Rule of Reason, plaintiffs contend that here they should be treated as part of Atlas's other *per se* violations.

> A *per se* rule is a judicial shortcut; it represents the considered judgment of **[**39]** courts, after considerable experience with a particular type of restraint, that the rule of reason -- the normal mode of analysis -- can be dispensed with. As the Supreme Court explained in *Northern Pacific Railway Co. v. United States*, "there are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the **[*231]** precise harm they have caused or the business excuse for their use." A court will not indulge in this conclusive presumption lightly. Invocation of a *per se* rule always risks sweeping reasonable, pro-competitive activity within a general condemnation, and a court will run this risk only when it can say, on the strength of unambiguous experience, that the challenged action is a "naked restraint[] of trade with no purpose except stifling of competition."
>
> The Supreme Court emphasized the "demanding standards" of *Northern Pacific Railway* last term in *Continental T.V., Inc. v. GTE Sylvania Inc*. Reiterating that **HN16**[] "*per se* rules of illegality are appropriate only when they relate to conduct that **[**40]** is manifestly anticompetitive," the Court overruled *Arnold, Schwinn & Co*., which had held certain vertical restraints illegal *per se*. The *Continental* Court noted that the vertical restrictions in question possessed "redeeming virtues" in their stimulation of inter-brand competition; that the restrictions were "widely used in our free market economy"; and that there existed "substantial scholarly and judicial authority supporting their economic utility." For these reasons, the Court held that the restraints at issue were to be analyzed not under a *per se* rule, but under the rule of reason.

Smith v. Pro-Football, 193 U.S. App. D.C. 19, 593 F.2d 1173, 1181 (D.C. Cir. 1978) (footnotes omitted).

[41]** In *Smith v. Pro-Football*, the Court of Appeals refused to apply the *per se* rule in its evaluation of the NFL player draft. In this case, the Court similarly declines to apply the *per se* rule in evaluating Atlas's response to the changes accompanying deregulation of the household goods moving industry. Deregulation abruptly re-organized the rules at the foundation of the moving industry. Analysts are still examining the impact of these changes. *See* Plaintiffs' App. P, Q. No court has apparently yet closely analyzed the unique nature of the business relationship between van lines and their carrier-agents, at least as the relationship affects the carrier-agents' exercise of their independent authority. [16] **HN17**[] "Considerable" and "unambiguous" experience with the practice at issue is a necessary prerequisite for application of *per se* treatment, and the Court finds that -- given the unusual nature of the van line/carrier-agent relationship, and given the general confusion following deregulation -- such experience is simply absent in the present case. Moreover, the Atlas policy allows agents the option of retaining their independent authority in separate companies, or becoming **[**42]** carrier-agents of a different van line, and thus the Court is reluctant to term the policy as "pernicious." Also, it simply cannot be accepted that the new Atlas policy has "no purpose except the stifling of competition" or that it is without "any redeeming virtue." Plaintiffs cannot reasonably dispute that Atlas was fully within its rights when it terminated its pooling agreement, or that Atlas's new policy will enhance inter-carrier competition among the national van lines, as explained below. Finally, it is worth noting that the new Atlas policy represents nothing more than the adoption of a method of operation -- exclusive agency -- that is "widely used" not only in the van line industry, but throughout commerce. In sum, the Court finds that the "demanding standards" for application of *per se* treatment have simply not been met. Rather, "the courts have had too little experience with this type of restraint, and know too little of the 'economic and business stuff' from which it issues, confidently to declare it illegal without undertaking **[*232]** the analysis enjoined by the rule of reason." Id. at 1182 (footnote omitted).

[43]** 2) *Rule of Reason*.

---

[16] *Cf.* North American Van Lines, Inc. v. I.C.C., 666 F.2d 1087, 1094-96 (7th Cir. 1981) (van line challenge against ICC regulations implemented after deregulation) ("There was no evidence before us regarding the customary arrangements . . . between national carriers and their agents."); *Clemmer v. North American Van Lines, Inc*., 1969 Trade Cases para. 72,936, at 87609 (E.D. Pa. 1969) (van line's allocation of exclusive territories between agents deemed not in violation of the antitrust laws) (policy in question did not affect carrier-agents' independent shipments).

Plaintiffs argue that the initiation of Atlas's new policy can be condemned even under the rule of reason. Guidance may once again be taken from the opinion of the Court of Appeals of this Circuit in *Smith v. Pro Football, supra*, where the Court of Appeals stated that:

> ***HN18***[] Under the rule of reason, a restraint must be evaluated to determine whether it is significantly anticompetitive in purpose or effect. In making this evaluation, a court generally will be required to analyze "the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed." If, on analysis, the restraint is found to have legitimate business purposes whose realization serves to promote competition, the "anticompetitive evils" of the challenged practice must be carefully balanced against its "procompetitive virtues" to ascertain whether the former outweigh the latter. A restraint is unreasonable if it has the "net effect" of substantially impeding competition.

Id. at 1183.

This memorandum has already described the "facts peculiar to" the van line and moving industry, and the recent legislative and regulatory changes leading to the new Atlas **[**44]** policy. Prior to deregulation, Atlas had given its carrier-agent companies permission to use the Atlas infrastructure to compete with Atlas itself, for their own accounts, within the boundaries set by federal regulations and ICC oversight. ***HN19***[] Classic agency law, however, gives a principal the prerogative of withdrawing such permission if convenient to protect the principal's interests. *See* *Restatement of Agency, Second §§ 1 (1)*, *14N*, *393-394*. Nothing in the legislative history of Congress's deregulation of the household moving goods industry suggests that when Congress removed the regulatory restrictions on carrier-agent independent operations, it added a restriction barring van lines from exercising this prerogative. Indeed, the legislative history of the measure shows just the opposite: that Congress had no intention of disturbing the ability of a van line to reach agreements enforcing "the fiduciary duty of loyalty of an agent not to compete with its principal concerning the subject matter of the agency." S. Rep. 497, 96th Cong., 1st Sess. 8. [17] **[**46]** Congress may well have speculated that by widening the regulatory boundaries on carrier-agent independent operations, it would have triggered **[**45]** more independent operation of that sort. However, when it lifted those restrictions, it did so -- consistent with the free market philosophy supporting deregulation in general -- to create an *option*, not a *mandate*. [18] **[*233]** Congress, thus, left each individual van line free to fashion

[17] The Senate Report discussion of this matter reads in full:

> During the course of its deliberations, the Committee considered a proposal to include within the immunity section language that would grant immunity to agreements concerning exclusive agency representation, or the fiduciary duty of loyalty of an agent not to compete with the principal concerning the subject matter of the agency. The Committee determined that this type of relationship is not a violation of the antitrust laws and is standard agency law as expressed in *section 393 of the Restatement* of the Law of Agencies section. The Committee felt that inclusion of such language could imply that such relationships are a violation of the antitrust laws in the absence of immunity. Thus, the Committee determined not to include such language in the bill.

S. Rep. 497, 96th Cong., 1st Sess. 8 (1979). Neither party makes any issue of the portion of this passage explaining that "the Committee determined not to include" language in the bill that might have immunized exclusive agency or fiduciary duty agreements directly. Thus, it is not necessary to resolve any questions that might arise from the fact that such language was consciously excluded. However, the Court is inclined to agree with the observation of the Senate Committee that "this type of relationship is not a violation of the antitrust laws," *id. Cf.* *Delta Data Systems Corp. v. Webster, 744 F.2d 197*, slip op. at 8-9 (D.C.Cir. Sept. 21, 1984) (valid to consider GAO report as persuasive even if not binding).

[18] The House Report on the legislation states, under the heading "Section 2. Declaration of Policy," that:

> Section 2 sets forth congressional policy with respect to the household goods moving industry. The emphasis in the policy statement is threefold -- *the reduction of unnecessary regulation*, the strengthening of consumer remedies and protections, *and the establishment of maximum carrier flexibility* in pricing their services and meeting the needs of their shippers.

H. Rep. 1372, 96th Cong., 1st Sess. 5 (1979) (emphasis added). *See also* S. Rep. 497, 96th Cong., 1st Sess. 8 (1979) ("The bill merely *permits* existing [carrier-agent] relationships to continue." (emphasis added)).

its own response to deregulation -- or, in Atlas's case, to the prospect of widescale price competition from its own agents using the van line's own infrastructure. Atlas's choice was to protect against the further diversion of its own business infrastructure in this fashion, and instead to strengthen its competitive position by returning to a traditional agency arrangement whereby its agent companies serve Atlas alone. As such, the new Atlas policy plainly had a legitimate business purpose, and is consistent with policies chosen by Congress with respect to the choice between regulation and competition in this industry.

In an effort to identify the "anticompetitive evil" of the challenged practice, plaintiffs stress that, upon the implementation of the new Atlas policy and the resultant withdrawal of access to Atlas services and equipment for use on independent shipments, several carrier-agents ceased their independent operations entirely. Others adapted by shifting their independent authorities to separate **[**47]** corporations or abandoning Atlas to become carrier-agents for some other major van line, and plaintiffs adduce facts showing that these latter groups of agents incurred significant expense in doing so.

HN20[] One of the basic tenets of the federal antitrust laws, however, is that they are intended to protect *competition*, not *competitors. Copperweld, supra, at 2740 n.14*. The Court must look not to whether individual agents incurred losses as a result of the new policy, but rather to the extent to which the Atlas policy somehow impeded the opportunity of Atlas agents to utilize their independent authority in the market for moving services. On this score, it is necessary to reiterate that the new Atlas policy does not absolutely bar an Atlas agent from exercising independent interstate authority. The agent company itself must serve Atlas alone, but agents *may* exercise independent authority if that authority is placed in an affiliated but commercially separate company. Because the separate company must develop its own service and equipment infrastructure, the true effect of the Atlas policy is, in essence, only to prevent agents who do exercise independent authority from appropriating **[**48]** to themselves any aspect of the Atlas network for the support services and overhead equipment necessary to operate that interstate authority beyond any great distance. The new arrangement essentially terminates a subsidy previously available to an Atlas carrier-agent at the expense of Atlas. At the same time, agents who wish to continue to operate as "carrier-agents" are not barred from seeking to join one of the other van lines that do subsidize carrier-agents in this way. Thus, the only enduring anticompetitive harm demonstrated by the plaintiff is the loss of the opportunity to continue to operate in a traditional carrier-agent relationship with Atlas itself.

In reaching this conclusion, the Court has not overlooked the fact that Atlas has also required its carrier-agents to refrain from transferring their established names as Atlas agents to the corresponding non-Atlas affiliate companies created as a result of the carrier-agents' compliance with the Atlas policy. In any given case, this requirement bars the new, non-Atlas entity from access to the goodwill -- as it is represented in the carrier-agent's established name -- that has been built up as a result of the carrier-agent's **[**49]** *Atlas* relationship. At the same time, though, it also deprives the independent entity of any goodwill that might have been fairly allocable to *it* due to the carrier-agent's own independent operations. *See* DSF para. 58; PSG1 para. 58. The **[*234]** reasonableness of this feature of the Atlas policy may be viewed differently by different courts. It passes muster here because plaintiffs have not proffered evidence that would indicate the relative burden that Atlas would have borne had it permitted its carrier-agents to transfer their established names to the new, non-Atlas entities, if the agents had so wished, as opposed to requiring its carrier-agents to give the new entities different names instead. [19] Indeed, even if there were such evidence, it would necessarily be speculative. And in addition, each carrier-agent, as noted, had the clear option of operating completely independently, or of seeking to associate with another van line that would permit carrier-agent or independent operations under that name.

[50]** In judging the reasonableness of the Atlas policy, it should be noted that plaintiffs appear to have conceded that a van line is fully entitled to abandon its agency network altogether, or choose to operate exclusively with agents that have no independent interstate authority at all -- i.e., no independent interstate authority either within

[19] It is worth noting, in this regard, that one other major van line has determined to accept the costs of permitting its carrier-agents to shift their established names to such newly created separate entities. *See* DSF para. 79. Counsel for the defendant may themselves yet decide, out of an abundance of caution and in anticipation of a possible appeal, to recommend to Atlas the adoption of this more conservative approach.

the agency company or within a separate, affiliated company. *See* Transcript of Hearing, August 6, 1984, at 19 - 23. At least one major van line other than Atlas does indeed operate in such a manner. [20] The arrangement now being enforced by Atlas, however, is one that is *less* extreme. Agents are expressly *permitted* to continue to operate their own, independent authority as long as it is located within an "affiliated" but separately incorporated company. The Court of Appeals for this Circuit faced an analogous situation in *United States v. Studiengesellschaft Kohle, 216 U.S. App. D.C. 303, 670 F.2d 1122 (D.C. Cir. 1981)*. That case involved the holder of a process patent who had granted licenses to several manufacturers, allowing all of them to use the process to produce products for their own use but allowing only one of them to **[**51]** sell the resultant product in the open market. The plaintiff manufacturers challenged this "restraint." The Court of Appeals however, noted that the patent-holder was legally entitled to grant an exclusive manufacturing and sales license to a *single* licensee if he so desired, and that therefore, the patent-holder could not be deemed to have acted "unreasonably" under the antitrust laws for having taken the less extreme step of licensing additional manufacturers subject to the condition that the resultant product be restricted to their own use. *Id. at 1128* - 31, 1135. Similarly, if Atlas would be entitled to choose to continue doing business only with agents that possess no interstate authority whatsoever, then Atlas would presumably be entitled -- without being found to have acted unreasonably -- to take the less extreme step represented by the Atlas policy in question. [21] *See also Red Diamond Supply, Inc. v. Liquid Carbonic* ***[*235]*** *Corp., 637 F.2d 1001, 1006-07* (5th Cir.), *cert. denied*, *454 U.S. 827, 102 S. Ct. 119, 70 L. Ed. 2d 102 (1981)*. Rather than choosing to do business only with agents who have no independent authority whatsoever, Atlas *allows* its **[**52]** agents to possess independent authority as long as they place it in a separate company and look elsewhere than to Atlas for the support and overhead services necessary to utilize that authority. It is difficult to regard this tempered action as "unreasonable" within the meaning of the Sherman Act, or to see what other proof plaintiffs could muster to change this conclusion.

[53]** Finally, to the extent that Atlas's policy has any legally cognizable anticompetitive effect, there stands balanced against it the plain and significant procompetitive impact on competition among the national van lines. Plaintiffs do not dispute in any material way that enforcing traditional agent loyalty upon Atlas agents will strengthen Atlas's competitive position vis-a-vis the other national van lines, particularly those that already require their agents to work with them alone. Plaintiffs concede that carrier-agency reduced the amount of traffic carried on Atlas's account, PSGI para. 22, and cannot plausibly argue that carrier-agency did not or would not expose Atlas to increased liability -- at least to some extent -- for shipments carried out under Atlas's actual or *apparent* authority. *See* PSGI paras. 31-34. Atlas's new policy eliminated these competitive vulnerabilities, and thus, as shown above, had a legitimate business purpose with a plain procompetitive effect. Therefore, considering the nature and overall competitive effect of the announcement and implementation of the new Atlas policy, the Court finds from undisputed facts that plaintiffs are unable to show **[**54]** that Atlas's actions violated the rule of reason. [22]

IV.

---

[20] Plaintiffs themselves report that "Allied Van Lines, the largest van line, allows no firm affiliated with it to have or to use authority to conduct interstate operations competitive with its own. This arrangement was approved and immunized from the antitrust laws by the Interstate Commerce Commission in 1946, following an antitrust action suit brought by the Justice Department. *Evanston Fireproof Warehouse, et al., - Control - Allied Van Lines*, 46 M.C.C. 557 (1946)." PSF para. III-I.

[21] The court does not itself face the question, nor intimate any ruling, on whether indeed it would be valid under the antitrust laws for a van line to take the more extreme step of banning its agents even from having separate affiliates exercise independent carrier authority. Suffice it to note that plaintiffs, having *conceded* that a van line is entitled to take such extreme action, *see* Transcript of Hearing, August 6, 1984, at 19-23, are in no position to argue that Atlas's less extreme action is unreasonable. Given that Atlas bars only the exercise of independent authority by the agency companies themselves, the policy goes no farther than is necessary to enforce traditional agency standards upon the agent companies alone. The discussion above demonstrates the reasonableness of a policy that is limited in this fashion.

[22] To the extent that plaintiffs' claims also challenge Atlas's earlier, aborted efforts to cope with the advent of deregulation, *see supra* note 6, the Court similarly finds that no violation of the rule of reason can be demonstrated. Even apart from whether the "conspiracy" requirement can be met as to these earlier Atlas actions, the Court finds that their short duration, the prerogative of Atlas to impose traditional agency standards upon its agents, and the procompetitive aim of the actions establish that they cannot be deemed "unreasonable" under the Sherman Act.

For the foregoing reasons, the Court concludes as a matter of law from undisputed material facts that defendant's actions in requiring its agents to refrain from independent carrier operations, except through separate corporate affiliates, does not violate *Section 1* of the Sherman Act. Accordingly, an accompanying order will deny plaintiff's motion for partial summary judgment as to **[**55]** liability, and will grant defendant's motion for summary judgment.

ORDER

For reasons set forth in any accompanying Memorandum, it is this 30th day of October, 1984, hereby

ORDERED, ADJUDGED and DECREED: that plaintiffs' motion for summary judgment should be, and hereby is, DENIED; and it is further

ORDERED, ADJUDGED and DECREED: that defendant's motion for summary judgment should be, and hereby is, GRANTED; and it is further

ORDERED: that this action should be, and hereby is, DISMISSED.

Opinion

[*1121] RULING ON DEFENDANTS' MOTIONS FOR SUMMARY JUDGMENT

EGINTON, District Judge.

Plaintiff is engaged in the business of selling hydraulic and pneumatic systems and components in the New England states. It alleges that the defendant Versa Technologies, Inc., through its Milwaukee Cylinder division (hereinafter "Milwaukee"), unlawfully terminated plaintiff as an authorized distributor/representative of Milwaukee products. Both defendants have filed motions for summary judgment dismissing plaintiff's claim. Defendant Power Draulics-Nielsen, Inc. (hereinafter "PDN") has also moved for summary judgment on its counterclaim.

Summary judgment should not be improvidently granted, **[**2]** especially in an antitrust case. Reversal of an imprudent grant of summary judgment in defendants' favor would delay the start of plaintiff's trial. Nevertheless, legal issues which may be resolved short of trial should be decided. ***HN1***[] In order to prevail on a motion for summary judgment, the movant must show that there is no genuine issue of material fact and that judgment should be entered as a matter of law. *Robertson v. Seidman & Seidman, 609 F.2d 583, 591 (2d Cir.1979)*. Therefore, the court is permitted pursuant to *Fed.R.Civ.P. 56(d)* to ascertain those material facts which are not substantially controverted and to determine those questions of law dependent upon uncontroverted facts.

In August 1972, plaintiff was authorized to act as Milwaukee's exclusive sales agent in southern Connecticut. Occasionally plaintiff purchased Milwaukee products from Milwaukee Cylinder as a distributor for resale. It is alleged that in 1979 Milwaukee authorized plaintiff to sell Milwaukee products throughout the entire state of Connecticut, thereby allowing plaintiff to **[*1122]** compete with another distributor/representative, Fluid Kenetics. It is undisputed that on December 3, 1980, Milwaukee **[**3]** notified plaintiff that it would be terminated effective January 3, 1981. Apparently Fluid Kenetics was terminated also by Milwaukee. In their place, Milwaukee appointed defendant PDN as its exclusive distributor/representative in New England. For a period of time, plaintiff was able to place orders for Milwaukee products through a Milwaukee dealer in New York, but incurred a substantial reduction in profits.

Plaintiff claims the defendants violated Section 1 of the Sherman Act, sections 35-26, 35-27, and 35-28 of the Connecticut Anti-Trust Act, and the Connecticut Unfair Trade Practices Act. In addition, it is alleged that Milwaukee violated the Connecticut Franchise Act and the covenants of good faith and fair dealing. PDN is alleged to have intentionally and improperly interfered with plaintiff's business relations.

By counterclaim, PDN argues that plaintiff instituted its action for the purpose of harassment, in the absence of a colorable claim, with malice and without probable cause. Summary judgment is requested for the defendants on both the complaint and the counterclaim. For the reasons set forth below, the Motions for Summary Judgment are denied.

FEDERAL ANTITRUST

[4]** In count I of its complaint, plaintiff claims that the defendants entered into a conspiracy in violation of Section 1 of the Sherman Act to terminate plaintiff as Milwaukee's representative/distributor and to appoint PDN as Milwaukee's representative for New England. Defendants have moved for summary judgment on the basis that ***HN2***[] the mere substitution of sales agents does not violate ***antitrust law***. *Ace Beer Distributors, Inc. v. Kohn, Inc., 318 F.2d 283 (6th Cir.1963)*. This is a correct assessment of the law, but plaintiff is alleging more than mere substitution. Where a refusal to deal is not unilateral but is prompted by an understanding with other parties, there may be an antitrust violation. *Cernuto, Inc. v. United Cabinet Corp., 595 F.2d 164, 168 (3rd Cir.1979)*. Plaintiff is alleging ***HN3***[] a vertical restraint, i.e., a combination of persons at different levels of the market structure, such as one between manufacturers and distributors. *Oreck Corp. v. Whirlpool Corp., 579 F.2d 126, 131* (2d Cir.), *cert.*

denied 439 U.S. 946, 99 S. Ct. 340, 58 L. Ed. 2d 338, *rehearing denied 439 U.S. 1104, 99 S. Ct. 883, 59 L. Ed. 2d 65 (1978)*. Vertical restrictions are not *per se* **[**5]** violations of the Sherman Act, when the alleged agreement is an exclusive distributorship. *Id*. Plaintiff was Milwaukee's sole representative in southern Connecticut. *See* Exhibit B to the complaint.

The "rule of reason" test must, therefore, be applied. The alleged agreement between Milwaukee and PDN is violative of section 1 of the Sherman Act only if it is anticompetitive in purpose or effect. *Oreck Corp., 579 F.2d at 126*.

Plaintiff claims that it has been deprived of the Milwaukee product line, which it cannot effectively replace. *See* Gaudet Affidavit of Aug. 24, 1984, at 4. It is contended that because 40% of plaintiff's customers in the Connecticut area were purchasing Milwaukee products and these customers accounted for 80% of plaintiff's total sales, plaintiff lost sales not only of Milwaukee cylinders, but also of other products as well. Complaint, para. 37; Gaudet Affidavit of Aug. 24, 1984 at 4.

Plaintiff argues that one of the purposes of the conspiracy was to damage the ability of the plaintiff and of Fluid Kenetics to compete with PDN in the sale of other products. There is evidence that the competitors' cylinders were not met with the same level of acceptance **[**6]** from plaintiff's customers. Gaudet Affidavit of Aug. 24, 1984 at 4. In fact, plaintiff argues that because Milwaukee cylinders were the "Cadillac" of cylinders, there is no real competition at all. The facts are disputed on this issue. Milwaukee claims that there is not much difference between its cylinders and those of its competitor, Wabco. As evidence, it offered the deposition of **[*1123]** plaintiff's sales manager. Deposition of Pueschel, Sept. 30, 1981 at 33-34. Although the availability and price of Milwaukee products have not been affected, the market for other products may have been adversely impacted. *Westman Commission Co. v. Hobart Corp., 461 F. Supp. 627 (D.Colo.1978)*. Hence, there is a genuine dispute as to material facts and summary judgment may not be granted as to this issue.

In addition, plaintiff argues that Milwaukee terminated two dealers, both of whom were directly competing in the sale of Milwaukee products in northern Connecticut, and replaced them with one dealer, thereby eliminating intrabrand competition. There was apparently no written agreement authorizing plaintiff to sell Milwaukee products in northern Connecticut. However, plaintiff claims that **[**7]** an agreement was made. Complaint para. 23. Milwaukee has offered no evidence to dispute this. ***HN4***[] Suppression of intrabrand competition is lawful only if intrabrand competition acts as a check on the exploitation of intrabrand market power. *Alladin Oil Co. v. Texaco, Inc., 603 F.2d 1107, 1116 (5th Cir.1979)*. Because there is a dispute as to whether there is any real intrabrand competition, summary judgment is inappropriate at this time.

CONNECTICUT ANTI-TRUST ACT

The Connecticut Anti-Trust Act, Conn.Gen.Stat. §§ 35-24-35-44, incorporates various provisions of the federal anti-trust laws, especially § 1 of the Sherman Act. *Elida, Inc. v. Harmor Realty Corp., 177 Conn. 218, 226, 413 A.2d 1226 (1979)*. For the reasons stated in the previous section, summary judgment is denied as to count II of the complaint.

THE CONNECTICUT UNFAIR TRADE PRACTICES ACT

Defendants Milwaukee and PDN have moved for summary judgment also as to count III of the complaint. ***HN5***[] *Conn.Gen.Stat. § 42-110b*, the Connecticut Unfair Trade Practices Act (CUTPA), provides that "no person shall engage in unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or **[**8]** commerce." *McLaughlin Ford, Inc. v. Ford Motor Co., 192 Conn. 558, 473 A.2d 1185 (1984)* sets forth the required elements of proof under the Act. The plaintiff must establish either unfair methods of competition or unfair or deceptive acts or practices which have a potential effect on the general consuming public. A business person can maintain a CUTPA cause of action without showing consumer injury.

As noted in the *McLaughlin* opinion, ***HN6***[] Connecticut courts have adopted the Federal Trade Commission's "cigarette rule" as furnishing appropriate criteria by which to determine whether a given practice is unfair.

> (1) Whether the practice, without necessarily having been previously considered unlawful, offends public policy as it has been established by statutes, the common law, or otherwise -- whether, in other words, it is within at least the penumbra of some common law, statutory or other established concept of unfairness; (2) whether it is immoral, unethical, oppressive or unscrupulous; (3) whether it causes substantial injury to consumers (competitors or other businessmen). *192 Conn. at 568, 473 A.2d 1185*.

Based upon the preceding sections of this opinion, the **[**9]** court finds that there is a material issue of fact as to whether the defendants' alleged conduct offended a public policy.

The defendants argue that CUTPA is inapplicable because there is no potential effect on the consuming public. Conn. Public Act 84-468 recently amended CUTPA so as to not require proof of public interest or public injury. However, the act takes effect from its passage. A statute affecting substantive rights is intended to apply prospectively only. *Nagle v. Wood, 178 Conn. 180, 187, 423 A.2d 875 (1979)*. Thus, plaintiff must establish a potential **[*1124]** effect on the public. As previously discussed in the antitrust section of this opinion, there is a genuine issue of material fact concerning the effect of the defendants' alleged conduct on intrabrand and intrabrand competition.

THE CONNECTICUT FRANCHISE ACT

In count IV of its complaint, plaintiff alleges that Milwaukee's termination of its agreement with plaintiff was a violation of the Connecticut Franchise Act, *Conn. Gen.Stat. §§ 42-133e -- 42-133h*. ***HN7***[] If a business relationship constitutes a franchise within the meaning of the Act, it may not be terminated except upon good cause and upon sixty days **[**10]** written notice. Defendants maintain that the Act is not applicable, because the relationship between plaintiff and Milwaukee was not than of a franchise.

HN8[] *Conn.Gen.Stat. § 42-133e(b)* provides the definition of a franchise.

> "Franchise" means an oral or written agreement or arrangement in which (1) a franchisee is granted the right to engage in the business of offering, selling or distributing goods or services under a marketing plan or system prescribed in substantial part by a franchisor . . . and (2) the operation of the franchisee's business pursuant to such a plan or system is substantially associated with the franchisor's trademark, service mark, trade name, logotype, advertising or other commercial symbol designating the franchisor or its affiliate . . . .

Milwaukee contends that it did not prescribe, in substantial part, a marketing plan for the plaintiff and that plaintiff's business was not substantially associated with its trade name.

The first question is whether plaintiff was granted the right to engage in offering, selling or distributing Milwaukee products under a marketing plan or system prescribed in substantial part by Milwaukee. It is undisputed **[**11]** that there was an agreement between plaintiff and Milwaukee whereby plaintiff was granted the right to act as Milwaukee's representative for the sale of Milwaukee products. In *Consumers Petroleum of Connecticut, Inc. v. Duhan, 38 Conn.Supp. 495, 452 A.2d 123 (1982)*, Judge Daly, writing for an appellate session of the superior court, set forth a number of ***HN9***[] relevant factors for this determination. They include whether the franchisor set the hours of operation, number of employees, and placement of advertising signs. In addition, it is relevant whether the franchisor hired the employees, provided the management training or offered financial support.

In a recent unreported decision of the United States District Court for the District of Connecticut, Judge Brieant, sitting as a visiting judge, recognized that many of these factors are relevant only to retail sales businesses. *Grand Light and Supply Co., Inc. v. Honeywell, Inc*., Civ. Action No. N-78-342 (TFGD), slip op. at 23 (D.Conn. July 13, 1984). Because the defendant therein was obliged to hold management conferences, sales meetings and training seminars and to provide promotional assistance, the court concluded that the defendant **[**12]** prescribed the material elements of plaintiff's marketing plan for the sale of defendant's products.

The case at bar is remarkably similar. Milwaukee offered training seminars, provided promotional and sales materials, established requirements concerning credit ratings, and set sales goals and forecasts. Milwaukee has not disputed these facts in its affidavits or depositions. The court, therefore, finds that Milwaukee did prescribe at least some elements of a market plan with respect to plaintiff's sale of Milwaukee products. It is for the trier of fact to determine whether it was prescribed in substantial part by Milwaukee.

The second issue is whether the operation of plaintiff's business pursuant to such a plan was substantially associated with Milwaukee's tradename. Milwaukee contends that the holding in *Muha v. United Oil Co., 180 Conn. 720, 433 A.2d 1009 (1980)* prohibits a finding of substantial association. In *Muha*, the parties' agreements did not require the plaintiffs to sell only the defendant's products, and the **[*1125]** plaintiffs, in fact, derived most of their profits from other sales and services. Justice Healey stated that the plaintiff's activities were **[**13]** not substantially related with the defendant's trademark. *Id. at 726, 433 A.2d 1009*. However, it is recognized that this is mere dicta. The actual holding of the court was that there was no franchise because the defendant had no trademark or trade name of its own.

The *Grand Light* case considered the same unique issue presented herein: does the Connecticut Franchise Act apply to an authorized sales representative/distributor whose gross revenue from the sales of the alleged franchisor's products account for only 2% of its total income. *Grand Light*, slip op. at 16. Judge Brieant concluded that it did. He based his decision upon the absence of any Connecticut law otherwise and the plain meaning of the statute. *Conn.Gen.Stat. § 42-133e(b)* requires that the "operation of the franchisee's business *pursuant to such (marketing) plan or system*" be "substantially associated" with the franchisor's trademark or trade name (emphasis added). Although it is admittedly a difficult question, this court agrees with Judge Brieant's conclusion.

Because this is a diversity jurisdiction action with respect to count IV of the complaint, this court must apply the substantive law of the **[**14]** state of Connecticut under *Erie Railroad Co. v. Tompkins, 304 U.S. 64, 58 S. Ct. 817, 82 L. Ed. 1188 (1938)*. Mere obiter should be entitled to little weight. *Nolan v. Transocean Airlines, 290 F.2d 904* (2d Cir.), *cert. denied 368 U.S. 901, 82 S. Ct. 177, 7 L. Ed. 2d 96 (1961)*. Moreover, the statute requires that the business activities *relating to the market plan* be substantially associated with the franchisor's trademark or trade name. It does not require the plaintiff's entire business to be so associated. Indeed, the court can find no reason to exclude from the operation of the statute a business that acts as a franchisee for several franchisors.

Defendant Milwaukee has not disputed plaintiff's association with Milwaukee's trade name. Whether or not it is sufficient to constitute substantial association is a question for the trier of fact to determine. Summary judgment is, therefore, denied as to count IV.

COVENANT OF GOOD FAITH

In counts V and VI of the complaint, plaintiff contends that defendant Milwaukee breached the covenants of good faith and fair dealing implied in the parties' contractual relationship and imposed by *Conn.Gen.Stat. § 42a-1-203*. Milwaukee **[**15]** has moved for summary judgment against the plaintiff as to these counts on the ground that neither a common law nor a U.C.C. good faith duty can override contract terms. In support thereof, Milwaukee has cited two cases which hold that a good faith obligation cannot be implied if it would be inconsistent with the express terms of the contract. *See Cardinal Stone Co., Inc. v. Rival Manufacturing Co., 669 F.2d 395 (6th Cir.1982)*; *Corenswet v. Amana Refrigeration, Inc., 594 F.2d 129* (5th Cir.), *cert. denied 444 U.S. 938, 100 S. Ct. 288, 62 L. Ed. 2d 198 (1979)*.

In *Corenswet*, the Court of Appeals for the Fifth Circuit recognized that courts have begun to read a good faith limitation into contracts. It declined to impose this limitation in *Corenswet* because there was no existing backdrop of Iowa state law supporting it. *594 F.2d at 137*. *Cardinal Stone* expressly relies upon the *Corenswet* decision. *669 F.2d at 396*.

HN10[] *Conn.Gen.Stat. § 42a-1-203* provides that "every contract or duty within this title imposes an obligation of good faith in its performance or indorsement." As a commercial agreement, the Hydro Air/Milwaukee contract is clearly governed by this provision. **[**16]** A Connecticut trial court has applied the identical provision contained in the *Restatement (Second) of Contracts § 231* to an at-will employment contract. *Magnan v. Anaconda Industries, Inc., 37 Conn.Supp. 38, 429 A.2d 492, 494 (1980)*. There is, therefore, an existing body of Connecticut law supporting plaintiff's contention. Milwaukee's motion for **[*1126]** summary judgment is denied as to these counts.

WRONGFUL INTERFERENCE WITH BUSINESS RELATIONS

By counts VII and VIII of its amended complaint, plaintiff claims that defendant PDN intentionally and improperly interfered with plaintiff's business relationship with Milwaukee. PDN argues that summary judgment is appropriate because plaintiff has failed to allege independent tortious activity.

PDN relies upon the case *Blake v. Levy, 191 Conn. 257, 464 A.2d 52 (1983)* for its contention that plaintiff must prove fraud, misrepresentation or intimidation. However, the *Blake* opinion goes on to state that "in an action for intentional interference with business relations, we think the better reasoned approach requires the plaintiff to plead and prove at least some improper motive or improper means." *Id. at 262, 464* ***[**17]*** *A.2d 52*. Plaintiff has alleged that such conduct was intentional and improper. Amended Complaint, para. 43. An affidavit submitted by the plaintiff raises an inference that PDN's actions were motivated by a desire to increase its business at the expense of plaintiff. Affidavit of Gaudet, August 24, 1984, para. 6.

PDN argues that its conduct was not improper. However, in view of this court's determinations on the issues of the antitrust and unfair trade practice allegations, there are sufficient issues of disputed material facts to make summary judgment inappropriate on the counts of wrongful interference with business relations.

Defendant PDN's counterclaim is based upon plaintiff's alleged failure to establish a colorable claim. In view of this court's determination on the motions for summary judgment as to plaintiff's complaint, PDN's motion for summary judgment on the counterclaim is DENIED. Accordingly, all motions for summary judgment are DENIED.

SO ORDERED.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN1[] **Monopolies & Monopolization, Attempts to Monopolize**

The Sherman Act prohibits every contract, combination or conspiracy, in restraint of trade or commerce among the several States, 15 U.S.C.S. § 1, and also prohibits monopolizing any part of the trade or commerce among the several States. 15 U.S.C.S. § 2.

Antitrust & Trade Law > Sherman Act > Jurisdiction

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] **Sherman Act, Jurisdiction**

It is axiomatic that in pleading a cause of action under the Sherman Act, 15 U.S.C.S. §§ 1, 2, the plaintiff must adequately allege the jurisdictional requirement of interstate commerce. Thus, the plaintiff's complaint must allege sufficient facts to establish that the defendant's alleged illegal conduct is "in interstate commerce" or has a "substantial and adverse effect" upon interstate commerce.

Civil Procedure > Appeals > Standards of Review > General Overview

HN3[] **Appeals, Standards of Review**

In reviewing the dismissal of a complaint, the factual allegations of the complaint are taken as true.

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Transportation Law > ... > Federal Powers > Powers of Congress > Substantial Relations

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

HN4[] **Antitrust Actions, Facilities**

Medical practice per se and without more is a local activity. To bring it within reach of the Federal antitrust laws a substantial and adverse effect upon interstate commerce is requisite.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Antitrust & Trade Law, Sherman Act**

As long as the restraint in question substantially and adversely affects interstate commerce, the interstate commerce nexus required for Sherman Act, 15 U.S.C.S. § 1, coverage is established.

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] **Antitrust & Trade Law, Sherman Act**

The defendant's activities must be shown as a matter of practical economics to have a not insubstantial effect on the interstate commerce involved.

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] **Antitrust & Trade Law, Sherman Act**

Though each case involves a unique set of facts, if it is interstate commerce that feels the pinch, it does not matter how local the operation which applies the squeeze.

Antitrust & Trade Law > Sherman Act > General Overview

HN8[] Antitrust & Trade Law, Sherman Act

An effect can be substantial under the Sherman Act, 15 U.S.C.S. § 1 even if its impact on interstate commerce falls far short of causing enterprises to fold or affecting market price.

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] Antitrust & Trade Law, Sherman Act

If the allegations of the plaintiff's complaint fairly claim that the alleged conspiracy, to the extent it is successful, will place unreasonable burdens on the free and uninterrupted flow of interstate commerce, that is sufficient, at the pleading stage of a proceeding, to establish a substantial effect upon interstate commerce under the Sherman Act, 15 U.S.C.S § 1.

Business & Corporate Law > Foreign Corporations > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Transportation Law > ... > Federal Powers > Powers of Congress > Substantial Relations

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] Business & Corporate Law, Foreign Corporations

Under the "substantial effect" test, it is unnecessary for an antitrust plaintiff to allege the defendant had the purposeful goal of affecting interstate commerce or that the conspiracy threatens the demise of out-of-state businesses or that the conspiracy affects market prices.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

HN11[] Sherman Act, Claims

A complaint should not be dismissed unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. This rule applies with no less force to a Sherman Act, 15 U.S.C.S. § 1 claim, where one of the requisites of a cause of action is the existence of a demonstrable nexus between the defendants' activity and interstate commerce.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > Appeals > Appellate Jurisdiction > State Court Review

HN12[] Antitrust & Trade Law, Sherman Act

Jurisdiction is not defeated by plaintiff's failure to quantify the adverse impact of defendant's conduct.

Antitrust & Trade Law > Sherman Act > Remedies > Injunctions

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

HN13[] **Remedies, Injunctions**

Even where there is an inability to prove that concerted activity has resulted in legally cognizable damages, jurisdiction need not be impaired, though such a failure may confine the available remedies to injunctive relief.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > Sherman Act > General Overview

Healthcare Law > Business Administration & Organization > Peer Review > General Overview

Healthcare Law > Business Administration & Organization > Peer Review > Organizations

HN14[] **Antitrust & Trade Law, Exemptions & Immunities**

The second threshold issue is whether the defendants' conduct is clearly articulated and affirmatively expressed as state policy and actively supervised by the State so as to be exempt from the Federal antitrust laws under the doctrine of state action.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN15[] **Antitrust & Trade Law, Exemptions & Immunities**

The state action doctrine provides an exemption from the Federal antitrust laws and, if applicable, allows for dismissal of the complaint.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN16[] **Reviewability of Lower Court Decisions, Preservation for Review**

The general rule is that a federal appellate court does not consider an issue not passed upon below.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

Healthcare Law > Business Administration & Organization > Peer Review > General Overview

HN17[] **Reviewability of Lower Court Decisions, Preservation for Review**

The matter of what questions may be taken up and resolved for the first time on appeal is one left primarily to the discretion of the courts of appeals, to be exercised on the facts of individual cases.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > Sherman Act > General Overview

Healthcare Law > Business Administration & Organization > Peer Review > Organizations

HN18[] **Antitrust & Trade Law, Exemptions & Immunities**

The state action doctrine exempts conduct that is clearly articulated and affirmatively expressed as state policy and actively supervised by the State from the Federal antitrust laws.

Antitrust & Trade Law > Sherman Act > General Overview

Governments > State & Territorial Governments > Legislatures

HN19[] **Antitrust & Trade Law, Sherman Act**

When a state legislature adopts legislation, its actions constitute those of the State and ipso facto are exempt from the operation of the antitrust laws.

Antitrust & Trade Law > Sherman Act > General Overview

HN20[] **Antitrust & Trade Law, Sherman Act**

The United States Supreme Court decisions establish two standards for antitrust immunity. First, the challenged restraint must be one clearly articulated and affirmatively expressed as state policy' second, the policy must be actively supervised by the State itself.

Antitrust & Trade Law > Sherman Act > General Overview

HN21[] **Antitrust & Trade Law, Sherman Act**

To satisfy the clearly articulated and affirmatively expressed state policy element of the state action doctrine, the state legislature must authorize the challenged activity and the legislature must intend to displace the Federal antitrust laws.

Antitrust & Trade Law > Sherman Act > General Overview

HN22[] **Antitrust & Trade Law, Sherman Act**

The state legislature's intent to displace the federal antitrust laws exists if the challenged restraint is a necessary consequence of engaging in the authorized activity.

Antitrust & Trade Law > Sherman Act > General Overview

HN23[] **Antitrust & Trade Law, Sherman Act**

As a matter of judicial economy, the Federal courts must not be further burdened by complex antitrust litigation when the alleged illegal conduct is mandated and supervised by the state and, furthermore, the plaintiff is afforded the due process safeguards of hearings and state court review.

Antitrust & Trade Law > Sherman Act > General Overview

HN24[] **Antitrust & Trade Law, Sherman Act**

The Sherman Act, *15 U.S.C.S. § 1* gives no hint that it was intended to restrain official action directed by a state.

Antitrust & Trade Law > Sherman Act > General Overview

HN25[] **Antitrust & Trade Law, Sherman Act**

There is nothing in the language of the Sherman Act *15 U.S.C.S. § 1* or in its history which suggests that its purpose was to restrain a state or its nonsovereign representatives from activities directed by its legislature.

Counsel: John J. Casey, Landesman & Schwartz, Chicago, Illinois, for Plaintiff.

George W. Spellmire, Hinshaw, Culbertson, Moelmann, Hoban & Fuller, W. Washington, Chicago, Illinois, Alfred C. Tisdahl, Jr., French, Rogers, Kezelis, & Kominiarek, P.C., N. Dearborn, Chicago, Illinois, for Defendant.

Judges: Bauer, Coffey, Circuit Judges, and Fairchild, Senior Circuit Judge.

Opinion by: COFFEY

Opinion

[*374] COFFEY, Circuit Judge.

Plaintiffs-Appellants, R. Anthony Marrese, M.D., and Bone & Joint Surgeons, Inc., appeal the judgment of the United States District Court for the Northern District of Illinois dismissing the plaintiffs' claims under the Sherman Act *§§ 1*, *2*, *15 U.S.C. §§ 1*, *2*, for lack of subject matter jurisdiction. We conclude that the defendants' conduct in reviewing Dr. Marrese's surgical procedures and recommending that his clinical privileges at Deaconess Hospital, in Evansville, Indiana, be revoked, is exempt from the Federal antitrust laws under the doctrine of "state action," and thus we affirm **[**2]** the dismissal of the plaintiffs' claims under the Sherman Act *§§ 1*, *2*.

I

The record reveals that Dr. R. Anthony Marrese, is a Board certified orthopedic surgeon who specializes in the treatment of spinal disorders. Dr. Marrese is the sole shareholder of Bone & Joint Surgeons, Inc., an Indiana corporation with its principal office in Evansville, Indiana. He is licensed to practice medicine in the states of Illinois and Indiana and, at the commencement of this lawsuit, had clinical privileges to practice at Deaconess Hospital, **[*375]** a non-profit corporation located in Evansville, Indiana. [1]

[3]** In February 1978, a Special Ad Hoc Committee ("SAHC") comprised of selected members of the medical staff at Deaconess Hospital conducted an audit of the surgical "back" procedures performed at Deaconess. [2] The results of that audit raised questions concerning the "appropriateness of the surgeries performed by Dr. Marrese." Accordingly, the SAHC recommended to the medical staff at Deaconess that all of Dr. Marrese's lumbar laminectomy and spinal fusion cases be monitored, and that any case without a positive radiological finding be subjected to a mandatory second opinion. In August 1980, the SAHC retained Interqual, Inc., an independent, nonaffiliated company engaged in the business of performing medical audits, to conduct a further audit of Dr. Marrese's lumbar and cervical surgical procedures. Based upon the findings of the Interqual audit, the SAHC recommended to the Medical Staff Executive Council at Deaconess that Dr. Marrese's clinical privileges be revoked. On April 28, 1982, the Medical Staff Executive Council adopted the recommendation of the SAHC but stayed implementation of Dr. Marrese's clinical privilege revocation, pending a hearing as required by the hospital's Fair **[**4]** Hearing Plan.

The Fair Hearing Plan at Deaconess was adopted by the medical staff in June 1979 "to provide every practitioner with one evidentiary hearing and with one appellate hearing in the event that any action is taken [including revocation of clinical privileges] by the Medical Staff Executive Council . . . or the Board of Directors of the Hospital." The medical staff's authority to review professional practices within its hospital is provided for in the State of Indiana statutory code:

> "The governing board of the hospital shall be the supreme authority in the hospital
> * * *
>
> The medical staff of a hospital shall be an organized group which shall be responsible to the governing board . . . and shall have the responsibility of reviewing the professional **[**5]** practices in the hospital for the purpose of reducing morbidity and mortality, and for the improvement of the care of patients in the hospital. *This review shall include, but shall not be limited to, the quality and necessity of the care provided patients*. . . ."

Ind. Code § 16-10-1-6.5 (1982) (emphasis added). The Indiana statutory scheme for quality control of the medical profession further provides that the personnel of:

> "a committee having the responsibility of evaluation of qualifications of professional health care providers, or of patient care rendered by professional health care providers, or of the merits of a complaint against a professional health care provider that includes a determination or recommendation concerning the complaint
> * * *
> shall be immune from any civil action arising from any determination made in good faith in regard to evaluation of patient care. . . ." [3]

---

[1] At oral argument the plaintiffs' counsel informed this court that Dr. Marrese "is no longer practicing in Evansville," but counsel failed to provide this court with any information concerning Dr. Marrese's status at Deaconess Hospital, much less his underlying reason for no longer practicing in Evansville, Indiana. It is clear from the plaintiffs' first amended complaint that Dr. Marrese's clinical privileges at Deaconess had not been revoked prior to the filing of this lawsuit in July 1982.

[2] According to the plaintiffs' first amended complaint, the "back" procedures audited by the SAHC included, *inter alia*, fifty lumbar laminectomies and forty spinal fusions performed by orthopedic surgeons on the staff at Deaconess Hospital.

[3] The Indiana legislature defines good faith as "an act taken without malice after a reasonable effort to obtain the facts of the matter and in the reasonable belief that the action taken is warranted by the facts known." Ind. Code § 34-4-12.6-1(f) (1982).

[*376] Ind. Code §§ 34-4-12.6-1(c), 34-4-12.6-3 (c) (1982). [4] The procedure to be followed in reviewing professional practices within a hospital is set forth in Ind. Code § 34-4-12.6-2(b):

> "Any professional health care provider under investigation **[**6]** shall be permitted at any time to see any records accumulated by a peer review committee pertaining to his personal practice and shall be offered the opportunity to appear before the peer review committee with adequate representation to hear all charges and findings concerning his practice and to offer rebuttal information, which shall be a part of the record before any disclosure of the charges and findings hereunder."

[7]** The Fair Hearing Plan adopted by the medical staff at Deaconess affords any practitioner adversely affected by a recommendation or action of the Medical Staff Executive Council or the Board of Directors, the right to an evidentiary hearing. [5] **[**8]** The hearing is conducted before an evidentiary hearing committee, comprised of five members of the senior or active medical staff. [6] The practitioner may request to be represented by an attorney and/or may be accompanied by a member of the medical staff, and shall also be allowed to:

> "(a) call and examine witnesses
> (b) introduce exhibits
> (c) cross-examine any witness on any matter relevant to the issues
> (d) question the qualifications of any witness
> (e) rebut any evidence
> (f) request that the record of the hearing be made by use of a court reporter or an electronic recording unit."

---

[4] Effective April 1983, the Indiana legislature amended Ind. Code § 16-10-1-6.5 to provide in pertinent part:

> "The governing board and its employees, agents, consultants, and attorneys have absolute immunity from civil liability for communications, discussions, actions taken, and reports made concerning disciplinary action or investigation taken or contemplated, if such reports or actions are made in good faith and without malice."

Ind. Code Ann. § 16-10-1-6.5(b) (Burns Supp. 1983).

[5] According to the Fair Hearing Plan at Deaconess, a practitioner is entitled to an evidentiary hearing for the following recommendations or actions:

> "(a) Denial of initial staff appointment
>
> (b) Denial of reappointment
>
> (c) Suspension of staff membership
>
> (d) Revocation of staff membership
>
> (e) Denial of requested advancement in staff category
>
> (f) A change in staff category not acceptable to the practitioner
>
> (g) Limitation of the right to admit patients
>
> (h) Denial of requested department/service/section affiliation
>
> (i) Denial of requested clinical privileges
>
> (j) Reduction of clinical privileges
>
> (k) Suspension of clinical privileges
>
> (l) Revocation of clinical privileges
>
> (m) Terms of probation
>
> (n) Individual requirement of consultation

[6] The five hearing committee members are appointed by the president of the medical staff when the hearing is occasioned by an adverse recommendation of the Medical Staff Executive Council. On the other hand, when the hearing is occasioned by an adverse recommendation of the governing hospital board, the board president appoints the five members of the hearing committee.

At a hearing to review the revocation of a practitioner's clinical privileges, "the body whose adverse recommendation or action occasioned the hearing shall have the initial obligation to present evidence" in support of its recommendation. According to the Fair Hearing Plan at Deaconess, the burden then shifts to the practitioner to show "by a preponderance of the evidence that the grounds [for revocation] lack any substantial basis or that such basis or the conclusions drawn therefrom are either arbitrary, unreasonable, or capricious." Following this hearing, the committee compiles its findings and submits them along with a recommendation to either the Medical Staff Executive Council or the Board of Directors, depending **[**9]** upon which body initiated the adverse recommendation or action. After reviewing the committee's findings and recommendation, the council or hospital board affirms, modifies, or reverses the recommendation. If the decision is adverse to the practitioner, he has a **[*377]** right of review before the joint conference committee of the hospital. The Fair Hearing Plan at Deaconess provides that "the practitioner seeking the review may submit a written statement detailing the findings of fact, conclusions and procedural matters with which he disagrees, and his reasons for disagreement." Following submission of the practitioner's statement, the joint conference committee conducts a review hearing and based upon its findings, recommends to the hospital board that the adverse decision be affirmed, modified, or reversed. The board issues a final written decision and if the practitioner's hospital staff privileges are, in fact, revoked, he is entitled to appeal that decision through the Indiana state court system and challenge the "good faith" of the hospital staff members in reaching their conclusion. *See, e.g.,* *Kiracofe v. Reid Memorial Hosp., 461 N.E.2d 1134, 1139-41 (1984)*; **[**10]** *Yarnell v. Sisters of St. Francis Hlth. Serv., 446 N.E.2d 359, 361-63 (1983)*. [7]

In July 1982, before the Board of Directors at Deaconess had issued their final decision revoking Dr. Marrese's clinical privileges, the plaintiffs (Dr. Marrese and his solely owned company, Bone & Joint Surgeons, Inc.) filed suit in the United States District Court for the Northern District of Illinois against Interqual, Inc., Deaconess Hospital and its Board of Directors in their individual capacity, and members of the SAHC and Executive Committee at Deaconess, including seven doctors, one hospital administrator, and one attorney. [8] The suit alleged that the defendants had conspired to restrain trade in violation of the Sherman Act *§ 1*, had monopolized the market for orthopedic and neurological spinal surgical procedures in Evansville, Indiana in violation of **[**11]** the Sherman Act *§ 2*, and had violated *42 U.S.C. § 1983* by adopting an anticompetitive, unfair, and unconstitutional Fair Hearing Plan under color of the Indiana medical peer review statute, Ind. Code § 34-4-12.6-1 *et seq.* [9] According to the plaintiffs' first amended complaint, "beginning in early 1978 and continuing thereafter to the present, the Defendants have engaged in an unlawful conspiracy to exclude DR. MARRESE from the Evansville, Indiana marketing area by falsely charging that he is unqualified to practice and compete therein." The complaint alleged that the defendants "formulated and effectuated" this conspiracy through their actions as members of or consultants to the hospital board, the SAHC, and the Medical Staff Executive Council at Deaconess. The plaintiffs sought money damages for the alleged Federal antitrust violations and, pursuant to the Clayton Act § 16, *15 U.S.C. § 26*, a permanent injunction restraining defendants from continuing to engage in Federal antitrust violations. In addition, the plaintiffs requested a permanent injunction "enjoining the President of the Medical Staff . . . from naming a committee **[**12]** to sit in review of the recommendation of the Executive Committee of the Medical Staff."

For purposes of establishing the district court's subject matter jurisdiction over the alleged violations of the Sherman Act *§§ 1*, *2*, the plaintiffs claimed that the defendants' activities had a substantial and adverse effect upon interstate commerce. In support of this position, the plaintiffs alleged that:

> "Approximately 45% of the patients treated by DR. MARRESE travel from Western Kentucky and Southern Illinois into the State of Indiana and the vast majority of these patients are treated by DR. MARRESE at DEACONESS HOSPITAL. . . . In **[**13]** addition, DR. MARRESE **[*378]** is a team surgeon for an Illinois high

---

[7] We express no view concerning the defendants' "good faith" and/or "bad faith" in the present case, as that issue is not presently before the court.

[8] The record reveals that the plaintiffs filed their initial complaint in this action on July 12, 1982. Some two weeks later, on July 27, 1982, the plaintiffs filed their first amended complaint.

[9] The plaintiffs' first amended complaint also included a pendent state claim, alleging that the defendants' actions constituted a tortious interference with business relations.

> school, and in this capacity has occasion to travel into the State of Illinois, treat injured athletes and when necessary brings them back to the DEACONESS HOSPITAL for the purpose of providing medical treatment for them. In the regular course of his treatment of both his interstate and in-state patients, Plaintiff, DR. MARRESE, through Plaintiff's Bone & Joint Surgeons, Inc. purchases medicine, equipment and related supplies from out-of-state purveyors, derives revenues from the Federal Health Care Program commonly known as Medicare and Medicaid as well as from private out-of-state insurance companies and pays management and accounting fees to various out-of-state consultants. The total amount of said out-of-state purchases, revenues, and fees exceed the sum of $500,000.00 [annually]."
>
> * * *
>
> If Defendants' conspiracy is successful in its ultimate objective of driving DR. MARRESE from the Evansville, Indiana marketing area, he will . . . be unable to practice orthopedic medicine anywhere in the continental United States because of the cost of medical malpractice insurance, and because no other hospital **[**14]** could afford the risk of accepting DR. MARRESE on its staff." [10]

The plaintiffs further alleged that:

> "Approximately 25% of the HOSPITAL'S patients travel from Kentucky and Illinois to the HOSPITAL for the purpose of receiving medical and surgical care from its professional staff.
>
> The HOSPITAL'S regular billings with respect to said out-of-state patients are not less than TEN MILLION DOLLARS ($10,000,000.00) per year.
>
> The HOSPITAL also purchases medical supplies and equipment in an amount not less than FIVE MILLION DOLLARS ($5,000,000.00) per year from various out-of-state sources."

In February 1983, the district court dismissed the plaintiffs' first amended complaint in its entirety. The court found that:

> "With respect to interstate commerce, plaintiffs have alleged that Dr. Marrese treats people **[**15]** who travel in interstate commerce; that they purchase medicine and related supplies from out-of-state; that Dr. Marrese travels in interstate commerce as part of his business; and that they receive revenues from out-of-state sources such as insurance companies and Medicare."

Based upon these findings, the court ruled, *inter alia*, that:

> "Plaintiffs have not alleged what effect the defendants attempts to revoke Dr. Marrese's clinical privileges have had on the aspects of interstate commerce alleged. Other than generalized, conclusory allegations plaintiffs have failed to allege any substantial effect on interstate commerce. . . . Thus, because the court concludes that defendants' allegedly unlawful actions do not have a substantial effect on interstate commerce, [the plaintiffs' claims under the Sherman Act *§§ 1*, *2*] must be dismissed for lack of subject matter jurisdiction." [11]

[16]** In March 1983, the plaintiffs filed a motion for reconsideration of the district court's order dismissing the first amended complaint and also filed a motion for leave to file a second amended complaint. The court denied both motions ruling that, "many of the allegations in the Second Amended Complaint are identical to paragraphs in the First Amended Complaint. To the extent that there are differences between the two complaints, they are differences **[*379]** merely of degree not of substance." [12] On appeal, the plaintiffs contend that the district court

---

[10] The record before this court reveals that the plaintiffs' allegation of out-of-state purchases, revenues, and fees in excess of $500,000 refers to an annual sum.

[11] The court ruled that the plaintiffs' claim of an anticompetitive, unfair, and unconstitutional Fair Hearing Plan at Deaconess Hospital failed to allege sufficient "state action" to state a claim under *42 U.S.C. § 1983*. The court further ruled that because the federal claims were dismissed, it no longer retained jurisdiction over the pendent state law claim. The plaintiffs do not appeal these decisions.

[12] The district court denied the plaintiffs' motion for leave to file a second amended complaint and thus that complaint was never made a part of the district court record. It is clear, however, that the judge received and reviewed a copy of the second

erred in dismissing the plaintiffs claims under the Sherman Act §§ 1, 2, for failure to allege a substantial and adverse effect upon interstate commerce.

[17]** II

HN1[] The Sherman Act prohibits "every contract, combination . . . or conspiracy, in restraint of trade or commerce among the several States," 15 U.S.C. § 1 (1982), and also prohibits "monopolizing any part of the trade or commerce among the several States." 15 U.S.C. § 2 (1982). **HN2**[] It is axiomatic that in pleading a cause of action under the Sherman Act §§ 1, 2, the plaintiff must adequately allege the jurisdictional requirement of interstate commerce. *See* McLain v. Real Estate Bd. of New Orleans, 444 U.S. 232, 241-42, 62 L. Ed. 2d 441, 100 S. Ct. 502 (1980) ("McClain"); Hospital Building Co. v. Rex Hospital Trustees, 425 U.S. 738, 743, 48 L. Ed. 2d 338, 96 S. Ct. 1848 (1976) ("*Hospital Building Co.*"). Thus, the plaintiff's complaint must allege sufficient facts to establish that the defendant's alleged illegal conduct is "in interstate commerce" or has a "substantial and adverse effect" upon interstate commerce. McLain, 444 U.S. at 241-42; **[**18]** Hospital Building Co., 425 U.S. at 743. One of the two threshold issues before this court is whether the plaintiffs in the instant case have alleged facts sufficient at the pleading stage of the proceeding to satisfy the jurisdictional requirement of interstate commerce under the Sherman Act. [13]

[19]** We note at the outset that **HN3**[] "in reviewing the dismissal of a complaint, 'the . . . factual allegations of the complaint are taken as true.'" Mid-America Reg. Bar. v. Will Cty. Carpenters, 675 F.2d 881, 883 (7th Cir.), *cert. denied*, *459 U.S. 860, 74 L. Ed. 2d 114, 103 S. Ct. 132 (1982)* (quoting **[*380]** Ashbrook v. Hoffman, 617 F.2d 474, 475 (7th Cir. 1980)). According to the plaintiffs' first amended complaint, approximately forty-five percent of Dr. Marrese's patients travel from Illinois and Kentucky into Indiana for treatment. [14] The complaint alleges that the vast majority of these patients are treated at Deaconess Hospital in Evansville, Indiana. In addition, Dr. Marrese claims that he travels into Illinois to treat injured athletes, and when necessary, brings them to Deaconess Hospital for medical treatment. Dr. Marrese further claims that he purchases medicine, equipment, and related supplies from

---

amended complaint as did the defendants who filed a memorandum in opposition to the plaintiffs' motion for leave to file an amended complaint. On appeal, the plaintiffs have presented this court with a copy of the second amended complaint which alleges, in addition to the allegations of the first amended complaint, that:

> "Approximately 300 patients per year travel from Western Kentucky and Southern Illinois into the State of Indiana for treatment by DR. MARRESE. Each patient is seen by DR. MARRESE on six separate occasions for a total of approximately 1,800 visits per year by out-of-state patients into the State of Indiana from DR. MARRESE. These patients are billed approximately $1,000,000.00 per year by DR. MARRESE and approximately $10,000,000.00 by the HOSPITAL. . . . The vast majority of these patients are treated by DR. MARRESE at least once at the HOSPITAL and a large percentage of these cases involve complex spinal surgery. If DR. MARRESE's privileges at the HOSPITAL are terminated, these patients will not cross state lines into the State of Indiana for their medical treatment for they come to DR. MARRESE because of his superior expertise in spinal diagnosis and treatment."

The second amended complaint also alleges that Dr. Marrese had contracted to purchase a $500,000 computerized tomography body scanner from a New Jersey firm. Specifically, Dr. Marrese alleges that he had made a down payment on the machine, had arranged financing with a Missouri firm, and had entered into an agreement with an out-of-state physician, a "national expert in the field of computerized tomography scanning," to read and interpret the specialized x-rays. Dr. Marrese claims that as a result of the defendants' alleged illegal conduct, he was forced to cancel the agreement to purchase the scanner, the financing arrangement with the x-ray reading agreement with the out-of-state physician.

[13] The record reveals that at the pleading stage of this proceeding the defendants filed a motion to dismiss the plaintiffs' complaint under Fed. R. Civ. P. 12(b)(6) for failure to state a claim upon which relief could be granted. For purposes of the Sherman Act claims, the district court treated the defendants' motion as a motion to dismiss for lack of subject matter jurisdiction under Fed. R. Civ. P. 12(b)(1), and dismissed the claims. According to the Supreme Court in *Hospital Building Co.*, the jurisdictional requirement of interstate commerce may be analyzed under Fed. R. Civ. P. 12(b)(1) or 12(b)(6), "the critical inquiry is into the adequacy of the nexus between [defendants'] conduct and interstate commerce that is alleged in the complaint." 425 U.S. at 742 n.1.

[14] Due to the fact that the plaintiffs' second amended complaint was never made a part of the district record, this court limits its review to the plaintiffs' first amended complaint.

out-of-state purveyors, derives revenues from Medicare, Medicaid, and private out-of-state insurance companies, and pays management **[**20]** and accounting fees to out-of-state consultants. These out-of-state purchases, revenues, and fees allegedly exceed $500,000 annually. Moreover, according to the plaintiffs' first amended complaint, approximately twenty-five percent of the patients receiving medical and surgical care at Deaconess Hospital travel from Illinois and Kentucky, accounting for $10,000,000 in annual hospital billings. The complaint alleges that the hospital purchases approximately $5,000,000 in medical supplies and equipment annually, from out-of-state sources. Finally, Dr. Marrese claims that upon revocation of his clinical privileges at Deaconess, he will no longer be able to practice orthopedic medicine in Evansville, Indiana or anywhere in the United States because no hospital will be able to afford the risk of granting Dr. Marrese staff privileges. It is the plaintiffs' position that these allegations are sufficient, at the pleading stage of the proceeding, to establish a "substantial and adverse effect" upon interstate commerce, and thus satisfy the jurisdictional requirement of interstate commerce under the Sherman Act.

[21]** In *Williams v. St. Joseph Hospital, 629 F.2d 448 (7th Cir. 1980)*, this court set forth the general rule that ***HN4***[] "medical practice *per se* and without more is a local activity. To bring it within reach of the [Federal] antitrust laws a substantial and adverse effect upon interstate commerce is requisite." *629 F.2d at 454* (citing *Polhemus v. American Medical Assn., 145 F.2d 357, 359 (10th Cir. 1944))*. ***HN5***[] "As long as the restraint in question 'substantially and adversely affects interstate commerce,' the interstate commerce nexus required for Sherman Act coverage is established." *Hospital Building Co., 425 U.S. at 743* (citations omitted). According to the Supreme Court in *McLain*, ***HN6***[] the defendant's activities must "be shown 'as a matter of practical economics' to have a not insubstantial effect on the interstate commerce involved." *444 U.S. at 246* **[**22]** (citing *Hospital Building Co., 425 U.S. at 745*). ***HN7***[] Though each case involves a unique set of facts, "if it is interstate commerce that feels the pinch, it does not matter how local the operation which applies the squeeze." *Hospital Building Co., 425 U.S. at 743* (quoting *Gulf Oil Corp. v. Copp Paving Co., 419 U.S. 186, 195, 42 L. Ed. 2d 378, 95 S. Ct. 392 (1974))*; *Williams v. St. Joseph Hospital, 629 F.2d at 453 n.11*; *Tiger Trash v. Browning-Ferris Industries, Inc., 560 F.2d 818, 825-26 (7th Cir. 1977)*, *cert. denied*, *434 U.S. 1034, 54 L. Ed. 2d 782, 98 S. Ct. 768 (1978)* (quoting *United States v. Women's Sportswear Assn., 336 U.S. 460, 464, 93 L. Ed. 805, 69 S. Ct. 714 (1949))*.

In *Hospital Building Co.*, the Supreme Court stated that ***HN8***[] "an effect can be 'substantial' under the Sherman Act even if its impact on interstate commerce falls far short of causing enterprises to fold **[**23]** or affecting market price." *425 U.S. at 745*. According to the Court, ***HN9***[] if the allegations of the plaintiff's complaint "fairly claim that the alleged conspiracy, to the extent it is successful, will place 'unreasonable burdens on the free and uninterrupted flow' of interstate commerce," that is sufficient, at the pleading stage of a **[*381]** proceeding, to establish a substantial effect upon interstate commerce under the Sherman Act. *Id. at 746*. This court has added that ***HN10***[] under the "substantial effect" test, "it is unnecessary for an antitrust plaintiff to allege the defendant 'had the purposeful goal of affecting interstate commerce' . . . or that 'the conspiracy threatens the demise of out-of-state businesses or that the conspiracy affects market prices.'" *Tiger Trash v. Browning-Ferris Industries, Inc., 560 F.2d at 826* (brackets original) (quoting *Hospital Building Co., 425 U.S. at 745, 746)* ("*Tiger Trash*").

Indeed, in **[**24]** *Tiger Trash*, the plaintiff alleged that the defendant, Browning-Ferris Industries ("BFI"), was attempting to monopolize the solid waste collection service of Evansville, Indiana and Henderson, Kentucky, in violation of the Sherman Act *§ 2*. According to the undisputed facts, BFI was an Indiana corporation with twenty customer accounts in Henderson, Kentucky, comprising approximately five percent of BFI's total accounts. The Kentucky accounts produced annual revenues of $30,000 amounting to approximately three to four percent of the annual revenues produced by BFI's Evansville, Indiana accounts. In addition, BFI maintained $6,000 worth of equipment in Kentucky on a permanent basis and used another $100,000 worth of equipment within the state. On the issue of whether or not these facts were sufficient to satisfy the test of "substantial and adverse effect" upon interstate commerce, at the pleading stage of the proceeding, this court ruled that:

> "Plaintiff Tiger Trash may be able to prove that defendants' monopolization caused an effect on interstate commerce 'that is more than merely inconsequential.' *Woods Exploration & Producing Co. v. Aluminum Co. of America, 438 F.2d 1286, 1303 (5th Cir. 1971)*, **[**25]** *cert. denied*, *404 U.S. 1047, 30 L. Ed. 2d 736, 92 S. Ct.*

> *701 (1972)*. Since the relation of the alleged restraints to interstate commerce and their effect upon it are not 'clearly nonexistent' summary judgment for BFI Indiana was inappropriate.
> * * *
>
> What the proofs will show is another matter, but at least plaintiff must be permitted to show (if it can) that an interstate market, the Henderson-Evansville area, was being monopolized by defendants. *Hospital Building, supra, 425 U.S. at 747 n.5*"

Id. at 826. Similarly, the Supreme Court has stated that at the pleading stage of a proceeding:

> ***HN11***[] "[A] complaint should not be dismissed unless 'it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief.' *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*; see 5 C. Wright & A. Miller, Federal Practice and Procedure §§ 1202, 1205-1207, 1215-1224, 1228 (1969). This rule applies with no less force to a Sherman **[**26]** Act claim, where one of the requisites of a cause of action is the existence of a demonstrable nexus between the defendants' activity and interstate commerce."

McLain, 444 U.S. at 246. *See also* *Bunker Ramo Corp. v. United Business Forms, Inc., 713 F.2d 1272, 1282 (7th Cir. 1983)*; *Williams v. St. Joseph Hospital, 629 F.2d at 453-54*.

Since the decisions in *Hospital Building Co.* and *McLain*, the Federal courts have embarked upon a new and vastly expanded interpretation of the interstate commerce requirement under the Sherman Act. As a result, the courts have been deluged with complaints alleging that a hospital's denial or revocation of a doctor's staff privileges constitutes a restraint of trade and/or an attempt to monopolize trade in violation of the Sherman Act *§§ 1*, *2*. *See* *Pontius v. Children's Hospital, 552 F. Supp. 1352, 1362-63 (W.D. Pa. 1982)*; Kissam, Webber, Bigus & Holzgraefe, *Antitrust and Hospital Privileges: Testing the Conventional Wisdom*, 70 Cal. L. Rev. 595 (1982). A common element in these hospital staff denial **[*382]** or revocation cases is a threshold **[**27]** determination by the court of whether or not the doctor's complaint alleges facts sufficient to satisfy the jurisdictional requirement of interstate commerce under the Sherman Act. For example, in *Cardio-Medical Assoc. v. Crozer-Chester Med. Ctr., 721 F.2d 68 (3rd Cir. 1983)* ("*Cardio-Medical*"), four cardiologists claimed that their denial of specialized staff privileges, preventing them from using advanced equipment at the defendant hospital, violated the Sherman Act *§§ 1*, *2*. The plaintiffs alleged that twelve to fifteen percent of their patients were from out-of-state, and that these patients accounted for $100,000 in annual revenues. The plaintiffs further alleged that in the absence of the defendant's illegal activity, they would have another twelve to fifteen percent interstate patients, additional interstate revenues, and additional purchases of out-of-state medications. The court held that:

> "Interferences with the interstate travel of patients, the interstate payment of fees, and the interstate purchase of medication are well-recognized methods for demonstrating an effect on interstate commerce in antitrust litigation. We therefore conclude **[**28]** that plaintiffs' pleadings meet the jurisdictional requirements of the Sherman Act. . . ."

721 F.2d at 76 (citations omitted). In accord with the court's broad language in *Cardio-Medical*, Federal courts have relied upon the treatment of out-of-state patients, the receipt of Medicare, Medicaid, and out-of-state insurance funds, and the purchase of medicine, equipment, and medical supplies from out-of-state purveyors by the plaintiff doctor and/or the defendant hospital, to rule that the doctor's complaint satisfies the jurisdictional requirement of interstate commerce under the Sherman Act. *See, e.g.,* *Weiss v. York Hospital, 745 F.2d 786*, slip op. at 79-82, n.63 (3d Cir. 1984) (osteopath denied staff privileges); *Mishler v. St. Anthony's Hosp. Systems, 694 F.2d 1225, 1227-28 (10th Cir. 1981)* (neurosurgeon excluded from emergency room referral list); *Crane v. Intermountain Health Care, Inc., 637 F.2d 715, 725 (10th Cir. 1981)* (en banc) (pathologist denied staff privileges); *Stone v. William Beaumont Hospital, 1983-2 Trade Cases 69,475, 69,479 (E.D. Mich. 1983)* (cardiologist denied staff **[**29]** privileges); *Konik v. Champlain Val. Physicians Hosp. Med. Ctr., 561 F. Supp. 700, 709-10 (N.D.N.Y. 1983)*, *aff'd*, *733 F.2d 1007 (2nd Cir. 1984)* (anesthesiologist denied use of hospital facilities); *Pontius v. Children's Hospital, 552 F. Supp. at 1361-62*; (cardiovascular surgeon denied reappointment to staff); *McElhinney v. Medical Protective Co., 549 F. Supp. 121, 127-28 (E.D. Ky. 1982)* (surgeon denied reappointment to staff); *Pao v. Holy Redeemer Hospital, 547 F. Supp. 484, 489-90 (E.D. Pa. 1982)* (opthalmologist denied staff privileges); *Everhart v. Jane C. Stormont Hospital, 1982-1 Trade Cases 73,895, 73,896 (D. Kan. 1982)* (cardiovascular surgeon denied staff privileges); *Williams v. Kleaveland, 534 F. Supp. 912, 918 (W.D. Mich. 1981)* (doctor denied reappointment to staff); *McDonald v. St. Joseph's Hospital of Atlanta, 524 F. Supp. 122, 126-30 (N.D. Ga. 1981)* (urological surgeon denied staff privileges); *Robinson v. Magovern, 521 F. Supp. 842, 876 (W.D. Pa. 1981)*, *aff'd without opinion*, *688 F.2d 824* (3rd **[**30]** Cir.), *cert. denied*, *459 U.S. 971, 103 S. Ct. 302, 74 L. Ed. 2d 283 (1982)* (thoracic surgeon denied staff privileges); *Malini v. Singleton & Associates, 516 F. Supp. 440, 442-43 (S.D. Tex. 1981)* (radiologist denied staff privileges); *Feldman v. Jackson Memorial Hospital, 509 F. Supp. 815, 819-21 (S.D. Fla. 1981)* (podiatrist denied membership on medical staff). [15]

[31]** **[*383]** In the instant case, the plaintiffs' first amended complaint alleges that Dr. Marrese treats out-of-state patients; purchases medicine, equipment, and medical supplies from out-of-state purveyors; derives revenues from Medicare, Medicaid, and out-of-state private insurance companies; and pays management and accounting fees to out-of-state consultants. The plaintiffs' complaint further alleges that the impending revocation of Dr. Marrese's clinical privileges at Deaconess will prevent him from practicing orthopedic medicine in Evansville, Indiana or anywhere in the United States. Based upon these allegations, and the Federal courts' expansive interpretation of the interstate commerce requirement under the Sherman Act, it may be that the plaintiffs can demonstrate a substantial and adverse effect upon interstate commerce as a matter of practical economics. At this point we cannot say beyond doubt that the plaintiffs will be unable to prove a set of facts that will establish this required effect upon interstate commerce. [16] It is true that at the time the plaintiffs filed their first amended complaint, Dr. Marrese's clinical privileges at Deaconess had not yet been **[**32]** revoked and thus, no substantial and adverse impact upon interstate commerce had yet occurred. The Supreme Court has stated, however, that ***HN12***[] jurisdiction is not defeated "by plaintiff's failure to quantify the adverse impact of defendant's conduct." *McLain, 444 U.S. at 243*. According to the Court, ***HN13***[] "even where there is an inability to prove that concerted activity has

[15] We note that courts have also dismissed doctors' claims under the Sherman Act, for the denial or revocation of hospital staff privileges, due to the plaintiff doctors' failure to allege a sufficient interstate commerce nexus. *See* *Hayden v. Bracy, 744 F.2d 1338*, slip op. at 8-9 (8th Cir. 1984); *Furlong v. Long Island College Hosp., 710 F.2d 922, 927-28 (2d Cir. 1983)*; *Capili v. Shott, 620 F.2d 438, 439 (4th Cir. 1980)* (per curiam); *Wolf v. Jane Phillips Episcopal-Memorial Med. Ctr., 513 F.2d 684, 687-88 (10th Cir. 1975)*; *Moles v. Morton F. Plant Hospital, Inc., 1980-1 Trade Cases 77,186, 77,189-90 (M.D. Fla. 1978)*, *aff'd without opinion*, ***617 F.2d 293*** (5th Cir.), *cert. denied*, ***449 U.S. 919, 66 L. Ed. 2d 147, 101 S. Ct. 317 (1980)***.

[16] In *Western Waste Service v. Universal Waste Control, 616 F.2d 1094* (9th Cir.), *cert. denied*, ***449 U.S. 869, 66 L. Ed. 2d 88, 101 S. Ct. 205 (1980)***, the Ninth Circuit interpreted *McLain* to mean "that it was not necessary for the alleged antitrust violations complained of to have affected interstate commerce as long as *defendants*' business activities, independent of the violations, affected interstate commerce." *616 F.2d at 1097* (emphasis added). In *Crane v. Intermountain Health Care, 637 F.2d at 724*, the Tenth Circuit stated that "we do not believe *McLain* signals a shift in analytical focus away from the challenged activity and towards the defendant's general or overall business. The analytical focus continues to be on the nexus, assessed in practical terms, between interstate commerce and the challenged activity." In the instant case, we need not reach the issue of whether the plaintiffs could rely upon the interstate business activities of defendant, Deaconess Hospital, to satisfy the jurisdictional requirement of interstate commerce under the Sherman Act. *See* *Bunker Ramo Corp. v. United Business Forms, Inc., 713 F.2d at 1282* (this court does not find it necessary to choose between the various interpretations of *McLain*). Based upon the plaintiffs' allegations that Dr. Marrese treats out-of-state patients and has interstate purchases, revenues, and fees in excess of $500,000 annually, it may well be that the plaintiffs can demonstrate a substantial and adverse impact upon interstate commerce. *Accord* *Cardio-Medical Associates, 721 F.2d at 76*.

resulted in legally cognizable damages, jurisdiction need not be impaired, though such a failure may confine the available remedies to injunctive relief." *Id.* In light of the expansive interpretation of the interstate commerce requirement under the Sherman Act, and the fact that the plaintiffs seek injunctive relief under the Clayton Act § 16, we hold that the plaintiffs' first amended complaint alleges facts sufficient at the pleading stage of the proceeding to establish the jurisdictional requirement of interstate commerce under the Sherman Act, thus satisfying one of the two threshold issues before this court. **[**33]**

[34]** We hasten to note that our analysis of the plaintiffs' first amended complaint does not end with a determination of this jurisdictional issue of interstate commerce under the Federal antitrust laws. Rather a thorough reading of the plaintiffs' complaint reveals that the defendants' alleged conspiracy to "exclude DR. MARRESE from the Evansville, Indiana marketing area" was formulated and effectuated through the defendants' actions as members of or consultants to the hospital board, the SAHC, and the Medical Staff Executive Council at Deaconess. Indeed, the complaint alleges that "in formulating and effectuating their . . . conspiracy to eliminate plaintiffs as competitors in the relevant market and particularly for patients treated at the HOSPITAL, defendants further **[*384]** specifically agreed and conspired" in February 1978 to conduct an internal audit of the "back" procedures, including lumbar laminectomies and spinal fusions, performed at Deaconess; in August 1980, to retain Interqual, Inc. to conduct an independent audit of Dr. Marrese's surgical "back" procedures; to recommend, based upon the findings of the Interqual audit, that Dr. Marrese's clinical privileges be revoked; **[**35]** and in April 1982, on behalf of the Medical Staff Executive Council, to adopt the recommendation that Dr. Marrese's clinical privileges at Deaconess be revoked. Thus, according to the plaintiffs' first amended complaint, the defendants' alleged illegal conduct under the Sherman Act consists of their actions as members of or consultants to the hospital board, the SAHC, and the Medical Staff Executive Council, in reviewing Dr. Marrese's surgical procedures and recommending that his clinical privileges at Deaconess be revoked. In effect, the plaintiffs' Federal antitrust lawsuit is an attack upon the defendants' overall conduct as participants in the medical peer review process at Deaconess Hospital and their motives in recommending that Dr. Marrese's clinical privileges be revoked.

In response to the allegations contained within the plaintiffs' first amended complaint, the focus of our analysis shifts to a review of the defendants' conduct in recommending that Dr. Marrese's clinical privileges be revoked. The plaintiffs' first amended complaint, dismissed in its entirety by the district court, clearly states that:

> "The professional staff of any hospital in the State of Indiana **[**36]** is *authorized*, pursuant to 31 [sic] Burns Indiana Statute 4-12-6(2)(c)(B) [Ind. Code 34-4-12.6-1(c)(2)] to establish a 'Peer Review Committee', which is a committee charged with the responsibility of evaluating the qualifications of professional health care providers at a hospital. DR. MARRESE is a 'professional health care provider' within the meaning of said statute.
>
> Defendant HOSPITAL attempted to implement the provisions of that statute on June 2, 1980 [sic] by adopting a 'Fair Hearing Plan' . . . ."

(Emphasis added). As a result of the plaintiffs' factual assertions that Ind. Code § 34-4-12.6-1 authorizes hospitals to establish peer review committees to evaluate staff members' qualifications and that Deaconess Hospital acted to implement the provisions of that statute, we must consider ***HN14***[] the second threshold issue; whether the defendants' conduct is "clearly articulated and affirmatively expressed as [Indiana] state policy" and "actively supervised" by the State so as to be exempt from the Federal antitrust laws under the doctrine of state action. *See Hoover v. Ronwin, 466 U.S. 558, 104 S. Ct. 1989, 1995, 80 L. Ed. 2d 590 (1984)*; **[**37]** *California Liquor Dealers v. Midcal Aluminum, 445 U.S. 97, 105, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)* ("*California Liquor Dealers*"). Such an analysis at the pleading stage of the proceeding is proper because ***HN15***[] the state action doctrine provides an *exemption* from the Federal antitrust laws and, if applicable, allows for dismissal of the complaint. *See, e.g., Hoover v. Ronwin, 104 S. Ct. at 1994*; *Gambrel v. Kentucky Board of Dentistry, 689 F.2d 612, 613-21 (6th Cir. 1982)*, *cert. denied*, *459 U.S. 1208, 103 S. Ct. 1198, 75 L. Ed. 2d 441 (1983)*; *Benson v. Arizona State Bd. of Dental Examiners, 673 F.2d 272, 274-76 (9th Cir. 1982)*.

We initially note that the district court, in dismissing the plaintiffs' first amended complaint, did not address the issue of state action. *HN16*[] The general rule is that "a federal appellate court does not consider an issue not passed upon below." *Singleton v. Wulff, 428 U.S. 106, 120, 49 L. Ed. 2d 826, 96 S. Ct. 2868 (1976)*; **[**38]** *Sharp v. Ford Motor Credit Co., 615 F.2d 423, 424 n.1 (7th Cir. 1980)*. It is clear, however, that the issue of state action has been addressed in the parties' briefs before this court and that *HN17*[] "the matter of what questions may be taken up and resolved for the first time on appeal is one left primarily to the discretion of the courts of appeals, to be exercised on the facts of individual cases." *Singleton v. Wulff, 428 U.S. at 121*. **[*385]** [17] In the instant case the plaintiffs challenge the defendants' conduct and motives as participants in the medical peer review process at Deaconess Hospital. A review of the plaintiffs' complaint along with the parties' briefs and the relevant Indiana statutory law reveals that the medical peer review process in the State of Indiana was developed and enacted by the Indiana legislature to regulate and improve the quality of medical care within the state. *See* *Ind. Code §§ 16-10-1-1 et seq.*, 25-22.5-2-1 *et seq.*, 34-4-12.6-1 *et seq.* This comprehensive statutory scheme mandates hospital medical staffs **[**39]** to review the professional practices and procedures of hospital staff members, *see* Ind. Code § 16-10-1-6.5, and authorizes the formation of peer review committees to perform this review process, *see* Ind. Code § 34-4-12.61(c). In light of this comprehensive statutory scheme in the State of Indiana, the plaintiffs' allegation that Deaconess Hospital acted to implement the provisions of this statutory scheme, and the fact that *HN18*[] the state action doctrine *exempts* conduct that is "clearly articulated and affirmatively expressed as state policy" and "actively supervised" by the State from the Federal antitrust laws, this court is "justified in resolving [the state action] issue not passed on below. . . ." *Singleton v. Wulff, 428 U.S. at 121*.

[40]** The doctrine of state action originated in *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)* ("*Parker*"), where a raisin producer in the State of California challenged a state statute that authorized "programs for the marketing of agricultural commodities produced in the state, so as to restrict competition among the growers and maintain prices in the distribution of their commodities to packers." *317 U.S. at 346*. According to the Supreme Court, the program restricting the marketing of raisins in California:

> "derive[d] its authority and its efficacy from the legislative command of the state and was not intended to operate or become effective without that command. *We find nothing in the language of the Sherman Act or in its history which suggests that its purpose was to restrain a state or its officers or agents from activities directed by its legislature*. In a dual system of government in which, under the Constitution, the states are sovereign, save only as Congress may constitutionally subtract from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly **[**41]** to be attributed to Congress."

Id. at 350-51 (emphasis added). *See also* *Hoover v. Ronwin, 104 S. Ct. at 1995*.

Since the seminal decision in *Parker*, the Supreme Court has further refined the doctrine of "state action." *See, e.g.,* *Goldfarb v. Virginia State Bar, 421 U.S. 773, 791, 44 L. Ed. 2d 572, 95 S. Ct. 2004 (1975)* (state bar association's enforcement of a minimum legal fee schedule not exempt under *Parker* because not compelled by state); *Cantor v. Detroit Edison Co., 428 U.S. 579, 591-92, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 (1976)* (opinion of Stevens, J.) (private utility company's regulation of light bulbs, approved by state and required to be continued until new tariff is filed, not exempt under *Parker*); *Bates v. State Bar of Arizona, 433 U.S. 350, 362-63, 53 L. Ed. 2d 810, 97 S. Ct. 2691 (1977)* (enforcement of clearly articulated disciplinary rules by state supreme court, acting in its legislative capacity, exempt under *Parker*); *Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 415, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978)* (opinion of **[**42]** Brennan, J.) (city's operation of electrical utility system exempt under *Parker* if state contemplated the action complained of when it authorized city to operate in that area); *New Motor Vehicle Bd. of Cal. v. Orrin W. Fox Co., 439 U.S. 96, 109, 58 L. Ed. 2d 361, 99 S. Ct. 403 (1978)* (state board's enforcement of a clearly articulated, **[*386]** affirmatively expressed state regulation of automobile dealerships is exempt under

---

[17] On August 10, 1984, the parties were ordered to furnish the court with supplemental briefs, analyzing the applicability of the "state action" doctrine in the present case. The plaintiffs and defendants each submitted a supplemental and a reply brief on this issue.

Parker); *California Liquor Dealers*, 445 U.S. at 105-06 (wine wholesaler's enforcement of a clearly articulated state system for wine pricing is not exempt under *Parker* because the state neither establishes nor reviews the price schedules, nor regulates the terms of fair trade contracts); *Community Communications Co. v. Boulder, 455 U.S. 40, 55, 102 S. Ct. 835, 70 L. Ed. 2d 810 (1982)* (municipality's enforcement of its cable television ordinance is not exempt under *Parker* because the state's position is one of mere neutrality respecting the municipality's actions). Most recently, the Court in *Hoover v. Ronwin*, reaffirmed its rationale in *Parker* that ***HN19***[] "when **[**43]** a state legislature adopts legislation, its actions constitute those of the State . . . and *ipso facto* are exempt from the operation of the antitrust laws." *104 S. Ct. at 1995*. The Court added that a "closer analysis is required when the activity at issue is not directly that of the legislature . . . but is carried out by others pursuant to state authorization." *Id.* It is "important to ensure that the anti-competitive conduct of the State's representative was contemplated by the State." *Id.* *See also Lafayette v. Louisiana Power & Light Co., 435 U.S. at 413-15* (opinion of Brennan, J.); P. Areeda, ***Antitrust Law*** para.212.3 at 53-54 (Supp. 1982). According to the Court:

> "If the replacing of entirely free competition with some form of regulation or restraint was not authorized or approved by the State then the rationale of *Parker* is inapposite. As a result, in cases involving the anti-competitive conduct of a nonsovereign state representative the Court has required a showing that the conduct is pursuant to a 'clearly articulated and affirmatively expressed state policy' to **[**44]** replace competition with regulation. The Court also has found the degree to which the state legislature . . . supervises its representative to be relevant to the inquiry."

Hoover v. Ronwin, 104 S. Ct. at 1995 (citations omitted). [18] Thus, our review of the defendants' conduct in reviewing Dr. Marrese's surgical procedures and recommending that his clinical privileges at Deaconess be revoked is guided by ***HN20***[] the Supreme Court decisions, which "establish two standards for antitrust immunity under *Parker v. Brown*. First, the challenged restraint must be 'one clearly articulated and affirmatively expressed as state policy'; second, the policy must be 'actively supervised' by the State itself." *California Liquor Dealers*, 445 U.S. at 105 (quoting *City of Lafayette v. Louisianna Power & Light Co., 435 U.S. at 410* (opinion of Brennan, J.)).

[45]** At the outset, we note the underlying rationale of *Parker* that "the state action doctrine is grounded in concepts of federalism and state sovereignty." *Hoover v. Ronwin, 104 S. Ct. at 1998 n.24* (citing *Community Communications Co. v. Boulder, 455 U.S. at 54*). Indeed, "the *Parker* exemption reflects the federalism principle that we are a Nation of *States," Community Communications Co. v. Boulder, 455 U.S. at 50* (emphasis original), and "under the Constitution, the states are sovereign, save only as Congress may constitutionally subtract from their authority," *Parker, 317 U.S. at 351*. This court's concern in resolving the state action issue is to preserve the principles of state sovereignty **[*387]** and federalism without disregarding the procompetitive, free enterprise values embodied in the Federal antitrust laws. [19] The presence of a clearly articulated and affirmatively expressed state policy, as well as active state supervision, reduces the "concern that federal policy is being unnecessarily and inappropriately subordinated to state policy." *Bates v. State Bar of Arizona, 433 U.S. at 362*. **[**46]** Moreover, the active supervision requirement "ensures that state-federal conflict will be avoided in those areas in which the state

---

[18] ***HN21***[] To satisfy the "clearly articulated and affirmatively expressed state policy" element of the state action doctrine, the state legislature must authorize the challenged activity and the legislature must intend to displace the Federal antitrust laws. *See* P. Areeda, ***Antitrust Law*** para. 212.3 at 53 (Supp. 1982). *See also Community Communications Co. v. Boulder, 455 U.S. at 51-52*; *Lafayette v. Louisiana Power & Light Co., 435 U.S. at 415* (opinion of Brennan, J.). ***HN22***[] The state legislature's intent to displace the federal antitrust laws exists if the challenged restraint is a necessary consequence of engaging in the authorized activity. P. Areeda, ***Antitrust Law**, supra*, at 54. *See also HyBud Equip. Corp. v. City of Akron, 742 F.2d 949*, slip op. at 19 (6th Cir. 1984).

[19] *See, e.g.*, S. Sachs, *Antitrust, The States, and The Professions*, 52 Antitrust L.J. 189, 191-92 (1983) (professional areas create a potential tension between Federal antitrust laws and states' legitimate interest in regulation); D. Smith, *Antitrust Immunity for State Action: A Functional Approach*, 31 Baylor L. R. 263, 289-92 (1979) (state action doctrine is an accommodation of potentially competing sovereigns).

has demonstrated its commitment to a program through its exercise of regulatory oversight." 1 P. Areeda & D. Turner, ***Antitrust Law*** para. 213a at 73 (1978). We add that in the instant case, a further concern of this court is to promote the intended purpose of the Sherman Act as a "consumer welfare prescription." *NCAA v. Board of Regents of Univ. of Okla., 468 U.S. 85, 104 S. Ct. 2948, 2964, 82 L. Ed. 2d 70 (1984)* (quoting *Reiter v. Sonotone Corp., 442 U.S. 330, 343, 60 L. Ed. 2d 931, 99 S. Ct. 2326 (1979))*. *See also* *Indiana Federation of Dentists v. F.T.C., 745 F.2d 1124*, slip op. at 30 (1984); R. Bork, *The Antitrust Paradox* 66 (1978); 21 Cong. Rec. 2455, 2456-63 (March 21, 1890) (statement of Sen. Sherman). The State of Indiana has developed and enacted a comprehensive statutory scheme of medical peer review to protect consumer welfare. Indeed, the State's medical peer review process ensures Indiana citizens of the highest quality of medical care, while protecting them from incompetent, unqualified **[**47]** medical treatment. It is within this framework that we analyze the comprehensive statutory scheme developed and enacted by the Indiana legislature to establish, regulate, and supervise the medical peer review process within the State. [20]

[48]** Our initial inquiry is whether the defendants' review of Dr. Marrese's surgical "back" procedures at Deaconess and the recommendation that his clinical privileges be revoked is conduct "clearly articulated and affirmatively expressed as [Indiana] state policy." The Indiana statutory scheme clearly mandates that:

> "The governing board of the hospital *shall* be the supreme authority in the hospital, responsible for . . . the appointment of members of the medical staff and the assignment of privileges to members of the medical staff with the advice and recommendations of the medical staff consistent with their individual training, experience, and other qualifications. The medical staff of a hospital shall be an organized group which . . . *shall* have the responsibility of reviewing the professional practices in the hospital for the purpose of reducing morbidity and mortality, and for the improvement of the care of patients in the hospital. This review shall include, but shall not be limited to, the quality and necessity of the care provided patients. . . ."

[*388] Ind. Code § 16-10-1-6.5 (emphasis added). [21] To implement this review process, the statutory **[**49]** scheme provides that hospitals establish a peer review committee that shall have "the responsibility of evaluation of

---

[20] In the instant case, our state action analysis is, by necessity, limited to a review of the Indiana statutory scheme regulating the medical peer review process. We note, however, that peer review is mandated by Congress when medical services are paid for with Medicare, *see* ***42 U.S.C. § 1395x(k)***, ***(r)***, ***(s) (1982)***, and/or Medicaid, *see* ***42 U.S.C. § 1396a(a)(19)***, ***(26) (1982)***, funds, and also when hospitals seek certification for participation in the Medicare program by obtaining accreditation from the Joint Commission for the Accreditation of Hospitals, *see* *42 U.S.C. § 1395bb(a) (1982)*. It is clear that Congress, by mandating hospital staff members or members of the local medical society to participate in the peer review process, *see* ***42 U.S.C. § 1395x(k)(2)***, accepts the potential anticompetitive effects of the medical peer review process in favor of quality medical care. *See* *49 Fed. Reg. 14977 (1984)* (proposed rules to protect information of Peer Review Organizations); *49 Fed. Reg. 29026 (1984)* (revised rules for Peer Review Organizations). *Cf.* *Pontius v. Children's Hospital, 552 F. Supp. at 1376* (Congress has attempted to improve the process of peer review through the Peer Review Improvement Act, *42 U.S.C. §§ 1320c-1 et seq. (1984)*).

[21] Similarly, the administrative regulations of the Indiana Hospital Licensing Board provide that:

> "THE GOVERNING BODY. The governing board of the hospital shall be the supreme authority in the hospital, responsible for the management, operation, functioning, and control of the hospital. The Governing Body shall:
>
> * * *
>
> (g) Approve the bylaws, rules, and regulations of the Medical Staff and audit procedures or other measures used to assure quality of care. (h) Appoint members of the Medical Staff and assign privileges consistent with their individual training, experience, and other qualifications on a periodic basis (at least every two (2) years) with the advice and recommendations of the organized Medical Staff."

410 Ind. Adm. Code 15-1-5 (Cumm. Supp. 1983). Furthermore:

> "THE MEDICAL STAFF. (1) The Medical Staff of a hospital composed of two (2) or more physicians shall be an organized group which shall be responsible to the governing board for the clinical and scientific work of the hospital, advise regarding professional matters and policies to the governing board, or the board's designee, and shall have the responsibility of

qualifications of professional health care providers, or of patient care rendered by professional health care providers, or of the merits of a complaint against a professional health care provider that includes a determination or recommendation concerning the complaint." Ind. Code § 34-4-12.6-1. The peer review committee must be organized, *inter alia*, "by the professional staff of a hospital" and a "majority of the members [must be] professional health care providers holding licenses in the stated profession of the committee." *Id.*

[50]** The plaintiffs admit that Deaconess Hospital has "attempted to implement the provisions" of Ind. Code 34-4-12.6-1 *et seq.* Additionally, the plaintiffs allege that the SAHC and the Executive Council at Deaconess were organized by the hospital and consisted of a majority of licensed doctors (seven doctors, one hospital administrator, and one attorney). The record reveals that the medical staff at Deaconess Hospital has acted pursuant to Ind. Code § 34-4-12.6-1, to establish a peer review process that complies with the requirements of Ind. Code § 34-4-12.6-1(c). The State of Indiana has "clearly articulated and affirmatively expressed as state policy" that hospital medical staffs are to form peer review committees and that such committees are to review the quality and necessity of the care provided patients, to evaluate the qualifications of staff members, and review the merits of any recommendation against a staff member. Ind. Code §§ 16-10-1-6.5, 34-4-12.6-1. As a necessary and reasonable consequence of this state mandated medical peer review process, hospital staff members must review the medical treatments, diagnostic procedures, and surgical procedures of competing staff **[**51]** members and, when required, recommend the revocation of staff privileges. Thus, the defendants' conduct, as members of or consultants to the hospital board, the SAHC, and the Medical Staff Executive Council, in reviewing Dr. Marrese's surgical procedures **[*389]** and recommending that his staff privileges be revoked, satisfies the first element of the *Parker* test. *See* Borsody & Tiano, *Peer Review and the Anti-Trust Laws: An Analysis and a Proposal*, 26 St. Louis U.L.J. 511, 514-15 (1982).

We turn our attention to the second element of the *Parker* test, whether the State of Indiana "actively supervises" the medical peer review process. The Indiana statutory scheme provides that the Indiana Medical Licensing Board shall, *inter alia*, promulgate rules and regulations necessary for the licensing of doctors within the state and also "adopt rules establishing standards for the competent practice of medicine or osteopathic medicine, or any other form of practice regulated by a limited license or permit issued [by the Board]." *Ind. Code § 25-22.5-2-7(h)* (1982). The Medical Licensing Board, created by the Indiana legislature, consists of five physicians, **[**52]** one osteopathic physician, and one lay member of the general public, all appointed by the Governor. The Board closely supervises the Indiana medical profession by requiring that every physician within the state biennially register and qualify for licensure by the Board. 844 Ind. Adm. Code 4-6-1 *et seq.* (Cumm. Supp. 1983). Pursuant to Ind. Code § 25-22.5-6-2.1, the Board is authorized to commence revocation proceedings to revoke or suspend the medical license of any practitioner who knowingly violates the rules of competent medical practice established and promulgated by the Board. In furtherance of this duty to regulate the Indiana medical profession, the Board reviews

---

reviewing the professional practices in the hospital for the purpose of reducing morbidity and mortality, and for the improvement of the care of patients in the hospital. This review shall include, but shall not be limited to, the quality and necessity of the care provided patients and the preventability of complications and deaths occurring in the hospital.

(2) The medical staff shall initiate and, with the approval of the Governing Body, adopt and periodically amend bylaws, rules, regulations, and policies which shall include, but need not be limited to, provisions for:

(a) Qualifications to be met for appointment to staff membership and for delineation of privileges.

* * *

(d)(1) Review of applications for staff membership, delineation of privileges, and recommendations on appointment to the Governing Body.

(2) Appeal of decisions regarding Medical Staff membership and privileges.

(3) Review and analysis, at regular stated intervals, of clinical performance, pathological reports, the completeness of medical records and of the enforcement of requirements related thereto, of infection control, of use of blood and blood-related elements, and of total patient care.

410 Ind. Adm. Code 15-1-7 (Cumm. Supp. 1983).

the communications, records, and determinations of hospital peer review committees. According to the Indiana statutory scheme:

> "Communications to, and the records and determinations of, a peer review committee may only be disclosed to the specific credentials committee of a hospital or other health facility, the disciplinary authority of the professional organization of which the professional health care provider under question is a member, or *the appropriate state board of registration and licensure* **[**53]** which the committee deems necessary for recommended disciplinary action. . . ."

Ind. Code § 34-4-12.6-2(b) (emphasis added). [22] Thus, the Indiana legislature has created the Indiana Medical Licensing Board as an official body of the State to promulgate and enforce standards of competent medical practice, regulate the licensing of doctors within the State, and review the confidential communications, records, and determinations of medical peer review committees. The examination of confidential peer review data and records is an essential element of the Board's function in regulating the medical profession and in assuring that the citizens of Indiana receive the highest quality of medical care.

[54]** In addition, the Indiana statutory scheme provides that the State Board of Health shall license and regulate hospitals within the State through the Hospital Licensing Council. *Ind. Code §§ 16-10-1-1*, 16-10-1-3. Pursuant to Ind. Code § 16-10-1-12, the Council shall promulgate rules and regulations pertaining to the proper operation and management of hospitals within the State, amend rules and regulations "for the establishment and maintenance of standards of hospitalization required for the efficient care of patients," and prescribe, through rules and regulations, "the minimum standards as to equipment and provision for the care of patients to which an institution must conform in order to operate lawfully as a hospital" within the State. The Hospital Licensing Council, just as the Medical Licensing Board, is a creature of the **[*390]** Indiana legislature and consists of one physician, one registered nurse, four hospital administrators, one member of the Indiana Department of Public Welfare, and one member of the State Board of Health, all appointed by the Governor. Ind. Code § 16-10-1-3. The Council continually reviews the operation of hospitals within the State and, based **[**55]** upon its compiled data, recommends to the State Board of Health whether or not a hospital qualifies for annual license renewal. Ind. Code § 16-10-1-9. According to the Indiana statutory scheme, representatives of the State Board of Health are required to review all hospitals within the state on a periodic basis, Ind. Code § 16-10-1-13, and the Hospital Licensing Council is authorized to employ field inspectors to inspect hospitals and "give advice, aid, and encouragement to such institutions, in maintaining high professional ideals and good care of patients." Ind. Code § 16-10-1-17. Pursuant to 410 Ind. Adm. Code 15-1-8(1)(c) (1979), these field inspectors are entitled to review the confidential minutes of meetings of the hospital board, the medical staff, and the medical staff peer review committees. Included within the confidential minutes of peer review meetings are records of staff membership applications, delineations of staff privileges, appeals of decisions regarding medical staff membership and privileges, and records of clinical performance and total patient care within the hospital. 410 Ind. Adm. Code 15-1-7(d), (f). Thus, the Hospital Licensing Council of the Indiana **[**56]** State Board of Health is an official body created by the Indiana legislature to promulgate and enforce the proper standards of hospital care and regulate the licensing and operation of hospitals within the State. As an integral part of its hospital inspection program, the Council reviews the confidential communications, records, and determinations of medical peer review committees, assuring Indiana citizens that hospital medical staffs are providing quality medical care while acting in accordance with approved medical standards.

In *California Liquor Dealers*, the Supreme Court analyzed the nature of the supervision that a state must exercise over a nonsovereign state representative to satisfy the second element of the *Parker* test. In that case the State of California had a plan for wine pricing that constituted resale price maintenance in violation of the Sherman Act. The

---

[22] Similarly, the Indiana legislature amended Ind. Code § 16-10-1-6.5, effective April 22, 1983, to require that:

> "The governing board shall report, in writing, to the Indiana medical licensing board the results and circumstances of any final, substantive, and adverse disciplinary action taken by the governing board regarding a physician on the medical staff, or an applicant for the medical staff, if the action results in voluntary or involuntary resignation, termination, nonappointment, revocation, or significant reduction of clinical privileges or staff membership."

Ind. Code Ann. § 16-10-1-6.5(b) (Burns Supp. 1983).

defendant, a wholesaler of California wines, argued that his enforcement of the wine pricing system was exempt from the Federal antitrust laws under the doctrine of state action. The Supreme Court held that the resale plan was "clearly articulated and affirmatively expressed as state policy" because "the **[**57]** legislative policy is forthrightly stated and clear in its purpose to permit resale price maintenance." *California Liquor Dealers*, 445 U.S. at 105. The Court added, however, that the plan "does not meet the second requirement for *Parker* immunity. The State simply authorizes price setting and enforces the prices established by private parties. The State neither establishes prices nor reviews the reasonableness of the price schedules; nor does it regulate the terms of fair trade contracts." *Id. at 105-06*.

As contrasted to the facts in *California Liquor Dealers*, the State of Indiana, through the Indiana Medical Licensing Board, enacts, promulgates, and enforces rules of competent medical practice within the State and reviews the confidential records of medical peer review committees to determine if further action is required. This Medical Licensing Board, acting on behalf of the State's interest in protecting the health and ensuring the safety of Indiana citizens, closely supervises the Indiana medical profession and with the assistance of medical peer review committees, regulates the licensing of physicians within the State. Moreover, **[**58]** the State of Indiana, through the Hospital Licensing Council, promulgates standards of proper hospital care, regulates the licensing of hospitals within the State, and, as an integral part of its hospital inspection program, reviews the confidential records of medical peer review committees. In light of the Medical Licensing **[*391]** Board's active supervision of the medical profession and the Hospital Licensing Council's active supervision of hospitals and their medical staffs, it is clear that the State of Indiana ensures its citizens of quality medical care and "actively supervises" the medical peer review process within the State. Thus, the defendants' conduct, as members of or consultants to the hospital board, the SAHC, and the Medical Staff Executive Council, in reviewing Dr. Marrese's surgical procedures and recommending that his staff privileges be revoked satisfies the second element of the *Parker* test.

Furthermore, the Indiana statutory scheme provides that:

> "The members of any medical staff committee organized for the purpose of conducting medical review, being retrospective and not a part of current patient care, shall have an absolute immunity from **[**59]** civil liability for communications made in committee meetings, and reports and recommendations made by the committee arising from deliberations by the committee to the governing board of the hospital or another duly authorized medical staff committee."

Ind. Code § 16-10-1-6.5. [23] Similarly, Ind. Code § 34-4-12.6-3 provides that:

> "There shall be no liability on the part of, and no action of any nature shall arise against, the personnel of a peer review committee for any act, statement made in the confines of the committee, or proceeding thereof made in good faith in regard to evaluation of patient care
>
> * * *
>
> The personnel of a peer review committee shall be immune from any civil action arising from any determination made in good faith in regard to evaluation of patient care. . . ."

This immunity from civil liability afforded members of the medical peer review process is in accord with the court's reasoning in *Pontius v. Children's Hospital*, that subjecting members of the peer review process to a Federal antitrust lawsuit will "chill the rights and obligations of physicians to participate in peer review." *552 F. Supp. at 1376*. According **[**60]** to that court:

---

[23] The Indiana legislature amended § 16-10-1-6.5, effective April 22, 1983, to provide that:

> "The governing board and its employees, agents, consultants, and attorneys have absolute immunity from civil liability for communications, discussions, actions taken, and reports made concerning disciplinary action or investigation taken or contemplated, if such reports or actions are made in good faith and without malice."

Ind. Code Ann. § 16-10-1-6.5 (Burns Supp. 1983).

> "if *individual physicians* , who manage to overcome their traditional reluctance to testify about the professional conduct of a colleague, know that by so doing they risk incurring legal fees running into six figures and a trial of a duration measured in months, on the mere allegation that they have conspired to restrain trade, the discovery of incompetent physicians will be rendered extraordinarily difficult."

Id. at 1362 (emphasis original).

It is only logical that physicians **[**61]** within the State of Indiana, when presented with allegations of Federal antitrust violations and the threat of treble damages, will either dilute their peer review reports and cease recommending the revocation of a hospital staff member's privileges or will discontinue their participation in the state mandated and supervised peer review process. As a result, the very lifeline of the medical peer review process will be severed. Indeed, as the Supreme Court observed in *Hoover v. Ronwin*, with regard to the legal profession and a committee of State Bar Examiners, "there can be no question that the threat of being sued for [treble] damages [under the Sherman Act] particularly where the issue turns on subjective intent or motive -- will deter 'able citizens' from performing [an] essential public service." *104 S. Ct. at 2002 n.34*. Similarly in the medical profession, the threat of a Federal antitrust lawsuit will compel able and qualified physicians, with particular expertise in complex areas of **[*392]** medicine, to abdicate their participation in the medical peer review process. The overall effect will be to destroy the intended purpose of medical peer review; **[**62]** to assure Indiana citizens of quality medical care and protect them from incompetent, unqualified medical treatment.

In the context of an academic setting this court recently stated that:

> "the peer review process is essential to the very lifeblood and heartbeat of academic excellence and plays a most vital role in the proper and efficient functioning of our nation's colleges and universities. The process of peer evaluation has evolved as the best and most reliable method of promoting academic excellence and freedom by assuring that faculty tenure decisions will be made objectively on the basis of frank and unrestrained critiques and discussions of a candidate's academic qualifications."

E.E.O.C. v. University of Notre Dame Du Lac, 715 F.2d 331, 336 (7th Cir. 1983). So too, peer review is essential to the very lifeblood and heartbeat of medical competency and quality medical care in the State of Indiana and throughout the nation. In furtherance of this policy, the Indiana statutory scheme provides that "a committee having the responsibility of evaluation of qualifications of professional health care providers, or of patient care rendered by **[**63]** professional health care providers, or of the merits of a complaint against a professional health care provider" shall be immune from any civil action arising from a determination made in good faith. Ind. Code §§ 34-4-12.6-1, 34-4-12.6-3. Though this immunity attaches only after a finding that the committee's determinations were made in good faith, the concept to be gleaned from Ind. Code §§ 16-10-1-6.5 *et seq.*, 34-4-12.6-1 *et seq.* is that the State of Indiana realizes the real threat of lawsuits arising from the revocation of hospital staff privileges and has acted to protect the personnel involved in the medical peer review process. This protection encourages competent and qualified physicians to participate in the medical peer review process, thus assuring the citizens of Indiana that hospital medical staffs are competent, qualified, and practicing in accord with approved medical standards. The "good faith" immunity provision is an essential element of the state mandated and supervised peer review process in the State and, in conjunction with the other provisions of the comprehensive statutory scheme, it furthers the underlying policy of the Sherman Act to protect consumer **[**64]** welfare.

We further note that under the Indiana statutory scheme any practitioner investigated by a medical peer review committee shall receive the due process safeguard of an evidentiary hearing before any disclosure of the committee's findings. Pursuant to Ind. Code § 34-4-12.6-2:

> "Any professional health care provider under investigation shall be permitted at any time to see any records accumulated by a peer review committee pertaining to his personal practice and shall be offered the

> opportunity to appear before the peer review committee with adequate representation to hear all charges and findings concerning his practice and to offer rebuttal information, which shall be a part of the record before any disclosure of the charges and findings. . . ."

According to the Fair Hearing Plan at Deaconess, any practitioner adversely affected by a recommendation of the Medical Staff Executive Council has a right to an evidentiary hearing and, if necessary, a review before the joint conference committee of the hospital. The practitioner may request to be represented by an attorney and/or be accompanied by a member of the medical staff. In addition he shall be allowed to **[**65]** introduce evidence, examine witnesses, and be on record throughout the entire hearing process. Moreover, if the hospital board, upon completion of the hospital hearings, adopts the Medical Staff Executive Council's recommendation of suspension or revocation, the practitioner may appeal that final decision, challenge the hospital staff members' "good faith" in reaching that decision, and challenge the Fair Hearing Plan on constitutional grounds, through the Indiana state court system. *See Kiracofe v. Reid Memorial Hosp.*, Ind. App. , 461 N.E.2d at 1139-41; *Yarnell v. Sisters of St. Francis Hlth. Serv.*, Ind. App. , 446 **[*393]** N.E.2d at 361-63. *See also,* *[Renforth v. Fayette Memorial Hospital Ass'n., 178 Ind. App. 475, 383 N.E.2d 368, 377 (1978)](#)* (en banc), *cert. denied*, *444 U.S. 930, 62 L. Ed. 2d 187, 100 S. Ct. 273 (1979)*. In the instant case, it is clear that before his clinical privileges at Deaconess hospital are revoked, Dr. Marrese is entitled to the due process safeguards of a hearing and a review before the joint conference committee of the hospital. In the event that the hospital board adopts the recommendation **[**66]** of the Medical Staff Executive Council and revokes Dr. Marrese's clinical privileges, he is entitled to a complete review of that decision and all its proceedings within the Indiana state court system.

In light of the hearings provided by the Fair Hearing Plan at Deaconess, and the availability of the Indiana state courts to appeal an adverse decision of the hospital board, it is clear that the plaintiffs have a more than adequate forum to challenge the defendants' conduct and motives in reviewing Dr. Marrese's surgical procedures and in recommending that his clinical privileges at Deaconess be revoked. The plaintiffs' Federal antitrust lawsuit, attacking the defendants' conduct as members of the peer review process at Deaconess and challenging their motives in recommending that Dr. Marrese's clinical privileges be revoked, circumvents the hospital hearings and the state court review process in favor of a Federal forum. It is well recognized that "Federal courts . . . are now straining under excessive caseloads." *Patsy v. Florida Board of Regents, 457 U.S. 496, 517, 73 L. Ed. 2d 172, 102 S. Ct. 2557 (1982)* (O'Connor, J., concurring). ***HN23***[] **[**67]** As a matter of judicial economy, [24] the Federal courts must not be further burdened by complex antitrust litigation when the alleged illegal conduct is mandated and supervised by the state and, furthermore, the plaintiff is afforded the due process safeguards of hearings and state court review. Common sense dictates that a cause of action under the Sherman Act is not created every time a lawyer, accountant, or architect is denied partnership status in a national firm, a business executive is fired or denied a promotion by a national corporation, or a physician, surgeon, or specialist has hospital staff privileges denied or revoked. In the instant case, Dr. Marrese is entitled to challenge the defendants' motives and conduct in a hearing before the Deaconess medical staff, a review hearing before the joint conference committee of the hospital, and finally through proceedings in the Indiana state court system. Just as a disgruntled state bar applicant who is denied admission to a state bar has no cause of action under the Sherman Act against a state mandated and supervised bar review committee, *Hoover v. Ronwin, 104 S. Ct. at 2001*, **[**68]** Dr. Marrese has no cause of action under the Sherman Act against the defendants as participants in the state mandated and supervised medical peer review process. Instead, Dr. Marrese must challenge the defendants' conduct and motives through the proper forums; the hospital hearing committees and the Indiana state court system.

Finally, we note the proviso of the court in *Pontius v. Children's Hospital*, that:

> "If a physician, terminated from hospital privileges after receiving due process, is able to force the hospital to assume the burdens of an antitrust **[**69]** trial on the mere allegation that the hospital's decision was grounded

---

[24] We here note Judge Fairchild's separate view that judicial economy is irrelevant in this context. As he sees it, our decision is an interpretation of the state action doctrine of Federal ***antitrust law***. Our conclusion that the doctrine applies to the present situation does, of course, result in relieving the district court of this lawsuit, but in his view achievement of that result is not an appropriate consideration in reaching our conclusion.

on reasons violative of the Sherman Act, the ability of hospitals to regulate their medical staffs will be seriously impaired."

552 F. Supp. at 1362. The evident trend among an increasing number of state supreme courts is to find that a hospital's "failure to investigate a medical staff applicant's qualifications for the privileges requested gives rise to a foreseeable risk of unreasonable harm and [thus] a hospital has a duty to exercise due care in the selection of its medical staff." *Johnson v. Misericordia Community Hosp., 99 Wis. 2d 708, 723,* ***[*394]*** *301 N.W.2d 156, 164 (1981)* and cases cited therein. *See also* *Vuciecevic v. MacNeal Memorial Hosp., 572 F. Supp. 1424, 1428 (N.D. Ill. 1983)*; Annot., 51 A.L.R. 3d 981 (1973). Indeed, according to the court in *Johnson v. Misericordia Community Hosp.*:

> "'One of the hospital's primary functions is to screen its staff of physicians to "insure" that only competent physicians are allowed to practice in the hospital.'
>
> * * *
>
> Obviously, the promotion of quality care and treatment **[**70]** of patients requires hospitals to perform a thorough evaluation of medical staff applicants from the standpoint of professional competence, ethics, established reputation, and further, to periodically review the qualifications of its staff through a peer review or medical audit mechanism. Hospitals, like doctors, must, above all else, be concerned with the welfare of their patients and must establish basic procedures to prevent subjecting them to harm and injury by physicians and surgeons who fail to possess an adequate level of technical skill, competence and ethical principles."

99 Wis.2d at 732, 734-35, 301 N.W.2d at 168-70 (quoting *Ferguson v. Gonyaw, 64 Mich. App. 685, 697, 236 N.W.2d 543, 550 (1976))*. *Cf.* *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 1568, 80 L. Ed. 2d 2 (1984)* ("hospital's unquestioned right to exercise some control over the identity and the number of doctors to whom it accords staff privileges").

In the instant case, the State of Indiana's comprehensive statutory scheme, mandating and supervising the medical peer review process, enables the hospitals to fulfill their **[**71]** common law duty of exercising due care in selecting and maintaining a qualified and competent medical staff and, as a result, assures Indiana citizens that medical practices and procedures within the State are being closely monitored and reviewed. An attack upon this state mandated and supervised peer review process, through the Federal antitrust laws, will compel able and qualified physicians to abdicate their participation in the review of hospital staff members. This, in turn, will destroy the medical peer review process and prevent hospitals from fulfilling their duty to provide patients with a competent medical staff. In addition, the expenses in time and money, incurred by hospitals and physicians in defending their actions, as members of the state mandated and supervised medical peer review process, against the Federal antitrust laws, will eventually be reflected in increased medical costs to the consumer. Accordingly, we are reluctant to further burden the Federal courts with a greater influx of complex antitrust litigation, when a state such as Indiana in the instant case, clearly articulates and affirmatively expresses a state policy mandating medical peer review; actively **[**72]** supervises peer review committees' communications, records, and determinations through the Medical Council; enacts legislation to assure an adversely affected practitioner that he will receive the due process safeguard of an evidentiary hearing within the hospital; and provides the adversely affected practitioner with a state court forum to challenge the conduct and motives of participants in the peer review process.

Based upon the foregoing analysis it is apparent that the State of Indiana has established a thorough peer review process to assure the citizens of Indiana that only competent and qualified physicians, who practice only approved methods of medical care, are licensed within the state. True, the members of a peer review committee, as trained experts in highly specialized fields of medicine, are often in direct competition with the practitioner whom they are reviewing, and the committee's decision to revoke hospital staff privileges may conceivably have a "substantial and adverse effect" upon interstate commerce. Nonetheless, "we are a Nation of *States" Community Communications Co. v. Boulder, 455 U.S. at 50* (emphasis original), and "under the Constitution, **[**73]** the states are sovereign, save only as Congress may constitutionally subtract from their authority," *Parker, 317 U.S. at 351*. "The Sherman Act . . . ***HN24***[] gives no hint that it was intended to restrain . . . **[*395]** official action directed by a state." *Parker, 317 U.S. at 351*. ***HN25***[] There is "nothing in the language of the Sherman Act or in its history which suggests that its purpose was to restrain a state or [its nonsovereign representatives] from activities directed by its legislature." *Id. at 350-51*. In fact, the purpose of the Sherman Act is to protect consumer welfare.

The State of Indiana has made a policy decision that the peer review process is necessary to protect the citizens of Indiana and promote consumer welfare. It runs contrary to the very concepts of state sovereignty and federalism for a Federal court to review the conduct of a peer review committee, under the guise of the Sherman Act, when the State of Indiana: mandates that **[**74]** hospital medical staffs review the quality and necessity of care provided patients; establishes a peer review process to assure for a competent medical staff throughout the State; immunizes members of a peer review committee, who act in good faith, from civil liability; creates a Medical Licensing Board and a Hospital Licensing Council to enforce rules of medical competence and review the actions of medical peer review committees; provides adversely affected practitioners with the due process safeguards of an evidentiary hearing; and provides adversely affected practitioners with the due process safeguards of an evidentiary hearing; and provides adversely affected practitioners with a state court forum to challenge the conduct and motives of participants in the peer review process. In the instant case, the defendants' actions in reviewing Dr. Marrese's surgical procedures and in recommending that his clinical privileges be revoked are "clearly articulated and affirmatively expressed as state policy" and are "actively supervised" by the State. Thus, in light of the plaintiffs' allegations that the defendants alleged illegal conduct consists solely of their actions as members of or **[**75]** consultants to the hospital board, the SAHC, and the Medical Staff Executive Council, acting within the Indiana medical peer review process, we hold that the defendants' actions are exempt from the Federal antitrust laws under the doctrine of state action. [25]

[76]** III

Accordingly, we affirm the district court's dismissal of the plaintiffs' complaint.

End of Document

---

[25] We are cognizant of the district court's ruling that the plaintiffs did not allege sufficient "state action" to state a cause of action under *42 U.S.C. § 1983*. The plaintiffs did not appeal the district court's dismissal of their claim under *42 U.S.C. § 1983* nor was this court presented with any argument on the issue. We note that the elements required for a cause of action under *42 U.S.C. § 1983*, a "deprivation . . . caused by the exercise of some right or privilege created by the State" and "the party charged with the deprivation must be a person who may fairly be said to be a state actor," *Lugar v. Edmondson Oil Co., 457 U.S. 922, 937, 73 L. Ed. 2d 482, 102 S. Ct. 2744 (1982)* differ from the elements required for state action under *Parker*. We further note that the Fair Hearing Plan at Deaconess Hospital provides Dr. Marrese with the due process safeguard of an evidentiary hearing and, if necessary, a review hearing before the joint conference committee of the hospital. Moreover, if Dr. Maresse's clinical privileges at Deaconess are, in fact, revoked, the hospital's decision can be appealed through the Indiana state court system.

Opinion

[*288] ORDER AND REASONS

This matter came before the Court on the motion of defendant Celotex Corporation (Celotex) and the motion of defendants, Standard-Taylor Industries, Inc. and related entities and persons (Standard) [1] for summary judgment. Following oral argument, the motions were taken under submission. Having considered the memoranda, the record and the law applicable to this motion, the Court grants the motions of defendants for the following reasons.

[2]** I. *Course of the Litigation*

Plaintiffs, Olympia Company and Olympia Roofing Co., Inc. (hereinafter jointly referred to as Olympia) instituted this litigation in 1976, alleging, inter alia, various violations of the antitrust laws. The subsequent course of this litigation, as is evidenced **[*289]** by the voluminous record, involved extensive discovery, several amendments to plaintiffs' complaint, substitutions of counsel for plaintiffs, and numerous extensions of cut-off dates, continuances and the like, granted at the instance of plaintiffs. In late 1979, defendants Celotex and Standard filed motions for summary judgment, seeking dismissal of the action. However, prior to the hearing on those motions, the Court was apprised of plaintiffs' intention to again substitute counsel. The Court allowed the substitution. In order to afford plaintiffs' latest counsel an opportunity to develop the necessary facts, the Court also ordered that the pending motions for summary judgment be continued indefinitely. [2]

[3]** By an Order of the Court, plaintiffs then filed their Fourth Amended Complaint, which superseded all prior pleadings of plaintiffs. [3] As the result of a status conference held on May 14, 1980, the Court entered an Order, setting forth the manner in which this case was to further proceed, and requiring plaintiffs to file a Pretrial Statement

---

[1] In Plaintiffs' Fourth Amended Complaint, (Record (R.) Vol. X, Document (D.) 218), superseding all prior pleadings of plaintiffs, the following defendants were named: (1) The Celotex Corporation, (2) Standard-Taylor Industries, Inc., (3) Standard Roofing Company of New Orleans, Inc., (4) Robbins Taylor, and (5) Pierre F. Carriere. All of the defendants, with the exception of Celotex, are hereinafter sometimes referred to jointly and collectively as "Standard."

[2] In a Minute Entry of January 4, 1980, the Court noted that it was "of the opinion that [plaintiffs' counsel's] entrance in the case [would] result in a narrowing and clarifying of the issues and [would] in all probability obviate the necessity of hearing all of the contentions set forth in the motions for summary judgment." R. Vol. X, D. 211.

[3] R. Vol. X, D. 212, 218, 219 and 220.

which would thoroughly set forth plaintiffs' case and the factual and evidentiary basis for same. [4] Specifically, plaintiffs were directed to articulate their claims, by setting forth "in simple, declarative sentences all material facts relied upon by Plaintiffs in support of their claims for relief . . ." The Court directed that the "Pretrial Statements shall serve as each parties' contribution to the Pretrial Order," and specified that "any factual contention, legal contention, any claim for relief or defense in whole or in part, or affirmative matter not set forth in detail as provided hereinabove shall be deemed abandoned, uncontroverted, or withdrawn, notwithstanding the contentions of any pleadings or other papers previously filed herein. The case shall be tried upon the Pretrial Statements." Finally, the Court provided that "in the event **[**4]** defendants choose to do so, they may admit Plaintiffs' narrative facts relating to a legal contention or contentions for purpose of a Motion for Summary Judgment or Partial Summary Judgment. Any such Motion will be heard in accordance with the Federal Rules of Civil Procedure and the Local Rules of this Court, except that the narrative statements of fact in the parties' Pretrial Statements shall serve as the Statements of Material Facts required by Local Rule 3.9." [5] Furthermore, plaintiffs were allowed to take additional discovery subject only to the restriction that such discovery not be duplicative. Plaintiffs' Pretrial Statement, although it was filed approximately six months after the deadline set by the Court for its filing, was accepted by the Court. [6] Thereafter, the voluntary dismissal of certain of plaintiffs' claims and the motions of defendants to strike necessitated amendments to the plaintiffs' Pretrial Statement. [7] In its final form, Plaintiffs' factual contentions are set forth in their Second Amended Pretrial Statement. In response to the motions of defendants for summary judgment, plaintiffs filed into the record a letter of counsel, stating that "the pretrial **[**5]** statement contains both the facts and law on which Plaintiffs must rely." The motions were fixed for hearing on a date approximately two weeks prior to the pretrial conference and two days prior to the expiration of the discovery deadline set by the Court.

HN1[] **[*290]** Summary judgment is appropriate where "the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a summary judgment as a matter of law." *Rule 56(c), Fed.* ***[**6]*** *Rules Civ. Proc.* When a motion for summary judgment is made and supported in the manner provided in *Rule 56(e) of the Federal Rules of Civil Procedure*, "an adverse party may not rest upon the mere allegations or denials of his pleadings, but his response, by affidavits or as otherwise provided in this rule, must set forth specific facts showing that there is a genuine issue for trial." *Rule 56(e), Fed. Rules Civ. Proc.*

The Court is not unmindful of the Fifth Circuit's admonition to approach summary judgment with caution, particularly with respect to anti-trust litigation. *Transource International, Inc. v. Trinity Industries, Inc., 725 F.2d 274, 279 (5th Cir. 1984)*. Nonetheless, summary judgment is sometimes appropriate in anti-trust actions. "It is now established that 'simply because a suit is brought under the antitrust laws does not foreclose a summary judgment. '" *Transource International, Inc. v. Trinity Industries, Inc., 725 F.2d 274, 279*, quoting *In re Municipal Bond Reporting Antitrust Litigation, 672 F.2d 436, 440 (5th Cir. 1982)*, citing, *Aladdin Oil Co. v. Texaco, Inc., 603 F.2d 1107, 1112 (5th Cir. 1979)*.

Despite the long and arduous course of this litigation, **[**7]** despite every reasonable opportunity afforded the plaintiffs to discover triable issues of fact, and despite the Court's many efforts to ensure that plaintiffs' alleged grievances, if proved, would be redressed, the Court finds that defendants are entitled to summary judgment, based upon the uncontroverted evidence and the law applicable to this case.

II. *Motion of Celotex for Summary Judgment*

[4] R. Vol. X, D. 221.

[5] R. Vol. X D. 221, Order of May 14, 1980, paras. 25, 26, 37-39.

[6] Defendants filed motions to dismiss in May of 1982 based upon the failure of plaintiffs to comply with the Court's Order in this regard. On August 10, 1982, one day prior to the scheduled hearing date on those motions, plaintiffs filed the Pretrial Statement.

[7] R. Vol. XII-XIII, D. 282-298.

For the purpose of this motion, Celotex has admitted all of the narrative statements of fact in plaintiffs' Second Amended Pretrial Statement, except for those which Olympia admits have no factual basis or support and which have been conclusively refuted with sworn testimony based upon personal knowledge. The narrative statements of fact are incorporated herein by reference and are attached hereto as Appendix I. Additionally, Celotex has submitted other facts which are uncontested and which may be material. These are contained in Celotex's Rule 3.9 Statement of Material Facts, incorporated herein by reference and attached hereto as Appendix II. The facts contained in Celotex's 3.9 Statement are supported by the evidence and have not been rebutted or controverted by plaintiffs **[**8]** in the manner provided under *Rule 56(e)*. Thus, the Court accepts these facts as undisputed.

Based upon plaintiffs' narrative statement of facts and the record herein, Olympia's contentions may be summarized as follows. Olympia competed with Standard and other similar companies in securing roofing jobs and furnishing roofing services within the New Orleans area. In doing so, Olympia purchased roofing materials from Celotex or its business predecessors. For several years, Olympia was on Celotex's Approved Roofers list. This, based upon the uncontroverted evidence, enabled Olympia to secure a Celotex roofing bond covering any roof that (1) was installed and repaired by an approved roofer (2) using Celotex materials (3) in accordance with Celotex's published specifications. Roofing bonds are significant in the context of this case for two reasons. First, Olympia was a union roofing contractor. [8] Architectural specifications control whether a roofing job must be performed with union labor and whether a roofing bond will be required. According to Olympia, these specifications provide that virtually all large commercial roofing jobs ($250,000 and over) must be bonded and applied by union **[**9]** roofers. Accordingly, Olympia contends that the ability **[*291]** to secure a bond was indispensible to a union roofing contractor in securing such jobs. Second, when Celotex's competitors reduced their bond coverage for unspecified reasons, Celotex "became possessed of a unique bond program," and was, thus, able to achieve a significant share of the market for "sale of roofing materials to bonded union roofing contractors" in the Greater New Orleans Area "because of its unique bonding program." [9] According to Olympia, Celotex thereby obtained a "dominant and monopolistic position" in the relevant market, and enjoys a market share in excess of 60%. [10] Plaintiffs also assert that in several instances, Standard was granted lower prices on certain materials by Celotex than those granted to Olympia. The factual allegations are the basis for the alleged violations specified by plaintiffs in the Pretrial Statement, as follows: (1) monopolization and attempted monopolization of the relevant markets, (2) unreasonable restraint of trade within the relevant markets in violation of *Section 1* of the Sherman Act, (3) price discrimination in violation of *Section 2(a)* and *(f)* of the Robinson-Patman **[**10]** Act, and (4) tying in violation of *Section 1* of the Sherman Act and Section 3 of the Clayton Act. [11] (On the latter allegation, Olympia contends that Celotex tied the furnishing of roofing bonds to the sale of materials.) The allegations of plaintiffs' Pretrial Statement contain the implication that Celotex and Standard conspired, but there is no specific allegation to that effect. A strict application of the Court's order relative to the Pretrial Statement would require that this legal contention be deemed abandoned or withdrawn. Nonetheless, the Court has addressed the issue of conspiracy herein.

Celotex contends that all of Olympia's allegations are either irrelevant, insufficient, unsupported, or contradicted by unrefuted evidence. Celotex further contends that certain **[**11]** of Olympia's claims are time-barred.

B. Fact of Damage and Amount of Injury

Plaintiffs seek treble damages under § 4 of the Clayton Act, *15 U.S.C. § 15*, based upon alleged antitrust violations under several theories. ***HN2***[] In order to recover such damages, a plaintiff must prove (1) a violation of the antitrust laws, (2) cognizable injury attributable to that violation, and (3) at least the approximate amount of damage. *Chrysler Credit Corp. v. J. Truett Payne Co., Inc., 670 F.2d 575, 579* (5th Cir.), *cert. denied*, *459 U.S. 908, 74 L.*

---

[8] Although this is not specified, it is implicit in plaintiffs' contentions.

[9] Olympia's Second Amended Pretrial Statement, paras. 18-26, 36.

[10] *Id*.

[11] Olympia's Second Amended Pretrial Statement, Legal Contentions, p. 32.

Ed. 2d 169, 103 S. Ct. 212 (1982). Mere proof of an antitrust violation, in and of itself, is not sufficient to support an award for damages; rather, a plaintiff must prove, as a matter of fact and with a fair degree of certainty, injury attributable to something the antitrust laws were designed to prevent. *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 562-563, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)*. "It is imperative that the fact of the damage causing injury be established." *In Re Municipal Bond Reporting Antitrust Litigation, 672 F.2d 436, 443 (5th Cir. 1982)*.

Olympia's conclusory allegations do not demonstrate that **[**12]** it has suffered actual injury. The only element of damage that Olympia has attempted to identify and quantify is that allegedly attributable to price discrimination. [12] **[**14]** However, that calculation merely presumes damages from the differential between prices extended to Olympia and Standard. As is developed further in our discussion of plaintiff's price discrimination claims, it does not purport to show actual injury by demonstrating the likelihood that Olympia lost sales or profits because Celotex extended discriminatory prices to Standard, as required by law for **[*292]** Olympia to prevail on its claims. [13] Summarily, none of Olympia's allegations support the conclusion, or even attempt to demonstrate, that it suffered actual injury. The Court's review of the entire record in this matter leads to the inevitable conclusion that plaintiffs' claim of injury and for damages resulting therefrom amounts to nothing more than unsupported assumptions, conclusory allegations, and undocumented hypotheses, which are insufficient to withstand a summary judgment motion. In this case, as in the case of *In Re Municipal Bond Reporting Antitrust Litigation, 672 F.2d 436, 443 (5th Cir. 1982)*, **[**13]** plaintiffs have not established a triable issue of *fact* of injury, or of its cause, much less the amount of damage. There is a dearth of evidence which would establish this fact. Yet, at the trial of this matter, the plaintiffs would have been required to put forth substantial evidence on this issue. *Chrysler Credit Corp. v. J. Truett Payne Co., Inc., 670 F.2d 575, 582 (5th Cir. 1982)*, *cert. denied*, *459 U.S. 908, 74 L. Ed. 2d 169, 103 S. Ct. 212 (1982)*. Olympia relies on the statement that it "proposes to offer proof of damages . . . employing a ten year straightline projection of sales and loss net profits for a 'future' period of ten years from and after 1976." [14] However, this proposed methodology is of no moment, absent sufficient allegations of, and evidence to support, the fact of injury, which are nowhere to be found in the record of this case. Since Olympia has apparently chosen to rest upon its pleadings rather than substantiating its claims with evidence, summary judgment is appropriate. *Rule 56(e) Fed. Rules Civ. Proc.*; *See, e.g., In Re Municipal Bond Reporting Antitrust Litigation, supra*; *Jones v. Borden Co., 430 F.2d 568, 574 (5th Cir. 1970)*.

Having found that plaintiffs' claim for damages is fatally deficient in that plaintiffs have failed to produce evidence of injury and the amount of damages, the Court has in effect found that summary judgment on Olympia's claims is warranted herein. Nonetheless, for the sake of completeness, the Court further finds that summary judgment is warranted as to each of Olympia's allegations of violations of the antitrust laws, as set forth herein.

C. Monopolization

Olympia has failed to adduce evidence upon which a trier of fact could conclude that a *prima facie* case of monopolization has been established. The gravamen of Olympia's claim is its contention that from and after the year 1974, Celotex's unique bonding program eventually allowed it to **[**15]** achieve a market share in excess of 60%. [15] Olympia's allegations in connection with this claim are either unsupported by the facts or directly contradicted by the evidence, thus, requiring that summary judgment be granted.

---

[12] Olympia's Second Amended Pretrial Statement, para. 55.

[13] *See, e.g., J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 562-563, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)*; *Chrysler Credit Corp. v. J. Truett Payne Co., 670 F.2d 575, 580* (5th Cir.), *cert. denied*, ***459 U.S. 908, 74 L. Ed. 2d 169, 103 S. Ct. 212 (1982)***.

[14] Olympia's Second Amended Pretrial Statement, para. 55.

[15] Olympia's Second Amended Pretrial Statement, para. 36.

Olympia alleges that the relevant product market consists primarily of union bonded commercial roofing jobs over $250,000.00 in value. [16] Yet, it is uncontested that the largest job Olympia performed during the period from 1972 to date was in the range of $60,000.00 to $100,000.00. Olympia's president testified to this fact. [17] Thus, Olympia has defined the relevant product market, for purposes of this litigation, as one in which it was not even a participant for two years prior to and during the period of time when Celotex allegedly began to acquire monopoly power. Moreover, Olympia's definition of this market reflects an effect on a specific competitor, rather than the realities of competition, ignoring a major premise of antitrust **[**16]** litigation, **[*293]** that is, that the antitrust laws are concerned with "the protection of competition, not competitors." *See,* Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962). [18] **[**17]** Olympia's allegations of monopolization, in conformance with the evidence, cannot proceed past the threshold determination of the product market allegedly monopolized. As such, its contentions can only be construed as going to an effect on a competitor, [19] rather than to competition in a defined product market.

Furthermore, the relevant geographic market alleged by Olympia has been artificially delineated without a full consideration of the facts and evidence. Olympia's own experts conceded that the existing information did not indicate whether the market chosen took into account either the areas in which Olympia actually competed [20] **[**18]** or the areas in which Olympia's actual competitors competed. [21] This reinforces the conclusion that the nature of the alleged wrong to Olympia must be couched in terms of an effect on a specific competitor, rather than on competition. And, as previously stated, it is the latter of these which the antitrust laws seek to protect.

Moreover, Olympia's allegation that Celotex acquired a market share in excess of 60% can only be termed sheer speculation, unsupported by any evidence which could possibly create a triable issue of fact in this regard. The lack of any evidence which would allow a trier of fact to determine Celotex's market share is predicated primarily upon the failure of Olympia to define the relevant product and geographic markets on the basis of any evidence of record. There is simply no data of record from which even a rough approximation of market shares could be derived, and the Court is left with no evidence of the origin or accuracy of this figure. Olympia's experts admitted that the data accompanying its Second Amended Pretrial Statement showed only the percentage of Celotex sales that went to certain selected roofers in the New Orleans **[**19]** area, and agreed that this information had little (if any) meaning, in the context of this case, absent comparable figures for Celotex competitors. These same experts testified that the information was incomplete even as to Celotex sales and conceded that even complete information as to such sales would not enable them to adequately define Celotex's share of the relevant market. [22]

---

[16] Olympia's Second Amended Pretrial Statement, paras. 56(g), 58(d).

[17] Deposition of William J. Manion, taken on May 31 and June 2, 1977, Vol. III, Tr. 114-115.

[18] The fallacy of plaintiff's reasoning is shown by Justice Stevens' comments in Mullis v. ARCO Petroleum Corp., 502 F.2d 290, 298-299, (7th Cir. 1974):

> "The fact that an injury to a particular competitor may be unusually severe is not a justification for adopting a market definition which only considers the particular product line which he has previously sold or purchased . . . And whether the competition is more intense on the seller's or the buyer's side of the market, we may not arbitrarily segregate one brand from equally acceptable substitutes in order to protect a particular competitor from injury."

[19] From the standpoint of adverse effects, the competitor in question is Olympia; from the standpoint of desirable effects, the competitor in question is Standard, based upon plaintiffs' allegations.

[20] Deposition of Dr. Jane S. Cromartie, taken on January 5, 1984, Tr. 140-148; Deposition of Phillip W. Jeffress, taken on January 4, 1984, Tr. 79-93, 140-141 & Exhibits 3, 4.

[21] Indeed, the geographic market utilized by plaintiffs' experts did not include Baton Rouge, Louisiana, although it was a controversy surrounding a Baton Rouge project which precipitated this litigation. See, Jeffress deposition, Tr. 54-63; Complaint (R. Vol. I, D. 1).

[22] Cromartie Deposition, Tr. 33-35, 62-69, 77-80, 148-149, 207, 266-272, Exhibits 5 & 6; Jeffress Deposition, Tr. 79-83, 140-141, Exhibits 3 & 4.

It is well-settled that ***HN3***[] the relevant product and geographic markets must be defined with some degree of precision to enable the trier of fact to determine the existence of monopoly power. *Dimmitt Agri Industries, Inc. v. CPC International Inc., 679 F.2d 516 (5th Cir. 1982)*, *cert. denied*, *460 U.S. 1082, 76 L. Ed. 2d 344, 103 S. Ct. 1770 (1983)*. "[A*] section 2* plaintiff attempting to prove either completed monopolization or attempt must provide the jury with sufficient evidence **[**20]** to permit it to **[*294]** define the relevant geographic and product market." *Id. at 525*. *See also, Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 15 L. Ed. 2d 247, 86 S. Ct. 347 (1965)*; *Municipal Bond Reporting Antitrust Litigation, 672 F.2d 436, 441 (5th Cir. 1982)*; *Spectrofuge Corp. v. Beckman Instruments, Inc., 575 F.2d 256, 276, 284-286 (5th Cir. 1978)*, *cert. denied*, *440 U.S. 939, 59 L. Ed. 2d 499, 99 S. Ct. 1289 (1979)*. Absent evidence to create a triable issue of fact in this regard, summary judgment is appropriate. *Scranton Construction Co. v. Litton Industries Leasing Corp., 494 F.2d 778, 783 (5th Cir. 1974)*, *cert. denied*, *419 U.S. 1105, 42 L. Ed. 2d 800, 95 S. Ct. 774 (1975)*.

Furthermore, in this Circuit, "it appears that something more than 50% of the market is a prerequisite to a finding of monopoly." *Cliff Food Stores, Inc. v. Kroger Co., 417 F.2d 203, 207 n. 2 (5th Cir. 1969)*. *See also, Dimmitt Agri Industries, Inc. v. CPC International, Inc., 679 F.2d 516, 528-531*, nn. 11-13 (5th Cir. 1982), *cert. denied*, *460 U.S. 1082, 76 L. Ed. 2d 344, 103 S. Ct. 1770 (1983)*. The Fifth Circuit subscribes **[**21]** to the view that evidence of defendant's conduct in the market is inadequate to sustain a finding of monopoly, absent accurate information demonstrating a requisite market share. *Dimmitt Agri Industries, Inc. v. CPC International, Inc., 679 F.2d 516, 528-531* and nn. 11-14 (5th Cir. 1982), *cert. denied*, *460 U.S. 1082, 76 L. Ed. 2d 344, 103 S. Ct. 1770 (1983)*; *see also, P. Areeda & D. Turner, II* ***Antitrust Law*** para. 515 (1978).

In the instant case, the record discloses little more than unsupported and conclusory allegations of Celotex's conduct. And, viewing all inferences from the evidence of record in favor of the non-moving party, there is no evidence from which a trier of fact could conclude that Celotex enjoyed the requisite market share. Olympia argues that "industry observers" have concluded that Celotex acquired such a market share. Again, this is a conclusory allegation which is not borne out by the facts of this case, as shown by the record. Olympia's experts concede that there is insufficient data to come to a conclusion, with any degree of precision or accuracy, as to Celotex's share of the market. [23] Nor has Olympia demonstrated for purposes of defeating summary **[**22]** judgment, anywhere of record, including in its Pretrial Statement, that there is evidence to support a finding, based on other than speculation, relative to Celotex's market share. Although in certain instances, an examination of the evidence on the issue of market share would reveal deficiencies which go to the weight and sufficiency of the evidence, in the instant case, there is simply no basis for a trier of fact to determine what is the relevant product and geographic markets and what is the defendant's market share. Under these circumstances, it would be futile for plaintiffs to proceed to trial on these claims.

[23]** Moreover, Olympia's allegation of the manner in which Celotex acquired monopoly power warrants the conclusion that defendants are entitled to judgment in their favor as a matter of law. Olympia alleges that Celotex "became possessed of a unique bond program", which allowed it to achieve a share of the market for sale of roofing materials to bonded union roofing contractors in excess of 60%. [24] Olympia asserts that this achievement resulted from changes in the bond programs of Celotex's competitors, and the circumstances attendant therein. [25] Thus, based solely upon Olympia's allegations in this regard, it is clear that if, in fact, Celotex achieved a **[*295]** market share of greater than 60% by reason of the bond program, then that achievement was the result of the unilateral actions of its competitors. Indeed, Olympia's experts stated unequivocally that Celotex's monopoly power, if any, was attributable to its bond becoming unique through the actions of its competitors with regard to their respective

[23] Jeffress deposition, Tr. 63-75; Cromartie deposition, Tr. 207. We note that one of these experts testified that he reached a conclusion of market power, based upon Celotex's bonding program which set it apart from other competitors. Jeffress deposition, Tr. 74-75. However, as is discussed, infra, Celotexthe bonding program does not constitute a willful acquisition of monopoly power, as required for a finding of monopolization.

[24] Olympia's Second Amended Pretrial Statement, para. 36.

[25] *Id*.

bond programs, as opposed to a willful acquisition of monopoly power by Celotex. [26] The United States Supreme Court has made it clear that a claim of monopoly will not lie absent **[**24]** willful acquisition of power:

> "***HN4***[] The offense of monopoly under *§ 2* of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident."

United States v. Grinnell Corp., 384 U.S. 563, 570-571, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966). Olympia's allegations, insofar as they might be construed to assert the acquisition of monopoly power through other means are addressed in the discussion below of the remaining claims.

D. Attempted Monopolization

In order to prove attempted monopolization under *§ 2* of the Sherman Act, *15 U.S.C. § 2*, Olympia must demonstrate that (1) Celotex had the **[**25]** specific intent to accomplish the illegal result, and (2) there was a "dangerous probability" that the attempt would be successful. *Spectrofuge Corp. v. Beckman Instruments, Inc., 575 F.2d 256, 276 (5th Cir. 1978)*, *cert. denied*, *440 U.S. 939, 59 L. Ed. 2d 499, 99 S. Ct. 1289 (1979)*.

Celotex argues that summary judgment should be granted on this claim based upon Olympia's failure to produce any evidence of specific intent. Following our review of all of the evidence of record, taking the factual allegations of Olympia's Pretrial Statement as true, and viewing all inferences from the evidence in favor of the non-moving party, we are inclined to agree. Olympia's claim of attempted monopolization, again, rests primarily on Celotex's acquisition of a unique bond program, which arose solely from the unilateral actions of Celotex's competitors. Based upon the facts, there is a dearth of evidence from which a trier of fact could conclude that Celotex had specific intent to acquire a monopoly. We are not unmindful that summary judgment is rarely appropriate on the issue of a party's intent. However, in the instant case, there is a more compelling basis upon which summary judgment **[**26]** must be granted as to this claim. The Fifth Circuit has held that proof of the relevant market in attempt cases is required in connection with the dangerous probability of success element of the attempt offense. *Spectrofuge Corp. v. Beckman Instruments, Inc., 575 F.2d 256, 286 (5th Cir. 1978)*, *cert. denied*, *440 U.S. 939, 59 L. Ed. 2d 499, 99 S. Ct. 1289 (1979)*. Specifically, it is necessary for the plaintiff to establish a dangerous probability of monopolization *in the relevant markets. Id*. Thus, Olympia cannot prevail on this claim, based upon its failure to sufficiently define and establish the relevant markets, as discussed in sub-part C, above. In this case, evidence is "entirely lacking of the relevant market, its conditions, or of a monopoly or a dangerous probability of one"; thus, summary judgment is appropriate. *Scranton Construction Co. v. Litton Industries Leasing Corp., 494 F.2d 778, 783 (5th Cir. 1974)*, *cert. denied*, *419 U.S. 1105, 42 L. Ed. 2d 800, 95 S. Ct. 774 (1975)*.

E. Price Discrimination

Celotex contends that Olympia's claims of price discrimination are ***HN5***[] time-barred. A four-year statute of limitations is provided in § 4B of the Clayton **[**27]** Act, *15 U.S.C. § 15b*. It is uncontested that Olympia chose to discontinue dealing with Celotex **[*296]** in October of 1973. [27] The original complaint in this matter was filed on February 5, 1976. [28] Price discrimination was not specifically alleged by plaintiffs until the filing of an amended

---

[26] Cromartie deposition, Tr. 38-39, 51-55, 174-178; Jeffress deposition, Tr. 74-75, 94, 113-117, 125-126, 132-134, 189-190.

[27] Deposition of William J. Manion, taken on June 2, 1977. Tr. 126.

[28] R. Vol. 1 D. 1.

complaint on August 31, 1977. [29] *Rule 15(c) of the Federal Rules of Civil Procedure* provides, in pertinent part, as follows:

> "Whenever the claim or defense asserted in the amended pleading arose out of the conduct, transaction, or occurrence set forth or attempted to be set forth in the original pleading, the amendment relates back to the date of the original pleading."

Pleadings must be construed "as to do substantial justice." *Rule 8(f) Fed. Rules Civ. Proc.* In an antitrust action, pleadings must be given a liberal reading. *Exhibitors Poster Exchange, Inc. v. National Screen Service Corp., 421 F.2d 1313 (5th Cir. 1970)*, *cert. denied*, *400 U.S. 991, 27 L. Ed. 2d 439, 91 S. Ct. 454 (1971)*. Although Olympia's original complaint did not specifically set forth an allegation of price discrimination, it is clear that this claim arose out of the same general type of conduct **[**28]** as that alleged in the original complaint. Thus, the claim is not time-barred.

Nonetheless, Olympia's claim of price discrimination cannot withstand summary judgment for several reasons. Olympia seeks damages for price discrimination allegedly (1) in violation of *§ 2* of the Robinson-Patman Act and (2) as part of a conspiracy in violation of *§ 1* of the Sherman Act. Even assuming that the underlying factual contentions upon which Olympia bases this claim are true, the claim is untenable.

(1) *Robinson-Patman Act*

HN6[] Under *§ 2* of the Robinson-Patman Act, *15 U.S.C. § 13*, Olympia, in order to prevail, would be required to prove that Celotex discriminated in price (1) between different purchasers (2) of commodities of like grade and quality (3) where the effect of such discrimination is to substantially lessen competition or tend to create a monopoly, or to injure, destroy, or prevent competition **[**29]** with any person who either grants or knowingly receives the benefit of such discrimination, and (4) where such differential is not in response to changing market conditions. *M.C. Manufacturing Co., Inc. v. Texas Foundries, Inc., 517 F.2d 1059, 1065 (5th Cir. 1975)*, *cert. denied*, *424 U.S. 968, 47 L. Ed. 2d 736, 96 S. Ct. 1466 (1976)*. Thus, a finding that the Act has been violated requires a showing that purchasers are in competition with one another at the time of the purchases, and that there was a sale of like goods to at least two different purchasers at different prices with an adverse effect upon competition. *Id*.

The uncontested evidence indicates that Olympia neither purchased materials from, nor placed orders with, Celotex after October of 1973. [30] **[**31]** Yet, Olympia claims damages for price discrimination from 1972 to 1976. [31] It is abundantly clear that Olympia cannot recover on any claim for damages allegedly resulting from price discrimination occurring after October of 1973, based upon the specific elements of the statute. Furthermore, Olympia has summarized forty-nine alleged instances of price discrimination in its Pretrial Statement, asserting that these "relate **[**30]** to contract work with respect to which Olympia and Standard were in direct competition." [32] This allegation is directly contradicted by the only relevant evidence on the issue. Specifically, of these forty-nine instances, only six represented situations in which **[*297]** Olympia and Standard made roughly contemporaneous purchases of similar goods from Celotex at different prices. [33] And, in those six instances, it is undisputed that Standard purchased materials from Celotex only after it had been awarded a roofing job. Based upon these facts, and upon the definition of a violation under the Robinson-Patman Act, no such violation is implicated. As previously stated, the Act protects purchasers in competition with one another at the time of the purchases; it is irrelevant that the companies may have entered into competitive bidding, or that the successful bidder was ultimately able to obtain prices below those offered to its competitors in the bidding process. *M.C. Manufacturing Co., Inc. v. Texas*

---

[29] R. Vol. III D. 63.

[30] III Manion deposition (1977) Tr. 112-114, 127-129, II Manion deposition (1977), Tr. 23-24.

[31] Olympia's Second Amended Pretrial Statement, para. 55.

[32] Olympia's Second Amended Pretrial Statement, para. 32.

[33] Deposition of William J. Manion, taken on August 24, 1978. Tr. 186.

Foundries, Inc., 517 F.2d 1059, 1066-1068 (5th Cir. 1975), *cert. denied*, *424 U.S. 968, 47 L. Ed. 2d 736, 96 S. Ct. 1466 (1976)*.

Additionally, even if Olympia had succeeded in showing that these six instances of "discrimination" constituted contemporaneous purchases of similar goods at different prices, the claim still could not rise to the level of a violation of the Robinson-Patman Act. A simple mathematical calculation reveals that Olympia paid between $150 and $235 more than Standard did for the same materials. Olympia's expert agreed that price differential in the amount of $1,000.00 was "definitely" de minimus. [34] As previously stated, the Robinson-Patman Act is only violated where the effect of price discrimination may be to substantially lessen competition. It is inconceivable that the de minimus price differential at issue could be said to have such a substantial, if any, effect on competition. *See, e.g., Hanson v. Pittsburgh Plate Glass Industries, Inc., 482 F.2d 220, 224 n.8 (5th Cir. 1973)*, *cert. denied* **[**32]** , *414 U.S. 1136, 38 L. Ed. 2d 761, 94 S. Ct. 880 (1974)*.

It should be noted at this juncture that Olympia has apparently sought to reserve the right to present additional instances of price discrimination. [35] Nonetheless, the time to have presented such further evidence would have been in opposition to the motions herein, particularly since Olympia has had over seven years in which to discover relevant evidence on the issue and to compile this information.

As defendant points out, at a trial of this matter, based upon the undisputed facts, Olympia would fail to make out a prima facie case on the issue of price discrimination. Moreover, and more importantly for purposes of summary judgment herein, Celotex has established by uncontroverted evidence **[**33]** that any discriminatory price was extended in good faith to meet a lower competitive offer. ***HN7***[] *Section 2(b)* of the Robinson-Patman Act *15 U.S.C. § 13(b)*, has been interpreted to afford an absolute defense to a charge of violating *§ 2(a)* of the Act, *15 U.S.C. § 13(a)* where the defendant shows that lower prices were extended in good faith to meet an equally low price of a competitor. *FTC v. Sun Oil Co., 371 U.S. 505, 513-514, 9 L. Ed. 2d 466, 83 S. Ct. 358 (1963)*. The Affidavits of Sam E. Brasher and W. W. LeGrow demonstrate that Celotex lowered its prices to individual roofers only when necessary to do so in order to meet a lower competitive offer, and only after a formal, detailed multi-tier system of verification. [36] The verification methods employed by Celotex exceeded even those suggested by Olympia's expert. [37] And, these methods fall well within the appropriate ones discussed by the Supreme Court in *United States v. United States Gypsum Co., 438 U.S. 422, 454-455, 57 L. Ed. 2d 854, 98 S. Ct. 2864 (1978)*. [38] Indeed, this defense has been **[*298]** sustained based upon less comprehensive schemes than that employed by Celotex for verification. *See, e.g., Great Atlantic* **[**34]** *& Pacific Tea Co. v. FTC, 440 U.S. 69, 59 L. Ed. 2d 153, 99 S. Ct. 925 (1979)*; *Jones v. Borden Co., 430 F.2d 568 (5th Cir. 1970)*; *Callaway Mills Co. v. FTC, 362 F.2d 435 (5th Cir. 1966)*. The Supreme Court recently set forth the elements of this defense, as follows:

> "In summary, the meeting-competition defense requires the seller at least to show the existence of facts that would lead a reasonable and prudent person to believe that the seller's lower price would meet the equally low price of a competitor; it also requires the seller to demonstrate that its lower price was a good faith response to

---

[34] Cromartie deposition, Tr. 264.

[35] Olympia's Second Amended Pretrial Statement, para. 32.

[36] Affidavit of Sam E. Brasher paras. 7-20; Affidavit of W. W. LeGrow paras. 20-30.

[37] Cromartie deposition, Tr. 245-252.

[38] On the issue of the good faith, meeting-competition defense, the Supreme Court stated:

> "Given the fact-specific nature of the inquiry, it is difficult to predict all the factors the FTC or a court would consider in appraising a seller's good faith in matching a competing offer in these circumstances. Certainly, evidence that a seller had received reports of similar discounts from other customers . . . or was threatened with a termination of purchases if the discount were not met . . . would be relevant in this regard. Efforts to corroborate the reported discount by seeking documentary evidence or by appraising its reasonableness in terms of available market data would also be probative as would the seller's past experience with the particular buyer in question." *438 U.S. at 454-455*. [citations omitted.]

a competitor's lower price." Falls City Industries, Inc. v. Vanco Beverage, Inc., 460 U.S. 428, 103 S. Ct. 1282, 1297, 75 L. Ed. 2d 174 (1983).

[35]** Celotex has established this defense based upon uncontroverted evidence. Olympia has asserted no substantiated facts to put the meeting-competition defense at issue, as it must do in order to defeat summary judgment on its price discrimination claim. Olympia's president conceded that he has no information concerning (1) what Celotex products Olympia bought or attempted to buy at which prices and at what times, (2) whether Celotex was actually meeting competitive offers when it extended price discounts to other roofers, and (3) whether Celotex attempted to verify competitive prices. [39] Nor has Olympia provided the Court with any evidence to create an issue of fact on its price discrimination claims. Under circumstances such as these, summary judgment is appropriate. Jones v. Borden Co., 430 F.2d 568, 572 (5th Cir. 1970).

We note that this claim is also subject to summary judgment for the reason to which we previously **[**36]** alluded, i.e., failure to show any actual injury and damage. Olympia has calculated its alleged damage from price discrimination on the basis of an average differential of 5% between the cost it and Standard paid for Celotex materials. Olympia has then projected the effect upon its business, both in terms of profits and increased business, based upon the hypothetical premise of Olympia being granted an average 5% price reduction. [40] This approach is not a proper method for proving injury and damage under the Robinson-Patman Act. *J.* Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 562-563, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981); Chrysler Credit Corp. v. J. Truett Payne Co., 670 F.2d 575, 577 (5th Cir.), *cert. denied*, *459 U.S. 908, 74 L. Ed. 2d 169, 103 S. Ct. 212 (1982)*. Assuming a violation of the Act has been shown, damages must be proven rather than presumed on the basis of the price differentials, since proof of actual injury is a prerequisite to recovery. *Id*. As previously stated, Olympia has come forth with nothing but its conclusory allegations of injury and damage, based upon improper assumptions. Furthermore, Olympia's calculation of alleged damages **[**37]** is premised upon the assumption that the allegedly unlawful price discrimination will be extended to Olympia, as well as to Standard. This assumption is unacceptable in actions such as the present one. M.C. Manufacturing Co. v. Texas Foundries, Inc., 517 F.2d 1059, 1063-1065 (5th Cir. 1975), *cert. denied*, *424 U.S. 968, 47 L. Ed. 2d 736, 96 S. Ct. 1466 (1976)*.

(2) *Sherman Act*

HN8[] Under Section 1 of the Sherman Act, 15 U.S.C. § 1, "every contract, combination

[*299] . . . or conspiracy in restraint of trade or commerce . . . is . . . illegal." The conspiracy issue will be specifically dealt with in a separate discussion. However, suffice it to say that this claim suffers from many of the same deficiencies addressed above. Primarily, the claim is deficient for plaintiffs' failure to produce evidence to create a triable issue of fact as to actual injury and damage. *See*, e.g. M.C. Manufacturing Co., Inc. v. Texas Foundries, Inc **[**38]** ., 517 F.2d 1059 (5th Cir. 1975), *cert. denied 424 U.S. 968, 47 L. Ed. 2d 736, 96 S. Ct. 1466 (1976)*. Under the *Texas Foundries* rationale, Olympia would have to show not merely that Celotex conspired to drive Olympia out of business by extending discriminatory prices to its competitors, but also that (1) its competitors were awarded jobs, (2) the competitors received unjustified discounts, and (3) Olympia was the next lowest bidder. There are not even the barest of factual allegations, or inferences therefrom, in Olympia's Pretrial Statement to support such a conclusion.

F. Tying

Olympia alleges that buyers were "coerced" into buying Celotex's building materials in order to obtain the more desirable bonds, and thus, Celotex tied roofing materials to roofing bonds in violation of § 3 of the Clayton Act, 15 U.S.C. § 14. [41] The Fifth Circuit has identified **HN9**[] four characteristics of an illegal tying arrangement, as

[39] Manion deposition (1978), Tr. 55-62, 69-72, 86-88, 91-93, 108-111, 115-116, 133, 136.

[40] Olympia's Second Amended Pretrial Statement, para. 55.

follows: (1) two separate products, the tying product and the tied product, (2) sufficient economic power in the tying market to coerce purchase of the tied product, (3) involvement of a not insubstantial amount of interstate commerce in the tied market, and (4) **[**39]** anticompetitive effects in the tied market. *Driskill v. Dallas Cowboys Football Club, Inc., 498 F.2d 321, 323 (5th Cir. 1974)*. More recently, the Supreme Court has discussed the elements of a tying arrangement, and particularly, the necessity that there be two separate products, in the case of *Jefferson Parish Hospital District No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*. The considerations on such a claim are whether two separate products were being sold that may be tied together, and, if so, whether the sellers used their market power to force their purchasers to accept the tying arrangement. *Id. at 1561*. Whether two distinct products are involved "turns not on the functional relation between them, but rather on the character of the demand for the two items." *Id. at 1562*. A tying arrangement cannot exist unless two separate product markets have been linked. *Id. at 1563*. We find that the principles enunciated in *Hyde* are dispositive of the instant case. Olympia has not alleged, nor can it conceivably claim, that Celotex's materials and its bonds are two separate and distinct products derived respectively from two separate and distinct **[**40]** product markets. There is simply no market for roofing bonds in and of themselves, absent bonded materials. Furthermore, and as previously discussed, Olympia has not even defined the relevant markets sufficiently to state such a cause of action. Summary judgment on the tying claim is appropriate.

G. Conspiracy

Olympia's factual allegations do not state a viable claim of conspiracy, and the record is completely devoid of any evidence to support this claim. Olympia apparently relies on its contention that Celotex "secretly" communicated to Standard that Olympia would not be accorded approved status at the same time Celotex published and circulated its current Approved Roofer list, from which Olympia had been excluded. [42] Celotex had produced sworn affidavits denying the existence of any conspiracy between it and Standard. [43] Olympia has produced nothing in response **[*300]** thereto to create a triable issue of fact on the claim. The Fifth Circuit **[**41]** has consistently held that summary judgment is appropriate where a plaintiff rests on its mere allegations and fails to produce substantial evidence showing the existence of a genuine issue of fact, as required by *Rule 56(e) of the Federal Rules of Civil Procedure*. *See*, e.g., *Parsons v. Ford Motor Co., 669 F.2d 308, 313 (5th Cir. 1982)*, *cert. denied*, *459 U.S. 832, 103 S. Ct. 73, 74 L. Ed. 2d 72 (5th Cir. 1982)*; *Southern Concrete Co. v. United States Steel Corp., 535 F.2d 313, 318 (5th Cir. 1976)*; *Solomon v. Houston Corrugated Box Co., 526 F.2d 389, 395-397 (5th Cir. 1976)*; *Scranton Construction Co. v. Litton Industries Leasing Corp., 494 F.2d 778, 782 (5th Cir. 1974)*, *cert. denied*, *419 U.S. 1105, 42 L. Ed. 2d 800, 95 S. Ct. 774 (1975)*. Considering the several years of the pendency of this litigation, "the mere hope that evidence may turn up to support a conspiracy does not suffice to warrant a trial." *Bougeois v. A.B. Dick Co., 386 F. Supp. 1094, 1097 (W.D. La. 1974)*.

[42]** *III. Motion of Standard for Summary Judgment*

For the reasons set forth relative to Olympia's motion for summary judgment, Standard's motion should, likewise, be granted. We shall not belabor and reiterate these reasons. However, we note certain additional points warranting summary judgment in favor of Standard.

A. Monopolization and Attempted Monopolization

Subparts II B, C and D are incorporated herein by reference. Additionally, the affidavit of Pierre F. Carriere further supports the conclusion that the relevant markets have not been accurately or sufficiently defined by Olympia.

---

[41] Olympia's Second Amended Pretrial Statement, p. 53.

[42] Olympia's Second Amended Pretrial Statement, paras. 47, 49.

[43] Brasher Affidavit paras. 7, 34; LeGrow Affidavit paras. 16-19.

Olympia's reliance upon gross sales solely to New Orleans roofers necessarily assumes that the market for roofing jobs in New Orleans is restricted to roofing contractors actually located in New Orleans, and further assumes that those contractors who are located in New Orleans do not perform jobs outside the New Orleans area. Both of these assumptions are unsupported by the facts and evidence, and are specifically refuted by the affidavit of Mr. Carriere. That affidavit indicates that although Standard is and always has been located in New Orleans, it has done extensive business throughout **[**43]** the State of Louisiana, and in the adjoining States of Mississippi and Texas, as well as in Georgia. Accordingly, the figures which Olympia has compiled as to Standard's purchases from Celotex and Johns-Manville include purchases by Standard not only for work which Standard performed in the New Orleans area, but also for work which Standard performed throughout Louisiana and in other states. As is further indicated and unrefuted by Carriere's affidavit, non-local roofing contractors constitute a significant segment of competitors in the New Orleans area. Yet, this fact has been ignored by Olympia in delineating the relevant geographic markets and in its allegations of market share.

B. Price Discrimination

Subpart II E is incorporated herein by reference. Furthermore, Standard has established, based upon unrefuted evidence, that it legitimately shopped for the best available price on roofing materials, and that it never received a price known or believed to be improper or discriminatory against a competitor. [44] In order to defeat summary judgment, Olympia would have had to come forward with evidence to create an issue of fact in this regard. This, Olympia has not done.

[44]** Accordingly, and for the foregoing reasons, it is ordered that the motions of defendants for summary judgment, dismissing plaintiffs' claims, be and they are hereby GRANTED. The clerk of court is directed to enter judgment in accordance herewith.

[*301] ATTACHMENT #1

JURY DEMANDED

SECOND AMENDED PRETRIAL STATEMENT

TO THE HONORABLE COURT:

Plaintiffs present this Second Amended Pretrial Statement in conformance with order of the Court dated December 15, 1982.

A. *Narrative Statement of Facts Proposed to be Proved by Plaintiffs*.

1. Plaintiffs Olympia Company, Inc. and Olympia Roofing Company, Inc. (Olympia) are Louisiana corporations with their principal place of business in Metairie, Louisiana.

2. The Defendant, The Celotex Corporation (Celotex) is a Delaware corporation, having its principal place of business outside the State of Louisiana, which does business in the State of Louisiana on a regular and systematic basis.

3. The Defendant, Standard-Taylor Industries, Inc., (S-T) is a Delaware corporation having its home office and principal place of business in Montgomery, Alabama; it was formerly Standard Roofing Co., Inc., and is a foreign corporation **[**45]** doing business in the State of Louisiana, on a regular and systematic basis.

4. Standard Roofing Company of New Orleans, Inc. (S-NO) is a Delaware corporation, having its home office and principal place of business in Montgomery, Alabama; it was formerly part of Standard Roofing Co., Inc., and is

---

[44] Affidavit of Pierre F. Carriere.

presently a division of Standard-Taylor Industries, Inc., and is a foreign corporation which does business within the State of Louisiana on a regular and systematic basis.

5. Defendant Robbins Taylor is a resident of Montgomery, Alabama, and is the Chief Executive Officer of Standard-Taylor Industries, Inc., and one of the principal executive officers of Standard Roofing Company of New Orleans, Inc.

6. Defendant Pierre F. Carriere is a resident of the City of New Orleans, State of Louisiana, and is the Chief Executive Officer of Standard Roofing Company of New Orleans, Inc.

7. Olympia was in the roofing contracting business since its inception in 1926 until it recently became inactive.

8. From its inception, Olympia purchased roofing materials from either the Celotex Corporation or its business predecessors (Carey Company and Barrett Company).

9. In securing roofing **[**46]** jobs, and furnishing roofing services and materials, Olympia has been in direct competition with Standard-Taylor Industries, Inc., and Standard Roofing Company of New Orleans, Inc. (hereinafter collectively referred to as Standard) and other contractors, in the union bonded roofing market (hereinafter defined).

10. For many years, Olympia was on Celotex's list of approved roofers for the State of Louisiana, which enabled it to secure Celotex roofing and bond protection for any roofing assembly installed by Olympia and incorporating materials purchased from Celotex.

11. Under a roofing bond, the roofing contractor alone is responsible for the maintenance of the roof for the first two years, without fee.

12. At the end of the two years, the roof is reinspected and, after any necessary repairs have been made, the manufacturer assumes responsibility for repairs occasioned by ordinary wear and tear during the remaining term of the bond.

13. The manufacturer receives a fixed amount for the bond, similar to an insurance premium, and neither the premium nor the penal sum is negotiable.

[*302] 14. Both the premium and the penal sum are based on a fixed amount **[**47]** per 100 square feet of the roof's surface.

15. A roofing bond is not a guarantee, nor is it a warranty of the work of the roofer.

16. In no event can the manufacturer's obligation exceed the penal sum of the bond.

17. The significant difference between bonds offered by different manufacturers is the term of the coverage available and the amount of the premium, which is paid by the owner of the roof.

18. The Celotex bonding policy is the most liberal and consumer oriented, in that it offers a 20 year bond for a penal sum of either $20.00 or $10.00 per 100 square feet of covered surface, plus a service guarantee of 10 years, with an option of an additional 10 year renewal.

19. During the early 1970's, GAF reduced its bond coverage by one-half, and thereafter, at times pertinent to this suit, offered a 10 year bond for a penal sum of either $20.00 or $10.00 per 100 square feet of surface coverage and a surface guarantee of only 5 years with an option of an additional 5 year renewal.

20. During the pertinent period, Johns-Manville offered a 20 year or 15 year bond for a penal sum of either $20.00 or $10.00 per 100 square feet of area coverage, but no service **[**48]** guarantee.

21. During the pertinent period, Koppers dealt only in coal tar pitch products, which are more expensive than other roofing products, thus considerably limiting its position in the roofing market, and its bond for the coal tar pitched products did not equal the bond extended by Celotex.

22. Beginning approximately in 1970, the Defendant Celotex began an aggressive program designed to secure increase sales of roofing materials to union bonded contractors, stressing the roofing bond protection that it furnished.

23. At that time, only Johns-Manville and Celotex offered a bond giving a 20 year term and a service guarantee of 10 + 10, i.e., a 10 year term with an option of a 10 year renewal, for a specified penal sum per "square", i.e., per 100 square feet of roofing.

24. By the year 1974, Johns-Manville had reduced its bond coverage protection, and Celotex thus became possessed of a unique bond program.

25. Because of its aggressive sales and bond policies, and its unique bond protection, the Defendant Celotex achieved and has maintained a dominant and monopolistic position in the market for sales of roofing materials for use on union bonded roofing **[**49]** jobs in the New Orleans area throughout the 1970's.

26. Celotex's market share of this market exceeds 60%.

27. Celotex employs certain criteria in determining which roofer is to include on its "approved" roofer list for the purpose of providing bond coverage.

28. These criteria are: (a) Celotex must be satisfied that the roofer possesses the requisite expertise in applying Celotex materials; (b) the roofer must maintain this expertise by using Celotex products on a "reasonably frequent" basis; and (c) Celotex must be satisfied with the roofer's credit standing "at all times."

29. Celotex professes that if a roofer meets these standards he may become an approved roofer by entering into an approved roofer agreement.

30. The agreement provides that Celotex will issue a bond covering the roof that (a) is installed and repaired by an approved roofer, (b) using Celotex materials, (c) applied in accordance with Celotex published specifications.

31. If Celotex's inspection reveals that the roof does not meet these specifications, it will not issue a bond. Celotex has reserved to its arbitrary determination whether a roofer possesses the requisite expertise and **[**50]** credit standing, and has increased its sales by requiring that a roofer maintain this "expertise" by using Celotex products on a frequent basis, and by customarily deleting roofers from its approved roofer **[*303]** list if they have not made purchases from Celotex within a 12 month period.

32. During the pertinent period, Celotex regularly and systematically extended to Standard discriminatory prices on roofing materials. Specifically, Celotex granted Standard the following discriminatory prices not received by Plaintiffs or other competing roofing companies:

	(Dates)	[1] Records	(Products)	Price [2] Differential	Duration
(1)	09/16/68	(c) 350-42763	Spec. felt	10% + 5%	Until cancelled, superceded or extended to the trade.

---

[1] Records were taken from files of either Celotex or Standard, identified by (c) and (s).

[2] Represent amount of discrimination, i.e. difference in price accorded Standard and price given Olympia and others.

[51]**

[*305] The foregoing instances of discrimination relate to contract work with respect to which Olympia and Standard were in direct competition, and are noted in Plaintiffs' Exhibit 241. P.Ex. 241 will be revised to reflect a summarization of information from pertinent documents, as reflected above. As so revised, it is Plaintiffs' intention to offer the instrument in evidence. However, as hereafter noted, the Exhibit does not purport to describe all instances of discriminatory pricing extended to Standard by Celotex.

33. In most instances, the extension of the discriminatory pricing was implemented through the covert use of forms known as "350's" and "360's", some of which **[**52]** are referenced above.

34. Ostensibly the "350's" were forms employed by Celotex to verify competitive **[*306]** prices offered to roofing contractors by roofing material suppliers on particular orders or for particular jobs, and to indicate the extension of a discounted price to "meet" the competitive offer. The "360's" supposedly were used to grant a lower price to all customers (roofing contractors) in a particular area. When granted, the "360's" at times had the effect of equalizing prices extended to other contractors with discriminatory prices previously given to Standard. However, the non-favored contractors were not aware of this, and were not even aware of the term "360," or its significance.

35. In truth, the forms were not employed in good faith, but, to the contrary, were sham artifices used to mask the granting of discriminatory prices to Standard. As shown by P.Ex. 252 Standard Roofing of New Orleans received a total of 183 "350's" which were revealed in the process of discovery of records in Tampa, Florida. Additionally, 74 more "350's" were furnished, and are identified on P.Ex.'s 252A and 250B. A check of invoices during the discovery in Tampa, Florida, **[**53]** revealed an additional 39 "350's", which were not produced. These are listed on P.Ex. 252C. This brings the total "350's" price allowances received by Standard to 296. By comparison, P.Ex. 253 shows that other competing roofing companies received virtually no "350's". Taylor Brothers received 5, Vicinelli received 1 and Ellis received 3. Exhibit 185 shows that Olympia received a total of 16 "350's". Eight of those were received during the period 1968-1969. Four were received in 1971. No "350's" were issued from March 31, 1971, forward. Olympia was unaware that any "350's" were issued by Celotex in connection with the purchase of any materials by Olympia, and/or that it was the beneficiary of any "350" consideration. It also appears that if other competing roofing contractors received "350" consideration, they were not aware of it, as evidenced by affidavit and proposed testimony of John D. Robertson, Jr., former President and Chief Operating Officer of Dixie Roofing & Sheetmetal Works, Inc., who states that he knew nothing of any competitive allowance request procedure or competitive pricing procedure offered or granted by Celotex.

36. The systematic extension of discriminatory **[**54]** prices to Standard allowed Standard to achieve cost advantages enabling it to secure a dominant position in the union bonded roofing contracting market. That market was serviced, at pertinent times by four companies -- Celotex, GAF, Johns-Manville, and Koppers. From and after the year 1974, Celotex maintained a dominant position in the market. During the early 1970's GAF reduced its bond coverage by one-half, thereby rendering it essentially non-competitive. Koppers dealt only in coal tar pitch products, which are more expensive than other roofing products, and offered a bond only for coal tar pitched products. The

bond offered did not equal the bond extended by Celotex. Johns-Manville reduced its bond coverage by eliminating any service guarantee, by the year 1974. Therefor, from and after the year 1974, the bond program offered by Celotex was unique in the New Orleans metropolitan market. It offered a 20 year bond for a penal sum of either $20.00 or $10.00 per 100 square feet of covered surface, plus a service guarantee of 10 years, with an option of an additional 10 year renewal. No definite figures are available to Plaintiffs regarding the relative share of bond protection afforded **[**55]** by each of the four named companies, but based on sales figures that are available and witnesses' observations of the industry from and after 1974, Defendant Celotex, because of its unique bonding program, achieved a share of the market for sale of roofing materials to bonded union roofing contractors of over 6090. With respect to contracting for the furnishing of bonded union roofing services, Plaintiffs have complied from their own records and records obtained during the course of discovery the information as to Celotex sales contained in Plaintiffs' Exhibits 134, 135, 136, 137, 138, 143, 144, 145, 146 and 259. Plaintiffs have also obtained information regarding Johns-Manville sales to roofing contractors and wholesalers in **[*307]** the New Orleans metropolitan area, reflected by Exhibit 248. This information is summarized, in chart form, in Exhibits attached hereto. This information is partial, and therefore does not reflect precise market shares of the competing roofing contractors. However, based on this information, and the proposed testimony of witnesses' observations of the industry, from and after 1974, the Defendant Standard Roofing of New Orleans achieved a share of **[**56]** the union bonded roofing contracting market in the New Orleans metropolitan area in excess of 50%. The remainder of the market was divided between those competitors named in paragraph 57 of this Second Amended Pretrial Statement. Though the information in the attached charts is partial, it supports the conclusion that the market was divided in the approximate percentages reflected by sales of roofing materials to the competitors.

37. The lower prices resulting from the "350's" and "360's" were extended secretively, and the resulting discriminatory pricing was not made known to Olympia or other roofing contractors and, during the pertinent period, Olympia and other roofing contractors were not given the opportunity to achieve pricing comparable to that extended to Standard.

38. . . .

39. . . .

40. . . .

41. . . .

42. . . .

43. . . .

44. . . .

45. . . .

46. . . .

47. Celotex secretly communicated to Standard that Olympia would not be accorded "approved" status . . . .

48. . . .

49. Concurrently, Celotex, through its Southwest Division Manager, Legrow, prepared, published and circulated its "current" list of approved bonded **[**57]** roofers for the State of Louisiana, which excluded Olympia.

50. No written notice of termination of Olympia's approved status had been given, and there was no cause or justification for withholding "approved" status from Olympia.

51. . . .

52. . . .

53. . . .

54. . . .

55. Olympia was substantially damaged as a result of the discriminatory pricing, and the dominant position achieved by Standard in the market for roofing contracting services in the New Orleans area. The records obtained through discovery, and discussed herein, indicate an average price differential of 5% in the cost paid for materials purchased from Celotex by Olympia and Standard. This materially inhibited Plaintiffs' ability to compete for jobs, particularly since virtually all union bonded roofing contracting jobs are awarded on a bid basis. During the damage period 1972 through 1976, Olympia's purchases of roofing materials affected by the discrimination amounted to $763,153.00. If it be assumed that had Olympia been granted an average 5% price reduction, and it be further assumed that Olympia pocketed that price reduction in the form of profits, its loss for the period 1972 through **[**58]** 1976 would be $38,157.65. However, if it be assumed that Olympia used the 5% price reduction as a basis for more vigorously competing for awards of jobs in the market, in reasonable probability Olympia's participation in the market would have increased. Based on this factor, and Olympia's history in the market, Olympia could easily have increased its total "sales", i.e. gross revenues realized from rendering roofing contracted services by 40%. During the period 1972-1976, Olympia's sales actually amounted to $2,704,539.00, with a net pre-tax profit of 1.06 cent per dollar of sales. Increase in sales, assuming equality of pricing and use of reduced prices to compete in the market, would amount of $1,081,816.00. **[*308]** Plaintiffs propose to offer proof of damages using this basic methodology and employing a ten year "straight-line" projection of sales and loss net profits for a "future" period of ten years from and after 1976.

56. Contracting for the furnishing of bonded union roofing services within the geographical area known as metropolitan New Orleans is a separate market or sub-market, distinct from the total roofing market in the geographical area, which has peculiar **[**59]** characteristics, including:

(a) The initial determination whether a roofing job will be union and/or bonded is controlled by architectural specifications;

(b) These specifications are influenced in large part through the roofers industrial promotion program, an integral part of the bargaining agreement between the union and roofing contractors;

(c) The contractors contribute 25 cents per man per working hour to the program;

(d) The executive director of the program runs the bid depository, and prepares bid forms, to be used in submission of bids by contractors;

(e) He also serves as an industrial promotion man making contact with architects and securing specifications designed to require union labor;

(f) Specifications which require "prevailing wage to be paid" insure that a job is performed with union labor;

(g) Union roofing work is primarily commercial, and virtually all commercial jobs over $250,000.00 in value are union jobs, and are bonded;

(h) There is no competition between union and non-union contractors where bonds and "prevailing wage" are required;

(i) Union contractors, in order to compete effectively in the market, must possess the power to apply for and obtain **[**60]** roofing bonds from suppliers of roofing materials.

57. In addition to the Defendant Standard and the Plaintiff Olympia, other companies which have competed in this market, since the year 1970, include Dixie Roofing Company, Inc., Ellis Roofing, Inc., Taylor-Seidenback, Inc., Holzer Sheetmetal, Inc., Edward Chassinol Roofing, Orleans Roofing and Materials, and Delta Decks, Inc.

58. A second market consists of sales of roofing materials to union bonded roofers in the New Orleans area.

(a) The basic roofing materials consist of flashing materials (which is a laminated felt paper product), insulation, (which may be inorganic or fiberglass), paper and felt (which can be treated with pitch or asphalt), plastic sheets, adherent material (which is ordinarily asphalt, pitch (tar), or putty (a cut-back asphalt) and shingles (which are asphalt).

(b) Generally, roofing materials are categorized as either "tar" or "asphalt."

(c) In selling materials to union roofers for commercial application, suppliers furnish bonds to customers through approved roofers, i.e., the roofing contractor has to be approved before a bond will be furnished.

(d) Because of the common requirement of bonded **[**61]** roofs on larger commercial jobs, the ability to secure a bond is an indispensible requirement for the union contractor in securing jobs.

(e) Likewise, the furnishing of bonds is an indispensible element in the sale of roofing materials to union bonded roofing contractors in the New Orleans area.

(f) Defendant Celotex sells both asphalt and tar roofing materials, and bonds both tar and asphalt roofs.

(g) GAF, Inc., sells shingles and asphalt roofing materials, no insulation materials, and bonds asphalt roofs only.

(h) Johns-Manville sells shingles and insulation, and bonds asphalt products only.

(i) Koppers Company sells and bonds only tar products.

(j) Fiberglass markets a taped insulation system that has a minor portion of the roofing market.

(k) Bird & Son markets primarily shingle and asphalt products, with its primary sales being in the residential field.

[*309] (*l*) Each manufacturer will furnish a bond, and approve a contractor for bonding, only if its products are used in the construction of the roof, and thus the furnishing of the bond is inseparably tied to the sale of materials by the manufacturer to the union roofing contractor.

LIST OF WITNESSES AND DOCUMENTS

[62]** Plaintiffs expect to elicit testimony from the following witnesses, and to offer the following documents, in support of the facts set forth above.

WITNESSES

1. *William J. Manion*, 401 Metairie Road, Metairie, Louisiana

ATTACHMENT# 2

RULE 3.9 STATEMENT OF MATERIAL FACTS

The Court's Order of May 14, 1980 specified in para. 38 that "the narrative statements of fact in the parties' Pretrial Statements shall serve as the Statements of Material Facts required by Local Rule 3.9." Accordingly, Defendant The Celotex Corporation ("Celotex") admits for the purpose of this Motion all narrative statements of fact in the Second Amended Pretrial Statement filed by Plaintiffs Olympia Company, Inc. and Olympia Roofing Company, Inc. ("Olympia"). [1] Celotex also submits that the following facts as to which it contends there is no genuine issue to be tried may be material: [2]

---

[1] A copy of the Narrative Statement of Facts in Olympia's Second Amended Pretrial Statement is attached as Appendix I, supra at pg. 301.

[63]** 1. Olympia neither purchased materials from nor placed orders with Celotex after October of 1973. (III Manion Deposition [1977], Tr. 112-14, 127-29; II Manion Deposition [1977], Tr. 23-24; Olympia's Answer to Celotex First Interrogatory No. 35(g) (filed May 18, 1978).)

2. Olympia has been able to identify only six instances in which Olympia and Standard made roughly contemporaneous purchases of similar goods from Celotex at different prices. (Manion Deposition [1978], Tr. 186.)

3. Olympia never requested a discount from Celotex or any other manufacturer, nor were discounts ever offered to Olympia by any competitors of Celotex. (Manion Deposition [1978], Tr. 43-46, 121, 126, 185.)

4. Olympia has no information whatsoever concerning (a) what Celotex products it attempted to buy at which prices and at what times, (b) whether Celotex was actually meeting lower competitive offers when it extended price discounts to other roofers, and (c) whether Celotex attempted to verify competitive prices. (Manion Deposition [1978], Tr. 55-62, 69-72, 86-88, 91-93, 108-11, 115-16, 133, 136.)

5. Celotex lowered its prices to individual roofers only when necessary to do so in order to meet **[**64]** a lower competitive offer, and only after a detailed and formalized multi-tier system of verification. (Brasher Affidavit paras. 7-20; LeGrow Affidavit paras. 20-30.)

[*310] 6. Celotex has never contracted, agreed, or conspired, through the use of the Approved Roofer list or otherwise, to (a) give one roofer lower prices than those extended to it competitors, or (b) to boycott or injure a roofer. (Brasher Affidavit paras. 7, 34; LeGrow Affidavit paras. 16-19.)

7. The sales data accompanying Olympia's Second Amended Pretrial Statement shows only Celotex sales to selected roofers in the New Orleans area, are incomplete, and support no conclusions whatsoever about Celotex's share of the relevant market. (Cromartie Deposition, Tr. 33-35, 62-69, 77-80, 148-49, 207, 266-72 & Exs. 5, 6; Jeffress Deposition, Tr. 79-83, 140-41 & Exs. 3, 4.)

8. Olympia did no roofing jobs equal to or over $250,000 in value in the period from 1972 to 1976. (III Manion Deposition [1977], Tr. 114-15; II Manion Deposition [1977], Tr. 75-77.)

9. No copy of the Approved Roofer Agreement between Celotex and Olympia has ever been found. (LeGrow Affidavit para. 7; Olympia's Answer to Celotex First Interrogatory **[**65]** No. 34(b) (filed May 18, 1978).)

10. An Approved Roofer Agreement is terminable at will. (LeGrow Affidavit para. 9.)

11. In late 1973, Celotex and Olympia engaged in a dispute involving the payment of bills. (III Manion Deposition [1977], Tr. 125-32; II Manion Deposition [1977], Tr. 6, 24-26.)

12. Celotex did not refuse to sell materials to Olympia, but rather insisted upon delivering them C.O.D. or to job-sites in order to preserve its lien rights. (III Manion Deposition [1977], Tr. 91-94, 112-14; II Manion Deposition [1977], Tr. 8-9, 23-24.)

13. As a result of the credit dispute, Olympia sued Celotex in the Civil District Court for the Parish of Orleans. (III Manion Deposition [1977], Tr. 43-44; II Manion Deposition [1977], Tr. 6; *Olympia Roofing Company, Inc. v. The Celotex Corporation, et al*., No. 574-437 (filed June 10, 1974).)

14. Although it was customary for Celotex to delete roofers from its Approved Roofer list if no purchases were made within a 12-month period, it was also customary to notify roofers deleted for this reason, both as a courtesy and in order to allow them to be reinstated if they wished. (LeGrow Affidavit paras. 9, 11.)

---

Manion taken on May 31, and June 2, 1977 = Manion Deposition [1977]. Deposition of Dr. J. S. Cromartie taken January 5, 1984 = Cromartie Deposition. Deposition of Dr. P. W. Jeffress taken January 4, 1984 = Jeffress Deposition. Affidavit of S. E. Brasher = Brasher Affidavit. Affidavit of W. W. LeGrow = LeGrow Affidavit.

15. In early **[**66]** 1974, it was decided that alterations in Celotex's corporate structure made it necessary to update and revise existing Approved Roofer lists. (LeGrow Affidavit para. 5.)

16. Accordingly, new Approved Roofer Agreement forms were forwarded to roofing applicators by the appropriate Regional offices. (LeGrow Affidavit para. 6.)

17. An Approved Roofer Agreement was delivered to Olympia in January of 1974; however, Olympia refused to sign the Agreement because of the continuing credit dispute with Celotex, and did not execute and forward the Agreement to Celotex until February of 1975. (III Manion Deposition [1977], Tr. 133-36.)

LexisNexis® Headnotes

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Civil Procedure > Appeals > Standards of Review

HN1[] **Injunctions, Preliminary & Temporary Injunctions**

A trial court's decision in granting or denying a preliminary injunction will only be set aside when it is based on an abuse of discretion or on improper legal premises. The reviewing court must evaluate whether the trial court correctly identified and applied the pertinent legal standards in passing on the motion for a preliminary injunction.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Public Interest

HN2[] **Injunctions, Preliminary & Temporary Injunctions**

Under the Ninth Circuit Court of Appeals traditional test, a preliminary injunction is justified when: (1) the moving party has established a strong likelihood of success on the merits; (2) the balance of irreparable harm favors the moving party; and (3) the public interest favors the issuance of an injunction.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN3[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The court reviews anti-competitive action, ambiguous on its face, under the so-called Rule of Reason to determine whether its purpose and effect is to derail free competition.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN4[] **Regulated Practices, Private Actions**

Complete involvement does constitute a defense to a treble damages claim in an antitrust action. Nonetheless, the defense contemplates that the plaintiff at least be a participant, if not an equally culpable participant.

Counsel: John H. Hauser, McCutchen, Doyle, Brown & Enersen, San Francisco, California, Byron L. Gregory, Esq., McDermott, Will & Emery, Chicago, Illinois, for Appellees.

James Loftis, Esq., Washington, District of Columbia, for Appellant.

Judges: Anderson, Ferguson and Beezer, Circuit Judges. Beezer, Circuit Judge, dissenting.

Opinion by: FERGUSON

Opinion

[*512] FERGUSON, Circuit Judge:

On June 27, 1984, the Supreme Court held that the National Collegiate Athletic Association's (NCAA's) position as the exclusive bargaining agent for college football television rights violated *section 1* of the Sherman Act. *National Collegiate Athletic Association v. Board of Regents of University of Oklahoma (Regents), 468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*. Immediately thereafter, most universities with football programs began to renegotiate television contracts. Similarly, the television networks, particularly the American Broadcasting Company (ABC) and the Columbia Broadcasting System (CBS), eagerly sought to acquire the **[**2]** broadcasting rights previously disbursed by the NCAA. Less than a month after the Supreme Court's *NCAA* decision, a large number of college conferences and independent football powers entered into an exclusive **[*513]** broadcasting contract with ABC under the new banner of the College Football Association (CFA). A much smaller, but nonetheless formidable group of schools, the twenty members of the Pacific-10 and Big Ten Conference, signed with CBS for the 1984 football season. Shortly thereafter this smaller group of colleges, including the Regents of the University of California, the University of Southern California, the Pacific-10 Conference, and the Big Ten Conference, filed this antitrust suit against the defendants ABC, the CFA, and two CFA member institutions. The plaintiffs, mainly pressing their antitrust claims, sought and obtained a narrow preliminary injunction prohibiting Nebraska and Notre Dame from refusing to consent to the broadcast of one of their fall games solely on the basis of the exclusivity terms of their contract with the remaining defendants. By its terms, the preliminary injunction does not require the individual defendant schools to consent to **[**3]** the plaintiffs' broadcast offers. Instead, it merely bars the two universities from withholding consent solely on the terms of the contract between the CFA and ABC. After the district court denied the defendants' application for a stay of the preliminary injunction, which would have had the practical effect of barring live television coverage of the Nebraska-UCLA and Notre Dame-USC games, the defendants appealed. We affirm.

I. FACTS

The history of the college football television market is chronicled in the Supreme Court's *NCAA* decision, *468 U.S. 85, 104 S. Ct. 2948, 2954-57, 82 L. Ed. 2d 70 (1984)*, and need not be repeated here. Under both long and short term contracts, the defendant ABC and its sports broadcasting subsidiaries were the principal beneficiaries of the NCAA's former control over college football broadcast rights. In the wake of the Supreme Court's NCAA decision, ABC can lay claim to the broadcasting rights for the 63 major college football programs which make up the CFA. [1] An integral part of ABC's broadcasting contract with the CFA requires member schools to maintain, on pain of CFA sanctions, ABC's position as the exclusive network for member **[**4]** television coverage. The broadcast restraints posited by the ABC contract come in several forms. The particular restraint which triggered the preliminary injunction and precipitated this appeal is called the "crossover restriction." In essence, the crossover restriction contained in the ABC-CFA contract bars the broadcast of CFA member games on other networks even when the opposing team is not a member of the CFA.

By design, the ABC television contract with the CFA attempts to create an exclusive "network window" from 3:30 to 11:30 P.M. EST on Saturdays wherein two CFA games of ABC's selection will be broadcast. These two games, **[**5]** chosen by ABC or its subsidiary the Entertainment and Sports Programming Network, Inc. (ESPN), are the only two games between CFA members eligible for broadcast during this time period. The ABC contract further provides that this exclusive Saturday afternoon window also extends to games played between CFA members and other colleges not affiliated with the CFA. Hence, the ABC contract prohibits the broadcast of games between CFA and non-CFA teams, called crossover games, during this Saturday time frame through the enforcement of its exclusive broadcasting rights with the CFA. Stated differently, the ABC-CFA contract not only curtails broadcasting competition among member CFA schools, but also seeks to eliminate direct network competition by prohibiting the telecast of crossover games.

The Big Ten and Pac-10 Conferences (hereafter referred to as the Pac-10-Big **[*514]** Ten Conference) declined the opportunity to join the CFA. These two Conferences, with their twenty member schools, struck out on their own and negotiated a contract with CBS on July 18, 1984, several days before ABC entered into the agreement with the CFA. This fact is relevant to our inquiry because the function **[**6]** of a preliminary injunction is to preserve the status quo *ante litem.* *Tanner Motor Livery, Ltd. v. Avis, Inc., 316 F.2d 804, 809 (9th Cir. 1963)*. Discerning the status quo *ante litem* presents little problem in this case because the challenged conduct, the exclusivity provisions of the ABC-CFA contract, came into existence after the plaintiffs had contracted for their broadcasting package with CBS. There has been no counterclaim by the defendants regarding the plaintiffs' contract. Hence, the only matter in controversy is the terms of the ABC-CFA contract. Without question, "'the last, uncontested status which preceded the pending controversy,'" *id. at 809* (quoting *Westinghouse Electric Corp. v. Free Sewing Machine Co., 256 F.2d 806, 808 (7th Cir. 1958))*, is preserved by the preliminary injunction.

The terms of the Pac-10 and Big Ten contract gave CBS similar rights to broadcast Saturday games, selected by CBS, between Pac-10-Big Ten Conference teams. The contract also claimed rights to the crossover games between Pac-10 and Big Ten Conference members and non-Conference teams. [2] Not surprisingly, given the rich

---

[1] Even to those uninitiated in the seasonal nuances of the college football game, the broad geographic span of the CFA member institutions, including schools such as Nebraska, Notre Dame, Boston College, Miami of Florida, Oklahoma, Texas, SMU, Alabama, Missouri, Brigham Young and Pittsburgh, reveals the imposing position the CFA occupies within the college football broadcast market.

[2] The legality of the Conference's crossover restriction is not at issue in this litigation in the absence of a cross-claim by the defendant. Accordingly, a comparison of the two is unnecessary.

tradition **[**7]** and perennial prominence of both Conference and CFA teams, two crossover confrontations, a Nebraska-UCLA game and a Notre Dame-USC match, had been previously scheduled for the 1984 season.

The Pac-10-Big Ten Conference desires to broadcast both of these games, only one of which remains at issue, [3] and ABC has attempted to prevent CBS coverage through the enforcement of the CFA crossover restrictions. Based on the complaint and the substantial record placed before it, the district court issued a preliminary injunction prohibiting two CFA members, Notre Dame and Nebraska, from withholding consent to the CBS broadcast of their games against the two PAC-10 teams, USC and UCLA, based solely on the terms of the ABC-CFA crossover restriction. The district court further enjoined the CFA and its members from imposing or **[**8]** threatening to impose any sanctions on either Nebraska or Notre Dame to inhibit these schools from voluntarily consenting to a CBS crossover broadcast. Consequently, at this very early stage in the antitrust litigation, the net effect of the trial court's preliminary injunction is limited to the telecast of the game between Notre Dame and USC on November 24, 1984. Moreover, while the preliminary injunction does insure that ABC and the CFA cannot unilaterally prevent the CBS broadcast of this game, the injunction does not compel Notre Dame to consent to the CBS broadcast of its Thanksgiving weekend game against USC. Instead, the preliminary injunction operates to liberate Notre Dame from the constraints of the crossover restriction while simultaneously permitting the school to make a truly independent decision on whether to accept CBS's Thanksgiving weekend broadcast package.

[9]** The premise behind the district court's preliminary injunction, and indeed the principal contention raised in plaintiffs' complaint, is that the ABC-CFA contract violates this nation's antitrust laws. Specifically, the plaintiffs allege that the defendants have violated *section 1* of the Sherman **[*515]** Act which prohibits "every contract, combination . . . or conspiracy in restraint of trade. . . ." *15 U.S.C. § 1*. The plaintiffs have challenged the exclusivity of the ABC-CFA television contract as to competition among CFA member institutions as well as that between CFA and non-CFA colleges. Although the district court did not reach any final conclusions on the merits of the plaintiffs' case, by necessity the court made some findings on the strength of the plaintiffs' antitrust claims. The only ultimate conclusion reached by the court was to preserve the status quo pending the resolution of the merits of plaintiffs' complaint. Our task, under the appropriate standard, is to review this limited and narrow exercise of the district court's equitable discretion.

II. STANDARD OF REVIEW

The standard of review for the issuance of a preliminary injunction **[**10]** has often been stated and needs no lengthy elaboration here. ***HN1***[] A trial court's decision in granting or denying a preliminary injunction will only be set aside when it is based on an abuse of discretion or on improper legal premises. *Los Angeles Memorial Coliseum Comm'n v. National Football League, 634 F.2d 1197, 1200 (9th Cir. 1980)*. This court must evaluate whether the trial court correctly identified and applied the pertinent legal standards in passing on the motion for a preliminary injunction. This circuit has formulated different descriptions, some simple and some ornate, of the correct legal standard for the issuance of a preliminary injunction. *See, e.g.*, *Los Angeles Memorial Coliseum Comm'n. v. National Football League, 634 F.2d 1197, 1200 (9th Cir. 1980)* (setting forth a four part test requiring strong likelihood of success on the merits, possibility of irreparable injury to plaintiff absent injunction, balance of hardships favoring plaintiff, and advancement of public interest); *American Motorcyclist Ass'n. v. Watt, 714 F.2d 962, 965 (9th Cir. 1983)* **[**11]** (articulating a three part standard for issuance of a preliminary injunction); *Benda v. Grand Lodge of IAM, 584 F.2d 308, 314-15 (9th Cir. 1978)*, *cert. dismissed*, *441 U.S. 937, 60 L. Ed. 2d 667, 99 S. Ct. 2065 (1979)* (approving use of an abbreviated two part test). Long or short, old or new, these tests "are not separate tests but the outer reaches 'of a single continuum'." *Los Angeles Memorial Coliseum Comm'n v. National Football League, 634 F.2d at 1200* (quoting *Benda v. Grand Lodge of IAM, 584 F.2d at 315*).

---

[3] The preliminary injunction was issued on September 10, 1984 and had its initial impact on the first scheduled crossover game between Nebraska and UCLA which took place on September 22, 1984. Faced with the terms of the preliminary injunction the University of Nebraska elected to give its consent to televising this game nationally on CBS rather than forgo any telecast. By not televising any college game during the Nebraska-UCLA telecast, ABC chose not to compete during this crossover match.

None of the respective factual inquiries described by the various standards are irrelevant to the district court's essential task of balancing the equities in the exercise of the equitable discretion vested in the district court. In this case the district court utilized the middle standard in the "continuum," which has been described as the "traditional" standard in this circuit. *See* American Motorcyclist Ass'n. v. Watt, 714 F.2d at 965. **HN2**[] Under this traditional test a preliminary injunction is **[**12]** justified when: (1) the moving party has established a strong likelihood of success on the merits; (2) the balance of irreparable harm favors the moving party; and (3) the public interest favors the issuance of an injunction. American Motorcyclist Ass'n. v. Watt, 714 F.2d at 965. In this case the district court expressly found that the public interest is served by the issuance of the preliminary injunction; that the balance of the hardships sharply favors the plaintiffs and, in fact, the defendants would suffer no appreciable hardship and the university defendants would even benefit from the injunction; and, finally, that the plaintiffs had raised serious questions [4] whether the defendants **[*516]** had violated the antitrust laws. We review the district court's findings to determine whether the court abused its discretion in reaching its conclusions.

[13]** A. Likelihood of Success on the Merits

In their complaint, the plaintiffs allege that the actions of the defendants violate section 1 of the Sherman Act in two different respects. First, plaintiffs characterize the CFA crossover restriction as refusal to deal by CFA members with non-CFA members on television broadcast coverage. In the alternative, the plaintiffs also assert that the defendants have formed a cartel restricting the output of televised games so as to raise artificially the value of the ABC-CFA contract. So cast, the plaintiffs' complaint alleges the classic antitrust violations of "group boycott" and "price-fixing." These two different types of commercial activity have traditionally been categorized as *per se* violations of the antitrust laws. *See* Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 3 L. Ed. 2d 741, 79 S. Ct. 705 (1959) (agreement not to sell to individual retailer constituted group boycott subject to *per se* rule); Associated Press v. United States, 326 U.S. 1, 12-15, 89 L. Ed. 2013, 65 S. Ct. 1416 (1945) (joint newspaper venture cannot expressly prohibit all transactions with non-members); **[**14]** United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 84 L. Ed. 1129, 60 S. Ct. 811 (1940) (major oil refiners' concerted program to purchase distressed gasoline to prop up market price constitutes price-fixing subject to *per se* analysis).

Some forms of concerted action, however, cannot be and are not so easily categorized as patently anti-competitive. **HN3**[] Courts review such activity, ambiguous on its face, under the so-called Rule of Reason to determine whether its purpose and effect is to derail free competition. Plaintiffs further contend that even if the defendants' conduct is subject to this more searching rule of reason inquiry, the trial court correctly concluded that the plaintiffs are nonetheless likely to succeed on their antitrust claims. Conversely, the defendants object to the categorization of their conduct as per *se* violations and further aver that their actions will withstand review under the Rule of Reason.

We need not reach the issue of whether *per se* or Rule of Reason analysis will govern the evaluation of the plaintiffs' antitrust claims. **[**15]** Under either analysis the trial court did not abuse its discretion in finding that the plaintiffs had presented serious questions indicating a fair chance of success on the merits. Indeed, our confidence in the district court's finding on this matter cannot ask for a more firm footing than that found in the Supreme Court's recent decision in NCAA v. Regents, 468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984). Fortunately, the *NCAA* decision not only precipitated the present state of affairs in the college football television market, it also provided the concomitant legal insights necessary to facilitate our inquiry in this case.

---

[4] Admittedly, the reference to the "serious questions" presented as to the defendant's compliance with section one of the Sherman Act suggests that the district court may have utilized the short, two-part, "alternative" standard set forth in Benda v. Grand Lodge of IAM, 584 F.2d at 315, which requires a lesser showing of only a balance of hardships tipped sharply in the plaintiff's favor coupled with a "fair chance of success on the merits" or presenting questions "serious enough to require litigation." Nonetheless, the district court did expressly find that the public interest favored the issuance of the preliminary injunction, a finding consonant with the plenary inquiry outlined by the traditional test. Hence, we review the district court's findings under the traditional standard.

In *NCAA v. Regents*, the Supreme Court held that the NCAA's exclusive control over the football broadcast rights of member institutions violated *section 1* of the Sherman Act. In reaching this conclusion the Court applied the "Rule of Reason," *id. at 2962*, and found that the plan constituted an impermissible restraint on the market. *Id. at 2967*. The Court further held that the NCAA had not established any affirmative defense sufficient to justify the perpetuation of the trade restraints under the Rule of Reason. Reference **[**16]** to the reasoning behind the Court's twin conclusions on the applicability of the Rule of Reason and the absence of any affirmative defense is instructive in evaluating the seriousness of plaintiffs' allegations in the present case.

In *NCAA v. Regents*, the Supreme Court rejected a *per se* approach to the analysis of the NCAA's clear domination of the college football broadcasting market. *104 S. Ct. at 2961-66*. In so doing, the Court **[*517]** recognized that the NCAA television plan constituted a horizontal restraint on trade of a character similar to prior restraints that had succumbed to the *per se* rule. *Id. at 2960*. Nonetheless, the Court dismissed the *per se* rule in favor of the Rule of Reason for one express reason: the very nature of the industry rendered "horizontal restraints on competition . . . essential if the product is to be available at all." *Id. at 2961*. In the Court's view, the college football industry must collectively adopt and enforce uniform rules; the integrity of the industry must be preserved through mutual agreement and enforceable standards; and, the quality of the common industrial "product" is inexorably linked to **[**17]** the vitality of the industry itself. The NCAA performed all of these essential functions. Presumably, the Court's acceptance of this essential entity argument, focusing as it does on the needs of an entire industry, would have equal force in both group boycott and price-fixing settings. Having found that the NCAA performed all of these essential roles in furthering and policing the college football industry, the Supreme Court held that the attendant horizontal restraints should be examined under the Rule of Reason rather than the *per se* rule.

Obviously, the Court's categorization of the NCAA's vital relationship to the college football "industry" is not equally transferable to the CFA. By any account, the purpose and effect of the horizontal restraints imposed by the CFA and the ABC-CFA contract have little, if any, bearing on the operative rules of collegiate football. Presumably, the essential ingredients of industry uniformity and product integrity are still being furnished by the same entity -- the NCAA. More to the point, if an industry depends on such an entity for its very sinews, logic suggests that there can be only one such entity per industry. With the NCAA having **[**18]** already occupied the field of "college football," the CFA and the ABC-CFA contract appear to constitute classic horizontal restraints unadorned by any organic relationship to the "character and quality of the 'product'." *Id. Cf. NCAA, 104 S. Ct. at 2969* (NCAA's "restraints on football telecasts that are challenged in this case do not, however, fit into the same mold as do rules defining the conditions of the contest, the eligibility of participants, or the manner in which members of a joint enterprise shall share the responsibilities and the benefits of the total venture.").

Accordingly, the reasoning of the *NCAA* decision suggests that traditional antitrust analysis, and the attendant *per se* label, should apply to the plaintiffs' boycott and price-fixing allegations. Although we need not decide here whether the *per se* label shall attach to the antitrust inquiry in this case, we note that price-fixing and group boycotts have traditionally been subject to *per se* review. *See Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 3 L. Ed. 2d 741, 79 S. Ct. 705 (1959)* (group boycott subject to *per se* rule); *United States v. Columbia Pictures Industries, Inc., 507 F. Supp. 412, 426-28 (S.D.N.Y. 1980)* **[**19]** (same); *United States v. Topco Associates, Inc., 405 U.S. 596, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972)* (horizontal restraints dividing market among joint venturers subject to *per se* rule); *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)* (joint program to purchase spot oil so as to influence market price subject to *per se* rule as price-fixing). The features of the ABC-CFA contract will no doubt have the effect of limiting the output of televised college football. The exclusionary nature of the crossover restriction appears on its face to be in furtherance of a concerted refusal to deal. *See E.A. McQuade Tours, Inc. v. Consolidated Air Tour Manual Committee, 467 F.2d 178, 187 (5th Cir. 1972) cert. denied, 409 U.S. 1109, 34 L. Ed. 2d 690, 93 S. Ct. 912 (1973)*. On the record before the trial court, therefore, we cannot say that it abused its discretion in finding that the plaintiffs had presented serious questions regarding the defendant's compliance with *section 1* of the Sherman Act.

Conversely, application of the Rule of Reason does not diminish the thrust or **[**20]** **[*518]** force of the plaintiffs' case. Once again, the Supreme Court's *NCAA* decision illustrates the strength of the plaintiffs' case. The defendants contend that the CFA and the ABC-CFA contract are actually procompetitive. Citing *Broadcast Music,* Inc. v. CBS, Inc., 441 U.S. 1, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979), the defendants characterize their relationship as a joint selling arrangement creating a "new and different product, an ABC 'CFA Football' program." In *Broadcast Music*, the Supreme Court upheld a joint selling arrangement among music composers which had the effect of increasing the total volume of musical compositions sold in the market. Broadcast Music, Inc. v. CBS, 441 U.S. 1, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979). The Supreme Court, however, has already rejected a similar attempt to rely on the *Broadcast Music* opinion as a justification for the NCAA's restraints on individual college broadcasting competition. NCAA v. Regents, 104 S. Ct. at 2967-68. As the Supreme Court in *NCAA* noted, the possibility of individual competition, with the concomitant increase in output, was considered the saving **[**21]** grace of the joint selling arrangement in the *Broadcast Music* case. NCAA, 104 S. Ct. at 2968. The ABC-CFA "arrangement," just as the NCAA television plan that fell before it, shares the dual infirmities of an intentional reduction in output along with the imposition of sharp restraints on individual school competition. Moreover, this conclusion applies with as much force to the ABC-CFA contract considered as a whole as it does to the component restraints found in the crossover restriction.

Reversing their field, the defendants have also suggested that the CFA is not a mutual arrangement for the imposition of essential horizontal restraints but rather the CFA simply imposes non-price vertical restrictions on the ultimate distributors of its product. Once again, the defendants' arguments fail as a result of the Supreme Court's *NCAA* opinion. Substance, not form, will determine whether the CFA is a single economic entity engaged in distributing a product to its distributors. *See* United States v. Sealy, 388 U.S. 350, 352, 87 S. Ct. 1847, 18 L. Ed. 2d 1238 (1967). The Supreme Court, in the *NCAA* decision, despite its recognition of the **[**22]** many substantive and valuable functions the NCAA performs to advance the industry, found the NCAA television plan to be "a horizontal restraint -- an agreement among competitors on the way in which they will compete with one another." NCAA, 104 S. Ct. at 2959. *Cf.* Los Angeles Memorial Coliseum v. National Football League, 726 F.2d 1381, 1389 (9th Cir. 1984). It is unclear how the CFA, which does not even purport to perform the supervisory functions undertaken by the NCAA, occupies a different posture with respect to its member institutions. Even if the defendants' characterization of the CFA arrangement as a nonprice vertical restraint could successfully be argued after the NCAA decision, [5] this circuit has adopted a market share analysis of vertical restraints which, under the concentrated conditions of the college football television market and the CFA's position therein, significantly diminishes the defendants' chances under the Rule of Reason. *See* Continental T.V., Inc. v. G.T.E. Sylvania Inc., 694 F.2d 1132, 1138-39 (9th Cir. 1982) (adopting Fifth Circuit's use of market-structure analysis in Red Diamond Supply, Inc. v. Liquid Carbonic Corp., 637 F.2d 1001, 1005-6 **[**23]** (5th Cir.), *cert. denied*, *454 U.S. 827, 70 L. Ed. 2d 102, 102 S. Ct. 119 (1981))*.

The defendants' final argument in the way of an affirmative defense is that the plaintiffs' antitrust suit is barred by the doctrines of *in pari delicto* or unclean **[*519]** hands. This contention need not detain us for long. Although the Supreme Court has broadly stated that the *in pari delicto* defense has no role in the antitrust **[**24]** field, Perma Life Mufflers Inc. v. International Parts Corp., 392 U.S. 134, 20 L. Ed. 2d 982, 88 S. Ct. 1981 (1968), the Court left the decision open as to whether a plaintiff's "complete involvement" in an antitrust violation could ever be a basis for barring suit under the antitrust laws. Id. at 140. This circuit has "determined that ***HN4***[] 'complete involvement' does constitute a defense to a treble damages claim in an antitrust action." Thi-Hawaii v. First Commerce Fin. Corp., 627 F.2d 991, 995 (9th Cir. 1980). Nonetheless, the defense contemplates that the plaintiff at least be a participant, if not an equally culpable participant, *see* Berner v. Lazzaro, 730 F.2d 1319, 1324 (9th Cir. 1984), in the alleged violation of the antitrust laws. *See* THI-Hawaii v. First Commerce Fin. Corp., 627 F.2d at 995. The only alleged violation currently before the court is that of the ABC-CFA "arrangement." The defendants have not even alleged, much less proven, complicity on the part of the plaintiffs in this alleged violation.

---

[5] In finding the NCAA television plan a "horizontal" restraint, 104 S. Ct. at 2959, the Supreme Court apparently reversed the Tenth Circuit's prior determination that the NCAA stood in a vertical relation to the networks. *See* Board of Regents v. NCAA, 707 F.2d 1147, 1161 (10th Cir. 1983), *aff'd on other grounds*, 468 U.S. 85, 82 L. Ed. 2d 70, 104 S. Ct. 2948 (1984). We need not decide the effect of this inconsistency on this case at this juncture but we can readily infer which characterization will have the greater weight.

[25]** In conclusion, we cannot say that the trial court abused its discretion in finding that the plaintiffs have raised serious questions about the legality of the defendant's conduct under section one of the antitrust laws. We need only look to the reasoning of the Supreme Court in the *NCAA* case to confirm the trial court's preliminary conclusions on the plaintiffs' likelihood of success in the prosecution of their antitrust claims.

B. Balance of Hardships

The trial court found that the "balance of hardships tilts rather sharply in favor of the plaintiffs." Referring to the "intangible" benefits of nationwide television coverage that the parties had discussed at length, the court held that the hardships imposed by declining to issue the injunction far outweighed the hardship that a narrow preliminary injunction would present to the defendants. Again, our role is not to determine what we would do if first presented with the issue. Rather, we must ascertain whether the trial court abused its discretion in finding that the center of gravity for the hardships in this case fell squarely on the side of the plaintiffs. Moreover, we review the trial court's decision based on **[**26]** the record as it then existed, and not on subsequent developments. Finally, we examine the balance of the hardships to the parties, not the scope of injunction, to determine where the equities lie. Of course, if the scope of the injunction is unclear or overbroad, a situation not alleged or present in this case, we may find an abuse of discretion on that basis.

At oral argument before the district court the plaintiffs demonstrated that they would suffer irreparable injury if the ABC-CFA crossover restriction was enforced. The plaintiffs described, along with supporting evidence, the numerous ways in which they would be injured from the enforcement of the allegedly illegal crossover restriction. The trial court was persuaded and found that the plaintiffs would be "clearly harmed" in the absence of a preliminary injunction "both monetarily and with respect to the intangibles discussed at length in argument on the motion." Now, of course, a party is not entitled to a preliminary injunction unless he or she can demonstrate more than simply damages of a pecuniary nature. *Los Angeles Memorial Coliseum Comm'n. v. National Football League, 634 F.2d 1197, 1202 (9th Cir. 1980)*. **[**27]** This is nothing more than a corollary to the principle that the exercise of equitable jurisdiction is predicated on the absence of an adequate remedy at law. We do not think, however, a trial court's recognition of the obvious -- i.e., that monetary losses can indeed attend the infliction of intangible injuries -- requires that this court ignore an otherwise unambiguous finding of intangible injury. Instead, we must look to the record, mindful of the celerity of the proceedings, to determine whether the trial court abused its discretion in finding irreparable injury strongly favoring the plaintiffs' case.

[*520] The plaintiffs described several ways in which they would suffer injury beyond the mere loss of income from broadcasting. These injuries include: the impairment of their ongoing recruitment programs; the dissipation of alumni and community goodwill and support garnered over the years; placement of plaintiffs' teams at a significant disadvantage for purposes of national ranking; [6] the deprivation of the opportunity to showcase rivalries of unique tradition and moment in the "industry"; and a reduction in the attractiveness of the Pac-10-Big Ten Conference "product" **[**28]** which would doom the Pac-10-Big Ten's efforts to compete in the market. These disparate injuries are obviously interrelated, and, if there is one common thread it lies in the conclusion that the plaintiffs would suffer some palpable diminution in national reputation and following from their inability to telecast their premier contests. We also recognize that although these hardships are shared by all of the plaintiffs, they affect the Pac-10-Big Ten Conference plaintiffs in a manner somewhat distinct from the individual plaintiff institutions.

[29]** With the possible exception of the competitive injury to the Pac-10-Big Ten program, we cannot find that the district court abused its discretion in depicting these hardships as sufficient to support the issuance of the very narrow preliminary injunction. One doesn't have to be a football coach to realize that the successful recruitment of student athletes depends on a combination of athletic prowess, national and conference ranking and esteem, the

[6] While at first blush this concern may appear remote, the importance of the national rankings, from the perspective of both the colleges and the networks, cannot be ignored. In fact, the parties to both the ABC-CFA and the CBS-Conference contracts have taken great pains to insure that the televised college games are followed by promotional segments emphasizing the respective rank of the various teams and promoting the conference and inter-conference rivalries. Obviously, if the parties devote so much attention to identifying the graphic detail to which national rankings will be promoted, we would be hard pressed to dismiss national rankings, and the networks' role in fostering them, as trivial.

frequency of post-season bowl appearances, a program's incidence of individual athletic awards such as the prestigious Heisman trophy, and the successful placement of student athletes in the ranks of professional sports. Given the amateur status of collegiate football, a successful recruitment program is the principal means of improving or maintaining the competitive "quality" of the "product." To be sure, successful coaching plays a critical role in furthering the competitive stature of a college team. Coaches, especially successful ones, are not themselves immune from the recruitment efforts of college football programs. The parties do not dispute that the nationwide exposure that television provides college football games directly **[**30]** affects the ability of a college program to attract and retain student athletes. Nationwide television coverage expands the horizons of a college recruitment program and telegraphs to potential athletes the skill, enthusiasm, and esprit that differentiates one program from the next. Coaching skills, student body support, and athletic ability are all on display to students, parents, and alumni during these weekly fall contests. Especially in light of the NCAA's role in regulating and policing uniform recruitment practices, a function left undisturbed by the *NCAA* opinion, television exposure offers a unique opportunity for colleges in their battle to win the enrollment of prospective student athletes. We fail to discern an abuse of discretion by the trial court in refusing to say categorically that the injuries non-exposure would inflict are insubstantial, fleeting, or fully compensable in monetary terms.

The record fails to reveal any significant injury to the defendants stemming from the issuance of the preliminary injunction. The terms of the preliminary injunction will have no effect on the individual college defendants other than removing the fetters of the ABC-CFA contract **[**31]** from their game broadcast bargaining negotiations. National exposure by either network would advance the goals of their college football programs. The defendant ABC argues **[*521]** that its efforts for "product identification" of CFA football as a distinct "brand" will suffer if it cannot enforce its crossover restriction. In other words, permitting the broadcast, over ABC's protest, of a CFA-non-CFA contest, would somehow diminish ABC's program to differentiate "CFA football" from all other varieties of college football. If the preliminary injunction somehow interfered with ABC's ability to select particular games for ABC broadcast the network may have a stronger hardship argument. Instead, the only identifiable injury to ABC is to its ability to prevent the broadcast of one game in which both teams have not previously agreed to an ABC broadcast. We readily concur with the district judge's finding that this hardship merits little, if any, weight. From the individual college's perspective, on the other hand, the "quality" =P0001*21 of the college football program is affected by national exposure regardless of which network performs the task. The preliminary injunction simply **[**32]** frees the individual institutions to assess the needs of their programs from their own perspective.

C. The Public Interest

The district court found that the public interest also favored the issuance of the preliminary injunction. In *NCAA v. Regents, 468 U.S. 85, 104 S. Ct. 2948, 2964, 82 L. Ed. 2d 70 (1984)*, the Supreme Court also took stock of where the public interest lay in evaluating the NCAA's horizontal restraints on the college football television market. In particular, the Supreme Court found that "perhaps the most significant" point in favor of striking the NCAA's horizontal restraints is the "importance of consumer preference in setting the price and output" of the televised college football games. *Id.* Viewing the Sherman Act as a "'consumer welfare prescription'" *id.* (quoting *Reiter v. Sonotone Corp., 442 U.S. 330, 343, 60 L. Ed. 2d 931, 99 S. Ct. 2326 (1979))*, the Court invalidated the NCAA's horizontal restraints because they removed the consumer from the economic picture in determining the supply and demand of televised college football games. From the Supreme Court's perspective, then, the public interest is served **[**33]** by preserving the competitive influence of consumer preference in the college broadcast market. Obviously, the district court's issuance of the preliminary injunction in this case accomplishes precisely this salutary objective. Absent the injunction the defendants could unilaterally determine that the public would not have the choice of viewing an admittedly popular college football game. Although the preliminary injunction does not guarantee that the November 22nd game will be televised, the injunction does preserve the efficacy of consumer preference in that the participants in the game are free to take account of consumer interest when evaluating the merits or terms of a nationwide broadcast of the game. Without the preliminary injunction, the consumer has no influence on the broadcast decision and the ABC-CFA crossover restriction will prevent a nationwide broadcast based on competitive considerations unrelated to consumer demand for the particular game.

Guided by the Supreme Court's recent articulation of the "public interest" in the college football television market, we cannot say that the district court abused its discretion in finding that the public interest is directly **[**34]** served through the issuance of a narrow preliminary injunction. With the issuance of the preliminary injunction the economic voice of the consumer may still be heard; without the preliminary injunction the options of the consumer have already been prescribed by the defendants.

III. CONCLUSION

In sum, after a complete review of the record in this case, we cannot say that the trial court abused its discretion in finding that the balance of hardships tips sharply in favor of the plaintiffs. Moreover, the record in this case presents serious questions raised by plaintiffs indicating that they have a fair chance of succeeding on the merits of the underlying antitrust litigation. Finally, the district court did not abuse its discretion in finding that the **[*522]** public interest is better served by the issuance of the preliminary injunction. [7]

[35]** The preliminary injunction is AFFIRMED.

Dissent by: BEEZER

Dissent

BEEZER, Circuit Judge, dissenting

I respectfully dissent. For the reasons stated below, I believe that the district court employed incorrect legal standards in granting the preliminary injunction.

I

BACKGROUND

A. *Facts*

The only findings of fact made by the district court were as follows:

> The court concludes that plaintiffs have raised *serious questions* relative to their claim that defendants are in violation of *15 U.S.C. § 1* and that this is the case even though plaintiffs' own arrangement with CBS is not above suspicion on the same ground. An analysis of these questions will require a full trial and thoughtful consideration of the quite fluid state of the relationship between major college football and television broadcasters in the aftermath of the Supreme Court's *NCAA* decision. The court further concludes that the balance of hardships *tilts rather sharply* in favor of the plaintiffs with respect to the subject of this proceeding, which relates only to the airing of two games, Nebraska v. UCLA (Sept. 22) and Notre Dame v. USC (Nov. 24). By issuance of this **[**36]** order ABC and ESPN are not measurably harmed, other than by some perceived diminution of their ability quickly to dispatch CBS from the market for nationwide college football telecasts. The plaintiff universities, however, are clearly harmed in the absence of such order, both monetarily and with respect to the intangibles discussed at length in argument on the motion. The defendant universities will clearly benefit from the order in much the same fashion. The public interest is likewise served by this order. It is a matter of common knowledge that the Rose Bowl is sold out for the Nebraska -- UCLA game, which could well determine the "championship" of college football in 1984. Such is the rich tradition of the USC -- Notre Dame rivalry that sportly passions would be aroused if both teams were 0-9 at game time.

---

[7] Our disposition of the defendants' appeal from the district court's preliminary injunction should adequately clarify why we also find no abuse of discretion in the trial court's denial of a stay pending appeal. Under a traditional, *see* *Washington Area Transit Comm'n. v. Holiday Tours, Inc., 182 U.S. App. D.C. 220, 559 F.2d 841 (D.C. Cir. 1977)*, or abbreviated, *Benda v. Grand Lodge of International Association of Machinists & Aerospace Workers, 584 F.2d 308, 315 (9th Cir. 1978)*, *cert. dismissed*, ***441 U.S. 937, 60 L. Ed. 2d 667, 99 S. Ct. 2065 (1979)***, standard for granting such a stay, we find no cause to disturb the trial court's ruling under *Rule 62(c) of the Federal Rules of Civil Procedure*.

(emphasis added). [1]

[37]** B. *Standard of Review*

The grant of a preliminary injunction may be reversed if the district court abused its discretion or based its decision on an erroneous legal standard or clearly erroneous findings of fact. *Sierra On-Line, Inc. v. Phoenix Software, Inc., 739 F.2d 1415, 1421 (9th Cir. 1984)*. A preliminary injunction is proper if the plaintiff shows a combination of: (1) "probable success on the merits" and "the possibility of irreparable injury" or (2) "serious questions" raised on the merits and a balance of hardships that tips "sharply" in the plaintiff's favor. *Id. at 1421* (quoting *Miss Universe, Inc. v. Flesher, 605 F.2d 1130, 1134 (9th Cir. 1979))*. Regardless of which end of the continuum the plaintiff's claim falls on, a showing that the public interest will be served by the injunction is required. *American Motorcyclist Association v. Watt, 714 F.2d 962, 967 (9th Cir. 1983)*.

[*523] The district court based its decision on the second of the two ends of the continuum. The district court found "serious questions" and a balance of hardships that tipped "sharply" in the plaintiffs' favor. **[**38]** It did not find a mere "possibility of irreparable injury" and a "strong likelihood of success on the merits," which is the opposite end of the continuum. *Sierra Club v. Hathaway, 579 F.2d 1162, 1167 (9th Cir. 1978)*.

In general, the decision to grant a preliminary injunction lies within the discretion of the district court. *William Inglis & Sons Baking Co. v. ITT Continental Baking Co., 526 F.2d 86, 88 (9th Cir. 1975)*. In this case, the district court misapplied the applicable legal standards. As a result, it is not necessary to find an abuse of discretion to reverse the granting of the preliminary injunction. [2]

[39]** II

THE BALANCE OF HARDSHIPS

---

[1] *Fed. R. Civ. P. 52(a)* and *65(d)* require specific findings when a preliminary injunction is granted. The district court made only the limited findings quoted above. As a result, we do not have the benefit of the complete and detailed reasoning of the district court.

[2] The defendants urge us to consider the fact that the plaintiffs' contract with CBS contains an exclusivity provision analogous to the provision at issue in this case. *In pari delicto* is rarely, if ever, a defense to an antitrust action. *See* 2 P. Areeda & D. Turner, ***Antitrust Law*** para. 348 (1978). It does not follow, however, that the plaintiffs' actions are irrelevant to the granting of a preliminary injunction. The Second Circuit has stated:

> It is true that the *in pari delicto* doctrine is not a defense on the merits, . . . but the [plaintiff's practices] certainly can be taken into account in determining the equities as a prelude to ruling on a preliminary injunction, at least where a clear showing of "public interest" has not been made out.

Columbia Pictures Industries, Inc. v. American Broadcasting Cos., 501 F.2d 894, 899 (2d Cir. 1974). The Second Circuit's approach is quite logical: a court should consider the actions of the plaintiff in evaluating claims of hardship. Although the plaintiffs argue that the exclusivity provision in the CBS contract is different from the exclusivity provision in the ABC contract, the district court found that it is "not above suspicion." This fact is useful in evaluating the merits of the plaintiffs' claim of hardship.

The plaintiffs seek to distinguish *Columbia Pictures* on the ground that a "clear showing of 'public interest'" has been made in this case. It should be noted that the Second Circuit did not limit its consideration of a party's conduct to cases in which the public interest is not clear. Moreover, this argument misconceives the logic of the Second Circuit's approach. The plaintiffs' conduct is a factor to be considered, not a bar to equitable relief. Although it is conceivable that the public interest in granting a preliminary injunction could be so strong that it would be prudent to ignore the plaintiff's conduct, this case does not present such a situation. As noted below, the public interest only marginally favors the granting of a preliminary injunction in this case.

The first step in analyzing the granting of the preliminary injunction is to review the balance of hardships. The district court found that the balance of hardships tips sharply in favor of the plaintiffs. In reaching that conclusion, the district court relied upon an erroneous legal standard.

A. *Hardship to the Plaintiffs*

The district court found that the plaintiffs would be irreparably injured in the absence of the preliminary injunction. It is well-settled that monetary injuries are not irreparable and may not be considered in determining whether a preliminary injunction is proper. [3] *Sampson v. Murray, 415 U.S. 61, 90, 39 L. Ed. 2d 166, 94 S. Ct. 937 (1974)*; *Los Angeles Memorial Coliseum Commission v. National Football League, 634 F.2d 1197, 1202 (9th Cir. 1980)*; C. Wright & A. Miller, 11 *Federal Practice and Procedure* § 2948, at 434 (1973). This is especially true in an action under the Sherman Act, since a plaintiff can recover treble damages. It is also well-settled that a preliminary injunction cannot be issued to prevent a mere speculative injury. *S.J. Stile Associates Ltd. v. Snyder, 68 C.C.P.A. 27, 646 F.2d 522, 525 (C.C.P.A. 1981)* **[**40]** ("A preliminary injunction will not issue simply to prevent a mere possibility of injury, even where prospective **[*524]** injury is great. A presently existing, actual threat must be shown."); *New York v. Nuclear Regulatory Commission, 550 F.2d 745, 755 (2d Cir. 1977)* (requiring "a showing that the alleged threats of irreparable harm are not remote or speculative but are actual and imminent"); C. Wright & A. Miller, *supra*, § 2948, at 436-38. On application of these principles, the district court's findings do not withstand scrutiny.

[41]** The district court found that the plaintiffs would be harmed "both monetarily and with respect to the intangibles discussed at length in argument on the motion." The district court did not find, and there is no reason to believe, that the monetary harm is not compensable by damages. To the extent that the district court relied on monetary damages, it applied an erroneous legal standard.

The plaintiffs assert three "intangible" harms. [4] First, they argue that the denial of the preliminary injunction would substantially reduce the value of their television contract with CBS. To the extent that the contract loses value, however, the plaintiffs can seek monetary damages. Moreover, any reduction in value would be caused solely by the existence of the ABC-CFA contract. If the plaintiffs prevail at trial, the value of the contract would be fully restored because the ABC-CFA contract would be void. Thus, harm to the CBS contract is not "irreparable" for purposes of a preliminary injunction.

[42]** Second, the plaintiffs argue that the denial of the preliminary injunction would impair their recruiting efforts. This argument is extremely speculative. The record reveals that USC is hardly suffering from a lack of television exposure. The game against Notre Dame would be the third *consecutive* USC game televised nationally on CBS. [5] **[**43]** Any harm suffered by the plaintiffs as a result of lack of exposure would be *de minimis*. [6]

---

[3] This rule is subject to an exception for cases in which monetary damages either cannot be measured, *see, e.g., Texas v. Seatrain International, S.A., 518 F.2d 175, 179 (5th Cir. 1975)*, or are otherwise inadequate, *see, e.g., Semmes Motors, Inc. v. Ford Motor Co., 429 F.2d 1197, 1205 (2d Cir. 1970)* (threat to business' existence). *See generally* Note, *Granting Preliminary Injunctions Against Dealership Terminations in Antitrust Actions*, 67 Va. L. Rev. 1395, 1398-1401 (1981).

[4] The plaintiffs also make the following argument:

> If ABC and the CFA succeed in blocking CBS' coverage of the USC-Notre Dame game, as well as other crossover games, CBS may determine that it is unable to continue to televise college football after this season. As a practical matter, the Pac-10/Big Ten will have to join the CFA in order to have their games shown on national network television and ABC will have forced a competitor out of the market for network televising of intercollegiate football games.

Although that argument is imaginative, it is too speculative for purposes of the injunction application. Moreover, if the plaintiffs are correct, they can obtain money damages. The preliminary injunction cannot be upheld on the basis of this argument.

[5] The recruiting efforts of UCLA are not at issue in light of the broadcast of the UCLA-Nebraska game. The Big Ten and the Pac-10 cannot assert a conference-wide harm to recruiting unless they can show that the USC-Notre Dame game has a unique effect on the Conferences' ability to recruit athletes. Such a showing has not been made. Thus, only USC's recruiting efforts are at issue.

Third, the plaintiffs argue that the denial of the preliminary injunction would deprive them of a valuable opportunity to showcase their teams. As noted above, the harm would be *de minimis*. [7] **[**44]** Moreover, the plaintiffs' conduct is highly relevant in **[*525]** evaluating this claim: [8] the value of the right to showcase the teams cannot be very significant if the plaintiffs were willing to sign a contract with an exclusivity clause. [9]

B. *Hardship to the Defendants*

In addition to misapplying the legal standards governing the plaintiffs' claims of irreparable injury, the district court completely ignored the defendants' claims of hardship. The district court found that "ABC and ESPN are not measurably harmed, other than by some perceived diminution of their ability quickly to dispatch CBS from the market for nationwide college football telecasts." The preliminary injunction assures CBS the broadcast rights to the USC-Notre Dame game and forecloses competitive bidding by the networks for broadcast rights to the most popular 1984 crossover game. The district court did not address ABC's contention that the preliminary injunction hampers its efforts to develop product identification and to sell **[**45]** its exclusive package to advertisers. [10]

The district court also stated that "the defendant universities will clearly benefit from the order." The district court evidently did not give any weight to the fact that Notre Dame is contesting a preliminary injunction from which it will "clearly benefit." Nor did it even acknowledge the argument advanced by Notre Dame and the CFA that the preliminary injunction will endanger the relations among the CFA member universities and the viability of the national **[**46]** television package that they are attempting to develop. *Cf.* *FTC v. Warner Communications Inc., 742 F.2d 1156 (9th Cir. 1984)* (per curiam) (in an action for a preliminary injunction under the Federal Trade Commission Act, noting that equities similar to those alleged by ABC and Notre Dame are "entitled to serious consideration"). A full and fair consideration of the parties' claims required the district court to address these hardships specifically in its findings.

C. *The Balance of Hardships*

The plaintiffs have failed to establish a substantial injury that is both irreparable and nonspeculative. The district court's conclusion to the contrary is due to a misapplication of the law. The district court's conclusion that the

---

Schedule A to the CBS-Big-10/Pac-10 letter agreement reveals that CBS plans to televise the USC-Washington game on November 10 and the USC-UCLA game on November 17. It has been reported that USC will appear in eight televised games this year. Newman, *Greed and Glut*?, Seattle Times, October 6, 1984, at D1, col. 6.

[6] The plaintiffs also argue that televising the football game would raise the USC football team's national ranking and would improve its chances of appearing in a post-season bowl game. This argument is utterly speculative. Additionally, the plaintiffs note that televising football games makes it possible to operate large coeducational athletic programs. Any such injury caused by the exclusivity provision is monetary.

[7] The Big-10 Conference can claim no harm under this theory because USC is not a Big-10 team. The Pac-10 Conference can claim no harm under this theory because it has no interest in insuring television exposure for USC, rather than another Pac-10 team. The Pac-10 could have insured television coverage for its teams by scheduling an alternative game on the date in question. USC can claim only minimal harm under this theory because, as discussed above, USC receives massive television coverage.

[8] *See supra* note 2.

[9] In addition to the exclusivity provision, the letter agreement provided that no Big-10 or Pac-10 team would appear on national television more than four times during the 1984 season. An analogous provision is contained in article 13 of the Big Ten/Pacific-10 Conference Football Television Plan.

[10] ABC and the CFA claim that the development of a strong national package is necessary in light of the availability of regional and local broadcasts. They note that games of peculiar local or regional interest, such as Brigham Young-Utah in Utah or California-Stanford in Berkeley will attract a much larger market share in those areas than a game of general national interest, such as USC-Notre Dame. Accordingly, they assert that an exclusive national package is necessary to produce maximum advertising revenues.

balance between the hardship to the plaintiffs and the hardship to the defendants, which it ignored, tips "sharply" in favor of the plaintiffs is erroneous. The granting of the preliminary injunction was based on an incorrect legal standard.

III

SERIOUS QUESTIONS AND LIKELIHOOD OF SUCCESS

The second step in evaluating the granting of the preliminary injunction is to determine whether the plaintiffs demonstrated an adequate **[**47]** likelihood of ultimate success on the merits. The district court found that the plaintiffs have raised "serious questions," which is the lower end of the continuum in the standard for granting a preliminary injunction. This finding would have been sufficient if the balance of hardship tipped "sharply" in favor of the plaintiffs. Since the balance of hardships favors the plaintiffs only to a minute degree, if at all, the "serious questions" standard is inappropriate. However, the injunction can **[*526]** be sustained if the record reflects that the plaintiffs have established a "strong likelihood of success on the merits."

A. *Per Se Rule v. Rule of Reason*

The starting point for an analysis under *section 1* of the Sherman Act is the determination of the appropriate test for legality. The plaintiffs argue that the exclusivity provision is a naked restraint that is illegal per se. The defendants argue that the Rule of Reason is appropriate. The district court evidently chose the latter course.

The types of conduct that are treated as illegal per se are those in which "surrounding circumstances make the likelihood of anticompetitive conduct so great as to render unjustified **[**48]** further examination of the challenged conduct." *NCAA v. Board of Regents, 468 U.S. 85, 104 S. Ct. 2948, 2962, 82 L. Ed. 2d 70 (1984)*. The district court did not determine that the exclusivity provisions met that description. On the contrary, the district court found that the resolution of the claims would require "thoughtful consideration of the quite fluid state of the relationship between major college football and television broadcasts." The plaintiffs, however, argue forcefully that the exclusivity is illegal per se as a "naked restraint." *See United States v. Sealy, Inc., 388 U.S. 350, 354-58, 87 S. Ct. 1847, 18 L. Ed. 2d 1238 (1967)*; *Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 210-14, 3 L. Ed. 2d 741, 79 S. Ct. 705 (1959)*. The plaintiffs' argument misconceives the nature of "naked" restraints. The exclusivity provision has a purpose other than restraining competition: it allows ABC and the CFA to develop a national college football television package. *Cf. White Motor Co. v. United States, 372 U.S. 253, 263, 9 L. Ed. 2d 738, 83 S. Ct. 696 (1963)* (holding that "naked restraints of trade with **[**49]** no purpose except stifling of competition" are illegal per se). As a result, *Sealy* and *Klor's* are not controlling.

It is possible to view this arrangement as either horizontal or vertical. *Cf. Sealy, 388 U.S. at 352* (noting that it is necessary to look at substance, rather than form, to determine whether an arrangement is horizontal or vertical). As a horizontal arrangement, the ABC contract is quite similar to the joint selling arrangement reviewed under the Rule of Reason in *Broadcast Music, Inc. v. Columbia Broadcasting System, 441 U.S. 1, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*. The Supreme Court recognized in *BMI* that the effect of such an arrangement may be to "make" a market, thus stimulating competition. *Id. at 19-23*; *see NCAA, 104 S. Ct. at 2960-62*. This is precisely the position advanced by ABC and the CFA.

As a vertical arrangement, the ABC contract closely resembles the territorial restrictions reviewed under the Rule of Reason in *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*. In *Continental T.V.*, the Supreme **[**50]** Court recognized that vertical nonprice restrictions could stimulate binterbrand competition and held that a per se rule was therefore inappropriate. *Id. at 51-59*. [11] **[**51]** This is precisely the position advanced by the defendants. *See* Baxter, *Separation of Powers Prosecutorial Discretion and*

---

[11] Vertical price restraints are still illegal per se. *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 104 S. Ct. 1464, 1469* & n.7, *79 L. Ed. 2d 775 (1984)*. *See generally* Liebeler, *The Distinction Between Price and Nonprice Distribution Restrictions*, *31 UCLA L. Rev. 384 (1983)*.

*the "Common Law" Nature of **Antitrust Law***, 60 Texas L. REV. 661, 697 (1982) (noting that "a firm's choice of distributional arrangements, such as granting franchises or grouping goods and services for sale, may simply reflect the firm's judgment about the efficient and effective way to structure its marketing efforts"). The plaintiffs argue that the exclusivity provision is contrary to interbrand competition because crossover games are eliminated. This argument totally misses the point. The "brands" are the competing network television packages, not the teams. Because the exclusivity provision could enhance the marketing of the CFA football **[*527]** package, the Rule of Reason is appropriate. [12]

B. *Application*

It is not necessary to apply the Rule of Reason to the facts of this case, given the procedural setting. It is sufficient to note that close issues are presented which must be resolved at trial. While the district court's finding that "serious questions" are raised by this case is correct, the plaintiff has not shown a sufficiently strong likelihood of success to overcome the virtual absence of irreparable injury. [13]

[52]** IV

THE PUBLIC INTEREST

Even when the evidence supports a finding that the balance of hardships is tipped in favor of the plaintiff, the granting of a preliminary injunction requires a showing that the public interest is served by the injunction. *American Motorcyclist Association, 714 F.2d at 967*. *See generally* Shreve, *Federal Injunctions and the Public Interest*, *51 Geo. Wash. L. Rev. 382 (1983)*. The district court found that televising the games severed the public interest. While that is undoubtedly true, it is irrelevant. Just as the granting of the preliminary injunction did not guarantee the broadcast of the game, the denial of the preliminary injunction would not have barred the broadcast of the game. Both ABC and CBS claim contractual rights with regard to the broadcast of the USC-Notre Dame game. [14] With the preliminary injunction, CBS will have the right to televise the game with Notre Dame's consent. Without the preliminary injunction, CBS would be required to negotiate with ABC and the CFA for the right to televise the game. [15] Thus, the most significant effect of the preliminary injunction is to determine the relative rights **[**53]** of a party and a nonparty. [16] The public interest is not served by such a determination.

---

[12] The plaintiffs also resort to arguing by labels, calling the exclusivity provisions a "group boycott" and a "cartel arrangement." It is now well-established that those terms lack inherent meaning. *See* R. Bork, *The Antitrust Paradox* 330-44 (1978). It is the effect of the arrangement, rather than its form, that is relevant. *See generally*, Bauer, *Per Se Illegality of Concerted Refusals to Deal: A Rule Ripe for Reexamination*, 79 Colum. L. Rev. 685 (1979).

[13] The plaintiffs frequently allude to ABC's alleged plan to drive CBS out of the college television market. Such a motivation does not by itself violate the Sherman Act. Regardless of ABC's intent, the plaintiffs must show that the exclusivity provision had an anticompetitive effect. *NCAA, 104 S. Ct. at 2962* & n.26; *see* Easterbrook, *Is There a Ratchet in **Antitrust Law**?*, 60 Texas L. Rev. 705, 708 (1982) ("Apparently-exclusionary conduct is of legitimate concern only if it works to drive out equally or more efficient rivals."). Although the plaintiffs could bring an action for attempted monopolization, they have not done so. In any event, such an action would fail for lack of a "dangerous probability of success." *See* 2 E. Kintner, *Federal **Antitrust Law*** § 13.4 (1980). It is inconceivable that ABC could monopolize the market in light of the presence of CBS, NBC, and the various cable networks.

[14] The plaintiffs claim that they are entitled to arrange for the broadcast of the game without the consent of Notre Dame, the CFA, or ABC because it will be played on USC's home field. Regardless of the merits of that claim, the CBS contract purports to give CBS the exclusive right to televise the game in question.

[15] Of course, it is also possible that the game would be broadcast on local stations or by syndication. Both contracts permit such broadcasts notwithstanding their exclusivity provisions. Such broadcasts would alleviate any injury to the public interest.

The plaintiffs argue that ABC would refuse to negotiate. If that is the case, however, the plaintiffs' case under *sections 1* and *2* of the Sherman Act might be strengthened considerably.

[54]** The public interest is served by the preliminary injunction only to the extent that it removes an impediment to the broadcast of the game. To the extent that the district court found a greater public interest, it misapplied the legal standards. This error standing alone, however, does not require reversal.

[*528] V

CONCLUSION

In the absence of a balance of hardships tipped sharply in favor of the plaintiffs or a strong likelihood of success, the district court could not properly grant the preliminary injunction. The record reveals that both elements are at the lower end of the continuum: the plaintiff has raised "serious questions" and, arguably, has shown a possibility of irreparable harm. The district court applied incorrect standards in finding that the balance of hardships tipped sharply in favor of the plaintiffs. I would reverse the order of the district court and remand for further proceedings.

---

[16] Although the defendants have not yet filed a responsive pleading, it may ultimately be necessary to join CBS as a plaintiff in this case. *See* [*Fed. R. Civ. P. 19*]. As is obvious from this discussion, CBS's rights may be adversely affected by the outcome of this litigation.

HN1[] **Summary Judgment, Entitlement as Matter of Law**

Under *Fed. R. Civ. P. 56(c)*, a motion for summary judgment may be granted only when there is no genuine issue as to any material fact and the moving party is entitled to a judgment as a matter of law. The undisputed facts and inferences to be drawn from those facts must be viewed in the light most favorable to the party opposing the motion. To support summary judgment, the record must demonstrate that the opponent would not be entitled to prevail under any circumstances.

HN3[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

In order to prevail on a claim under *§ 1* of the Sherman Act, a plaintiff must show both: 1) the existence of a contract, combination, or conspiracy, and 2) an unreasonable restraint of trade under either the per se rule or the rule of reason, as appropriate. *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Antitrust & Trade Law, Sherman Act**

The actions of a corporation's board of directors do not constitute a conspiracy within the meaning of *§ 1* of the Sherman Act. A corporation, which can only function pursuant to the group decisions of the members of its board of directors, cannot in this fashion be found to have conspired with itself. An exception to this rule may exist, however, where individual members of the board of directors possess an independent personal stake in a particular action of the board, that is, where the act on their own behalf.

HN5[] **Antitrust & Trade Law, Regulated Industries**

Title *49 U.S.C.S. § 10934 (d)(4)* provides that the antitrust laws do not apply to discussions or agreements between a motor common carrier and its agents (whether or not an agent is also a carrier) related solely to ownership of a motor common carrier by an agent or membership on the board of directors of any such motor common carrier by an agent.

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] **Antitrust & Trade Law, Sherman Act**

The antitrust laws look to substance, not to form. Some courts observe that as long as employees or officers of a corporation have acted in accordance with their responsibility and authority to advance the interests of the corporation they serve -- and where plaintiffs have failed to proffer specific facts to the contrary -- no conspiracy within the meaning of the Sherman Act can be found.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN7[] **Regulated Practices, Price Fixing & Restraints of Trade**

Under ***antitrust law***, a manufacturer of course generally has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] **Practices Governed by Per Se Rule, Boycotts**

Boycotts and price-fixing schemes, when proven, are often considered unreasonable restraints of trade per se. Nonetheless, the United States Court of Appeals for the District of Columbia Circuit warns that a per se rule is a judicial shortcut; it represents the considered judgment of courts, after considerable experience with a particular type of restraint, that the rule of reason -- with normal mode of analysis -- can be dispensed with. There are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. A court will not indulge in this conclusive presumption lightly. Invocation of a per se rule always risks sweeping reasonable, pro-competitive activity within a general condemnation, and a court will run this risk only when it can say, on the strength of unambiguous experience, that the challenged action is a naked restraint of trade with no purpose except stifling of competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN9[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Under the rule of reason in ***antitrust law***, a restraint must be evaluated to determine whether it is significantly anticompetitive in purpose or effect. In making this evaluation, a court generally will be required to analyze the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed. If, on analysis, the restraint is found to have legitimate business purposes whose realization serves to promote competition, the "anticompetitive evils" of the challenged practice must be carefully balanced against its "procompetitive virtues" to ascertain whether the former outweigh the latter. A restraint is unreasonable if it has the "net effect" of substantially impeding competition.

Business & Corporate Law > Agency Relationships > Authority to Act

Business & Corporate Law > Agency Relationships > General Overview

HN10[] **Agency Relationships, Authority to Act**

Classic agency law gives a principal the prerogative of withdrawing the permission of an agent to use the principal's infrastructure to compete with the principal itself if convenient to protect the principal's interests.

Opinion

REVISED MEMORANDUM

This is a private antitrust action brought pursuant to *Section 1* of the Sherman Act, *15 U.S.C. § 1 (1982)*, against Atlas Van Lines, Inc. ("Atlas"), a nationwide van line company. [1] Plaintiffs are ten present and former agents of Atlas. They challenge an Atlas policy -- made effective in August, 1983 -- under which Atlas announced that it would terminate its agency relationship with any agent that maintained independent operations in the interstate moving business unless the agent transferred its independent authority to do so to a separate and distinct (albeit affiliated) company. The case is presently before the Court both on defendant's motion for summary judgment and on plaintiffs' motion for partial summary judgment as to liability. **[*2]** After careful consideration of undisputed facts developed after extensive discovery and set out pursuant to *Fed. R. Civ. P. 56* and Local Rule 1-9)h), as well as the arguments advanced by the parties in the memoranda and at oral argument, the Court concludes that, for the

[1] In their complaint, filed February 17, 1983, plaintiffs also named the Interstate Commerce Commission ("ICC") as a party-defendant. Plaintiffs requested -- as a predicate to certain further relief against the ICC -- that the Court compel the ICC to reach a decision on a related matter pending before the agency. In light of intervening developments and upon motion by the ICC, the Court on May 26, 1983 dismissed the action against the ICC as moot. See Order of May 26, 1983. The ICC is thus no longer a defendant in this suit.

reasons set forth below, plaintiffs' motion for partial summary judgment as to liability must be denied, and defendant's motion for summary judgment must be granted.

I.

This lawsuit involves, in essence, the legality of Atlas's response to the regulatory and commercial changes resulting from the deregulation of the household goods moving industry in 1980. A brief overview of Atlas's **[*3]** methods of operation and of the recent changes in the industry is necessary to an understanding of the nature of the claims at issue.

Defendant Atlas Van Lines holds authority from the Interstate Commerce Commission ("ICC") to transport goods from state to state on a nationwide basis. Statement of Material Undisputed Facts in Support of Plaintiffs' Motion for Partial Summary Judgment As To Liability PII-A (hereinafter "PSF" ["Plaintiffs' Statement of Facts"]); Defendant's Response to Plaintiffs' Statement of Material Undisputed Facts PII-A (hereinafter "DRPF" ["Defendant's Response to Plaintiffs' Facts"]); Defendant's Statement of Material Facts As To Which There Is No Genuine Issue P1 (hereinafter "DSF" ["Defendant's Statement of Facts"]); Plaintiffs' Statement of Genuine Issues P1 (hereinafter "PSGI"). [2] As has been typical of the operation of other national van lines, Atlas exercises this authority primarily through a group of "agent" moving companies around the country. These "agent" companies are independent entities that have entered into standardized "Agency Agreement" with Atlas to carry out interstate shipments under Atlas's authority, PSF PPII-C, V-P, **[*4]** DRSF PPII-C, V-P, Plaintiffs' Appendix I (hereinafter "Plaintiffs' App."), and that agree -- in making Atlas shipments -- to abide by the operating procedures, painting and maintenance standards, and uniform rates, inter alia, provided for by the Agency Agreement. See PSF PPV-O - V-X; DRPF PPV-O - V-X; DSF PP2-13; PSGI P2-13. In addition, representatives of some of Atlas's agent companies sit on the Atlas board of directors, PSF PII-K, V-A; DRPF PPII-K, V-A -- a practice that has been typical in the industry during many years of ICC oversight, see S. Rep. No. 497, 96th Cong., 1st Sess. 8 (1979); H. Rep. No. 1372, 96th Cong., 1st Sess. 10 (1979), and that won express legislative immunity from the federal antitrust laws -- as described below -- with the enactment of *49 U.S.C. § 10934(d)* in 1980. [3] Nonetheless, the agent companies in the field remain

---

[2] Plaintiffs' "Statement of Genuine Issues" purports to dispute a number of material facts asserted by defendant. Close comparison of plaintiffs' assertions discloses that while many of them challenge the implications or characterizations of defendant's statements, they do not effectively traverse them so as to put material facts into genuine dispute. For example, plaintiffs state that they cannot "accept[] as undisputed" the statement by defendant that "Atlas headquarters directs and coordinates [certain] agent activities." PSGI P4, at 10-11. Plaintiffs, thus, object that Atlas does not ""direct" the performance of origin or destination services, in any direct supervisory sense." Id. (emphasis added). As suggested by the qualification at the end of the quotation, though, plaintiffs fail to dispute that Atlas does indeed have the authority to set the general terms according to which Atlas agents perform these functions for Atlas. And indeed, plaintiffs concede that "Atlas does coordinate the movement of trucks, to a substantial degree." Id. at 11. Throughout this memorandum, in citing to corresponding portions of plaintiffs and defendant's factual pleadings, the Court relies on the assertions therein to the extent that they reveal areas of agreement as described above, while disregarding any specific facts as to which the parties have succeeded in raising a genuine issue.

[3] The validity of the Atlas policy at issue in this case involves condiration of two separate statutory immunity provisions: *49 U.S.C. §§ 11341-11342 (1982)*, and *49 U.S.C. § 10934(d) (1982)*. The first of these provisions, *49 U.S.C. §§ 11341-11342*, has relevance to the van line practice, described infra at pages 5-9, of allowing some agents (referred to as "carrier-agents") to possess and exercise their own independent interstate ICC authority in addition to acting as agents for the van line. Coordination between a van line and its carrier-agents has, under 49 U.S.C. § 11341-11342, long been immune from the federal antitrust laws provided that the van line and its carrier-agents enter into a "pooling agreement" meeting ICC approval. See infra at page 7. There is no dispute in this case as to the immunity provided by this provision.

The second provision, *49 U.S.C. § 10934(d)*, was enacted in 1980 as part of Congress's deregulation of the household goods moving industry, see Pub. L. 96-454, § 5(a)(1), 94 Stat. 2013 (1980), and it is this provision that addresses, inter alia, the membership on a van line's board of directors of the van line's own agents. Plaintiffs' do not dispute that, under the statute, the fact of such membership is immune from antitrust challenge. See Plaintiffs' Memorandum in Opposition to Defendant's Motion for Summary Judgment at 18. Yet the further scope of this immunity provision is disputed, and is discussed in detail infra at pages 19-23, 27. The provision reads, in its entirety:

wholly independent from Atlas itself and interact with Atlas in accordance with standard contractual arrangements. PSF PV-P, DRPF PV-P.

[*5] It has also been common in the industry, in addition, for many agent companies to hold their own, separate interstate authority from the ICC. E.g., PSF PPI-E, I-G; DRPF PPI-E, I-G; see Practices of Motor Common Carriers of Household Goods (Agency Relationships), 115 M.C.C. 628, 629 (1972) (hereinafter referred to as "Practices"). Agent companies that hold such independent authority in their own right are termed "carrier-agents"; agents that hold no such independent authority are termed "non-carrier" agents. Practices, supra, at 629. While a non-carrier agent accepts shipments solely as an agent for the principal van line that it serves, a carrier-agent has more flexibility. It may, like a non-carrier agent, accept shipments for carriage on the account of its principal carrier. But a carrier-agent may also accept certain shipments for carriage on its own account -- rather than that of the principal carrier for which it serves as an agent -- when the distance of the shipment does not exceed the geographic range of its independent authority and when other factors render it profitable for the carrier-agent to do so. E.g. PSF PPV-H - V-J; DRPF PPV-H - V-J; see Practices, **[*6]** supra, at 629. A carrier-agent, in this fashion, simultaneously functions both as an agent of the principal van line that it serves, and, on certain shipments, as one of the van line's competitors, in that it may shift to its independent account certain shipments that might otherwise have been carried on the van line's account. E.g. PSF PPV-G, V-I; DSF P22; PSGI P22; see Practices, supra, at 629. Some carrier-agents, moreover, enjoy the distinct benefit of using van line personnel, van line uniforms and equipment (with van line insignia), and van line origin and destination services even on shipments carried out on their own, independent authority, e.g., DSF PP24-29; PSGI PP24-29; see Plaintiffs' App. G, and thus can avoid the costs of building the business infrastructure necessary to exercising their independent carrier authority effectively. See DSF P27; PSGI P27. Atlas carrier-agents, for example, enjoyed this latter benefit prior to the events at issue in this lawsuit.DSF PP24-29; PSGI PP24-29.

Federal law has long given special immunity from the anti-trust laws to carrier-agent relationships, but only if 1) the van line and its carrier-agents enter into a "pooling **[*7]** agreement" that spells out the division of business, sharing of facilities, and other terms according to which the van line will allow its "agents" to compete with it, and 2) the pooling agreement meets ICC approval. See *49 U.S.C. §§ 11341-11342 (1982)*; Practices, supra, at 633. Significantly, a pooling agreement may be terminable unilaterally by either the national van line or its carrier-agents, and the exercise of this option eliminates the automatic antitrust immunity that a carrier-agent relationship otherwise enjoys. See DSF P24; PSGI P24. Atlas entered into a pooling agreement in 1957, which set the terms according to which, thereafter, it allowed its agents to acquire and operate their own independent ICC authority.DSF P24; PSGI P24. Other van lines, by contrast, have declined to enter into pooling agreements at all, and indeed have traditionally chosen to employ only non-carrier agents. E.g., PSF § III-I; DRSF PIII-I. Representatives of carrier-agents -- where the van line uses them -- may sit on a van line's board of directors just as do representatives of non-carrier agents, both pursuant to prior practice, e.g., PSF PV-A; DRPF PV-A, and under the more recently **[*8]** enacted federal antitrust exemption contained in *49 U.S.C. § 10934(d) (1982)*. [4]

Finally, it is a central feature of the van line industry that agents within a van line's infrastructure often must agree to provide their services only to that particular van line and to other agent companies within the van line's network.

The antitrust laws, as defined in the first section of the Clayton Act (*15 U.S.C. 12*), do not apply to discussions or agreements between a motor common carrier providing transportation of household goods subject to the jurisdiction of the [Interstate Commerce] Commission under subchapter II of chapter 105 of this title and its agents (whether or not an agent is also a carrier) related solely to (1) rates for the transportation of household goods under the authority of the principal carrier, (2) accessorial, terminal, storage, or other charges for services incidental to the transportation of household goods transported under the authority of the principal carrier, (3) allowances relating to transportation of household goods under the authority of the principal carrier, and (4) ownership of a motor common carrier providing transportation of household goods subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title by an agent or membership on board of directors of any such motor common carrier by an agent.

49 U.S.C. § 10934(d) (1982).

[4] See supra note 3.

See, e.g., PSF PV-Q; DRPF PV-Q; Plaintiffs' App. G. As in many other industries, "exclusive dealing" is a common method of operation. See Plaintiffs' App. G, at 1-3. For van lines that have exclusive dealing arrangements and that utilize only non-carrier agents, thus, only shipments on the van line's own account are carried within the van line's infrastructure. For van lines that have exclusive dealing arrangements and that use carrier-agents as well as non-carrier agents, however, non-van line shipments originating from the carrier-agents' independent operations may be carried within the van line's infrastructure as well. The establishment of such arrangements for the benefit of a van line's carrier-agents is a matter of voluntary accommodation on the part of the van line -- though once established, it may be governed by the van **[*9]** line's ICC-certified pooling agreement. See, e.g., DSF P24; PSGI P24; see Practices, supra, at 633. Nonetheless, almost no van line, apparently, allows the agents within its network regularly to handle the traffic of any company that is not also one of the van lines' agents. E.g., DSF P22; PSGI P22; see Plaintiffs' App. G. [5]

Prior to the deregulation of the moving industry beginning around 1979, the extent to which agents could and did make use of independent ICC authority -- if their van lines allowed them to do so at all -- was limited. DSF P23; PSGI P23. First, then-existing **[*10]** ICC regulations made it very difficult for non-carrier agents to obtain, or for existing carrier-agents to augment, their own interstate authority. DSF P35; PSGI P35. Second, even for agents that did possess such authority, it was usually -- due to ICC regulations -- of limited geographic scope. DSF P35; PSGI P35. Most important, the ICC required that carrier-agents use the same rates for their "independent carrier" shipments as for their "agency" shipments -- that is, price competition between van lines and the independent operations of their carrier-agents was expressly barred. DSF P36; PSGI P36.

The advent of deregulation in the moving industry represented a dramatic change in these business circumstances. With deregulation, agents could obtain independent interstate authority or expand existing interstate authority quite easily. DSF P35; PSGI P35. By the same token, independent carriers and local moving companies wishing to offer interstate service could readily obtain their own interstate authority rather than associating with a national van line in order to do so. Also, the ICC no longer imposed narrow geographic limits on the scope of such new authority. **[*11]** Agents, as well as independent carriers, could obtain authority allowing them to carry goods on their own account not only locally, but regionally or even nationally as well. See DSF P35; PSGI P35. Moreover, and perhaps most significantly, the ICC abandoned the rule that carrier-agents were required to charge identical rates on their agency and non-agency shipments. DSF P36; PSGI P36.

Thus, as a result of deregulation, Atlas faced the prospect of potential Atlas shipments being shifted to independent carrier-agent accounts 1) by many more agents than before, 2) on long distance hauls as well as local hauls, and 3) with greater frequency due to newly authorized price competition from its carrier-agents in their independent capacities. See PSF PPVI-V - VI-X; DRPF PPVI-V - VI-X. Atlas carrier-agents, nevertheless, continued to reap a substantial benefit from the use of the Atlas infrastructure -- including Atlas-leased trucks, Atlas-trained personnel, Atlas uniforms, and the extremely valuable Atlas origin and destination network -- on their own, independent, non-Atlas hauls. See DSF PP24-29; PSGI PP24-29. After deregulation, moreover, this practice threatened to **[*12]** saddle Atlas with significant liability problems: as part of the deregulation of the industry, Congress made national van lines expressly liable for actions committed by an agent when the agent is operating "within the actual or apparent authority" of its principal van line. *49 U.S.C. § 10934(a) (1982)*. Thus, to the extent that the independent shipments of Atlas's carrier-agents were often carried out with many of the trappings of an official Atlas shipment, the new liability provision placed Atlas at an enhanced, statutory risk of being held legally responsible for those non-Atlas shipments. See DSF PP31-34; PSGI PP31-34.

---

[5] Agent operations for handling government or military traffic or exercising freight forwarding authority as referred to at PSGI P22 constitute separate categories of business carried out under separate ICC authorities. See Atlas Van Line, Inc., et al. -- Pooling Application, ICC Docket No. MC-F-15004 at 1-5 (July 15, 1983) (Defendant's Evidentiary and Other Materials 17). While such shipments may also be carried within a van line's infrastructure, operations under these ancillary authorities are not affected by the Atlas policy being challenged in this suit and thus are not at issue.

Atlas initiated several policies in anticipation of and in response to the changes accompanying deregulation, though it aborted each of these initiatives in turn until it finally settled on the policy at issue on this suit. [6] On February 11, 1982, Atlas announced that it planned to exercise its right to cancel its pooling agreement, and that it would terminate its relationship with any agent company [7] that continued to operate an independent, interstate authority for its own account in addition to serving as an Atlas agent. PSF PPVI-K - VI-P; DRPF **[*13]** PPVI-K - VI-P. In effect, the policy meant that Atlas would thenceforth deal only with "non-carrier" agents. PSF PVI-N; DRPF PVI-N. Atlas indicated that its existing carrier-agents could retain their independent authority without being terminated as Atlas agents only if they transferred that authority to a separate corporation to be operated under a new and distinct name. PSF PPVI-N - VI-P; DRPF PPVI-N - VI-P; DSF PP52-53; PSGI PP52-53. Under the policy, the separate company could remain legally "affiliated" with the agency company -- that is, both companies could remain under common ownership. However, the separate company would be outside the Atlas network: it would generally not have access to Atlas origin and destination services provided by other Atlas agent companies around the country, PSF PVI-M; DRPF PVI-M, in that Atlas agent companies were contractually barred from providing such services for the shipments of non-Atlas companies to the extent that doing so would "infringe upon the exclusivity of representation which is a part of the agency agreement." PSF PVI-N; DRPF PVI-N.

[*14] Announcement of the new Atlas policy and its imminent implementation predictably triggered a challenge before the Interstate Commerce Commission. On August 16, 1982, in response to this challenge, the ICC inter alia affirmed Atlas's right to withdraw from its pooling agreement, holding that "nothing in [the] existing modified pooling agreement precludes withdrawal by any party from the agreement." Atlas Van Lines, Inc. - Pooling, ICC Docket No. MC-F-14784, Finance Docket No. 29972 at 3 (August 16, 1982) (Appendix A to Second Amended Complaint). On February 17, 1983, moreover, the ICC announced that the new arrangement proposed by Atlas did not require a new pooling agreement: [8] the ICC held that because the independent authority to be retained by the agents would be transferred to an entirely separate competitive entity outside of the Atlas network, no "pooling" between competitive carriers would be taking place and thus no pooling agreement was necessary. Atlas Van Lines, Inc. - Pooling, ICC Docket No. MC-F-14784, Finance Docket No. 29972 at 8-11 (February 17, 1983) (Appendix B to Answer to Second Amended Complaint. [9]

---

[6] See infra note 22. The successive initiates were:

a) January 27, 1979. Atlas began to require that carrier-agents pay to Atlas one percent of their revenues from the use of their independent authorities, in compensation for the benefits they received from Atlas in aid of their independent operations. This requirement remained in effect until the last quarter of 1979. PSF PPVI-A - VI-B; DRPF PPVI-A - VI-B.

b) January 27, 1979. Atlas announced a policy -- effective immediately -- prohibiting an agent from acquiring any new interstate authority or applying to add to his present interstate authority. Atlas states that despite its threats, it never enforced this policy, and publicly abandoned the policy by November, 1980.PSF PPVI-A, VI-C - VI-D; DRPF PPVI-A, VI-C - VI-D; DSF P45; PSGI P45.

c) November 1, 1980. Atlas approved a tentative plan to purchase the independent authorities of its carrier-agents. The plan was soon abandoned without implementation. PSF PPVI-F - VI-G, DRPF PPVI-F - VI-G.

d) March 20, 1981. Atlas announced a plan that allowed agents freely to hold, increase, and use independent authority (without necessarily setting up a separate carrier company), but that banned any use of Atlas agents for origin and destination services in connection with shipments under such independent authority. The plan was implemented on May 1, 1981. After ICC objection that the plan require a new pooling agreement, the plan was abandoned on May 21, 1981. PSF PPVI-H - VI-J; DRPF PPVI-H - VI-J.

[7] Atlas's Agency Agreements state that they are terminable by either party upon thirty days notice "without cause." PSF PV-Q; DRPF V-Q; Plaintiffs' App. I.

[8] Compare supra note 6, paragraph (d), where the ICC required a new pooling agreement.

[9] Plaintiffs sought to have this determination reviewed in the Court of Appeals for this Circuit, but the appeal was dismissed by agreement without the Court of Appeals having ever reached the merits.See Rothery Storage & Van Co. v. Interstate Commerce Commission, Agreement That Proceedings Be Dismissed (D.C. Cir. Nos. 83-1210, 83-1361) (filed February 6, 1984).

[*15] Soon after Atlas announced its new policy, it contacted all of its agents by mail and asked them to respond by signing a form indicating whether or not they would comply with the new requirements for Atlas agency. PSF PPVI-S, VI-U; DRPF PPVI-S, VI-U.Most if not all of Atlas's agent eventually did respond, and the policy went into effect on August 18, 1983. At the time the policy was announced, Atlas had approximately 490 agents, 91 of whom were carrier-agents. Following implementation of the new policy, 48 of the carrier-agents shifted their independent authority to separate corporations, 20 gave up their authority entirely but remained as Atlas agents, 12 were terminated by Atlas for failure to comply with the policy, and 11 chose to leave Atlas either to operate their own or to become carrier-agents for one of the other national carriers. DSF P82; PSGI P82. In February, 1984, Atlas imposed on its reconstituted agents an enhanced system of fines to enforce its prohibition against shipment of non-Atlas hauls on Atlas-leased trucks, given that under the new arrangement, as noted, the use of Atlas's service and equipment infrastructure was intended to become restricted **[*16]** to Atlas shipments alone. See PSF PVI-AA; DRPF PVI-AA; Plaintiff's Motion to Further Supplement Summary Judgement Pleadings, Attachment A (February 24, 1984).

Plaintiffs argue that the institution of the new Atlas policy represents a "boycott" of those Atlas agent companies that failed to comply, and that the Atlas policy constitutes price-fixing because it is aimed at preventing price-cutting by carrier agents in their independent capacities. As such, plaintiffs argue that Atlas's policy should be treated as a per se violation of the antitrust laws, and that even if the policy does not merit per se treatment, it nevertheless should be condemned under the rule of reason. Defendant responds by arguing that undisputed facts establish that 1) the institution of the policy is statutorily immune from the antitrust laws under *49 U.S.C. 10934(d)*, 2) per se treatment, as urged by the plaintiffs, is inappropriate, and 3) no violation under the rule of reason can be shown.

II.

It is necessary at the outset to determine whether undisputed material facts make it possible to resolve this matter on the pending cross-motions for summary judgment. ***HN1***[] Under *Fed. R. Civ. P. 56(c)*, a motion for **[*17]** summary judgment may be granted only when "there is no genuine issue as to any material fact and . . . the moving party is entitled to a judgment as a matter of law." It is well established that the undisputed facts and "inferences to be drawn" from those facts "must be viewed in the light most favorable to the party opposing the motion." *United States v. Diebold, Inc., 369 U.S. 654, 655 (1962)* (per curiam). To support summary judgment, the record "must demonstrate that [the] opponent "would not be entitled to [prevail] under any circumstances."" *National Ass'n of Governmental Employees v. Campbell, 593 F.2d 1023, 1027 (D.C. Cir. 1978)* (quoting *Semaan v. Mumford, 335 F.2d 704, 705 n.2 (D.C. Cir. 1964)*.

HN2[] Courts have been cautioned to be especially careful about premature termination of a cause of action filed under the federal antitrust laws. *Poller v. C.B.S., Inc., 368 U.S. 464, 473 (1962)*. Nonetheless, summary judgment may well be appropriate even in an antitrust action where a court has permitted extensive discovery and the requirements of *Fed. R. Civ. P. 56(c)* have been met. See *First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 289-90 (1968)*. **[*18]** In this case, both parties have moved for summary judgment, and their respective statements of undisputed material fact demonstrate that plaintiffs and defendant are in substantial agreement on the essential facts making up the core of this case. [10] On the basis of these facts, the Court concludes that the motions for summary judgment are ripe for dispostion.

III.

HN3[] In order to prevail on a claim under *Section 1* of the Sherman Act, a plaintiff must show both 1) the existence of a "contract, combination . . . or conspiracy," and 2) an unreasonable restraint of trade under either the per se rule or the rule of reason, as appropriate. Title *15 U.S.C. § 1 (1982)*; see ABA ***Antitrust Law*** Developments at 2 (2d ed. 1984). The undisputed facts demonstrate that plaintiffs in this action cannot meet either of these criteria.

A. Conspiracy

---

[10] See supra note 2.

Plaintiffs argue that a conspiracy to effectuate the Atlas policy in question existed 1) among the members of the Atlas board of directors, who voted to institute the policy, and 2) between Atlas and its agents in the field, who responded to Atlas's request for an indication of whether the agents would comply **[*19]** with Atlas's demands.

As to the alleged conspiracy among the members of the Atlas board of directors, it is firmly established that ***HN4***[] the actions of a corporation's board of directors do not constitute a conspiracy within the meaning of Sherman Act *§ 1*. See *Copperweld Corp. v. Independence Tube Corp., 104 S. Ct. 2731, 2741 & n.15 (1984)*; *Harvey v. Fearless Farris Wholesale, 589 F.2d 451, 455 n.7 (9th Cir. 1979)*. A corporation, which can only function pursuant to the group decisions of the members of its board of directors, cannot in this fashion be found to have conspired with itself. See *Nelson Radio & Supply, Co. v. Motorola, Inc., 200 F.2d 911, 914 (5th Cir. 1952)*, cert. denied, *345 U.S. 925 (1953)*.An exception to this rule may exist, however, where individual members of the board of directors possess an independent personal stake in a particular action of the board, that is, where the act "on their own behalf." *Copperweld, supra*, at n.15; accord *Smith v. Northern Michgan Hospitals, Inc., 703 F.2d 942, 950 (6th Cir. 1983)*. Plaintiffs attempt to invoke this exception on the ground that Atlas's board of directors included the executives of some of Atlas's own agents and **[*20]** carrier-agents, which are separate corporate entities, independent from Atlas and from each other; plaintiffs argue that the new Atlas policies would necessarily affect both the Atlas and non-Atlas business potential of these separate companies in some fashion and thus give the agent companies on the board an independent stake in whether the policy was adopted.

In an effort to illustrate and substantiate this claim, plaintiffs allege more specifically that one non-carrier agent represented on the board received a 2% royalty from Atlas for every shipment carried on Atlas's account within a certain geographic area, and thus stood to benefit individually from the adoption of the new policy because the new policy would predictably cause tonnage previously carried on the independent accounts of Atlas's carrier-agents to be shifted to Atlas's own account. Plaintiff's Memorandum in Opposition to Defendant's Motion for Summary Judgment, at 10-12. Plaintiffs also observe that at least one carrier-agent represented on the board subsequently sought to benefit from the policy by competing more vigorously for the business of an agent that was experiencing difficulty complying with **[*21]** the new Atlas policy. Id. at 8-10. Thus, plaintiffs argue that in voting for the Atlas policy at issue, the executives of Atlas's agents and carrier-agents who served on Atlas's board had a sufficiently independent stake to render their participation in the decision a conspiracy within the meaning of the Sherman Act.

There exist two, independently sufficient grounds for rejecting plaintiff's claim. The first is that even if the allegedly conflicting interests of some directors sufficed to trigger the "personal stake" exception, Congress has provided a special exemption from the antitrust laws that would preclude liability on account of the alleged treatment in question. ***HN5***[] Title *49 U.S.C. § 10934* provides, in pertinent part, that

d) The antitrust laws . . . do not apply to discussions or agreements between a motor common carrier . . . and its agents (whether or not an agent is also a carrier) related solely to . . . (4) ownership of a motor common carrier . . . by an agent or membership on the board of directors of any such motor common carrier by an agent.

(emphasis added). Defendant acknowledges that the agent companies represented on the board are separate entities from **[*22]** each other and from Atlas. Thus, the non-carrier and carrier-agents alike presumably possess at least some degree of interest in the success of their own companies, which on occasion may diverge from those of Atlas in general and other Atlas agents and carrier-agents individually. However, 49 U.S.C. 109349d) does not retain any "personal stake" exception. Rather it expressly allows agents and carrier-agents of a van line to serve on the van line's board of directors, participate in its deliberations and decisions, and exercise responsibility for the affairs of the principle free of the risk of antitrust liability for doing so, despite their obvious status as independent entities with at least these basic independent interests. See infra note 11. The state, moreover, specifically immunizes "discussions and agreements" regarding the "ownership of motor common carriers" by a van line's agents. The legislative history of this provision clarifies that it was intended to "immunize carriers and their agents from the antitrust laws with respect to certain dealings between them." S. Rep. No. 497, 96th Cong., 1st Sess. 8 (1979). [11] Congress's aim, in particular, was to **[*23]** assure[] that discussions between a principal carrier and its

---

[11] The relevant Senate Report language reads in full:

agents related solely to [inter alia] . . . pooling or divisions between the principal carrier and its agents . . . and ownership of a principal carrier by an agent . . . are not discussions that would be in violation of the antitrust laws."

[*24] S. Rep. No. 497, 96th Cong., 1st Sess. 17 (1979). Discussion, voting, and agreement within the board on a policy announcing the terms that are to govern such ownership as well as the policy's implementation -- as, it is undisputed, occurred in this case -- seem to fall squarely within the language and intent of this statutory exemption.The exemption provision, it must be noted, was enacted into law as an explicit component of Congress's deregulation package.Thus, Congress may fairly be understood as anticipating discussions and agreements after deregulation which addressed adjustments of the pre-existing relationships to the new business environment. The material discussions and agreements at issue in this case related solely to whether "pooling" between Atlas and its agents would continue after deregulation, and, if not, to how the ownership of a pricipal carrier by an agent could be accomplished. Thus, the claim that the actions of the Atlas board of directs in this matter constitute a conspiracy within the meaning of the Sherman Act must be rejected. Congress appears to have expressly exempted the participation of agents and carrier-agents in the membership, deliberations, **[*25]** or agreements of a van-line's board of directors from the application of the antitrust laws where, as here, the subject matter of the discussions and agreements relates to the van line's policy with respect to the ownership of independent interstate authority by the van line's agents, including policies requiring change because of the business consequences of deregulation.

Plaintiffs argue that the statutory immunity works only in one direction: i.e., that *§ 10934(d)* immunizes decisions allowing agents to acquire independent authority and become carrier-agents, but that it does not immunize a decision abolishing an existing carrier-agent arrangement. Statement of Points and Authorities in Support of Plaintiffs' Motion for Partial Summary Judgment As To Liability at 12-14. The court is well aware that Congress sought to ensure that carrier-agent arrangements would not be prohibited as a result of deregulation. However, Congress did not command that they be preserved, nor prohibit their abandonment. Under plaintiffs' view of *§ 10934(d)*, national van lines that prior to deregulation had permitted their agents to operate as carrier-agents would essentially be locked **[*26]** into that arrangement, while those that had not allowed their agents to obtain independent authority from the ICC would presumably be free to continue that policy. Yet there is nothing in the legislative history to support such an arbitrary result; indeed, the legislative history appears, if anything, to reaffirm the right of a van line to enforce traditional agency standards of loyalty and fiduciary duty upon its agents, as discussed below, and thus plaintiffs' argument must be rejected. See infra at pages 34-35 & note 17.

There is also a provision in the act that immunizes carriers and their agents from the antitrust laws with respect to certain dealings between them. This section is needed in order to permit the continued relationships developed and approved over the years of certain van line companies. In some cases, van line companies are composed and owned by agents who themselves are carriers within limited geographical areas. In some cases, the agents, as carriers themselves, have independent authority to operate in areas in which the principal carrier also be operate. Accordingly, in the absence of immunity, there could be some problems concerning immunity from the antitrust laws. The bill merely permits existing relationships to continue. . . .

S. Rep. 497, 96th Cong., 1st Sess. 8 (1979) (emphasis supplied).

Analagous language in the House Report on this legislation reads:

New *section 10934* also contains a provision which immunizes from the antitrust laws certain discussions exercise [sic] agreements between carriers and their agents related to rates, charges, and allowances for transportation provided under the authority of the carriers. Further, such discussions and agreements related to the ownership of a carrier by an agent or membership on the carrier's board of directors by an agent are immune. The purpose of this provision is to allow the continuation of certain relationships between carriers and agents which have been established over the years. In some cases, the carriers are composed and owned by agents who themselves are carriers within limited geographical areas. In other cases, the agents, as carriers themselves, have independent authority to operate in areas in which the principal carrier operates. These relationships could be jeopardized in the absence of antitrust immunity. It is important to note that these exemptions are narrow ones. Specifically, the immunity provided by subsections (d) (1)-(3) applies only to discussions or agreements related to rates, charges, and allowances offered on traffic carried under the authority of the principal carrier. Similarly, subsection (d)(4) provides only a limited exemption. It does not exempt from the antitrust laws such things as anticompetitive mergers.

H. Rep. 1372, 96th Congress, 1st Sess. at 10 (1979) (emphasis added).

Alternatively, plaintiffs' effort to establish that the actions of the Atlas board of directors constituted a conspiracy within the meaning and scope of the Sherman Act must also fail in that -- even apart from the availability of statutory immunity -- plaintiffs do not proffer evidence or demonstrate a reasonable prospect that they could proffer or prove specific facts sufficient to invoke the "personal stake" exception.

HN6[] The antitrust laws look to substance, not to form. As noted, it may be inferred that each agent on the Atlas board of directors may well possess some independent interest in its own success apart from that of Atlas or its fellow **[*27]** agents, and that the benefits and detriments of the new policy may well accrue to each of them in a possibly distinct way. Yet other courts have observed that as long as employees or officers of a corporation have acted in accordance with their responsibility and authority to advance the interests of the corporation they serve -- and where plaintiffs have failed to proffer specific facts to the contrary -- no conspiracy within the meaning of the Sherman Act can be found. See *Green v. Associated Milk Producers, Inc., 692 F.2d 1153, 1156-57 (8th Cir. 1982)*; *Nelson Radio & Supply Co. v. Motorola, supra, at 914*. In the leading case supporting the existence of a "personal stake" exception, the personal interest in question was divergent from and possibly inconsistent with the corporate officer's responsibilities toward the corporation that the officer served. See *Greenville Publishing Co. v. Daily Reflector, Inc., 496 F.2d 391, 399-400 (4th Cir. 1974)* (cited in *Copperweld, supra, at 2741 n.15*). In Greenville, the plaintiff alleged the existence of a conspiracy between a newspaper and the newpaper's own president to eliminate the plaintiff from the local newspaper advertising **[*28]** market. The Court held that a sufficient "personal stake" was alleged in that the president held a direct financial interest in yet another local newspaper that would benefit from the increased advertising that it too would gain as a result of the plaintiff's elimination. A newspaper president's interest in a completely unrelated paper is, on its face, wholly divergent from and possibly inconsistent with the president's presumed responsibilities toward the newspaper of which he is president. In the instant case, by contrast, the separate agent companies are part and parcel of Atlas's own network. Atlas's success is to a large extent dependent upon -- rather than divergent from or inconsistent with -- the success of its agent companies, either individually or as a group. And after voluminous discovery, plaintiffs have failed to proffer any facts showing that the agent and carrier-agent votes on the Atlas policy were grounded in interests that were inconsistent with or divergent from the overall best interests of Atlas itself. [12] The "personal benefits" alleged -- increased royalties due to increased Atlas traffic, and increased bases for competition with other Atlas **[*29]** agents -- are wholly consistent with the unitary interests of Atlas and its agents to build a strong Atlas system. A stockholder/director of a company, for example, does not hold an impermissible personal benefit or act "on his own behalf" simply because his effort to advance the interests of the corporation would increase the value of his stock interest and the dividends paid to him. Here, similarly, careful evaluation of the facts proffered by plaintiff shows only that any advantage to

---

[12] The instance on such a showing is further supported by principles recently set forth by the Supreme Court's decisions in *Monsanto Co. v. Spray-Rite Service Corp., 104 S. Ct. 1464 (1984)*, and *Copperweld, supra.* In Monsanto, the Court indicated that a finding of conspiracy could not be sustained on the basis of evidence merely "consistent" with illegal coordination between a manufacturer and its independent distributors. Rather, a plaintiff must proffer specific evidence "inconsistent" with the defense of unilaterality. *Monsanto, supra, at 1473*. An analagous distinction provided the basis of the decision in Copperweld, where the Court rejected the proposition that a corporation can conspire with its separately incorporated but wholly owned subsidiary. *Copperweld, supra, at 2742-45*. The court observed that "Coordination within a firm is as likely to result from an effort to compete as from an effort to stifle competition," *id. at 2741*, or, in other words, that the challenged behavior was, by itself, just as "consistent" with the "effort to compete," legitimately, as it was with the "effort to stifle competition." The Court thus seems to suggest that in such circumstances, the antitrust laws can only be triggered by proffering evidence of behavior "inconsistent" with otherwise legitimate purposes.

In the instant case, thus, the mere showing of a "personal benefit" traceable to an agent on the Atlas board of directors should not suffice to trigger the "independent stake" exception -- assuming one exists -- unless plaintiffs also proffer evidence showing that the personal benefit in question was inconsistent with or divergent from Atlas's own competitive interests. There is a longstanding presumption that the members of a corporation's board of directors are incapable of conspiring with themselves under the Sherman Act in that there is no other way that a corporation can advance its competitive interests, see *Nelson Radio, supra*, and, thus, the Court is reluctant to find that the plaintiffs have demonstrated the existence of "the plurality of actors imperative for a *§ 1* conspiracy," *Copperweld, supra, at 2741*, without a proffer of evidence suggesting that the personal benefits derived from the board's actions were inconsistent with or divergent from the interests of Atlas itself.

the stockholder/director/agent was merely incidental to the advantage to the corporation, rather that inconsistent with or divergent from Atlas interests or with the Atlas agent/directors' responsibilities toward Atlas. See also *Card v. National Life Insurance, 603 F.2d 828, 834 (10th Cir. 1979)*. After considerable discovery, plaintiffs have not shown any reasonable possibility of proving otherwise. Plaintiffs, therefore, have failed to demonstrate any likelihood of proving the existence of a conspiracy within the Atlas board of directors or between the board and Atlas itself, for this reason as well as for the statutory immunity ground noted previously.

[*30] As to the alleged conspiracy between Atlas and its agents in the field, plaintiffs rely heavily on the fact that, soon after announcing its new policy, Atlas requested that its agents respond by indicating whether they would comply with the policy's terms. Plaintiffs contend that this communication represents negotiation or agreement, and as such satisfies the "conspiracy" requirement of their Sherman Act *§ 1* claim.

Again, there are two reasons for rejecting plaintiffs' claim. First, even if Atlas's communication with its agents did constitute an "agreement," such activity appears also to be immunized from the antitrust laws under *49 U.S.C. § 10934(d)*. As noted, that provision expressly immunizes "discussions and agreements" between a van line and its agents relating to "ownership of a carrier by an agent." Atlas's effort to determine the intentions of its agents in response to the announcement of its change in policy regarding the ownership of independent carrier authority by its agents falls squarely within the language and intent of the statutory exemption. See supra pages 19-23.

Alternatively, even apart from the availability of such statutory immunity, plaintiffs **[*31]** have not proffered facts sufficient to establish a vertical conspiracy. Plaintiffs have not demonstrated, nor does it appear that they can demonstrate, that Atlas's actions amounted to anything other than the unilateral announcement of a policy change and its subsequent implementation. The Supreme Court, in its last term, reaffirmed that ***HN7***[] "[a] manufacturer of course generally has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently." *Monsanto Co. v. Spray-Rite Service Corp., 104 S.Ct. 1464, 1469 (1984)*. The same principle applies in a case such as this one. [13] As the analysis in Spray-Rite makes clear, plaintiffs here can only succeed in showing a conspiracy by offering specific, direct evidence inconsistent with the defense of unilaterality and indicating that Atlas and its agents had a "conscious commitment to a common scheme designed to achieve an unlawful objective." *Id. at 1473*. While plaintiffs demonstrate that Atlas kept in regular touch with its agents -- informing them of the substance of the policy and seeking to elicit responses -- such actions are wholly consistent with good management and planning. Cf. *id. at 1470*. **[*32]** Despite extensive discovery, on the other hand, plaintiffs offer no evidence inconsistent with the proposition that the policy announcement and implementation was a unilateral act on Atlas's behalf.

Plaintiffs, thus, have failed to demonstrate that the actions of the agents on Atlas's board of directors or in the field can in any way be deemed to constitute a conspiracy within the meaning or scope of *Section 1* of the Sherman Act.

B. Unreasonable Restraint of Trade.

Even if plaintiffs were able to satisfy the "conspiracy" requirement necessary to establish a Sherman Act *§ 1* violation, plaintiffs would still have to establish that Atlas's policy constituted an **[*33]** "unreasonable restraint of trade." Plaintiffs stress that the immunity granted by Congress with the enactment of *49 U.S.C. § 10934 (d)* was meant to be a "limited" one and was not intended to protect "such things as anticompetitive mergers," H. Rep. 1372, 96th Cong., 1st Sess. 10 (1979). Plaintiffs argue that the competitive restraint imposed by the Atlas policy must

---

[13] In *Spray-Rite, supra*, the Supreme Court confirmed the vitality of *United States v. Colgate & Co., 250 U.S. 300 (1919)*. As the Court explained:

Under Colgate, the manufacturer can announce its resale prices in advance and refuse to deal with those who fail to comply. And a distributor is free to acquiesce in the manufacturer's demand in order to avoid termination.

Spray-Rite, supra, at 1469. The Colgate/Spray-Rite doctrine applies to non-price terms of dealing -- such as those in this case -- as well.

therefore be evaluated in any event to determine whether it might fall outside of the immunity provision's intended scope.

Assuming, arguendo, that a conspiracy has been demonstrated and that no statutory immunity applies, the Court would next have to determine whether to apply "per se" treatment to the evaluation of the practice in question, as urged by plaintiffs, or whether to apply the "Rule of Reason," as urged by defendant.

1) Per se treatment.

Plaintiffs contend, as indicated above, that the institution of the new Atlas policy represents a "boycott" of those Atlas agents who refused to comply with the policy, and that it also represents a "price-fixing" scheme, in that it is allegedly aimed at preventing price-cutting by carrier-agents in their independent capacities. [14]

[*34] ***HN8***[]

Boycotts and price-fixing schemes, when proven, have often been accorded per se treatment. [15] Nonetheless, the Court of Appeals of this Circuit has warned that

A per se rule is a judicial shortcut; it represents the considered judgment of courts, after considerable experience with a particular type of restraint, that the rule of reason -- with normal mode of analysis -- can be dispensed with. As the Supreme Court explained in Northern Pacific Railway Co. v. United States, "there are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use." A court will not indulge in this conclusive presumption lightly. Invocation of a per se rule always risks sweeping reasonable, pro-competitive activity within a general condemnation, and a court will run this risk only when it can say, on the strength of unambiguous experience, that the challenged action is a "naked restraint[] of trade with no purpose except stifling of competition."

[*35] The Supreme Court emphasized the "demanding standards" of Northern Pacific Railway last term in Continental T.V., Inc. v. GTE Sylvania Inc. Reiterating that "[p]er se rules of illegality are appropriate only when they relate to conduct that is manifestly anticompetitive," the Court overruled Arnold, Schwinn & Co., which had held certain vertical restraints illegal per se. The Continental Court noted that the vertical restrictions in question possessed "redeeming virtues" in their stimulation of inter-brand competition; that the restrictions were "widely used in our free market economy"; and that there existed "substantial scholarly and judicial authority supporting their economic utility." For these reasons, the Court held that the restraints at issue were to be analyzed not under a per se rule, but under the rule of reason.

Smith v. Pro-Football, 593 F.2d 1173, 1181 (D.C. Cir. 1978) (footnotes omitted).

In Smith v. Pro-Football, the Court of Appeals refused to apply the per se rule in its evaluation of the NFL player draft. In this case, the Court similarly declines to apply the per se rule in evaluating Atlas's response to the changes accompanying deregulation **[*36]** of the household goods moving industry.Deregulation abruptly re-organized the rules at the foundation of the moving industry. Analysts are still examining the impact of these changes. See Plaintiffs' App. P, Q. No court has apparently yet closely analyzed the unique nature of the business relationship

---

[14] Plaintiffs theorize that the new policy tended to cause either of two outcomes: 1) agents abandoned or failed to seek independent authority under which they might have charged lower prices for moving services comparable to those that they were providing as Atlas agents, or 2) agents transferred their independent authority to separate corporations, and the additional cost of doing so dampened their ability to charge lower rates on the independent shipments.

[15] As noted, it is typical in the moving industry for the agents of a van line to enter into exclusive dealing agreements with the van line; i.e., they agree not to provide van line services to any company that is not also an agent of the van line that they serve. Plaintiffs argue that this practice should in this case be treated as an antitrust violation because it is an integral part of Atlas's alleged boycott and price maintenance schemes. Though exclusive dealing arrangements are traditionally treated under the Rule of Reason, plaintiffs contend that here they should be treated as part of Atlas's other per se violations.

between van lines and their carrier-agents, at least as the relationship affects the carrier-agents' exercise of their independent authority. [16] "Considerable" and "unambiguous" experience with the practice at issue is a necessary prerequisite for application of per se treatment, and the Court finds that -- given the unusual nature of the van line/carrier-agent relationship, and given the general confusion following deregulation -- such experience is simply absent in the present case. Moreover, the Atlas policy allows agents the option of retaining their independent authority in separate companies, or becoming carrier-agents of a different van line, and thus the Court is reluctant to term the policy as "pernicious." Also, it simply cannot be accepted that the new Atlas policy has "no purpose except the stifling of competition" or that is it without "any redeeming virtue." **[*37]** Plaintiffs cannot reasonably dispute that Atlas was fully within its rights when it terminated its pooling agreement, or that Atlas's new policy will enhance inter-carrier competition among the national van lines, as explained below. Finally, it is worth noting that the new Atlas policy represents nothing more than the adoption of a method of operation -- exclusive agency -- that is "widely used" not only in the van line industry, but throughout commerce. In sum, the Court finds that the "demanding standards" for application of per se treatment have simply not been met. Rather, "the courts have had too little experience with this type of restraint, and know too little of the "economic and business stuff" from which it issues, confidently to declare it illegal without undertaking the analysis enjoined by the rule of reason." *Id. at 1182* (footnote omitted).

[*38] 2) Rule of Reason.

Plaintiffs argue that the initiation of Atlas's new policy can be condemned even under the rule of reason. Guidance may once again be taken from the opinion of the Court of Appeals of this *Circuit in Smith v. Pro Football, supra*, where the Court of Appeals stated that:

HN9[] Under the rule of reason, a restraint must be evaluated to determine whether it is significantly anticompetitive in purpose or effect. In making this evaluation, a court generally will be required to analyze "the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed." If, on analysis, the restraint is found to have legitimate business purposes whose realization serves to promote competition, the "anticompetitive evils" of the challenged practice must be carefully balanced against its "procompetitive virtues" to ascertain whether the former outweigh the latter. A restraint is unreasonable if it has the "net effect" of substantially impeding competition.

Id. at 1183.

This memorandum has already described the "facts peculiar to" the van line and moving industry, and the recent legislative and regulatory changes leading to the new Atlas **[*39]** policy. Prior to deregulation, Atlas had given its carrier-agent companies permission to use the Atlas infrastructure to compete with Atlas itself, for their own accounts, within the boundaries set by federal regulations and ICC oversight. ***HN10***[] Classic agency law, however, gives a principal the prerogative of withdrawing such permission if convenient to protect the principal's interests. See *Restatement of Agency, Second §§ 1(1)*, *14N*, *393-394*. Nothing in the legislative history of Congress's deregulation of the household moving goods industry suggests that when Congress removed the regulatory restrictions on carrier-agent independent operations, it added a restriction barring van lines from exercising this prerogative. Indeed, the legislative history of the measure shows just the opposite: that Congress had no intention of disturbing the ability of a van line to reach agreements enforcing "the fiduciary duty of loyalty of an agent not to compete with its principal concerning the subject matter of the agency." S. Rep. 497, 96th Cong., 1st Sess. 8. [17] Congress may well have speculated that by widening the regulatory boundaries on carrier-agent

---

[16] Cf. *North American Van Lines, Inc., v. I.C.C., 666 F.2d 1087, 1094-96 (7th Cir. 1981)* (van line challenge against ICC regulations implemented after deregulation) ("There was no evidence before us regarding the customary arrangements . . . between national carriers and their agents."); *Clemmer v. North American Van Lines, Inc., 1969 Trade Cases P72,936, at 87609 (E.D. Pa. 1969)* (van line's allocation of exclusive territories between agents deemed not in violation of the antitrust laws) (policy in question did not affect carrier-agents' independent shipments).

[17] The Senate Report discussion of this matter reads in full:

independent operations, it would **[*40]** have triggered more independent operation of that sort. However, when it lifted those restrictions, it did so -- consistent with the free market philosophy supporting deregulation in general -- to create an option, not a mandate. [18] Congress, thus, left each individual van line free to fashion its own response to deregulation -- or, in Atlas's case, to the prospect of wide-scale price competition from its own agents using the van line's own infrastructure. Atlas's choice was to protect against the further diversion of its own business infrastructure in this fashion, and instead to strengthen its competitive position by returning to a traditional agency arrangement whereby its agent companies serve Atlas alone. As such, the new Atlas policy plainly had a legitimate business purpose, and is consistent with policies chosen by Congress with respect to the choice between regulation and competition in this industry.

[*41] In an effort to identify the "anticompetitive evil" of the challenged practice, plaintiffs stress that, upon the implementation of the new Atlas policy and the resultant withdrawal of access to Atlas services and equipment for use on independent shipments, several carrier-agents ceased their independent operations entirely. Others adapted by shifting their independent authorities to separate corporations or abandoning Atlas to become carrier-agents for some other major van line, and plaintiffs adduce facts showing that these latter groups of agents incurred significant expense in doing so.***HN11***[]

One of the basic tenets of the federal antitrust laws, however, is that they are intended to protect competition, not competitors. Copperweld, supra, at 2740 n.14. The Court must look not to whether individual agents incurred losses as a result of the new policy, but rather to the extent to which the Atlas policy somehow impeded the opportunity of Atlas agents to utilize their independent authority in the market for moving services. On this score, it is necessary to reiterate that the new Atlas policy does not absolutely bar an Atlas agent from exercising independent interstate **[*42]** authority.The agent company itself must serve Atlas alone, but agents may exercise independent authority if that authority is placed in an affiliated but commercially separate company. Because the separate company must develop its own service and equipment infrastructure, the true effect of the Atlas policy is, in essence, only to prevent agents who do exercise independent authority from appropriating to themselves any aspect of the Atlas network for the support services and overhead equipment necessary to operate that interstate authority beyond any great distance. The new arrangement essentially terminates a subsidy previously available to an Atlas carrier-agent at the expense of Atlas. At the same time, agents who wish to continue to operate as "carrier-agents" are not barred from seeking to join one of the other van lines that do subsidize carrier-agents in this way. Thus, the only enduring anticompetitive harm demonstrated by the plaintiff is the loss of the opportunity to continue to operate in a traditional carrier-agent relationship with Atlas itself.

During the Course of its deliberations, the Committee considered a proposal to include within the immunity section language that would grant immunity to agreements concerning exclusive agency representation, or the fiduciary duty of loyalty of an agent not to compete with the principal concerning the subject matter of the agency. The Committee determined that this type of relationship is not a violation of the antitrust laws and is standard agency law as expressed in section 393 of the Restatement of the Law of Agencies section. The Committee felt that inclusion of such language could imply that such relationships are a violation of the antitrust laws in the absence of immunity. Thus, the Committee determined not to include such language in the bill.

S. Rep. 497, 96th Cong., 1st Sess. 8 (1979). Neither party makes any issue of the portion of this passage explaining that "the Committee determined not to include" language in the bill that might have immunized exclusive agency or fiduciary duty agreements directly. Thus, it is not necessary to resolve any questions that might arise from the fact that such language was consciously excluded. However, the Court is inclined to agree with the observation of the Senate Committee that "this type of relationship is not a violation of the antitrust laws," id. Cf. Delta Data Systems Corp. v. Webster, No. 84-5356, slip op. at 8-9 (D.C.Cir. Sept. 21, 1984) (valid to consider GAO report as persuasive even if not binding).

[18] The House Report on the legislation states, under the heading "Section 2. Declaration of Policy," that:

Section 2 sets forth congressional policy with respect to the household goods moving industry. The emphasis in the policy statement is threefold -- the reduction of unnecessary regulation, the strengthening of consumer remedies and protections, and the establishment of maximum carrier flexibility in pricing their services and meeting the needs of their shippers.

H. Rep. 1372, 96th Cong., 1st Sess. 5 (1979) (emphasis added). See also S. Rep. 497, 96th Cong., 1st Sess. 8 (1979) ("The bill merely permits existing carrier-agent relationship to continue." (emphasis added)).

In reaching this conclusion, the Court has not overlooked the fact that Atlas has also required its carrier-agents **[*43]** to refrain from transferring their established names as Atlas agents to the corresponding non-Atlas affiliate companies created as a result of the carrier-agents' compliance with the Atlas policy. In any given case, this requirement bars the new, non-Atlas entity from access to the goodwill -- as it is represented in the carrier-agent's established name -- that has been built up as a result of the carrier-agent's Atlas relationship. At the same time, though, it also deprives the independent entity of any goodwill that might have been fairly allocable to it due to the carrier-agent's own independent operations. See DSF P58; PSG1 P58. The reasonableness of this feature of the Atlas policy may be viewed differently by different courts. It passes muster here because plaintiffs have not proffered evidence that would indicate the relative burden that Atlas would have borne had it permitted its carrier-agents to transfer their established names to the new, non-Atlas entities, if the agents had so wished, as opposed to requiring its carrier-agents to give the new entities different names instead. [19] Indeed, even if there were such evidence, it would necessarily be speculative. **[*44]** And in addition, each carrier-agent, as noted, had the clear option of operating completely independently, or of seeking to associate with another van line that would permit carrier-agent or independent operations under that name.

In judging the reasonableness of the Atlas policy, it should be noted that plaintiffs appear to have conceded that a van line is fully entitled to abandon its agency network altogether, or choose to operate exclusively with agents that have no independent interstate authority at all -- i.e., no independent interstate authority either within the agency company or within a separate, affiliated company. See Transcript of Hearing, August 6, 1984, at 19 - 23. At least one major van line other than Atlas does indeed operate in such a **[*45]** manner. [20] The arrangement now being enforced by Atlas, however, is one that is less extreme. Agents are expressly permitted to continue to operate their own, independent authority as long as it is located within an "affiliated" but separately incorporated company. The Court of Appeals for this Circuit faced an analagous situation in *United States v. Studiengesellschaft Kohle, 670 F.2d 1122 (D.C. Cir. 1981)*. That case involved the holder of a process patent who had granted licenses to several manufacturers, allowing all of them to use the process to produce products for their own use but allowing only only one of them to sell the resultant product in the open market. The plaintiff manufacturers challenged this "restraint." The Court of Appeals, however, noted that the patent-holder was legally entitled to grant an exclusive manufacturing and sales license to a single licensee if he so desired, and that therefore, the patent-holder could not be deemed to have acted "unreasonably" under the antitrust laws for having taken the less extreme step of licensing additional manufacturers subject to the condition that the resultant product be restricted to their own use. *Id.* ***[*46]*** *at 1128* - 31, 1135. Similary, if Atlas would be entitled to choose to continue doing business only with agents that possess no interstate authority whatsoever, then Atlas would presumably be entitled -- without being found to have acted unreasonably -- to take the less extreme step represented by the Atlas policy in question. [21] See also *Red Diamond Supply, Inc. v. Liquid Carbonic Corp., 637 F.2d 1001, 1006-07* (5th Cir.), cert. denied, *454 U.S. 827 (1981)*.Rather than choosing to do business ony with agents who have no independent authority whatsoever, Atlas allows its agents to possess independent authority as long as they place it in a separate

---

[19] It is worth noting, in this regard, that one other major van line has determined to accept the costs of permitting its carrier-agents to shift their established names to such newly created separate entities. See DSF P79.Counsel for the defendant may themselves yet decide, out of an abundance of caution and in anticipation of a possible appeal, to recommend to Atlas the adoption of this more conservative approach.

[20] Plaintiffs themselves report that "Allied Van Lines, the largest van line, allows no firm affiliated with it to have or to use authority to conduct interstate operations competitive with its own. This arrangement was approved and immunized from the antitrust laws by the Interstate Commerce Commission in 1946, following an antitrust action suit brought by the Justice Department. Evanston Fireproof Warehouse, et al., - Control - Allied Van Lines, 46 M.C.C. 557 (1946)." PSF PIII-I.

[21] The court does not itself face the question, nor intimate any ruling, on whether indeed it would be valid under the antitrust laws for a van line to take the more extreme step of banning its agents even from having separate affiliates exercise independent carrier authority. Suffice it to note that plaintiffs, having conceded that a van line is entitled to take such extreme action, see Transcript of Hearing, August 6, 1984, at 19-23, are in no position to argue that Atlas's less extreme action is unreasonable. Given that Atlas bars only the exercise of independent authority by the agency companies themselves, the policy goes no farther than is necessary to enforce traditional agency standards upon the agent companies alone. The discussion above demonstrates the reasonableness of a policy that is limited in this fashion.

company and look elsewhere than to Atlas for the support and overhead services necessary to utilize that authority. It is difficult to regard this tempered action as "unreasonable" within the meaning of the Sherman Act, or to see what other proof plaintiffs could muster to change this conclusion.

[*47] Finally, to the extent that Atlas's policy has any legally cognizable anticompetitive effect, there stands balanced against it the plain and significant procompetitive impact on competition among the national van lines. Plaintiffs do not dispute in any material way that enforcing traditional agent loyalty upon Atlas agents will strengthen Atlas's competitive position vis-a-vis the other national van lines, particularly those that already require their agents to work with them alone. Plaintiffs concede that carrier-agency reduced the amount of traffic carried on Atlas's account, PSGI P22, and cannot plausibly argue that carrier-agency did not or would not expose Atlas to increased liability -- at least to some extent -- for shipments carried out under Atlas's actual or apparent authority. See PSGI PP31-34. Atlas's new policy eliminated these competitive vulnerabilities, and thus, as shown above, had a legitimate business purpose with a plain procompetitive effect. Therefore, considering the nature and overall competitive effect of the announcement and implementation the new Atlas policy, the Court finds from undisputed facts that plaintiffs are unable to show that Atlas's **[*48]** actions violated the rule of reason. [22]

IV.

For the foregoing reasons, the court concludes as a matter of law from undisputed material facts that defendant's actions in requiring its agents to refrain from independent carrier operations, except through separate corporate affiliates, does not violate *Section 1* of the Sherman Act. Accordingly, an accompanying order will deny plaintiff's motion for partial summary judgment as to liability, and will grant defendant's motion for summary judgment.

End of Document

[22] To the extent that plaintiffs' claims also challenge Atlas's earlier, aborted efforts to cope with the advent of deregulation, see supra note 6, the Court similarly finds that no violation of the rule of reason can be demonstrated. Even apart from whether the "conspiracy" requirement can be met as to these earlier Atlas actions, the Court finds that their short duration, the prerogative of Atlas to impose traditional agency standards upon its agents, and the procompetitive aim of the actions establish that they cannot be deemed "unreasonable" under the Sherman Act.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN2[] **Entitlement as Matter of Law, Genuine Disputes**

A private antitrust plaintiff must demonstrate (1) a violation of the antitrust laws and (2) a right either to the treble damage remedy under § 4 of the Clayton Act, codified at *15 U.S.C.S. § 15*, or to injunctive relief under § 16 of the Clayton Act.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN3[] **Private Actions, Remedies**

Plaintiff also bears the burden of showing causation, i.e., that defendants' alleged unlawful conduct was a material cause of injury to its business or property. Although the burden is not a heavy one, since a plaintiff need not exhaust all possible alternative sources of injury, if plaintiff fails to establish a causal relationship between its financial difficulties and defendants' antitrust violations, its case must fail.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

HN4[] **Private Actions, Remedies**

To the extent that demand to use facilities is an immutable requirement to demonstrate antitrust injury caused by denial, it runs counter to the caution that courts should not add requirements to burden the private litigant beyond what is specifically set forth by Congress in the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Torts > ... > Elements > Causation > General Overview

HN5[] **Private Actions, Remedies**

Causation could be shown by evidence other than a refusal to a demand, such as defendants' interference with independent sources of supply relied upon by plaintiff. The question presented under the antitrust laws was whether there was sufficient evidence for a jury to infer the necessary causal connection between respondents' antitrust violations and petitioners' injury.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN6[] **Private Actions, Remedies**

A refused demand is often the best evidence of causation, and the absence of a demand in the circumstances of the particular case may, indeed, be fatal to plaintiff's ability to show causation.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN7[] **Private Actions, Remedies**

A company expanding either into a new geographic territory or product line or beginning business altogether must show not only that it had the background, experience, and financial ability to make a viable entrance, but even more important, that it took affirmative actions to pursue the new line of business. Proof of a demand will generally be the best evidence to show that a plaintiff was poised and ready to enter the market. Otherwise there is unlikely to be any plausible evidence to show that defendants impeded this effort. Certainly, the law will not countenance a dormant plaintiff who springs into action only when it is time to file suit.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN8[] **Private Actions, Remedies**

An antitrust plaintiff who sues claiming it was excluded from the market, whether by a conspiracy or monopolistic conduct, must produce sufficient evidence from which the trier of fact can find a causal connection between the violation and the injury. Although summary judgment should be used only sparingly in antitrust cases, there are patently justifiable reasons why a trial court should ascertain, before embarking on a lengthy antitrust trial, whether plaintiff will be able to present some evidence that the injury of which it complains can be attributable to the alleged antitrust violation.

HN11[] **Summary Judgment, Burdens of Proof**

The court interprets *Fed R. Civ. P. 56* to signify that mere formal denials or general allegations which do not show the facts in detail and with precision are insufficient to prevent the award of summary judgment. Under this rule, a party resisting the motion cannot expect to rely merely on bare assertions, conclusory allegations or suspicions.

Opinion

[*167] OPINION OF THE COURT

SLOVITER, Circuit Judge.

I.

A.

Plaintiff Out Front Productions, Inc., a former promoter of rock concerts, appeals from the grant of summary judgment against it in its antitrust action against defendant concert promoters, Larry Magid, Joseph Spivak, Herbert Spivak, and Allen Spivak, individually and trading as Electric Factory Concerts and Tower Theatre (hereafter collectively referred to as EFC).

Out Front contends that EFC prevented it from successfully promoting large-scale white-oriented rock concerts in Philadelphia because EFC, which had a contractual exclusive arrangement from January 1, 1972 to **[**2]** December 31, 1976 to promote rock concerts at the Spectrum, the largest indoor facility and apparently the most attractive to rock performers, maintained its exclusivity beyond that date and unreasonably denied it access to that facility. It also contends that from at least 1972 until April 1980 EFC attached to the contracts with the performers it promoted a "Standard Addendum", which gave EFC certain exclusive rights to those performers in the Philadelphia area for a 75 day period, provided a six months' right of first refusal of the performer's services, and imposed certain advertising restrictions. It contends that EFC's use of the Standard Addendum was a predatory practice to maintain and bolster the monopoly power it acquired **[*168]** through its exclusive access to the Spectrum for rock concert promotion. Out Front alleged that EFC unlawfully conspired to eliminate competition and restrain trade in violation of *section 1* of the Sherman Act, *15 U.S.C. § 1*, and monopolized or attempted to monopolize the promotion of white-oriented rock music concerts in the Philadelphia metropolitan area in violation of *section 2* of the Sherman Act, *15 U.S.C. § 2*.

[3]** B.

* Hon. Glenn E. Mencer, United States District Court for the Western District of Pennsylvania, sitting by designation.

Out Front was formed in 1977 by Richard Fuller, its sole shareholder and general manager. Between September and November of that year it produced 12 concerts, ten at the Trenton War Memorial, a medium-size facility, and two in Philadelphia, one at the Civic Center and the other at the Tower Theatre, a smaller facility owned by defendants. Fuller had promoted a number of rock concerts in Trenton in 1974 and 1975, when he did business under the name Hollow Moon. Nearly all of Out Front's concerts were unprofitable. Apart from one unsuccessful effort to promote a concert in Trenton in 1979, it appears to have ceased operations soon after its last concert in November 1977.

Out Front raises no claim that defendants interfered with its business in Trenton. Its claim in this suit is based on the theory that it would have become a successful promoter of white-oriented rock concerts in Philadelphia had defendants made the Spectrum available for its concerts. *See* Brief for Appellant at 4.

At the close of discovery, defendants moved for summary judgment, claiming Out Front could not show it had been "prevented from presenting concerts" in the absence of evidence that it sought **[**4]** and was refused access to the Spectrum and that it sought the services of rock performers for such concerts. The district court granted summary judgment, stating that the record was "devoid of evidence suggesting that [Out Front] demanded access to the Spectrum", App. at 751a, that Out Front "failed to meet its justifiably rigorous burden of proving that a demand for access to Philadelphia-area concert facilities would have been futile", App. at 754a, and that Out Front failed to produce evidence that "the standard addendum was a feature of any contract defendants may have had with any [performer] to whom plaintiff claims to have been denied access." App. at 756a. The court later denied Out Front's motion to alter or amend judgment based on further submissions, reaffirming its original opinion.

II.

A.

We consider first the district court's conclusion that Out Front's "failure to demand access to Philadelphia concert venues deprives it of the standing needed to challenge the alleged exclusion." App. at 756a. The issue in this case is not one of standing in the sense of plaintiff's power to bring suit. Out Front claims a direct economic injury traceable to defendants' actions **[**5]** that allegedly violated the antitrust laws. This was enough to confer standing as required by Article III of the Constitution, *see, e.g., Association of Data Processing Service Organizations v. Camp, 397 U.S. 150, 152, 25 L. Ed. 2d 184, 90 S. Ct. 827 (1970)*, and under section 4 of the Clayton Act, *15 U.S.C. § 15*, which entitles "any person . . . injured in his business or property" by an antitrust violation to recover damages. Moreover, it is clear that ***HN1***[] businesses that are hindered from forming or from entering a new market come within the zone of interests protected by the antitrust laws and may maintain suit for damages and for injunctive relief. *See generally* ABA Antitrust Section. ***Antitrust Law*** Developments 393 (2d ed. 1984). Thus Out Front had adequate standing to maintain this suit.

B.

As this court recently set forth in *Weiss v. York Hospital, 745 F.2d 786 (3d Cir. 1984)*, ***HN2***[] a private antitrust plaintiff must demonstrate (1) a violation of the antitrust **[*169]** laws and (2) a right either to the treble damage remedy under section 4 of the Clayton Act or to injunctive relief under section 16 of the Clayton **[**6]** Act. Slip Op. at 35-36. In this case, neither the motion for summary judgment nor the court's opinion granting it were predicated on plaintiff's failure to establish a genuine issue of material fact as to defendants' violation of the antitrust laws. Therefore, for purposes of this appeal we assume that EFC violated *sections 1* and *2* of the Sherman Act, as alleged, through an unlawful monopoly of large-scale white-oriented rock concerts in Philadelphia, furthered by predatory and conspiratorial practices including unreasonable exclusive dealing arrangements with the owners of Spectrum and the use of the Standard Addendum in contracts EFC signed with certain rock performers.

However, ***HN3***[] plaintiff also bears the burden of showing causation, i.e., that defendants' alleged unlawful conduct was a material cause of injury to its business or property. *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n.9, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)*. *See Danny Kresky Enterprises Corp. v. Magid, 716 F.2d 206, 209-10, 211-12 (3d Cir. 1983)*. Although the burden is not a heavy one, since "a plaintiff need not exhaust all possible alternative sources **[**7]** of injury", *Zenith Radio Corp., 395 U.S. at 114 n.9*, if plaintiff fails to establish a causal relationship between its financial difficulties and defendants' antitrust violations, its case must fail. *Van Dyk Research Corp. v. Xerox Corp., 631 F.2d 251 (3d Cir. 1980)*, *cert. denied*, *452 U.S. 905, 69 L. Ed. 2d 405, 101 S. Ct. 3029 (1981)*.

In concluding that summary judgment for EFC was appropriate, the district court stated, "In antitrust cases in which the defendants allegedly refuse to deal, the plaintiff must make a demand for access to the market from which it is allegedly excluded", or prove that the situation falls within the "very narrow" futility exception. App. at 750a, 751a. ***HN4***[] To the extent that this suggests that demand is an immutable requirement, it runs counter to the Supreme Court's caution that courts "should not add requirements to burden the private litigant beyond what is specifically set forth by Congress in [the antitrust] laws." *Radovich v. National Football League, 352 U.S. 445, 454, 1 L. Ed. 2d 456, 77 S. Ct. 390 (1957)*; *see also* *Radiant Burners, Inc. v. Peoples Gas Light & Coke Co., 364 U.S. 656, 660, 5 L. Ed. 2d 358, 81 S. Ct. 365 (1961)*. **[**8]**

Antitrust suits are subject to no prerequisite, such as that imposed by *Fed. R. Civ. P. 23.1* for shareholder derivative suits, requiring that the complaint allege a demand or show futility. Demand is a prerequisite in derivative litigation so that the corporation on whose behalf suit is brought has the opportunity to apply its business judgment to the claims raised, a rationale patently inapplicable to a private antitrust plaintiff. Treating a "demand" by an antitrust plaintiff as if it were a condition precedent to maintenance of the suit misdirects the relevant focus, which should be on whether plaintiff has adduced the requisite proof of causation. No persuasive reason has been suggested why evidence of a demand is the only way to prove causation. In fact, in three cases where the defendants' exclusionary practices impeded the business or expansion of an established participant, the Supreme Court rejected the contention that suit was barred by plaintiffs' failure to make a demand.

In *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962)*, the Supreme Court stated, "We do not believe that respondents' **[**9]** liability under the antitrust laws can be measured by any rigid or mechanical formula requiring [a plaintiff] both to demand materials from respondents and to exhaust all other sources of supply." The Court held that ***HN5***[] causation could be shown by other evidence, such as defendants' interference with independent sources of supply relied upon by plaintiff. *Id.* The Court stated that the question presented under the antitrust laws was whether there was "sufficient evidence for a jury to infer **[*170]** the necessary causal connection between respondents' antitrust violations and petitioners' injury." *Id. at 700*. In *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968)*, the Court held that a shoe manufacturer was entitled to damages against the manufacturer and distributor of shoe machinery who would only lease, but not sell, the equipment. Although plaintiff apparently produced no evidence to show that it had demanded to buy the equipment, the district court found that plaintiff would have bought rather than leased had it been given the opportunity to do so. The Supreme Court stated that, "in **[**10]** the circumstances of this case it was unnecessary for [plaintiff] to prove an explicit demand during the damage period." *Id. at 487 n.5* (citing *Continental Ore*). In the third case, *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 120 n.15, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)*, the Court held that an antitrust plaintiff's failure to make a formal request for a patent license from a patent pool was not fatal to its case because the pool had made its position entirely clear.

It is apparent from these cases that there is no rigid formula calling for a demand in order for plaintiff to show the requisite causality. [1] On the other hand, ***HN6***[] a refused demand is often the best evidence of causation, and the absence of a demand in the circumstances of the particular case may, indeed, be fatal to plaintiff's ability to show causation. In the three Supreme Court cases holding demand was not a prerequisite there had been a course of

---

[1] To the extent that dictum in *Lawlor v. National Screen Service Corp., 270 F.2d 146, 154 (3d Cir. 1959)*, *cert. denied*, *362 U.S. 922, 4 L. Ed. 2d 742, 80 S. Ct. 676 (1960)*, on which the district court relied, suggested that the lack of a demand could be an alternative basis for affirming a district court conclusion that no injury had been sustained by plaintiffs, it has been undermined by the later Supreme Court cases. In any event, in that case there was a general lack of evidence that defendants frustrated what might have been a successful business venture and caused any damage. *See* *id. at 153*. The question of the necessity of a demand under section 4 of the Clayton Act was reserved by the court in *Weiss v. York Hospital, supra*, Slip Op. at 40 n.32, where it held that a demand was not a prerequisite under section 16. *Id.* at 40.

dealing and participation in the market from which the Court permitted the fact finder to infer the causal nexus between the antitrust violation and plaintiff's injury. However, in the absence of such circumstances, **[**11]** a similar inference will ordinarily be unavailable. Thus, ***HN7***[] a company expanding either into a new geographic territory or product line or beginning business altogether must show not only that it had the background, experience, and financial ability to make a viable entrance, but even more important, that it took affirmative actions to pursue the new line of business. *See* *Hecht v. Pro-Football, Inc., 187 U.S. App. D.C. 73, 570 F.2d 982, 994 (D.C. Cir. 1977)*, *cert. denied*, *436 U.S. 956, 57 L. Ed. 2d 1121, 98 S. Ct. 3069 (1978)*; *Triangle Conduit & Cable Co. v. National Electric Products Corp., 152 F.2d 398, 399-400 (3d Cir. 1945)*. *See generally* 2 P. Areeda & D. Turner, ***Antitrust Law*** § 335c (1978); ABA Antitrust Section, ***Antitrust Law*** Developments 393 & nn.73-74 (2d ed. 1984). Proof of a demand will generally be the best evidence to show that a plaintiff was poised and ready to enter the market. Otherwise there is unlikely to be any plausible evidence to show that defendants impeded this effort. Certainly, the law will not countenance a dormant plaintiff who springs into action only when it is time to file suit.

[12]** To recapitulate, ***HN8***[] an antitrust plaintiff who sues claiming it was excluded from the market, whether by a conspiracy or monopolistic conduct, must produce sufficient evidence from which the trier of fact can find a causal connection between the violation and the injury. Although summary judgment should be used only sparingly in antitrust cases, *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962)*, "there are patently justifiable reasons why a trial court should ascertain, before embarking on a lengthy antitrust trial, whether plaintiff will be able to present some **[*171]** evidence that the injury of which it complains can be attributable to the alleged antitrust violation." *Van Dyk Research, 631 F.2d at 258* (Sloviter, J., concurring). Thus we turn to examine whether the district court was justified in giving summary judgment against plaintiff on the record before it.

C.

EFC filed its motion for summary judgment supported by specific affidavits and deposition testimony stating that plaintiff never sought to lease the Spectrum and that qualified promoters' demands for concert dates were accepted. **[**13]** It filed the affidavit of Allen B. Flexer, Vice-President of the Spectrum's parent corporation, who had the responsibility of negotiating with persons desiring to lease the Spectrum. Flexer's affidavit stated that before suit was filed, he had never heard of Out Front or Richard Fuller, and averred that "during the period 1977 to date, neither Out Front Productions, Inc. nor Richard Fuller ever contacted me or any other Spectrum official responsible for leasing for the purpose of seeking available dates for presentation at the Spectrum of any music concerts." App. at 486a. This was supported by the affidavit of his assistant, Stephen Greenberg. App. at 693a. Flexer's affidavit set forth a list of promoters to whom the Spectrum was leased during the relevant period.

In response to the motion for summary judgment, plaintiff presented an affidavit by Richard Fuller, its general manager, which asserts in relevant part:

> 2. Some time during the last half of 1977 or the first half of 1978, I went to the Spectrum to try to obtain a list of available dates, in order to book musical acts on those dates.
>
> 3. At the Spectrum, I was told that Larry Magid had it "tied up," that **[**14]** only he "plays there," and that I should "forget it."
>
> . . .
>
> 6. My company and I were ready, willing and able to promote and present such groups [listed in para. 5] in the Philadelphia-Trenton area. I had money in the bank, houses which were not subject to mortgages and other property which could be used as collateral for financing. There were also people who were able and willing to supply me with financial backing . . . . My company and I promoted 12 concerts in 1977 . . . As a principal of Hollow Moon, a promoter of such concerts, I promoted 7 concerts in 1974 and 11 concerts in 1975 . . . and co-promoted 3 concerts in 1975 with EFC, a defendant herein.
>
> 7. Because of defendants' exclusionary practices, my company was forced out of business after its last concert on November 17, 1977.

The portion of the Fuller affidavit dealing with the demand for the Spectrum, the issue on summary judgment, contrasts sharply with the defendants' submissions. It is vague as to the timing and content of the request for access; it does not state that Fuller provided EFC with a definite request or proposal; it fails to state to whom the inquiry was made; and it fails to state **[**15]** *for whom* the inquiry was made. There is no written evidence to back up Fuller's assertion of a frustrated attempt to lease the Spectrum, and plaintiff makes no assertion that any follow-up effort was made. Fuller's earlier deposition testimony had suggested that the inquiry he made regarding availability of the Spectrum was made by him on behalf of Hollow Moon, an entity unrelated to plaintiff Out Front, and occurred before the beginning of the four-year damage period. App. at 1125a-27a, 1153a-59a. [2] Even if plaintiff could rehabilitate Fuller's own deposition with his subsequent affidavit, an issue we do not reach, that affidavit is insufficient to withstand summary judgment.

HN10[]

[*172] *Fed. R. Civ. P. 56(e)* provides, **[**16]** in part, "When a motion for summary judgment is made and supported as provided in this rule, an adverse party may not rest upon the mere allegations or denials of his pleading, but his response, by affidavits or as otherwise provided in this rule, *must set forth specific facts* showing there is a genuine issue for trial. If he does not so respond, summary judgment, if appropriate, shall be entered against him." (emphasis added).

HN11[] We have interpreted *Rule 56* to signify that "mere formal denials or general allegations which do not show the facts in detail and with precision are insufficient to prevent the award of summary judgment." *Robin Construction Co. v. United States, 345 F.2d 610, 613 (3d Cir. 1965)* (quoting *Engl v. Aetna Life Ins. Co., 139 F.2d 469, 473 (2d Cir. 1943))*. Under this rule, "a party resisting the motion *cannot expect to rely merely on bare assertions*, conclusory allegations or suspicions." *Ness v. Marshall, 660 F.2d 517, 519 (3d Cir. 1981)* (emphasis added). *See* *Fireman's Insurance Co. of Newark, N.J. v. DuFresne, 676 F.2d 965, 969 (3d Cir. 1982)*. Even accepting Fuller's affidavit assertions **[**17]** as true, they fail to show any serious effort on behalf of Out Front to secure access to the Spectrum during the 1977 to 1981 period.

Nor does the record support Out Front's alternative argument, unsupported by any affidavit, that Fuller, an established promoter in Trenton, knew from his past unsuccessful efforts for Hollow Moon that it would have been futile to negotiate for a concert date for the Spectrum. The record is clear that after EFC's contractual exclusive right to the Spectrum ended in December, 1976 and during the damage period, 1977 to 1981, other promoters were in fact given access to the Spectrum. Plaintiff contends that these other promoters were only granted access on highly unfavorable terms, were required to co-promote with EFC, or did not threaten EFC's alleged monopoly over large-scale white-oriented rock concerts. If true, these facts might support viable claims against EFC by the other promoters, but they do not provide the missing link in this plaintiff's proof. In short, there is no probative, objective evidence that plaintiff's intentions vis-a-vis the Spectrum went beyond a pessimistic belief that it was not worth gearing up to use the facility and to **[**18]** compete with Electric Factory. Fuller's affidavit fails to tie defendants' conduct to Out Front's lack of success on its concert venture.

D.

Plaintiff's additional claim, that it was injured because defendants exercised control over performers and agents through unreasonably restrictive contracts, suffers from a similar defect. A jury may find that coercion or control over performers may injure other firms who are unable to use the performers' services. *See* *Danny Kresky Enterprises v. Magid, 716 F.2d 206, 210-12 (3d Cir. 1983)*. However, this plaintiff presented no evidence that it ever sought to contract for the services of any performers covered by the Standard Addendum and that such performers refused to perform for it as a result. In the absence of any such evidence, there is no basis on which plaintiff would be entitled to damages arising from EFC's use of the Standard Addendum.

III.

---

[2] ***HN9***[] *15 U.S.C. § 15b* establishes a four-year limitation from the date of alleged injury on private claims for damages under § 4 of the Clayton Act. *See generally* L. Sullivan. Handbook of the Law of Antitrust § 248 (1977). Out Front's suit was filed July 23, 1981.

Because plaintiff failed to establish the existence of a genuine issue of fact that EFC's alleged actions caused it damage, the district court's order granting summary judgment for defendants will be affirmed.

HN6[] Regulated Practices, Trade Practices & Unfair Competition

Under *N.C. Gen. Stat. § 75-1.1(a)*, unfair methods of competition in or affecting commerce and unfair or deceptive acts or practices in or affecting commerce are prohibited.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN7[] Regulated Practices, Trade Practices & Unfair Competition

N.C. Gen. Stat. § 75-1.1(a) is intended for the protection of consumers. As such, the debt collection activities of a major retailer are not within the reach of the statute, for they were insufficiently related to the sale of goods.

Counsel: Noel Lee Allen, (William D. Harazin, R. Bradley Miller, Frank M. Parker, Jr., Barringer, Allen and Pinnix), for Appellant.

George L. Little, Jr., (F. Joseph Treacy, Jr., Petree, Stockton, Robinson, Vaughn, Glaze & Maready), for Appellee.

Judges: Hall and Murnaghan, Circuit Judges, and Haynsworth, Senior Circuit Judge.

Opinion by: HAYNSWORTH

Opinion

[*944] HAYNSWORTH, Senior Circuit Judge;

This is primarily an antitrust case commenced by Carolina Acoustics Company, a former regional distributor of sound-measurement devices manufactured by the defendant Genrad, Inc. Prosecution of the case was continued by Carolina's trustee in bankruptcy.

Until 1979, Genrad utilized regional distributors who, collectively, were responsible for approximately 30% of Genrad's sales. The distribution agreement permitted Genrad to compete with its distributors, and approximately 70% of its sales were direct sales. In that year, however, a decision was made by Genrad's officials to terminate all of their distributors and, thereafter, to **[**2]** sell only directly.

In its complaint, Carolina alleged (1) restraints of trade in violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1*, an § 3 of the Clayton Act, *15 U.S.C. § 14*; (2) attempted monopoly in violation of *§ 2* of the Sherman Act, *15 U.S.C. § 2*; (3) breach of the distributorship agreement; and (4) unfair or deceptive trade practices in violation of *N.C.Gen.Stat. § 75-1.1(a)*.

In response to the complaint, Genrad counterclaimed for $48,448.31 due it upon a promissory note executed and delivered by Carolina.

The district court granted summary judgment for Genrad on all claims, including its counterclaim. [1] *564 F. Supp. 1309*. **[*945]** We conclude that summary judgment was properly entered for Genrad on all of Carolina's claims and on its counterclaim.

[3]** I.

In answer to an interrogatory, Genrad identified twenty-one documents that it had withheld from production on the basis of a claim of attorney-client privilege. Carolina asked the district court to inspect the documents *in camera*, but the motion was denied after argument. Carolina then filed a motion to reconsider as to only two of the original nineteen documents. Genrad submitted those two documents to the court. After an *in camera* inspection of those two documents, Genrad's claim of privilege was upheld, and the defendant's motion to compel was denied.

On appeal, Carolina complains of the failure to compel production of the two documents reviewed *in camera* and other documents as well. None of them were made a part of the record, however, and Carolina sought no order placing them unde seal and making them part of the record. All we have is Genrad's very general description consisting principally of identification of the author, addressee and recipients of copies. We do know that the district court, after inspecting two of them, upheld the claimed privilege, but we cannot examine any of the documents and thus are unable to review the rulings of the district **[**4]** court which kept them from being seen by Carolina.

II.

---

[1] After announcing its intention to grant partial summary judgment, the district judge requested counsel for Genrad to prepare and submit a proposed opinion. They submitted a proposed opinion addressing all of Carolina's claims, and that was adopted by the district judge with little change. We do not encourage that practice. *See* *Cuthbertson v. Biggers Bros., 702 F.2d 454 (4th Cir. 1983)*.

In its trade restraint claims, Carolina contended that Genrad unlawfully fixed prices, imposed unreasonable territorial and customer restrictions and required Carolina to deal exclusively in Genrad products.

Whatever other infirmities there may be in those claims, recovery upon any of them is foreclosed by the absence of any evidence of injury to Carolina. ***HN1***[] A violation of the antitrust laws is not compensible unless the violation has occasioned an antitrust injury. *J.T. Gibbons, Inc. v. Crawford Fitting Co., 704 F.2d 787, 792 (5th Cir. 1982)*; *Windham v. American Brands, Inc., 565 F.2d 59, 65 (4th Cir. 1977)*; *see also* *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*.

A.

The price fixing claim arose from the fact that Genrad limited discounts to state agencies to 5% below retail. However, Carolina conceded that Genrad never quoted less than list prices to state agencies. In price competition Genrad was always higher than its distributors **[**5]** in sales to state agencies. There was testimony that another of Genrad's distributors once underbid Carolina, but this suggests only that Genrad was not aggressively enforcing the discount limitation. There was also testimony that one state agency made one purchase directly from Genrad because of considerations other than price, but that agency returned to Carolina for its subsequent purchases. There was nothing else to indicate any injury from the alleged resale price maintenance scheme.

B.

In the original distributorship agreement, Genrad agreed to provide Carolina with support personnel and sales assistance in a territory consisting of North Carolina, South Carolina, Georgia, Alabama and eastern Tennessee. The 1976 revision contains no reference to Carolina's territory, and both distributorship agreements expressly conferred upon Carolina a right to sell Genrad products outside of its designated territory. Nevertheless, Carolina claimed that it had been informally told not to sell outside **[*946]** its territory, and the right of cancellation was an effective enforcement tool.

Carolina's salesman, Tenpenny, testified that he was not aware of any territorial restriction, **[**6]** and there was evidence of sales by Carolina outside its territory aggregating approximately $100,000. The only suggestion of a lost sale is the loss of a sale in California to a competing Genrad distributor. It was unexplained, however, how Carolina might effectively compete with west coast distributors in making sales in California. Nor is that lost sale related to the alleged territorial restriction.

C.

Without corroboration, Carolina's former president testified that it was forbidden to bid against Genrad for sales to the General Services Administration of the United States. GSA was the largest single customer for sound-measurement products in the country.

There was no evidence, however, that Carolina could have effectively competed with Genrad in making sales to GSA. There was evidence that GAS insisted that bidders offer to it their lowest prices only, which, for Genrad, were the prices at which it sold to the distributors. If there were an informal restriction upon bidding, it occasioned a loss of no sale upon which a profit might have been made.

D.

There was testimony that Carolina was required to deal exclusively in Genrad products. The evidence is equivocal, **[**7]** however, for there is evidence that Carolina dealt rather extensively in the products of another manufacturer, Columbia. Nevertheless, if there were such a restriction, there is no evidence of any injury to Carolina. There was no evidence of any opportunity to represent any other manufacturer which was declined because of the restriction. Carolina's economist seems to have believed that the exclusivity requirement enhanced Genrad's monopoly position, impairing Carolina's ability to compete effectively against Genrad. However, ***HN2***[] any injury occasioned by monopolization is not the kind of injury contemplated by § 3 of the Clayton Act.

III.

The district court rejected Carolina's attempt to monopolize claim under *§ 2* of the Sherman Act upon the ground that Carolina had not sufficiently defined the relevant market because it had submitted no evidence of the absence of cross elasticity of demand.

HN3[] If there is cross elasticity of demand or interchangeability of products, as in *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 100 L. Ed. 1264, 76 S. Ct. 994 (1965)*, **[**8]** one must deal with a much larger market than if there is none. In this case, however, there is no suggestion of the presence of cross elasticity of demand or interchangeability of products. However, Carolina's definition of the relevant market is fatally deficient for another reason.

Carolina defined the relevant product market as "portable acoustic measurement and analysis equipment and accessories . . ." It never specifically said that the market as thus defined was the manufacture of such products, but in discussing Genrad's market share, it consistently referred to Genrad's share of the manufacturing market. Of course, Carolina did not compete in that market. It competed with Genrad and other manufacturers and distributors of such products in the distribution market.

"It ***HN4***[] has generally been recognized that every manufacturer has a 'natural monopoly ' in the sale and distribution of its own products, especially when sold under a trademark." *Spectrofuge Corp. v. Beckman Instruments, Inc., 575 F.2d 256 (5th Cir. 1978)*. *See also* *Bushie v. Stenocord Corp., 460 F.2d 116 (9th Cir. 1972)*; **[**9]** *A.L.W., Inc. v. United Air Lines Inc., 510 F.2d 52 (9th Cir. 1975)*. The behavior of Genrad within the distribution market was not the kind of conduct to give rise to a charge of **[*947]** attempted monopoly. It simply moved to control the distribution of its own products.

There is another reason this claim must fail. There was no showing of a dangerous probability of monopolization.

HN5[] An attempt to monopolize within the prohibition of the statute is not made out unless it is shown that there was a dangerous probability that the conduct would have achieved a monopoly had it been successful. *White Bag v. International Paper Co., 579 F.2d 1384 (4th Cir. 1974)*; *McElhenny Co. v. Western Auto Supply Co., 269 F.2d 332 (4th Cir. 1959)*. *See also* ABA Antitrust Section ***Antitrust Law*** *Development* 140-44 (2 ed. 1985). "An attempt is not made out unless the conduct, if successful, would constitute the crime." *Bowen v. New York News, Inc., 366 F. Supp. 651, 673 (S.D.N.Y. 1973)* aff'd in part and rev'd in part, *522 F.2d 1242 (2d Cir. 1975)* **[**10]** *cert. denied 425 U.S. 936, 48 L. Ed. 2d 177, 96 S. Ct. 1667 (1976)*.

Genrad was shown to have had 49% of the manufacturing market for its products. As distributor, however, it had handled only approximately 38% of the total distribution market; Genrad's distributors were responsible for the remaining 11%.

When Genrad terminated its distributors, it unquestionably sought to gain for itself the 11% of the distribution market its distributors theretofore had had. Whether or not it completely succeeded is unclear on this record, but we may assume that it substantially enhanced its 38% share of the distribution market. Nevertheless, there is nothing to suggest that Genrad's share of the market was so great as to give it the power to destroy competition or that its termination of its own distributors posed a dangerous probability of monopolization. Indeed, what was done was not directed at its competitors except insofar as its own distributors had been competing with it in the distribution market. In short, Genrad did what it had a right to do when it terminated its own distributors, and its conduct created no dangerous probability of monopolization in any market.

[11]** IV.

The breach of contract claim is not referable directly to Carolina's distribution contract. It is based upon a claimed violation of a Statement of Policy, which, under the distribution contract, was binding upon Carolina but subject to change by Genrad.

The Statement of Policy provided that Genrad's district offices would refer orders for small quantities of standard catalog items to the nearest distributor, provided it was known that the distributor had those items in stock.

The Statement of Policy also provided that "sales leads" obtained from national advertising and trade shows would be referred to the distributors.

Several months before termination of the distributors, Genrad began to experiment with direct mail and telephonic solicitation of orders. Apparently, most orders and leads developed in that program were not referred to distributors. It does not appear to what extent, if any, those leads were influenced by national advertising or trade shows, though it was asserted by Genrad that a substantial proportion of them were with potential customers who had never received any of Genrad's literature from its distributors.

That experimental program did lead to **[**12]** the conclusion that Genrad's distributors were not doing as well as they might, and to the conclusion that Genrad should terminate its distributors and undertake to sell of its products directly. In this, however, we can find no violation of the distribution contract.

We have already observed that Genrad, from the outset, was selling directly in competition with its distributors. The distribution contract provided that Genrad reserved "the right to set up other marketing channels at any time and to sell products directly or indirectly to any customer without compensation to the Distributor." One of Genrad's obligations under the contract was to help build user and industry acceptance of its products "by appropriate direct **[*948]** mail selling activity." Finally, the contract bound the distributor to adhere to the Statements of Policy" as well as subsequent changes in such policies."

The introduction of the direct solicitation program was clearly authorized by the distribution contract. Genrad had the contractual right to set up other marketing channels at any time and to effect direct sales to any customer. Indeed, direct mail selling activity was said to have been among **[**13]** Genrad's obligations, while Genrad had the unilateral right to change its announced policies.

The only hint of substance in the claim lies in the fact that Genrad did not give advance information to its distributors of the experimental sales program it was undertaking. The contract, however, gave Genrad the right to undertake the program, and nothing in the contract suggests that Genrad was obligated to give its distributors notice in advance of any experimental resort to some other marketing channel. In short, we find no promises by Genrad which Genrad may be said to have broken.

V.

We also find no basis for recovery against Genrad under ***HN6***[] *N.C.G.S. § 75-1.1(a)*, which prohibits "unfair methods of competition in or affecting commerce and unfair or deceptive acts or practices in or affecting commerce."

This statute has been construed as directed against deception in connection with the sale of goods. An illustrative list of prohibited conduct was contained in an article written by the then Attorney General of North Carolina, Robert Morgan. "The People's Advocate in the Marketplace **[**14]** -- the Role of North Carolina's Attorney General in the Field of Consumer Protection" 6 Wake Forest Intra L. Rev. 1, 18 (1969). The construction was substantially adopted by the Supreme Court of North Carolina in *State Ex Rel Edmisten v. J.C. Penney Co., 292 N.C. 311, 233 S.E.2d 895, 898 (1977)*, by a district court in North Carolina, *C.F. Industries v. Transcontinental Gas Pipeline, 448 F. Supp. 475 (W.D.N.C. 1978)*, and by this court, *United Roasters v. Colgate-Palmolive Co., 649 F.2d 985 (4th Cir. 1981)*.

In *J.C. Penney*, the North Carolina Supreme Court held that ***HN7***[] debt collection activities of a major retailer were not within the reach of the statute, for they were insufficiently related to the sale of goods. *See also* *Marshall v. Miller, 302 N.C. 539, 276 S.E.2d 397 (1981)* (describing act as intended for the protection of consumers).

The complaint in this case alleged no deceptive practice except insofar as it alleges that Genrad undertook its new experimental sales program without informing its distributors. If **[**15]** that might be regarded as a deceptive practice, it was at least as unrelated to a sale or to a formation of a contract as was J.C. Penney's debt collection practices. Even if there had been an intentional breach of the distribution contract by Genrad, that would not have been a violation of the North Carolina statute. *United Roasters v. Colgate-Palmolive Co., 649 F.2d 985 (4th Cir. 1981)*.

VI.

At the time of termination of the distribution contract, Carolina owed Genrad approximately $50,000 for goods received but for which payment had not been **[*949]** made. Carolina gave Genrad a note for the balance due, and made several payments on the note before it disclaimed any further obligation. The disclaimer and the defense to the counterclaim were based upon Carolina's charges of antitrust and contract violations by Genrad. Since no such violations existed and there was no other proffered defense to the counterclaim, summary judgment properly went for Genrad on its counterclaim.

VII.

We conclude that summary judgment on all claims was properly entered for Genrad.

AFFIRMED.

Manego v. Orleans Bd. of Trade

United States District Court for the District of Massachusetts

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

HN1[] **Preclusion of Judgments, Res Judicata**

Under the doctrine of res judicata a final judgment on the merits of an action precludes the parties or their privies from relitigating issues that were or could have been raised in that action. Res judicata is a bar only where the subsequent case concerns the same cause of action or claim. With the adoption of the Federal Rules of Civil Procedure the concept of "cause of action" has broadened beyond that of a single legal issue narrowly drawn in a writ. The scope of preclusion has necessarily expanded with the definition of "claim" or "cause of action."

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN2[] **Preclusion of Judgments, Res Judicata**

A judgment bars all claims prior to its entry.

HN3[] **Decisions, Collateral Estoppel**

Issue preclusion may bar relitigation of issues actually litigated and necessary to a prior judgment in a different cause of action, and may be asserted defensively by a stranger to the original action.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Regulated Industries > Transportation > Railroads

HN4[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

Generally stated, the Noerr-Pennington doctrine exempts, with certain exceptions, concerted attempts to influence the passage or enforcement of laws from the sweep of antitrust legislation regardless of anticompetitive intent.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN5[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

The "sham" exception to the Noerr-Pennington doctrine applies where a party seeks not to influence public officials, but to bar their competitors from meaningful access to adjudicatory tribunals and so to usurp the decisionmaking process. Subsequent developments have held that this exception also applies to a single suit filed for an improper purpose, such as generating publicity unfavorable to a competitor. Activity disguised as petitioning which is simply an effort to interfere directly with a competitor is not protected under Noerr-Pennington. Other types of activity which fall within the "sham" exception are misrepresentation, and threats or coercive measures to influence state officials. In order for the "sham" exception to apply: What is needed is proof that the lobbyists subverted the integrity of the governmental process, that they effectively barred plaintiffs access to these processes, or that the nature of these processes made their invocation something other than the "political activity" that is recognized by the Noerr-Pennington line of cases to be beyond the scope of the Sherman Act.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN6[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

Conduct genuinely intended to influence governmental action is immune from the sweep of ***antitrust law*** and whether the effort is genuine or a sham is an issue of fact.

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN7[] **Summary Judgment, Opposing Materials**

A party opposing a motion for summary judgment may not rest on mere allegations, but must set forth specific facts showing that there is a genuine issue for trial. *Fed. R. Civ. P. 56(e)*.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN8[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

The "conspiracy" exception to Noerr-Pennington applies where government officials participate with private individuals in a scheme to restrain trade.

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

Evidence > Inferences & Presumptions > General Overview

HN9[] **Summary Judgment, Opposing Materials**

Generally, summary judgment is inappropriate in cases involving conspiracy claims because the existence or nonexistence of a conspiracy is essentially a factual issue to be decided by the jury. Summary judgment may also be inappropriate in antitrust cases where "motive and intent play leading roles." There are, however, exceptions to the general rule. Where a moving party in an antitrust conspiracy case has shown that the facts relied upon in the opposing party's allegations are not susceptible to the interpretation which he sought to give them, *Fed. R. Civ. P. 56(e)*, puts the burden on the opposing party to produce evidence in support of his allegations. Furthermore, a plaintiff may not rely upon the promise of evidence of conspiracy to be developed by cross-examination at trial.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN10[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

The type of conspiracy, which the plaintiff must show to escape the Noerr-Pennington doctrine, differs from that normally associated with antitrust litigation. Where the alleged conspirators are potential competitors or other market participants, conspiracy may be inferred from their market behavior, a situation that renders the determination particularly unsuitable for summary judgment.

Counsel: **[**1]** Charles Ray Weidman, Chatman, Massachusetts, for Plaintiff.

Samuel Hoar, Laura L. Carroll, Goodwin, Procter & Hoar, Boston, Massachusetts, for Cape Cod 5 Cent Savings Bank and David B. Willard.

Opinion by: CAFFREY

Opinion

[*233] MEMORANDUM

CAFFREY, Chief Judge.

This is a civil action brought pursuant to antitrust statutes, *15 U.S.C. §§ 1-15*, which includes a pendent state law claim for unfair business practices. M.G.L. c. 93A. The plaintiff, Isaac Manego, alleges that the defendants conspired to orchestrate the denial of license applications, thereby producing an adverse anticompetitive effect. The defendants are David Willard, The Cape Cod Five Cents Savings Bank ("Bank"), the Orleans Board of Trade ("Board of Trade"), and its members. At times relevant to the events complained of, defendant Willard was both the President of the Board of Trade and an officer of the Bank. The case is now before the court on defendants' motions for summary judgment. *Fed.R.Civ.P. 56(b)*.

This case is the third round of litigation **[**2]** initiated by plaintiff relating to the denial of his application for entertainment and liquor licenses in the Town of Orleans, Massachusetts. In the first case, *Manego v. Board of Selectmen of the Town of Orleans*, C.A. No. 38824 ("*Manego I*"), the plaintiff sought a writ of mandamus from the Massachusetts Superior Court. Upon dismissal of that action, plaintiff instituted his second case, a civil rights action in this Court, *Manego v. Cape Cod Five Cents Savings Bank, et al*., C.A. No. 80-1406-MC (D.Mass. April 13, 1982) ("*Manego II*") which terminated in summary judgment for the defendants. The Court of Appeals affirmed. *Manego v. Cape Cod Five Cents Savings Bank, 692 F.2d 174 (1st Cir.1982)*.

In substance, the plaintiff's present complaint is based on and addresses the same events that were the subject of both the earlier cases. In early 1979, the Orleans Board of Selectmen denied the plaintiff's applications for the liquor and entertainment licenses necessary to operate a proposed disco. The plaintiff alleges that his application was denied as a result of a conspiracy among the defendants, including the Board of Trade, the Bank, and David Willard. The alleged purpose **[**3]** of the conspiracy was to allow the Bank, through **[*234]** a sham transaction, to offer similar entertainment at the nearby Lower Cape Sports Arena ("Arena") free of competition from Mr. Manego. Indeed, it is undisputed that an entertainment license was issued to the Arena after the denial of plaintiff's application.

Defendants Cape Cod Five Cents Savings Bank and David Willard were also defendants in Manego II. The Orleans Board of Trade was not named as a defendant in the earlier actions, and a reference to Willard's status as president of the Board was stricken from the complaint on defendant Bank's motion.

DEFENDANTS CAPE COD FIVE CENTS SAVINGS BANK AND DAVID WILLARD

Defendants Willard and the Bank move for summary judgment on grounds that the plaintiff's action is barred under the doctrine of *res judicata* and on the grounds that the alleged conspiratorial acts are protected by the *First Amendment*.

HN1[] Under the doctrine of *res judicata* [1] "a final judgment on the merits of an action precludes the parties or their privies from relitigating issues that were or could have been raised in that action." *Allen v. McCurry, 449 U.S. 90, 94, 101 S. Ct. 411, 66 L. Ed. 2d 308* ***[**4]*** *(1980)*. *Res judicata* is a bar only where the subsequent case concerns the same cause of action or claim. *E.g.* , *Cromwell v. County of Sac, 94 U.S. 351, 4 Otto 351, 24 L. Ed. 195 (1876)*. With the adoption of the Federal Rules of Civil Procedure the concept of "cause of action" has broadened beyond that of a single legal issue narrowly drawn in a writ. *See* 18 J. Wright, Miller & Cooper, Federal Practice and Procedure § 4407 n. 20. The scope of preclusion has necessarily expanded with the definition of "claim" or "cause of action." *Id*.

[5]** The exact contours of claim preclusion are a subject of much discussion and disagreement. *See Id*., 18 J. Moore, Moore's Federal Practice para. 0.410[1]. The Restatement (Second) of Judgments (1982) adopts a "transactional" definition of the scope of issue preclusion:

> The present trend is to see claim in factual terms and to make it coterminous with the transaction regardless of the number of substantive theories, or variant forms of relief flowing from those theories, that may be available to the plaintiff; regardless of the number of primary rights that may have been invaded; and regardless of the variations in the evidence needed to support the theories or rights. The transaction is the basis the litigative unit and may not be split.

Restatement (Second) § 24 Comment a.

A number of other approaches to the preclusive scope of an earlier action have evolved in the case law. These include:

-- Whether the actions are based on identical grounds.
-- Whether the factual basis of both claims is the same.
-- Whether the essential facts and issues have been similarly presented in both cases.
-- Whether the same right is infringed by the same wrong.

-- **[**6]** Whether the wrong for which redress is sought is the same in both actions.
-- Whether the two actions are so similar that a different judgment in the second would destroy or impair rights or interests established in the first.

21 Federal Procedure Lawyers Edition § 51:201.

The Court of Appeals for the First Circuit has articulated a position closer to the broad restatement view. [2] *Isaac v.* ***[*235]*** *Schwartz, 706 F.2d 15 (1st Cir.1983)*, *Lovely v. Laliberte, 498 F.2d 1261 (1st Cir.1974)*. In *Lovely*, the Court of Appeals held that a state court action for possession barred a subsequent § 1983 action because the parties were the same and concerned the same "operative nucleus of fact." *Id. at 1263*. In *Isaac* the Court went further in its analysis:

---

[1] In this area of law both courts and commentators have been inconsistent in their use of terminology. For purposes of clarity, I use the term "claim preclusion" to describe the preclusive effect of a judgment on the merits between parties or their privies in the same cause of action. "Issue preclusion" or "collateral estoppel" describes the preclusive effect of a prior judgment on an issue of law or fact in a different cause of action involving a party. "*Res judicata*" is a general term which applies to both types of preclusion.

[2] Because the prior actions in *Schwartz, Roy* and *Lovely* took place in state courts, state *Res Judicata* principles were applied. In *Schwartz* the Circuit court described the Massachusetts approach as "perfectly traditional," *Id*. at *706 F.2d at 17*, citing *Angel v. Bullington, 330 U.S. 183, 67 S. Ct. 657, 91 L. Ed. 832 (1947)*.

> Given the initial dismissal, the issue before us is simply whether the new complaint grows out of the same transaction or series of connected transactions (*Restatement (Second) of Judgments § 24*) as the old complaint. If so, the fact that appellant now asserts new legal theories . . . does not help him.

Supra at 17. Recently the Court of Appeals reaffirmed this approach in *Casagrande v. **[**7]** Agoritsas, 748 F.2d 47 (1st Cir.1984)*.

I note that plaintiff Manego alleges facts in this antitrust action which are strikingly similar to those in *Manego II*. The present complaint differs only in that it names additional defendants (the Board of Trade), and alleges that the Bank planned to offer entertainment at its facility similar to that which plaintiff Manego would have provided at his disco.

The plaintiff argues that because he did not learn of the Bank's plans until three days before summary judgment was granted, his action, based upon this new knowledge, is not barred. The plaintiff further argues that because a reference to Mr. Willard's status as president **[**8]** of the Board of Trade was stricken from the *Manego II* pleading on defendant Bank's motion, the antitrust issues could not have been raised in the earlier proceeding.

Despite the plaintiff's contentions it is apparent that the present case concerns the same transaction or nucleus of fact that was adjudicated in *Manego II*. The mere fact that plaintiff failed to discover the Bank's plans until shortly before a final judgment does not affect its preclusive effect. [3] ***HN2***[] A judgment bars all claims prior to its entry. *Lawlor v. National Screen Service, 349 U.S. 322, 328, 75 S. Ct. 865, 868, 99 L. Ed. 1122 (1955)*. Given the discovery and amendment provisions of the Federal Rules of Civil Procedure, plaintiff certainly could have obtained the necessary evidence to litigate his alternate theory in the first proceeding. Finally, the addition of new defendants in a subsequent action does not affect the preclusive effect of the judgment as to the original parties. *E.g. Scarpa v. Fair*, C.A. No. 82-2333, slip op. at 7 (D.Mass. April 11, 1983).

[9]** Accordingly, I rule that plaintiff's action against defendants Cape Cod Five Cents Savings Bank and David Willard is barred, and also rule that those defendants are therefore entitled to summary judgment.

DEFENDANT ORLEANS BOARD OF TRADE

The Board of Trade moves for summary judgment on the following grounds: that the doctrine of *res judicata* bars the present action, that there is no genuine issue of material fact relating to the allegations of conspiracy, and that the alleged conduct had no adverse effect on interstate commerce.

Because the Board of Trade was not a party to *Manego II*, claim preclusion principles do not bar the present action. Furthermore, those members of the Board of Trade who were parties to the prior action may not rely on claim preclusion insofar as they are presently named as defendants in a different capacity. 1B J. Moore, Moore's Federal Practice para. 01411[3]. ***HN3***[] **[*236]** Issue preclusion, on the other hand, may bar relitigation of issues actually litigated and necessary to a prior judgment in a different cause of action, and may be asserted defensively by a stranger to the original action. *Parklane Hosiery v. Shore, 439 U.S. 322, 99 S. Ct. **[**10]** 645, 58 L. Ed. 2d 552 (1979)*. Accordingly, the Board of Trade argues that the plaintiff should be estopped from relitigating the issue of conspiracy, claiming that it was resolved in favor of the defendants in *Manego II*.

Even an express finding that there was no conspiracy among the defendants in *Manego II* would not bar the present case. Because the Board of Trade was not a party to the earlier action the existence of a conspiracy involving the Board was not before the Court. I rule, therefore, that the prior judgment has no preclusive effect on this aspect of the present case.

---

[3] The complaints in *Manego I* and *Manego II* both allege that an entertainment license was issued to the Bank after the denial of Mr. Manego's application. Plaintiff claims only that he did not know what the Bank's plans were for the licensed premises. Moreover, the events which plaintiff complained of took place primarily in the summer of 1979, years before judgment was entered.

The defendant's claim that there is no genuine issue of material fact is inexorably tied to what is commonly known as the *Noerr-Pennington* doctrine. *See Eastern Railroad Presidents Conference v. Noerr Motor Freight Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers of America v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*. ***HN4***[] Generally stated, this doctrine exempts, with certain exceptions, concerted attempts to influence the passage or enforcement of laws from the sweep of antitrust legislation regardless of anticompetitive intent.

On the **[**11]** face of plaintiff's complaint, it is apparent that the allegations which relate to the Board of Trade involve attempts to influence governmental entities. Therefore, *Noerr-Pennington* applies unless the activity falls within one of the exceptions to the doctrine.

The complaint sets forth the following allegations. David Willard, an employee of the Bank and President of the Board of Trade, enlisted the "conspiratorial aid and assistance" of the members of the Board to "conduct sham opposition" to Manego's applications. He was assisted in so doing by a majority of the Board of Selectmen acting as members of the Board of Trade, who also exerted pressure on members of the Board to block the plaintiff's plan to operate a disco in Orleans. The purpose of this plan was to assure that the plaintiff's proposed disco would not be in a position to compete with the Bank, which planned to offer similar entertainment at the arena near plaintiff's site. In January 1979, the Board of Trade, at a meeting chaired by Willard and attended by two of the three Orleans selectmen, unanimously voted to oppose the plaintiff's license applications. Subsequently, Willard reported this vote to the full Board **[**12]** of Selectmen during the January 11 hearing on plaintiff's license applications. Approximately 100 persons attended the meeting, many as a result of the defendants plan to oppose the applications.

The Board of Selectmen denied plaintiff's application for a liquor license on February 8, 1979, and on February 14, 1979 held a hearing on the amusement license application. After conducting a traffic study which was intended only as a spurious excuse for denying the application, the selectmen denied the amusement license application, unlawfully, on the basis "of noise and traffic considerations." The subsequent development of some twenty-five businesses in the area, plus the issuance of an entertainment license to the Bank's arena, attest to the spurious nature of the selectmen's reasons for denial. Furthermore, intersections in the area have been improved and upgraded to handle this increased traffic.

In support of motions for summary judgment, defendants have resubmitted the affidavits of Herbert Wilcox, chairman of the Board of Selectmen, David Willard, and Charles Darling, a salesman at Nickerson Lumber Company, as well as excerpts from depositions of Willard, the plaintiff, and Paul **[**13]** Thiebert. Although several of the affidavits were presented for the earlier litigation in *Manego I* and *Manego II*, they are nevertheless pertinent to the issues in this case.

[*237] Herbert Wilcox states in his affidavit that he voted against the issuance of license because of the "likelihood of increased traffic hazards and noise pollution" and "gave some weight to the overwhelming sentiment of the citizens who [opposed the disco] and to the traffic committees report." As to the issuance of a similar license to the arena, Wilcox stated that the rink held a similar license previously which had not been renewed because of an oversight. He voted for issuance because of the rinks proven "benefits to the community" and because it had never caused inconvenience or concern.

Mr. Willard's affidavit states unequivocally that "I have never had, and, to my knowledge, no other Bank employee has had private conversations with any of the Selectmen concerning the proposed disco while Mr. Manego's applications . . . were under consideration," and "Nor did I . . . or the Bank conspire with Orleans officials to deny Mr. Manego the requested licenses [for] improper reasons."

Mr. Willard **[**14]** testified at deposition that two of the Selectmen were members of the Board of Trade, but did not recall if they were present at the meeting when the disco was discussed. He further testified that he did not urge members to attend the license hearing, and that he was, at the time, an officer of the Bank. A discussion was held as to the desirability of the disco, and all but two of the 70-75 persons present opposed the project. The next day, Willard attended the license hearing, and, as president of the Board of Trade, informed the selectmen of the vote.

Paul Thibert, who managed the rink for the Bank, testified at deposition that there was never any "discussion of any threat of competition [from Mr. Manego]" among the Bank or Board of Trade.

The substance of the materials offered by the defendants is that the selectmen denied the plaintiff's license applications for permissible reasons, that there were no private conversations between Willard and the Selectmen, and that there was no discussion between the Bank and the Board of Trade regarding Mr. Manego's disco as a potential competitor. These are denials of conspiracy from a selectman, the President of the Board of Trade, and **[**15]** an Officer and an employee of the Bank.

In support of his allegations, the plaintiff has produced several affidavits, extracts from depositions, and other evidence. The supplementary affidavit of Roger Hurlich, a builder reaffirms his earlier affidavit to the effect that the Bank had pressured Nickerson Lumber Company not to sell building supplies to Manego for the proposed disco. Even if taken as true, this evidence is not probative as to any conspiracy involving the Board of Trade. In response to an interrogatory requesting facts to support the allegations of conspiracy, the plaintiff answered, "The meetings of the Board of Trade with David Willard as President held in January, February and subsequently in 1979, as set forth in the minutes of said meetings, and as testified to in deposition by David Willard." These materials reveal only that meetings were held, that two selectmen may have attended, and that the disco project was discussed and voted upon. When asked at deposition for the basis of his allegations of a conspiracy involving the selectmen, the plaintiff responded that "any time the selectmen attend a meeting and they were a member of the board of trade, that was illegal. **[**16]** That's conspiracy." The plaintiff did testify that an unidentified person had told him that officials of the Bank, Board of Trade and Board of Selectmen had met to oppose the disco, but he does not know the mans name. When asked what the Board of Trade did that was wrong, he said, "it was wrong for them to come out against me in opening a business."

The materials under consideration must be evaluated in light of the particular requirements of the substantive law in this area, i.e. whether there is a genuine issue of material facts which would allow the plaintiff to recover under an exception to the *Noerr-Pennington* doctrine. The plaintiff contends that two exceptions apply: the so-called "sham" and "conspiracy" **[*238]** exceptions. ***HN5***[] The former, developed in a line of cases beginning with *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*, applies where a party seeks not to influence public officials, but to "bar their competitors from meaningful access to adjudicatory tribunals and so to usurp the decisionmaking process." *Id. at 512, 92 S. Ct. at 612*. *Trucking Unlimited* concerned a series of "baseless repetitive **[**17]** claims" designed "to discourage and ultimately to prevent the [plaintiffs] from invoking the processes of the administrative agencies and courts," *Id. at 512, 92 S. Ct. at 612*. Subsequent developments have held that this exception also applies to a single suit filed for an improper purpose, such as generating publicity unfavorable to a competitor. *E.g., Energy Conservation v. Heliodyne, 698 F.2d 386 (9th Cir.1982)*. Activity disguised as petitioning which is simply an effort to interfere directly with a competitor is not protected under Noerr-Pennington. *Clipper Exxpress v. Rocky Mountain Motor Tariff Bureau, 690 F.2d 1240 (9th Cir.1982)*, *cert. denied*, *459 U.S. 1227, 103 S. Ct. 1234, 75 L. Ed. 2d 468*. Other types of activity which fall within the "sham" exception are misrepresentation, *Israel v. Baxter Laboratories, Inc., 151 U.S. App. D.C. 101, 466 F.2d 272, 275-79 (D.C.Cir.1972)*; and threats or coercive measures to influence state officials, *Sacramento Coca-Cola Bottling Co. v. Teamsters Local 150, 440 F.2d 1096* (9th Cir.), cert. denied, *404 U.S. 826, 92 S. Ct. 57, 30 L. Ed. 2d 54 (1971)*. In order for the "sham" exception to apply:

> What is needed **[**18]** . . . is proof that the lobbyists subverted the integrity of the governmental process, that they effectively barred [the plaintiffs] access to these processes, or that the nature of these processes made their invocation something other than the "political activity" that was recognized by the *Noerr-Pennington-Trucking Unlimited* line of cases to be beyond the scope of the Sherman Act.

Federal Prescription Service v. American Pharmaceutical Ass'n, 214 U.S. App. D.C. 76, 663 F.2d 253, 262-63, (D.C.Cir.1981), *cert. denied*, *455 U.S. 928, 102 S. Ct. 1293, 71 L. Ed. 2d 472 (1982)*.

The plaintiff points to a suit filed by the Bank in opposition to the Selectmen's grant of a Building permit to Mr. Monego as such a "sham" abuse of process. He offers no evidence, or even the promise of evidence, that this suit was anything other than protected activity. Even with all inferences drawn most favorably to the plaintiff, there is no indication of misconduct which would rise to the level necessary to invoke the "sham" exception to *Noerr-Pennington*. At the core of this deficiency is the plaintiff's failure to produce any evidence that the lawsuit was instituted for an unlawful **[**19]** purpose. The fact that the suit was subsequently, withdrawn after the Bank's purported sale of the arena does not support an inference that the object of the suit was unlawful. Moreover, the "sham" was allegedly perpetrated by the Bank, and not the Board of Trade. Therefore, absent evidence that the Board of Trade conspired with the Bank as to this allegedly "sham" suit, it is irrelevant to the issue of the Board's immunity under Noerr-Pennington. The plaintiff has not offered such evidence, nor has he even alleged that a conspiracy existed with regard to the suit.

The plaintiff further contends that this case falls into the "sham" exception because he was deprived of "meaningful access" to governmental entities because his experience with those entities has "been replete with animosity and conflicts of interest." In his argument, plaintiff relies heavily upon *Clipper Exxpress v. Rocky Mountain Motor Tariff, 690 F.2d 1240 (9th Cir.1980)*, where summary judgment for defendants was reversed on appeal. That case is distinguishable from the present action in that the *Clipper* defendants admitted, for the purpose of summary judgment, that they had engaged in a conspiracy to file **[**20]** baseless protests for the sole purpose of eliminating competition. *Id. at 1250-51*. The Board of Trade has made no such admissions. Rather, its president has testified that the Board of Trade merely sponsored a discussion of the project and **[*239]** reported this discussion to the licensing authority at a public hearing. All that the plaintiff is able to show as to his experience with the Board of Selectmen is that he was unsuccessful in his repeated attempts to obtain the necessary licenses.

It is clearly established that ***HN6***[] conduct genuinely intended to influence governmental action is immune from the sweep of ***antitrust law*** and that whether the effort is genuine or a sham is an issue of fact. *Id. at 1253*. Here, the plaintiff has produced no evidence in opposition to the defendants' affidavits and deposition testimony to show, or to raise an inference, that the Board of Trade engaged in anything other than protected petitioning before the Board of Selectmen. ***HN7***[] A party opposing a motion for summary judgment may not rest on mere allegations, but must set forth specific facts showing that there is a genuine issue for trial. *Fed.R.Civ.P. 56(e)*. I rule that the plaintiff has failed **[**21]** to do so.

Alternatively, the plaintiff invokes ***HN8***[] the "conspiracy" exception to *Noerr-Pennington* which applies where government officials participate with private individuals in a scheme to restrain trade. *E.G.* *Duke & Co. v. Foerster, 521 F.2d 1277 (3rd Cir.1975)*. In support of this contention, the plaintiff relies upon the fact that two of the three members of the Board of Selectmen were also members of the Board of Trade, and that they were present at the Board of Trade meeting when Mr. Manego's proposal was discussed, and that other businesses were subsequently licensed in the same area.

HN9[] Generally, summary judgment is inappropriate in cases involving conspiracy claims because the existence or nonexistence of a conspiracy is essentially a factual issue to be decided by the jury. *Adickes v. S.H.* *Kress, 398 U.S. 144, 176, 90 S. Ct. 1598, 1618, 26 L. Ed. 2d 142 (1970)*. Summary judgment may also be inappropriate in antitrust cases where "motive and intent play leading roles." *Poller v. Columbia Broadcasting System, 368 U.S. 464, 472, 82 S. Ct. 486, 490, 7 L. Ed. 2d 458 (1962)*. There are, however, exceptions to the general rule. Where a moving party in an antitrust conspiracy **[**22]** case has shown that the facts relied upon in the opposing party's allegations are not susceptible to the interpretation which he sought to give them, *Rule 56(e)* puts the burden on the opposing party to produce evidence in support of his allegations. *First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 289-90, 88 S. Ct. 1575, 1592-93, 20 L. Ed. 2d 569 (1957)*. Furthermore, a plaintiff may not rely upon the promise of evidence of conspiracy to be developed by cross-examination at trial. *Manego v. Cape Cod Five Cents Savings Bank, et al, 692 F.2d 174 (1st Cir.1982)*, *Hahn v. Sargent, 523 F.2d 461 (1st Cir.1975)*, *cert. denied*, *425 U.S. 904, 96 S. Ct. 1495, 47 L. Ed. 2d 754 (1976)*.

Without express evidence of a conspiracy involving the Orleans Selectmen, the plaintiff must rely on inferences which may be drawn from their presence at the Board of Trade meeting and their subsequent actions. In an analogous situation, the Court of Appeals for the District of Columbia found that membership in an association was not evidence that regulatory officials were parties to an anticompetitive conspiracy. *Federal Prescription Service v. American Pharmaceutical Ass'n **[**23]** , 214 U.S. App. D.C. 76, 663 F.2d 253 (D.C.Cir.1981)*, *cert. denied*, *455 U.S. 928, 102 S. Ct. 1293, 71 L. Ed. 2d 472 (1982)*. The regulatory officials in *Federal Prescription* were members of the state pharmacy boards, and also members of a national pharmacists association which was engaged in a program of lobbying before the state boards to oppose licensing of mail-order pharmacies. The court of appeals reversed the district court finding of conspiracy as "clearly erroneous" and ruled that the defendants were entitled to judgment as a matter of law under the *Noerr-Pennington* doctrine. *Id*.

Therefore, I find that the Selectmen's membership in the Board of Trade is not probative of conspiracy. In addition, the subsequent grant of an entertainment license to the arena has been explained as a legitimate exercise of licensing authority. The plaintiff has failed to introduce any evidence to contradict this assertion.

[*240] Finally, I note that ***HN10***[] the type of conspiracy which the plaintiff must show to escape the *Noerr-Pennington* Doctrine differs from that normally associated with antitrust litigation. Where the alleged conspirators are potential competitors or other **[**24]** market participants, conspiracy may be inferred from their market behavior, a situation which renders the determination particularly unsuitable for summary judgment. In this case the plaintiff alleges a conspiracy including governmental officials. Consequently, there is no market behavior to draw inferences from. Those facts which the plaintiff has submitted are either not probative as a matter of law or are explained by the unrebutted denials of parties to the alleged conspiracy.

I rule accordingly that even with all inferences drawn most favorably to the plaintiff, there is no genuine issue of material fact which, if proven by the plaintiff, would constitute an exception to the *Noerr-Pennington* Doctrine. Therefore, I rule that the defendants are entitled to judgment as a matter of law on the antitrust count. Because this disposes of the federal question portion of the case, the state law claims are dismissed.

Order accordingly.

Information Resources, Inc. v. A.C. Nielsen Co.

Opinion

[*126] JAMES B. PARSONS, UNITED STATES DISTRICT COURT JUDGE

MEMORANDUM OPINION AND ORDER

Marketing research service is the furnishing of usable statistical information to the manufacturers of various goods about the movement of consumer goods through the retailers to the consumer. The raw data from which this information is processed is obtained by counting. Counting here involves the use of sampling traditional to the concept of survey research. Counting can be done at several points along the path taken by the goods from the manufacturer to the consumer; at the manufacturer's shipping dock, at the entrance and exit docks of the distributors or warehousemen, at the entrance doors and in the store rooms of the retailer, at the place of the shelving or deshelving of the goods in the store of the retailer, at the check-out counter of the retailer, and indeed, at the shelving or deshelving of the goods in the consumer's house.

The statistics that can be developed from the raw data, and the uses to which they can be put, vary in meaning, in reliability and in usefulness to the producer, both **[**2]** in his production planning and his advertising planning, according to the point or combination of points at which the raw data is gathered, the frequency with which it is gathered, and the selectivity of the sampling used in the system.

The defendant in this case, one of the old and experienced firms in the field of sampling survey research has devoted one of its departments to the selling of marketing research services to consumer goods manufacturers (principally manufacturers in the food industry) for over thirty years. With a wide spectrum sampling base, its research statistics were relatively predictable nationally. It concentrated on using raw material gathered from storage room and shelf counts in the retailer's stores. It did not use the manufacturer or warehousemen's storage racks or docks for raw data, and it did not use data gathered from the consumer. For purposes of counting it used human beings; its own employees going into the stores, counting from their shelves and store rooms, equipped with pencils and pads. Its product delivered to its manufacturing customer has been a substantial bi-monthly publication and interim advisories called the Nielsen Food Index.

Recently, **[**3]** an innovation called scanning developed in the grocery store business, and particularly in the chain supermarkets for helping to speed along the long lines at the checkout counters, and for improving accuracy in cash register totalling. Now there has developed among manufacturers universal product codes which they place on packaged products at the time their products are packaged. Then at the checkout counter these codes are picked up by an electric reading lamp when the package of goods are scraped across a glass screen. The process is called scanning.

Scanning has revolutionized the whole field of retail-exit counting and is particularly adaptable to the field of marketing research of consumer goods. Now scanners not only can make computer read-outs **[*127]** for the store itself but the information can be transferred to the computers of businesses engaged in marketing research of consumer goods.

The plaintiff in this case was founded seven years ago for the express purpose of selling a research service to manufacturers, using the process of scanning. It has several research products, the most important of which are BehaviorScan and the Marketing Fact Book. Its founder and Chief **[**4]** Executive Officer described his business in these words:

> "IRI began selling BehaviorScan its first product, in 1979. BehaviorScan is a test marketing service. IRI has installed scanning equipment which is able to read the Universal Product Codes (UPC) on packaged grocery products at the checkout facilities in supermarkets representing approximately 90% of the total supermarket sales volume in each of eight markets. IRI also has assembled consumer panels consisting of approximately 2,500 households in each market. By using this scanning equipment and IRI's computerized data collection system, IRI gathers household-by-household data on the purchasing behavior of its consumer panels, as well as data on the total sales of all UPC coded packaged goods made by the participating supermarkets. These data are used to analyze consumer response to new products, advertising, pricing strategies and other marketing techniques employed by manufacturers and distributors of packaged consumer goods.
>
> "Each of IRI's eight markets has cable television. IRI is able to direct alternate television advertising to its consumer panel households. Together with IRI's scanning data collection capability, **[**5]** this permits the measurement of direct consumer response to television advertising. IRI also administers, supervises and performs product test marketing and various other merchandising activities on behalf of its clients in each of the eight markets.
>
> "IRI developed and in 1981 began selling its second major product, the Marketing Fact Book (MFB). The MFB constitutes a separate and distinct application of IRI's scanning data base. Whereas BehaviorScan is essentially a test marketing service, the MFB tracks weekly sales results together with reports on ad features, store displays, shelf price reductions, coupons and other "causal" marketing information. These data enable packaged goods manufacturers to measure the effect of price changes and promotions on sales. The MFB data base also contains demographic data which permit manufacturers to determine the types of customers who are buying their products.
>
> "The MFB is issued in hard copy quarterly and annually, but its real value lies in the fact the the MFB data base is directly accessible by computer. IRI's clients can therefore use the vast MFB data base to perform frequent and timely analyses of product sales performance and **[**6]** measure the effect of price changes and promotions on sales. "

There are several other market research service companies which have been coming into this business during the last few years, using one type or another data base in an effort to produce a distinctive service product, but none of them including the plaintiff here has developed anything near the size of the defendant. One of them appeared by witness to testify on behalf of the plaintiff in this first case testing the products of marketing research in the scanner computer age. Several years ago, even Nielsen began experimenting with the use of scanner data in place of manual audit procedures, and set up two programs; one called Local Markets and one called National Markets.

What ignited this case, which, incidentally began with a Petition for a Temporary Restraining Order that enlarged to a Petition for a Preliminary Injunction, was the announcement in June of this year by Nielsen of its intention to dive full force into the use of scanners and scanner data while retaining as long as necessary its now antiquated **[*128]** system of manual audit, providing as the system developed more custom tailored research information **[**7]** for the manufacturer, standardizing research information output on a two week or semi-monthly basis instead of a bi-monthly basis, and providing in due course of time feed back information directly to the retailer. The defendant calls the program which was scheduled to get underway on November 1, 1984, an Enhanced Nielsen Food Index, and outlines what it calls a Transition Period of two to four years, beginning on November 1st.

Because of the alleged threat this poses to the business growth plans of the plaintiff, plaintiff has asked this court to stop Nielsen forthwith, and uses as the basis for the position it takes the "tying concept" of the Anti-Trust Laws. Plaintiff says that defendant is tying its new product to the old product over which it has exercised extensive economic power for many years and that this action is in Restraint of Competition, conduct proscribed by Section I of the Sherman Act. The language plaintiff seeks in the injunction describes distinctly the nature of this case:

> ". . . that Nielsen, its officers, agents, servants, employees and persons acting under its direction and authority or in concert with it are hereby enjoined and restrained from selling **[**8]** Nielsen Food Index (NFI) audit data, information generated from such data and/or consulting services relating thereto . . . on condition that purchasers also buy from Nielsen scanner data, information generated from scanner data and/or consulting services relating thereto. Nothing herein shall prevent Nielsen from selling scanner data separate and apart from audit data."

The key to this case is the answer in each instance to the question "when in this new and still developing industry is a product a new one or merely an improvement of an older one?" This question must first be answered because of the defendant's Motion to Dismiss based on the ground that the plaintiff lacks standing to sue; i.e., that the plaintiff is not in competition with the defendant. Defendant urges that plaintiff's product deals with consumer behavior whereas defendant's product deals exclusively with the movement of grocery items across the facilities of the retailer store. As has been stated before, the products we are dealing with are not the raw data nor the method of collecting it. The products are refined residuum of such raw data, refined by computer and programmed analysis, with reasoned explanations **[**9]** and projections made available periodically to the manufacturers of the food items we all of us eventually purchase in the stores.

It appears from the evidence that some part of plaintiff's distributed product includes information that is unique because plaintiff is in a position to translate for its customers facts about the purchasing and consuming practices and habits of consumers and their behavior patterns that can be processed or inferred from sales data supplied by consumers who agree to serve as "guinea pigs" for the plaintiff. At the same time, plaintiff is engaged in gathering and processing data from the stores themselves.

The statutory provision relevant to the issue of standing is section 16 of the Clayton Act, *15 U.S.C. § 26*. ***HN1***[] To establish standing under section 16, the plaintiff must show a "threatened loss or damage by a violation of the antitrust laws." Unless the products are competitive or potentially competitive, there can be no threatened loss or damage. In this relatively new and rapidly expanding industry, the concept of the product must not be drawn too narrowly. Simply because one company might measure only eight markets and another might measure hundreds **[**10]** of markets does not mean that the two companies do not compete now or will not compete in the future as the smaller company grows. Similarly, just because one company uses its raw data to provide a certain type of marketing information, say consumer behavior information, and another company uses its raw data to provide a different type of marketing information, say market share information, does not mean that **[*129]** those companies would not be potential competitors as their products grow and change with advances in technology. The concept of the product here must be painted with a broad brush. Both IRI and A.C. Nielsen provide information to manufacturers on product movement. The details of market share, market size, consumer profiles, etc. are merely small components of an overall picture given to a manufacturer to assess how its product is being received in the market place. To draw the line based on these details seems to be asking too much. Therefore, I find that on the issue of standing there is potential competition. Even at this time there is some actual competitive overlap in the area of pricing and promotional analysis, even though the analysis in those areas is reached **[**11]** by different procedures. As the products and data gathering techniques advance technologically there will continue to be potential competition in other areas as well. For these reasons, the case cannot be dismissed for lack of standing to sue.

I turn now to the plaintiff's request for a preliminary injunction. ***HN2***[] When a district court is asked to issue a preliminary injunction it should consider four factors: (1) whether the plaintiff will have an adequate remedy at law or will be irreparably harmed if the injunction does not issue; (2) whether the threatened injury to the plaintiff outweighs the threatened harm the injunction may inflict on the defendant; (3) whether the plaintiff has a reasonable likelihood of success on the merits; and (4) whether the issuance of the injunction will serve the public interest. *Libertarian Party v. Packard, 741 F.2d 981, 984 (7th Cir. 1984)*.

The first factor boils down to whether damages can be ascertained in monetary terms. I am unconvinced by plaintiff's assertion that damages would be unreasonably difficult to calculate. If necessary IRI can survey any customer which leaves them and see if they went to A.C. Nielsen for marketing research analysis. **[**12]** Alternatively, IRI could poll every new customer or even each existing customer of Nielsen and see if these customers would have used the services of IRI were it not for the enhancement in Nielsen's product. In short, damages are ascertainable.

The second factor also favors Nielsen. If a preliminary injunction were to issue at this time, it would cause Nielsen's $25 million in improvements to be held in abeyance. Customers would have to be apprised of the injunction and contracts would have to be halted or rewritten. If on the other hand, an injunction were not issued and this were later found to have been erroneous, the harm to IRI could be calculated in damages and any long-term contracts between Nielsen and its customers could be halted at that time. Thus, the injury to the defendant, if an injunction were to issue, would outweigh the injury to the plaintiff if such an injunction were not issued.

The third factor is the critical factor in this case. The plaintiff must prove a reasonable likelihood of success on the merits. In order to prove this likelihood of success, the plaintiff must show the court that there is a reasonable probability that the elements of a tying violation **[**13]** would be established at a trial on the merits. ***HN3***[] The elements of a tying violation which the plaintiff must show are: (1) two separate products or services; (2) substantial market power in the tying product; (3) use of Nielsen's market power in the tying product to coerce sales of the tied product and; (4) foreclosure of sales by competitors in the tied product market. *Jefferson Parish Hospital District No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 1556-56, 80 L. Ed. 2d 2 (1984)*.

The basis on which all four factors must rest is whether there are two separate products, for without a "tying" and a "tied" product the last three factors are meaningless. It is this single factor on which plaintiffs have not shown a convincing case at this time. A. C. Nielsen provides its customers with marketing information. The data gathering method it has used for years has involved manual audits. Now, to take advantage of advanced technology, **[*130]** it is using scanners to gather the same data. This advance in technology will allow the data to be gathered more quickly and more economically. Admittedly, because of the increase in speed with which Nielsen is able to receive the data, other types **[**14]** of marketing analysis will be possible. The product must be viewed broadly, as stated earlier. It cannot be broken down into each miniscule type of analysis but rather must be looked at as an overall service. This broad view of the product which allows the plaintiff to have standing works against the plaintiff on the question of whether there are two separate products. This new technique of data gathering is a product improvement. The data generated by scanners and the data generated by manual audits may be used separately and in conjunction with each other during this time of transition.

> "The practice has been to classify a product as a single product if there are obvious economies of joint provision, as in the left-shoe-right-shoe example. " *Jack Walters & Sons v. Morton Building Inc., 737 F.2d 698, 703 (7th Cir. 1984)*.

Here, there are obvious economies of joint provision during this time.

> "Very few products today are produced like a statue that is made by pouring molten bronze into a cast --the ultimate single product. But to hold therefore that every composite product is a tie-in, subject to the hostile scrutiny to which ***antitrust law*** still subjects **[**15]** tie-ins, would place industry under a vast antitrust cloud and has been rejected." *Id*.

A different approach to the question of separate products was taken in the *Jefferson Parish* case where the Supreme Court held that ***HN4***[] products are separate for tie-in purposes if there are separate markets for each product. *104 S. Ct. at 1562-63*. Here, Nielsen has been losing NFI customers apparently because of the outmoded method of data gathering which results in a greater delay from the time of data gathering to the time of the release of the marketing information. It is to keep up with the customer demands for the use of the new technology that Nielsen is attempting to improve its product in this way. Customer demand, whether overt or implied by loss of customers to a scanner-based service such as SAMI, shows that it is the same market demanding the improved service.

> "The answer to the question whether petitioners have utilized a tying arrangement must be based on whether there is a possibility that the economic effect of the arrangement is that condemned by the rule against tying -- that petitioners have foreclosed competition on the merits in a product market distinct from **[**16]** the market for the tying item." *Jefferson Parish v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 1563, 80 L. Ed. 2d 2 (1984)*.

Here, the markets are not clearly distinct. Realistically, the product must not be reduced to its smallest elements merely to create separate markets.

In sum, the plaintiff has not yet shown a convincing case that there is a reasonable likelihood of success on the merits because it has not been able to show that the enhanced NFI is a product or service separate from the NFI as it had existed through the use of manual audits only.

I turn now to the final factor to be considered in the issuance of a preliminary injunction: whether the issuance of such an injunction will serve the public interest. IRI is currently the leader in scanning-generated market research information. IRI is expanding into larger market areas and I have some concern that this request for a preliminary injunction is to "buy time" so that that expansion can proceed without interference. This, of course, would not be a proper use of the antitrust laws. For these reasons and because it appears unlikely that a tying case can be made out at this time, I find that the issuance of a preliminary **[**17]** injunction would not serve the public interest.

The plaintiff's request for a preliminary injunction is denied at this time. The parties may choose to request the court to certify this case before proceeding with further discovery and preparation for trial.

LexisNexis® Headnotes

Antitrust & Trade Law > Sherman Act > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

HN1[] **Antitrust & Trade Law, Sherman Act**

To find an unlawful restraint, the court looks at the accused company as if it were a "third force, " intervening in the marketplace in a manner that prevents willing buyers and sellers from independently coming together to strike price/quality bargains.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Compliance > ... > Industry Practices > Federal Regulations > Antitrust Regulations

HN2[] **Antitrust & Trade Law, Sherman Act**

An insurer may lawfully engage in the buying of goods and services needed to make the insured whole.

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] Antitrust & Trade Law, Sherman Act

Courts forbid an organization from buying a good or service in cases where the buyer is a "sham" organization seeking only to combine otherwise independent buyers in order to suppress their otherwise competitive instinct to bid up price.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

Insurance Law > Claim, Contract & Practice Issues > Premiums > Refunds

HN4[] Price Fixing & Restraints of Trade, Horizontal Market Allocation

Courts generally approve of contracts in which those who directly provide goods or services to insureds have agreed to cap or forego completely additional charges to those insureds in return for direct payment by the insurer.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN5[] Actual Monopolization, Anticompetitive & Predatory Practices

Antitrust laws interfere with a firm's freedom to set even uncompetitive prices only in special circumstances, where, for example, a price was below incremental cost. Such a "predatory" price harms competitors, cannot be maintained, and is unlikely to provide consumer benefits.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] Monopolies & Monopolization, Actual Monopolization

Mere monopoly pricing is not a violation of the Sherman Act. *15 U.S.C.S. § 2*. More than monopoly power is necessary to make the charging of a noncompetitive price unlawful.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Evidence > Burdens of Proof > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] Monopolies & Monopolization, Actual Monopolization

Where a monopoly is unlawful, antitrust courts typically seek to change the market's structure, to break up or render impotent the monopoly power that violates the Sherman Act, *15 U.S.C.S. § 2*. Courts only rarely try to supervise the price bargain directly. And, where monopoly power is regulated, the regulator, not the court, bears the burden of determining whether prices are reasonable.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN8[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Normally the choice of what to seek to buy and what to offer to pay is the buyer's. And, even if the buyer has monopoly power, an antitrust court (which might, in appropriate circumstances, restructure the market) will not interfere with a buyer's non-predatory determination of price.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN9[] **Monopolies & Monopolization, Actual Monopolization**

A legitimate buyer is entitled to use its market power to keep prices down.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Healthcare Law > Business Administration & Organization > Covenants not to Compete > Employer & Physician Covenants

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

HN10[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

A horizontal agreement among competitors is typically unlawful because the competitors prevent themselves from making independent decisions about the terms as to which they will bargain.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN11[] **Price Fixing & Restraints of Trade, Horizontal Market Allocation**

The unlawfulness of a horizontal agreement does not necessarily depend upon the undesirability of the contractual term as to which competitors agree not to compete.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN12[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

A buyer, as well as a seller, can possess significant market power; and courts have held that agreements to fix prices -- whether maximum or minimum -- are unlawful.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN13[] **Public Enforcement, State Civil Actions**

Strict antitrust scrutiny is less likely to be necessary to prevent the unwarranted exercise of monopoly power where the price system at issue is one supervised by state regulators.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN14[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

A firm generally has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently.

Opinion

[*923] BREYER, Circuit Judge

Blue Shield pays doctors for treating patients who are Blue Shield health insurance subscribers, but only if each doctor promises not to make any additional charge to the subscriber. The basic issue in this case is whether this Blue Shield practice -- called a "ban on balance billing" -- violates either Sherman Act *§ 1* forbidding agreements "in restraint of trade," *15 U.S.C. § 1*, or Sherman Act *§ 2* forbidding "monopolization" and "attempts to monopolize," *id. § 2*. The district court, *582 F. Supp. 734 (D. Mass. 1984)*, held that the practice constituted an unreasonable restraint of trade in violation of *section 1*. We conclude that the practice does not violate either section of the Sherman Act; and we reverse the district court.

As the district court noted, the relevant facts are **[**3]** "not . . . generally . . . disputed." Blue Shield provides health insurance for physician services while its sister, Blue Cross, insures against hospital costs. The consumers of Blue Shield insurance, at least those who buy "full service" prepaid medical benefits, can see any "participating doctor," *i.e.*, a doctor who has entered into a standard Participating Physician's Agreement with Blue Shield. (If a doctor has not signed the Agreement, Blue Shield will reimburse him only if he provides emergency or out-of-state services.) Under the standard agreement, a participating doctor promises to accept as payment in full an amount determined by Blue Shield's "usual and customary charge" method of compensation. The district court found that the method has evolved, through the use of various "capping" devices, towards payment of a "fixed fee, " determined by Blue Shield, for each particular type of service. Blue Shield pays this amount directly to the doctor; the patient pays nothing out of his own pocket and therefore receives no reimbursement.

[*924] The district court also found that Blue Shield provides some form of health insurance to about 56 percent of the Massachusetts **[**4]** population. (About 45 percent has coverage carrying a "balance billing " ban.) If one subtracts from the total population universe those Massachusetts residents who rely on government sponsored health care (*e.g.*, Medicare or Medicaid), then Blue Shield (and Blue Cross) provide insurance coverage for about 74 percent of the rest, namely those Massachusetts residents who *privately* insure against health costs. (About 23 percent of that group have coverage with commercial insurers; and about 4 percent subscribe to Health Maintenance Organizations.) Virtually all practicing doctors agree to take Blue Shield subscribers as patients and to participate in its fee plan. Blue Shield payments made under that plan account for about 13 to 14 percent of all "physician practice revenue."

The district court found that, because of the large number of subscribers, doctors are under "heavy economic pressure" to take them as patients and to agree to Blue Shield's system for charging the cost of their care. The court believed that the effect of this payment system, when combined with Blue Shield's size and buying power, was to produce an unreasonably rigid and unjustifiably low set of prices. **[**5]** In the court's view, the fact that doctors cannot charge Blue Shield subscribers more than the Blue Shield payment-schedule amounts interferes with the doctors' freedom to set higher prices for more expensive services and discourages them from developing and offering patients more expensive (and perhaps qualitatively better) services. For these and related reasons, the district court held that Blue Shield's ban on "balance billing " unreasonably restrains trade, and thereby violates Sherman Act *§ 1*. Blue Shield appeals from this holding. The plaintiff doctors cross-appeal from other rulings of the district court in Blue Shield's favor.

On these appeals, the parties raise a host of issues not directly related to the antitrust merits, including the claim that a recently enacted state law, Mass. St. 1984, ch. 192, *§ 1*, renders the case moot by immunizing Blue Shield's "balance billing ban" from the reach of the antitrust laws. The "mootness" issue, however, is not a simple one. And even if we accepted the mootness claim, the new statute may not immunize the defendants from treble-damage liability for past conduct. In view of these legal and practical problems, and the fact that **[**6]** this case has been pending in the federal courts for more than seven years, we believe it simpler and more appropriate to proceed directly to the antitrust merits, which, on our view of the case, are dispositive.

I

We disagree with the district court because we do not believe that the facts that it found show an unreasonable restraint of trade. We can best explain our reasons by first discussing the basic antitrust issue in general terms, then turning to the specific, detailed arguments advanced by the parties, and finally noting several special reasons here that militate against a finding of liability.

A

We disagree with the district court's finding of "restraint." ***HN1***[] To find an unlawful restraint, one would have to look at Blue Shield as if it were a "third force, " intervening in the marketplace in a manner that prevents willing buyers and sellers from independently coming together to strike price/quality bargains. ***Antitrust law*** typically frowns upon behavior that impedes the striking of such independent bargains. The persuasive power of the district court's analysis disappears, however, **[**7]** once one looks at Blue Shield, not as an inhibitory "third force, " but as itself the purchaser of the doctors' services. *See Group* *Life & Health Insurance Co. v. Royal Drug Co., 440 U.S. 205, 214, 59 L. Ed. 2d 261, 99 S. Ct. 1067 (1979)* (direct reimbursement to participating pharmacies for subscribers' drugs " merely [an] arrangement[] for the purchase of goods and services by Blue **[*925]** Shield"). ***Antitrust law*** rarely stops the buyer of a service from trying to determine the price or characteristics of the product that will be sold. Thus, the more closely Blue Shield's activities resemble, in essence, those of a purchaser, the less likely that they are unlawful.

Several circuits have held in antitrust cases that insurer activity closely analogous to that present here amounts to purchasing, albeit for the account of others. And, they have held that ***HN2***[] an insurer may lawfully engage in such buying of goods and services needed to make the insured whole. The Second **[**8]** Circuit has held lawful a Blue Shield plan requiring pharmacies to accept Blue Shield reimbursement as full payment for drugs they supply to Blue Shield subscribers. *Medical Arts Pharmacy of Stamford, Inc. v. Blue Cross & Blue Shield of Connecticut, Inc., 675 F.2d 502 (2d Cir. 1982)*. The Third Circuit has allowed a hospital cost insurer (Blue Cross) to reimburse hospitals directly (and apparently completely) for services to subscribers. *Travelers Insurance Co. v. Blue Cross of Western Pennsylvania, 481 F.2d 80* (3d Cir.), *cert. denied*, *414 U.S. 1093, 38 L. Ed. 2d 550, 94 S. Ct. 724 (1973)*. The Seventh Circuit has permitted auto insurance companies to furnish direct reimbursement to repair shops as payment for the repair services provided to policyholders. *Quality Auto Body, Inc. v. Allstate Insurance Co., 660 F.2d 1195 (7th Cir. 1981)*, *cert. denied*, *455 U.S. 1020, 72 L. Ed. 2d 138, 102 S. Ct. 1717 (1982)*.

At the same time, the facts before us are unlike those in cases where ***HN3***[] courts have forbidden an "organization" **[**9]** to buy a good or service -- cases in which the buyer was typically a "sham" organization seeking only to combine otherwise independent buyers in order to suppress their otherwise competitive instinct to bid up price. *Mandeville Island Farms, Inc. v. American Crystal Sugar Co., 334 U.S. 219, 92 L. Ed. 1328, 68 S. Ct. 996 (1948)* (horizontal price-fixing by purchasers held *per se* illegal); *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)* (same); *National Macaroni Manufacturers Association v. Federal Trade Commission, 345 F.2d 421 (7th Cir. 1965)* (competitors in trade association fixing quantity of scarce component to be used in macaroni held *per se* illegal). No one here claims that Blue Shield is such a "sham" organization or anything other than a legitimate, independent medical cost insurer. *But cf.* *Virginia Academy of Clinical Psychologists v. Blue Shield of Virginia, 624 F.2d 476 (4th Cir. 1980)* (Blue Shield found to be a combination, not of policyholders, but of *physicians*), *cert. denied*, *450 U.S. 916, 101 S. Ct. 1360, 67 L. Ed. 2d 342 (1981)*. **[**10]**

Once one accepts the fact that, from a commercial perspective, Blue Shield in essence "buys" medical services for the account of others, the reasoning underlying the Second, Third, and Seventh Circuit views indicates that the ban on balance billing is permissible. To understand that reasoning, consider some highly simplified examples. Suppose a father buys toys for his son -- toys the son picks out. Or suppose a landlord hires a painter to paint his tenant's apartment, to the tenant's specifications. Is it not obviously lawful for the father (the landlord) to make clear to the seller that the father (the landlord) is in charge and will pay the bill? Why can he not then forbid the seller to charge the child (the tenant) anything over and above what the father (the landlord) pays -- at least if the seller wants the buyer's business? To bring the example closer to home, suppose that a large manufacturing company hires doctors to treat its employees. Can it not insist that its doctors not charge those employees an additional sum over and above what the company agrees to pay them to do the job? In each of these instances, to refuse to allow the condition would disable the buyer **[**11]** from holding the seller to the price of the contract. Yet, if it is lawful for the buyer to buy for the third party in the first place, how can it be unlawful to bargain for a price term that will stick?

Given this argument, it is not surprising the courts have unanimously upheld contracts **[*926]** analogous in various degrees to the one at issue here -- ***HN4***[] contracts in which those who directly provide goods or services to insureds have agreed to cap or forego completely additional charges to those insureds in return for direct payment by the insurer. In addition to *Medical Arts* and *Travelers, supra*, see *Royal Drug Co. v. Group Life and Health Ins. Co., 737 F.2d 1433 (5th Cir. 1984)* ($2 cap on balance billing for drugs); *Webster County Memorial Hospital, Inc. v. United Mine Workers, 175 U.S. App. D.C. 392, 536 F.2d 419 (D.C. Cir. 1976)* (hospital agrees to ban on balance billing in exchange for direct payment by union trust fund); *Proctor v. State Farm Mutual Auto Insurance Co., 218 U.S. App. D.C. 289, 675 F.2d 308, 337 (D.C. Cir. 1982)* **[**12]** (auto repair shops agree to provide repairs at rate set by insurance company), *cert. denied*, *459 U.S. 839, 103 S. Ct. 86, 74 L. Ed. 2d 81 (1982)*; *Sausalito Pharmacy, Inc. v. Blue Shield of California, 544 F. Supp. 230 (N.D. Cal. 1981)*, *aff'd per curiam*, *677 F.2d 47* (9th Cir.) (cap on balance billing by participating pharmacies), *cert. denied*, *459 U.S. 1016, 74 L. Ed. 2d 510, 103 S. Ct. 376 (1982)*; *Feldman v. Health Care Service Corp., 562 F. Supp. 941 (N.D. Ill. 1982)* (same); *Pennsylvania Dental Association v. Medical Service Association of Pennsylvania, 574 F. Supp. 457 (M.D. Pa. 1983)*, *aff'd* *745 F.2d 248 (3rd Cir. 1984)* (ban on balance billing for dental services); *Michigan State Podiatry Association v. Blue Cross and Blue Shield of Michigan*, 1982-2 Trade Cas. (CCH) para. 64,801 (E.D. Mich. 1982); *Blue Cross and Blue Shield of Michigan, Inc. v. Michigan Association of Psychotherapy Clinics, Inc.*, 1980-2 Trade Cas. (CCH) para. 63,351 (E.D. Mich. 1980); *Davidowitz v. San Diego County Dental Society*, 1983-1 Trade Cas. (CCH) para. 65,231 (S.D. Cal. 1983). **[**13]** Scholarly commentators believe that these cases were correctly decided. *See, e.g.*, P. Areeda, *Antitrust Analysis* 530-31 (1981) ("It is difficult to see what could make [such an] arrangement anticompetitive"). *See also* Comment, 75 Nw. U.L. Rev. 506 (1980).

Two arguments might be made in an effort to distinguish these cases. First, the doctors may claim that Blue Shield is not, in essence, a buyer. Traditionally, doctors have opposed financial arrangements that involved the "selling" of their services to anyone but the patient. *See* Comment, 63 Yale L.J. 938, 978-80 (1954). And medical associations in the past sometimes have argued that selling services to third parties or related "corporate practice " might interfere with the absolute ethical obligation that a doctor owes to the patient. *Id.*, (citing, *e.g.,* AMA, Principles of Medical Ethics, ch. 3, art. 5, § 4). Medical associations have not, however, opposed reimbursement by third party insurers, such as Blue Shield, a fact that arguably suggests an important distinction between "insurance reimbursement " and "purchasing."

In our view, however, any such distinction is irrelevant **[**14]** for antitrust purposes. The relevant antitrust facts are that Blue Shield pays the bill and seeks to set the amount of the charge. Those facts led other courts in similar circumstances to treat insurers as if they were "buyers." The same facts convince us that Blue Shield's activities here are *like* those of a buyer. Whether for ethical, medical, or related professional purposes Blue Shield is, or is not, considered a buyer is beside the point. We here consider only one specific argued application of the antitrust laws and we do not suggest how Blue Shield ought to be characterized in any other context.

Second, the doctors seek to distinguish these precedents by pointing to an important district court finding either not present or not discussed in depth in these other cases. The district court here found that Blue Shield is a buyer with significant "market power " -- i.e., the power to force prices below the level that a freely competitive market would otherwise set. They argue that Blue Shield's "market power " makes a significant difference. We do not agree.

At the outset, we note that Blue Shield disputes the existence of significant "market power. " It points out that **[**15]** the district court relied heavily upon participation by 99 percent of all Massachusetts doctors in **[*927]** Blue Shield's program, as "prov[ing] . . . Blue Shield's economic power." But, Blue Shield says, this by itself proves little. Participating in Blue Shield's program does not stop doctors from taking other patients or from charging those other patients what they like. As long as Blue Shield's rates are even marginally remunerative, 99 percent of all doctors might sign up with Blue Shield if it had only ten policyholders or ten thousand instead of several million.

Blue Shield adds that the record does not prove the existence of the single harm most likely to accompany the existence of market power on the buying side of the market, namely lower seller output. *See* P. Areeda, *supra* at 343 n. 20; R. Posner, *Antitrust*, 5-14, 91-3 (1974). Indeed, here the district court found that the supply of doctors in Massachusetts has "increased steadily during the past decade." Blue Shield also claims that whatever power it possesses arises from its ability as an "expert" to prevent doctors from charging unknowledgeable patients *more* than a free (and informed) market **[**16]** price. *See generally* Comment, 75 Nw. U.L. Rev., *supra*.

On the other hand, several doctors testified that low prices discouraged them from introducing new highly desirable medical techniques. And, they argue that fully informed patients would have wanted to pay more for those techniques had they been allowed to do so.

To resolve this argument about the existence of market power -- an issue hotly debated by the expert economists who testified at trial -- would force us to evaluate a record that the district court described as "two competing mountains of mostly meaningless papers." Rather than do so, we shall assume that Blue Shield possesses significant market power. We shall also assume, but purely for the sake of argument, that Blue Shield uses that power to obtain "lower than competitive " prices.

We next ask whether Blue Shield's assumed market power makes a significant legal difference. As a matter of pure logic, to distinguish the examples previously mentioned one must accept at least one of the following three propositions: One must believe either (1) that the law forbids a buyer with market power to bargain for "uncompetitive" or "unreasonable" prices, or (2) **[**17]** that such a buyer cannot buy for the account of others, or (3) that there is some relevant difference between obtaining such price for oneself and obtaining that price for others for whom one can lawfully buy. In our view, each of these propositions is false, as a matter either of law or of logic.

First, the ***HN5***[] antitrust laws interfere with a firm's freedom to set even uncompetitive prices only in special circumstances, where, for example, a price was below incremental cost. Such a "predatory" price harms competitors, cannot be maintained, and is unlikely to provide consumer benefits. *Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d 227 (1st Cir. 1983)*. *Cf. United States v. Aluminum Co. of America, 148 F.2d 416, 437-438 (2d Cir. 1945)* (vertically-integrated aluminum monopolist cannot both charge an unreasonably high price for ingots *and* set a fabricated product price too low for competing fabricators to survive). Ordinarily, however, even a monopolist is free to exploit whatever market power it may possess when that exploitation takes the form of **[**18]** charging uncompetitive prices. As Professor Areeda puts it, ***HN6***[] "Mere monopoly pricing is not a violation of the Sherman Act." P. Areeda, ***Antitrust Law*** § 710 (Supp. 1982). The Second Circuit has recently held that "more than monopoly power is necessary to make the charging of a noncompetitive price unlawful." *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 297 (2d Cir. 1979)*, *cert. denied*, *444 U.S. 1093, 62 L. Ed. 2d 783, 100 S. Ct. 1061 (1980)*. *Cf. Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*.

The reasons underlying this principle include a judicial reluctance to deprive the lawful monopolist (say a patent monopolist) of its lawful rewards, and a judicial recognition of the practical difficulties of determining what is a "reasonable," or "competitive," price. *See* 2 P. Areeda & D. Turner, ***Antitrust Law*** §§ 512-14 (1978); 3 *id.* **[*928]** para. 710; R. Bork, *The Antitrust Paradox*, 125-29 (1978). As the Supreme Court stated in a different context,

> The **[**19]** reasonable price fixed today may through economic and business changes become the unreasonable price of tomorrow. . . . We should hesitate to adopt a construction making the difference between legal and illegal conduct in the field of business relations depend upon so uncertain a test as whether prices are reasonable -- a determination which can be satisfactorily made only after a complete survey of our economic organizations and a choice between rival philosophies.

United States v. Trenton Potteries Co., 273 U.S. 392, 397-98, 71 L. Ed. 700, 47 S. Ct. 377 (1927). Thus, ***HN7***[] where a monopoly is unlawful, antitrust courts typically seek to change the market's structure, "to break up or render impotent the monopoly power which violates the Act." *United States v. Aluminum Co. of America, 91 F. Supp. 333, 334 (S.D.N.Y. 1950)* (citing *Schine Chain Theatres, Inc. v. United States, 334 U.S. 110, 128-29, 92 L. Ed. 1245, 68 S. Ct. 947 (1948))*. *See also* *Standard Oil Co. of New Jersey v. United States, 221 U.S. 1, 55 L. Ed. 619, 31 S. Ct. 502 (1911)*. **[**20]** Courts only rarely try to supervise the price bargain directly. 3 P. Areeda & D. Turner, *supra*, para. 710 n. 2. *Cf.* *United States v. Glaxo Group Ltd., 410 U.S. 52, 35 L. Ed. 2d 104, 93 S. Ct. 861 (1973)* (ordering compulsory patent licensing "at reasonable charges"). And, where monopoly power is regulated, the regulator, not the court, bears the burden of determining whether prices are reasonable. *See, e.g.*, Mass. Gen. Laws ch. 164, §§ 93-94 (state regulation of gas and electric rates).

The district court did not suggest here that the prices subject to the "balance billing " ban were "predatory." Nor (with one possible exception, see slip op. pp. 30-32) do the parties point to evidence of any price below anyone's "incremental cost. " *Cf.* *Barry Wright Corp. v. ITT Grinnell Corp., supra.* Rather, the district court suggested that Blue Shield's prices were "uncompetitively low, " "unreasonably low, " lower than the doctors might have charged to individual patients lacking market power. That is to say, Blue Shield obtained prices that reflected its market power. For the reasons just mentioned then, if Blue Shield had simply purchased those **[**21]** services for itself, the prices paid, in and of themselves, would not have amounted to a violation of the antitrust laws. *Berkey Photo, Inc. v. Eastman Kodak Co., supra*; 3 P. Areeda & D. Turner, *supra*, para. 710.

Second, as we previously mentioned, there is no law forbidding a legitimate insurance company from itself buying the goods or services needed to make its customer whole. The cases that we have cited are unanimous in allowing such arrangements. The rising costs of medical care, the possibility that patients cannot readily evaluate (as competitive buyers) competing offers of medical service, the desirability of lowering insurance costs and premiums, the availability of state regulation to prevent abuse -- all convince us that we ought not create new potentially far-reaching law on the subject. And, the parties have not seriously argued to the contrary.

Third, to reject the first two propositions is, as a matter of logic, to reject the third. If it is lawful for a monopoly buyer to buy for the account of another, how can it be unlawful for him to insist that no additional charge be made to that other? To hold to the contrary is, in practice, to deny **[**22]** the buyer the right to buy for others, for the seller would then be free to obtain a different price from those others by threatening to withhold the service. This reasoning seems sound whether or not the buyer has "market power. "

In essence, then, the lawfulness of the term in question stems from the fact that it is an essential part of the price bargain between buyer and seller. Whether or not that price bargain is, in fact, reasonable is, legally speaking, beside the point, even in the case of a monopolist. As Blue Shield stresses in its brief, health maintenance organizations, independent practice associations, and preferred provider organizations **[*929]** all routinely agree with doctors that the doctors will accept payment from the plan as payment in full for services rendered to subscribers. We can find no relevant analytical distinction between this type of purchasing decision and the practice before us -- even on the assumption that Blue Shield possesses market power.

B

We now consider more closely the specific arguments raised by the district court and the parties to show that Blue Shield's "balance billing ban " is anticompetitive in practice. The Rodkey plaintiffs' **[**23]** brief sets forth in summary form the following allegedly harmful effects of the ban:

(1) Price competition among physicians for services covered by Blue Shield's service benefit policies is "virtually eliminated."

(2) Doctor's prices have tended to cluster around Blue Shield's "maximum price levels."

(3) Doctors wanting to compete by offering innovative or "premium" services are inhibited from doing so because Blue Shield's pricing structure assumes that physicians' services are fungible and mandates the same price ceilings for virtually all physicians.

(4) Doctors just entering practice are discouraged from doing so by particularly low levels of Blue Shield reimbursement.

(5) Blue Shield's low prices lead doctors to charge higher prices to others.

(6) Blue Shield discourages doctors from charging others low prices by insisting that its subscribers be given the benefit of any such low prices.

(7) Blue Shield's pricing system discourages doctors from trying out more expensive services that could bring about lower total medical costs, *e.g.*, a "colonoscopy with polypectomy," an expensive service that is nonetheless cheaper than the surgery that would otherwise be needed **[**24]** to cure the patient.

(8) Blue Shield, by reason of its pricing practices, has been able to attract more subscribers, extending its "competitive edge" over other health insurers, and increasing its dominance in the health insurance business.

The first seven of these arguments attack the price term in the agreement between Blue Shield and the doctors. To argue that Blue Shield's pricing system is insufficiently sensitive to service differences, or that it encourages high costs, or does not give the patients what they really need, or to claim that the buyer is making a bad decision is like arguing that the buyer of a fleet of taxicabs ought to buy several different models, or allow the seller to vary color or horsepower or gearshift because doing so either will better satisfy those passengers who use the fleet's services, or will in the long run encourage quality and innovation in automobile manufacture. The short -- and conclusive -- answer to these arguments is that ***HN8***[] normally the choice of what to seek to buy and what to offer to pay is the buyer's. And, even if the buyer has monopoly power, **[**25]** an antitrust court (which might, in appropriate circumstances, restructure the market) will not interfere with a buyer's (nonpredatory) determination of price.

Thus, the arguments that Blue Shield's payments for doctors' services are "too low" are disposed of by our discussion at slip op. pp. 16-18, *supra*. ***HN9***[] A legitimate buyer is entitled to use its market power to keep prices down. The claim that Blue Shield's price scheme is "too rigid" because it ignores qualitative differences among physicians is properly addressed to Blue Shield or to a regulator, not to a court. There is no suggestion that Blue Shield's fee schedule reflects, for example, an effort by, say, one group of doctors to stop other doctors from competing with them. *Cf.* *Virginia Academy of Clinical Psychologists v. Blue Shield of Virginia, supra.* Here, Blue Shield and the doctors "sit on opposite sides of the bargaining table," *Royal Drug Co. v. Group Life & Health Insurance Co., 737 F.2d at 1438*. And Blue Shield seems simply to be acting **[*930]** "as every rational enterprise **[**26]** does, *i.e.*, [to] get the best deal possible," *Travelers Insurance Co. v. Blue Cross of Western Pennsylvania, 481 F.2d at 84*. The first seven adverse consequences to which appellees point are the result of this unilateral behavior.

Plaintiffs' eighth argument focuses on the health insurance business: Blue Shield's "ban on balance billing, " by attracting more subscribers, augments its share of the health insurance business, thereby enabling it to secure still lower doctor charges. This argument, however, comes down to saying that Blue Shield can attract more subscribers because it can charge them less. If Blue Shield is free to insist upon a lower doctor charge, it should be free to pass those savings along to its subscribers in the form of lower prices. This conclusion does not rest upon a judgment about the reasonableness of the doctor charge. A monopolist who charges his customers a high price is free to pay his suppliers more, thereby attracting higher quality raw materials. Considered in and of itself, higher quality, like lower price, is good -- even if it helps the monopolist maintain his market power through "superior skill, foresight and industry. **[**27]** " *See* *United States v. Aluminum Co. of America, 148 F.2d at 429*.

Finally, the district court rested its decision in large part upon the Supreme Court's recent case, *Arizona v. Maricopa County Medical Society, 457 U.S. 332, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*. *Maricopa*, however, involved a *horizontal* agreement among competing doctors about what to charge. ***HN10***[] A horizontal agreement among competitors is typically unlawful because the competitors prevent themselves from making *independent* decisions about the terms as to which they will bargain. Competitors cannot *agree*, for example, to insist that their contracts with sellers contain arbitration clauses, even though each individual competitor can make up his own mind to insist upon such a term in any, or all, of his contracts. *United States v. First National Pictures, Inc., 282 U.S. 44, 75 L. Ed.*

151, 51 S. Ct. 45 (1930); Paramount Famous Lasky Corp. v. United States, 282 U.S. 30, 75 L. Ed. 145, 51 S. Ct. 42 (1930). **[**28]** **HN11**[] The unlawfulness of the agreement does not necessarily depend upon the undesirability of the contractual term as to which competitors agree not to compete.

The district court saw a similarity between the horizontal agreement cases and this one in the fact that Blue Shield can extract an "uncompetitive price" from doctors while the *Maricopa* court feared that "price-fixing" by competitors might bring about uncompetitive prices. But, the antitrust problems at issue when a single firm sets a price -- whether, when, and how courts can identify and control an individual exercise of alleged market power -- are very different from those associated with agreements by competitors to limit independent decision-making. A decision about the latter is not strong precedent for a case involving only the former. *Maricopa* is simply not on point. Nor, for similar reasons, is National Collegiate Athletic Association v. Board of Regents, 468 U.S. 85, 82 L. Ed. 2d 70, 104 S. Ct. 2948, 52 U.S.L.W. 4928 (1984), another "horizontal agreement" case cited by the doctors.

C

Three additional circumstances militate strongly here against any effort by an antitrust court to supervise **[**29]** the Blue Shield/physician price bargain. These three considerations convince us to apply mainstream antitrust doctrine, which allows a buyer or seller freedom to bargain for price, rather than to seek analogies with more unusual cases that do not.

First, the prices at issue here are low prices, not high prices. *See* Comment, 75 Nw. L. Rev. at 522-23. Of course, **HN12**[] a buyer, as well as a seller, can possess significant market power; and courts have held that *agreements* to fix prices -- whether maximum or minimum -- are unlawful. Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 95 L. Ed. 219, 71 S. Ct. 259 (1951); Albrecht v. Herald Co., 390 U.S. 145, 19 L. Ed. 2d 998, 88 S. Ct. 869, **[*931]** (1968). Nonetheless, the Congress that enacted the Sherman Act saw it as a way of protecting consumers against prices that were too *high*, not too low. *See* R. Bork, *supra*, at 61-2. And, the relevant economic considerations may be very different when low prices, rather than high prices, are at issue. These facts **[**30]** suggest that courts at least should be cautious -- reluctant to condemn too speedily -- an arrangement that, on its face, appears to bring low price benefits to the consumer. *See* Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d at 231-34.

Second, the subject matter of the present agreement -- medical costs -- is an area of great complexity where more than solely economic values are at stake. How to provide affordable, high quality medical care is much debated. And, many different solutions -- ranging from stricter regulation to greater reliance on competing service organizations -- have been proposed. *See* Clark, "Why Does Health Care Regulation Fail?" 41 Md. L. Rev. 1 (1981); A. Enthovin, *Health Plan* (1980). This fact, too, warrants judicial hesitancy to interfere.

Third, the price system here at issue is one supervised by state regulators. See Kartell v. Blue Shield of Massachusetts, Inc., 384 Mass. 409, 422, 425 N.E.2d 313 (1981). While that fact does not automatically carry with it antitrust immunity, *see* Cantor v. Detroit Edison Co., 428 U.S. 579, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 (1976), it **[**31]** suggests that **HN13**[] strict antitrust scrutiny is less likely to be necessary to prevent the unwarranted exercise of monopoly power. Of course, administrative regulation is a highly imperfect process. But, regulation by judicial decree is not necessarily preferable.

These general considerations do not dictate our result in this case. They do, however, counsel us against departing from present law or extending it to authorize increased judicial supervision of the buyer/seller price bargain. Like the court in *Feldman v. Health Care Corp.*, we see "no need to blaze new trails," 562 F. Supp. at 946. Without such pioneering, we do not believe the antitrust laws forbid Blue Shield's "balance billing " practice. Contrary to the district court's conclusion, the practice does not constitute an unreasonable restraint of trade. And, the same reasons that lead us to this conclusion also lead us to agree with the district court that the practice does not constitute monopolization or an attempt to monopolize. *See* 3 P. Areeda & D. Turner, *supra*, para. 626 at 83.

III

We turn **[**32]** now to four issues that the plaintiff doctors raise in their cross-appeal from other rulings of the district court -- rulings that dismissed various parts of their case against Blue Shield (and against Blue Cross, Blue Shield's sister organization). The fact that we have found Blue Shield's ban on balance billing to be lawful simplifies the issues on the cross-appeal and virtually determines an outcome in defendants' favor.

First, the doctors argue that the district court wrongly dismissed their claim that Blue Shield's refusal to reimburse nonparticipating doctors (except for emergency or out-of-state services) violate the ***antitrust law***. The district court found that Blue Shield's actions were immunized from antitrust attack by a prong of the "state action" doctrine which removes actions required (or forbidden) by state laws from the scope of the federal antitrust laws. *See* *Hoover v. Ronwin, 466 U.S. 558, 80 L. Ed. 2d 590, 104 S. Ct. 1989, 52 U.S.L.W. 4535 (1984)*. The Massachusetts Supreme Judicial Court has held that state law, namely *Mass. Gen. Laws ch. 176B, § 7* prohibits Blue Shield from generally reimbursing nonparticipating doctors, *Kartell v. Blue Shield of Massachusetts, Inc., 384 Mass. 409, 423, 425 N.E.2d 313 (1981)*. **[**33]**

The doctors here argue that Massachusetts state law cannot immunize Blue Shield's conduct because the relevant Massachusetts state law is preempted by federal pension law -- the Employment Retirement Income Security Act ("ERISA"), *29 U.S.C. §§ 1001-1381* -- and it is therefore without legal effect. We need not trace **[*932]** the labyrinthine path of this preemption argument, however, for we uphold the district court's ruling for a simpler reason. Since there is no relevant factual dispute, we have examined the legal merits of the doctors' substantive antitrust claim. We conclude that the facts to which they point do not make out a violation of the antitrust laws. No trier of fact, whether judge or jury, could properly find in their favor.

The doctors charge that Blue Shield simply refuses to deal with doctors who do not agree to participate in its program. The doctors strongly argued that this "refusal to deal " helped Blue Shield implement its ban on balance billing. Were that ban unlawful, the "refusal to deal " conceivably could have been found unlawful, too, as an unjustified means towards that unlawful end. If the ban is lawful, however, the **[**34]** "refusal to deal " charge must rise, or fall, on its own. And, on its own, it runs squarely into basic ***antitrust law*** that ***HN14***[] a firm "generally has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently." *Monsanto Co. v. Spray-Rite, 465 U.S. at 761*; *United States v. Colgate & Co., 250 U.S. 300, 307, 63 L. Ed. 992, 39 S. Ct. 465 (1919)*. There is nothing special here to take this case outside the general rule. There is neither evidence of a horizontal conspiracy nor any charge that Blue Shield agreed with one of its competitors not to deal with nonparticipating doctors. *Cf.* *Fashion Originators' Guild of America v. Federal Trade Commission, 312 U.S. 457, 85 L. Ed. 949, 61 S. Ct. 703 (1941)* (horizontal agreement to boycott certain customers held illegal). Any participation by Blue Cross in Blue Shield's decision is beside the point, for Blue Cross (a hospital cost insurer) does not compete with Blue Shield, nor does it maintain any relevant balance billing ban of its own. Thus, its (alleged) participation **[**35]** does not compromise in any relevant way the *independence* of Blue Shield's dealing decisions (any more than, say, a hypothetical Blue Shield meeting with a business consultant). *Cf.* *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 81 L. Ed. 2d 628, 104 S. Ct. 2731, 52 U.S.L.W. 4821, 4825 (U.S. 1984)*. In a nutshell, Blue Shield's independent determination of the terms on which it will deal, of the customers to whom it will sell, and of the suppliers from whom it will purchase is a manifestation of the competitive process, not an effort to suppress or to destroy that process. *Cf.* *Chicago Board of Trade v. United States, 246 U.S. 231, 238, 62 L. Ed. 683, 38 S. Ct. 242 (1918)* ("The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition.").

Second, the doctors charge that Blue Shield engaged in "predatory" pricing behavior. And, they point to one instance, allegedly supported by the record, when Blue Shield charged a lower price for insurance than a competitor (a firm called GISC), and it later turned **[**36]** out that Blue Shield lost money on the policies. The district court held that the injury suffered as a result of any such predatory conduct, occurred only in the market for insurance; and the doctors did not have a sufficiently direct interest in competitive injuries in that market to give them "standing" to complain of anticompetitive activity there.

On this appeal, the doctors challenge the court's ruling denying them standing to assert this Sherman Act *§ 2* claim. Like their first challenge, their argument would be far stronger had they prevailed on the "balance billing " claim. Then, one might have accepted their claim that this single instance of "predatory pricing" was part and parcel of a bundle of anticompetitive activities designed to give Blue Shield significant market power in the medical insurance business. *See* Plaintiffs' First Amended Complaint, para. 18. And, anticompetitive activities that significantly lessen competition in that business can harm not only other insurance firms, 2 P. Areeda & D. Turner, *supra* para. 340a, but also customers of insurance firms, *id.* para. 337, and suppliers of insurance firms (such as doctors), *id.* paras. 338-39. **[**37]** These harms, plaintiffs assert, were great enough, and direct **[*933]** enough, to confer on suppliers (such as doctors) standing to complain of the anticompetitive conduct in a lawsuit and to seek equitable relief.

Once the "balance billing " claim is eliminated, however, the doctors' argument lacks plausibility. They can no longer argue that insurance prices that reflect Blue Shield's "balance billing " rule are automatically unlawful. The "predatory pricing" charge must stand on its own, and to succeed it requires a showing that the price was below "incremental cost" (or the equivalent). *See* *Barry Wright Corp. v. ITT Grinnell Corp., supra.* The only evidence to which the doctors can now point is the single, isolated instance in respect to GISC. GISC accounted for less than 0.1 percent of the health insurance market. Thus, even if the "predatory pricing" charge is true in respect to GISC, there is no evidence that the charged conduct could lead to any significant increase in Blue Shield's market power. Under these circumstances the possibility of injury to a supplier is simply too remote and indirect to allow a supplier to bring suit. Were the suit one **[**38]** for treble damages, the supplier's injury would be far too indirect to confer standing, *see* *Associated General Contractors of California v. California State Council of Carpenters, 459 U.S. 519, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)* (standing to assert treble-damages claim under § 4 of Clayton Act denied where plaintiff's injury was "indirect" and chain of causation tenuous). Although standing rules for an injunctive action under § 16 of the Clayton Act are more liberal, plaintiffs still must show that the charged conduct threatens them with harm. *Hawaii v. Standard Oil Co., 405 U.S. 251, 260-62, 31 L. Ed. 2d 184, 92 S. Ct. 885 (1972)*; 2 P. Areeda & D. Turner, *supra*, paras. 328a, 335e. Plaintiffs cannot show this in respect to the GISC type of conduct. Thus, without the support of a "balance billing " claim, the doctors cannot obtain a reversal of the district court's ruling that they lacked standing to complain of "predatory pricing."

Third, the doctors attack the district court's dismissal of their claims against Blue Cross. Massachusetts state law expressly authorizes Blue Cross and Blue Shield to contract with each other "for the **[**39]** joint administration of their business and for joint and co-operative writing and issuing of certificates." *Mass. Gen. Laws ch. 176A, § 5*; *see also id.*, ch. 176B, § 3. The district court therefore found that the "state action" doctrine and the McCarran-Ferguson antitrust exemption for the "business of insurance," *15 U.S.C. §§ 1011 et seq.*, immunized Blue Cross's challenged conduct from antitrust scrutiny. Again, we need not accept the doctors' invitation to enter the legal thickets that surround these doctrines, for, with the demise of their "balance billing " claim, the doctors are no longer able to make any plausible charge of a substantive antitrust violation. Once the ban on "balance billing " is seen as permissible, the doctors' allegation against Blue Cross amounts to a claim that it conspired or agreed with Blue Shield to achieve a *lawful* objective, not an unlawful one. Blue Cross, concededly, is not a competitor of Blue Shield. There is no claim that the fact of agreement, in and of itself, inhibits any otherwise independently competitive action. *Cf.* *Fashion Originators' Guild of America v. Federal Trade Commission, supra.* **[**40]** Under these circumstances, the agreements violate no principle of ***antitrust law*** of which we are aware. Even were the agreements subject to substantive antitrust scrutiny, the doctors have failed to show us anything about them that would allow a finding of unlawfulness.

Fourth, and finally, the doctors assert that Blue Shield "has engaged in coercive attacks designed to intimidate and retaliate against physicians" -- evidently those who oppose the ban on balance billing. As far as we can tell from the briefs, however, the activities that the doctors allege do not make out independent violations of the antitrust laws, once one accepts the fact that Blue Shield's balance billing rule is lawful. Even viewed in a light most generous to plaintiffs, the conduct they complain of at most might amount to minor business **[*934]** torts, which lie beyond the purview of the antitrust laws, *see* 3 P. Areeda & D. Turner, *supra* para. 626d.

For these reasons, the district court's finding that the ban on balance billing is unlawful is reversed, and the district court's injunction is vacated. In all other respects the order of the district court is affirmed.

Ralph C. Wilson Industries, Inc. v. American Broadcasting Cos.

HN4[] **Antitrust & Trade Law, Sherman Act**

Section 4 of the Clayton Act, *15 U.S.C.S. § 15*, confers a private right of action for treble damages upon any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws. "Antitrust laws" is defined to include the Sherman Act, *15 U.S.C.S. §§ 1-7*. *15 U.S.C.S. § 12(a)*. *Section 1* of the Sherman Act, *15 U.S.C.S. § 1*, prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States. This blanket proscription, however, has been interpreted to prohibit only "unreasonable" restraints of trade.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

HN5[] **Antitrust & Trade Law, Sherman Act**

The practice of licensing television programs on an exclusive basis does not automatically violate the Sherman Act's prohibition of restraints of trade.

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] Regulated Industries, Communications

The legal standards applied to a plaintiff's rule of reason antitrust claim are: first, a plaintiff must show that the defendants' challenged practices injure, or decrease, competition in the relevant market. If a plaintiff fails to prove that competition has been injured, it cannot prevail. Secondly, if a plaintiff has shown an injury to competition, it must then show that the challenged restraint is "unreasonable."

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

HN7[] Regulated Industries, Communications

To show that a restraint is unreasonable, a television station must prove one of two things. First, a television station may show that the restraint is unreasonable because it applies to television stations which are not in "substantial competition" with each other. If the television station cannot show that it is not in substantial competition with the other television station, it may nevertheless prevail if it can show that the challenged programming practices of exclusivity, length of license and rights of first refusal, are "unreasonable" under the circumstances.

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN8[] Regulated Industries, Communications

In order to show that programming exclusivity practices injure competition, a television station may pursue one of three avenues. First, it may offer evidence to show that the other television stations have conspired to restrain competition. Secondly, it can offer evidence showing that the other television stations' exclusivity practices actually injure competition. Thirdly, it can, as an alternative, seek to show that a television station has "market power," tending to make any action of that station have a substantial effect on competition.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN9[] Relevant Market, Geographic Market Definition

The first inquiry is whether a plaintiff television station has offered evidence which supports a finding that exclusive license contracts for other television stations injures competition. In order to address this inquiry, the court must first determine what is the "relevant market" in which competition has allegedly been restrained. This "relevant market" is generally determined by reference to both the relevant product market and the relevant geographic market. The relevant product market is quality television programming. The relevant geographic market, however, is more complex. The court must consider the commercial realities of the situation to arrive at the definition of the relevant market.

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

HN10[] **Regulated Industries, Communications**

A television station asserting an antitrust violation must offer evidence tending to show that it cannot obtain quality programming, that prices are fixed, that program offerings are detrimentally affected, or that program output is restricted. Some showing of this type is necessary to establish injury to competition.

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

HN11[] **Regulated Industries, Communications**

Despite the fact that a television station asserting an antitrust violation produces no evidence to show that other television stations' programming exclusivity practices actually injured competition, a jury might find injury to competition if the plaintiff television station proved that any one defendant television station has market power. If a defendant has market power, it is much more likely that its actions can injure competition. Thus, if a plaintiff submitted evidence tending to show that a defendant has market power, a court might permit the issue to go to the jury.

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

HN12[] **Regulated Industries, Communications**

If a plaintiff television station alleging antitrust violations offers sufficient evidence of an injury to competition, the plaintiff must then show that the programming exclusivity practices are "unreasonable." The first way a plaintiff may establish this is by offering sufficient evidence to show that a plaintiff and defendant television stations are not in "substantial competition." If plaintiff is not in substantial competition with defendants, the exclusivity practices are presumptively unreasonable. If the parties are in substantial competition, a plaintiff must then offer evidence showing that the challenged exclusivity practices are unreasonable given the particular circumstances of the case.

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

HN13[] **Regulated Industries, Communications**

Exclusivity, in itself, is a reasonable practice in the television programming industry.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN14[] **Summary Judgment, Entitlement as Matter of Law**

Summary judgment should be "sparingly" granted where "motive and intent" play important roles in plaintiff's conspiracy claim and complete discovery may have been obstructed.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN15[] **Conspiracy, Elements**

In order to go to the jury on its conspiracy claim, plaintiff must submit some sort of proof that the defendants actually conspired -- some "conscious commitment to a common scheme" -- or other special facts permitting a finding of conspiracy.

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN16[] **Concerted Action, Civil Conspiracy**

To be legally insufficient to support a finding of conspiracy, a plaintiff must offer proof of improper motive and illegal concerted action.

Opinion

[*697] AMENDED ORDER GRANTING DEFENDANTS ' MOTION FOR SUMMARY JUDGMENT CORRECTING TYPOGRAPHICAL ERRORS AT PAGE 29 LINES 10-11

CONTI, District Judge.

This matter is before the court on defendants' motion for summary judgment. The background is as follows.

[*698] Plaintiff is the owner of a television station, KICU Channel 36 (jointly referred to as "plaintiff" herein). Defendants Chronicle Broadcasting Co. (KRON Channel 4), Miami Valley Broadcasting Co. (KTVU Channel 2) and

Field Communications Corp. (KBHK Channel 44) are television **[**2]** stations located in the San Francisco Bay Area. These three defendants will be referred to as the "station defendants." [1] Defendants Viacom International, Inc., P.I.T.S. Films, [2] Twentieth Century-Fox Film Corp., Paramount Television Domestic Distribution Inc., Warner Bros. Television Distribution, Inc., M.C.A. Television Ltd., Metro-Goldwyn-Mayer, Inc., and United Artists Television, Inc., are suppliers or distributors of television programs. These defendants will be referred to as the "supplier defendants."

Plaintiff filed this action on December 29, 1980. [3] Plaintiff's complaint alleges that defendants have violated the antitrust laws because of various practices they follow concerning the licensing of programs and conspiracies to boycott plaintiff. Plaintiff is pursuing three claims against defendants based upon these alleged **[**3]** practices. [4] First, plaintiff claims that all defendants have violated the Sherman Act by unreasonably restraining trade. Plaintiff contends that defendants unreasonably restrain trade by licensing programs on an exclusive basis as against plaintiff, by making the licenses unreasonably long and by incorporating, implicitly or explicitly, rights of first refusal into those licenses. Secondly, plaintiff claims that the station defendants have committed a *per se* violation of the Sherman Act by a horizontal conspiracy to boycott plaintiff. Plaintiff alleges that these three defendants have conspired, through direct communication, to exercise exclusivity of programming against plaintiff. Thirdly, plaintiff claims that defendant Miami Valley Broadcasting Co. has committed a *per se* violation of the Sherman Act by conspiring with the Independent Television News Association (ITNA) to exclude plaintiff from membership in that organization. These three claims will be developed in more detail below.

[4]** This case has been ongoing for almost four years. In 1982, the defendants filed a motion seeking summary judgment. On the state of the record at that time, the court denied that motion. On August 9, 1984, the court held a status conference in order to clarify the issues and facts for trial. At that conference, the court and parties explored whether it would be appropriate to reconsider defendants' motion for summary judgment given the extensive record now before the court. As a consequence of that conference, the station defendants moved to renew their motion for summary judgment, in which they were joined by the supplier defendants. The court granted that motion and set a briefing schedule to permit all parties ample opportunity to brief the legal and factual issues in this case. The court specifically directed plaintiff to present a complete brief of its factual arguments which might preclude summary judgment against it, together with a detailed summary of the specific evidence plaintiff intends to present at trial to support those arguments. After this thorough and voluminous supplemental briefing, defendants' renewed motion for summary judgment is now before the court.

The considerations **[**5]** the court must address in deciding whether summary judgment is appropriate in this case are as follow. ***HN1***[] Generally, summary judgment is **[*699]** appropriate only when the moving party meets his burden of showing that there is no genuine issue of material fact and that he is entitled to judgment as a matter of law. *Fed.R.Civ.P. 56*; *see, Adickes v. Kress & Co., 398 U.S. 144, 157, 90 S. Ct. 1598, 1608, 26 L. Ed. 2d 142 (1970)*; *Bank of California, N.A. v. Opie, 663 F.2d 977, 979 (9th Cir.1981)*; *State ex rel. Edwards v. Heimann, 633 F.2d 886, 888 (9th Cir.1980)*.

Plaintiff contends that this rule should be applied particularly strictly in antitrust cases, making summary judgment less available in such cases than in civil actions generally. Although there is some support for this contention, the better position, advanced by respected antitrust writers and recognized by the courts, is that ***HN2***[] summary judgment is equally available in antitrust cases. [5] *See, e.g., Lupia v. Stella D'Oro Biscuit Co., 586 F.2d 1163, 1167*

---

[1] Defendant American Broadcasting Co. (KGO-TV Channel 7) was dismissed pursuant to stipulation on June 7, 1982.

[2] Substituted as a defendant in place of Tandem Productions, Inc.

[3] Plaintiff's Supplemental Complaint was filed on March 29, 1982.

[4] Plaintiff originally pursued five antitrust claims against defendants. *See* Transcript of August 9, 1984, hearing; Plaintiff's March 8, 1983, Pretrial Statement. Plaintiff has now abandoned its horizontal conspiracy claim against the supplier defendants and all the monopoly claims and is pursuing only these three claims. *See* Plaintiff's September 4, 1984, Statement of Contentions and Proof.

(7th Cir.1978), *cert. denied*, *440 U.S. 982, 99 S. Ct. 1791, 60 L. Ed. 2d 242 (1979)*; *Zweig v. Hearst Corp., 521 F.2d 1129, 1135-36* (9th Cir.), *cert. denied* **[**6]** , *423 U.S. 1025, 96 S. Ct. 469, 46 L. Ed. 2d 399 (1975)*; II P. Areeda & D. Turner, ***Antitrust Law*** paras. 316-17 (1978); Schwarzer, *Summary Judgment Under the Federal Rules: Defining Genuine Issues of Material Fact, 99 F.R.D. 465 (1984)*.

[7]** The argument that summary judgment should be hesitantly granted in antitrust cases is generally founded upon language used by the Supreme Court in *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)*. In *Poller*, the Court stated:

> summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot.

Poller, 368 U.S. at 473, 82 S. Ct. at 491. As antitrust writers point out, however, this language must be read in the context of *Poller's* genuinely disputed factual issues concerning motive and intent and the discovery problems therein, and not as a rule that summary judgment should rarely be granted in antitrust cases. *See, e.g.*, II P. Areeda & D. Turner, ***Antitrust Law*** para. 316.

In fact, some writers believe that summary judgment is often particularly appropriate in antitrust cases because of the "fearful dimensions" of such cases, and the fact that many suits are motivated by "commercial disappointment" rather than genuine antitrust problems. II P. **[**8]** Areeda & D. Turner, ***Antitrust Law*** para. 316 at 57-58 (1978); *see also* J. von Kalinowski, *Antitrust Laws & Trade Regulations* § 113.02 at 113-5 to 113-7 (1984); *c.f., Lupia v. Stella D'Oro, 586 F.2d 1163*; *Zweig v. Hearst, 521 F.2d 1129*. Given the enormous expenditure of time and other resources commonly necessary in antitrust cases, the complexity of the issues and general inexperience of jurors in this area, as well as the need for uniformity and foreseeability in interpretation of the antitrust laws, the court should, rather, be particularly alert to granting summary judgment in appropriate cases. *See, e.g., Mutual Fund Investors v. Putnam Management Co., 553 F.2d 620, 622 (9th Cir.1977)*; II P. Areeda & D. Turner, ***Antitrust Law*** para. 316 at 69-70.

The posture of this case is particularly appropriate for a consideration of summary judgment. This case was filed in 1980. Since that time, the parties have conducted extensive discovery and do not contemplate further discovery. Plaintiff **[*700]** has not indicated that it needs further discovery to adequately defend against defendants' motion for summary judgment. As noted above, the court has directed plaintiff **[**9]** to submit detailed briefs setting forth the specific evidence it intends to use to support its claims at trial. ***HN3***[] In the context of this fully developed record, if the court finds that a directed verdict for defendants would be required even if all plaintiff's proffered evidence were admitted at trial, then the court should not be hesitant to grant summary judgment for defendants at this stage of the proceeding. *See, First National Bank v. Cities Service Co., 391 U.S. 253, 274-90, 88 S. Ct. 1575, 1585-1592, 20 L. Ed. 2d 569 (1968)* [holding that, even though plaintiff's evidence showing conspiracy might present a jury question, defendants' evidence to the contrary was so overwhelming that summary judgment was appropriate]; *see also*, II P. Areeda & D. Turner, ***Antitrust Law*** para. 316 at 61; Schwarzer, *Summary Judgment, etc*., 99 F.R.D. at 468-70. Applying this standard to the facts and arguments set forth below, the court finds that summary judgment in favor of defendants is appropriate in this case.

A. *Rule of Reason Claim*

---

[5] *See, e.g., Robert's Waikiki U-Drive, Inc. v. Budget Rent-A-Car Systems, Inc., 732 F.2d 1403 (9th Cir.1984)*; *Fine v. Barry and Enright Productions, 731 F.2d 1394* (9th Cir.), *cert. denied*, ***469 U.S. 881, 105 S. Ct. 248, 83 L. Ed. 2d 186, 53 U.S.L.W. 3269 (1984)***; *Aydin Corp. v. Klamath Medical Service Bureau, 701 F.2d 1276* (9th Cir.), *cert. denied*, ***464 U.S. 822, 104 S. Ct. 88, 78 L. Ed. 2d 96 (1983)***; *JBL Enterprises, Inc. v. Jhirmack Enterprises, Inc., 698 F.2d 1011* (9th Cir.), *cert. denied*, ***464 U.S. 829, 104 S. Ct. 106, 78 L. Ed. 2d 109 (1983)***; *General Business Systems v. North American Philips Corp., 699 F.2d 965 (9th Cir.1983)*; *Continental T.V., Inc. v. G.T.E. Sylvania Inc., 694 F.2d 1132 (9th Cir.1982)*.

Plaintiff's primary claim against the defendants is that they have unreasonably restrained trade through a vertical contract by their combined **[**10]** practices of licensing television programs on an exclusive basis, making the licenses unreasonably long, and by implicitly or explicitly incorporating rights of first refusal into those licenses. The factual basis for these contentions, referred to herein as plaintiff's "rule of reason" claim, is set forth below. First, however, is a brief summary of the statutory basis of plaintiff's claim.

HN4[] Section 4 of the Clayton Act, *15 U.S.C. § 15*, confers a private right of action for treble damages upon "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws." "Antitrust laws" is defined to include the Sherman Act, *15 U.S.C. §§ 1-7*. *15 U.S.C. § 12(a)*. *Section 1* of the Sherman Act, *15 U.S.C. § 1*, prohibits "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States. . . ." This blanket proscription, however, has been interpreted to prohibit only "unreasonable" restraints of trade. *See, e.g., Standard Oil v. United States, 221 U.S. 1, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*. These sections, therefore, form the statutory basis for plaintiff's claim against **[**11]** defendants for their allegedly unreasonable restraint of trade.

The unreasonable restraint of trade complained of is as follows. The supplier defendants herein are in the business of licensing television programs to television stations. The undisputed practice of these suppliers is to license programs to the stations on an exclusive basis after a competitive bidding process among interested stations. Thus, for example, a supplier would sell an exclusive license for M*A*S*H to defendant KTVU, who would then be the only station in that area permitted to air M*A*S*H (or specified episodes of M*A*S*H) for the duration of the license.

It is undisputed that the station defendants herein enforce this exclusivity against all television stations, including plaintiff, which they consider to be located in the "San Francisco" market area. This area includes San Francisco, Oakland and San Jose, as well as most of the area around these cities. The area includes all station defendants and plaintiff, as well as several non-party stations. The scope of this exclusive licensing area is determined on the basis of the A.C. Nielson Co. and Arbitron Co. ratings services' categorization of geographic **[**12]** area into market groups, both of which ratings services include San Francisco and San Jose in the same market group.

Plaintiff does not contend that ***HN5***[] the practice of licensing television programs on an exclusive basis automatically violates the Sherman Act's prohibition of restraints of trade. In fact, plaintiff itself licenses programs on an exclusive basis. All parties agree that exclusive licenses, as such, may **[*701]** further competition by providing an incentive to the station to invest in promotion and development of the program product and do not constitute a *per se* violation of *Section 1*.

Rather than argue that exclusive licenses automatically violate *Section 1* of the Sherman Act, plaintiff contends that they constitute an unreasonable restraint of trade when enforced by the station defendants against plaintiff. Plaintiff argues that the station defendants are entitled to license programs on an exclusive basis, but that that exclusivity should not apply to plaintiff because it is not in the same "relevant market" as the station defendants. Plaintiff submits that the station defendants are licensed to and operate in the San Francisco-Oakland Bay Area market. Plaintiff **[**13]** argues that it, on the other hand, is located in and operates in the "South Bay." (Plaintiff does not define the area included within the "South Bay," but it apparently covers San Jose and other areas in and around Santa Clara County.) Accordingly, plaintiff contends that it should be placed in a different geographic market than the station defendants for exclusivity purposes. To illustrate, plaintiff's argument is that defendant KTVU should be permitted to obtain a license for M*A*S*H which is exclusive against the other station defendants and other stations in the San Francisco area, but not those in the "South Bay" area, which includes plaintiff. Consequently, plaintiff could also bid for and obtain an exclusive license to show M*A*S*H, which would be exclusive only against other South Bay stations. Thus, plaintiff argues that the exclusive licenses violate the antitrust laws because they are overbroad in geographic scope, are unreasonably long in duration and incorporate unreasonable rights of first refusal.

The economic motivation for this suit is to enable plaintiff to license quality programming [6] at a price below that paid by the station defendants, such as KTVU, for their **[**14]** exclusive licenses to such programs. It is uncontested that the level of prices for exclusive licenses for quality programming is primarily determined by the broadcast market of the prospective licensees. Presently, all the station defendants and plaintiff are placed in the same market for purposes of bidding for the supplier defendants' quality programming. Thus, if defendant KTVU bids $150,000 for an exclusive license for M*A*S*H, plaintiff must better that bid to obtain the license. Plaintiff has made no argument and there is no evidence showing that plaintiff has been excluded from bidding for quality programming at these price levels. In fact, the evidence shows that if plaintiff wished to bid at this "San Francisco" market price, it could obtain quality programming.

Plaintiff contends that, as a small UHF station, **[**15]** [7] it is not commercially feasible for it to bid at the same price levels as the station defendants to obtain quality programming. What plaintiff seeks is to be placed in some market other than that containing the station defendants for purposes of bidding for quality program licenses. If, for example, plaintiff were placed in the Salinas-Monterey market, in which non-party channel 11 is placed, it could bid for quality programming at a much lower price than that paid by the station defendants. The outcome would be, for example, that defendant KTVU would obtain a license for M*A*S*H, exclusive against the other San Francisco stations, but not plaintiff, for $100,000, while plaintiff could also license M*A*S*H, exclusive against other South Bay stations, for, say $15,000. That is the result plaintiff seeks to achieve by means of this antitrust suit. This, then, is the factual basis for plaintiff's rule of reason antitrust claim.

[16] [*702]** The Court will briefly summarize ***HN6***[] the legal standards to be applied to plaintiff's rule of reason claim. First, plaintiff must show that the defendants' challenged practices injure, or decrease, competition in the relevant market. If plaintiff fails to prove that competition has been injured, it cannot prevail. *See, Standard Oil Co. v. United States, 337 U.S. 293, 69 S. Ct. 1051, 93 L. Ed. 1371 (1949)*; *Tampa Electric Co. v. Nashville Coal Co., 365 U.S. 320, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*; *Twin City Sportservice, Inc. v. Charles O. Finley & Co., 676 F.2d 1291* (9th Cir.), *cert. denied*, *459 U.S. 1009, 103 S. Ct. 364, 74 L. Ed. 2d 400 (1982)*; *Gough v. Rossmoor Corp., 585 F.2d 381, 385* (9th Cir), *cert. denied*, *440 U.S. 936, 99 S. Ct. 1280, 59 L. Ed. 2d 494 (1979)*. Secondly, if plaintiff has shown an injury to competition, it must then show that the challenged restraint is "unreasonable." *See, e.g., Standard Oil v. United States, 221 U.S. 1, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*. ***HN7***[] To show that the restraint is unreasonable, plaintiff must, in this case, prove one of two things. First, plaintiff may show that the restraint is unreasonable because **[**17]** it applies to television stations which are not in "substantial competition" with each other. *United States v. Paramount Pictures, Inc., 334 U.S. 131, 146, 68 S. Ct. 915, 923, 92 L. Ed. 1260 (1948)*. If plaintiff cannot show that it is not in substantial competition with the station defendants, it may nevertheless prevail if it can show that the challenged practices of exclusivity, length of license and rights of first refusal, are "unreasonable" under the circumstances of this case. *See, e.g., Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 49-59, 97 S. Ct. 2549, 2557-62, 53 L. Ed. 2d 568*, (1977); *United States v. Paramount Pictures, Inc., 334 U.S. 131, 68 S. Ct. 915, 92 L. Ed. 1260 (1948)*. For the reasons set forth below, the court holds that plaintiff has not, as a matter of law, met its burden of offering evidence sufficient to support a finding that defendants' exclusivity practices unreasonably restrain trade.

1. *Injury to Competition*.

As noted above, the first inquiry must be whether plaintiff has presented genuine issues of material fact which would support a finding that defendants' exclusivity practices injure competition. ***HN8***[] In order to meet this **[**18]** first test, plaintiff may pursue one of three avenues. First, it may offer evidence to show that the defendants have conspired to restrain competition. Plaintiff does not make this argument and offers no evidence which could justify a finding that the defendants conspired. Secondly, plaintiff could offer evidence showing that the

---

[6] Defined, generally, as programming which is high in the viewer ratings. *See, e.g.*, Davison Declaration paras. 11-13; Plaintiff's August 2, 1982, Memorandum of Points & Authorities at 29:1-6.

[7] A UHF (ultra high frequency) station's signal is generally much less powerful than that of a VHF (very high frequency) station. A UHF station generally sells for much less than a VHF station. *See, e.g.*, Park Declaration paras. 45-61.

defendants' exclusivity practices actually injure competition. This is the argument plaintiff primarily relies upon. As shown below, however, plaintiff fails to offer evidence of injury to competition which would withstand a directed verdict for defendants. Thirdly, plaintiff could, as an alternative, seek to show that a defendant has "market power," tending to make any action of that defendant have a substantial effect on competition. [8] Plaintiff offers some argument on this point but, as addressed below, it is unpersuasive. Accordingly, as set forth below, the court holds that plaintiff has failed to offer evidence which would support a finding that defendants' exclusivity practices injure competition.

[19]** ***HN9***[]

The first inquiry is whether plaintiff has offered evidence which could support a finding that the exclusive license contracts **[*703]** injure competition. In order to address this inquiry, the court must first determine what is the "relevant market" in which competition has allegedly been restrained. *See,* *Gough v. Rossmoor, 585 F.2d at 385-89*. This "relevant market" is generally determined by reference to both the relevant product market and the relevant geographic market. *See, e.g*., Harris & Jorde, *Antitrust Market Definition: An Integrated Approach*, 72 Cal.L.Rev. 1, 46-52 (1984). In this case, the parties agree, and the court accepts, that the relevant product market is quality television programming. The relevant geographic market, however, is more complex.

Plaintiff contends that the relevant geographic market is the "South Bay." Although they contested this definition in their earlier motion for summary judgment, defendants now accept, for purposes of this motion, plaintiff's definition. The court, however, is not persuaded by this definition.

The relevant market is not defined by the parties. *See, e.g.,* *Gough v. Rossmoor Corp., 585 F.2d at 389*. Rather, **[**20]** the court must consider the commercial realities of the situation to arrive at the definition of the relevant market. [9] *See, e.g.,* *Brown Shoe Co. v. United States, 370 U.S. 294, 336-37, 82 S. Ct. 1502, 1529-30, 8 L. Ed. 2d 510 (1962)*; Harris & Jorde, *Antitrust Market Definition*, 72 Cal.L.Rev. at 47-52, 65-66. In this case, the commercial realities are so clear that the court holds that the relevant geographic market is the entire San Francisco-Oakland-San Jose Bay Area, as currently defined.

[21]** These commercial realities are as follow. First, the Federal Communications Commission (FCC) considers San Jose and San Francisco to be in the same market. *See*, *47 C.F.R. § 76.51*; *Memorandum Opinion, 37 R.R.2d 695, 698 (1976)*; *40 R.R.2d 473, 477-78 (1977)*. Secondly, the two recognized national ratings services, A.C. Nielson Co. and Arbitron Co., consider San Jose and San Francisco to be in the same market. *See*, McClure Affidavit paras. 16-17 (Exhibit CC to Levy Declaration); Broadcasting/Cablecasting Yearbook 1982 at B-1 (Exhibit A

---

[8] The court need not decide, for purposes of this motion, whether plaintiff must prove that a defendant has market power in order to support a rule of reason antitrust claim. Plaintiff, relying upon *N.C.A.A. v. Board of Regents, 468 U.S. 85, 104 S. Ct. 2948, 2965, 82 L. Ed. 2d 70 (1984)*, contends that market power need not be proved. Defendants, relying upon *General Leaseways v. National Truck Leasing, 744 F.2d 588, 1984-2* Trade Cases para. 66,205 (7th Cir.1984) and the proposed Department of Justice guidelines concerning vertical restraints (*see* Mr. Popofsky's November 1, 1984, letter to this court), argue that plaintiff cannot avoid summary judgment because it offers no proof that any defendant has market power. This court need not decide that issue. In this case plaintiff has not shown a conspiracy, actual injury to competition *or* market power.

[9] As one antitrust writer has stated:

> In some cases, the evidence adduced may not permit the court confidently to decide the question of market definition. For example, the plaintiff's prima facie definition and defendant's rebuttal definition might both be plausible. In that situation, the parties would do well to present -- and the trier of fact to consider -- other evidence of market power that might assist the court in deciding which market definition is the more appropriate.

Harris & Jorde, *Antitrust Market Definition: An Integrated Approach*, 72 Cal.L.Rev. 1, 66 (1984). This court adds that it may in fact find, after considering the commercial realities of the situation, that some market definition other than that advanced by the parties is the most appropriate. It is the facts and realities of the situation that establish the actual market -- not the desires or wishes of the parties. Unlike most controversies where the parties might stipulate as to the facts surrounding the lawsuit, in antitrust cases, it is market competition that the court is concerned with, not competitors.

to Thurston Declaration); *c.f.*, *47 C.F.R. § 73.658(1)(1)(vii)*; *WIXT Television, Inc. v. Meredith Corp., 506 F. Supp. 1003 (N.D.N.Y.1980)*; Davison Deposition 615:24-617:3; 992:23-993:20; 1100:22-1101:23; Heath Deposition 290:14-20; Romanelli Deposition 975:3-12; Snyder Deposition 5:13-19; Wischmeyer Deposition 208:4-8; Bell Deposition 48:16-49:12; Heath Deposition 28:6-30:14; Dean Deposition 26:2-12; Welch Deposition 39:17-23. Thirdly, there is a large overlap in the signal coverage of plaintiff's and the station defendants' signals. *See, e.g.*, Exhibit DD to Levy Declaration; Bell Deposition 59:1-5; Wischmeyer Deposition 232:23-28; **[**22]** Maguire Exhibits 32-33; Heath Exhibit 4; Romanelli Exhibit 72; Welch Deposition 18:22-20:23, 34:3-5, 36:4-38:4, 37:7-38:4, 48:24-49:12, Exhibits 3, 7. Finally, plaintiff and the station defendants share a substantial overlap of viewers. *See*, Arbitron Ratings (1984); Welch Deposition Exhibit 5; Maguire Deposition 1047; Hirshey Deposition 951; Scheiner Deposition 93-94; Ball Deposition 242-43, 511-12; Frischer Deposition 84-85; Plaintiff's Contentions paras. 81, 202-04; Park Declaration paras. 21-25.

[*704] These facts are so clear that a reasonable jury would have to find that the relevant geographic market is the entire San Francisco Bay Area, including San Jose. Accordingly, the court holds that the relevant market in this case is the San Francisco Bay Area quality television programming market. Even were the court to accept the parties' definition of the relevant market as the "South Bay" quality programming market, however, the outcome would be the same. For the reasons set forth below, it is clear that plaintiff cannot prove that defendants' exclusivity practices unreasonably restrain trade in either market.

As noted above, the court must determine whether plaintiff **[**23]** has produced evidence, sufficient to avoid a directed verdict, showing injury to competition in the relevant market. The court finds that plaintiff has not met that burden. As argued more fully in the defendants' Memoranda of Points and Authorities, it is not sufficient for plaintiff to establish an injury to itself or its own competitive position. *See, e.g., Cascade Cabinet Co. v. Western Cabinet & Millwork, Inc., 710 F.2d 1366, 1373 (9th Cir.1983)*; *Klamath-Lake Pharmaceutical Association v. Klamath Medical Service Bureau, 701 F.2d 1276, 1292* (9th Cir.), *cert. denied*, *464 U.S. 822, 104 S. Ct. 88, 78 L. Ed. 2d 96 (1983)*; *Kaplan v. Burroughs Corp., 611 F.2d 286, 291 (9th Cir.1979)*, *cert. denied*, *447 U.S. 924, 100 S. Ct. 3016, 65 L. Ed. 2d 1116 (1980)*; *Gough v. Rossmoor Corp., 585 F.2d at 385-89*. This is all plaintiff has done. ***HN10***[] Plaintiff offers no evidence tending to show that it cannot obtain quality programming, that prices are fixed, that program offerings are detrimentally affected, or that program output has in any way been restricted. Some showing of this type is necessary to establish injury to competition. *See, e.g., National Collegiate Athletic Association **[**24]** v. Board of Regents, 468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*; *Mid-West Underground Storage, Inc. v. Porter, 717 F.2d 493 (10th Cir.1983)*; *Zoslaw v. MCA Distributing Corp., 693 F.2d 870 (9th Cir.1982)*, *cert. denied*, *460 U.S. 1085, 103 S. Ct. 1777, 76 L. Ed. 2d 349 (1983)*; *Ron Tonkin Gran Turismo, Inc. v. Fiat Distributors, Inc., 637 F.2d 1376* (9th Cir.), *cert. denied*, *454 U.S. 831, 102 S. Ct. 128, 70 L. Ed. 2d 109 (1981)*.

HN11[] Despite the fact that plaintiff has produced no evidence to show that defendants' exclusivity practices actually injured competition, a jury might find injury to competition if plaintiff proved that any one defendant [10] **[**25]** has market power. [11] If a defendant has market power, it is much more likely that its actions can injure competition. Thus, if plaintiff submitted evidence tending to show that a defendant has market power, the court might permit the issue to go to the jury. The court finds, however, that plaintiff has not offered evidence from which a jury could find that any defendant has market power.

---

[10] Plaintiff contended, in oral argument on this motion, that it may aggregate defendants' market shares to establish market power. It is not clear whether plaintiff contends that it may aggregate *one* defendant's share of several markets or that it may aggregate *all* the station defendants' market shares to establish market power. If plaintiff seeks to aggregate one defendant's share of more than one market, it has offered no factual evidence or legal argument which would permit such aggregation in this case. If plaintiff seeks to aggregate all the station defendants' market shares to establish market power, it may not do so. As noted above, plaintiff does not claim, and the evidence does not show, that the defendants conspired. Absent a conspiracy among defendants, plaintiff may not aggregate the respective market shares of individual defendants to establish market power. If a plaintiff could do so, it could merely sue all its competitors in a given market, aggregate their shares, and thus unfailingly establish market power.

[11] *See* note 8 *supra*.

Plaintiff has offered no evidence showing that any one defendant has market power. The evidence shows that the ten or more Bay Area stations all compete vigorously in both the South Bay and the Bay Area as a whole. The evidence also shows that the supplier defendants actively compete in both areas. *See*, Park Deposition 45-57; Fisher Declaration para. 52. There **[*705]** is no evidence showing that any one defendant has the power to significantly affect prices, available programming, or any other important market component. Consequently, plaintiff has not offered evidence sufficient to go to the jury on the issue whether a defendant has market power.

To summarize the above, the court holds that the plaintiff has not met its burden of producing evidence which would support a finding that the challenged practices restrain competition. Plaintiff has not shown that the exclusivity practices actually injure competition or that any defendant has market power. Accordingly, the court holds that plaintiff cannot prevail on its rule of reason claim. Defendants are consequently **[**26]** entitled to summary judgment.

The court might end its inquiry at this point. In deference to the enormous record before the court and in the interests of caution, however, the court will proceed to address the parties' other arguments.

Assuming, contrary to this court's ruling, that ***HN12***[] plaintiff had offered sufficient evidence of an injury to competition, plaintiff must then show that the exclusivity practices are "unreasonable." The first way plaintiff may establish this is by offering sufficient evidence to show that plaintiff and defendants are not in "substantial competition." If plaintiff is not in substantial competition with defendants, the exclusivity practices are presumptively unreasonable . . . *See, United States v. Paramount Pictures, Inc., 334 U.S. at 144-48, 68 S. Ct. at 922-24*. If the parties are in substantial competition, plaintiff must then offer evidence showing that the challenged exclusivity practices are unreasonable given the particular circumstances of this case. *See, e.g., Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 49-54, 97 S. Ct. 2549, 2557-59, 53 L. Ed. 2d 568 (1977)*; *United States v. Paramount Pictures, Inc., 334 U.S. at 144-48,* ***[**27]*** *68 S. Ct. at 922-24*; *see also*, P. Areeda, *The "Rule of Reason" in Antitrust Analysis: General Issues* (Federal Judicial Center 1981).

The court will first determine whether there is sufficient evidence in the record to support a finding that plaintiff is not in "substantial competition" with the station defendants. As noted, if the parties are not in substantial competition, then the exclusivity practices are "unreasonable" restraints of trade. [12] *United States v. Paramount, 334 U.S. at 144-48, 68 S. Ct. at 922-24*. The court finds that the evidence that the parties are in substantial competition is so overwhelming that the court may make such a ruling in this summary proceeding. As set forth above, the relevant market herein is the San Francisco Bay Area quality programming market. Even if the court accepted the parties' definition of the relevant market as the South Bay, however, the court would nevertheless find that plaintiff and defendants are in substantial competition in that market.

[28]** As noted above, plaintiff argues that it is not in substantial competition with the station defendants because it is a "local" station attracting "local" advertisers. The evidence shows, however, that the station defendants actively compete with plaintiff for viewers, quality programming and advertising in both the San Francisco Bay Area and the South Bay markets. *See*, Fisher Decl. para. 4; Davison Decl. paras. 11-13, 38, 39; Plaintiff's Contentions paras. 14, 81, 168 n. 17, 202-04; Park Decl. paras. 21-25, 89, 94; Arbitron Ratings Data (1984) (Ross Declaration); Welch Deposition Exhibit 5; Scheiner Decl. para. 9. This evidence, including evidence from plaintiff's own experts, shows clearly that plaintiff and the station defendants are in "substantial competition."

Given that plaintiff and the station defendants are in substantial competition with each other, plaintiff must now offer evidence sufficient to find the exclusivity practices "unreasonable" under the particular circumstances of this case. If plaintiff cannot submit evidence sufficient to support a finding that the exclusivity practices **[*706]** are unreasonable, it cannot prevail on its rule of reason claim. After **[**29]** careful review of the evidence in the record, the court finds that plaintiff has failed to offer evidence to support a finding that the exclusivity practices herein, consisting of the geographic breadth of the exclusivity, the length of the licenses and the alleged rights of first refusal, are unreasonable under the circumstances of this case.

[12] This, of course, again assumes that plaintiff has produced evidence of injury to competition.

The court holds that no reasonable jury could find that the practices complained of herein are unreasonable. The parties agree that ***HN13***[] exclusivity, in itself, is a reasonable practice in the television programming industry. Such exclusivity gives the licensee the incentive to promote and develop the licensed program. Without exclusivity, it is likely that no one licensee would expend the resources necessary to fully develop the program. *See*, Bell Deposition 36:6-24, 59:20-60:23; *c.f., Sandura Co. v. FTC, 339 F.2d 847, 852-53 (6th Cir.1964)*. Plaintiff itself utilizes exclusive licenses similar to those attacked herein. The exclusive licenses used herein promote competition by maximizing the number of available programs and preventing audience fragmentation for a program. *See*, Thurston Deposition 230:19-20; Maguire Deposition 369:20-370:19, **[**30]** 375:21-376:1; *c.f., Cascade Broadcasting Corp. v. KPDQ, Inc*., 1976-1 Trade Cases (CCH) para. 60,617 (D.Ore.1976); FCC, *First Report on Microwave Relays, 4 R.R.2d 1725, 1748 (1965)*. This exclusivity also promotes competition by maximizing the program's value and avoiding overexposure, which can shorten the program's useful life. *See*, Davison Deposition 155:12-156:13; Snyder Deposition 3:4-11, 4:3-1; Thurston Deposition 231:1-2; Park Deposition 23:20-22. Exclusivity also adds to the uniqueness of each station's viewer identity. *See*, Welch Deposition 80:19-23; Bell Deposition 58:8-11, 68:10-16; Boyer Deposition 111:3-6; Thurston Deposition 230:14-16. Exclusivity permits each station to plan programming to compete with another station's programming, with the knowledge that no other station will dilute the value of this competitive programming by airing the same program at the same time. *See*, Hirshey Deposition 276:7-277:8 and Exhibit 14; Wischmeyer Deposition 129:23-130:28; Breen Deposition 476:9-477:13. Exclusive licenses promote competition among suppliers by providing an incentive to maximize the number of programs offered and by maximizing the suppliers' revenues **[**31]** from the licenses. [13] *See*, Grayson Deposition 235:13-236:26; Snyder Deposition 17:10-24; Thurston Deposition 230:19-21, 692:24-28, 743:18-22; *c.f., Naumkeag Theatres Co., Inc. v. New England Theatres, Inc., 345 F.2d 910, 912* (1st Cir.), *cert. denied*, *382 U.S. 906, 86 S. Ct. 241, 15 L. Ed. 2d 158 (1965)*; Posner, *The Next Step in the Antitrust Treatment of Restricted Distribution: Per Se Legality*, 48 U.Chi.L.Rev. 6, 15 (1981).

[32]** In contrast to this overwhelming evidence of the reasonableness and procompetitive aspects of the defendants' exclusivity practices, plaintiff offers very scanty evidence of the practices' unreasonableness. Plaintiff suggests that defendants' exclusivity practices decrease the number of time slots in which viewers can tune in to a specific program. *See*, Park Declaration at paras. 91-96. This argument, however, does not support a finding that the particular exclusivity practiced here is unreasonable, **[*707]** just that exclusivity generally is unreasonable, which is not plaintiff's claim.

Plaintiff also argues that the exclusivity practices here are unreasonable because not enforced against plaintiff's alleged competitor, non-party KNTV Channel 11. It is undisputed that exclusivity is not enforced against KNTV. The evidence shows overwhelmingly, however, that KNTV is not in the same competitive position as is plaintiff. KNTV's signal coverage begins in San Jose, but extends only south, into the Salinas-Monterey area. The ratings services assign KNTV to that Salinas-Monterey market, from which it draws a majority of its viewers. *See*, Ross Declaration para. 11, Exhibit C, **[**33]** Tables 1-3; Fisher Declaration paras. 37-38; Park Declaration paras. 22, 50, 51, 71. Thus, there is a strong factual argument that KNTV 11 is not a "competitor" of the station defendants and, therefore, that defendants' exclusivity practices *should* not extend to KNTV. Even were KNTV in the same position as plaintiff, however, such disparate treatment would not support a finding of unreasonableness. *See, e.g., Zoslaw v. MCA Distributing Corp., 693 F.2d 870 (9th Cir.1982)*, *cert. denied*, *460 U.S. 1085, 103 S. Ct. 1777, 76 L. Ed. 2d 349 (1983)*; *c.f., Ron Tonkin v. Fiat Distrib., 637 F.2d at 1387*.

---

[13] Contrary to plaintiff's argument, there is no evidence showing that a supplier's revenues would be increased by licensing a program, for example M*A*S*H, to both a station defendant and plaintiff. Plaintiff's argument seems to be based upon the faulty assumption that the station defendant would pay the same price as it currently pays for a program which is not exclusive against plaintiff. The evidence shows, however, that a station defendant would *not* pay the same price, but a substantially lower one. There is no evidence showing that the combined prices paid by a station defendant and plaintiff for the same show would exceed the price currently paid by the station defendant for a license which is exclusive against plaintiff. The evidence, in fact, indicates the contrary. *See, e.g.*, argument of Jessica Pers, supplier defendants' attorney, at August 9, 1984, hearing, and deposition evidence cited immediately after note 13 in the text, *supra*.

Plaintiff also has offered no evidence showing that the length of the licenses and rights of first refusal, if they exist, are unreasonable under the circumstances of this case. It is interesting to note that plaintiff itself obtains licenses with similar terms. *See*, Crocker Declaration. This scanty evidence is entirely unpersuasive and cannot overcome the overwhelming evidence submitted by defendants that their exclusivity practices, including the length of the licenses and any rights of first refusal, are reasonable. Accordingly, it is appropriate to summarily hold that **[**34]** defendants' challenged exclusivity practices are reasonable. [14]

In summary, the court holds that defendants are entitled to summary judgment on plaintiff's rule of reason claim. Plaintiff has offered no evidence which would withstand a directed verdict for defendants on the issue whether defendants' challenged practices have injured competition. Because plaintiff cannot show that defendants' practices have injured competition, **[**35]** it cannot prevail on its rule of reason claim. Even if plaintiff could show an injury to competition, however, plaintiff cannot prevail because it cannot show that it is not in substantial competition with the station defendants or that the combined exclusivity practices are otherwise unreasonable under the circumstances of this case. Accordingly, the court hereby grants summary judgment for the defendants on plaintiff's rule of reason claim.

B. *Conspiracy Claim Against Station Defendants*.

Plaintiff's second antitrust claim is directed against the station defendants. Plaintiff contends that the station defendants have violated *Section 1* of the Sherman Act by a *per se* horizontal conspiracy to enforce exclusivity against plaintiff.

HN14[] Summary judgment should, as the Supreme Court has held, be "sparingly" granted where "motive and intent" play important roles in plaintiff's conspiracy claim and complete discovery may have been obstructed. *Poller v. Columbia Broadcasting, 368 U.S. at 473, 82 S. Ct. at 491*. That is not the situation here. The record here has been fully developed and plaintiff has been given the opportunity to offer evidence to the court supporting its conspiracy **[**36]** claim. No issues of motive or intent have been raised. If, under these **[*708]** circumstances, plaintiff fails to present evidence to support its claim that defendants conspired to enforce exclusivity against it, then summary judgment is appropriate. *See, e.g., First National Bank v. Cities Service Co., 391 U.S. 253, 88 S. Ct. 1575, 20 L. Ed. 2d 569 (1968)*; *Theatre Enterprises, Inc. v. Paramount Film Distributing Corp., 346 U.S. 537, 539-44, 74 S. Ct. 257, 258-61, 98 L. Ed. 273 (1954)*; *Mutual Fund Investors v. Putnam Management Co., 553 F.2d 620, 624 (9th Cir.1977)*.

The court will now address the evidence plaintiff offers to determine whether such evidence can withstand summary judgment on this conspiracy claim. For the reasons given below, the court finds that it cannot.

Plaintiff's first argument is that the defendants' parallel conduct permits an inference of conspiracy. Even if plaintiff could show that the defendants' conduct with respect to exclusivity is parallel, which defendants dispute, [15] such evidence could not, by itself, support plaintiff's conspiracy claim. *See, Theatre Enterprises v. Paramount, 346 U.S. at 541, 74 S. Ct. at 259*; *Workman v. State* ***[**37]*** *Farm Mutual Automobile Insurance Co., 520 F. Supp. 610, 620 (N.D.Cal.1981)*.

---

[14] Even if plaintiff offered stronger evidence to prove unreasonableness, the court might still find the practices reasonable as a matter of law where, as here, the facts are undisputed and the court is only required to apply the proper legal standard of "reasonableness" to those undisputed facts. *See, Continental T.V., Inc. v. GTE Sylvania, Inc., 694 F.2d 1132, 1135 (9th Cir.1982)*; *c.f.*, II P. Areeda & D. Turner, ***Antitrust Law*** para. 315 (1978); Schwarzer, *Summary Judgment Under the Federal Rules: Defining Genuine Issues of Material Fact, 99 F.R.D. 465, 469-77 (1984)*.

[15] *See*, Efigenio Declaration; Bell Deposition Exhibit 6; Thurston Deposition Exhibit 41; Wischmeyer Deposition Exhibit 17. This evidence shows that the defendants' exclusivity practices are different, not identical. Such evidence supports a finding that the defendants' conduct was not "parallel." *See, e.g., Du Pont Glore Forgan, Inc. v. American Telephone & Telegraph Co., 437 F. Supp. 1104, 1125 (S.D.N.Y.1977)*, *aff'd mem.*, ***578 F.2d 1366*** (2d Cir.), *cert. denied*, ***439 U.S. 970, 99 S. Ct. 465, 58 L. Ed. 2d 431 (1978)***.

Similarly, plaintiff's offered proof of an opportunity to conspire, even if accepted by a fact finder, cannot, even when combined with proof of parallel conduct, support a finding of conspiracy. *See, Kreuzer v. American Academy of Periodontology, 237 U.S. App. D.C. 43, 735 F.2d 1479, 1488 (D.C.Cir.1984)*; *Hanson v. Shell Oil Co., 541 F.2d 1352, 1359 (9th Cir.1976)*, *cert. denied*, *429 U.S. 1074, 97* ***[**38]*** *S. Ct. 813, 50 L. Ed. 2d 792 (1977)*.

HN15[] In order to go to the jury on its conspiracy claim, plaintiff must submit some sort of proof that the defendants actually conspired -- some "conscious commitment to a common scheme" -- or other special facts permitting a finding of conspiracy. *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 104 S. Ct. 1464, 1471, 79 L. Ed. 2d 775, 785-86 (1984)*; *see, e.g., First National Bank v. Cities Service Co., 391 U.S. 253, 88 S. Ct. 1575, 20 L. Ed. 2d 569*; *Independent Iron Works, Inc. v. U.S.* *Steel Corp., 322 F.2d 656, 661* (9th Cir.), *cert. denied*, *375 U.S. 922, 84 S. Ct. 267, 11 L. Ed. 2d 165 (1963)*.

Despite extensive discovery, plaintiff offers only one item of evidence to substantiate its claim that the station defendants conspired to enforce exclusivity against it. This one item is telephone calls by KTVU's Mr. Breen to other stations in the area, in which they discussed exclusivity practices. Defendants do not dispute that these telephone calls occurred. Rather, defendants present convincing and undisputed evidence showing that these calls were made *after* the alleged conspiracy began, on advice of counsel after plaintiff **[**39]** threatened litigation concerning exclusivity, and were undertaken to *discover* the exclusivity practices of other stations in the area. *See* Breen Deposition 221:22-222:2; Lutzker Affidavit of June 11, 1982, paras. 4-5. Such overwhelming and uncontested evidence shows that plaintiff's only item of evidence cannot, as a matter of law, substantiate its conspiracy claim. *C.f., Impro Products, Inc. v. Herrick, 715 F.2d 1267, 1280 (8th Cir.1983)*, *cert. denied*, *465 U.S. 1026, 104 S. Ct. 1282, 79 L. Ed. 2d 686 (1984)*.

In addition to their evidence rebutting plaintiff's meager evidence of conspiracy, the defendants have submitted overwhelming evidence that their exclusivity practices were undertaken in the exercise of their independent and sound business judgment. *See*, Fisher Declaration paras. 16, *et seq*.; evidence of procompetitive and legitimate purposes set out above, at 18-19; and evidence that the FCC sanctions defendants' exclusivity practices, which is an indicator of an independent procompetitive **[*709]** practice, *see 47 C.F.R. § 73.658(m)*; *Broadcast Music, Inc. v. CBS, 441 U.S. 1, 13, 99 S. Ct. 1551, 1559, 60 L. Ed. 2d 1 (1979)*; *c.f., Foster* ***[**40]*** *v. Maryland State Savings & Loan Association, 191 U.S. App. D.C. 226, 590 F.2d 928 (D.C.Cir.1978)*, *cert. denied*, *439 U.S. 1071, 99 S. Ct. 842, 59 L. Ed. 2d 37 (1979)*. This showing, which makes it more likely than not that defendants' exclusivity practices were the result of independent business judgment, is sufficient to compel summary judgment on plaintiff's conspiracy claim. *See, e.g., Admiral Theatre Corp. v. Douglas Theatre Co., 585 F.2d 877, 884 (8th Cir.1978)*.

The court is confronted with a situation where the plaintiff has offered no evidence from which a jury could find that the station defendants conspired to practice exclusivity against plaintiff. Despite extensive discovery, plaintiff has found no probative evidence showing a conspiracy. On the other hand, the defendants have submitted extensive, convincing evidence that they did not conspire but, rather, made independent decisions concerning exclusivity in the exercise of sound business judgment. Under the circumstances of this case, the court holds that summary judgment for the station defendants is appropriate on plaintiff's conspiracy claim. *C.f., First National Bank v. Cities Service, Co., 391 U.S. at* ***[**41]*** *274-90, 88 S. Ct. at 1585-93*. Accordingly, the court hereby grants defendants' motion for summary judgment on plaintiff's second claim of a horizontal conspiracy.

C. *Conspiracy by Miami Valley and ITNA*.

Plaintiff's third and last antitrust claim is that defendant Miami Valley illegally conspired with the Independent Television News Association (ITNA) to exclude plaintiff from membership in that organization. The facts underlying this claim are as follow.

The ITNA is a cooperative association which provides non-exclusive news feeds to its members. *See*, Bell Deposition at 129. The price charged for membership in the association is based upon the broadcasting market of the prospective station member. It is undisputed that, in 1980, plaintiff applied for membership in ITNA. Mr. Novitz, managing director of ITNA, originally indicated that ITNA would charge plaintiff a membership price based on the size of the San Jose market. Plaintiff's Exhibit 544; Plaintiff's Contentions paras. 214-18; Defendants' Response to paras. 214-18. Shortly thereafter, however, Novitz told plaintiff that its membership rate would be set at the San Francisco price, approximately four times the price **[**42]** originally discussed.

Plaintiff claims that Novitz' action in refusing to give plaintiff membership at a San Jose price was the result of a conspiracy with defendant Miami Valley (KTVU) to exclude plaintiff from the organization. Plaintiff's claim is thus not that it was excluded from membership in ITNA completely, but that it was excluded at anything but the San Francisco membership price.

Plaintiff offers no evidence from which a jury could find that KTVU conspired with ITNA to exclude plaintiff from membership. Plaintiff's only allegation is that KTVU, a board member of ITNA, voted to refuse to permit plaintiff membership at less than the San Francisco market rate. The board, however, consists of seven directors who jointly voted to extend plaintiff membership only at the established San Francisco market rate. *See*, Bell Deposition at 128-148; Davison Deposition at 609-610; Plaintiff's Exhibit 670. This evidence, without more, is ***HN16***[] legally insufficient to support a finding of conspiracy where, as here, plaintiff offers no proof of improper motive or any illegal concerted action. *See, e.g., Chapman v. Rudd Paint & Varnish Co., 409 F.2d 635, 643 n. 9 (9th Cir.1969)*; *Nelson* **[**43]** *Radio & Supply Co. v. Motorola, Inc., 200 F.2d 911, 914 (5th Cir.1952)*, *cert. denied*, *345 U.S. 925, 73 S. Ct. 783, 97 L. Ed. 1356 (1953)*.

Defendants, on the other hand, offer convincing evidence that there was no conspiracy and that ITNA's decision to permit plaintiff membership only at the "San Francisco" price was an independent business decision based upon its established **[*710]** practices. First, ITNA's membership rates are determined by the prospective member's market as defined by Arbitron's ADI book. PX 578. As noted above, the ratings book puts plaintiff in the same San Francisco market as all the station defendants. Evidence from plaintiff's own employee, Buckmaster, who negotiated with ITNA's Novitz, shows that Novitz did not, at the time of the original negotiations, know that plaintiff was listed in the San Francisco Arbitron market. Buckmaster Deposition 102-04, 120. In addition, KTVU's director Alan Bell's uncontradicted testimony is that KTVU did not conspire to exclude plaintiff from membership, but was perfectly willing to permit plaintiff to join ITNA at the same San Francisco price which KTVU paid for membership. Bell Deposition 133, 141.

The court finds **[**44]** that plaintiff cannot, as a matter of law, prevail on its ITNA conspiracy claim. First, plaintiff offers no proof of conspiracy. Secondly, ITNA's decision to abide by its normal pricing structure rather than give plaintiff preferential treatment cannot support such a claim. *See, United States v. Colgate & Co., 250 U.S. 300, 306, 39 S. Ct. 465, 467, 63 L. Ed. 992 (1919)*; *Hatley v. American Quarter Horse Association, 552 F.2d 646, 652 (5th Cir.1977)*; *Ricchetti v. Meister Brau, Inc., 431 F.2d 1211, 1214 (9th Cir.1970)*, *cert. denied*, *401 U.S. 939, 91 S. Ct. 934, 28 L. Ed. 2d 219 (1971)*; *Bridge Corp. of America v. American Contract Bridge League, 428 F.2d 1365, 1370 (9th Cir.1970)*, *cert. denied*, *401 U.S. 940, 91 S. Ct. 940, 28 L. Ed. 2d 220 (1971)*. In addition, plaintiff has offered no evidence whatsoever to prove an injury to competition, as opposed to injury to itself as a competitor, or proof that ITNA has market power, to support its conspiracy claim. *See, e.g., Phil Tolkan Datsun, Inc. v. Greater Milwaukee Datsun Dealers' Advertising Association, Inc., 672 F.2d 1280, 1287 (7th Cir.1982)*. For these reasons, plaintiff cannot prevail on its ITNA conspiracy **[**45]** claim and defendant Miami Valley is entitled to summary judgment on that claim.

In summary, the court holds that plaintiff cannot prevail on any of its three antitrust claims. There is no evidence in the record to show that the defendants conspired to exclude plaintiff from quality programming or to enforce exclusivity against plaintiff. Nothing in the record shows that defendants acted anything but reasonably in obtaining and enforcing exclusive licenses, or in any other challenged practice. Rather, the record shows that plaintiff is unwilling to pay the going market price for programs or news feeds, and is seeking redress from this grievance by means of an antitrust suit. This is not the purpose of antitrust laws. Antitrust laws were designed to protect free market competition, not the financial success of any particular competitor. Nothing in the record shows that defendants' challenged actions in any way have decreased or injured competition. [16]

---

[16] Given the court's disposition of this case, it need not address defendants' argument that the new Copyright Act exempts these exclusive licenses from coverage under the antitrust laws.

[46]** In accordance with the foregoing, the court hereby grants defendants' motion for summary judgment on the entire action.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN2[] **Antitrust & Trade Law, Sherman Act**

In evaluating conduct allegedly in violation of the Sherman Antitrust Act, federal courts have applied two tests. The "rule of reason" test requires the fact finder to decide whether under all the circumstances of the case, the restricted practice imposes a reasonable restraint on competition. The second approach, the "per se" test, is premised upon the principle that certain agreements or practices are so plainly anticompetitive and so often lacking any redeeming virtue that they are conclusively presumed illegal without further examination under the rule of reason test generally applied in the Sherman Act cases.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Governments > Legislation > Overbreadth

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN3[] **Per Se Rule & Rule of Reason, Per Se Violations**

Price fixing is not a question simply of determining whether two or more potential competitors have literally fixed a price. Literalness is overly simplistic and often overbroad. When two partners set the price of their goods or services they are literally "price fixing," but they are not per se in violation of the Sherman Act. Thus, it is necessary to characterize the challenged conduct as falling within or without that category of behavior to which courts apply the label "per se price fixing."

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Joint Contracts

Business & Corporate Compliance > ... > Business & Corporate Law > Cooperatives > Formation

Business & Corporate Law > Cooperatives > Member Duties & Liabilities

Business & Corporate Law > Joint Ventures > General Overview

Mergers & Acquisitions Law > Antitrust > Joint Ventures

HN4[] **Types of Contracts, Joint Contracts**

Joint ventures and other cooperative arrangements are not usually unlawful, at least as price-fixing schemes, where the agreement on price is necessary to market the product at all. Thus, agreements between members of a joint venture are subject to scrutiny under the rule of reason, and are upheld if there are legitimate business reasons for the activity.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Business & Corporate Law > Closely Held Corporations > General Overview

Business & Corporate Law > Joint Ventures > General Overview

HN5[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The essential elements of a joint venture are a contract, express or implied; a common purpose; a community of interest; and an equal right to control.

Headnotes/Summary

Summary

[*1] Nature of Action:** Purchasers of a custom built home sought damages for violations of the Consumer Protection Act from the realtors, builders, and development company which had created the subdivision, sold the lot, and built the house.

Superior Court: The Superior Court for Spokane County, No. 250095, John J. Ripple, J., on April 15, 1982, entered a judgment in favor of the purchasers.

Court of Appeals: Holding that a price and commission agreement was not in violation of the Consumer Protection Act under the circumstances and that other agreements had not harmed the plaintiffs, the court *reverses* the judgment.

Headnotes

WASHINGTON OFFICIAL REPORTS HEADNOTES

WA[1][] [1]

Consumer Protection > Unfair Competition > Per Se Violation > What Constitutes

Only actions such as price fixing, division of markets, group boycotts, and tying arrangements, which are anticompetitive on their face and which lack any redeeming features, are conclusively presumed to violate the Consumer Protection Act (RCW 19.86). Other actions are evaluated under the rule of reason.

WA[2][] [2]

Joint Ventures > Consumer Protection > Unfair Competition > Per Se Violation > Cooperative Price Arrangement

Price-fixing agreements between members of a joint venture are not per se violations of the Consumer Protection Act (RCW 19.86). If challenged under the act, such agreements are reviewed to determine if there are reasonable legitimate business needs and practices involved which, under the terms of *RCW 19.86.920*, would remove the agreements from the scope of the act.

WA[3][] [3]

Joint Ventures > Consumer Protection > Unfair Competition > Market Impact > Cooperative Price Arrangement

In determining whether an agreement between members of a joint venture to fix prices is reasonable and therefore not in violation of the Consumer Protection Act, the impact of the agreement upon the prevailing market area must be evaluated.

Counsel: *Robert J. Crotty, Terence R. Whitten, David K. DeWolf,* and *Lukins, Annis, Shine, McKay, Van Marter & Rein,* Spokane, Washington, for appellants.

John P. Giesa, Reed & Giesa, Spokane, Washington, and *Richard B. Price, Attorney at Law,* Omak, Washington, for respondents.

Kenneth O. Eikenberry, Attorney General, John R. Ellis, Deputy, and *Jon P. Ferguson, Assistant;* Seattle, Washington, *William H. Mellor III, Gale A. Norton, Alison D. Ling, Casey Shpall, Michael J. Myers, Randall & Danskin,* Spokane, Washington, on behalf **[***2]** of Mountain States Legal Foundation; and *John C. Guadnola* and *Thomas L. Fishburne, Gordon, Thomas, Honeywell, Malanca, Peterson & O'Hern,* Tacoma, Washington, on behalf of National Association of Realtors, Washington Association of Realtors, and Spokane Board of Realtors, amici curiae.

Judges: Green, A.C.J. Edgerton, J. Pro Tem., concurs. McInturff, J., dissents by separate opinion.

Opinion by: GREEN

Opinion

[*22] **[**184]** James S. Black and James S. Black, Inc., appeal a decision in a civil antitrust action involving an alleged conspiracy in restraint of trade and unfair competition in the development of a residential area in Spokane. Initially, this was a class action, but the class was decertified leaving only the Ballos as plaintiffs.

The issue which we find dispositive of this appeal is whether, after entering findings of fact, the court erred in concluding there were per se violations of *RCW 19.86.020*.030. We have considered this issue based solely on the court's findings and reverse.

[*23] While the trial court entered 85 findings of fact, the following are pertinent to the Ballos: James S. Black, Inc., is a real estate brokerage and development firm. James **[***3]** S. Black is a licensed real estate broker. Lowell Stack is an independent residential home building contractor, as is Orville Mark. In 1967, Mr. Black, Lowell Stack, Don Stack, Mr. Mark, Guy Wilcox and Lyle Wilcox incorporated Comstock Development Corporation (CDC). Each owned 20 percent of the shares of CDC except Guy and Lyle Wilcox, who owned 10 percent each. Mr. Black was the president of CDC; Mr. Mark and Lowell Stack were also officers. CDC, with capital received from the shareholders and other borrowed capital, purchased undeveloped land in the Comstock area. When CDC was formed, Lowell Stack and Mr. Mark expected the corporation would supply them with land upon which to construct homes; the Wilcox brothers anticipated CDC would supply **[**185]** them with excavation work; and Mr. Black expected his real estate company would market the Comstock subdivision.

CDC's sole function has been the development and sale of residential building lots. CDC carefully controlled the numbers, sizes, styles and prices of homes built in the area. In 1976 and thereafter, the shareholders of CDC who were also builders selected the lots in rotation among themselves. No other builders **[***4]** were involved after 1976 except Dave Mark and Paul Rodeen, close relatives of two officer shareholders. Shortly after the lots were selected, earnest money agreements were executed between CDC and the builder. "It was agreed that the builders would pay [CDC] a nominal down payment of $ 25.00 to hold the lot until it was 'sold' by the builder." When a customer desired to purchase a lot and have a custom home built, the builder to whom the lot had been allocated would execute an earnest money agreement with his customer for the sale of the lot before construction of the home commenced. At the time of closing, CDC deeded the lot directly to the builder's customer.

In 1977, Gary and Kristin Ballo, working with Glenmar **[*24]** Freeman of Sullivan Realty, decided to purchase a lot in the Comstock area. The lot was offered to the Ballos for $ 11,000 by Lowell Stack. The Ballos agreed to that price without negotiation. The closing agent paid CDC $ 9,350 and Lowell Stack the difference of $ 1,650, pursuant to CDC's apparent authorized builder's discount. The lot was deeded directly to the Ballos from CDC. The Ballos agreed to the following conditions: (1) use the services of the **[***5]** builder to whom the lot was allocated; and (2) pay 6 percent commission on the combined price of the lot and the estimated price of the house to be constructed.

In October 1978 the Ballos filed a class action complaint against James S. Black, Inc., Sullivan Realty, Inc., CDC and Messrs. Black, Stack and Mark. Count 1 alleged a price fixing and tying arrangement in violation of the Consumer Protection Act (CPA) and count 2 alleged breach of fiduciary duty and constructive fraud. The Ballos sought certification of the class of all purchasers of speculative and custom homes in the Comstock subdivision. The court determined *CR 23(a)* was satisfied but certified a smaller class consisting of the Ballos and other purchasers of custom homes built by Stack or Mark in the Comstock area. A notice was sent to purchasers in the potential class informing them of their rights, including the right to opt out. Shortly after the notices were received, the court learned that Messrs. Black, Stack and Mark had been responsible for personal contact with most of the potential class members. The court ruled this contact violated the spirit of the certification order and appointed two special masters **[***6]** to determine whether the contact influenced the class members' decision to opt out, as a vast majority of them had done. Following the special masters' report, the court found the potential class members were supplied with sufficient information to make a voluntary and intelligent decision, the class was decertified and this action proceeded with the Ballos as sole plaintiffs. Consequently, we are concerned only with the Ballos and the circumstances surrounding the purchase of their lot in the Comstock area.

[*25] Following a bench trial, the court determined the defendants combined and conspired with other builders to fix prices of Comstock lots and homes in restraint of trade, *RCW 19.86.030*, and constituted an unfair method of competition, *RCW 19.86.020*. Such price fixing, the court concluded, was a per se violation of these statutes. The court found that as a result of the agreement between Black, Stack and Mark to establish the minimum price at which the lots would be offered for sale by CDC to the public, the Ballos were damaged in the amount of $ 1,650 -- the difference between what Ballos paid for the lot and CDC's price to Lowell Stack. It was also determined the **[***7]** agreement to charge a 6 percent commission on custom homes damaged the Ballos in the amount of $ 5,500. On the Ballos' motion, a hearing was held and the **[**186]** court awarded them treble damages of $ 21,450 plus costs and attorney fees in the amount of $ 213,731.48. A $ 110,000 settlement was approved between the Ballos and all defendants except Mr. Black and James S. Black, Inc. The settlement amount was deducted and judgment for $ 125,181.48 was entered against Mr. Black and his company. A permanent injunction was also entered enjoining Black and James S. Black, Inc., from certain activities when acting in concert with two or more builders.

Mr. Black and James S. Black, Inc., appeal claiming the court blindly applied the per se rule, failed to analyze the relationship of the alleged conspirators, and erroneously condemned legitimate restraints established by a joint venture development corporation. The Ballos cross-appeal challenging the court's decertification of the class.

The Consumer Protection Act was enacted in 1961 to promote free competition in the marketplace for the ultimate benefit of the consumer. *State v. Black, 100 Wn.2d 793, 799, 676 P.2d 963 (1984)*. **[***8]** *RCW 19.86.030* provides: "Every contract, combination, in the form of trust or otherwise, or conspiracy in restraint of trade or commerce is hereby declared unlawful." This provision is patterned after and contains nearly identical language to the federal **[*26]** Sherman Antitrust Act, *15 U.S.C. § 1*. [1] When the Legislature enacted the CPA, it anticipated our courts would be guided by the interpretation given by the federal courts to the corresponding federal statutes. *RCW 19.86.920*.

HN2[] ***WA[1]***[] [1] In evaluating conduct allegedly in violation of the Sherman Antitrust Act, **[***9]** federal courts have applied two tests. The "rule of reason" test requires the fact finder to decide whether under all the circumstances of the case, the restricted practice imposes a reasonable restraint on competition. *Arizona v. Maricopa Cy. Med. Soc'y, 457 U.S. 332, 344, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*. The second approach, the "per se" test, is premised upon the principle that certain agreements or practices are so plainly anticompetitive and so often lacking any redeeming virtue that they are conclusively presumed illegal without further examination under the rule of reason test generally applied in the Sherman Act cases. *Broadcast Music, Inc. v. Columbia Broadcasting Sys., Inc., 441 U.S. 1, 9, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*; *National Soc'y of Professional Eng'rs v. United States, 435 U.S. 679, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978)*; *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*. Traditionally, practices which are deemed to be unlawful per se are price fixing, division of markets, group boycotts and tying arrangements. *Arizona v. Maricopa Cy. Med. Soc'y, supra;* **[***10]** *Northern Pac. Ry. v. United States, 356 U.S. 1, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*. When conduct is found to fall within one of these categories, any explanation of why the act was done or what its effect might be in a particular case is of no consequence or materiality. *Plymouth Dealers' Ass'n v. United States, 279 F.2d 128, 131 (9th Cir. 1960)*.

WA[2][] [2] However, not all arrangements among actual or potential competitors that impact prices are per se violations **[*27]** of the antitrust laws. As the Court said in *Broadcast Music, Inc. v. Columbia Broadcasting Sys., Inc., 441 U.S. at 9*:

> ***HN3***[] [Price fixing] is not a question simply of determining whether two or more potential competitors have literally "fixed" a "price." . . . Literalness is overly simplistic and often overbroad. When two partners set the price of their goods or services they are literally "price fixing," but they are not *per se* in violation of the Sherman Act. Thus, it is necessary to characterize the challenged conduct as falling within or without that category **[***11]** of **[**187]** behavior to which we apply the label "*per se* price fixing."

HN4[] (Citation omitted.) And, at page 23: "Joint ventures and other cooperative arrangements are . . . not usually unlawful, at least not as price-fixing schemes, where the agreement on price is necessary to market the product at all." Thus, agreements between members of a joint venture are subject to scrutiny under the rule of reason, *Copperweld Corp. v. Independence Tube Corp., __ U.S. __, 81 L. Ed. 2d 628, 104 S. Ct. 2731, 2740-41 (1984)*, and are upheld if there are legitimate business reasons for the activity. *North Am. Soccer League v. National Football League, 670 F.2d 1249, 1259 (2d Cir. 1982)* (citing *Standard Oil Co. v. United States, 221 U.S. 1, 55 L. Ed. 619, 31 S. Ct. 502 (1911)*); *McElhinney v. Medical Protective Co., 549 F. Supp. 121, 132 n.7 (E.D. Ky. 1982)*; 70 Cal. L. Rev. 595, 657 (1982). Furthermore, *RCW 19.86.920*, which provides:

> It is, however, the intent of the legislature that this act shall not **[***12]** be construed to prohibit acts or practices which are reasonable in relation to the development and preservation of business or which are not injurious to the purblic interest . . .

supports the conclusion this case should be evaluated pursuant to the rule of reason. We proceed to do so based on the findings of fact entered by the trial court.

---

[1] ***HN1***[] -

15 U.S.C. § 1 provides in part:

"Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal."

HN5[] The essential elements of a joint venture are: (1) a contract, express or implied; (2) a common purpose; (3) a community of interest; and (4) an equal right to control. *Paulson v. Pierce Cy., 99 Wn.2d 645, 654, 664 P.2d 1202* ***[*28]*** *(1983)*; *Goeres v. Ortquist, 34 Wn. App. 19, 21, 658 P.2d 1277 (1983)*. "An ownership or proprietary interest in the subject matter of the enterprise by all parties is not essential to creation of a joint venture." *Paulson v. Pierce Cy., supra at 655*.

Here, Black, Mark, the Wilcoxes and the Stacks agreed to enter into a venture to purchase, develop and sell residential lots in the Comstock Addition to Spokane. All the elements of a joint venture are present. **[***13]** To implement the venture, they formed CDC, a closely held corporation. If the corporation were dissolved, the joint venturers would have owned the land. These joint venturers anticipated CDC would supply them with either building, excavation or real estate marketing work. To market the lots in the subdivision these joint venturers, who in reality owned undivided interests in the lots, of necessity had to agree upon the sale price of each lot, which they did. As noted in *Broadcast Music, Inc.,* this is not the type of price determination that is forbidden by antitrust laws.

Further, there were legitimate business reasons for what occurred and what the Ballos complain was injurious to them. The trial court found (1) through the hard work and imaginative foresight of the shareholders, CDC achieved a high degree of success in its effort to sell the subdivided property; (2) there were sound reasons for limiting the annual number of lots sold; (3) the services of James S. Black, Inc., were necessary for the ultimate success of Comstock and therefore it was entitled to be paid for its services; (4) the 6 percent real estate commission was paid to CDC which in turn paid James S. **[***14]** Black the 6 percent commission; and (5) the lot the Ballos purchased was deeded directly to them from CDC. These findings establish that CDC's activities were legitimate and necessary to accomplish the purposes of the joint venture.

WA[3][] [3] The rule of reason analysis also requires consideration of the impact of the activity upon competition in the relevant geographic market. *Gough v. Rossmoor Corp., 585 F.2d 381 (9th Cir. 1978)*, *cert. denied, 440 U.S. 936, 59 L.* ***[*29]*** *Ed. 2d 494, 99 S. Ct. 1280 (1979)*; *Harold Friedman Inc. v. Thorofare Markets Inc., 587 F.2d 127, 142-43 (3d Cir. 1978)*. *See generally* *United States v. First Nat'l Bank & Trust Co., 376 U.S. 665, 667-68, 12 L. Ed. 2d 1, 84 S. Ct. 1033 (1964)*; *Times-Picayune Pub'g Co. v. United States, 345 U.S. 594, 97 L. Ed. 1277, 73 S. Ct. 872 (1953)*. It is **[**188]** essential that the geographic market be defined and the burden of establishing it rests on the plaintiff. *Gough v. Rossmoor Corp., supra at 385, 389*; *see also* *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. at 53 n.21*. The relevant **[***15]** geographic market for purposes of ***antitrust law*** is determined, in part, by the area to which the purchaser can reasonably turn to obtain the product. *Gough v. Rossmoor, at 389*.

Here, while the court found the "[l]ots and new homes offered for sale in the Comstock area are a separate, unique, identifiable, exclusive portion of the Spokane real estate market", it also found "[t]here were some homes in other real estate developments in the Spokane County area which were comparable in quality, size and price range to some homes in the Comstock area"; and that "[p]rior to deciding to purchase in Comstock, [the Ballos] considered new and used homes throughout Spokane County . . ." and "with the assistance of Glenmar Freeman of Sullivan Realty, they examined various properties." No error was assigned to these findings; therefore, they are verities. Since the Ballos examined properties in the Spokane area, it was the relevant market. The Comstock area comprised only about 240 lots and any price fixing impact on the relevant market was minimal, if not nonexistent.

Thus, we hold that because (1) the land in the Comstock area was actually owned by Black, Stack, Mark, and the **[***16]** other two minor shareholders in the name of CDC as a joint venture, and (2) the Comstock area occupied a minuscule portion of the geographic market, Spokane County, the setting of the price for the sale of lots and the 6 percent real estate commission paid to CDC were reasonable and did not violate *RCW 19.86.030*.

[*30] Finally, *RCW 19.86.090* provides that a private citizen who brings an action under the CPA must show injury to his business or property. The court found two other agreements to be per se violations of *RCW 19.86.020* and .030. The first concerned the sale of lots, prior to 1973-74, by CDC to the general public. Since the Ballos purchased their home after this alleged practice was discontinued, they do not have standing to challenge it. The second agreement related to increasing the minimum size of the homes above that specified in the covenants. The court found this agreement in effect increased the minimum base price at which homes could be offered in Comstock. This alleged conduct did not affect the Ballos. They contracted to have their house constructed at a size exceeding both the minimum size requirements of the covenant and the size requirement in the **[***17]** builders' agreement. Since the Ballos failed to show any injury to either their business or property by reason of these two agreements, it was error to hold they were per se violations of the act.

Further, we find no abuse of discretion in the court's decertifying the class action or requiring defendants to pay for the services of a special master.

In summary, the Ballos were not damaged. After searching for and considering other comparable properties in Spokane, they selected a lot and house plan in the Comstock area. Having made that choice, it is apparent the Comstock area was competitive with other comparable areas in Spokane County. The Ballos obtained what they bargained for at a price they agreed to pay. There was no unreasonable restraint involved.

In light of our holding, we need not consider the parties' other contentions.

Reversed.

Dissent by: McINTURFF

Dissent

McInturff, J. (dissenting)

I respectfully dissent because I disagree with the majority's characterization of **[*31]** Black, Stack and Mark as members of a joint venture who could legitimately fix prices on the lots in question.

The following additional facts are pertinent to my analysis: The sole function **[***18]** of Comstock Development Co. (CDC) was the **[**189]** development and sale of residential building lots. CDC never owned, built or sold any houses. In its early years, CDC was faced with low market demand and substantial mortgage payments. In order to meet its financial obligations from 1967 to the mid-1970's, CDC sold lots to the general public in competition with the builders who had purchased lots from it. These builders included the Stacks and Orville Mark, shareholders in CDC, and other, private builders.

Sometime during 1973 or 1974, the shareholders agreed CDC would no longer offer lots for sale to builders in general or to the public. From that time on, lot sales were restricted to the two shareholder builders and four non-shareholder builders. [2] These builders met at least annually and allocated the lots then available on a rotation basis. Black, Stack and Mark met periodically to establish minimum prices at which the lots would be offered for sale, through the builders, to the general public. Simultaneously, a second price was established for each lot which reflected a 15 percent discount from the minimum offering price. It was understood and agreed that the minimum **[***19]** prices were the starting point for builder-consumer sales and were 15 percent higher than the amount CDC was willing to sell and the builders were willing to pay for the lots.

In the early years of CDC, if a consumer wanted to build a custom home, the only real estate commission involved would be a 6 percent commission paid by CDC to James S. Black, Inc. (Black, Inc.), based on the sale price of the *lot*. During these years, no commissions were paid on the value **[*32]** of a completed custom home. After 1973-74, lots were offered to consumers on two conditions: first, the consumer had to agree to have his custom home built by the builder who had been allocated the lot. Second, he had to agree to pay a 6 percent commission to Black, Inc., on the price of the lot *and* **[***20]** the estimated cost of the custom home. This 6 percent commission was charged even though the house was not constructed until after the consumer had purchased the lot, and in some instances, when Black, Inc., had performed no services beyond the initial lot sale. The admitted purpose of

[2] These non-shareholder builders were Don O'Connell, who participated from 1974 to 1976, George Dullanty, who participated in 1974 and 1975, Dave Mark, who participated from 1974 to 1981, and Paul Rodeen, who participated from 1978.

the 6 percent commission on custom homes was to *equalize* the prices of custom and speculative homes so that the custom home buyer did not enjoy an advantage over the speculative home buyer. [3]

[*21]** The Comstock lot which the Ballos selected in 1977 was a lot that had been allocated to Stack, a shareholder builder. Previously, CDC had agreed to sell and Stack had agreed to pay $ 9,350 for the lot. The lot was offered to the Ballos for $ 11,000, the minimum price set by Black, Stack and Mark. The closing agent paid CDC $ 9,350 and paid Stack the $ 1,650 difference. The Ballos did not see the deed at closing and did not learn until later that CDC had previously agreed to sell the lot for $ 9,350.

The Ballos contracted with Stack to build them a custom home on their lot. To the contracted price, a commission of $ 5,500 was added which was split 50-50 between Black, Inc., and Sullivan Realty. Neither Black, Inc., nor Sullivan Realty, Inc., performed any services other than those connected with the sale of the lot.

[*33] The trial court concluded that Black, Mark and Stack and the other builders engaged in agreements and understandings **[**190]** which were contracts, combinations and conspiracies to fix prices of lots and new homes in Comstock, a per se violation of *RCW 19.86.030*, as well as an unfair method of competition in violation of *RCW 19.86.020*. The trial court **[***22]** based its conclusion on its findings that (1) Black, Stack and Mark established the minimum price at which the lots were offered to potential consumer buyers, (2) Black, Stack and Mark communicated with the other builders the minimum price of the lots for resale to consumers as well as informing them that their price was discounted 15 percent, (3) Black, Stack and Mark and the other builders understood and agreed that this minimum price was the guideline for builder-consumer sales and (4) Black, Stack and Mark agreed that all purchasers of custom houses would pay a 6 percent commission to Black, Inc., and they enforced this agreement with the other builders. In my judgment, the trial court's conclusions were correct.

Traditionally, the practices which the federal courts have deemed to be per se unlawful are price fixing, division of markets, group boycott, and tying arrangements. *Arizona v. Maricopa Cy. Med. Soc'y, 457 U.S. 332, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*. When conduct is found to fall within one of these categories, any explanation of why the act was done or what its effect might be in a particular case is of no consequence or materiality. *Plymouth* **[***23]** *Dealers' Ass'n v. United States, 279 F.2d 128, 131 (9th Cir. 1960)*.

Categorically, restraints of trade are either horizontal, an agreement between competitors at the same level of the market structure, or vertical, agreements between competitors at different levels of the market structure, *e.g.,* manufacturers and distributors, *United States v. Topco Assocs., 405 U.S. 596, 31 L. Ed. 2d 515, 92 S. Ct. 1126, 1136 (1972)*. In price fixing cases, both horizontal and vertical agreements are per se antitrust violations. *White Motor Co. v. United States, 372 U.S. 253, 9 L. Ed. 2d 738, 83 S. Ct. 696 (1963)*; *United States v. Parke, Davis & Co., 362 U.S. 29, 4* ***[*34]*** *L. Ed. 2d 505, 80 S. Ct. 503 (1960)*; *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 95 L. Ed. 219, 71 S. Ct. 259 (1951)*.

The agreement between Black, Stack and Mark and the other builders, that the price they fixed for the lot would be the price at which all of the builders (horizontal competitors) would offer the lots for sale, shifted the defendants' activity from the arena of legitimate corporate decision-making **[***24]** into the realm of antitrust violations. In other words, Black, Stack and Mark set the prices at which Stack and Mark, as well as their horizontal competitors, the other builders, would charge a consumer for a lot in Comstock. It must be remembered that while setting these prices Stack and Mark retained their competitor identity and were competing with one another in Comstock.

---

[3] In a letter on December 19, 1978, to the National Association of Realtors seeking their "legal muscle", Black explained the rationale underlying the commission on custom homes:

> It is vitally important to this marketing program and to the builders involved that any custom houses built in the area carry the same costs of this marketing program as the speculative houses with which it competes. If this were not true, the builder would find that his speculative houses were being used as models to build custom houses. Thus, the speculative house would stand on the market while the customer saved the sales commission by going across the street to build a custom house.

There are no antitrust problems with the defendants forming CDC to market Comstock lots and setting the price at which CDC would sell its product. In fact, that is what was done when the defendants agreed that CDC would charge $ 9,350 to the builder who was allocated the Ballos' lot. The antitrust problems arose when the defendants *and* the other builders mutually agreed that the $ 11,000 price would be the agreed minimum price for builder-consumer sales. Thus, I would hold the agreement between Black, Mark and Stack and the other builders to set the price at which a builder would sell a lot purchased from CDC was an agreement between competitors and a per se violation of *RCW 19.86.030*.

The second agreement which directly affected the Ballos was the agreement between Black, Stack and Mark and the other **[***25]** builders to charge all custom home purchasers a 6 percent commission on the combined value of the lot and house. The admitted purpose of this agreement was to "equalize the prices of custom and speculative homes so custom home buyers did not enjoy any advantage over the speculative home buyer." This agreement clearly falls within the classical definition of price fixing:

> **[*35]** **[**191]** [A] combination formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity in interstate or foreign commerce is illegal *per se*.

United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 223, 84 L. Ed. 1129, 60 S. Ct. 811 (1940). I would hold the agreement between Black, Stack and Mark and the other builders to equalize prices, by imposing a 6 percent commission on custom home buyers, is an agreement between horizontal competitors in restraint of trade and a per se violation of *RCW 19.86.030*.

I also agree with the trial court's conclusion that the agreements which constituted price fixing in per se violation of *RCW 19.86.030* also constituted unfair methods of competition in violation of *RCW* ***[***26]*** *19.86.020*.

Our State's unfair competition statute is *RCW 19.86.020*: "Unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are hereby declared unlawful." In order to establish a per se consumer protection violation based on *RCW 19.86.020* the conduct must meet a twofold test: (1) is the action illegal, *i.e.,* is it unlawful; and (2) is it against public policy as declared by the Legislature or the judiciary. *Salois v. Mutual of Omaha Ins. Co., 90 Wn.2d 355, 358, 581 P.2d 1349 (1978)*.

I have already opined that the defendants' actions constituted price fixing in per se violation of *RCW 19.86.030* and were the proximate cause of the Ballos' damages. *RCW 19.86.920* provides in part: "the purpose of this act is . . . to protect the public and foster fair and honest competition." Thus, the Ballos have established the elements necessary for a per se violation of the unfair methods of competition clause of the CPA.

The majority takes the position that CDC was a corporate joint venture and the actions condemned by the trial court were merely actions necessary to market the joint venture's product. I recognize **[***27]** that persons who would otherwise be competitors may legitimately pool their capital **[*36]** and share profits and losses. *Maricopa, 457 U.S. at 355-57*; *see* *Broadcast Music, Inc. v. Columbia Broadcasting Sys., Inc., 441 U.S. 1, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*. However, the fundamental flaw in the majority's position is that Black, Stack and Mark were not the only actors in the conspiracy. The antitrust problem arose when the joint venturers banded together with the other builders who were not corporate officers and agreed to set resale prices on lots and charge a 6 percent commission on the sale of custom homes. Once the defendants acquired the land from CDC and sought to resell it to the public while maintaining their separate and distinct economic identities as competitors, they were no longer acting solely as joint venturers. When the other builders were made a part of this scheme, the trial court properly found there was an agreement among horizontal competitors which constituted illegal price fixing.

The remaining issues raised by Black concern the Superior Court's (1) issuance of a permanent injunction which prohibited Black from **[***28]** participating in horizontal price fixing, (2) award of treble damages and (3) attorney fees, and (4) denial of Black's motion for an independent appraisal of the Ballo home and lot. Because I am in a dissenting position, I will not treat these issues at length. Suffice it to say that the facts and the pertinent law support a holding that the trial court did not abuse its discretion with regard to these items.

Finally, I turn to the Ballos' cross appeal which assigns error to rulings made by the Superior Court on the questions of certification and decertification of their class action. [4] Again, these questions are ones left **[**192]** to the discretion **[*37]** of the trial court, and I find no abuse of discretion on the record.

[*29]** In summary, I would affirm the judgment of the Superior Court that Black, Stack and Mark engaged in illegal price fixing in violation of *RCW 19.86.030* and thereby engaged in unfair methods of competition in per se violation of *RCW 19.86.020*. I would also affirm the Superior Court's award of treble damages, costs and attorney fees, and its rulings regarding certification and decertification of the class. Pursuant to the Consumer Protection Act, *RCW 19.86.090*, I would award the Ballos their reasonable attorney fees for this appeal.

---

[4] After the trial court had sent notice of certification of a class action to the other purchasers of custom homes built by Stack or Mark in the subdivision, Black, Stack and Mark personally contacted most of the class members. This improper action by Black, Stack and Mark necessitated that the trial court appoint two special masters to investigate. They determined that the potential class members had been supplied with sufficient information to make a voluntary and intelligent decision, and that they had decided to opt out of the class.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

International Law > Authority to Regulate > General Overview

HN3[] International Law, Dispute Resolution

For the court to have subject matter jurisdiction plaintiffs must satisfy either 15 U.S.C.S. § 6(a)(1)(A) or (1)(B), and also § 6(a)(2). To satisfy § 6(a)(1)(A) plaintiffs must demonstrate that defendants' alleged conduct has had a direct and substantial effect on either intra-United States trade or import trade.

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] Antitrust & Trade Law, Sherman Act

To satisfy 15 U.S.C.S. 6(a)(1)(B) plaintiffs must show that defendants' alleged conduct has had a direct, substantial, and reasonably foreseeable effect on export trade or export commerce of a person engaged in such trade or commerce in the United States.

Antitrust & Trade Law > Sherman Act > Penalties

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] Sherman Act, Penalties

To state a claim under § 1 of the Sherman Act plaintiffs must show injury to a market or to competition in general, not merely injury to individuals.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > Preliminary Considerations > Jurisdiction > General Overview

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN6[] Jurisdiction, Subject Matter Jurisdiction

Personal jurisdiction will result if the nonresident defendant's activities within a state are "substantial" or "continuous and systematic," because there is a sufficient relationship between the defendant and the state to support jurisdiction even if the cause of action is unrelated to the defendant's forum activities. However, even if defendant's activities are not so pervasive as to subject him to general personal jurisdiction, personal jurisdiction may nevertheless obtain, and will turn on the quality of defendant's contacts in relation to the cause of action. Under this second test, the following factors must be present: (1) The nonresident defendant must do some act or consummate some transaction with the forum or perform some act by which he purposefully avails himself of the privilege of conducting activities in the forum, thereby invoking the benefits and protections of its laws. (2) The claim must be one which arises out of or results from the defendant's forum-related activities. (3) Exercise of jurisdiction must be reasonable.

Opinion by: [*1] CARTER

Opinion

ORDER RE MOTIONS TO DISMISS

Plaintiffs William J. McGlinchy ("McGlinchy") and Dan-De Products Corporation ("Dan-De") bring in their first amended complaint in this action against defendants, seeking relief for antitrust violations under the Sherman Act, and related pendent claims for breach of contract, tort, and violations of the California antitrust laws. This court ultimately has jurisdiction because of diversity of citizenship of the plaintiff and defendant parties. The matter is before the court on defendant Shell International Chemical Company Ltd.'s ("SICCO") motion to be dismissed entirely from the action against it, because of lack of subject matter jurisdiction over counts one and nine (joined by the other defendants also seeking dismissal of counts two and ten), lack of personal jurisdiction, and failure to state claims.

This case principally centers around certain agreements between defendant Shell Chemical Co. ("Shell Chemical") and Dan-De. The first amended complaint alleges that in 1978, plaintiffs and Shell Chemical entered into an oral agreement, and in 1979 they entered into a written agreement, pursuant to which Dan-De was appointed as **[*2]** the exclusive representative of Shell Chemical regarding the promotion and solicitation of orders for the product known as polybutylene ("PB"), used in the pipe industry, in certain countries in Southeast Asia and Saudi Arabia. It is alleged that in 1981 McGlinchy and Shell Chemical entered into a written contract whereby McGlinchy was to act as consultant to Shell Chemical for the marketing and sale of PB in Latin America. The first amended complaint alleges that around this time period, at the encouragement of Shell Chemical and SICCO, McGlinchy and Dan-De entered into various contractual arrangements with local firms in several countries to encourage the use of PB. The crux of the first amended complaint is that Shell Chemical breached and wrongfully terminated its oral and written agreements with Dan-De. It is alleged that at sometime in 1981 Shell Chemical, Shell Oil Co. ("Shell Oil"), and Pecten Chemicals, Inc. ("Pecten"), took various actions in breach of their agreements with plaintiffs. Plaintiffs also allege that these breaches were at the inducement of and were in concert with the remaining defendants. The actions of defendants were undertaken for the alleged purpose **[*3]** of eliminating McGlinchy and Dan-De as representatives of Shell Chemical and as sells of PB and PB related products, and for the resulting financial benefit of defendants.

All defendants move to dismiss counts one and nine of the first amended complaint pursuant to *Fed. R. Civ. P. 12(b)(1)* for lack of subject matter jurisdictiona. In count one, entitled "Sherman Act, § 1 - Concerted Refusal to Deal Against All Defendants," plaintiffs allege that pursuant to a conspiracy defendants took various actions to terminate plaintiffs' agreement with Shell Chemical to be its exclusive representative in the sale, promotion, and distribution of PB in Southeast Asia and other areas, to terminate all other business relations with plaintiffs, and thus refused to deal with plaintiffs in any matters involving PB. Defendants argue that the court lacks subject matter jurisdiction as to count one by point to *15 U.S.C. § 6(a)*. Plaintiffs do not contend that *Section 6(a)* is inapplicable, but urge that it nevertheless does not prevent subject matter jurisdiction in this case. The court concludes that defendants' interpretation of *Section 6(a)* is correct, and the court thus lacks support matter jurisdiction **[*4]** over count one.

HN1[] *Section 6(a)* provides:

Sections 1 to 7 of this title shall not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign nations unless -

(1) such conduct has a direct, substantial, and reasonably foreseeable effect -

(A) on trade or commerce which is not trade or commerce with foreign nations, or on import trade or import commerce with foreign nations; or

(B) on export trade or export commerce with foreign nations, of a person engaged in such trade or commerce in the United States: and

(2) such effect gives rise to a claim under the provisions of sections 1 to 7 of this title, other than this section.

If sections 1 to 7 of this title apply to such conduct only because of the operation of paragraph 1(B), then sections 1 to 7 of this title shall apply to such conduct only for injury to export business in the United States.

HN2[] *Section 6(a)* has been construed to "exempt from United States ***antitrust law*** conduct that lacks the requisite domestic effect, even where such conduct originates in the United States or involves American-owned entities operating abroad." *Eurim-Pharm GmbH v. Pfizer, Inc., et al.,* 1984-2 **[*5]** Trade Cas. § 66,028 at 66,815 (SDNY 9/25/84).

Because it is clear from the amended complaint that the conduct challenged in count one involves trade or commerce (other than import trade or import commerce) with foreign nations, ***HN3***[] for the court to have subject matter jurisdiction over this count plaintiffs must satisfy either subsection (1)(A) or (1)(B) of *Section 6(a)*, anbd also subsection (2) of the statute.Plaintiff satisfies neither subsection (1)(A) nor (1)(B). To satisfy subsection (1)(A) plaintiffs must demonstrate that defendants' alleged conduct has had a direct and substantial effect on either intra-United States trade or import trade. Nowehere in count one do plaintiffs allege any effect on these two areas of trade, and thus plaintiffs cannot rely on subsection (1)(A).

HN4[] To satisfy subsection (1)(B) plaintiffs must show that defendants' alleged conduct has had a direct, substantial, and reasonably forseeable effect on export trade or export commerce of a person engaged in such trade or commerce in the United States. The injury alleged by plaintiffs in count one is to customers or potential customers located in Southeast Asia and to plaintiffs themselves. Neither plaintiffs' **[*6]** customers nor plaintiffs come within the ambit of subsection (1)(B). The customers are not alleged to be engaged in the export trade in the United States. Furthermore, plaintiffs do not allege a direct, substantial, and reasonably forseeable effect on their export trade. In fact, it is not entirely clear that plaintiffs are complaining at all about defendants' conduct having to do with plaintiffs' *export* trade.

Nevertheless, plaintiffs' allegations as to injury to themselves does not satisfy subsection (2) of *Section 6(a)*, in that ***HN5***[] to state a claim under Section 1 of the Sherman Act plaintiffs "must show injury to a market or to competition in general, not merely injury to individuals." *Fine v. Barry and Enright Prod., 731 F.2d 1394, 1399 (9th Cir. 1984)*. Plaintiffs' allegations of injury to themselves does not state a claim of injury to a market or competition in general. Thus, because the alleged wrongful conduct of defendants involves commerce with foreign nations, and because the requirements of *Section 6(a)* have not been fulfilled, the court lacks subject matter jurisdiction over count one and this count is thus dismissed.

The joining defendants seek to dismiss **[*7]** count two, entitled "Sherman Act, §§ 1 and 2 - Unilateral Refusal to Deal and Attempt to Monopolize Against Shell Chemical," for the same reasons that count one was dismissed. In count two plaintiffs allege that Shell Chemical terminated its agreement with plaintiffs, has refused to do business with plaintiffs, and commited the acts alleged in count one with the specific intent of controlling the resale price and marketing of PB and of maintaining a monopoly in the manufacture and sale of PB and PB products. The court concludes that the reasoning set forth above dismissing count one is equally applicable to count two, and thus count two is dismissed.

Defendants move to dismiss count nine, entitled "California Cartwright Act Claim Against All Defendants," for lack of subject matter jurisdiction. In count nine plaintiffs reallege as a violation of *Cal. Bus. & Prof. Code §§ 16700 et seq.* the same paragraphs which constitute the Sherman Act claim set out in count one. Regardless of subject matter jurisdiction, it appears to the court that count nine should be dismissed for failing to state a claim pursuant to *Fed. R. Civ. P. 12(b)(6)*. Because the conduct complained of does **[*8]** not involve intrastate commerce (*See* *R.E. Spriggs Co. v. Adolph Coors Co., 37 Cal.App.3d 653 (1974))*, but instead involves foreign commerce, and with plaintiffs not opposing defendants' motion, the court concludes that count nine will be dismissed.

The joining defendants seek to dismiss count ten, entitled "California Cartwright Act Claim Against All Defendants," for the same reasons that count nine was dismissed. In count ten plaintiffs reallege monopolization on the part of Shell Chemical as set out in count two, but state that such monopolization violates the California Cartwright Act. The court holds that the same reasoning dismissing count nine applies to count ten, and thus count ten is dismissed.

SICCO moves to be dismissed entirely from plaintiffs' action. SICCO alleges that it should be dismissed because the court lacks personal jurisdiction over SICCO pursuant to *Fed. R. Civ. P. 12(b)(2)*, and because plaintiffs' remaining counts against SICCO fail to state a claim upon which relief can be granted pursuant to *Fed. R. Civ. P. 12(b)(6)*. Because the court concludes that it does lack personal jurisdiction over SICCO, it will not be necessary to determine whether **[*9]** plaintiffs' remaining claims against SICCO fail to state cognizable claims.

SICCO is incorporated under the laws of England. As such, this court will have personal jurisdiction over SICCO if one of the two following tests is met. First, ***HN6***[] personal jurisdiction will result if "the nonresident defendant's activities within a state are "substantial" or "continuous and systematic," [because] there is a sufficient relationship between the defendant and the state to support jurisdiction even if the cause of action is unrelated to the defendants forum activities." *Data Disc, Inc. v. Systems Tech. Assoc., Inc., 557 F.2d 1280, 1287 (9th Cir. 1977)*. However, even if defendant's activities are not so pervasive as to subject him to general personal jurisdiction, personal jurisdiction may nevertheless obtain, and will turn on the quality of defendant's contacts in relation to the cause of action. Under this second test, the following factors must be present: "(1) The nonresident defendant must do some act or consummate some transaction with the forum or perform some act by which he purposefully avails himself of the privilege of conducting activities in the forum, thereby invoking the **[*10]** benefits and protections of its laws. (2) The claim must be one which arises out of or results from the defendant's forum-related activities. (3) Exercise of jurisdiction must be reasonable." *Id.*

SICCO's activities are not sufficiently pervasive to subject it to general personal jurisdiction under the first of the above tests. The record indicates that since its incorporation in 1928, SICCO has not carried on activities anywhere in the United States, including California. Furthermore, SICCO never has been qualified to do businss in the United States, never has regularly solicited business in the United States, never has had employees or agents assigned to work in the United States on a regular basis, never has owned, used or possessed any real property located in the United States, and has never contracted to supply goods or services in the United States.

Consequently, if the court is to have personal jurisdiction over SICCO, such jurisdiction must ensue from the second of the above tests, which analyzes SICCO's contacts in relation to the present cause of action. The court should examine the issue of personal jurisdiction separately for each count asserted by plaintiffs **[*11]** in the amended complaint. *See,* *S.L. Kaye Co., Inc., v. Dulces Anahuac, S.A., 524 F.Supp. 17, 20 (SDNY 1981)*. The court concludes that under the second test the court lacks personal jurisdiction over SICCO as to each of the remaining four counts (sixth, seventh, eighth, and eleventh) against it.

Count six, asserted against all defendants except Shell Chemical, principally alleges that those defendants engaged in a pattern or practice to induce Shell Chemical not to deal with plaintiffs and to terminate their contracts with plaintiffs. Count six alleges that such actions by defendants include those listed in paragraph 29 of the first amended complaint. However, the actions listed in paragraph 29 are those of Shell Chemical, Shell Oil, and Pecten, and in no way are attributed to SICCO. Furthermore, even if these actions were attributable to SICCO, it is not clear that they have contacts with the United States, much less California. Accordingly, the court lacks personal jurisdiction over SICCO with respect to count six.

Count eight alleges that all defendants tortiously interfered with certain joint ventures entered into by plaintiffs and third parties in in Kuwait, Saudi **[*12]** Arabia, Egypt, and Botswana. Like count six, this count alleges that the acts listed in paragraph 29 constituted the basis for the count. Again, paragraph 29 in no way refers to SICCO. Plaintiffs also make other vague allegations in reference to all defendants in count eight in regard to the above mentioned joint ventures. However, there is no stated nexus between any act alleged and the United States, much less California. Furthermore, considering the joint ventures were located in the Middle East and Africa, it is impropable that United States or California contacts exist. Consequently, the court lacks personal jurisdiction over SICCO with respect to Count eight.

Count eleven alleges that SICCO's decision to exercise its right of termination under the SICCO contract with Dan-De, to provide consultation services in the setting up of PB pipe projects in various countries in the Middle East and Africa, was violative of an alleged promise by SICCO not to terminate the contract unless SICCO was no longer in the PB business. Plaintiffs further allege that SICCO was no longer in the PB business. Plaintiffs further allege that SICCO breached the agreement by failing to fully perform **[*13]** thereunder. As to the alleged promise not to terminate, there is no showing whatsoever that it has any true contact with the United States or California. The same is true of the SICCO contract itself. Furthermore, the full record indicates that such contacts do not exist. Accordingly, the court lacks personal jurisdiction over SICCO with respect to count eleven.

Count seven alleges that Shell Chemical, Pecten, and SICCO acted in bad faith for the purpose of inducing the termination of plaintiffs' agreements with defendants, and in so doing breached an implied covenant of good faith and fair dealing. As to SICCO, count seven must refer to the earlier described SICCO contract. Thus, the court lacks personal jurisdiction over SICCO with respect to count seven for the same reasons with regard to count eleven. It should be noted that count seven also refers to the acts listed in paragraph 29, but such acts are not attributed to SICCO.

In accordance with the foregoing, it is hereby ordered that:

(1) defendants' motion to dismiss counts one, two, nine and ten of the first amended complaint is granted; and

(2) defendant SICCO's motion to be dismissed entirely from this action **[*14]** is granted.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN4[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

Familiar principles of due process dictate that an out-of-state defendant may be haled into court only if there exist certain minimum contacts between the defendant and the forum state such that the maintenance of the suit does not offend traditional notions of fair place and substantial justice. In judging minimum contacts, a court properly focuses on the relationship among the defendant, the forum, and the litigation.Even in the absence of connections between the subject matter of the controversy and the forum state, jurisdiction may be based solely on a nonresident defendant's continuous and systematic general business contacts with the forum.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Regulated Practices, Market Definition**

To distinguish a claim under *§ 1* of the Sherman Act, *15 U.S.C.S. §§ 1* from a mere business tort, a plaintiff must make a sufficient allegation of anticompetitive effects resulting from the defendant's actions; absent injury to competition, injury to plaintiff as a competitor will not satisfy this pleading requirement. The legality of a defendant's conduct turns on the consequences of that conduct in the relevant market.

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] **Antitrust & Trade Law, Sherman Act**

The Sherman Act outlaws practices that make markets less competitive and thereby hurt the people transacting with the firms in those markets. To injure, even to cripple or destroy, one or two competitors in a market will not, if there are many competitors in that market, have much if any effect on consumers or anyone else besides the injured competitor.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] **Sherman Act, Claims**

An essential element of a monopolization claim is the possession of monopoly power in the relevant market. That is, a plaintiff under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2* must allege that the defendant has the power to control price and exclude competition generally in the relevant market. Even a claim of attempt to monopolize requires a plaintiff to plead facts alleging a dangerous probability that, if unchecked, the defendant's conduct will ripen into monopolization. Furthermore, a plaintiff raising claims of attempt or conspiracy to monopolize must allege a specific intent to monopolize on the part of the defendant.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN8[] **Antitrust & Trade Law, Sherman Act**

A plaintiff's "naked statement" that defendants conspired to establish one supplier as "dominant marketer" of goods, without supporting factual allegations, will not survive a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss in an action under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Clayton Act

Opinion

[*678] MEMORANDUM OPINION AND ORDER

This action involves a dispute over rights to televise the 1984 Florida Citrus Bowl (formerly the Tangerine Bowl), a college football game to be played on December 22 of this year. Plaintiff Mizlou Television Network, Inc. ("Mizlou") raises various federal antitrust and pendent state law claims in connection with the decision of defendant Florida Citrus Sports Association to grant the broadcast rights for this year's Citrus Bowl to defendant National Broadcasting Company. For the reasons that follow, all of plaintiff's claims against each defendant must be dismissed.

Procedural Posture

Plaintiff filed this action on May 23, 1984, alleging a "contract, combination and conspiracy in restraint of trade" in violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1* (Complaint para. 7), an attempt to monopolize and a conspiracy to monopolize (Complaint para. 8) and perhaps monopolization (Complaint para. 14), all in violation of *Section 2* of the Sherman Act, *15 U.S.C. § 2*, a contract **[**2]** "to substantially lessen competition or tend to create a monopoly" in violation of *Section 3* of the Clayton Act, *15 U.S.C. § 14*, and breach of contract and tortious interference with contract (Complaint paras. 13, 14). Named as defendants to the complaint are:

(1) National Broadcasting Company ("NBC").

(2) Arthur Watson, President, NBC Sports.

(3) Jeffrey Cokin, Director of Sports Contract Negotiations, NBC Sports.

(4) Florida Citrus Sports Association, Inc. ("FCSA").

(5) Sam Hines, member of the FCSA Executive Committee.

(6) Charles Rohe, member of the FCSA Executive Committee.

(7) Vernon Hinely, member of the FCSA Executive Committee.

(8) Florida Citrus Commission.

On July 9, 1984, the NBC defendants (NBC, Watson and Cokin), the FCSA defendants (FCSA, Hines, Rohe and Hinely) and the Florida Citrus Commission filed separate motions to dismiss under *Federal Rule of Civil Procedure 12(b)*. Three weeks after those motions ripened, plaintiff filed its October 1, 1984 "motion for declaratory relief" seeking an expedited hearing and resolution of "the issue of rights to televising the bowl game." Plaintiff's Motion at 3. At the oral hearing on all motions held November 2, 1984, **[**3]** plaintiff confirmed that it seeks immediate consideration of its pendent state law claims, but acknowledged that it did not expect the antitrust claims to be decided on the merits before the December 22 Citrus Bowl game.

Plaintiff's sudden demand for expedition is somewhat puzzling. Mizlou's chief executive learned of the FCSA's agreement with NBC in August 1983 at the latest, yet **[*679]** devoted fully eight months to "soulsearching" before deciding to bring this action. [1] Once in court, plaintiff stipulated to extensions of filing deadlines requested by defendants and sought an extension of its own. Furthermore, plaintiff's complaint on its face seeks monetary relief only -- there is no request in that pleading that the Court enjoin any conduct by any defendant before any fixed date.

More fundamentally, even if plaintiff's subsequent pleadings are viewed as amending the complaint to state a claim for injunctive relief, the merits of plaintiff's state law claims **[**4]** cannot be considered without first addressing issues raised by defendants in their motions to dismiss. Defendants assert, among other things, that defendant Florida Citrus Commission is immune from suit in this Court, that this Court lacks personal jurisdiction over six of the eight defendants, and that plaintiff's allegations fail to state an actionable claim under applicable state law or the federal antitrust statutes, the foundation of this Court's pendent jurisdiction over plaintiff's state law claims. Until those issues are resolved, consideration of the merits of the pendent claims would be premature. *See* *Financial General Bankshares, Inc. v. Metzger, 220 U.S. App. D.C. 219, 680 F.2d 768, 773 (D.C. Cir. 1982)* (if federal claims are dismissed at an early stage of litigation, pendent state claims should be dismissed as well).

Factual Background

HN1[] Upon consideration of defendants' motions to dismiss for jurisdictional and pleading deficiencies, the Court must accept as true the factual allegations set forth in the complaint. *See* *Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974)*. Those allegations, supplemented by documents introduced by plaintiff **[**5]** at the November 2, 1984 hearing, state the following:

Mizlou and FCSA, the successor corporation of the Tangerine Sports Association, Inc. ("TSA"), are parties to a contract entitled "Tangerine Bowl Television Rights Agreement" and dated November 12, 1980. Pursuant to that agreement, TSA granted to Mizlou the exclusive broadcast television rights to the 1980, 1981, 1982 and 1983 Tangerine/Citrus Bowls. Clause 15 of the Mizlou/TSA contract provided that TSA/FCSA could offer the right to cover the 1984, 1985 and 1986 games to competing broadcasters, but reserved to Mizlou the opportunity to match or better the offers of third parties under certain circumstances. [2]

---

[1] Transcript of Nov. 2, 1984 hearing at 19.

[2] The full text of Clause 15 reads as follows:

"15. OPTION TO RENEW

"Commencing on July 1, 1983, TSA will negotiate with MTN [Mizlou] and other third parties with respect to the TV broadcast rights to the games for 1984, 1985 and 1986. If by December 31, 1983, the parties hereto have not reached an agreement in regard to such rights, TSA may offer such rights to third persons, provided that TSA shall not offer such rights upon terms and conditions less favorable to TSA than those which MTN shall have, in writing, last previously offered to TSA (whether prior to or after December 31, 1983) unless TSA shall have first made available to MTN, bona fide offers from other companies, in reasonable detail and in writing, and afforded MTN a period of ten (10) business days within which to match or better such offers. Any such offers shall be deemed to be bona fide only if the terms thereof are susceptible to ready reduction to a determinable sum of money.

"If no agreement has been reached by TSA with respect to the TV broadcast rights to the games for 1984, 1985 and 1986, with MTN or any other company (excluding NBC, CBS or ABC) by April 1, 1984, then MTN's option for 1984, 1985 and 1986 is automatically renewed as of that date and time, under the terms and conditions of the agreement applicable for the 1983 Game, plus ten (10%) percent."

Exh. A to Affidavit of Jeffrey Cokin.

[6]** By letter dated August 9, 1983, defendant FCSA, through defendant Hines, informed Mizlou of existing offers (including one by defendant NBC) made to FCSA for future television coverage of the Citrus Bowl, beginning in 1984. Defendant's letter stated that FCSA was submitting the list of offers "as required by [its] contract with Mizlou which runs through the 1983 game," and further stated that "by previous agreement Mizlou has ten (10) days in which to exercise first right of refusal." **[*680]** PX-2. On August 17, 1984, plaintiff responded that it had "elect[ed] to exercise [its] option to renew the agreement on the same terms and conditions offered by NBC Television Network" and stated its intention to submit to FCSA a formal agreement covering all points in the NBC offer. PX-3. Through its attorney, FCSA conveyed by telegram the following reply (PX-1):

> On behalf of Florida Citrus Sports Association, Inc., we hereby advise you that the 10-day period within which you requested an opportunity to respond to other offers has now expired. It is our opinion that paragraph 15 of your contract with TSA does not confer upon you a right of first refusal under these circumstances. **[**7]** Nonetheless, pursuant to subsequent correspondence, it was thought to be appropriate to inform you, of the NBC offer. In our opinion, your offer does not match the value of the NBC offer. Since 10 days have passed since you have been informed of the NBC offer, it is our opinion that Florida Citrus Sports Association has no further obligations to Mizlou for 1984 and thereafter.

Subsequently, FCSA through defendant Hinely and NBC through defendant Cokin entered into an agreement whereby FCSA granted to NBC the rights to broadcast the 1984 Citrus Bowl and options to renew those rights in 1985 and 1986, under certain conditions. [3] As a result of that agreement, plaintiff alleges, FCSA received from the Florida Citrus Commission a "financial donation" which had been contingent upon NBC obtaining television rights to the Citrus Bowl games.

Against **[**8]** that background, plaintiff alleges that all of the defendants, including the designated officials of NBC and FCSA, acted in concert to bring about a breach of plaintiff's asserted contract right to match or better NBC's offer to cover the 1984, 1985 and 1986 Citrus Bowl games. [4] On a grander scale, plaintiff claims that the FCSA/NBC agreement is a product of NBC's "dominance of power and control" in the market for college football bowl games. Plaintiff depicts a scenario in which "smaller competitors" in that market, including Mizlou, develop bowl games to the point of significant profitability, only to be displaced when NBC expresses interest in televising the events. Complaint paras. 9, 18. In this instance, plaintiff claims, NBC and the other named defendants joined forces to replace Mizlou with NBC as Citrus Bowl broadcaster, with the intent and effect of impairing competition for bowl game television rights and creating a monopoly in the market for those rights. Complaint paras. 7-10, 18. Before considering whether these allegations state any actionable claim, the jurisdictional issues raised by the various defendants shall be first addressed.

[9]** *Eleventh Amendment*

Among the Florida Citrus Commission's several arguments is that as an arm of the State of Florida, it is not subject to the jurisdiction of this or any other federal district court. The Commission relies upon the recent Supreme Court decision of *Pennhurst State School & Hospital v. Halderman, 465 U.S. 89, 104 S. Ct. 900, 79 L. Ed. 2d 67 (1984)*:

---

[3] Under the agreement, NBC also obtained options to renew the broadcast rights for the 1987 and 1988 games. The 1987 and 1988 options are not relevant to this complaint.

[4] With respect to the individual defendants, plaintiff alleges that:

Defendant Hines signed the August 9, 1983 letter from FCSA to plaintiff (Complaint para. 4);

Defendant Rohe made statements to the effect that he would make life miserable for Mizlou (Complaint para. 13); and

Defendants Hinely and Cokin signed the FCSA/NBC contract (Complaint para. 16).

Plaintiff attributes no specific action to defendant Watson.

> HN2[] "'An unconsenting state is immune from suits brought in federal courts by her own citizens as well as by citizens of another state. ' [Citations omitted] . . . . In the absence of consent, a suit in which the state or one of its agencies is named as the defendant is proscribed by the *Eleventh Amendment*."

[*681] *104 S. Ct. at 908*. Under Florida law, the Florida Citrus Commission is a twelve-man board within the Florida Department of Citrus which serves as the head of that department. The Department of Citrus is, in turn, a unit of the executive branch of government of the State of Florida. *Fla. Stat. §§ 601.04*, *20.04* (1983). Plaintiff does not dispute that by virtue of this statutory organizational structure, the Florida Citrus Commission is a sub-unit of the State of Florida. Accordingly, **[**10]** under *Pennhurst*, the Commission is not amenable to suit in this Court and must be dismissed as a defendant.

In Personam Jurisdiction

Six of the seven remaining defendants challenge plaintiff's assertion that this Court may exercise personal jurisdiction over them. HN3[] Due process concerns delineate the extent of this Court's jurisdiction not only under the United States Constitution but also under the District of Columbia statute permitting an exercise of long-arm personal jurisdiction over a nonresident defendant who, directly or by an agent, "transact[s] any business in the District of Columbia." *D.C. Code § 13-423(a)(1)*(1981); *Mitchell Energy Corp. v. Mary Helen Coal Co., 524 F. Supp. 558, 563 (D.D.C. 1981)*; *see also Stabilisierungsfonds Fur Wein v. Kaiser Stuhl Wine Distributors Pty. Ltd., 207 U.S. App. D.C. 375, 647 F.2d 200 (D.C. Cir. 1981)*; *Mouzavires v. Baxter, 434 A.2d 988 (D.C. App. 1981)*, *cert. denied*, *455 U.S. 1006, 71 L. Ed. 2d 875, 102 S. Ct. 1643 (1982)*. [5]

[11]** HN4[] Familiar principles of due process dictate that an out-of-state defendant (a description fitting all defendants to this action except NBC, which maintains a permanent office in the District of Columbia) may be haled into court only if there exist

> 'certain minimum contacts' [between the defendant and the forum state] such that the maintenance of the suit does not offend 'traditional notions of fair place and substantial justice. '

International Shoe Co. v. State of Washington, 326 U.S. 310, 90 L. Ed. 95, 66 S. Ct. 154 (1945) (citations omitted); *accord* *Helicopteros Nacionales de Colombia, S. A. v. Hall, 466 U.S. 408, 104 S. Ct. 1868, 1872, 80 L. Ed. 2d 404 (1984)*; *Worldwide Volkswagen Corp. v. Woodson, 444 U.S. 286, 291-92, 62 L. Ed. 2d 490, 100 S. Ct. 559 (1980)*. In judging minimum contacts, a court "properly focuses on 'the relationship among the defendant, the forum, and the litigation. '" *Keeton v. Hustler Magazine, Inc., 465 U.S. 770, 104 S. Ct. 1473, 1478, 79 L. Ed. 2d 790 (1984)*, *quoting* *Shaffer v. Heitner, 433 U.S. 186, 204, 53 L. Ed. 2d 683, 97 S. Ct. 2569 (1977)*; *see also* *Calder v. Jones, 465 U.S. 783, 104 S. Ct. 1482, 1486, 79 **[**12]** L. Ed. 2d 804 (1984)*. Even in the absence of connections between the subject matter of the controversy and the forum state, jurisdiction may be based solely on a nonresident defendant's "continuous and systematic general business contacts" with the forum. *Helicopteros Nacionales de Colombia, S.A. v. Hall, 104 S. Ct. at 1873*; *Keeton v. Hustler Magazine, Inc., 104 S. Ct. at 1481*.

Plaintiff has alleged no business contacts of a continuous and systematic nature linking FCSA or any of the individual defendants with this jurisdiction. Furthermore, factual support for any connection between those defendants and the District of Columbia relating to the subject matter of this controversy is scanty at best. Plaintiff has argued that unspecified "critical acts in furtherance of the conspiracy and tort" occurred in the District of Columbia, basing that argument on a supposed "admission" that "acts of review and decisionmaking concerning the terms of the NBC contract" took place here. The sources of that "admission" -- unrebutted affidavits of defendants Cokin and Rohe -- in fact assert that all contract negotiations between NBC and FCSA were conducted either by telephone between Cokin **[**13]** in New York City and Hines and Rohe in Orlando, Florida or in meetings held in New York or Orlando. **[*682]** Affidavit of Jeffrey Cokin ("Cokin Aff.") at para. 4, Affidavit of Charles Rohe ("Rohe Aff.") at para. 4. Through those negotiations, NBC and FCSA reached an agreement in principle, the terms of which

---

[5] No other provision of the District of Columbia long-arm statute is applicable to these facts. *See* *D.C. Code § 13-423* (1981).

are essentially unchanged in the final contract, which was drafted in New York and executed in Florida. Cokin Aff. at para. 5, Rohe Aff. at para. 6.

The *only* link between the NBC/FCSA contract, defendants and the District of Columbia is through a nonparty law firm. Defendant FCSA receives legal counsel from the Orlando office of a firm with offices in five cities, including Washington, D.C. The firm's communications law specialist practices from the District of Columbia office; consequently, on communications matters FCSA consults that specialist here. After the negotiations between NBC and FCSA had been completed and an agreement had been reached, the District of Columbia attorney, on behalf of FCSA, contacted Cokin in New York on six to twelve occasions by telephone or letter and together they reduced the NBC/FCSA agreement to writing. In addition, the attorney mailed **[**14]** the telegram (PX-1) informing Mizlou that FCSA recognized no further obligations to Mizlou for 1984 and thereafter.

Without more, these actions of the District of Columbia attorney do not justify an assertion of personal jurisdiction over FCSA and the individuals who negotiated, signed and/or approved the NBC/FCSA contract. The core of plaintiff's complaint is the alleged substitution of NBC for Mizlou as the holder of rights to televise the 1984 Citrus Bowl and options for subsequent games. That alleged substitution, as charged, took place by the actions of the defendants, not the lawyer -- that is, by the decision of NBC (in New York) to extend an offer for the broadcast rights to FCSA coupled with the decision of FCSA (in Florida) to accept that offer. The location of the attorney when those decisions were made is immaterial, as plaintiff does not assert that he played any part whatsoever in the actual decisionmaking process. The agreement was neither negotiated nor executed and will not be performed in the District of Columbia, and the few communications from the District lawyer on behalf of FCSA to NBC or Mizlou will not draw the nonresident defendants within the sphere of this **[**15]** Court's jurisdiction. *See* *Mitchell Energy Corp. v. Mary Helen Coal Co., supra, 524 F. Supp. 558*; *see generally* *Cockrell v. Cumberland Corp., 458 A.2d 716 (D.C. App. 1983)* (even calls and letters placed rather than received by out-of-state defendant do not satisfy long-arm statute's "transacting business" test, which is jurisdictionally coextensive with due process analysis).

Finally, the mere fact that FCSA retained counsel in the District of Columbia will not confer personal jurisdiction over that or any other defendant in an action not arising from the lawyer/client relationship. Were this an action by the attorney for recovery of fees, defendant's solicitation of a District of Columbia attorney would be jurisdictionally significant. *See* *Mouzavires v. Baxter, supra, 434 A.2d 988*; however, plaintiff here cannot claim that the fortuitous relationship between the Orlando-based FCSA and an expert in its counsel's District of Columbia office constitutes a "purposeful availment" of the benefits and privileges of this forum *vis-a-vis this litigation* such that any of these defendants could reasonably anticipate being haled before this Court. *See generally* *Hanson v. Denckla* ***[**16]*** *, 357 U.S. 235, 253, 2 L. Ed. 2d 1283, 78 S. Ct. 1228 (1958)*; *see also* *Transamerican Steamship Corp. v. Somali Democratic Rep., 590 F. Supp. 968, 977 (D.D.C. 1984)*.

Plaintiff's meager allegations in support of personal jurisdiction do not begin to establish the requisite minimum contacts with the District of Columbia. Plaintiff does not challenge the accuracy of the jurisdictional facts submitted by defendants, and in fact relies upon them to construct the arguments rejected above. Under these circumstances, plaintiff's request to conduct discovery on this issue shall be denied, *see* *Naartex Consulting Corp. v. Watt, 232 U.S. App. D.C. 293, 722 F.2d 779, 788 (D.C. Cir. 1983)*, *cert. denied*, *467 U.S. 1210, 104 S. Ct. 2399,* ***[*683]*** *81 L. Ed. 2d 355 (1984)*, and, in accordance with due process, plaintiff's claims against defendants FCSA, Watson, Cokin, Rohe, Hines and Hinely shall be dismissed for lack of personal jurisdiction.

Claims Against NBC

(a). *Antitrust Claims*

Remaining before the Court are plaintiff's antitrust and state law claims against NBC. Although the complaint is replete with the vocabulary of ***antitrust law***, the facts alleged, even accepted as **[**17]** true, do not state a claim under *Sections 1* or *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2* ("*Sections 1* and *2*"), or *Section 3* of the Clayton Act, *15 U.S.C. § 14* ("*Section 3*").

Plaintiff's *Section 1* claim rests on the proposition that the NBC/FCSA contract constitutes a contract, combination or conspiracy in restraint of trade. ***HN5***[] To distinguish this claim from a mere business tort, plaintiff must make a sufficient allegation of anticompetitive effects resulting from NBC's actions; absent injury to *competition*, injury to plaintiff as a *competitor* will not satisfy this pleading requirement. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*; *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*; *Havoco of America, Ltd. v. Shell Oil Co., 626 F.2d 549, 554 (6th Cir. 1980)*. Furthermore, unlike some horizontal relationships among competitors, the *vertical* arrangement between NBC and FCSA described by plaintiff cannot be characterized as *per se* unlawful, *see* *Continental T.V., Inc. v. G.T.E. Sylvania, Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*; *Transource International,* **[**18]** *Inc. v. Trinity Indus., Inc., 725 F.2d 274 (5th Cir. 1984)*; but instead must be analyzed under a "rule of reason": to state an actionable claim, plaintiff must allege an *unreasonable* restraint on competition, *see* *National Society of Professional Engineers v. United States, 435 U.S. 679, 688, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978)*; *Transource International, supra*. Thus, the legality of defendant's conduct turns on the consequences of that conduct in the relevant market. *See* *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*; *Havoco of America, 626 F.2d at 554*.

Despite conclusory assertions that NBC's conduct will restrain competition, plaintiff has alleged no specific impact on competition in any particular market. At one point in the complaint, plaintiff challenges NBC's conduct only as it affects competition for television rights to the Bluebonnet Bowl, Holiday Bowl, Hall of Fame Bowl and Citrus Bowl, only 4 of the 21 college football bowl games scheduled to take place at the end of the 1984 season. Complaint para. 18. That market definition is unduly narrow, as it excludes rights to numerous other bowl games which **[**19]** are "reasonably interchangeable" from the broadcaster's standpoint. *See* *Brown Shoe Co. v. United States, 370 U.S. at 325*; *Southern Pacific Communications Co. v. American Telegraph and Telephone Co., 556 F. Supp. 825 (D.D.C. 1983)*, *aff'd* *238 U.S. App. D.C. 309, 740 F.2d 980 (D.C. Cir. 1984)*; *Gianna Enterprises v. Miss World (Jersey) Ltd., 551 F. Supp. 1348, 1354 (D.N.J. 1982)* (rejecting market definition which included only international beauty pageants but excluded state and national pageants).

Even accepting for present purposes a broader market definition of "collegiate football bowl games", *see* Complaint paras. 8, 10, 18, the Court finds no facts to support plaintiff's bald claim of anticompetitive impact -- plaintiff has alleged no specific and demonstrable *market* effect of NBC's contract to cover the Citrus Bowl, and plaintiff's own loss of business with FCSA will not suffice. *See* *Gianna Enterprises v. Miss World (Jersey) Ltd., supra*; *see also Car Carriers, Inc. v. Ford Motor Co*., 1984-2 CCH Trade Cases P 66,220 (7th Cir. 1984); *Havoco of America, 626 F.2d at 558*. ***HN6***[] The Sherman Act outlaws practices that make markets less competitive and thereby **[**20]** hurt the people transacting with the firms in those markets. *See, e.g.,* *Reiter v. Sonotone Corp., 442 U.S. 330, 343, 60 L. Ed. 2d 931, 99 S. Ct. 2326 (1979)*. **[*684]** "To injure, even to cripple or destroy, one or two competitors in a market will not, if there are many competitors in that market, have much if any effect on consumers or anyone else" besides the injured competitor. *Sutliff, Inc. v. Donovan Companies, Inc., 727 F.2d 648 (7th Cir. 1984)*.

For similar reasons, plaintiff's *Section 2* claims of monopolization, attempt to monopolize, and conspiracy to monopolize must be dismissed. Plaintiff makes the conclusory assertion that the NBC/FCSA agreement is a "consequence of [NBC's] dominance of power and control", Complaint para. 9, but offers not a single fact to document NBC's supposed actual or probable market power. The omission is fatal -- ***HN7***[] an essential element of a monopolization claim is "the possession of monopoly power in the relevant market ", *United States v. Grinnell Corp., 384 U.S. 563, 570, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*; that is, a *Section 2* plaintiff must allege that the defendant has the power to control price and exclude *competition* **[**21]** *generally* in the relevant market. *Id. at 571*; *Southern Pacific Communications Co*., 740 F.2d at 1000. Even a claim of attempt to monopolize requires a plaintiff to plead facts alleging a dangerous probability that, if unchecked, the defendant's conduct will ripen into monopolization. *Transource International, Inc. v. Trinity Indus., Inc., supra*; *Merit Motors, Inc. v. Chrysler Corp., 417 F. Supp. 263 (D.D.C. 1976)*, *aff'd 187 U.S. App. D.C. 11, 569 F.2d 666 (D.C. Cir. 1977)*. Furthermore, a plaintiff raising claims of attempt or conspiracy to monopolize must allege a specific intent to monopolize on the part of the defendant. *See e.g.,* *Arthur S. Langenderfer, Inc. v. S.E. Johnson, 729 F.2d 1050 (6th Cir. 1984)*.

Plaintiff's complaint recites the proper conclusory verbiage but suffers from a paucity of facts. It does not identify the owner(s) of rights to any bowl game except the Citrus Bowl, nor does it contain a shred of data concerning NBC's market position relative to other television broadcasters, including the competing major networks. Absent *any* facts even hinting at an actual, imminent or intended concentration of *market* power in NBC alone, plaintiff's **[**22]** allegations do not state a claim under *Section 2*. *See generally* *Havoco of America, 626 F.2d at 558* ***HN8***[] (plaintiff's "naked statement" that defendants conspired to establish one supplier as "dominant marketer" of goods, without supporting factual allegations, did not survive 12(b)(6) motion to dismiss).

Finally, the minimal factual allegations of plaintiff's complaint provide no basis for plaintiff's claim under *Section 3* of the Clayton Act. ***HN9***[] *Section 3* prohibits certain exclusive dealing or tied sale arrangements which "substantially lessen competition or tend to create a monopoly." *15 U.S.C. § 14*. Even if the rights to broadcast the 1984 Citrus Bowl may be considered a "commodity" within the meaning of this provision, plaintiff has failed to allege facts, as distinguished from legal conclusions, indicating any decrease in competition in the market for those rights. The only effect of the NBC/FCSA contract discernible from the complaint is that NBC will cover the Citrus Bowl and Mizlou will not. Any tendency toward monopoly would depend on NBC's ability to drive out not only plaintiff, but all or nearly all other competitors. No facts submitted by plaintiff adumbrate such a threat, **[**23]** and from the face of the complaint a *Section 3* injury to competition is not self-evident. *See generally* *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. at 488* (antitrust statutes -- including the Clayton Act -- guard against injury to competition generally, not mere injury to competitors).

In sum, the gist of this complaint is that Mizlou -- not the market -- has been wronged. Although we do not decide this today, it is, of course, possible that plaintiff may have a cognizable claim under tort or contract; however, the allegations before this Court simply cannot rise to the level of federal antitrust claims. ***HN10***[] Liberal use of the language of antitrust will not transform the cause of action -- "when stripped to its essential[s], the complaint does no more than state plaintiff's commercial disappointment", a matter grounded in state law. *See Car Carriers, Inc. v. Ford Motor* ***[*685]*** *Co., supra, quoting* *Dunn & Mavis, Inc. v. Nu-Car Driveaway, Inc., 691 F.2d 241, 245 (6th Cir. 1982)*; *see also* *Sutliff, Inc. v. Donovan Companies, Inc., 727 F.2d at 654*.

(b). *Pendent Claims*

In light of the prompt dismissal of plaintiff's federal antitrust claims against NBC, principles **[**24]** of comity and federalism support dismissal of plaintiff's pendent state claims as well. *See* *Financial General Bankshares, Inc. v. Metzger, 680 F.2d at 772*. The interests underlying the doctrine of pendent jurisdiction -- "judicial economy, convenience, and fairness to litigants", *United Mine Workers of America v. Gibbs, 383 U.S. 715, 726, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966)*; *see also* *Rosado v. Wyman, 397 U.S. 397, 25 L. Ed. 2d 442, 90 S. Ct. 1207 (1970)* -- would not be served by this Court's retention of plaintiff's state law claims, inasmuch as this litigation has not progressed beyond the initial pleading and dispositive motions. *See* *Financial General Bankshares, Inc., supra.*

In accordance with the above discussion, it is, by the Court, this 30th day of November, 1984

ORDERED that:

1. Plaintiff's claims against defendant Florida Citrus Commission are dismissed in accordance with the *Eleventh Amendment*;

2. Plaintiff's claims against defendants Arthur Watson, Jeffrey Cokin, Florida Citrus Sports Association, Sam Hines, Charles Rohe and Vernon Hinely are dismissed for lack of personal jurisdiction;

3. Plaintiff's claims against defendant National Broadcasting **[**25]** Company under *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*, and *Section 3* of the Clayton Act, *15 U.S.C. § 14*, are dismissed for failure to state a claim upon which relief can be granted; and

4. Plaintiff's pendent state law claims against defendant National Broadcasting Company are dismissed in accordance with principles of federalism and comity.

This cause stands dismissed.

HN2[] **Remedies, Damages**

Congress did not intend to authorize every single person who can demonstrate the likelihood that he suffered some sort of economic injury as a result of such a per se antitrust violation to have a right of action for treble damages under § 4 of the Clayton Act, *15 U.S.C.S. § 15*. An antitrust violation may cause harm of some kind to a vast number of persons and businesses. "Standing" is the term used to describe a particular plaintiff's right to recover treble damages for injury to his trade or business. To have standing to recover under the Sherman Act, an antitrust plaintiff must demonstrate that his injury was a direct consequence of the alleged antitrust violation, that the extent of his injury is determinable and not speculative, and that recovery by him will not duplicate potential recovery by other plaintiffs.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN3[] **Private Actions, Standing**

A plaintiff who seeks to recover for an antitrust violation must establish not only direct and determinable injury, but also that this injury was of the type the antitrust laws were intended to prevent and that flows from that which makes defendant's acts unlawful. This is summed up as "antitrust injury." The standing analysis determines who has a right to bring the action: whether the plaintiff is the proper party to bring a private treble damage action. "Antitrust injury" looks to the nature of the damage suffered: an antitrust plaintiff may recover only those damages that are of a type that the antitrust laws were intended to prevent and that flow from the illegal aspects of the defendant's conduct.

Opinion

[*1013] ON PETITIONS FOR REHEARING AND SUGGESTION FOR REHEARING EN BANC

ALVIN B. RUBIN, Circuit Judge:

Walker's petition for rehearing questions our analysis of Walker's standing under Section 4 of the Clayton Act to maintain a private treble damages action for alleged violations of *Section 2* of the Sherman Act. We grant the petition for rehearing to clarify our analysis of standing to bring a private action under Section 4 of the Clayton Act, and to point out the applicability of the additional requirement for the recovery of damages, that the injury be of a type the **[**2]** antitrust laws were meant to redress. Applying that test, we affirm the result originally reached. We also respond to a request made in U-Haul's application for rehearing by clarifying our reference to the applicability of the Mississippi Statute of Frauds to the lease between Walker and U-Haul. Having thus clarified our prior opinion, we reinstate it.

I.

HN1[] *Section 2* of the Sherman Act proscribing monopolies or attempts to monopolize does not explicitly require a plaintiff to prove an injury to competition; the plaintiff must prove only the existence of monopoly power and the willful continued maintenance of that power. [1] Injury to competition is presumed to follow from the conduct proscribed by *§ 2*. [2] However, ***HN2***[] Congress did not intend to authorize every single person who can demonstrate the likelihood that he suffered some sort of economic injury as a result of such a per se antitrust violation to have a right of action for treble damages under § 4 of the Clayton Act. An antitrust violation may cause **[*1014]** harm of some kind to a vast number of persons and businesses. "Standing" is the term used to describe a particular plaintiff's right to recover treble damages for **[**3]** injury to his trade or business. To have standing to recover under the Act, an antitrust plaintiff must demonstrate that his injury was a direct consequence of the alleged antitrust violation, that the extent of his injury is determinable and not speculative, and that recovery by him will not duplicate potential recovery by other plaintiffs. [3]

In his initial brief on appeal Walker **[**4]** contended that the district court's summary judgment was predicated, at least in part or in the alternative, on his lack of standing. U-Haul contended that the district court relied only on lack of evidence of injury to competition. We discussed standing in our original opinion, and concluded, on the basis of two of our earlier opinions, which we discuss below, that Walker lacked standing. Walker questions the accuracy of our observations concerning standing in these opinions, in the light of Supreme Court decisions. We now conclude that Walker may have indeed demonstrated his standing sufficiently to withstand summary judgment. He alleges an injury that is both direct and measurable: he alleges that U-Haul destroyed his business in an attempt to monopolize the truck and trailer retail rental market in the Jackson area. Walker was not a direct competitor in that market; he competed only as an agent for U-Haul. Even assuming that Ryder, Hertz or others who offer rentals in competition with U-Haul were the ultimate targets of U-Haul's alleged anticompetitive acts, we conclude, on reconsideration, that recovery by Walker would not duplicate potential recoveries by these U-Haul competitors. **[**5]** The damage to Hertz, Ryder, and other competitors would be their lost opportunity either to enter into franchise contracts with dealers in the market area or to lease their equipment to customers. Walker's injury is different: it is the loss of his business as an agent. Each potential plaintiff would have suffered his own damages, in the form of loss of a different kind of business, caused by U-Haul's alleged illegal conduct. Recovery by a competitor for consumer business would in no sense duplicate or compensate the damage suffered by a competitor for an agency.

As noted in our original opinion, however, ***HN3***[] a plaintiff who seeks to recover for an antitrust violation must establish not only direct and determinable injury, but also that this injury was "of the type the antitrust laws were

---

[2] *See Almeda Mall, Inc. v. Houston Lighting & Power Co., 615 F.2d 343 (5th Cir.)*, *cert. denied*, ***449 U.S. 870, 101 S. Ct. 208, 66 L. Ed. 2d 90 (1980)***.

[3] *Blue Shield of Virginia v. McCready, 457 U.S. 465, 474, 102 S. Ct. 2540, 2546*, et seq., *73 L. Ed. 2d 149 (1982)*; *Assoc. Gen. Contractors of Cal. v. Cal. St. Council, 459 U.S. 519, 540, 103 S. Ct. 897, 910*, et seq., *74 L. Ed. 2d 723 (1983)*.

intended to prevent and that flows from that which makes defendant's acts unlawful." [4] This is summed up as "antitrust injury." The standing analysis determines who has a right to bring the action: whether the plaintiff is the proper party to bring a private treble damage action. "Antitrust injury" looks to the nature of the damage suffered: an antitrust plaintiff may recover only those damages **[**6]** that are of a type that the antitrust laws were intended to prevent and that flow from the illegal aspects of the defendant's conduct. [5]

Recent Supreme Court decisions have emphasized the directness or indirectness of the injury, the risk of duplicative recoveries, avoidance of speculative claims, and other factors without mentioning antitrust standing as a distinct inquiry. The Court, however, has also emphasized the requirement **[**7]** that the injury be of the kind the antitrust laws were meant to prevent **[*1015]** so we consider that question specifically. [6] To show antitrust injury, Walker must establish that the injury to his business as an agent "flowed from" or reflected the presumed anticompetitive effects resulting from U-Haul's alleged monopolization of or attempt "to monopolize the retail truck and trailer rental market in Jackson, Mississippi." [7]

[8]** The requirement of antitrust injury is not inconsistent with the presumption of injury to competition in *Section 2* cases. As one commentator has stated:

> To say that the plaintiff need not show public injury in per se cases to establish the fact of a violation does not tell us what kind of individual injury should be compensable. . . . The inquiry into antitrust injury addresses the question of damages and does not even begin until the court finds that a violation has been alleged and that the plaintiff has been injured by it. The purpose of the inquiry is to determine whether and to what extent the plaintiff's injury flows from the kind of inefficiency to which the substantive law is directed.

Page, *Antitrust Damages and Economic Efficiency: An Approach to Antitrust Injury*. [8]

[9]** The prohibition of monopolization in *Section 2* is intended to protect against the elimination of competitors and competing products or services in a given product and geographic market by a monopolist. The complaint defines the alleged monopoly as embracing the retail truck and trailer rental market in Jackson, Mississippi. To demonstrate, in opposition to a motion for summary judgment, that his business injury flowed from this anticompetitive impact on that business, Walker must submit some evidence from which the district court might conclude that U-Haul committed acts that furthered a monopolistic scheme to eliminate competitors and competing products from the retail rental market in Jackson, Mississippi. [9] In the trial court, Walker alleged vaguely that "for purpose of monopolizing or attempting to monopolize the retail truck and trailer rental market in Jackson,

Ed. 2d 126 (1984)***.

[8] 47 University of Chicago Law Review 467, 488 (1980). *See also* Note, *Antitrust Standing, Antitrust Injury, and the Per Se Standard*, 93 Yale Law Journal 1309, 1313-14, 1318 (1984).

[9] To demonstrate antitrust injury, Walker must "formulate a plausible substantive claim sufficient to survive summary disposition." See 2 Areeda and Turner, ***Antitrust Law***, para. 334e at 168.

Mississippi," U-Haul raised Walker's rent to a level that forced Walker to surrender his moving center dealership and vacate the premises. However, as discussed in our original opinion, [10] Walker made no mention in the lower court of how U-Haul's termination of a single agent for its own services (Walker) was intended **[**10]** to or would in fact affect the competing services that might be offered by other truck and trailer renters, the interbrand, as opposed to the intrabrand, market. The termination of Walker as an agent for U-Haul eliminated only an intrabrand competitor. Neither in the complaint nor otherwise in the lower court has Walker set forth how U-Haul's acts furthered a monopolistic scheme to eliminate the competition of Ryder, Hertz, or other brands from the "retail truck and trailer rental market." Walker not only did not make sufficient allegations of a specific monopolistic scheme, but he also failed to adduce evidence sufficient to raise a genuine dispute of material fact concerning the existence of such a claim. Walker has not therefore established a factual basis for the prerequisite of antitrust injury. Absent some evidence of this prerequisite to recovery in the affidavits or depositions filed in opposition to the motion **[*1016]** for summary judgment, Walker has failed to demonstrate a basis from which a fact trier might conclude that he suffered antitrust injury. [11] Finally, we reiterate the observations in our original opinion: Walker has failed to adduce sufficient evidence **[**11]** that U-Haul engaged in forbidden monopolizing conduct. [12]

As Walker points out in his application for rehearing, the district court opinion in *Action Towing and Rental v. U-Haul International* [13] did not distinguish between standing, the right to bring a private treble damages action under the Clayton Act, and the components of a cause of action under the Sherman Act. In relying on this decision and a phrase used in dicta by this court in *Bayou Bottling, Inc. v. Dr. Pepper Co.*, [14] our prior opinion improperly suggested that an antitrust plaintiff must establish a marketwide injury to competition as an element of standing. The antitrust laws exact no such additional requirement, and we **[**12]** state this explicitly to clarify both the scope of our affirmance in *Action Towing* and the limited meaning of the phrase used in *Bayou Bottling*.

We adhere to our original opinion that Walker failed to raise a genuine issue of fact tending to show that U-Haul engaged in purposeful monopolistic conduct.

II.

We also grant U-Haul's petition for rehearing to the following extent: the fourth sentence of the second full paragraph on slip opinion page 4262, 734 F.2d at 1078, is changed to read as follows:

> With regard to the requirement that the agreement be in writing, the statute draws no distinction between an agreement to sell land and the making of a lease for a term longer than one year, covering both of these promises in the same subsection. [15]

[13]** The court's original opinion is in all other respects reinstated and made the opinion of the court on rehearing.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN1[] **Clayton Act, Claims**

Standing to prosecute a private antitrust action under § 4 of the Clayton Act requires that the plaintiff prove that he is within that sector of the economy, which is endangered by a breakdown of competitive conditions in a particular industry. The plaintiff must be the target against which anticompetitive activity is directed. The injury must be of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' act unlawful. Incidental or consequential injury or injury remotely caused by an antitrust violation does not give a plaintiff standing to complain that he has been injured by reason of anything forbidden in the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN2[] Private Actions, Standing

Neither an officer nor an employee of a corporation has standing to bring an action in his own right for an antitrust violation causing injury to the corporation and its business. To be sure, such persons may suffer indirect or secondary financial injury from antitrust violations, but the law does not consider them to be the target of the anticompetitive practices.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN3[] Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

A manufacturer generally has a right to deal, or refuse to deal, with whomever it chooses so long as its decision is made independently.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN4[] Scope, Monopolization Offenses

Section 2 of the Sherman Act prohibits monopolization and attempts to monopolize. A plaintiff need not demonstrate that the monopolization or attempt was the product of concerted action. Therefore, a wholly unilateral refusal to deal, when accompanied by the intent to monopolize and the requisite degree of market power, may constitute a violation of § 2.

Civil Procedure > ... > Jury Trials > Jury Instructions > General Overview

Civil Procedure > Trials > Jury Trials > Jury Deliberations

HN5[] Jury Trials, Jury Instructions

In reviewing jury instructions, the appellate court considers the court's charge as a whole. When the instructions, taken together, accurately express the law applicable to the case without confusing or prejudicing the jury, there is no reason for reversal even though isolated clauses may, in fact, be confusing, technically imperfect, or otherwise subject to criticism. An erroneous instruction does not require reversal unless the reviewing court is left with a substantial and ineradicable doubt as to whether the jury was properly guided in its deliberations.

Contracts Law > Statute of Frauds > General Overview

HN6[] **Contracts Law, Statute of Frauds**

See Georgia Statute of Frauds, *O.C.G.A. § 13-5-30* (1982).

Opinion by: TJOFLAT

Opinion

[*1398] TJOFLAT, Circuit Judge:

This suit arises out of a dispute over the right to distribute a motion picture, "The Buddy Holly Story," for exhibition in theatres across the United States. James Thomas Patterson, Sr. and National Independent Theatre Exhibitors, Inc. (NITE) claim that they had a contract right, given them by Charter Financial Group, Inc. (Charter), one of the film's co-executive producers, to distribute the film and that Charter and Columbia Picture Industries, Inc. (Columbia) wrongfully **[**2]** deprived them of that right when Charter made Columbia the exclusive distributor of the film.

Patterson and NITE sued Charter and Columbia in the district court in three counts, each seeking money damages on a discrete theory of liability. First, plaintiffs, invoking section 4 of the Clayton Act, *15 U.S.C. § 15 (1982)*, [1] **[**3]** claimed that the defendants' conduct violated *sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2 (1982)*, and that they were entitled to treble damages. Second, plaintiffs claimed that Charter's breach of its distribution contract with them rendered Charter liable for the revenues they would have obtained had they distributed the film. Third, plaintiffs claimed that Columbia had tortiously interfered with their contract with Charter and thus was also liable for the same lost revenues. [2] The defendants denied the alleged wrongdoing. Charter also counterclaimed, alleging that the plaintiffs fraudulently induced it to enter into any distribution contract it may have made with them and that it had suffered consequential damages as a result.

The case was tried to a jury. At the close of the plaintiffs' case, the court directed a verdict for Columbia and dismissed it from the case. At the close of all the evidence, the court directed a verdict for Charter on plaintiffs' antitrust claims. It submitted plaintiffs' breach of contract claim to the jury, and the jury found for Charter.

Patterson and NITE appeal. Patterson contends that the district court erred in taking his antitrust [3] and tort claims from the jury and that the court committed reversible error in charging the jury on his **[*1399]** breach of contract claim against Charter. NITE does not challenge the district court's direction of verdicts; it takes issue only with the court's handling of its breach of contract claim against Charter. We find no reversible error in this case and accordingly affirm.

[4]** I.

Charter is an investment brokerage company operating out of Houston, Texas. It serves as an intermediary in the financing of business ventures. Its clients include entrepreneurs who are in need of venture capital and individual

[*] Honorable Reynaldo G. Garza, U.S. Circuit Judge for the Fifth Circuit, sitting by designation.

[1] Jurisdiction for plaintiffs' antitrust claims was predicated on *28 U.S.C. §§ 1331* & *1337 (1982)*. Jurisdiction for plaintiffs' breach of contract and tortious interference with contract claims was based on *28 U.S.C. § 1332 (1982)* and the district court's pendent jurisdiction.

[2] In their *ad damnum* clause at the end of their complaint, plaintiffs prayed for $20 million in punitive damages, presumably as to each of their three claims for relief. Charter's counterclaim also sought punitive damages, in the sum of $100000.

[3] The court summarily dismissed Patterson's antitrust claims on the defendants' motions prior to trial. It directed a verdict for Columbia on Patterson's tortious interference with contract claim at trial, at the close of plaintiffs' case. *See infra* text at slip op. p. 6.

investors who possess such capital. Charter's involvement in the distribution of "The Buddy Holly Story" was its first experience in a motion picture venture.

In 1976, Ed Cohen, Fred Bauer and Steve Rush (the "Owners") acquired the movie rights to the life of Buddy Holly, a famous rock star musician of the 1950's. They lacked the resources to produce and distribute a movie and entered into a formal contract with Charter to fund the production and distribution of "The Buddy Holly Story." The contract provided that Charter would solicit $2 million in investment capital and form a limited partnership consisting of the Owners, who would contribute their film rights, and individual investors. The limited partnership would, in turn, contract with the Owners and Charter, as co-executive producers, to produce the film. In addition to being a co-executive producer, Charter would distribute the film, alone or through a major film distributor, to the exhibiting **[**5]** theatres across the country.

In the summer of 1976, after Charter contracted with the Owners, its vice president, Fred Kuehnert, contacted Patterson, who was president of NITE, about the possibility of NITE's distributing "The Buddy Holly Story." NITE was an association of independently owned theatre operators who, collectively, possessed some 5,000 theatre screens. NITE's board of directors had recently decided to distribute high quality films in competition with the major film distributors, such as Columbia, and was looking for a first run film to kick off its distribution program. Patterson convinced Kuehnert that NITE could do as good a job as the major distributors in obtaining theatre exhibitors to show the movie. He also impressed Kuehnert with his representation that, in advance of the film's distribution, NITE would obtain binding commitments from the exhibitors for minimum film rentals which Charter, in turn, could use to entice investors [4] to underwrite the film's production costs.

[6]** After a series of negotiations, Patterson and Kuehnert, on April 11, 1977 in Atlanta, Georgia, orally agreed on the following terms to be incorporated into a written exclusive distribution agreement between NITE and Charter. [5] NITE would get 750 of its member theatres to sign exhibition contracts with Charter obligating the theatre to rent "The Buddy Holly Story" for a specified period at a guaranteed minimum rent. Patterson told Kuehnert that it would take NITE about two months to solicit these exhibitors, so they agreed that NITE would have 120 days thereafter to place the exhibitors under contract. Charter, in return, would pay NITE $50,000 and would underwrite certain of NITE's solicitation expenditures. After the movie was **[*1400]** produced and ready for distribution, Charter would deliver it to the NITE members who had contracted to exhibit it, collect the film rentals, and pay NITE twenty percent of these rentals.

[7]** Charter's obligation to distribute "The Buddy Holly Story" through NITE was contingent upon its acquisition of investment capital sufficient to produce the movie. Once Patterson and Kuehnert came to the understanding we have described, Charter set about the task of raising that capital. It soon found a group of investors in Boston, Massachusetts (the "Boston Group") willing to provide the necessary capital provided they could borrow it. The Boston Group contacted First National Bank of Boston, which had considerable experience in financing film production costs, and were advised that the investment Charter proposed was a poor risk. The bank based its judgment in large part on NITE's lack of experience in distributing first run films and the perceived worthlessness of NITE's exhibitor members' guarantees. [6] It advised the Boston Group that it's investment would be much less risky, and thus capable of being bank financed, if they could obtain a major film distributor, such as Columbia, or a circuit

---

[4] Patterson told Kuehnert that he could get at least 750 of NITE's members to guarantee a minimum rental. He estimated that each guarantee would average about $2,000 and that, collectively, they would approximate $2 million. Presumably, these guarantees would inure to the benefit of Charter's investors, serving indirectly to underwrite their provision of production costs.

[5] It is undisputed that these negotiators contemplated a written contract between Charter and NITE. Each party had retained counsel and they were to reduce the negotiators' understanding to writing. Charter's lawyer advised Charter not to accept the negotiators' proposal, and Charter followed that advice. NITE had no experience in distributing motion pictures, and the exhibitors' commitments would be worthless. To enforce those commitments, Charter would have had to sue the exhibitors in their jurisdictions, and considering the exhibitors' limited exposure the litigation expenses would have been prohibitive.

[6] *See supra* note 5.

exhibitor, such as General Cinema Corporation of America (which operated 850 screens across the country), to market the film and underwrite a portion of the production costs.

[8]** The Boston Group promptly communicated this information to Kuehnert at Charter and told Kuehnert that they would not go along with his NITE proposal. Kuehnert consequently looked elsewhere, and Charter eventually contracted with Columbia to distribute the film.

The production of "The Buddy Holly Story" was completed in February 1978, and Columbia immediately solicited exhibition bids from theatre operators, including NITE's members. When Patterson learned of this solicitation, he contacted Columbia's attorneys claiming that NITE had the exclusive right to distribute the movie and that it would sue Columbia if Columbia continued its distribution effort. Columbia ignored Patterson's threat and distributed the film. This litigation followed.

Patterson and NITE filed their complaint, in the three counts we have described *supra*, on December 1, 1978. After Columbia and Charter responded, the parties engaged in several months of discovery. When discovery was about concluded, the plaintiffs moved the court for leave to amend their complaint to add numerous parties, including the Owners, the Boston Group, and General Cinema Corporation of America, as defendants in their antitrust **[**9]** and tortious interference of contract counts. The court denied their motion because the plaintiffs had long known of these parties, and to allow plaintiffs to join them as discovery was coming to a close would "unduly prejudice [Columbia and Charter] and unnecessarily delay trial of the action."

Columbia and Charter thereafter moved for summary judgment on all counts. The district court denied their motions, except as to Patterson's antitrust claims. As to those claims the court concluded that Patterson had no standing to bring them because he was merely an employee of NITE. Following this ruling, the case proceeded to trial.

At the close of the plaintiffs' case, the court directed a verdict for Columbia on all issues. In making its ruling, the court assumed that Charter had given NITE the exclusive right to distribute "The Buddy Holly Story" and had denied it that right by substituting Columbia as the film's distributor. The court rejected NITE's antitrust claims against Columbia on the ground that it was not a violation of the Sherman Act for a manufacturer or supplier, like Charter, unilaterally to cancel an exclusive distributorship with one party, such as NITE, and to **[**10]** substitute another, such as Columbia. *Monsanto Co. v. Spray-Rite Service Co., 465 U.S. 752, 104 S. Ct. 1464, 1469, 79 L. Ed. 2d 775 (1984)*; **[*1401]** *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 468, 63 L. Ed. 992 (1919)*. The court rejected Patterson's and NITE's tortious interference of contract claim against Columbia because there was no evidence indicating that Columbia, when it contracted with Charter, either had knowledge of an extant Charter-NITE distributorship agreement or caused its breach.

At the close of all the evidence, the court directed a verdict for Charter on the balance of the antitrust claims. Addressing NITE's *section 1* Sherman Act claim, the court found no evidence of a conspiracy between Charter and a third party. As for NITE's *section 2* claim, the court followed its reasoning in dismissing Columbia from the case. It also observed that Charter, having no presence in the film production and distribution industries, did not create a monopoly, attempt to create a monopoly, or restrain trade in the relevant product market. *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 1704, 16 L. Ed. 2d 778 (1966)*. **[**11]**

The district court denied Charter's motion for a directed verdict on plaintiffs' breach of contract claim, although the court seriously doubted that Charter and NITE and/or Patterson had ever reached a binding agreement to distribute "The Buddy Holly Story." The court also denied the plaintiffs' motions for a directed verdict on Charter's counterclaim. The jury thereafter returned defense verdicts on those respective claims.

II.

As we have indicated *supra*, NITE does not appeal the district court's dismissal of its antitrust claims. Patterson, however, questions the court's ruling that he lacked standing to prosecute those claims individually. We dispose of his point in subpart A below.

Both plaintiffs challenge the court's instructions to the jury on their breach of contract claim against Charter. We reject their challenge in subpart B. Plaintiffs also claim reversible error in the court's denial of their pretrial motion for leave to amend their complaint and the manner in which it conducted the trial. Only the former claim of error is worthy of discussion, in subpart C; the remaining claims are frivolous and receive no further comment.

A.

[12]** ***HN1***[] Standing to prosecute a private antitrust action under section 4 of the Clayton Act requires that the plaintiff prove that "he is within that sector of the economy which is endangered by a breakdown of competitive conditions in a particular industry." *Jeffrey v. Southwestern Bell, 518 F.2d 1129, 1131 (5th Cir. 1975)*. *See* *Construction Aggregate Transport, Inc. v. Florida Rock Industries, Inc., 710 F.2d 752, 762 (11th Cir. 1983)*. The plaintiff must be the target against which anticompetitive activity is directed. *Midwestern Waffles, Inc. v. Waffle House, Inc., 734 F.2d 705, 710 (11th Cir.1984)*; *Pan-Islamic Trade Corp. v. Exxon Corp., 632 F.2d 539, 546-47 (5th Cir.1980)*, *cert. denied*, *454 U.S. 927, 102 S. Ct. 427, 70 L. Ed. 2d 236 (1981)*. The injury must be "of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' act unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 697, 50 L. Ed. 2d 701 (1977)*. "Incidental or consequential injury or injury remotely **[**13]** caused by an antitrust violation does not give a plaintiff standing to complain that he has been injured by reason of anything forbidden in the antitrust laws." *Midwestern Waffles, 734 F.2d at 710-11*. *See* *Jeffrey, 518 F.2d at 1131* (citing cases).

The film distribution market was the target of the defendants' alleged anticompetitive behavior. Patterson never intended or prepared to enter this business. There is no evidence that any of the defendants' alleged behavior was directed against him individually. Patterson clearly fell outside the target area. Accordingly, the district court correctly determined that he lacked standing to sue.

[*1402] Patterson claimed individual injury in his capacity as an officer of NITE and the manager of its film distribution program, a target of the alleged conspiracy. The law on standing in this situation is clear. ***HN2***[] Neither an officer nor an employee of a corporation has standing to bring an action in his own right for an antitrust violation causing injury to the corporation and its business. *Midwestern Waffles, 734 F.2d at 710-11*; **[**14]** *Pitchford v. Pepi, Inc., 531 F.2d 92, 97-98 (3d Cir.1975)*, *cert. denied*, *426 U.S. 935, 96 S. Ct. 2649, 49 L. Ed. 2d 387 (1976)*; *Jeffrey, 518 F.2d at 1131*. To be sure, such persons may suffer "indirect" or "secondary" financial injury from antitrust violations, but the law does not consider them to be the target of the anticompetitive practices. *Jeffrey, 518 F.2d at 1131*.

In addition, we are certain that any error concerning Patterson's standing to prosecute the antitrust claims was harmless. Patterson only contends that he should have been treated as a distributor in the same position as NITE. Had the district court allowed his case to proceed to trial, his evidence would have been the same as NITE's. That evidence, considered in the light most favorable to Patterson, would have established nothing more than it established for NITE, a unilateral refusal by Charter to deal with Patterson and NITE. *Section 1* of the Sherman Act does not proscribe independent action. ***HN3***[] A manufacturer generally has a right to deal, or refuse **[**15]** to deal, with whomever it chooses so long as its decision is made independently. *Monsanto Co. v. Spray-Rite Service Corp.*, __ U.S. at __, 104 S. Ct. at 1469 (1984); *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 468, 63 L. Ed. 992 (1919)*; *Construction Aggregate Transport, Inc. v. Florida Rock Industries, Inc., 710 F.2d 752, 772-73 (11th Cir. 1983)*.

HN4[] *Section 2* of the Act prohibits monopolization and attempts to monopolize. A plaintiff need not demonstrate that the monopolization or attempt was the product of concerted action. Therefore, a wholly unilateral refusal to deal, when accompanied by the intent to monopolize and the requisite degree of market power, may constitute a violation of *section 2*. *Otter Tail Power Co. v. United States, 410 U.S. 366, 377-78, 93 S. Ct. 1022, 1029-30, 35 L. Ed. 2d 359 (1973)*; *see also* *Lorain Journal Co. v. United States, 342 U.S. 143, 152-55*; *72 S. Ct. 181, 186-87, 96 L. Ed. 162 (1951)*. Charter's actions cannot be viewed as a predatory **[**16]** refusal to deal as proscribed by *section 2*, however, because the company plainly lacked sufficient market power to present a dangerous probability of success. *Walker Process Equipment, Inc. v. Food Machinery and Chemical Corp., 382 U.S. 172, 177-78, 86 S. Ct.*

347, 350-51, 15 L. Ed. 2d 247 (1965); Quality Foods de Centro America, S.A. v. Latin American Agribusiness Development Corp., 711 F.2d 989, 997 (11th Cir.1983). In sum, even if Patterson had standing, he could not have made out a claim under either section of the Sherman Act, and the district court would have been required to take his case from the jury, as it did NITE's.

B.

According to NITE and Patterson, the district court, in charging the jury on their breach of contract claim against Charter, improperly instructed the jury on propositions of law about which there was no evidence. *See* Collins v. Metropolitan Life Insurance Co., Inc., 729 F.2d 1402, 1405 (11th Cir.1984). They also contend that the court's charge contained such inflammatory language as to prejudice the jury against them.

[17]** ***HN5***[] In reviewing jury instructions, we consider the court's charge as a whole. When the instructions, taken together, accurately express the law applicable to the case without confusing or prejudicing the jury, there is no reason for reversal even though isolated clauses may, in fact, be confusing, technically imperfect, or otherwise subject to criticism. Somer v. Johnson, 704 F.2d 1473, 1477-78 (11th Cir.1983); Johnson v. Bryant, 671 F.2d 1276, 1280 (11th Cir.1982). An erroneous instruction does not require reversal unless the reviewing **[*1403]** court is "left with a substantial and ineradicable doubt as to whether the jury was properly guided in its deliberations," Miller v. Universal City Studios, Inc., 650 F.2d 1365, 1372 (5th Cir.1981).

The bulk of appellants' criticisms deal with the court's treatment of Charter's statute of frauds defense. *See* Ga. Code § 13-5-30(5) (1982). Charter contended that the oral agreement plaintiffs alleged it made in Atlanta on April 11, 1977, *see supra*, part I, was unenforceable because it was "not to be performed within one year." [7]

[18]** The law ***HN7***[] in Georgia, although not recently articulated, appears to be that the statute of frauds does not bar enforcement of an oral contract if one side is capable of completing his performance within one year. Johnson v. Watson, 1 Ga. 348 (1846). [8] The court properly instructed the jury on the statute, and, before the jury retired, plaintiffs objected to the instruction, contending that the evidence failed to support Charter's statute of frauds defense. *See* Fed. R. Civ. P. 51. They argued that the evidence conclusively established that they could have performed their part of the bargain within one year and that the court's submission of Charter's defense to the jury caused them substantial prejudice. We are not persuaded.

[19]** The evidence in this case, viewed most favorably for the plaintiffs, indicated that no contract of any kind existed between Charter and Patterson. At all times, Patterson was acting as NITE's representative; hence the court should have withdrawn his claim from the jury when Charter moved for a directed verdict. It follows, then, that the court's charge on the breach of contract claim caused Patterson no prejudice.

---

[7] The Georgia Statute of Frauds, codified as Ga. Code § 13-5-30 (1982), provides in relevant part:

> **13-5-30.** ***HN6***[] **Agreements required to be in writing**.
>
> To make the following obligations binding on the promisor, the promise must be in writing and signed by the party to be charged therewith or some person lawfully authorized by him:
>
> (5) Any agreement that is not to be performed within one year from the making thereof; . . . .

[8] It is clear that, under Georgia law, if *both* parties to a contract are capable of performing within one year, the contract is outside the statute of frauds. Henderson v. Touchstone, 22 Ga. 14 (1857); Weems v. Assoc. Life Ins. Co., 154 Ga. App. 552, 269 S.E.2d 57, 59 (1980); Klag v. Home Insurance Co., 116 Ga. App. 678, 158 S.E.2d 444, 451 (1967). These cases should not necessarily be read, however, as *requiring* that *both* parties be capable of performing within a year in order for the contract to be outside the statute of frauds; thus they need not be read as overturning the holding in Johnson v. Watson, 1 Ga. 348 (1846). If, however, Georgia law does require that both parties be capable of performing within one year in order for the contract to be outside the statute of frauds, the contract before us clearly could not have met this more stringent requirement. For, as we demonstrate *infra*, it would have been nearly impossible for even one of the parties, NITE, to have performed within one year.

There is little, if any, possibility that the charge prejudiced NITE either. There was a remote chance, at best, that NITE could have performed the April 11, 1977 oral contract within one year. First, NITE needed at least two months, at minimum, to prepare itself to publicize its distribution of "The Buddy Holly Story"; thereafter, it needed four more months to sign up the 750 exhibitors it promised Charter it would obtain. Production of the film was not to commence for several months; in all, the parties contemplated that practically a year would pass before the film reached NITE's exhibitors. Finally, NITE was required to monitor its exhibitors' performance throughout the film's exhibition. On this record, we would be hard pressed to reverse the district court had **[**20]** it directed a verdict for Charter on this claim.

Having declined to direct a verdict, the district court was manifestly required to submit Charter's statute of frauds defense to the jury. The court's instruction carefully tracked the statute and, in our view, was entirely free of error. The plaintiffs have no room for complaint, and we accordingly reject their challenges to the manner **[*1404]** in which the court submitted their breach of contract claim to the jury.

C.

NITE and Patterson contend that the district court erred in not granting them leave to amend their complaint to add fourteen new defendants, including the Owners, the Boston Group, and General Cinema Corporation of America, and to increase their prayer for punitive damages from $20 million to $150 million. The plaintiffs made their request after almost a year of extensive discovery. During the interval, thirty-three people were deposed and the parties propounded numerous interrogatories and produced substantial quantities of documents. Discovery was about concluded, and the defendants were preparing to go to trial.

[21]** ***HN8***[] The grant of leave to amend is committed to the district court's discretion, but *Fed. R. Civ. P. 15(a)* provides that "leave shall be freely given when justice so requires." *See, e.g., Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 330, 91 S. Ct. 795, 802, 28 L. Ed. 2d 77 (1971)*; *Espey v. Wainwright, 734 F.2d 748, 750 (11th Cir.1984)*. In this case, the district court correctly applied the standard enunciated in *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 230, 9 L. Ed. 2d 222 (1962)*:

> ***HN9***[] If the underlying facts or circumstances relied upon by a plaintiff may be a proper subject of relief, he ought to be afforded an opportunity to test his claim on the merits. In the absence of any apparent or declared reason -- such as undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, futility of amendment, etc. -- the leave sought should, as the rules require, be **[**22]** "freely given."

Here, the plaintiffs unnecessarily delayed the prosecution of their claims against the fourteen additional parties. Charter and Columbia, both ready for trial, would have been prejudiced by the delay and expense occasioned by the largely repetitious discovery the new defendants would have required. Finally, the plaintiffs, in moving for leave to amend, made no showing in their factual allegations as to how the additional parties could be held liable on any of the claims they were asserting against Charter and Columbia. Under these circumstances, the district court acted within its discretion in denying plaintiffs' motion for leave to amend the complaint. The judgment of the district court is

AFFIRMED.

HN1[] **Vertical Restraints, Price Fixing**

Although the use of summary procedures certainly is not prohibited in antitrust cases, summary judgment motions in antitrust litigation are disfavored. Accordingly, a court must strictly apply the general rule that the party seeking summary judgment must conclusively show that there exists no genuine issue of material fact and that the movant is entitled to judgment as a matter of law. The evidence and all reasonable inferences which may be drawn therefrom must be viewed in the light most favorable to the party opposing the summary judgment motion.

HN2[] Sherman Act, Claims

Vertical price fixing is a per se violation of § 1 of the Sherman Act, 15 U.S.C.S. § 1. Establishing a per se violation of the Sherman Act in a private action brought under a vertical price fixing theory requires proof of four elements: a defendant must have intended to fix prices charged by traders at lower levels in the distribution system; a defendant must have coerced the plaintiff into charging higher or lower prices; a defendant's conduct must have caused antitrust injury; and a plaintiff must show an entitlement to relief.

HN4[] Tying Arrangements, Clayton Act

An unlawful tying arrangement under § 1 of the Sherman Act, 15 U.S.C.S. § 1, exists where a seller will sell one product, the tying product, only if the buyer will purchase a second product, the tied product. Such arrangements are per se violations of § 1 if the seller has sufficient economic power with respect to the tying product to appreciably restrain free competition in the market for the tied product and a "not insubstantial" amount of interstate commerce is affected. In order to have a per se unlawful tying arrangement, two distinct products or services must jointly be sold.

Criminal Law & Procedure > ... > Fraud Against the Government > Mail Fraud > Elements

Criminal Law & Procedure > ... > Fraud Against the Government > Mail Fraud > General Overview

HN5[ ] **Mail Fraud, Elements**

The crime of mail fraud has two elements: a scheme or artifice to defraud and a mailing for the purpose of executing the scheme. The scheme to defraud must involve intentional fraud, consisting in deception intentionally practiced to induce another to part with property or to surrender some legal right, and which accomplishes the end designed. A scheme to defraud requires intent to deceive or defraud. The scheme to defraud must involve misrepresentations or omissions reasonably calculated to deceive persons of ordinary prudence and comprehension.

Opinion by: CONTIE

Opinion

[*1208] CONTIE, Circuit Judge.

The plaintiffs, who are franchisees of 7-Eleven convenience stores, appeal from a summary judgment rendered in favor of defendant Southland Corporation, the franchisor. The plaintiffs' complaint filed on October 2, 1981 accused Southland of vertical price fixing (Count I) and imposing a tying arrangement (Count II) in violation of *15 U.S.C. § 1* (Sherman Antitrust Act) and of racketeering (Count III) in violation of *18 U.S.C. § 1962* **[**2]** (Racketeer Influenced and Corrupt Organizations Act, *i.e.*, RICO). The district court dismissed the RICO count and subsequently granted Southland's motion for summary judgment on the vertical price fixing and tying arrangement counts. We affirm both the dismissal of the RICO claim and the summary judgment on the tying arrangement claim and reverse the summary judgment on the vertical price fixing claim.

I.

* The Honorable Samuel H. Bell, United States District Judge for the Northern District of Ohio, sitting by designation.

The allegations underlying Count I may be summarized as follows. The plaintiffs contracted with Southland to operate 7-Eleven convenience stores in the 1970s. Although Southland suggests retail prices and recommends inventory suppliers, the standard franchise agreement expressly provides that a franchisee is not required either to charge the suggested retail price or to purchase inventory from recommended vendors. The plaintiffs contend, however, that Southland in fact requires them to do both of these things through the operation of its retail inventory accounting system and through pressure exerted by its representatives.

Southland's retail inventory accounting system measures inventory shortages and overages for which the franchisees are contractually responsible **[**3]** (Kanawyer affidavit at 8). Under this system, a franchisee's inventory is valued at Southland's suggested retail price unless the franchisee notifies Southland of a different actual retail price. **[*1209]** The franchisee must complete one line on a form provided by Southland for each product on which the franchisee wishes to deviate from the suggested retail price. Moreover, if a franchisee purchases inventory from a nonrecommended vendor, the franchisee must forward the invoice to Southland together with information about the actual retail price being charged. Furthermore, Southland does not permit franchisees to make permanent price changes. Instead, a franchisee must submit a price change report whenever Southland changes the suggested retail price, even though the franchisee may not have changed the actual retail price.

The plaintiffs do not contend that retail inventory accounting systems are inherently suspect under the Sherman Act. In fact, the plaintiffs appear willing to report all retail price changes and to report, one time, the retail prices of items purchased from nonrecommended suppliers. The plaintiffs object, however, to Southland's requirement that they repeatedly **[**4]** report *unchanged* actual retail prices whenever suggested retail prices change or whenever purchases are made from nonrecommended vendors.

The plaintiffs assert that since dozens of suggested price changes occur in a sixty-day period on the several thousand items stocked in their stores, they are forced to follow Southland's suggested retail prices, which are higher than the prices they wish to charge, on sixty to seventy percent of their items. The plaintiffs claim that although they wish to charge lower prices on more items, they cannot do so because of the extraordinary amount of paperwork that would be involved. Moreover, the plaintiffs contend that partially because of Southland's reporting requirements, they must purchase sixty-five to seventy-five percent of their inventory from recommended suppliers even though these vendors charge between ten and forty percent more than nonrecommended suppliers. [1] These higher wholesale costs are reflected in the actual retail prices. The plaintiffs claim that Southland has intentionally structured its retail inventory accounting system to insure that high prices will be maintained at franchisees' stores.

[5]** The plaintiffs also allege that Southland, through the conduct of its representatives, has forced them to honor its suggested retail prices and to purchase inventory items from recommended vendors. The plaintiffs rely upon the affidavits of Diane DeCarlo and Shirley Spinks to support this claim. The plaintiffs contend that because they independently price thirty to forty percent of their inventory items and purchase twenty-five to thirty-five percent of their inventories from nonrecommended vendors, they have been subject to frequent dishonoring of price change forms (resulting in inventory shortages), abusive audits (including nighttime audits and findings of unusually large inventory shortages), late payments by Southland of payrolls and franchisee draws, threats of terminating the plaintiffs' franchises, threats of Southland opening competing 7-Eleven franchises and visits during which Southland representatives have forced the plaintiffs to conform their prices to Southland's suggested retail prices.

Count II of the complaint involves a provision in the standard franchise agreement requiring franchisees to deposit their daily proceeds, save for amounts used to pay nonrecommended **[**6]** vendors, into Southland accounts at Southland-approved banks. These accounts are accessible only to Southland and Southland retains all interest earned on the accounts. The standard franchise agreement further provides that Southland will pay the franchisees' operating expenses (*e.g.*, inventory costs and payroll) from the funds contained in these accounts. Moreover, Southland is obligated to disburse the franchisees' draws from these accounts.

---

[1] The alleged tying arrangement is also said to contribute to this problem.

According to Southland, the daily deposit requirement has three purposes (Kanawyer affidavit at 14). First, the deposits provide Southland a fund from which to pay its **[*1210]** franchisees' operating expenses. Second, the deposits are part of the security interest that Southland possesses in most franchisees' inventory. [2] Third, the daily deposit requirement helps the company to collect its share of a given store's profits. The plaintiffs' complaint alleges that the daily deposit system is a tying arrangement in which "the surrender of the right of the franchisee to manage the proceeds of his own business" (complaint at 9) is tied to the awarding of a 7-Eleven franchise (the tying product).

[7]** Count III of the complaint asserts that Southland, through use of the mails, has engaged in racketeering activity. Southland is alleged to have charged the plaintiffs for expenses that Southland had not paid from the plaintiffs' deposited funds, charged the plaintiffs royalties on sales that never occurred and required inventory suppliers to designate certain allowances as advertising allowances so that these sums would not have to be credited to the plaintiffs' accounts. Under the franchise agreement, advertising allowances need not be credited to the franchisees.

The district court dismissed Count III pursuant to *Federal Rule of Civil Procedure (FRCP) 12(b) (6)* on the alternative grounds that the plaintiffs had inadequately alleged mail fraud (the predicate unlawful conduct for purposes of this RICO claim), that plaintiffs had not pleaded fraud with particularity as required by *FRCP 9(b)* and that RICO does not apply to business organizations like Southland which have no connection with organized crime.

The district court also granted Southland's subsequent motion for summary judgment on Counts I and II. As to the vertical price fixing claim, the court held that whether Southland's **[**8]** retail inventory accounting system had caused the plaintiffs to follow suggested retail prices more than they would have otherwise presented a genuine issue of material fact. On the other hand, the court held that no genuine issues of fact remained on the elements of intent and coercion. Moreover, the court held that since the plaintiffs had not appealed from a magistrate's order imposing sanctions for having unsatisfactorily answered Southland's interrogatories about damages, they were precluded from obtaining monetary relief. The court further ruled that the absence of evidence on damages rendered injunctive relief unavailable.

The district court granted summary judgment to Southland on the tying claim primarily on the ground that surrendering the right to manage the proceeds of a business is not a product or a service for purposes of tying arrangement analysis. The court further held that even if a tied product or service were involved, the plaintiffs were precluded by the magistrate's order from demonstrating any entitlement to monetary or injunctive relief.

II.

Before addressing the vertical price fixing, tying arrangement and RICO claims in detail, several preliminary **[**9]** points merit discussion. First, this case involves a summary judgment granted to defendant Southland by the district court. ***HN1***[] Although the use of summary procedures certainly is not prohibited in antitrust cases, *Bouldis v. U.S. Suzuki Motor Corp., 711 F.2d 1319, 1324 (6th Cir. 1983)*, summary judgment motions in antitrust litigation are disfavored. *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962)*; *Bouldis, 711 F.2d at 1324*. Accordingly, this court must strictly apply, *id.*, the general rule that the party seeking summary judgment must *conclusively* show that there exists no genuine issue of material fact and that the movant is entitled to judgment as a matter of law. *Smith v. Hudson, 600 F.2d 60, 63* (6th Cir.), *cert. dismissed*, *444 U.S. 986, 62 L. Ed. 2d 415, 100 S. Ct. 495 (1979)* (emphasis in original). The evidence and all reasonable inferences which may be drawn therefrom must be viewed in the light most favorable to the party opposing the **[**10]** summary **[*1211]** judgment motion. *Id.; Bouldis, 711 F.2d at 1324*.

Two points raised by Southland concerning the evidence that this court may consider in deciding this case must also be addressed. First, the company contends that because the DeCarlo and Spinks affidavits contain hearsay,

---

[2] Although not required to do so, most franchisees finance their inventories through Southland because the company charges lower interest rates than regular lending institutions.

argumentative statements and legal conclusions, the affidavits must be totally disregarded. Southland correctly argues that the DeCarlo and Spinks affidavits contain much inadmissible material and that this material may not be considered by this court. *See* *State Mutual Life Assurance Co. v. Deer Creek Park, 612 F.2d 259, 264 (6th Cir. 1979)* (hearsay); *Turoff v. May Company, 531 F.2d 1357, 1362 (6th Cir. 1976)* (hearsay); *Patmon v. Van Dorn Co., 498 F.2d 544, 546-47 (6th Cir. 1974)* (unsupported opinions). The affidavits do, however, contain some statements of fact within the personal knowledge of DeCarlo and Spinks. This information may be considered.

Second, Southland invokes the rule that the plaintiffs may not attempt to raise genuine issues of material fact by filing affidavits that contradict their previous deposition **[**11]** testimony. *See* *Reisner v. General Motors Corp., 671 F.2d 91, 93* (2d Cir.), *cert. denied*, *459 U.S. 858, 74 L. Ed. 2d 112, 103 S. Ct. 130 (1982)*; *Radobenko v. Automated Equipment Corp., 520 F.2d 540, 544 (9th Cir. 1975)*. Southland contends that the DeCarlo and Spinks affidavits contradict their deposition testimony because they admitted during deposition that they frequently deviated from Southland's suggested retail prices and purchased inventory items from nonrecommended vendors. Southland submits that these admissions conclusively demonstrate that it has not intentionally coerced the plaintiffs into maintaining high prices at their stores.

Assuming arguendo the correctness of the proposition of law cited by Southland, we do not agree that the DeCarlo and Spinks affidavits contradict their depositions. The DeCarlo and Spinks affidavits admit that the plaintiffs deviate from Southland's suggested retail prices on thirty to forty percent of their inventory items and purchase twenty-five to thirty-five percent of their inventories from nonrecommended suppliers. The plaintiffs' theory, however, is that they wish to exercise even **[**12]** greater pricing and purchasing freedom and are prevented from doing so by the particular accounting system under review and by the actions of some of Southland's representatives. Indeed, the district court expressly held that an issue of fact exists as to whether the plaintiffs would have exercised greater discretion in the absence of the policies and conduct being challenged. We conclude that taking into account the DeCarlo and Spinks affidavits in deciding this case does not contravene the rule articulated in *Reisner* and *Radobenko*.

A final preliminary point is that the plaintiffs have contended that the alleged vertical price fixing and tying arrangement constitute *per se* violations of the Sherman Act. Since the plaintiffs have not argued this case under the Rule of Reason, we do not undertake that analysis.

III.

The Supreme Court has long held that ***HN2***[] vertical price fixing is a *per se* violation of *§ 1* of the Sherman Act. *See* *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, , 104 S. Ct. 1464, 1469, 79 L. Ed. 2d 775 (1984)*; *Albrecht v. Herald Co., 390 U.S. 145, 151-53, 19 L. Ed. 2d 998, 88 S. Ct. 869 (1968)*; **[**13]** *United States v. Parke, Davis & Co., 362 U.S. 29, 47, 4 L. Ed. 2d 505, 80 S. Ct. 503 (1960)*; *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 213, 95 L. Ed. 219, 71 S. Ct. 259 (1951)*; *Dr. Miles Medical Co. v. John D. Park & Sons Co., 220 U.S. 373, 55 L. Ed. 502, 31 S. Ct. 376 (1911)*. *See also* ABA Antitrust Section, ***Antitrust Law*** *Developments 2d*, 64 (1984). [3] The practice is unlawful because it **[*1212]** restricts the freedom of traders who are at lower levels of the product or service distribution system to set their own prices. *See* *Kiefer-Stewart, 340 U.S. at 213*, *AAA Liquors, Inc. v. Joseph E. Seagram & Sons, Inc., 705 F.2d 1203, 1205 (10th Cir. 1982)*. Establishing a *per se* violation of the Sherman Act in a private action brought under a vertical price fixing theory requires proof of four elements. First, the defendant must have intended to fix prices charged by traders at lower levels in the distribution system. *See* *Monsanto Co., 104 S. Ct. at 1471*; *Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105, 111 (3d Cir. 1980)*, **[**14]** *aff'g 478 F. Supp. 243, 259 (E.D. Pa 1979)*; *Mowery v. Standard Oil Company of Ohio, 463 F. Supp. 762, 767 (N.D. Ohio 1976)*, *affd.*, *590 F.2d 335 (6th Cir. 1978)*. Second, the defendant must have coerced the plaintiff into charging higher or lower prices. *See* *AAA Liquors, 705 F.2d at 1206*; *Carlson*

---

[3] In the recent *Monsanto Co.*, case, the Solicitor General of the United States filed an *amicus curiae* brief urging the Court to reconsider the *per se* violation rule adopted in *Dr. Miles Medical Co.* The Court refused to consider this argument on the ground that the defendants had not presented it either in the district court or on appeal. We note that Southland has not challenged the *per se* violation rule at any time during this litigation.

Machine Tools, Inc. v. American Tool, Inc. , 678 F.2d 1253, 1261 (5th Cir. 1982); Yentsch v. Texaco, Inc., 630 F.2d 46, 52-54 (2d Cir. 1980); Santa Clara Valley Distributing Co. v. Pabst Brewing Co., 556 F.2d 942, 945 (9th Cir. 1977); Hanson v. Shell Oil Co., 541 F.2d 1352, 1356 (9th Cir. 1976), *cert. denied*, *429 U.S. 1074, 50 L. Ed. 2d 792, 97 S. Ct. 813 (1977)*; ***Antitrust Law*** *Developments*, at 60. [4] Third, the defendant's conduct must have caused antitrust injury. *See* General Cinema Corp. v. Buena Vista Distribution Co., 681 F.2d 594, 596 (9th Cir. 1982); Belk-Avery, Inc. v. Henry I. Siegel Co., Inc., 457 F. Supp. 1330, 1336 (M.D. Ala. 1978). Finally, a plaintiff must show an entitlement to **[**15]** relief.

We hold that the district court erred in finding no genuine issue of material **[**16]** fact concerning whether Southland intended to fix prices. One feature of Southland's retail inventory accounting system is particularly troublesome. Although franchisees clearly must be required to report retail price changes and retail prices being charged on items purchased from nonrecommended vendors so that Southland's records of actual retail prices will be accurate, [5] Southland has never explained why franchisees must again report *unchanged* actual retail prices whenever Southland alters its suggested retail prices. In light of the substantial paperwork burden that this requirement purportedly creates, and further in light of the absence of any apparent reason why the requirement exists, a reasonable jury could infer that Southland has imposed the requirement with the intent to discourage deviations from its suggested retail prices.

[17]** Furthermore, Exhibits F, 11 and 12, attached to the district court's opinion, show that Southland has instructed auditors and management personnel to monitor price compliance by franchisees. Exhibit F demonstrates that Southland regards deviations from suggested retail prices as being contrary to its best interests. Although the documents in question do not directly **[*1213]** instruct anyone to fix prices, and although Southland has in the past distributed documents concerning franchisees' pricing discretion, a reasonable jury could find from all the evidence that Southland collects price compliance information. Moreover, a jury could reasonably infer that Southland desires the information so that it may act in order to protect its interest in having franchisees comply with suggested retail prices. Indeed, the DeCarlo and Spinks affidavits specify numerous instances in which Southland representatives allegedly have used illegal tactics in order to obtain the plaintiffs' compliance with suggested retail prices. *See infra*. Viewing all the evidence and the reasonable inferences which may be drawn therefrom in the light most favorable to the plaintiffs, *see* Smith, 600 F.2d at 63, **[**18]** we conclude that whether Southland intended to fix prices presents a genuine issue of material fact.

The district court also erred in finding no genuine issue of material fact on the coercion issue. Although Southland was entitled to suggest retail prices and to attempt to persuade the plaintiffs to follow them, AAA Liquors, 705 F.2d at 1206; Carlson Machine Tools, 678 F.2d at 1261; Yentsch, 630 F.2d at 53, it was not entitled to coerce the plaintiffs. ***HN3***[] Coercion in the vertical price fixing context is actual or threatened affirmative action, beyond suggestion or persuasion, taken by a defendant in order to induce a plaintiff to follow the defendants' prices. *See In re Coordinated Pretrial Proceedings in* Petroleum Products Antitrust Litigation, 691 F.2d 1335, 1343 (9th Cir. 1982); General Cinema, 681 F.2d at 597; Belk-Avery, 457 F. Supp. at 1334. *See also* Carlson Machine Tools, 678 F.2d at 1261 (threatening to make a "meaningful event depend upon compliance or non-compliance" **[**19]** with suggested prices is coercion). Threatening to terminate a franchisee in order to induce compliance with suggested

[4] The plaintiffs assert that they need not prove coercion, citing *Albrecht*. The Supreme Court stated in that case, however, that a plaintiff may assert a "combination" between a defendant and himself "as of the day [plaintiff] *unwillingly* complied." 390 U.S. at 150 n.6 (emphasis supplied). Consequently, *Albrecht* supports the notion that coercion must be demonstrated in a private action brought under a vertical price fixing theory.

[5] We reiterate that the plaintiffs have not argued that retail inventory accounting systems are inherently suspect under the antitrust laws. Although the requirement of reporting retail price changes and initially reporting retail prices being charged on items purchased from nonrecommended vendors might constrain retail pricing discretion, not every vertical arrangement affecting prices necessarily violates the Sherman Act. *See* Lewis Service Center, Inc. v. Mack Trucks, Inc., 714 F.2d 842, 846 (8th Cir. 1983), *cert. denied*, ***467 U.S. 1226, 104 S. Ct. 2678, 81 L. Ed. 2d 873 (1984)***; AAA Liquors, 705 F.2d at 1205. Since the plaintiffs have only argued that one element of Southland's retail inventory accounting system was created with the intent to fix prices, we do not consider the rest of the system.

retail prices, for example, is coercion. *See* *Yentsch, 630 F.2d at 53*; *Newberry v. Washington Post Co., 438 F. Supp. 470, 479 (D.D.C. 1977)*.

We hold that if Southland intentionally created the requirement that frachisees report unchanged actual retail prices whenever suggested retail prices change in order to deter franchisees from exercising pricing discretion, this would constitute affirmative action of a coercive nature. Furthermore, we hold that the DeCarlo and Spinks affidavits allege numerous instances of coercive conduct on the part of Southland and its representatives. Both affiants claim that Southland refuses to honor some price change reports; DeCarlo asserts that Southland continues to refuse even after being notified of the problem. The refusal to honor price change reports results in inventory shortages chargeable to the plaintiffs. Although these errors eventually may be corrected, the plaintiffs must pay a penalty in the interim that is not refunded.

Both affiants also allege that in retaliation for not **[**20]** following Southland's pricing and purchasing policies, Southland representatives have threatened to distort, and have in fact distorted, inventory audits. Distorted audits cause the plaintiffs to be charged with shortages. Moreover, DeCarlo claims that because she expressed a desire not to follow a Southland promotion and because she argued with a company representative over retail price changes, Southland once untimely paid her payroll expenses and franchisee draw. [6]

The affiants further claim that because they exercise some pricing discretion and have expressed the desire not to **[**21]** purchase inventory items from recommended vendors such as the Southland Distribution Center, Southland representatives have threatened to terminate their franchises or establish competing franchises nearby. Finally, both affiants recount visits by Southland **[*1214]** representatives occurring in 1979 during which the representatives forced the plaintiffs to change their prices on all candy bars. [7] In view of the claims in the plaintiffs' affidavits and further in view of Southland's failure to provide counter-affidavits of the auditors and managerial employees alleged to have been involved in these incidents, we hold that Southland has not conclusively shown the absence of a genuine issue of material fact on the coercion issue.

[22]** The third element in a private vertical price fixing action is causation. Since the district court found that an issue of material fact was present concerning whether this particular accounting system has prevented the plaintiffs from exercising greater pricing discretion, we pause only to emphasize that the specific acts enumerated above, if they occurred, could also have caused the plaintiffs to follow Southland's suggested retail prices more often than they would have otherwise.

In order to prevail on their vertical price fixing theory the plaintiffs must also be entitled to relief. The district court correctly held that the plaintiffs may not recover monetary relief because of the magistrate's order imposing sanctions against the plaintiffs for failing satisfactorily to answer Southland's interrogatories concerning damages. The magistrate's order precluded the plaintiffs from presenting evidence at trial relating to the information sought in the interrogatories. The plaintiffs never appealed this order to the district court. Contrary to the plaintiffs' assertion, they were represented by counsel when the magistrate's order was entered on October 27, 1982. The motion by plaintiffs' **[**23]** original counsel to withdraw was not filed until November 2, 1982 and was not granted until December 16, 1982. The plaintiffs have presented absolutely no justification for their having failed to appeal the magistrate's order.

---

[6] Although DeCarlo also charges that Southland "deliberately" made the payments late, we disregard that allegation because DeCarlo could not have personal knowledge of the company's ulterior motives. In reviewing the affidavits, we have disregarded all similar comments about Southland's purported motives. This does not mean, however, that Southland's objective conduct is not evidence of coercion or of an intent to fix prices.

[7] Although DeCarlo recounts a similar incident occurring in 1982, the Southland representative in question was reprimanded at a meeting attended by DeCarlo. While Southland's reaction to this incident certainly is evidence that it has not engaged in coercion, we do not agree with Southland either that the plaintiffs' affidavits allege only isolated or unauthorized actions that do not amount to coercion as a matter of law, *see* *Belk-Avery, 457 F. Supp. at 1335*, or that there is no issue of material fact on the coercion issue.

The district court erred, however, in ruling that the plaintiffs are precluded by the magistrate's order from obtaining injunctive relief. The plaintiffs need not show that they have already suffered actual injury in order to obtain injunctive relief; a showing of a "significant threat of injury from an impending violation of the antitrust laws or from a contemporary violation likely to continue or recur" will suffice. *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 130, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)*; *Rosebrough Monument Co. v. Memorial Park Cemetery Association, 666 F.2d 1130, 1147 (8th Cir. 1981)*, *cert. denied*, *457 U.S. 1111, 73 L. Ed. 2d 1321, 102 S. Ct. 2915 (1982)*. Of central importance is that the magistrate's order precluded the plaintiffs only from introducing information sought by Southland's interrogatories. Those interrogatories inquired solely about damages already suffered **[**24]** by the plaintiffs. Thus, the magistrate's order does not preclude the plaintiffs from introducing evidence of future threatened injury. Since the district court relied solely upon the magistrate's order in holding that the plaintiffs could not obtain injunctive relief (district court opinion at 14 n.5), the district court's ruling on the injunctive relief issue cannot stand.

In summary, we hold that a genuine issue of a material fact exists as to each of the elements of the plaintiffs' vertical price fixing claim. The summary judgment in favor of Southland on that claim must be reversed. On remand, the plaintiffs may pursue only injunctive relief.

IV.

Count II of the complaint alleges that Southland has utilized an unlawful **[*1215]** tying arrangement. ***HN4***[] A tying arrangement exists where a seller will sell one product (the typing product) only if the buyer will purchase a second product (the tied product). *See* *Bouldis, 711 F.2d at 1329*; *Bell v. Cherokee Aviation Corp., 660 F.2d 1123, 1126 (6th Cir. 1981)*. Such arrangements are *per se* **[**25]** violations of *§ 1* if the seller has "sufficient economic power with respect to the tying product to appreciably restrain free competition in the market for the tied product and a 'not insubstantial' amount of interstate commerce is affected." *Bouldis, 711 F.2d at 1329-30*; *Bell, 660 F.2d at 1127*. Such arrangements "serve hardly any purpose beyond the suppression of competition," *Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 605, 97 L. Ed. 1277, 73 S. Ct. 872 (1953)*. Specifically, competitors of the seller are denied access to the market for the tied product solely because the seller has power in another product market. *See* *Northern Pacific Railway Co. v. United States, 356 U.S. 1, 6, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*; *Bell, 660 F.2d at 1127*. Moreover, buyers are forced to forego a free choice between items in the tied product market. *Id.*

It bears emphasis that in order to have a *per se* unlawful tying arrangement, two distinct products or services must jointly be sold. *See* *Fortner Enterprises, Inc. v. United States Steel Corp., 394 U.S. 495, 507, 22 L. Ed. 2d 495, 89 S. Ct. 1252 (1969)*; **[**26]** *Bouldis, 711 F.2d at 1330*; *Bell, 660 F.2d at 1127*. In the present case, the awarding of a 7-Eleven franchise is one product. We agree with the district court, however, that "the surrender of the right of the franchisee to manage the proceeds of his own business" which accompanies the franchise is not a product or service sold by Southland. This condition simply is a contractual obligation that the plaintiffs find burdensome and now seek to escape.

The plaintiffs attempt to evade this point by asserting alternative tying arrangement theories. First, the plaintiffs claim that although Southland is contractually obliged to pay inventory invoices out of the funds deposited into accounts by the plaintiffs, Southland in fact delays paying, or sometimes refuses to pay, nonrecommended vendors. Moreover, the plaintiffs often have insufficient cash on hand to pay nonrecommended vendors because of the daily deposit requirement. Thus, the plaintiffs as a practical matter are forced to purchase the bulk of their inventories from recommended suppliers such as Southland Distribution Center. The plaintiffs conclude that sales of inventory items by recommended **[**27]** suppliers are tied to the awarding of 7-Eleven franchises.

Second, the plaintiffs contend that banking services at the Southland-approved banks have been tied to the awarding of 7-Eleven franchises. Southland is said to benefit from this arrangement because it retains the interest on the accounts. The plaintiffs purportedly pay for these services in the form of interest lost on accounts that could have been opened at banks of the plaintiffs' choice.

The problem with the plaintiffs' alternative theories is that neither was pleaded in the complaint. The only tied product identified either in the complaint or in the plaintiffs' answers to Southland's interrogatories (App. at 221) is the surrender of the franchisees' right to manage the proceeds of their businesses. As has been indicated, that contractual obligation is not a product or service for purposes of tying arrangement analysis. The plaintiffs' alternative tying theories are not properly before this court, we express no view on their merits. [8]

[28]** We further hold that the district court properly dismissed the RICO claim in which the plaintiffs allege that Southland committed mail fraud. ***HN5***[] The crime of mail fraud has two elements: a scheme or artifice **[*1216]** to defraud and a mailing for the purpose of executing the scheme. *Pereira v. United States, 347 U.S. 1, 8, 98 L. Ed. 435, 74 S. Ct. 358 (1954)*; *United States v. Talbott, 590 F.2d 192, 195 (6th Cir. 1978)*; *United States v. Schilling, 561 F.2d 659, 661 (6th Cir. 1977)*. This court has held that the scheme to defraud must involve:

> *Intentional* fraud, consisting in deception *intentionally* practiced to induce another to part with property or to surrender some legal right, and which accomplishes the end designed. [*A scheme to defraud*] *requires intent to deceive or defraud*. [Emphasis supplied.]

Epstein v. United States, 174 F.2d 754, 765 (6th Cir. 1949). *See also* Schilling, 561 F.2d at 662. This court has also held that the scheme to defraud must involve **[**29]** "misrepresentations or omissions reasonably calculated to deceive persons of ordinary prudence and comprehension." *United States v. Van Dyke, 605 F.2d 220, 225* (6th Cir.), *cert. denied*, *444 U.S. 994, 62 L. Ed. 2d 425, 100 S. Ct. 529 (1979)*.

Count III of the plaintiffs' complaint is deficient in several respects. First, the complaint does not allege that Southland acted with intent to defraud. *See* Epstein, supra. Although intent is a state of mind that may be averred generally, *FRCP 9(b)*, it must be alleged. Second, the plaintiffs' complaint does not allege what misrepresentations (or omissions) of material fact Southland made to the plaintiffs that they reasonably relied upon to their detriment. *See* Van Dyke, supra. Hence, the plaintiffs have inadequately alleged the requisite elements of mail fraud.

Moreover, *FRCP 9(b)* ***HN6***[] requires that fraud be pleaded with particularity. To satisfy *FRCP 9(b)*, a plaintiff must at minimum allege the time, place and contents of the (misrepresentations) upon which he relied. *McGinty v. Beranger Volkswagen, Inc., 633 F.2d 226, 228 (1st Cir. 1980)*; **[**30]** *Bosse v. Crowell Collier and Macmillan, 565 F.2d 602, 611 (9th Cir. 1977)*; *Windsor Associates, Inc. v. Greenfeld, 564 F. Supp. 273, 280 (D. Md. 1983)*. The plaintiffs have not met this requirement in this case. The complaint at best alleges that Southland breached the franchise agreement in charging the plaintiffs certain expenses and royalties and in not crediting certain allowances to the plaintiffs' accounts. Since the plaintiffs' RICO allegations are inadequate, that count was properly dismissed. [9]

V.

The summary judgment in favor of Southland on the vertical price fixing claim is REVERSED and the claim is REMANDED for further proceedings. The plaintiffs may seek to obtain only injunctive relief on that claim. The dismissal of the RICO claim and the summary judgment in favor of Southland on the tying **[**31]** arrangement claim are AFFIRMED.

End of Document

---

[8] We do not address the other reasons relied upon by the district court in granting summary judgment on the tying arrangement claim.

[9] We do not address the issue of whether a business entity must be affiliated with organized crime in order to be liable for damages in a private civil RICO action.

General Battery Corp. v. Slaton

Common Pleas Court of Berks County, Pennsylvania

December 12, 1984, Decided

no. 5250 Equity, 1984

1984 Pa. Dist. & Cnty. Dec. LEXIS 108 *; 37 Pa. D. & C.3d 459 **

General Battery Corp. v. Slaton

Disposition: [*1] Petition for preliminary injunction.

Core Terms

trade secret, control system, computerized, battery, paste-weight, secret, manufacturer, secrecy, grid, disclose, paste, confidential, competitors, grid-weight, cases, preliminary injunction, lead oxide, injunctive relief, lead acid battery, terminated

LexisNexis® Headnotes

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN1[] **Injunctions, Preliminary & Temporary Injunctions**

In order to obtain preliminary injunctive relief, a plaintiff must establish each of the following criteria: (a) Such relief is necessary to prevent immediate and irreparable harm which cannot be compensated for by damages; (b) it will operate to restore the parties to the status quo as it existed immediately before the alleged wrongful conduct; and (c) greater injury will result from denial of the preliminary injunction than from granting it. In addition, the court must be satisfied that plaintiff's right is clear and the wrong manifest.

Trade Secrets Law > Protection of Secrecy > General Overview

HN3[] **Trade Secret Determination Factors, Business Use**

A trade secret may consist of any formula, pattern, device or compilation of information which is used in one's business, and which gives him an opportunity to obtain an advantage over competitors who do not know or use it.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Trade Secrets

Trade Secrets Law > Trade Secret Determination Factors > Definition Under Common Law

Trade Secrets Law > Trade Secret Determination Factors > General Overview

HN4[] **Trade Secrets & Unfair Competition, Trade Secrets**

An exact definition of a trade secret is not possible. Some factors to be considered in determining whether given information is one's trade secret are: (1) The extent to which the information is known outside of his business; (2) The extent to which it is known by employees and others involved in his business; (3) The extent of measures taken by him to guard the secrecy of the information; (4) The value of the information to him and to his competitors; (5) The amount of effort or money expended by him in developing the information; (6) The ease or difficulty with which the information could be properly acquired or duplicated by others.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Trade Secrets

Trade Secrets Law > Protected Information > Combinations & Compilations

Trade Secrets Law > Trade Secret Determination Factors > Ready Availability

HN5[] **Trade Secrets & Unfair Competition, Trade Secrets**

Novelty or uniqueness are not prerequisites for a product or concept to qualify as a trade secret. A trade secret can exist in a combination of characteristics and components, each of which, by itself, is in the public domain, but the unified process, design and operation of which, in unique combination, affords a competitive advantage and is a protectible secret.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Trade Secrets

Trade Secrets Law > Trade Secret Determination Factors > Business Use

Trade Secrets Law > Misappropriation Actions > General Overview

HN6[] **Trade Secrets & Unfair Competition, Trade Secrets**

To succeed in an action alleging misappropriation of a trade secret the burden is on plaintiff to show: (1) That there was a trade secret; (2) That it was of value to the employer and important in the conduct of his business; (3) That by reason of discovery or ownership the employer had the right to the use and enjoyment of the secret; and (4) That the secret was communicated to the employee while he was employed in a position of trust and confidence under such circumstances as to make it inequitable and unjust for him to disclose it to others, or to make use of it himself, to the prejudice of his employer.

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > General Overview

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Trade Secrets

Trade Secrets Law > Federal Versus State Law > ***Antitrust Law***

HN7[] **Intellectual Property, Ownership & Transfer of Rights**

Ownership of a trade secret does not give the owner a monopoly in its use, but merely a proprietary right which equity protects against usurpation by unfair means.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > General Overview

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Trade Secrets

HN8[] **Trade Secrets & Unfair Competition, Noncompetition & Nondisclosure Agreements**

Equity will protect an employer from the disclosure or use of a trade secret by an ex-employee if the employee entered into an enforceable restrictive agreement or was bound to secrecy by virtue of a confidential relationship existing between the employer and employee.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Trade Secrets

Trade Secrets Law > Protection of Secrecy > General Overview

HN9[] **Trade Secrets & Unfair Competition, Trade Secrets**

Where a trade secret was not disclosed to the employee during his employment but was developed by him while pursuing his duties with the employer, an express or implied agreement of secrecy must be shown. Otherwise, such information forms a part of the technical knowledge and skill the employee has acquired by virtue of his employment and which he has an unqualified privilege to use.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN10[] **Trade Secrets & Unfair Competition, Noncompetition & Nondisclosure Agreements**

An implied agreement of secrecy may be inferred from the existence of a confidential relationship between the employer and an employee.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Trade Secrets

Trade Secrets Law > ... > Remedies > Injunctions > Duration

Trade Secrets Law > ... > Remedies > Injunctions > General Overview

HN11[] **Trade Secrets & Unfair Competition, Trade Secrets**

The Pennsylvania courts have not articulated a standard for the duration of injunctions entered in trade-secret cases.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Trade Secrets

Trade Secrets Law > Protection of Secrecy > General Overview

HN12[] **Trade Secrets & Unfair Competition, Trade Secrets**

What in reality is protected in trade secret cases is not the product or process, but the secrecy of it.

Trade Secrets Law > Civil Actions > Defenses

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Trade Secrets

Trade Secrets Law > ... > Remedies > Injunctions > General Overview

Trade Secrets Law > ... > Remedies > Injunctions > Duration

Trade Secrets Law > Misappropriation Actions > Independent Development

Trade Secrets Law > Nonprotected Information > Reverse Engineering

Trade Secrets Law > Protected Information > Products

HN13[] **Civil Actions, Defenses**

Under the "independent development" test the appropriate duration for injunction in trade-secret cases is the period of time it would take for one, either by reverse engineering or by independent development, to produce the product by lawful means.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Trade Secrets

Trade Secrets Law > Employee Duties & Obligations > Employee Knowledge & Skill

HN14[] Trade Secrets & Unfair Competition, Trade Secrets

Conflicting social and economic policy considerations arise in each trade-secret case. A business which invests time, money, and manpower to develop secret advantages over its competitors must be afforded protection against the wrongful appropriation of secrets by a prior employee who was placed in a position of confidence. On the other hand, where the employer has no protectible trade secret, an individual who worked in a particular field of expertise cannot be compelled to erase from his mind the knowledge and skills learned through his employment. Our economic system is based upon competition and an individual has a fundamental right to follow and pursue the particular occupation for which he is best trained.

Labor & Employment Law > Wrongful Termination > Breach of Contract > Implied Contracts

HN15[] Types of Contracts, Express Contracts

A former employer can restrict his ex-employee's use of secrets he himself developed during his employment by express agreement.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Trade Secrets

Trade Secrets Law > Protection of Secrecy > General Overview

HN16[] Trade Secrets & Unfair Competition, Trade Secrets

In many cases the question of whether a specific matter is a trade secret is an extremely close one, often not readily predictable until a court has announced its ruling. At the same time, the countervailing social and economic policy considerations relative to a person's right to pursue employment in a field in which he has expertise and knowledge cannot totally be cast aside: What in reality is protected in cases is not the product or process but the secrecy of it. The commercial morality is preserved by preventing one from wrongfully using secret information for a period of time no longer than that required to discover or reproduce that information by lawful means. Where that period can be ascertained, defendant should be put out of business only for that length of time and, thus, be prevented from obtaining any advantage by the wrongful use of trade secrets.

[460]** SAYLOR, *J.,* December 12, 1984 --

FINDINGS, CONCLUSIONS AND ORDER MODIFYING PRELIMINARY INJUNCTION

BACKGROUND

This case involves trade secrets and injunctive relief. On March 16, 1984, we entered a temporary or special injunction with bond in the amount of $ 500,000. Since then we have had extensive preliminary hearings on the continuation of the injunction under *Pa.R.C.P. 1531*. We now make the following findings, conclusions and modification order.

FINDINGS OF FACT

1. Plaintiff is General Battery Corporation (GBU), a Delaware corporation, having a place of business in Reading, Berks County, Pa.

[461]** 2. GBC is engaged in the manufacture and sale of lead acid batteries for automotive, commercial and industrial markets.

3. Defendant is Earl J. Slaton (Slaton), an adult individual residing at R.D. 5, Sinking Spring, Berks County, Pa.

4. On April 2, 1982, GBC offered Slaton a job to work in the quality control **[*2]** department as its Quality Systems Engineer at a starting salary of $ 2,917 a month (Exhibit "A" to complaint).

5. Slaton was to report to Michael Reed, Corporate Director of Quality Assurance and Control.

6. Slaton accepted the job on April 12, 1982.

7. As an incident to his employment, Slaton signed a Confidential Disclosure Agreement (Exhibit 2) and an Invention Agreement (Exhibit 3).

8. These are GBC's standard agreements which it requires all salaried employees to sign as an incident to employment.

9. The Confidential Disclosure Agreement provides, in part, that (unless GBC's written consent is first secured) Slaton will not disclose at any time during or after his employment any ideas, inventions, know-how, trade secrets, technical information, processes, machinery and customer information disclosed to him by GBC during the course of his employment, whether or not developed by him.

10. The Confidential Disclosure Agreement further provides that, upon termination of his employment, Slaton will promptly deliver to GBC, and not keep or deliver to anyone else, all documents, drawings, blueprints and all other material of a secret or confidential nature.

11. In the manufacture **[*3]** of batteries it is recognized in the lead acid battery industry that substantial **[**462]** production savings and product quality can be realized if paste weight and grid weight can be controlled.

12. Computerized paste-weight control systems have been available in the market place to the lead acid battery industry for some time.

13. GBC found such control systems to be expensive and unsuitable. These systems, described as "Non-contact measurement systems," use radioisotopes to monitor the product by backscatter techniques. They require factory calibration; assume that the weight of uncoated grids are constant and accurately known; and require continuous measurement on-line.

14. In the market place computerized grid-weight control systems have been proposed, but none have been implemented.

15. One of Slaton's initial assignments was to work on the development of a computerized management information system which would store various GBC business activities; such as, warranty information, quality costs, warranty costs, process control perimeters, pricing information and personnel records. Necessary to this assignment Slaton was given access to GBC's confidential management information **[*4]** system (MIS).

16. GBC, early in 1982, started a research project to develop an inexpensive system to accurately measure and control paste weight.

17. This was a joint quality-control and manufacturing department project.

18. Finding a solution to this common industrial problem would give GBC a substantial competitive edge in the market Place.

19. While working on the development of a computerized management information system, Slaton General Battery Corp. v. Slatons **[**463]** became aware of GBC's paste-weight control project.

20. Before coming to GBC, Slaton was employed by P. R. Mallory Company (Duracell).

21. Although it manufactures and sells batteries, Duracell is not a competitor of GBC -- it is not in the lead acid battery industry; it is in the primary and alkaline battery market.

22. While at Duracell, Slaton designed several computerized quality-control systems.

23. Having previously designed computerized quality-control systems at Duracell and having become aware of GBC's paste-weight control project, Slaton made known to GBC's manufacturing and engineering department that he might aid in developing a system.

24. Thereafter, Slaton played a key and central role **[*5]** in developing an off-line, non-continuous, real time computerized system for determining the weight of pasted grids so that the amount of paste applied to the grids could be varied to meet certain specifications (paste-weight control system).

25. The paste-weight control system utilizes scales connected to a computer. The computer directs the on-line pasting machine operator to take measurements or to make adjustments. The computer takes into account variation in grid weight and paste moisture and computes optimum setting to achieve consistent lead usage.

26. The paste-weight control system components are storebought or off-the-shelf items, namely, a Commodore computer connected by a modem to an Apple computer, but the method of interconnecting these systems is not generally known in the industry.

[464]** 27. Development and use of the paste-weight control system led GBC to consider its application to a grid casting-weight control system (sometimes in the record referred to as "plate-weight control system").

28. Slaton actively participated in the development of a proposed grid-weight control system. 29. The grid-weight control system was only approved by GBC after Slaton terminated **[*6]** his employment.

30. GBC has yet to install and use the proposed and approved computerized grid-weight control systems at any of its plants.

31. GBC has installed and uses four computerized paste-weight control systems in two plants.

32. These systems are located in lead hazard areas of the plants. Access is limited to personnel who are trained in handling lead and required to wear protective equipment, including respirators. People would not normally visit these areas of the plants.

33. The cost to purchase and install one computerized paste-weight control system of the type available in the market place exceeds $ 100,000. Excluding start-up costs, GBC's system installed costs $ 15,000 to $ 20,000.

34. According to a report Slaton submitted, in addition to other benefits, a combined program of computer-based grid and paste controls at GBC would conservatively result in savings of $ 351,261 per year in grid lead and $ 314,058 in lead oxide -- a significant savings, in the opinion of Michael Reed, which would give a lead acid battery manufacturer a competitive advantage.

35. On May 13, 1983, Slaton resigned from his job at GBC. He gave 30 days notice but was terminated by GBC on **[*7]** May 13, 1983 (Exhibit 55 is **[**465]** Slaton's exit interview; Exhibit 56 is GBC's official discharge).

36. Some time before leaving GBC, Slaton told Michael Reed he was thinking about leaving and going into a venture using his systems expertise and offering to the industry paste and grid weight computer-based systems. Reed cautioned against it, reminding Slaton of the agreements he had signed.

37. After terminating his employment with GBC, Slaton helped to form and became associated with a new corporation known as CBE Corp. (CBE).

38. CBE offers for sale to GBC competitors computerized paste-weight and grid-casting control systems similar to those Slaton played a key role in devising and developing at GBC.

39. Slaton caused two GBC engineering drawings to be identically duplicated and incorporated in CBE's ad literature and technical materials.

40. Slaton is no longer employed by CBE; he is currently employed elsewhere.

41. One can reasonably expect that Slaton will attempt to profit by using and disclosing the computerized weight-control systems he helped to develop at GBC.

THE LAW

1. ***HN1***[] In order to obtain preliminary injunctive relief, GBC must establish each of the following **[*8]** criteria:

(a) Such relief is necessary to prevent immediate and irreparable harm which cannot be compensated for by damages;

(b) it will operate to restore the parties to the status quo as it existed immediately before the alleged wrongful conduct; and

(c) greater injury will result from denial of the preliminary injunction than from granting it.

[466]** In addition, the court must be satisfied that plaintiffs right is clear and the wrong manifest. *Keystone Guild, Inc. v. Pappas, 399 Pa. 46, 159 A.2d 681 (1960)*; and *Valley Center, Inc. v. Parkhouse, 62 Pa. Commw. 453, 437 A.2d 74 (1981)*.

2. ***HN2***[] A person may be enjoined from disclosing or using another's trade secrets. *Air Products and Chemicals, Inc. v. Johnson, 296 Pa. Super. 405, 442 A.2d 1114 (1982)*, *Restatement of Torts § 757* (1936).

3. Trade secrets may cover a wide spectrum of categories. A definition of the possible objects of trade secrecy is subject to variations and changes depending upon the facts in each case. Pennsylvania has adopted the definition of trade secret set forth in Comment (b) to section 757 of the Restatement of Torts which reads:***HN3***[]

"A trade secret may consist of **[*9]** any formula, pattern, device or compilation of information which is used in one's business, and which gives him an opportunity to obtain an advantage over competitors who do not know or use it…"***HN4***[]

An exact definition of a trade secret is not possible. Some factors to be considered in determining whether given information is one's trade secret are:

(1) The extent to which the information is known outside of his business;

(2) The extent to which it is known by employees and others involved in his business;

(3) The extent of measures taken by him to guard the secrecy of the information;

(4) The value of the information to him and to his competitors;

(5) The amount of effort or money expended by him in developing the information;

(6) The ease or difficulty with which the information could be properly acquired or duplicated by **[**467]** others. *Van Products Company v. General Welding and Fabricating Company, 419 Pa. 248, 213 A.2d 769 (1965)*.

4. ***HN5***[] Novelty or uniqueness are not prerequisites for a product or concept to qualify as a trade secret. *Computer Printing Systems, Inc. v. Lewis, 281 Pa. Super. 240, 422 A.2d 148, 153 n.3 (1980)*. A trade secret can **[*10]** exist in a combination of characteristics and components, each of which, by itself, is in the public domain, but the unified process, design and operation of which, in unique combination, affords a competitive advantage and is a protectible secret. *Anaconda Company v. Metric Tool & Die Company, 485 F. Supp. 410 (E. D., Pa. 1980)*.

5. ***HN6***[] To succeed in an action alleging misappropriation of a trade secret the burden is on plaintiff to show:

(1) That there was a trade secret;

(2) That it was of value to the employer and important in the conduct of his business;

(3) That by reason of discovery or ownership the employer had the right to the use and enjoyment of the secret; and

(4) That the secret was communicated to the employee while he was employed in a position of trust and confidence under such circumstances as to make it inequitable and unjust for him to disclose it to others, or to make use of it himself, to the prejudice of his employer. *McBeth-Evans Glass Co. v. Schnelbach, 239 Pa. 76, 87 Atl. 688 (1913)*.

6. ***HN7***[] Ownership of a trade secret does not give the owner a monopoly in its use, but merely a proprietary right which equity protects against usurpation **[*11]** by unfair means. *Wexler v. Greenberg, 399 Pa. 569, 160 A.2d 430 (1960)*.

7. ***HN8***[] Equity will protect an employer from the disclosure or use of a trade secret by an ex-employee if **[**468]** the employee entered into an enforceable restrictive agreement or was bound to secrecy by virtue of a confidential relationship existing between the employer and employee. *Wexler v. Greenberg, supra.*

8. ***HN9***[] Where a trade secret was not disclosed to the employee during his employment but was developed by him while pursuing his duties with the employer, an express or implied agreement of secrecy must be shown. Otherwise, such information forms a part of the technical knowledge and skill the employee has acquired by virtue of his employment and which he has an unqualified privilege to use. *Wexler v. Greenberg, supra.*

9. ***HN10***[] An implied agreement of secrecy may be inferred from the existence of a confidential relationship between the employer and an employee. *Wexler v. Greenberg, supra*,

10. ***HN11***[] The Pennsylvania courts have not articulated a standard for the duration of injunctions entered in. trade-secret eases. *Anaconda Company v. Metric Tool & Die Company, supra.*

[*12] 11. ***HN12***[] What in reality is protected in cases of this nature is not the product or process, but the secrecy of it, *ILG Industries, Inc. v. Scott, 49 Ill.2488, 273 N.E.2d 393 (1971)*.

12. Other jurisdictions have adopted the "independent development" test. *Anaconda Company v. Metric Tool & Die Company, supra.*

13. ***HN13***[] Under the "independent development" test the appropriate duration for injunction in trade-secret cases is the period of time it would take for one, either by reverse engineering or by independent development, to produce the product by lawful means. *ILG Industries, Inc. v. Scott, supra*; *Schulenburg v. Signatrol, Inc., 33 Ill.2d 379, 212 N.E.2d 865 (1965)*.

[469]** DISCUSSION***HN14***[]

Conflicting social and economic policy considerations arise in each trade-secret case. A business which invests time, money and manpower to develop secret advantages over its competitors must be afforded protection against the wrongful appropriation of secrets by a prior employee who was placed in a position of confidence. On the other hand, where the employer has no protectible trade secret, an individual who worked in a particular field of expertise cannot be compelled to erase **[*13]** from his mind the knowledge and skills learned through his employment. Our economic system is based upon competition and an individual has a fundamental right to follow and pursue the particular occupation for which he is best trained.

With these considerations in mind, we conclude from the foregoing facts and law that the computerized paste-weight and grid-weight control systems developed primarily by Slaton are GEC's trade secrets. Although the components are not unique or novel, the manner in which these computerized-based control systems in their completed state are either proposed or used, is unknown in the lead acid battery industry. GBC has spent considerable money in developing these systems; a substantial saving in its manufacturing process has been realized, giving GBC a competitive edge; the systems are of value to competitors and GBC has taken reasonable precautions to guard them from others.

This case is a bit unusual. Most cases involve misappropriation of pre-existing trade secrets (ones already developed or formulated and disclosed to an employee by his employer). In such cases, equitable relief is predicated upon the trust and confidence which the employer places **[*14]** in the employee by revealing the pre-existing trade secret to him. In other **[**470]** words, it is the confidence placed in the employee by the employer which gives rise to an implied agreement of secrecy. Slaton argues that since he was in large measure the creator of these systems, GBC did not communicate them to him and, therefore, relief is unavailable. We disagree. ***HN15***[] A former employer can restrict his ex-employee's use of secrets he himself developed during his employment by express agreement, and the parties entered into one here. Slaton, as an incident to his employment, in writing agreed not to use or divulge to others secrets -- including those he developed -- after termination of his employment. Slaton's actions since leaving GBC show that he has violated his agreement by appropriating these systems and seeking to profit from them. We are, therefore, satisfied that GBC's right to equitable relief is clear and that Slaton has wrongly appropriated GBC's secrets.

Furthermore, we think GBC is entitled to preliminary injunctive relief. If we are wrong in our conclusion that GBC's right to equitable relief has been established, Slaton is protected by bond and will be entitled **[*15]** to damages. On the other hand, if we don't grant immediate relief, GBC will immediately lose its competitive edge and would realistically be unable to measure and prove damages. By granting preliminary relief the status quo is restored. GEC's secrets are protected and Slaton is not prohibited from working in his field of expertise; in fact, he is currently so employed.

We come then to the final and most perplexing question: should the duration of injunctive relief be limited in trade-secret cases? Pennsylvania has never addressed this question. In a case such as this where the parties did not fix a restrictive time period in their agreement: where the secrets were developed by the ex-employee within one year and where **[**471]** it seems apparent that others will soon be able to produce them, we conclude that injunctive relief should be limited. At this time, of course, we are only to decide whether our preliminary injunction should be dissolved, continued or modified, but it is difficult to justify enjoining Slaton for a period of time longer than that required to produce the systems by lawful means either through reverse engineering or by independent development. And, as a practical **[*16]** matter, a longer period of time might be consumed before this litigation is finally resolved. Although this question was not raised and the present record contains no indication of the time so required, the testimony does reveal that GBC, through Slaton, developed the systems within a period of one year. There is no indication that it would take GBC's competitors more time to develop the same or similar systems. Accordingly, unless or until further evidence is presented on this question, we believe it is only fair to limit the preliminary injunction for a period of one year.

In *ILG Industries, Inc. v. Scott, supra*, the court, in arriving at a similar result, said:***HN16***[]

"In many cases the question of whether a specific matter is a trade secret is an extremely close one, often not readily predictable until a court has announced its ruling. At the same time, the countervailing social and economic policy considerations relative to a person's right to pursue employment in a field in which he has expertise and knowledge cannot totally be cast aside:

"What in reality is protected in cases of this nature is not the product or process but the secrecy of it. (Citation omitted.)…. we believe **[*17]** commercial morality is preserved by preventing one from wrongfully using secret information for a period of time no longer than that required to discover or reproduce **[**472]** that information by lawful means. Where General Battery Corp. v. Slaton that period can be ascertained, the defendant should be put out of business only for that length of time and, thus, be prevented from obtaining any advantage by the wrongful use of trade secrets." *273 N. E.2d at 398*.

Finally, in light of the present record, we feel the scope of the original order must be narrowed.

CONCLUSIONS OF LAW

1. This court has jurisdiction over the parties and the subject matter of this action.

2. The computerized paste-weight and grid-weight control systems involved in this action are GBC's trade secret which equity will protect.

3. Slaton in violation of his express agreement of secrecy has misappropriated said trade secrets.

4. GBC has established the necessary preliminary injunction prerequisites.

5. For the reasons discussed, this court's order of March 16, 1984, is hereby modified in scope and duration as follows:

ORDER

December 12, 1984, the March 16, 1984 preliminary injunction order **[*18]** issued against defendant, Earl J. Slaton, is hereby modified as follows:

Until further order, for a period of one year commencing March 16, 1984, defendant Earl J. Slaton, his employees and/or agents, are preliminary enjoined from:

1. Directly or indirectly using or disclosing General Battery Corporation's computerized paste-weight and grid-weight control systems, including engineering drawings and any and all documents relating thereto.

[473]** 2. Engaging in any employment directly or indirectly relating to equipment, processes and/or techniques for quality control in the lead oxide battery industry or any other such employment in the lead oxide battery industry which would create the risk that Slaton might disclose said trade secrets.

3. Offering service and/or accepting employment on a contract basis, or on any other type of per job basis is directly or indirectly relating to equipment, processes and/or techniques in the lead oxide battery industry, or engaging in any other such activity in the lead oxide battery industry which would directly and/or indirectly create the risk that Slaton might disclose said trade secrets; or offering services to any lead oxide battery manufacturer, **[*19]** which

services would create the risk that Slaton would disclose to such competing battery manufacturer the said trade secrets.

Bond fixed in the amount of $ 500,000 remains.

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN1[] **Entitlement as Matter of Law, Materiality of Facts**

In determining whether the existence of material fact issues precluded the entry of summary judgment in the district court, the appellate court treats the evidence presented to the district court in the light most favorable to the nonmovant plaintiffs.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > Remedies > Damages > Monetary Damages

HN2[] **Clayton Act, Claims**

The prerequisites to a private cause of action under § 4 of the Clayton Act are well established: the plaintiff must show (1) a violation of the antitrust laws, (2) injury to its business or property, and (3) a causal relationship between the antitrust violation and the injury. The last two elements require the valuation of the plaintiff's injury in terms of money damages with some degree of certainty.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Evidence > Burdens of Proof > General Overview

HN3[] **Private Actions, Remedies**

The law does not require an antitrust plaintiff to show that the defendant's wrongful action was the sole proximate cause of the injury sustained. The plaintiff need only prove, with a fair degree of certainty, that defendant's illegal conduct materially contributed to the injury.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Evidence > Burdens of Proof > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN4[] **Private Actions, Remedies**

It is enough that the illegality is shown to be a material cause of the injury; a plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury under § 4 of the Clayton Act.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Civil Procedure > ... > Justiciability > Standing > General Overview

Evidence > Burdens of Proof > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN5[] **Standing, Clayton Act**

Standing to prosecute a private antitrust action under § 4 of the Clayton Act requires the plaintiff to prove that he is within that sector of the economy, which is endangered by a breakdown of competitive conditions in a particular industry. The plaintiff must be the target against which anticompetitive activity is directed. The injury must be of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' act unlawful. Incidental or consequential injury or injury remotely caused by an antitrust violation does not give a plaintiff standing to complain that he has been injured by reason of anything forbidden in the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN6[] **Private Actions, Standing**

Neither an officer nor an employee of a corporation has standing to bring an action in his own right for an antitrust violation causing injury to the corporation and its business. Such persons may suffer indirect or secondary financial injury from antitrust violations, but they are not the target of the anticompetitive practices.

Civil Procedure > Parties > Pro Se Litigants > General Overview

Opinion

[*603] TJOFLAT, Circuit Judge:

This private antitrust dispute concerns the alleged attempt of eight major **[*604]** motion picture distributors to prevent a potential competitor from entering the marketplace. The district court entered summary judgment for the distributors. *100 F.R.D. 14*. This appeal questions that decision and several of the district court's procedural and discovery rulings. We find no error in any of these latter rulings but vacate the summary judgment because certain material fact issues remain to be litigated. [1]

[2]** I.

Buena Vista Distribution Company, Inc., Columbia Pictures Industries, Inc., Metro-Goldwyn Mayer, Inc., Paramount Pictures Corporation, Twentieth Century Fox Film Corporation, United Artists Corporation, Universal Film Exchanges, Inc., and Warner Brothers Distributing Corporation, the eight defendants below, collectively supply eighty-five percent of the high quality motion pictures exhibited at theatres in the United States. They were producing approximately one hundred such motion pictures a year when this controversy arose. All eight belong to the Motion Picture Association of America (MPAA), a trade organization composed of the ten largest film distributors in the country.

National Independent Theatre Exhibitors, Inc. (NITE) is a trade association of independent movie theatre exhibitors who own and operate some five thousand screens in the continental United States. They formed NITE to protect and promote their interests. James Thomas Patterson, Sr., an independent theatre owner-operator, is NITE's president and a member of its board of directors.

---

[*] Honorable Reynaldo G. Garza, U.S. Circuit Judge for the Fifth Circuit, sitting by designation.

[1] **HN1**[] In determining whether the existence of material fact issues precluded the entry of summary judgment in the district court, we treat the evidence presented to the district court in the light most favorable to the nonmovant plaintiffs. *Adickes v. S.H. Kress & Co., 398 U.S. 144, 157, 90 S. Ct. 1598, 1608, 26 L. Ed. 2d 142 (1970)*; *Thrasher v. State Farm Fire & Casualty Co., 734 F.2d 637, 638 (11th Cir.1984)*.

In the early 1970's Independent theatres found themselves in a serious financial crisis. Faced with growing competition **[**3]** from large circuit exhibitors, shrinking attendance, and rising film rentals, they found it difficult to obtain top quality films for exhibition. In 1976, NITE decided that the solution for this problem was to increase the supply of quality films to the independent distributors. A greater variety of movies, NITE assumed, would foster more vigorous price competition by all distributors, resulting in lower film rentals, and would permit the independent theatres to offer movies to their patrons that were not being shown by most of their competitors. In addition, the lower admission prices and greater variety would increase public interest in going to the movies. NITE concluded that the major film producers lacked the economic incentive to cure the supply problem it perceived and that it should enter the production and distribution market. NITE lacked the financial resources to take this step, however.

In an effort to raise the capital that would be necessary to finance the production of high quality films, NITE's board of directors, in April 1977, created a "Film Fund," to which its members could make donations, and gave Patterson the job of soliciting their contributions. He, in **[**4]** turn, devised the following plan. NITE's member theatres would show several minutes of on-screen advertising before each feature film and contribute revenues generated by this advertising to the Film Fund. A board of advisors, chosen by the participating independent theatre owners, would select the movies the Fund would finance. The Film Fund would then contract with independent motion picture companies to produce the movies. The NITE members who participated in this voluntary screen advertising program would receive a discount on the rental of these movies in return for their contributions to the Fund. *Daily Variety*, a leading trade newspaper, reported on the NITE Film Fund in a front-page story on April 26, 1977. The story related strong interest in the program from film producers and exhibitors alike.

[*605] In June 1977, NITE entered into a four-year contract with Cinemavision, Inc., a company engaged in the selling of on-screen theatre advertising, for the sale of advertising space on NITE's members' movie screens. The contract provided that at least fifty percent of the net revenues Cinemavision collected from its advertisers for the participating theatres would **[**5]** be paid directly to the Film Fund. The contract required NITE to use its best efforts to solicit exhibitors to participate in the screen advertising program. NITE anticipated that its Film Fund would generate $42 million from the program over the four-year contract period.

NITE's board of directors decided that the Film Fund should be organized as a separate legal entity and persuaded Patterson to incorporate Screen Advertising Film Fund Corporation (SAFFCO). SAFFCO in turn contracted with NITE and Cinemavision to administer the program. The contract provided that SAFFCO would receive the theatre contributions generated by the on-screen advertising and would retain two percent of these contributions as a profit margin to pay Patterson a salary. Cinemavision eventually enrolled independent exhibitors representing four thousand screens to display advertisements, two thousand of whom agreed to contribute their advertising revenues to SAFFCO.

On September 27-28, 1977, at a NITE regional meeting held in St. Louis, Cinemavision announced that the screen advertising program would be launched in late October with a one thousand theatre test run. A reporter from *Daily Variety* **[**6]** attended the meeting and filed a long story entitled "NITE's Screen Advertising Network Gets 1000-Theatre Test Run Beginning Oct. 24," which appeared on the front page of the September 29 edition. The story stated, in part:

> Following the tryout, additional theatres in other markets will be added until all 4200 screens signed up for the program are unreeling soft-sell commercials, William Woosley of Cinemavision told NITE's national conference of small circuits and independent buyers.
>
> Included in that number, per NITE prexy Tom Patterson, are 2000 screens (not all NITE members) which will be donating proceeds from the ads to the Screen Advertising Film Fund Corp. (SAF[F]CO), the NITE group established to purchase, finance and produce features.
>
> All exhibitors signed by Patterson have agreed to put three minutes of advertising on their screens before showing the feature for four years. Over that period, Patterson estimated, $42,000,000 would be generated for SAF[F]CO from the 2000 subscribing screens.

A second *Daily Variety* reporter in Hollywood, California placed phone calls to the major motion picture distributors to obtain their response to the NITE **[**7]** film advertising program. Senior executives from Universal Pictures, Buena Vista, Twentieth Century Fox, Columbia, and Warner Brothers returned the reporter's calls. All the executives were familiar with the program. They all voiced strong opposition to NITE's program because they feared the advertisements would "clutter the screen" and alienate theatre patrons. The executives' responses were quoted in the September 29, September 30, and October 5, 1977 editions of *Daily Variety*.

The MPAA Advertising-Publicity Committee met on October 27, 1977 and discussed the NITE Film Fund. Richard Kahn, chairman of the committee and vice president of Metro-Goldwyn Mayer, told a *Daily Variety* reporter that the committee unanimously voted to take a stand urging theatres not to exhibit screen ads. A story on the cover of the November 4, 1977 edition of *Daily Variety* reported that

> A new voice -- that of the ad-pub committee of the Motion Picture Association of America -- has been added to the campaign to dissuade theatre owners from participating in the screen advertising program through which the National Independent Theatre Exhibitors Association **[*606]** hopes to generate **[**8]** financing for new feature film product.
> Richard Kahn, ad-pub-exploitation v.p. of MGM, chairman of the MPAA panel, yesterday disclosed a unanimously approved committee stand deploring the "rebirth" of screen advertising, and urging exhibitors "to keep their screens free of nonentertainment oriented clutter."
> Action of the ad-pub committee was endorsed by MPAA president Jack Valenti, and the association's advertising chief, Bethlyn Hand. Both attended the session, along with representatives of Universal, United Artists, Warner Bros. and MGM. Nonmember observers from American International and First Artists concurred.

On October 31, 1977, Twentieth Century Fox issued a statement that it would require all future exhibitors of its films to pay it a percentage of any revenues they might derive from on-screen advertising. The purpose of this statement was to discourage theatre participation in screen advertising programs.

On November 22, 1977, Warner Brothers mailed out bid solicitations for "Superman," one of the most commercially important movies of the year. The bid solicitation stated that theatres exhibiting screen ads would not be considered eligible for licensing **[**9]** the new film. The clear intent was to discourage screen advertising programs.

As a result of the major distributors' coercive activities, numerous theatre exhibitors withdrew from the NITE program; they could not afford to lose their principal sources of supply. At the same time, Cinemavision tried to separate itself from SAFFCO and NITE in order to save its business. These efforts came too late, and in 1978 Cinemavision went out of business.

NITE, Patterson, and SAFFCO, invoking section 4 of the Clayton Act, *15 U.S.C. § 15 (1982)*, brought this private anti-trust action against the eight defendant film distributors we have referred to *supra*, alleging that they had conspired to destroy SAFFCO, in violation of *sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2 (1982)*, because SAFFCO threatened to compete vigorously in their oligopolistic market. The plaintiffs alleged that the statements by the defendants' executives concerning the NITE Film Fund and the subsequent meeting of the MPAA Advertising-Publicity Committee evidenced this conspiracy and that Warner Brothers' and Twentieth Century Fox's threatened boycott of any exhibitor **[**10]** who participated in the on-screen advertising program was in pursuance thereof. The conspirators knew, plaintiffs alleged, that the exhibitors would respond to such threats by refraining from on-screen advertising.

After answering plaintiffs' complaint, the defendants moved for summary judgment on the ground that plaintiffs lacked standing to prosecute their antitrust claims. Following a period of discovery limited to the standing issue, the court granted the defendants' motions as to Patterson and NITE because they were not within the target area of the alleged antitrust violations.

The parties subsequently engaged in extended discovery on the merits of SAFFCO's claims, and the defendants again moved for summary judgment. Before the court could hear argument on their motions, though, SAFFCO's attorneys withdrew from the case. SAFFCO obtained new counsel, but Patterson soon became dissatisfied with his performance and sought to represent SAFFCO himself. The court refused to permit him to do so, however. Patterson then tried another approach; he dissolved SAFFCO and moved the court to substitute him for the company as party plaintiff. The court denied his motion and proceeded **[**11]** to consider the defendants' motions for summary judgment. It concluded that the defendants' actions were not responsible for SAFFCO's alleged injury and consequently granted summary judgment for the defendants.

SAFFCO and Patterson appeal. SAFFCO contends that the court erred in granting the distributors summary judgment because material facts remained unresolved. **[*607]** Patterson contends that the court erred in concluding that he lacked standing to sue under the antitrust laws. Both appellants challenge the trial court's denial of Patterson's motion for substitution as party plaintiff and its disposition of several procedural and discovery matters. We discuss these points in order.

II.

HN2[] The prerequisites to a private cause of action under section 4 of the Clayton Act are well established: the plaintiff must show (1) a violation of the antitrust laws, in this case *sections 1* and *2* of the Sherman Act, (2) injury to its "business or property," and (3) a causal relationship between the antitrust violation and the injury. *Nichols v. Mobile Board of Realtors, Inc., 675 F.2d 671, 675 (5th Cir. Unit B 1982)*; **[**12]** [2] *Jot-Em-Down (JEDS) Store, Inc. v. Cotter & Co., 651 F.2d 245, 247 (5th Cir.1981)*. [3] The last two elements require the valuation of the plaintiff's injury in terms of money damages with some degree of certainty. *Id.*

In the instant case, the distributors moved for summary judgment against SAFFCO on the ground that SAFFCO failed to establish the third element of its antitrust claims, the causal relationship between the distributors' alleged anticompetitive behavior and SAFFCO's injury. The distributors presented a two-part argument. First, the distributors **[**13]** noted that SAFFCO failed to obtain contributions from exhibitor on-screen advertising revenues because Cinemavision collapsed and that Cinemavision collapsed because it could not persuade anyone to advertise on its network of theatre screens. Second, they pointed out that there was no proof that they had ever contacted any of Cinemavision's potential advertisers in an attempt to discourage them from engaging in on-screen advertising. Absent any interference on their part with Cinemavision's sources of income, the distributors concluded, they could not be held responsible for SAFFCO's injury. The district court accepted their argument and gave them summary judgment.

We begin our assessment of the validity of the distributors' argument, and hence the summary judgment, by observing that ***HN3***[] the law does not require an antitrust plaintiff to show that the defendant's wrongful action was the *sole* proximate cause of the injury sustained. The plaintiff need only prove, with a fair degree of certainty, that defendant's illegal conduct *materially contributed* to the injury. *Comfort Trane Air Conditioning v. Trane Co., 592 F.2d 1373, 1383 (5th Cir.1979)*; **[**14]** *Alabama v. Blue Bird Body Co., Inc., 573 F.2d 309, 317 (5th Cir.1978)*; *Terrell v. Household Goods Carriers' Bureau, 494 F.2d 16, 20* (5th Cir.), *cert. dismissed*, *419 U.S. 987, 95 S. Ct. 246, 42 L. Ed. 2d 260 (1974)*. ***HN4***[] "It is enough that the illegality is shown to be a material cause of the injury; a plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury under § 4 [of the Clayton Act]." *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n. 9, 89 S. Ct. 1562, 1571-72 n. 9, 23 L. Ed. 2d 129 (1969)*. The causation argument the distributors advanced in the district court, and repeat, here, ignores this rule of law, for it does not address the question of whether the distributors' threats to boycott or otherwise penalize any exhibitor who engaged in on-screen advertising played a role in the decision of Cinemavision's putative advertisers not to participate in its advertising program.

In determining whether such threats, especially Twentieth **[**15]** Century Fox's and Warner Brothers' communications to exhibitors of October 31 and November 22, **[*608]** 1977, *supra*, played a role in the advertisers' decisions, we must view the evidence in a light most favorable to SAFFCO. In doing so, we conclude

---

[2] In *Stein v. Reynolds Securities, Inc., 667 F.2d 33 (11th Cir.1982)*, this court adopted as binding precedent all decisions of Unit B of the former Fifth Circuit handed down after September 30, 1981.

[3] In *Bonner v. City of Prichard, 661 F.2d 1206, 1209 (11th Cir.1981)* (en banc), this court adopted as binding precedent all decisions of the former Fifth Circuit handed down prior to October 1, 1981.

that a large number of movie theatres, both those who had agreed to contribute to SAFFCO's Film Fund and those who had not, withdrew from the Cinemavision's screen advertising program because of the distributors' coercive conduct and that such withdrawal was a *natural cause* of Cinemavision's failure. These exhibitors could not risk losing their supply of motion pictures and had no choice except to refuse to exhibit on-screen advertising. We think a jury could infer that this significant contraction in the number of screens participating in Cinemavision's advertising program reduced its attractiveness as an advertising medium. A network of five thousand screens was obviously more attractive than one with only two thousand screens to national advertisers who wished to reach the largest audience possible. In sum, the inference that the distributors' conduct may have caused SAFFCO's injury was sufficient to preclude the entry **[**16]** of summary judgment. *Thrasher v. State Farm Fire & Casualty Co., 734 F.2d 637, 638 (11th Cir.1984)*; *Griffis v. Delta Family-Care Disability, 723 F.2d 822, 823-24* (11th Cir.), *cert. denied*, *467 U.S. 1242, 104 S. Ct. 3514, 82 L. Ed. 2d 823 (1984)*.

III.

Patterson challenges the district court's conclusion that he lacked standing to pursue his antitrust claims. His challenge lacks merit. ***HN5***[] Standing to prosecute a private antitrust action under section 4 of the Clayton Act requires the plaintiff to prove that "he is within that sector of the economy which is endangered by a breakdown of competitive conditions in a particular industry." *Jeffrey v. Southwestern Bell, 518 F.2d 1129, 1131 (5th Cir.1975)*. *See* *Construction Aggregate Transport, Inc. v. Florida Rock Industries, Inc., 710 F.2d 752, 762 (11th Cir.1983)*. The plaintiff must be the target against which anticompetitive activity is directed. *Midwestern Waffles, Inc. v. Waffle House, Inc., 734 F.2d 705, 710 (11th Cir.1984)*; *Pan-Islamic Trade Corp. v. Exxon Corp., 632 F.2d 539, 546-47 (5th Cir.1980)*, **[**17]** *cert. denied*, *454 U.S. 927, 102 S. Ct. 427, 70 L. Ed. 2d 236 (1981)*. The injury must be "of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' act unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 697, 50 L. Ed. 2d 701 (1977)*. "Incidental or consequential injury or injury remotely caused by an antitrust violation does not give a plaintiff standing to complain that he has been injured by reason of anything forbidden in the antitrust laws." *Midwestern Waffles, 734 F.2d at 710-11*. *See* *Jeffrey, 518 F.2d at 1131* (citing cases).

The film production and distribution market was the target of the distributors' alleged anticompetitive behavior in this case. Patterson never intended or prepared to enter this market, whether as a sole proprietor or as a member of a partnership or joint venture. Moreover, there was no evidence that any of the distributors' alleged behavior was directed against him individually. He clearly fell outside the target area.

Patterson claimed individual injury in his capacity as an officer and shareholder **[**18]** of SAFFCO, the target of the alleged conspiracy. The law on standing in this situation is clear. ***HN6***[] Neither an officer nor an employee of a corporation has standing to bring an action in his own right for an antitrust violation causing injury to the corporation and its business. *Midwestern Waffles, 734 F.2d at 710-11*; *Pitchford v. Pepi, Inc., 531 F.2d 92, 97-98 (3d Cir. 1975)*, *cert. denied*, *426 U.S. 935, 96 S. Ct. 2649, 49 L. Ed. 2d 387 (1976)*; *Jeffrey , 518 F.2d at 1131*; *Reibert v. Atlantic Richfield Co., 471 F.2d 727, 730-31 (10th Cir.1972)*, *cert. denied*, *411 U.S. 938, 93 S. Ct. 1900, 36 L. Ed. 2d 399 (1973)*. Such persons may suffer "indirect" or "secondary" financial injury from antitrust violations, but they are not the target of the anticompetitive practices. *Jeffrey, 518 F.2d at 1131*. Patterson **[*609]** plainly lacked standing to sue the defendants in this case.

IV.

SAFFCO and Patterson contend that the district court erred in ruling on a variety of motions **[**19]** made during the discovery process. Only two of these claims are worthy of discussion; the remainder are frivolous. A trial judge has broad discretion to control the course of discovery, especially in a complex antitrust case such as this one, and we will not disturb his discovery rulings absent an abuse of discretion. *Commercial Union Insurance Co. v. Westrope, 730 F.2d 729, 731 (11th Cir.1984)*; *Majd-Pour v. Georgiana Community Hospital, Inc., 724 F.2d 901, 903 (11th Cir.1984)*; *Aviation Specialties Inc. v. United Technologies Corp., 568 F.2d 1186, 1189 (5th Cir.1978)*.

A.

On September 10, 1982 SAFFCO's counsel, in Atlanta, received the defendants' notice to take the deposition of a key witness in New York City on September 14, 1982. At the time, counsel for both sides were in the midst of trial in a related case in the district court. Late in the afternoon of the day before the deposition, SAFFCO's attorneys moved the district court for a protective order requiring the defense to reschedule the deposition because they could not be present in New York the next day. Defense counsel had already arrived in New York for the deposition, **[**20]** however. The district court granted SAFFCO's motion on the condition that it pay for one-half of defense counsel's round-trip air fare to New York. *Fed.R.Civ.P. 26(c)* and *37(a)(4)*.

SAFFCO contends that the order was patently unfair because the notice of deposition was not filed within a "reasonable" time, as required by *Fed.R.Civ.P. 30(b)*, and was not scheduled in good faith. This may be so, but SAFFCO's attorneys could have avoided the situation by advising opposing counsel about their problem before counsel departed for New York. We find no abuse of discretion in the court's award of partial expenses in this situation.

B.

SAFFCO's counsel withdrew three years into the suit. Patterson, SAFFCO's only shareholder, thereafter sought to represent the corporation *pro se* pursuant to *28 U.S.C. § 1654 (1982)*. The court correctly refused to allow him to do so.

Section 1654 provides: ***HN7***[] "In all courts of the United States the parties may plead and conduct their own cases personally or by counsel as, by the rules of such courts, respectively, are permitted to manage **[**21]** and conduct causes therein." Patterson failed to recognize that SAFFCO, the corporation, and Patterson, its sole shareholder, were separate legal persons and that *section 1654* precluded him from appearing *pro se* in behalf of another person. Moreover, ***HN8***[] corporations must always be represented by legal counsel. *Southwest Express Co., Inc. v. Interstate Commerce Commission, 670 F.2d 53, 55 (5th Cir.1982)*; *K.M.A., Inc. v. General Motors Acceptance Corporation, 652 F.2d 398, 399 (5th Cir.1981)*.

This rule ensures that a licensed attorney, an officer of the court, is responsible for conducting the corporation's litigation. It protects the court and the public from unscrupulous and irresponsible behavior. In this case, for example, Patterson continually made unwarranted personal attacks on the court and opposing counsel, repeatedly misled the court as to the state of the record, and raised frivolous motions and objections. An attorney would have been deterred from engaging in such behavior because of his obligations to the court and his fear of the sanctions **[**22]** that might otherwise be imposed by the court and the bar.

Patterson sought to circumvent the rule which prevents a nonlawyer from representing a corporation by dissolving SAFFCO. To this end, Patterson dissolved SAFFCO in accordance with Georgia law and moved to substitute himself, doing **[*610]** business as Screen Advertising Film Fund Company, as party plaintiff. As a sole proprietor, he could proceed *pro se* under *section 1654*.

The trial court denied Patterson's motion. In its dispositive order, the court observed that

> this is a complicated antitrust case; that the appropriate handling of this case demands skilled attorneys, who are officers of this Court; that attempts by Mr. Patterson to act pro se have been and will be disruptive of the orderly processing of this litigation (observe the *ad hominem* approach adopted in the motion to substitute order and the motion for sanctions).
> In a courtroom setting should Mr. Patterson be on the witness stand and at the same time attempting to act as his own attorney, the task of the trial judge in preventing the trial from degenerating would be a difficult one.

Patterson takes issue with the court's **[**23]** ruling.

HN9[] Georgia law provides that a cause of action on behalf of a corporation, which is the subject of litigation pending on the date of dissolution, may continue to be prosecuted by the corporation in its corporate name. Ga.Code Ann. 14-2-293 (1982). A dissolved corporation may maintain a federal suit when it has been given that power by state law. *Bauer v. Uniroyal Tire Co., 630 F.2d 1287, 1290 n. 2 (8th Cir.1980)*; *Froning's, Inc. v. Johnston Feed Service, Inc., 568 F.2d 108, 110 (8th Cir.1978)*. When Patterson moved to substitute himself for his dissolved corporation, the question became whether the court could insist that SAFFCO continue to prosecute the case.

Fed.R.Civ.P. 25(c) speaks to this question; it governs the substitution of parties during pending litigation due to a transfer of interest through corporate dissolution. *Froning's, Inc. v. Johnston Feed Service, Inc., 568 F.2d at 110*; *Panther Pumps & Equipment Co. v. Hydrocraft, Inc., 566 F.2d 8, 23 (7th Cir.1977)*, *cert. denied*, *435 U.S. 1013, 98 S. Ct. 1887, 56 L. Ed. 2d 395 (1978)*. **[**24]** The rule states, in pertinent part,

> ***HN10***[] **(c) Transfer of Interest**. In case of any transfer of interest, the action may be continued by or against the original party, unless the court upon motion directs the person to whom the interest is transferred to be substituted in the action or joined with the original party.

HN11[] The decision whether to allow substitution is discretionary. *Collateral Control Corp. v. Deal (In re Covington Grain Co.), 638 F.2d 1357, 1360 (5th Cir. Unit B 1981)*; *Prop-Jets, Inc. v. Chandler, 575 F.2d 1322, 1324 (10th Cir.1978)*; *Fontana v. United Bonding Insurance Co., 468 F.2d 168, 170 (3d Cir.1972)*. In this case, the district court refused substitution because Patterson's participation had been and would continue to be highly disruptive of the orderly administration of the litigation. We find no abuse of discretion.

V.

For the reasons we have stated, the district court's summary judgment in favor of the **[**25]** defendants and against SAFFCO is VACATED, and the case is REMANDED for further proceedings on SAFFCO's antitrust claims against the defendants. In all other respects, the district court is AFFIRMED.

UNITED STATES OF AMERICA, Plaintiff, v. AMERICAN CYANAMID COMPANY, Defendant

Core Terms

melamine, divestiture, consent judgment, termination, Decree, producers, domestic, inventory, laminates, vertical, preferred stock, manufacture, terms, leveraged buyout, purchase order, purchases, chemical, parties, merger, anticompetitive, proceedings

Counsel: **[**1]** Richard Martin and Gregory Hovendon, Department of Justice, Antitrust Division, Washington, District of Columbia, for Plaintiff.

Kenneth Newman, Donovan, Leisure, Newton & Irvine, New York, New York, for Defendant.

Robert Brookhiser, Washington, District of Columbia, for Defendant-Intervenor Melamine Chemicals Co., Inc.

Judges: Brieant, J.

Opinion by: BRIEANT

Opinion

[*1517] MEMORANDUM DECISION

Brieant, J.

By a motion dated October 18, 1984, and heard November 13, 1984 and fully submitted on November 21, 1984, defendant American Cyanamid seeks, for the second time in less than two years, to terminate a Consent Judgment (sometimes hereinafter referred to as the "Decree" or "Consent Decree"), made August 4, 1964, by the late Hon. Richard H. Levet of this Court in the above antitrust action. The United States and intervenor, Melamine Chemicals Co., Inc. ("MCI"), have made submissions in connection with the application. The intervenor opposes the relief requested and also tenders to the Court for resolution issues presented by the unfulfilled 1984 purchase requirements pursuant to the Decree, discussed in greater detail below.

The prior unsuccessful effort of Cyanamid to terminate the **[**2]** Final Consent Judgment in this action, is reported in [*United States v. American Cyanamid Co., 556 F. Supp. 361*](#) (S.D.N.Y.), *aff'd in part, rev'd in part and remanded*, [*719 F.2d 558 (2d Cir. 1983)*](#), *cert. denied*, *465 U.S. 1101, 104 S. Ct. 1596, 80 L. Ed. 2d 127 (1984)*, and familiarity therewith is assumed. Since the prior attempt, Cyanamid has altered the factual predicate by entering into a contract to divest its Formica Division, discussed below, and now seeks to have the Court consider its request *de novo*, based on the current circumstances. The Government, as it did before, has consented to the relief sought here, providing that the Court adopt certain procedural safeguards to assure that the divestiture of the Formica profit center by Cyanamid does take place substantially in compliance with the terms proposed. [1]

[3]** Melamine is a fine white crystalline powder which is used in the manufacture of resins, which in turn are used for high pressure laminates, such as "Formica" a well-known trademarked product, manufactured by a division of Cyanamid, as well as artificial chinaware, plastic parts for the automobile industry, and coatings for textile and paper products. In this Court's prior opinion in the last round of the litigation, dated January 10, 1983, and reported **[*1518]** at *556 F. Supp. 361*, the use of this intermediate plastic product is fully discussed, presented with statistics for industry usage in 1982. These facts found by the Court and essentially not disturbed by the Court of Appeals in its partial reversal and remand, are believed to be sufficiently current at this time and substantially unchanged since 1982.

As this Court observed before, shortly following the entry of the Consent Judgment, there were four domestic producers of melamine, including Cyanamid and Fisher Chemical Co., a predecessor of MCI. Since 1979, there have been only two domestic producers, MCI and Cyanamid. Of the total world production capacity of melamine, as estimated in 1982 by the United States Department **[**4]** of Commerce, only 12% existed in the United States. Melamine is essentially a fungible intermediate chemical. There is no distinctive difference in quality or chemical content according to plant or county of origin. Its production is capital intensive, increased put-through in an operating plant does not increase the fixed costs, and the chemical reaction by which melamine is made proceeds on a continuous flow process, much the same as that of an oil refinery. Urea derived from natural gas is the principal raw material.

It was represented to this Court, without contradiction, that MCI's parent continues to enjoy a favorable, low-cost source of natural gas for its production capacity, while the fix-price contracts of Cyanamid have expired. Because of the nature of the product melamine, it should be expected to sell at a competitive price, having a long term relation to the marginal costs of the least efficient producer.

The complaint in this civil antitrust action was filed October 5, 1960, and alleged violations of *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2*, and *§ 7* of the Clayton Act, *15 U.S.C. § 18*. The complaint alleged that Cyanamid unlawfully allocated and **[**5]** monopolized the foreign and domestic melamine and melamine-contained markets through its leadership of an international cartel of melamine producers, its exclusive control and manipulation of melamine technology and the chemical pre-curser product known as "Dicy," then, but no longer, used to produce melamine, and by its acquisition in 1956 of Formica, Inc., the principal domestic user of melamine crystals for the production of high-pressure laminates. As a result of these alleged violations the Government contended in 1960 that the price of melamine and melamine-contained products was unreasonably high, the available supply of melamine unreasonably low, and actual competition in the melamine and melamine-related industries lessened, also that the potential emergence of new competitors in those industries was effectively foreclosed. The litigation was settled by entry of the Consent Judgment, which, of course, did not admit any violation.

Various proceedings during the years in 1969, 1973 and 1974 resulted in modification of the Decree at the request of Cyanamid and with the consent of the Government. In 1975 the Government initiated criminal contempt proceedings against Cyanamid, **[**6]** alleging that Cyanamid in 1972 had wilfully violated the Consent Judgment's maximum melamine production level. This Court, after a trial, found Cyanamid not guilty of criminal contempt. *See* *United States v. American Cyanamid Co., 427 F. Supp. 859 (S.D.N.Y. 1977)*; *see also* *Stamicarbon N.V. v. American Cyanamid Co., 506 F.2d 532 (2d Cir. 1974)*. In 1983, after a hearing, this Court terminated the Decree

[1] The Government took the position that "once Cyanamid files an affidavit stating that the divestiture of Formica has in fact been completed in accordance with the terms supplied in these proceedings, the Court should enter an Order terminating the Final Judgment" (Memorandum filed November 9, 1984, p. 2). Essentially, the Government also expresses its own independent conclusion in the same memorandum that "Cyanamid is accurate in representing to the Court that divestiture will transform Formica into 'a fully independent company '." *Id*. p. 4.

because of changed circumstances, but that determination was reversed and remanded for further proceedings, as will be described in greater detail below.

The purpose of the Consent Judgment was to dissolve Cyanamid's monopoly of the United States melamine industry and encourage the entrance of new producers into the domestic melamine market. To the extent it is possible to do so, this has already been achieved. MCI has entered the market, and it and Cyanamid are the sole domestic producers.

[*1519] Following the prior proceedings in this Court in 1983, and following modification thereof by the Court of Appeals, the only surviving provision of significance which is still in effect, and imposes legal burdens on Cyanamid in excess of those already existing under the statutes **[**7]** and case law, is found in provision XI of the Judgment. This provision, by its terms, appears to operate in perpetuity, subject only to defeasance after ten years, upon application to the Court as therein contemplated, and subject also to modification by the Court under its inherent powers as defined by the Court of Appeals in *United States v. American Cyanamid Co., 719 F.2d 558 (2d Cir. 1984)* (hereinafter "*Cyanamid I*").

The relevant portions of provision XI are quoted in full at page 365 of 556 F. Supp. In essence, they require Cyanamid to purchase annually from other producers of melamine, with the preference to United States producers, an amount of melamine equivalent to the requirements of its Formica Division. Neither this provision nor anything else in the Consent Judgment prevented Cyanamid from manufacturing and selling in a lawful fashion in the merchant market for melamine in its crystal or powdered form. This market consists of Formica's competitors, as well as other users of melamine for other purposes, and they are and have for some time been purchasing directly from either Cyanamid or MCI. Furthermore, Cyanamid uses melamine in its paper surface coating and textile **[**8]** treating activities, and for other purposes unrelated to its Formica Division.

The Court of Appeals, in *Cyanamid I* held:

> "We therefore reverse the decision of the district court insofar as it holds that 'the conditions which the decree was designed to remedy no longer exist [and] the decree should be terminated, ' and we remand for the district court to apply the factors for analyzing the legality of a vertical merger set forth by *Brown Shoe* [*370 U.S. 294, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)]*, *Fruehauf* [*Corp. v. FTC, 603 F.2d 345 (2d Cir. 1979)]*, and other applicable cases, and to make findings of fact as to the current state of the melamine market and the market for products that contain melamine." *719 F.2d at 567*.

In so holding, the Court of Appeals concluded that:

> "While *Brown Shoe* and its progeny have been the subject of considerable criticism by academicians who believe these cases apply overly harsh standards in assessing the legality of vertical mergers, these cases nonetheless continue to constitute the current state of the law. . . ." [Footnote omitted]; *Id. at 567*.

Following the denial of *certiorari* by **[**9]** the Supreme Court, no proceedings were conducted on remand by Cyanamid. The Court takes this as a concession that while Cyanamid continued to own the Formica Division it would not be able to demonstrate that an analysis of the current facts would show that a vertical merger at this time between itself and Formica would not violate *§ 7* of the Clayton Act when tested by the obsolete factors enumerated in *Brown Shoe* and *Fruehauf, supra*.

Instead, bearing out this Court's prior findings to that effect, rejected by the Court of Appeals, but held by Professor Yale Brozen, Professor (now Judge) Richard A. Posner, Professor Paul A. Samuelson, Judge Robert Bork and other scholars, to the effect that vertical mergers produce no anti-competitive effects, [2] and apparently **[*1520]**

[2] See Professor Brozen's views, quoted at *556 F. Supp. at 369*, from Yale Brozen, *Concentration Mergers and Public Policy* at 402-03 (1982). Richard A. Posner, *Economic Analysis of Law*, at 3 (2d ed. 1977) ("consistent with the economic concept of man as a 'rational maximizer of his self-interest ' an individual will alter the operation of his business in response to economic changes in his surroundings to do so." Paul A. Samuelson, *Economics*, at 44 (10 ed. 1976) ("the method [or raw material] that is

having despaired of convincing the Court of Appeals or the Supreme Court that this particular Emperor (vertical integration as an anti-competitive effect) has no clothes, Cyanamid concluded, with the aid of an investment banking house, to sell its Formica profit center to a management group as part of a leveraged buyout.

[10]** On October 12, 1984 Cyanamid made a public statement, printed in the Wall Street Journal, which advised in relevant part as follows:

> "American Cyanamid Co. said it signed a definitive agreement to sell most of its Formica plastic laminate business for about $200 million in a leveraged buyout. The Formica business will be bought by a new company formed by some Formica managers and Shearson Lehman/American Express Inc. About 10% of the purchase price will be paid in preferred stock of the new company, and the rest will be paid in cash.
> * * * *
>
> The part of the Formica business being sold is expected to have 1984 sales of $275 million to $280 million, a Cyanamid spokesman said. The sale will include all of Formica's operations in the U.S. and abroad except Formica's troubled Latin American business. Last year, sales of Formica products in Latin American [sic] dropped 40%, offsetting a resurgence of Formica business in the U.S. The Cyanamid spokesman said the Latin American sales haven't changed much since then. In a leveraged buyout, a company is taken private in a transaction that is largely financed by borrowing. Ultimately, the debt is paid with funds generated by **[**11]** the target company.
> The planned purchase is subject to the buyers obtaining financing.
> * * * *
> Last May, Cyanamid said it had hired an investment banker to find a buyer for most of the Formica business because of its cyclical nature tied to the building industry.
> The Cyanamid spokesman said the sale is expected to be completed before year-end. If so, the sale is likely to produce a 'nominal gain ' in Cyanamid's fourth-quarter earnings, he said."

The stock market, which is never wrong, reacted to this good news by pricing the common stock of Cyanamid up $1.875 over the price of the prior day, apparently confirming the conclusion of management that vertical integration adds little to corporate efficiency or profitability.

It is insufficient for purposes of this proceeding simply to inform the Court that there has been an agreement to effect a divestiture. The Court must ascertain whether the divestiture is real or merely formal, and whether, following divestiture, the company achieving the leveraged buyout of the Formica assets of Cyanamid ("New Formica") will in fact be a free-standing, independent, economic enterprise, willing and able to purchase its melamine from **[**12]** the most advantageous source at the most competitive price and conditions of sale.

The divestiture agreement, together with exhibits annexed thereto, has been submitted to the Court for perusal as confidential material pursuant to a protective order, and has also been made available to counsel for the intervenor and the Government. There is no need for this Court to recite the details of the agreement, nor will the public interest be served by disclosure of confidential information. Under the agreement, Wayne Group, Inc. agrees to acquire by merger with its subsidiary, WGI Acquisition Corp., all of the capital stock of Formica Corporation presently owned by Cyanamid. Immediately thereafter WGI Acquisition Corp. will merge with Formica Corporation and carry on the Formica business previously conducted by Cyanamid, everywhere, except in Latin America. The Latin American aspect of Cyanamid's efforts have been less than successful and profitable, and so minimal as not to occupy the attention of the Court.

Under the agreement, Cyanamid shall receive $175,100,000 in cash, and preferred **[*1521]** stock of New Formica having a stated value of $20,000,000. The common stock of the new **[**13]** entity will be shared as to ownership by five current members of the Formica management group, who will own one-third thereof and manage the new

---

the cheapest at any one time because of both physical efficiency and cost efficiency, will displace a more costly method [or raw material]. The only way for producers to meet price competition and maximize profits is to keep costs at a minimum by adopting the most efficient methods"). P. Areeda and D. Turner, ***Antitrust Law***, paras. 1000-109 (1980); Robert Bork, *The Antitrust Paradox*, 225-45 (1978).

enterprise, and Shearson Lehman/American Express, Inc., which will provide the venture capital and own the remaining two-thirds. [3]

The preferred stock issue by its relatively standard terms raises an immediate red flag. However, as promised in the course of the hearing, Cyanamid, by written instrument dated November 16, 1984, has agreed with New Formica that notwithstanding provisions which grant the preferred shareholders the right to elect one director of New Formica, whenever six consecutive dividend payments are in arrears, "upon termination of the Melamine Consent Decree and for so long as we or any person, firm or corporation, controlling, controlled **[**14]** by or under common control with us are the record or beneficial owners of the cumulative preferred stock, or any portion thereof, we hereby irrevocably waive our right to elect a director as aforesaid."

Upon assurance that no such voting power may ever arise in favor of Cyanamid, this Court finds and concludes that the ownership of the preferred stock issue is a sufficiently attenuated relationship with New Formica, so that it is unlikely to distort any management decisions on the part of New Formica, particularly the decisions as to how or whether it purchases melamine. The existence of the preferred stock will not require that the consent judgment remain in effect.

Apart from the preferred stock, Cyanamid will have no future financial stake in Formica and no role in its management. Specifically, it receives no security interest in any of Formica's assets, and has no right to reassume control over Formica in the future.

The Court concludes that the net effect of the agreement is such that it represents a complete divestiture, with the same force and effect as if divestiture had been required by the Court in 1956 or thereafter, or even now, as an alternative to the execution or **[**15]** continuation of the Consent Judgment. There is absolutely no evidence that the arrangements between Cyanamid and New Formica are anything but what they appear to be, a typical leveraged buyout, whereby management of a division or profit center takes over its operations in behalf of an independent company owned by themselves and the investment bankers. Ample opportunity has been granted to the parties to develop evidence to the contrary, and none is forthcoming.

The Court finds and concludes that defendant has proved that from and after the effective date of the divestiture, it will be out of the Formica business, except in Central and South America.

Since this Court finds that the divestiture of the Formica business of Cyanamid will be complete upon the closing presently scheduled for December 31, 1984 with Wayne Group, there is now no purpose in engaging in the detailed analysis required by the Court of Appeals in *Cyanamid I*. Divestiture is a substitute for all such analysis. Divestiture of Formica was the greatest possible relief which the Government could have obtained in this lawsuit at any time during its lengthy history. Having voluntarily undertaken to divest itself of **[**16]** the Formica business and having destroyed the presumed anticompetitive vertical merger which supposedly foreclosed the competitors of Cyanamid from a segment of the market otherwise open to them, *i.e*., the sale of melamine to the Formica business, creating thereby a "clog on competition" (quoted from *Brown Shoe*, 370 U.S. at 324), Cyanamid now demonstrates that as of such divestiture the Consent Judgment serves no purpose. Cyanamid is correct in contending that, **[*1522]** even without regard to divestiture, the continued effect of the Judgment has long been "unjustified, anticompetitive and unfair" (Affidavit of Frank V. AtLee, docketed August 18, 1984). The Government, since 1982 has taken the position that the provisions of the Decree affecting MCI have become "anticompetitive under contemporary market conditions." (Government Memorandum filed November 9, 1984, p. 11, fn. 15).

There is no necessity, nor is it appropriate, to defer action until divestiture by Cyanamid of its Formica business is complete. Implicit, although not expressed in the agreement with New Formica, is the concept that as a practical matter the divestiture and sale will not close unless the Consent **[**17]** Judgment is terminated. The only reference thereto in the agreement is as follows:

"9. INDEMNIFICATION AND APPORTIONMENT OF OBLIGATIONS.

---

[3] The cash financing necessary, $175.1 Million Dollars, will come from sources independent of Cyanamid. Each party has separate outside counsel in connection with the divestiture, and separate investment bankers.

> 9.1 *Cyanamid Indemnity*. Cyanamid shall indemnify and hold harmless [New Formica] from and against any and all loss, liability, cost and expense (including any tax payable by reason of the receipt of indemnification payments) arising out of:
> * * * *
>
> (c) Any liability or obligation with respect to the purchase of melamine which may be imposed upon [New Formica] under the Melamine Consent Decree, filed in the U.S. District Court for the Southern District of New York on July 1, 1964 in *U.S. v. American Cyanamid Company*."

The practical significance of this clause is lost on the Court; the preference for domestic melamine found in the Judgment might conceivably lead to some loss, also it might be expensive to persuade the Court that a particular price quote is "oppressively high." (See subparagraph (C) of Provision XI quoted at *556 F. Supp. at 365*). Other than that, this provision seems to be so much useless boilerplate.

The truth of the matter is that the agreement which Wayne Group, Inc. has with Cyanamid, like most similar **[**18]** leveraged buyout transactions, is probably not subject to specific performance, and if it were the agreement of the non-party lender to provide the necessary funds likewise is probably not amenable to such specific enforcement. No reasonably prudent investor would knowingly acquire a manufacturing business which must buy its raw material from one source when its competitors need not, and where the price is fixed by the supplier only subject to obtaining judicial relief if it is found to be "oppressively high," whatever that means. Faced with such an eventuality, there will be no closing because common sense dictates that the lender, and probably also the buyer, will just walk away.

Accordingly, it is appropriate that the issue be resolved in advance of the closing date in the agreement, now set for December 31, 1984. Conditioned on entry of a detailed order which will require that the divestiture be completed substantially in accordance with the agreement submitted to the Court, the Consent Judgment shall be vacated as of such completion.

Melamine Purchases

As of August 4, 1984 all provisions of the Consent Judgment, other than those which this Court has already found obsolete **[**19]** and as to which no issue has ever been raised, expired, except for the purchase requirement. Divestiture frees MCI and all others to sell melamine to New Formica, so that no foreclosure of market is now possible.

It will be recalled that pursuant to terms of the Consent Judgment discussed fully in *Cyanamid I*, a provision, on its face perpetual, requires Cyanamid to purchase *annually* from other producers of melamine, with the preference to United States producers, an amount of melamine equivalent to the requirements of the Formica Division. In our prior termination of this Consent Judgment, which was reversed, this Court recognized that intervenor MCI is now, in practice, the only other producer of melamine in the United States, and now the sole beneficiary of this requirement. The **[*1523]** Court found, assuming termination of the Decree, which this Court then thought appropriate, that:

> "The present nature of the domestic melamine industry mitigates against an abrupt termination of the Consent Decree. . . . . A serious question is presented . . . whether relief from provision XI should not be done on a gradual basis over time in order to do Equity and enable MCI **[**20]** to make the production and marketing adjustments necessary to compensate for its sudden loss of Cyanamid's Formica Division as a so-called 'captive customer '." (*556 F. Supp. at 371*).

This Court concluded, in the last round of this litigation, that there was a fundamental difficulty of impracticality, a prudent consideration of the sort which also regulates a court of equity in the exercise of its judicial powers, and that for reasons therein stated, the Court could find no valid basis to determine the appropriate length of a period of termination.

The Court of Appeals in *Cyanamid I* rejected this conclusion. It held that if the district court on remand should

> "continue to believe that a phase-out would be appropriate, the court should exercise its equitable power to determine an appropriate duration for such a phase-out. . . . Difficulty in rendering judgment may only rarely be sufficient reason for a court of equity to refuse to exercise its equitable powers, and there is not a sufficient reason upon the facts of this case to justify a refusal herein. Indeed, . . . abrupt termination of Part XI without a phase-out is in itself an exercise of equitable power." (*719* ***[**21]*** *F.2d at 567*).

We now consider what should be done with respect to Part XI, based on current facts.

To begin with, this Court agrees with the position of Cyanamid that "no proper purpose can be served by retaining the Purchase Requirement subsequent to the divestiture of Formica, since that divestiture frees MCI completely to sell melamine to Formica and no "foreclosure [of the market] is any longer possible." (Brief of Cyanamid, docketed October 18, 1984, p. 5).

The equities have changed further since it is undisputed that Cyanamid no longer enjoys a favorable long term natural gas purchase contracts from which it was manufacturing melamine, while MCI continues to enjoy such an advantage.

In light of the complete divestiture, and because MCI has had notice at least since October of the intention by Cyanamid to divest itself of its Formica Division, the Court sees no purpose in imposing any greater or more gradual phase-out. The situation is materially altered from that presented in *Cyanamid I*; after *Cyanamid I*, Cyanamid remained in the laminate business. After divestiture, there is no longer any vertical combination and therefore no "foreclosure" of the market, and **[**22]** MCI will be at least on equal terms with Cyanamid in providing melamine to New Formica. Indeed, this Court believes that MCI will be in a better position than Cyanamid or anyone else because of its continuing favorable natural gas supply contracts. [4]

The Consent Judgment, neither by its terms, nor as administered by the parties had fixed the date as of which purchase orders had to be issued for annual requirements. It merely required Cyanamid to buy an amount equal to the annual needs of its Formica Division by giving a purchase order at some time during or immediately after the close of the year in which the requirements applied. There was no requirement that the melamine so purchased actually be used to make laminates; it could be and was commingled with Cyanamid's own product and used for whatever defendant **[**23]** wanted. It is uncontradicted that as of September 1, 1984 Cyanamid's **[*1524]** inventory was more than twice the normal inventory, and that monthly carrying charges for this inventory were approximately $67,000.

Beginning in mid-1982, when Cyanamid initiated the first round of this litigation to terminate the Consent Judgment, it purchased no melamine from MCI or any outside source, until the end of the year, when it placed an order with MCI for an amount equal to the balance of 1982 melamine requirements for the Formica Division. Due to the size of that order, production and delivery did not take place, apparently by mutual agreement, until some time later in 1983. In 1983 while *Cyanamid I* was pending appeal or awaiting action on a petition for *certiorari*, Cyanamid purchased no melamine from MCI. In 1984 it purchased and took delivery of the 1983 purchase obligations. This had an adverse effect on MCI, causing it to reduce its capacity and shut its plant down for longer than normal periods in 1983, and also to lose the use of funds which would have been received had the sales been made in 1983. However, it is apparently not disputed that Cyanamid was within its rights **[**24]** under the literal provisions of the Consent Judgment to withhold issuing a purchase order for the balance of its 1983 requirements until 1984.

In April 1984, according to the undisputed affidavit of Scotty B. Patrick, Vice President and General Manager of MCI, Cyanamid declined to make a commitment for 1984 purchases, or to schedule the issuance of purchase orders. However, at no time until about October, 1984, did Cyanamid advise that it would not purchase its 1984 requirements under the Decree. On October 12, 1984 Cyanamid told MCI formally, what was already a matter of

---

[4] Since 1982 the Government has taken a position that a phase-out period for the purchase requirement is "not warranted or appropriate." (Government Memorandum filed November 9, 1984 at p. 11, fn. 15).

public knowledge, that it had agreed to sell its Formica Division and planned to seek relief from the Court. Cyanamid then declined to purchase any melamine from MCI for 1984.

It would seem relatively obvious that the Consent Judgment, which partakes of contractual elements, should not be vacated retrospectively. The Government takes the position that the Consent Judgment, by its terms, obligates Cyanamid to purchase a *pro rata* share of melamine from outside domestic sources (MCI), for the Formica operations for the period of time during any calendar year that the Judgment has been in effect, and this Court **[**25]** agrees. It is the law of the case, pursuant to *Cyanamid I*, that the Consent Judgment *cannot* be vacated until the criteria set forth by the Court of Appeals in *Cyanamid I* have been satisfied. Since they apparently cannot be satisfied without divestiture, Cyanamid has opted for divestiture. [5] Only effective on divestiture will Cyanamid's obligations cease.

This Court concludes that as a condition of the relief requested herein, and indeed, in all events, Cyanamid and/or New Formica must issue a purchase order to MCI immediately prior to the divestiture for an amount of melamine equal **[**26]** to the amount of melamine used by the Formica Division of Cyanamid during the calendar year 1984 in production of its laminates, and also for that amount of melamine, if any, used by the Formica Division of Cyanamid during any part of 1985 prior to actual closing and performance of the divestiture agreement. If the purchase order is issued by New Formica, Cyanamid must guaranty payment therefor. The delivery schedule for the purchase of the 1984 requirements shall provide for dates acceptable to both parties, provided that all melamine required to be purchased thereunder shall be taken prior to July 31, 1985, unless MCI shall consent to a later date.

The mechanics of divestiture may not be permitted to frustrate MCI expectations that it will continue to benefit from the Judgment with respect to all of the **[*1525]** requirements of Cyanamid for melamine used by the Formica Division through the date of closing of the divestiture agreement. Accordingly, the opening inventory of melamine of New Formica and the amount, if any, ordered by but not delivered to New Formica from MCI at closing may not exceed the amount of melamine which Cyanamid was required by the Judgment to purchase **[**27]** from outside sources since January 1, 1982 through the day of divestiture, less the amount of melamine actually used by Cyanamid since January 1, 1982 through the date of divestiture, in the manufacture of laminates by its Formica Division. Essentially, the Court observes that equity deems done that which should have been done, and either New Formica or Cyanamid should perform the Judgment fully through the date of its termination. New Formica's inventory of melamine owned or on order should not exceed the amount of melamine inventory which it would have possessed, if, since 1982, all of the division purchases had been made from non-Cyanamid sources and all such purchases had been used in or held for the manufacture of laminates. Following divestiture Cyanamid may not sell any melamine to New Formica from its inventory which existed on the day of divestiture, at less than cost, applying FIFO principles of accounting and lot identification. If the computation necessary to achieve this result, presents practical difficulty, counsel for the parties may take the matter up with the Court on the settlement of the order terminating the Consent Judgment.

We note in closing that the national **[**28]** economy is not served by MCI actually making a large quantity of useless melamine, which Cyanamid or New Formica will have to purchase, inventory and carry at great expense until it can be used, simply to satisfy a Consent Judgment. [6] Nothing prevents the parties from negotiating a release of the unperformed purchase obligation, whereby MCI would receive its lost profits in lieu thereof. The Court, however, is not in a position to compel such rational conduct, unless the parties wish to do so.

The foregoing constitutes the findings of fact and conclusions of law of this Court after a hearing.

---

[5] We do not suggest that this is the sole motive for selling the Formica Division; there are obviously economic benefits flowing from the divestiture apart from the elimination of the purchase obligations of the Judgment. Whatever the Judgment provides, it does not require Cyanamid to remain in the laminate business forever; probably any such provision would be unconstitutional, if not void for vagueness or impossibility.

[6] Cyanamid's hardship is largely self-created since it was foreseeable that the Court of Appeals might reverse in *Cyanamid I*, as it did, and that *certiorari* might be denied by the Supreme Court, as it was.

Submit a final order on five (5) days notice of settlement or waiver of notice, which will dispose of the issues presently tendered to the Court consistently with these findings and conclusions.

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > General Overview

Constitutional Law > Substantive Due Process > General Overview

Constitutional Law > Substantive Due Process > Scope

HN3[] Fundamental Rights, Procedural Due Process

W. Va. Const. art. III, §10 provides: "No person shall be deprived of life, liberty, or property, without due process of law, and the judgment of his peers".

Governments > Legislation > Enactment

HN4[] Legislation, Enactment

The power of the Legislature to enact laws relating to the public welfare is "almost plenary" under W.Va.Const. art. 6, § 1, and its powers are limited only by express restriction or restrictions necessarily implied by a provision or provisions of the state's Constitution.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN5[] Regulated Practices, Trade Practices & Unfair Competition

See W. Va. Code § 47-11A-6(a).

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN6[] Regulated Practices, Trade Practices & Unfair Competition

See W. Va. Code §47-11A-8.

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > General Overview

Governments > Legislation > Overbreadth

Governments > Legislation > Vagueness

HN7[] Fundamental Rights, Procedural Due Process

There is no satisfactory formula to decide if a statute is so vague as to violate the due process clauses of the State and Federal Constitutions. The basic requirements are that such a statute must be couched in such language so as to notify a potential offender of a criminal provision as to what he should avoid doing in order to ascertain if he has violated the offense provided and it may be couched in general language.

Governments > Legislation > Overbreadth

Governments > Legislation > Vagueness

HN8[] **Legislation, Overbreadth**

The degree of vagueness that the United States Constitution tolerates--as well as the relative importance of fair notice and fair enforcement--depends in part on the nature of the enactment. Thus, economic regulation is subject to a less strict vagueness test because its subject matter is often more narrow, and because businesses, which face economic demands to plan behavior carefully, can be expected to consult relevant legislation in advance of action. Indeed, the regulated enterprise may have the ability to clarify the meaning of the regulation by its own inquiry, or by resort to an administrative process. The Court has also expressed greater tolerance of enactments with civil rather than criminal penalties because the consequences of imprecision are qualitatively less severe.

Governments > Legislation > Enactment

Governments > Legislation > Types of Statutes > Special Legislative Acts

HN9[] **Legislation, Enactment**

W. Va. Const. art.VI, § 39, states, in part: "And in no case shall a special act be passed, where a general law would be proper, and can be made applicable to the case, nor in any other case in which the courts have jurisdiction, and are competent to give the relief asked for".

Constitutional Law > Equal Protection > Nature & Scope of Protection

Governments > Legislation > Effect & Operation > General Overview

Constitutional Law > Equal Protection > General Overview

HN10[] **Equal Protection, Nature & Scope of Protection**

The constitutional requirement that a law be general does not imply that it must be uniform in its operation and effect in the full sense of its terms. If a law operates alike on all persons and property similarly situated, it is not subject to the objection of special legislation or class legislation and does not violate the *Equal Protection Clause of the Fourteenth Amendment to the Constitution of the United States*, *U.S. Const. amend. XIV*.

Constitutional Law > Equal Protection > General Overview

HN11[] **Constitutional Law, Equal Protection**

Where economic rights are concerned, the court looks to see whether a classification is a rational one based on social, economic, historic or geographic factors, whether it bears a reasonable relationship to a proper governmental purpose, and whether all persons within the class are treated equally. Where such classification is rational and bears the requisite reasonable relationship, the statute does not violate *W. Va. Const. art. VI, §39*.

Antitrust & Trade Law > Sherman Act > General Overview

See 15 U.S.C.S.§ 1.

Syllabus

1. Syllabus Point 2 of State v. Wender, 149 W. Va. 413, 141 S.E.2d 359 (1965), which suggests that our former Cigarette Sales Act, W. Va. Code, 47-13-1 through -15, as well as other sales-below-cost statutes, was a price-fixing statute is disapproved. Furthermore, the language in the text of Wender which indicates that because a commodity is not "affected with the public interest," the legislature may not constitutionally regulate that commodity in this State is also disapproved.

2. The Unfair Practices Act, W. Va. Code, 47-11A-1 through -14, is a rational means of achieving the legitimate legislative goal of promoting healthy competition in this State by penalizing retailers and wholesalers that sell goods below cost in an attempt to destroy competition and does not violate substantive due process concepts of Article III, Section 10 of the West Virginia Constitution.

3. It is appropriate under the Due Process Clause vagueness doctrine to apply a less restrictive test to statutes or ordinances involving economic matters **[***2]** in which criminal penalties are not at issue.

4. "Where economic rights are concerned, we look to see whether the classification is a rational one based on social, economic, historic or geographic factors, whether it bears a reasonable relationship to a proper governmental purpose, and whether all persons within the class are treated equally. Where such classification is rational and bears the requisite reasonable relationship, the statute does not violate Section 39 of Article VI of the West Virginia Constitution." Syllabus Point 7, Atchinson v. Erwin, 172 W. Va. 8, 302 S.E.2d 78 (1983).

5. W. Va. Code, 47-11A-1 through -14, does not violate the antitrust provisions of the Sherman Act, 15 U.S.C. § 1, since both acts prohibit sales below cost for the purpose of injuring or destroying competition.

Counsel: Jones, Williams, West & Jones and Jerald E. Jones, Clarksburg, West Virginia for Plaintiffs.

Phillips, Gardill, Hazlett & Kaiser and Charles J. Kaiser, Jr., Wheeling, West Virginia for Defendants.

Amicus Curiae: Chauncey H. Browning, Attorney General: Donald L. Darling, and Walt Auvil, Assistant Attorneys General.

Judges: Miller, Justice.

Opinion by: MILLER

Opinion

[*540] [146] [***3]** Four certified questions have been presented, pursuant to W. Va. Code, 58-5-2, relating to the constitutionality of our Unfair Practices Act, W. Va. Code, 47-11A-1 through -14. This case arises from a complaint filed in the Circuit Court of Harrison County by the Hartsock-Flesher Candy Company and others against the Wheeling Wholesale Grocery Company. [1] All of the parties involved are competing wholesalers in northern West Virginia. In its complaint, Hartsock-Flesher alleged that Wheeling Wholesale was selling cigarettes below

[1] The other parties who joined with the Hartsock-Flesher Candy Company were the Chas. M. Sledd Company, the Weirton Wholesale Distributing Company, and the Shulick-Taylor Company. For convenience, we will refer to the appellees as Hartsock-Flesher and the appellant as Wheeling Wholesale.

cost, in violation of *W. Va. Code, 47-11A-2*, and requested an injunction and treble damages, pursuant to *W. Va. Code, 47-11A-9*.

Wheeling Wholesale moved to dismiss the complaint, claiming that the Unfair **[***4]** Practices Act was unconstitutional, but this motion was denied by the trial judge. Subsequently, the following four certified questions were presented to the Circuit Court of Harrison County:

> (1) Is the Unfair Practices Act unconstitutional under the substantive due process standard established in *Article III, Section 10 of the West Virginia Constitution*? (2) Is the Unfair Practices Act unconstitutionally vague under *Article III, Section 10 of the West Virginia Constitution* and the *Fourteenth Amendment to the United States Constitution*? (3) Is the Unfair Practices Act special legislation in violation of *Article VI, Section 39 of the West Virginia Constitution*? (4) Is the Unfair Practices Act violative of the Sherman Act (*15 U.S.C. § 1*)?

The trial judge answered all four questions in the negative, from which ruling Wheeling Wholesale now appeals.

The Unfair Practices Act was adopted in 1939. The legislature's main reason for adopting the Unfair Practices Act is summarized **[**147]** in ***HN1***[] *W. Va. Code, 47-11A-1*, which reads, in part: "The sale of goods at less than the cost thereof results in economic maladjustments and tends toward the creation of monopolies, thereby **[***5]** destroying fair and healthy competition and tending toward bankruptcy among merchants who maintain a fair price policy, and is, therefore, an unfair trade practice." *W. Va.* ***[*541]*** *Code, 47-11A-2*, states that it is unlawful for a retailer or wholesaler to sell any product below the cost to the vendor "for the purposes of unfairly diverting trade from or otherwise injuring one or more competitors, and destroying competition." [2] Violations of the Act are punishable through civil and criminal sanctions. *W. Va. Code, 47-11A-9* and -11. Since the action brought against Wheeling Wholesale is civil in nature, we will not address the criminal provisions in the Act.

[*6]** Sales-below-cost statutes have been enacted in a majority of states. [3] **[***7]** Some of these statutes prohibit the sale of all goods and services below cost while others are limited to specific products, such as cigarettes or milk. See 1A R. Callman, The Law of Unfair Competition Trademarks and Monopolies § 7.02 (4th ed. 1981) for a discussion and compilation of these statutes. [4] Most jurisdictions have upheld sales-below-cost statutes as valid constitutional exercises of a state's police power. [5] *See generally* 1A R. Callman, *supra,* §§ 7.07 through .23;

---

[2] ***HN2***[] The material portion of *W. Va. Code, 47-11A-2*, is:

> "It shall be unlawful for any person, partnership, firm, corporation, joint-stock company, or other association engaged in business as a retailer or wholesaler within this State, to sell, offer for sale or advertise for sale any article, product or item of merchandise at less than the cost thereof to the vendor, or give, offer to give or advertise the intent to give away any article, product or item of merchandise for the purposes of unfairly diverting trade from or otherwise injuring one or more competitors, and destroying competition."

[3] On the federal level, the Robinson-Patman Act, *15 U.S.C. § 13a*, is somewhat similar to these sales-below-cost statutes, although the comparison is not entirely accurate. The Robinson-Patman Act states that it is unlawful for "any person engaged in commerce" to "sell, or contract to sell, goods at unreasonably low prices for the purpose of destroying competition or eliminating a competitor." *See* Section IV, *infra.*

[4] Legal commentators have analyzed sales-below-cost statutes in a number of articles. *See, e.g.,* Clark, *Statutory Restrictions on Selling Below Cost,* 11 Vand. L. Rev. 105 (1957); Henderson, *Selling Below Cost in Wyoming,* 1 Land & Water L. Rev. 235 (1966); LaRue, *Pitfalls for Price Competitors: State and Federal Restrictions on Below Cost or Unreasonably Low Prices,* 15 W. Res. L. Rev. 35 (1963); McCarthy, *Whatever Happened to the Small Businessman?* The California Unfair Practices Act, 2 U.S.F.L. Rev. 165 (1968); Reiley, *Enforcement of Legislation Prohibiting Sales Below Cost in Washington,* 42 Wash. L. Rev. 817 (1967); Note, *Further Developments in the Field of Statutory Bans Against Selling Below Cost,* 34 Va. L. Rev. 201 (1948); Comment, *Sales Below Cost Prohibitions: Private Price Fixing Under State Law,* 57 Yale L.J. 391 (1948).

[5] *See, e.g., Carroll v. Schwartz, 127 Conn. 126, 14 A.2d 754 (1940)*; *Moore v. Northern Kentucky Independent Food Dealers Ass'n, 286 Ky. 24, 149 S.W.2d 755 (1941)*; *Rust v. Griggs, 172 Tenn. 565, 113 S.W.2d 733 (1938)*; *McElhone v. Geror, 207 Minn. 580, 292 N.W. 414 (1940)*; *Associated Merchants of Montana v. Ormesher, 107 Mont. 530, 86 P.2d 1031 (1939)*; *State v. Langley, 53 Wyo. 332, 84 P.2d 767 (1938)*; *Dikeou v. Food Distributors Ass'n, 107 Colo. 38, 108 P.2d 529 (1940)*; *State v.*

Annot., 128 A.L.R. 1126 (1940); Annot., 118 A.L.R. 506 (1939). With this brief background discussion, we now turn to the specific issues raised in this case.

[*8]** I.

SUBSTANTIVE DUE PROCESS

Wheeling Wholesale contends that our Unfair Practices Act should be declared unconstitutional as violative of substantive due process under *Article III, Section 10 of the West Virginia Constitution*, which provides: "No ***HN3***[] person shall be deprived of life, liberty, or property, without due process of law, and the judgment of his peers." We have recognized in several cases that this provision does include a substantive due **[**148]** process standard. Although this constitutional provision was not mentioned in Syllabus Point 1 of *State v. Wender, 149 W. Va. 413, 141 S.E.2d 359 (1965)*, it was mentioned in the text and its principles summarized in Syllabus Point 1:

> "The legislature is vested with a wide discretion in determining what the public interest requires, the wisdom of which may not be inquired into by the courts; however, to satisfy the requirements of due process of law, legislative acts must **[*542]** bear a reasonable relationship to a proper legislative purpose and be neither arbitrary nor discriminatory."

See also *DeCoals, Inc. v. Board of Zoning Appeals of City of Westover, 168 W.Va. 339, 284 S.E.2d 856 (1981)*; *Thorne* ***[***9]*** *v. Roush, 164 W.Va. 165, 261 S.E.2d 72 (1979)*; *O'Neil v. City of Parkersburg, 160 W. Va. 694, 237 S.E.2d 504 (1977)*; *State ex rel. Harris v. Calendine, 160 W. Va. 172, 233 S.E.2d 318 (1977)*.

In *Wender,* our Cigarette Sales Act, *W. Va. Code, 47-13-1* through -15, [6] was challenged on the ground that it was unconstitutional. In examining cases from other jurisdictions, we noted that similar sales-below-cost statutes had generally been upheld and after listing several of these cases, stated:

> "The general principle derived from these cases is that the prohibition of sales below cost lies within the police power of the state and the legislature is vested with a wide discretion in determining whatever economic policy may be deemed to promote the public welfare, which policy the courts are powerless to override provided the laws passed bear a reasonable relationship to the legislative purpose and are neither arbitrary nor discriminatory." *149 W. Va. at 417, 141 S.E.2d at 362*.

[*10]** Despite this broad statement of deference to legislative judgment, we concluded that since the cigarette industry is not one affected with the public interest, it was a violation of due process under our State Constitution for the legislature to attempt to regulate the sale of cigarettes. Wheeling Wholesale argues that the reasoning used in *Wender* to invalidate the Cigarette Sales Act should be applied to the Unfair Practices Act. We are unable to agree.

Our holding in *Wender* is comparable to our decision in *State v. Memorial Gardens Development Corp., 143 W. Va. 182, 101 S.E.2d 425, 68 A.L.R.2d 1233 (1957)*, in which we held that the legislature lacked the authority to regulate the funeral industry. However, *Memorial Gardens* was reversed in *Whitener v. W. Va. Board of Embalmers, 169 W.Va. 513, 288 S.E.2d 543 (1982)*, where we held that the regulation of the funeral industry is within the legitimate scope of the State's police power. Syllabus Point 2 of *Whitener* states, in part: "Regulations about how businesses are conducted must simply bear a rational relationship to a legitimate state goal, to be constitutional." We also observed in Syllabus Point 3 of **[***11]** *Whitener,* quoted in part, that "it is the function of legislatures to determine the wisdom and utility of economic legislation."

Walgreen Drug Co., 57 Ariz. 308, 113 P.2d 650 (1941); *Wholesale Tobacco Dealers Bureau of Southern California v. National Candy & Tobacco Co., 11 Cal.2d 634, 82 P.2d 3, 118 A.L.R. 486 (1938)*; *State v. Sears, 4 Wash.2d 200, 103 P.2d 337 (1940)*.

[6] The Cigarette Sales Act was repealed in 1967. 1967 W. Va. Acts ch. 167.

The point that needs to be emphasized is that the authority of our legislature to regulate economic matters in this State is quite broad, as we stated in *Thorne v. Roush, 164 W.Va. 165, 261 S.E.2d 72, 74 (1979)*:

> ***HN4***[] The power of the Legislature to enact laws relating to the public welfare is 'almost plenary' under *W.Va.Const. art. 6, § 1*, and . . . . its powers are limited only by express restriction or restrictions necessarily implied by a provision or provisions of our Constitution. *Robertson v. Hatcher, 148 W. Va. 239, 135 S.E.2d 675 (1964)*; *State ex rel. County Court of Marion County v. Demus, 148 W. Va. 398, 135 S.E.2d 352 (1964)*."

Both *Wender* and *Memorial Gardens* are indicative of a time when substantive due process was used by courts to invalidate various laws regulating economic matters. Perhaps the most famous judicial intrusion was by the United States Supreme Court when it struck down New **[**149]** York's statutory limitation on the maximum number of hours that bakers could work in a week. *Lochner v. New* ***[***12]*** *York, 198 U.S. 45, 49 L. Ed. 937, 25 S. Ct. 539 (1905)*. Since the intrusive approach exemplified by *Lochner* has subsequently been abandoned, courts rarely overturn legislation regarding economic matters on the ground that substantive due process has somehow been violated. The United States Supreme Court in *Ferguson v. Skrupa, 372 U.S. 726, 730, 10 L. Ed. 2d 93, 97, 83 S. Ct. 1028, 1031, 95 A.L.R.2d 1347, 1352 (1963)*, observed:

> **[*543]** "The doctrine that prevailed in *Lochner* . . . . and like cases--that due process authorizes courts to hold laws unconstitutional when they believe the legislature has acted unwisely--has long since been discarded. We have returned to the original constitutional proposition that courts do not substitute their social and economic beliefs for the judgment of legislative bodies, who are elected to pass laws."

See also, e.g., Rice v. Norman Williams Co., 458 U.S. 654, 73 L. Ed. 2d 1042, 102 S. Ct. 3294 (1983); *Usery v. Turner Elkhorn Mining Co., 428 U.S. 1, 49 L. Ed. 2d 752, 96 S. Ct. 2882 (1976)*; *Weinberger v. Salfi, 422 U.S. 749, 45 L. Ed. 2d 522, 95 S. Ct. 2457 (1975)*; *Richardson v. Belcher, 404 U.S. 78, 30* ***[***13]*** *L. Ed. 2d 231, 92 S. Ct. 254 (1971)*; *Dandridge v. Williams, 397 U.S. 471, 25 L. Ed. 2d 491, 90 S. Ct. 1153 (1970)*; *Washington Star Co. v. International Typographical Union Negotiated Pension Plan, 235 U.S. App. D.C. 1, 729 F.2d 1502 (D.C. Cir. 1984)*; *DiPippa v. United States, 687 F.2d 14 (3d Cir. 1982)*; *Leikind v. Schweiker, 671 F.2d 823 (4th Cir. 1982)*; *Tobacco Accessories v. Treen, 681 F.2d 378 (5th Cir. 1982)*; *Matter of Gifford, 688 F.2d 447 (7th Cir. 1982)*; *First American Title Co. v. South Dakota Land Title Ass'n, 714 F.2d 1439 (8th Cir. 1983)*, *cert. denied, 464 U.S. 1042, 79 L. Ed. 2d 173, 104 S. Ct. 709 (1984)*.

The Court in *Wender* failed to fully appreciate the fact that as a general rule, in matters of economic legislation, the legislature must be accorded deference, particularly under a substantive due process standard. We are not suggesting that economic legislation may never be found to violate substantive due process. There may be occasions when the use of substantive due process to invalidate legislation on some economic matters may be appropriate, such as where the challenged legislation bears no rational relationship to the public **[***14]** health, safety, morals, and general welfare of this State or where the statute impinges on some fundamental or constitutional right. For example, in *Thorne,* we held that a junior barber apprenticeship, mandated by *W. Va. Code, 30-27-3*, violated substantive due process because the method chosen to achieve the purpose did not promote the public welfare and intruded on the fundamental right to pursue a livelihood. In *Moore v. City of East Cleveland, 431 U.S. 494, 52 L. Ed. 2d 531, 97 S. Ct. 1932 (1977)*, the United States Supreme Court struck down a zoning ordinance on substantive due process grounds because it adversely affected the sanctity of the family and only marginally advanced the government's interest in protecting the general welfare. Neither the facts in *Wender* nor in the present case rise to this level of a substantive due process violation.

While we approve of the language in Syllabus Point 1 of *Wender* as a correct general statement of substantive due process concepts, we disapprove of the overly intrusive manner in which these principles were applied.

Specifically, Syllabus Point 2 of *Wender,* [7] which suggests that our former Cigarette Sales Act, **[***15]** as well as other sales-below-cost statutes, was a price-fixing statute is disapproved. Furthermore, the language in the text of *Wender* which indicates that because a commodity is not "affected with the public interest," the legislature may not constitutionally **[**150]** regulate that commodity in this State is also disapproved. Our disapproval is based on two grounds. First, the Cigarette Sales Act was not a price-fixing statute. *See* Part IV, *infra.* Second, a product or commodity does not have to be "affected with a public interest" before the legislature may constitutionally regulate the product or commodity and survive a substantive due process analysis. We, therefore, conclude that the present case is not controlled by our decision in *Wender,* which incorrectly applied the substantive due process principles stated therein.

[*16]** Wheeling Wholesale next argues that *W. Va. Code, 47-11A-6*, our cost definition statute, which provides for stated markups for the cost of doing business "in the absence **[*544]** of proof of a lesser cost" and includes the phrase "there shall be deducted [from the invoice cost of an article] all trade discounts, except customary discounts for cash," [8] is arbitrary and irrational, in violation of substantive due process.

[*17]** Similar arguments were raised and rejected in *Baseline Liquors v. Circle K Corp., 129 Ariz. 215, 630 P.2d 38* (App.), *cert. denied sub nom. Skaggs Drug Centers, Inc. v. Baseline Liquors, 454 U.S. 969, 70 L. Ed. 2d 387, 102 S. Ct. 515 (1981)*. In *Baseline,* a challenge was made to the Arizona Unfair Sales Act, which has a 12 percent markup provision and an accompanying right to demonstrate a lesser cost of doing business. The appellees in *Baseline* argued that a retailer would be unable to establish a lesser cost of doing business, therefore, the statute requiring a 12 percent markup to cover the cost of doing business was arbitrary. The Arizona Court of Appeals concluded, after citing *Trade Commission v. Skaggs Drug Centers, Inc., 21 Utah 2d 431, 446 P.2d 958 (1968)*, and *Flank Oil Co. v. Tennessee Gas Transmission Co., 141 Colo. 554, 349 P.2d 1005 (1960)*, that there was no merit to the appellees' argument. In reaching this conclusion, the Arizona Court of Appeals cited this passage from *Trade Commission, 21 Utah 2d at 439-40, 446 P.2d at 963-64*, where this observation was made relative to the lesser cost issue:

> "All the [Utah Unfair Practices Act] **[***18]** requires is a cost figure arrived at by reasonable accounting methods. A statute is not to be declared invalid because of difficulty in applying its provisions. We think the Act is sufficiently clear to require compliance. The constitutionality of a statute is not to be decided on questions of inconvenience, or difficulty in application of a cost standard." (Footnotes omitted).

The Arizona Court of Appeals in *Baseline* reversed the lower court, which had declared the Arizona Unfair Sales Act unconstitutional on a motion to dismiss. The appellate court mentioned that it was handicapped without an evidentiary record, which is the situation in our case. The lack of an evidentiary record is particularly crucial to

---

[7] Syllabus Point 2 of *Wender* states: "Legislation authorizing price-fixing must, among other requirements, concern an item or commodity affected with a public interest to avoid contravening the due process clause of the Constitution of this State."

[8] ***HN5***[] *W. Va. Code, 47-11A-6(a)*, defines "cost" for a retailer as follows:

> "The term 'cost' when applicable to the business of retailer shall mean bona fide cost and shall mean (i) the invoice cost of the article, product or item of merchandise to the retailer or the replacement cost thereof to the retailer within thirty days prior to the date of sale, offer for sale or advertisement for sale, as the case may be, in the quantity last purchased, whichever is lower, from either of which there shall be deducted all trade discounts, except customary discounts for cash, and (ii) to either of which there shall be added the following items of expense:
>
> "(1) Freight charges not otherwise included in the cost of the article, product or item of merchandise, but which freight charges shall not be construed as including cartage to retail outlet if done or paid for by the retailer;
>
> "(2) A markup to cover, in part, the cost of doing business, which markup in the absence of proof of a lesser cost, shall be seven percent of the aggregate of invoice cost or replacement cost (whichever is used), less trade discounts as aforesaid, and plus said freight charges."

Subsection (b) defines "cost" for a wholesaler and is substantially the same, except the markup for the cost of doing business is four percent.

Wheeling Wholesale's argument that the provision in *W. Va. Code, 47-11A-6*, permitting the deduction of "all trade discounts, except customary discounts for cash," is irrational and discriminatory. We are without any evidence to ascertain **[**151]** whether any "customary discounts for cash" are involved in this case. Furthermore, *W. Va. Code, 47-11A-8*, provides a series of absolute exemptions to a charge of selling below cost, one of which is: "(d) In an endeavor **[***19]** in good faith to meet the legal prices of a competitor as herein defined selling the same article, product or item of merchandise, in the same locality or trade area." [9]

[*20]** **[*545]** *Cohen v. Frey & Son, Inc., 197 Md. 586, 80 A.2d 267 (1951)*, on which Wheeling Wholesale heavily relies, can be distinguished. In *Cohen,* the Maryland Court of Appeals held that the Maryland Unfair Sales Act was unconstitutionally arbitrary and discriminatory because it did not allow a "cash and carry" wholesaler to deduct customary cash discounts. The court placed considerable emphasis on the facts established at trial involving the substantial disparity occasioned by the Maryland statute's distinction between costs for regular wholesalers and cash discount wholesalers. This distinction was so substantial from a factual standpoint that it caused the court to find the statute to be arbitrary.

In fact, it would appear that *Cohen's* actual holding was limited to this statement: "A statute or ordinance or an administrative order may be valid at one time or place under certain conditions, and invalid at another time and place under other conditions." *197 Md. at 604, 80 A.2d at 276*. The Maryland court had earlier upheld the constitutionality of the statute in *Blum v. Engelman, 190 Md. 109, 57 A.2d 421 (1948)*. It appears that it was the peculiar factual pattern **[***21]** in *Cohen* that brought the court to a different conclusion. [10]

Based on the limited allegations and factual development contained in the pleadings, we are unable to agree with Wheeling Wholesale's argument on the customary cash discount language as rendering the Act violative of substantive due process.

In adopting the Unfair Practices Act, the legislature has sought to penalize retailers and wholesalers that engage in unfair competition. We have no difficulty in concluding that the protection of healthy competition in this State is a legitimate goal **[***22]** of the legislature and one that obviously affects the public welfare. We also conclude that the method chosen to attain this laudable purpose is rational in the context of this case which permits a civil action for damages and an injunction by those injured. Therefore, we conclude that the Unfair Practices Act is a rational means of achieving the legitimate legislative goal of promoting healthy competition in this State by penalizing

---

[9] ***HN6***[] The full text of *W. Va. Code, 47-11A-8*, is:

> "The provisions of this article shall not apply to any sale made:
>
> "(a) In closing out in good faith the owner's stock or any part thereof for the purpose of discontinuing his trade in any such stock or commodity, and in the case of the sale of seasonal goods or to the bona fide sale of perishable goods to prevent loss to the vendor by spoilage or depreciation;
>
> "(b) When the goods are damaged or deteriorated in quality or where merchandise is sold in bona fide clearance sales, and, in each case, merchandise is advertised, marked and sold as such;
>
> "(c) By an officer acting under the orders of any court;
>
> "(d) In an endeavor in good faith to meet the legal prices of a competitor as herein defined selling the same article, product or item of merchandise, in the same locality or trade area;
>
> "(e) For charitable purposes or to relief agencies;
>
> "(f) Where merchandise is sold on contract to departments of the government or governmental institutions."

[10] It is quite possible that a full evidentiary hearing could establish that the exclusion of customary cash discounts has a substantial effect on the cost equation, thereby rendering the equation completely arbitrary and irrational. Under our least intrusive remedy doctrine, such a finding would only require us to strike this portion of the cost formulation and not the entire Act. *Waite v. Civil Service Comm'n, 161 W. Va. 154, 241 S.E.2d 164 (1978)*.

retailers and wholesalers that sell goods below cost in an attempt to destroy competition and does not violate substantive due process concepts **[**152]** of *Article III, Section 10 of the West Virginia Constitution.* [11]

II.

VAGUENESS

[*23]** The second certified question raises the issue of whether or not the Act is unconstitutionally vague under the Due Process Clauses of the West Virginia Constitution and the *Fourteenth Amendment of the United States Constitution*. The terms and provisions of the Act specifically challenged as undefined and vague are in *W. Va. Code, 47-11A-6*, which includes the terms "applicable taxes," "trade discounts," and "customary discounts for cash," and *W. Va. Code, 47-11A-8(d)*, which states that the Act is inapplicable to any **[*546]** sale made "in an endeavor in good faith to meet the legal prices of a competitor." Wheeling Wholesale contends that these undefined terms and provisions make it impossible for a retailer or wholesaler to clearly and fully understand the meaning of the Act.

Our general standard for determining if a particular statute is unconstitutionally vague has traditionally been applied to criminal statutes as indicated by Syllabus Point 1 of *State ex rel. Myers v. Wood, 154 W. Va. 431, 175 S.E.2d 637 (1970)*:

> "There ***HN7***[] is no satisfactory formula to decide if a statute is so vague as to violate the due process clauses of the State and Federal Constitutions. The basic **[***24]** requirements are that such a statute must be couched in such language so as to notify a potential offender of a criminal provision as to what he should avoid doing in order to ascertain if he has violated the offense provided and it may be couched in general language."

See also State ex rel. Whitman v. Fox, 160 W. Va. 633, 236 S.E.2d 565 (1977); *State v. Flinn, 158 W. Va. 111, 208 S.E.2d 538 (1974)*; *State v. Harrison, 130 W. Va. 246, 43 S.E.2d 214 (1947)*.

The United States Supreme Court in *Grayned v. City of Rockford, 408 U.S. 104, 108-09, 33 L. Ed. 2d 222, 227-28, 92 S. Ct. 2294, 2298-99 (1972)*, explained the reasons why vague laws offend due process:

> "First, because we assume that man is free to steer between lawful and unlawful conduct, we insist that laws give the person of ordinary intelligence a reasonable opportunity to know what is prohibited, so that he may act accordingly. Vague laws may trap the innocent by not providing fair warning. Second, if arbitrary and discriminatory enforcement is to be prevented, laws must provide explicit standards for those who apply them. A vague law impermissibly delegates basic policy matters to policemen, **[***25]** judges, and juries for resolution on an *ad hoc* and subjective basis, with the attendant dangers of arbitrary and discriminatory applications." (Footnotes omitted).

The vagueness standard may vary depending on the type of statute involved. In *Village of Hoffman Estates v. Flipside, Hoffman Estates, 455 U.S. 489, 498-99, 71 L. Ed. 2d 362, 371-72, 102 S. Ct. 1186, 1193*, *reh'g denied, 456 U.S. 950, 72 L. Ed. 2d 476, 102 S. Ct. 2023 (1982)*, the United States Supreme Court discussed this aspect of the vagueness standard, where a licensing ordinance was attacked as vague:

> "The ***HN8***[] degree of vagueness that the Constitution tolerates--as well as the relative importance of fair notice and fair enforcement--depends in part on the nature of the enactment. Thus, economic regulation is subject to a less strict vagueness test because its subject matter is often more narrow, and because businesses, which face economic demands to plan behavior carefully, can be expected to consult relevant legislation in advance of action. Indeed, the regulated enterprise may have the ability to clarify the meaning of

---

[11] Several recent United States Supreme Court cases have rejected substantive due process attacks on economic regulations that have a far more severe monetary impact. *E.g., Hodel v. Indiana, 452 U.S. 314, 69 L. Ed. 2d 40, 101 S. Ct. 2376 (1981)*; *Usery v. Turner Elkhorn Mining Co., 428 U.S. 1, 49 L. Ed. 2d 752, 96 S. Ct. 2882 (1976)*.

> the regulation by its own inquiry, or by resort to an administrative **[**153]** **[***26]** process. The Court has also expressed greater tolerance of enactments with civil rather than criminal penalties because the consequences of imprecision are qualitatively less severe."

See also Papachristou v. City of Jacksonville, 405 U.S. 156, 31 L. Ed. 2d 110, 92 S. Ct. 839 (1972). *See also Storrs v. State Medical Board, 664 P.2d 547* (Alaska), *cert. denied, 464 U.S. 937, 78 L. Ed. 2d 312, 104 S. Ct. 346 (1983)*; *Town of Brookline v. Commissioner of Dept. of Environmental Quality Engineering, 387 Mass. 372, 439 N.E.2d 792 (1982)*; *City of Philadelphia v. Cohen, 84 Pa. Commw. 200, 479 A.2d 32 (Pa. Commw. Ct. 1984)*.

We have not had occasion to adopt this aspect of the vagueness standard, but we believe it is appropriate under the Due Process Clause vagueness doctrine to apply a less restrictive test to statutes or ordinances involving economic matters in which criminal penalties are not at issue.

Furthermore, in a criminal prosecution under the Robinson-Patman Act, where the standard in Section 3 making it unlawful to sell goods at "unreasonably low prices for the purpose of destroying **[*547]** competition or eliminating a competitor" was challenged, the **[***27]** United States Supreme Court in *United States v. National Dairy Products Corp., 372 U.S. 29, 9 L. Ed. 2d 561, 83 S. Ct. 594*, *reh'g denied, 372 U.S. 961, 10 L. Ed. 2d 13, 83 S. Ct. 1011 (1963)*, declined to hold that this language was void for vagueness. The United States Supreme Court reviewed the history of the Act and noted "the business practices against which § 3 was unmistakenly directed" were apparent. *372 U.S. at 36, 9 L. Ed. 2d at 567, 83 S. Ct. at 599*. It also alluded to the fact that the vagueness doctrine did not apply with the same degree of rigor as it would where "constitutionally protected and socially desirable conduct" is involved. *372 U.S. at 36, 9 L. Ed. 2d at 568, 83 S. Ct. at 600*. Several courts have addressed this same argument with regard to sales-below-cost statutes and have rejected the same. *Baseline Liquors v. Circle K Corp., supra; Trade Commission v. Skaggs Drug Centers, Inc., supra; Red Owl Stores, Inc. v. Commissioner of Agriculture, 310 N.W.2d 99 (Minn. 1981)*, *appeal dismissed, 456 U.S. 986, 73 L. Ed. 2d 1280, 102 S. Ct. 2263 (1982)*; *Flank Oil Co. v. Tennessee Gas Transmission Co., supra.* Consequently, we do not find the challenged **[***28]** portions of our Unfair Practices Act to be unconstitutionally vague under this less restrictive vagueness standard.

III.

SPECIAL LEGISLATION

The third certified question concerns whether or not the Unfair Practices Act is special legislation, in violation of ***HN9***[🡅] *Article VI, Section 39 of the West Virginia Constitution*, which states, in part: "And in no case shall a special act be passed, where a general law would be proper, and can be made applicable to the case, nor in any other case in which the courts have jurisdiction, and are competent to give the relief asked for." In *Atchinson v. Erwin, 172 W. Va. 8, 302 S.E.2d 78 (1983)*, we discussed at some length this provision against special legislation. We began by stating that:

> "The determination of whether a statute is general is essentially a classification analysis, and thus we have utilized constitutional equal protection concepts in addressing whether a statute is general or special. In Syllabus Point 7 of *State ex rel. Heck's, Inc. v. Gates, [149 W. Va. 421, 141 S.E.2d 369 (1965)]*, we said:
>
>> ***HN10***[🡅] 'The constitutional requirement that a law be general does not imply that it must be uniform in its operation and effect **[***29]** in the full sense of its terms. If a law operates alike on all persons and property similarly situated, it is not subject to the objection of special legislation or class legislation and does not violate the *Equal Protection Clause of the Fourteenth Amendment to the Constitution of the United States*.'
>>
>> *See also Shackleford v. Catlett, [161 W. Va. 568], 244 S.E.2d 327 (1978)*; *Cimino v. Board of Education of County of* ***[**154]*** *[158 W. Va. 267], 210 S.E.2d 485 (1974)*." __ W. Va. at __, 302 S.E.2d at 83.

We went on to point out that a number of states have applied equal protection concepts to their constitutional prohibition against special legislation. *E.g., State v. Lewis, 559 P.2d 630* (Alaska), *cert. denied sub nom. Lewis v. Alaska, 432 U.S. 901, 53 L. Ed. 2d 1073, 97 S. Ct. 2943 (1977)*; *Anderson v. Wagner, 79 Ill.2d 295, 37 Ill. Dec. 558, 402 N.E.2d 560 (1979)*, *appeal dismissed sub nom. Woodward v. Burnham City Hospital, 449 U.S. 807, 66 L. Ed. 2d 11, 101 S. Ct. 54 (1980)*; *Paul Kimball Hospital, Inc. v. Brick Township Hospital, Inc., 86 N.J. 429, 432 A.2d 36 (1981)*.

Finally, in *Atchinson,* we **[***30]** observed that the statute in question dealt with economic matters and did not involve fundamental or constitutional rights and concluded in Syllabus Point 7:

> "Where ***HN11***[] economic rights are concerned, we look to see whether the classification is a rational one based on social, economic, historic or geographic factors, whether it bears a reasonable relationship to a proper governmental purpose, and whether all persons within the class are treated equally. Where such classification is rational and bears the requisite reasonable relationship, the statute does **[*548]** not violate *Section 39 of Article VI of the West Virginia Constitution.*"

Wheeling Wholesale offers two arguments to support its claim that the Act violates our constitutional prohibition against special legislation. First, it does not operate uniformly on all retailers because independent retailers must buy products from wholesalers that are required to markup their prices in accordance with the Act while chainstore retailers can purchase goods directly from manufacturers that are not covered by the Act and therefore are not subject to the same markup price requirements. Second, the Act permits different standards **[***31]** and prices to be imposed depending on the trade area in which the retailer or wholesaler is located, under *W. Va. Code, 47-11A-8(d)*. Wheeling Wholesale, therefore, contends that the Act does not operate uniformly on all persons in the same class and is not rationally related to a proper governmental purpose. Again, we disagree.

The classification of retailers and wholesalers is natural and reasonable because goods are sold both by retailers or wholesalers. The fact that chainstore retailers buy from manufacturers does not exempt them from the Act when they sell at retail. Furthermore, this set of circumstances is not involved in this case and we decline to discuss hypothetically what cost advantage, if any, may occur. The fact that the cost provision in *W. Va. Code, 47-11A-8(d)*, is tied to the geographical area is not irrational since this provision relates to an exemption from the provisions of the Act to meet local competition. [12] We, therefore, conclude that Wheeling Wholesale's argument on special legislation lacks merit.

[*32]** IV.

SHERMAN ACT

The final question presented is whether or not the Unfair Practices Act should be declared void as violating the federal antitrust prohibitions contained in the Sherman Act, *15 U.S.C. § 1*. [13] Wheeling Wholesale argues that the Unfair Practices Act is a price-fixing statute analogous to a fair trade law, which allows a manufacturer to set the minimum price at which its products can be sold. It points out that state **[**155]** fair trade laws were specifically

---

[12] *See* note 9, *supra,* for the full text of *W. Va. Code, 47-11A-8*.

[13] ***HN12***[] The Sherman Act, *15 U.S.C. § 1*, provides:

> "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal. Every person who shall make any contract or engage in any combination or conspiracy hereby declared to be illegal shall be deemed guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding one million dollars if a corporation, or, if any other person, one hundred thousand dollars, or by imprisonment not exceeding three years, or by both said punishments, in the discretion of the court."

exempted from Sherman Act coverage until the U.S. Consumer Goods Pricing Act of 1975, 89 Stat. 801, was passed by Congress removing this exemption. This point was recognized in *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 102, 63 L. Ed. 2d 233, 241, 100 S. Ct. 937, 941-42 (1980)*:

> "For many years . . . . the Miller-Tydings Act of 1937 permitted the States to authorize resale price maintenance. 50 Stat. 693. The goal of that statute was to allow the States to protect small retail establishments that Congress thought might otherwise be driven from the marketplace by large-volume discounters. But in 1975 that congressional permission was rescinded. The Consumer **[***33]** Goods Pricing Act of 1975, 89 Stat. 801, repealed the Miller-Tydings Act and related legislation. Consequently, the Sherman Act's ban on resale price maintenance now applies to fair trade contracts unless an industry or program enjoys a special antitrust immunity." (Footnote omitted). [14]

[*34]** Wheeling Wholesale argues that our Unfair Practices Act is analogous to a fair **[*549]** trade law and, therefore, violates the Sherman Act. We are cited several United States Supreme Court cases, which hold that even though a state statute violates the Sherman Act, the statute may be upheld if it falls within the state immunity exception to the Sherman Act. [15]

We decline to address the state immunity issue because immunity only arises as a consideration after the challenged state statute has initially been found to violate the Sherman Act. The threshold inquiry, therefore, is whether our Unfair Practices Act violates the Sherman Act. *Cf., California Retail Liquor* ***[***35]*** *Dealers, 445 U.S. at 102, 63 L. Ed. 2d at 241, 100 S. Ct. at 941* ("The threshold question is whether California's plan for wine pricing violates the Sherman Act."). We do not agree with Wheeling Wholesale's argument that fair trade laws are analogous. As explained in *California Retail Liquor Dealers,* fair trade laws are price maintenance schemes. Their distinctive characteristic is a provision that enables a trademark owner, usually a manufacturer, to set by contract with a retailer or wholesaler the price at which the trademarked product should be sold. *See* 1A R. Callman, *supra,* § 6.03.

We have not been cited nor have we found any United States Supreme Court case which has had occasion to directly consider whether a state sales-below-cost statute violates the Sherman Act. In *Safeway Stores, Inc. v. Oklahoma Retail Grocers Ass'n, Inc., 360 U.S. 334, 3 L. Ed. 2d 1280, 79 S. Ct. 1196 (1959)*, the United States Supreme Court upheld Oklahoma's statute prohibiting sales below cost against an equal protection challenge. It declined to address the claim that the statute was preempted by federal antitrust laws. *360 U.S. at 342 n.7, 3 L. Ed. 2d at 1286 n.7, 79 S. Ct.* ***[***36]*** *at 1202 n.7*.

The Ninth Circuit Court of Appeals had this issue before it in *William Inglis & Sons Baking Co. v. ITT Continental Baking Co., Inc., 668 F.2d 1014 (9th Cir. 1981)*, *cert. denied, 459 U.S. 825, 74 L. Ed. 2d 61, 103 S. Ct. 57 (1982)*, and had no difficulty in upholding California's sales-below-cost statute against a claim that the field had been preempted by the federal antitrust laws. Although the issue that it violated federal antitrust laws was not directly raised, it is clear from the court's comments in note 62 that it found the statute to be completely compatible with federal antitrust laws:

> "The inference of preemption is especially inappropriate because the basic **[**156]** purposes of the state and federal statutes are similar. *See Exxon Corp. v. Governor of Maryland, [437 U.S. 117, 132-33, 57 L. Ed. 2d 91, 104-05, 98 S. Ct. 2207, 2217 (1978)]*. The California statute was designed to 'safeguard the public against the creation or perpetuation of monopolies and to foster and encourage competition.' *Cal.Bus. & Prof. Code § 17001* (West 1964) (statement of legislative purpose); *Harris v. Capitol Records Distributing Corp., 64 Cal.2d*

[14] Our Fair Trade Act, *W. Va. Code, 47-11-1* through -8, was repealed in 1976, presumably in recognition that, with the repeal of the Miller-Tydings Act of 1937, it was in conflict with the Sherman Act. *See* 1976 W. Va. Acts ch. 115.

[15] *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., supra; Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*; *see also Hoover v. Ronwin, 466 U.S. 558, 80 L. Ed. 2d 590, 104 S. Ct. 1989 (1984)*; *Community Communications Co. v. City of Boulder, 455 U.S. 40, 70 L. Ed. 2d 810, 102 S. Ct. 835 (1982)*.

> *454, 461,* **[***37]** *413 P.2d 139, 144, 50 Cal.Rptr. 539, 544 (1966)*. The purposes of the Sherman Act hardly could be stated more succinctly." *668 F.2d at 1050*.

See also Baseline Liquors v. Circle K Corp., supra; Walker v. Bruno's, Inc., 650 S.W.2d 357 (Tenn. 1983).

We have initially set out the legislative intent under our Act, which is to prevent sales at less than cost for purposes of injuring competition. *W. Va. Code, 47-11A-1* and -2. This type of predatory price fixing lies at the heart of the Sherman and Robinson-Patman Acts as evidenced by this statement from *United States v. National Dairy Products Corp., 372 U.S. 29, 33-34, 9 L. Ed. 2d 561, 566, 83 S. Ct. 594, 598*, *reh'g denied, 372 U.S. 961, 10 L. Ed. 2d 13, 83 S. Ct. 1011 (1963)*:

> "The history of § 3 of the Robinson-Patman Act indicates that selling below cost, unless mitigated by some acceptable business exigency, was intended to **[*550]** be prohibited by the words 'unreasonably low prices.' That sales below cost without a justifying business reason may come within the proscriptions of the Sherman Act has long been established. *See, e.g., Standard Oil Co. v. United States, 221 U.S. 1 [55 L. Ed. 619, 31 S.* **[***38]** *Ct. 502, 34 L.R.A. N.S. 834]* (1911). Further, when the Clayton Act was enacted in 1914 to strengthen the Sherman Act, Congress passed § 2 to cover price discrimination by large companies which compete by lowering prices, 'oftentimes below the cost of production . . . . with the intent to destroy and make unprofitable the business of their competitors.' H.R. Rep. No. 627, 63d Cong., 2d Sess. 8. The 1936 enactment of the Robinson-Patman Act was for the purpose of 'strengthening the Clayton Act provisions,' *Federal Trade Comm'n v. Anheuser-Busch, Inc., 363 U.S. 536, 544 [4 L. Ed. 2d 1385, 1390, 80 S. Ct. 1267, 1271-72]* (1960), and the Act was aimed at a specific weapon of the monopolist--predatory pricing. Moreover, § 3 was described by Representative Utterback, a House manager of the joint conference committee, as attaching 'criminal penalties in addition to the civil liabilities and remedies already provided by the Clayton Act.' 80 Cong. Rec. 9419."

We, therefore, conclude that *W. Va. Code 47-11A-1* through -14, does not violate the antitrust provisions of the Sherman Act, *15 U.S.C. § 1*, since both acts prohibit sales below cost for the purpose of injuring or destroying **[***39]** competition. [16] Because we find no violation of the Sherman Act, there is no need to discuss the applicability of the state exemption doctrine under the Sherman Act.

[*40]** The certified questions having been answered, this case is dismissed from the docket.

Answered and Dismissed.

End of Document

[16] Trade associations have been prosecuted either under the Sherman Act or Federal Trade Commission regulations for attempting to stabilize prices or set minimum prices under the guise of enforcing a state sales-below-cost statute. Since only the retailer or wholesaler can possibly know what its own costs are, any attempt by a trade association to inform retailers and wholesalers what their costs should be for a particular product, with an implied threat of prosecution under the state sales-below-cost statute, could possibly subject the association to an antitrust action. In such an event, the fact that the association was attempting to enforce a sales-below-cost statute would not be a valid defense. *See generally Schnapps Shop, Inc. v. H.W. Wright & Co., Ltd., 377 F. Supp. 570 (D. Md. 1973)*; *California Retailer Grocers & Merchants Ass'n v. United States, 139 F.2d 978 (9th Cir. 1943)*, *cert. denied,* ***322 U.S. 729, 88 L.
